Did you know?

☐ The top three causes of 1990 farmrelated injuries in Iowa were machinery (32 percent of all injuries), animals (17 percent), and slips and falls (11 percent). However, the severity of these injuries differs. Only 14 percent of the injuries caused by animals resulted in hospitalization; 19 percent of injuries caused by falls and 26 percent of injuries caused by machinery resulted in a hospital stay.

☐ Acute chemical injury accounted for only 2 percent of the total reported agricultural injuries in 1990. Real concern about chemicals is long-term exposure.

☐ Farm machinery, including tractors, was the number one killer on lowa farms with 37 deaths reported.

☐ Youths age 19 and younger made up 20 percent of the total number of farm-related injuries.

Based on information from the Iowa Department of Public Health, Sentinel Project Researching Agricultural Injury Notification Systems (SPRAINS). Prepared by Charles Schwab, extension safety specialist, and Laura Miller, extension communications. Design by Valerie King.

Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Nolan R. Hartwig, interim director, Cooperative Extension Service, Iowa State University of Science and Technology, Ames, Iowa

... and justice for all

The Iowa Cooperative Extension Service's programs and policies are consistent with pertinent federal and state laws and regulations on nondiscrimination. Many materials can be made available in alternative formats for ADA clients.

For more information

Contact your Iowa State University Extension office for printed materials, displays, and other educational resources to learn about farm safety or to teach others about farm safety. A number of publications in the Safe Farm series also are available. Titles in this series include various aspects of farm safety: ☐ Extra riders mean extra dangers, Pm-1518c ☐ Know laws about youth farm workers, Pm-1518f

☐ Manure storage poses
invisible risks, Pm-1518k

Evaluate equipme	nt
for dangers, Pm-12650	;

☐ Use tractors with
ROPS to save lives, Pm-
1265d

☐ Cover up with cover
alls and aprons, Pm-
15635

	Keep gloves handy for	٢
pes	sticide work, Pm-15186	9

Safe Farm is an Iowa State University Extension project helping to make Iowa farms a safer place to work and live.
