### A STUDY AND EVALUATION OF THE GREATER NORTH DAKOTA ASSOCIATION

Creighton J. Overmoen, Master of Science

The thesis here abstracted was written under the direction of Dr. Donald G. Anderson, approved by Oswald M. Hager and Courtney F. Schley as members of the examining committee, of which Dr. Anderson was chairman.

This thesis summarises the Greater North Dakota Association's major activities, especially those significant to the areas of marketing. Information was largely compiled from the "<u>North Dakotan</u>," the GNDA magazine, newspaper articles and personal interviews.

The idea of the Greater North Dakota Association came into being when in May, 1924, a small group of interested businessmen gathered in Valley City to establish the Association.

The Association in the early 1920's carried out an agreesive five year membership program. Another important early goal of the Association was an extensive advertising program aimed at attracting settlers to the state.

Activities of the Association's Agricultural Committee are discussed in detail. Some of the significant accomplishments of this committee include introduction of better seed and grain varieties, promotion of cattle feeding, aid in establishing local fertilizer manufacturing, improved livestock herds, irrigation development and related agricultural improvements.

There were significant accomplishments in livestock and crop conditions between 1925 and 1964. Ownership of farms increased. GNDA has had a major part in the agricultural progress of the state of North Dakota. The Association has been a militant force in the Missouri River program.

GNDA's services to retailers have included marketing improvement programs, sales institutes, and management.

The GNDA Publicity and Public Affairs Department is the communication arm of the Association. This department has publicized industrial and tourist opportunities.

GNDA has also assisted in the organization of the North Dakota Economic Development Commission, the Inventor's Congress, and the Winter Shows.

This thesis submitted by Creighton John Overmoen in partial fulfillment of the requirements for the Degree of Master of Science in the University of North Dakota is hereby approved by the Committee under whom the work has been done.

### ACKNOWLEDGMENTS

The writer wishes to express his sincere appreciation to Dr. Donald G. Anderson for his encouragement and guidance during the preparation of this study.

Appreciation is also extended the staff of the Greater North Dakota Association who cooperated in furnishing research material.

Special thanks is extended to Mr. Herman Stern of Valley
City, North Dakota who encouraged the writer and furnished numerous
anecdotes about GNDA in the early days.

### CHAPTER I

# PURPOSE AND ORGANIZATION

evaluate many of the programs particularly those pertaining to marketing attention is accorded to the role of the Greater North Dakota Association which the Greater North Dakota Association has developed. In so doing The Purpose .- The purpose of this study is to describe and in the economic progress of North Dakota.

discuss and evaluate all of the Association's activities would require Limitations of Study .- The study will cover what the writer believes are the significant accomplicaments of the Association. a much larger study than is intended here.

very little additional published material available on the Greater North Cakota Association. As we might expect, the information in the GNDA is the official magazine of the Greater North Dakota Association which publication portrayed GMDA in a favorable manner. There is a dearth Association's objectives. However, there is some evidence that the has been published monthly since 1925. Much of this information is Sourges of Information .- A major part of the information for not as objective as a researcher might prefer. However, there is this study has been taken from the issues of the Norta Dakotan. of written material on persons and groups which opposed the

Farmers Union, at one time, expressed dissent with GNDA regarding the corporation farming bill of 1932. The Farmers Union opposed GNDA in amendments to this legislation in 1941.

Approach. -- The approach in gathering data for this study has been to:

- A. Review North Dakotan magazines.
- B. Acquire information on GNDA from other publications.
- C. Fersonally interview officers of GNDA and other individuals with historical knowledge of GNDA activities.

The terms, Greater North Dakota Association, GNDA, and the Association will be used interchangeably in this study. The Association is also known as the State Chamber of Commerce, but will not be so designated in this writing. The writer will organize and present this information in thesis form to show the part that GNDA has had in the economic development of North Dakota.

Organization of the Study. -- Chapter II is concerned with the early history of GNDA, how and why it was organized, as well as early organizational procedures.

Chapter III discusses some of the more important accomplishments the Association has attained in the field of agriculture and water development.

Chapter IV describes tourist promotion, and tourist attractions engendered by or with the aid of the Association.

<sup>1&</sup>quot;Corporation Farm Law Activity Exposes Farmers Union Land Program," North Dakotan, XVI. No. 3 (March, 1941), 3.

Chapter V analyzes two important state organizations developed with the assistance of GNDA, namely: The North Dakota Economic Development Commission, and the inventor's Congress.

Chapter VI explains the marketing improvement programs sponsored and co-sponsored by GNDA.

Chapter VII contains the summary and conclusions of the study.

### CHAPTER II

### THE EARLY HISTORY OF GNDA

The idea of the Greater North Dakota Association came into being when in May, 1924, a small group of interested North Dakota business-men gathered in Valley City to establish the Association. <sup>1</sup> This group of business leaders was spearheaded by Herman Stern, a Valley City business leader. The purposes of the organization were to promote a better business and agricultural climate within the state and to foster better publicity outside the state.

On July 13, 1925, officers of the Association met in Grand Forks to draw up articles of incorporation. On November 18, 1925, Robert Byrne, secretary of state for North Dakota, issued the official charter. <sup>2</sup>

Under Article 3 outlining the purposes and general nature of the new corporation, the following paragraph appeared:

(a) To promote, foster and encourage the development of the State of North Dakota, to act as its parent development body coordinating with all developments and advertising efforts aiming at the improvement of the general economic condition of all business in the State and all the people of the State; to carry on such campaign of advertising and publicity as may be necessary to interpret North Dakota's future, its resources and advantages to people outside the State, as well as residents of the State,

<sup>1&</sup>quot;40 Years Ago GNDA Organized," Grand Forks Herald, IVXXC, No. 156 (April 4, 1964), 8.

<sup>2</sup> Did.

and to plan and carry out a comprehensive program of industrial and economic development of the State. S

The Greater North Dakota Association's first slate of officers were:<sup>4</sup>

Arthur Johnson, Jamestown

C. E. Danielson, Minot

Major Stanley Washburn, Wilton

Fred A. Irish, Fargo

James S. Milloy, Pargo

H. T. Wickham, Minneapolis

T. A. Tollefson, Dickinson

The Association's first annual meeting was held in Pargo in 1926. This meeting was devoted to electing the first permanent board of directors and to planning the year's activities. The latter included an advertising-publicity campaign to attract more farming settlers to the state, and tourist information and development campaigns to divert more motorist traffic through North Dakota. The dissemination of maps, guides, and literature was thought to be an effective means of attracting tourists. The proposed program also included fostering the development of better roads.

Other proposed activities included agricultural development programs in cooperation with the State Agricultural College and other

SR. C. Crockett, "Comments by Crockett," North Dakotan, XXXIX, No. 3 (March, 1964), 2.

<sup>4</sup>mid.

organizations. Another goal was to increase industrial development in relation to the state's vast supply of lignite. A still unattained goal in 1964 was development of the proposed Missouri River Diversion project.<sup>5</sup>

The Greater North Dakota Association was not the first organization which promoted North Dakota. The old North Dakotan and Northwestern

Farmer, a journal of agriculture published at Hope, North Dakota, not only had the same name as the Greater North Dakota Association's present organ, but the objectives of this old magazine were similar to GNDA.

The office of the State Commissioner of Agriculture and Labor published numerous pamphlets which promulgated the state. The North Dakota Good Roads Association was an early promoter of good roads in North Dakota. However, the Greater North Dakota Association was the first statewide association which had a broad interest in the welfare of the state.

As stated, the Association originated in Valley City in June, 1925, but the main office was moved to Fargo on October 17, 1925. It was thought that because Fargo was the largest city in the state and a significant trading center it was the logical spot for the main office. The North Dakota Auto Association and the Greater North Dakota Association used a combined office until October, 1952.

Grand Forks Herald, op. cit., p. 1.

<sup>6</sup> Meter Tourist Traffic Sought for North Dakota," North Dakotan, I, No. 11 (April, 1926), 1.

## Early Organization Efforts

Free Towing Service from June 1 to September 15

In late October of 1925, the Association met and expressed satisfaction with the initial efforts of the fund-raising campaign. The campaign director, H. P. Wickham, of the Minneapolis chamber, made his final report. He indicated that the state was completely organized. All counties in the state were working on the finance campaign with encouraging success. The executive committee passed a resolution commending Mr. Wickham for his fine work. J. S. Milloy, secretary of the Association, was placed in complete charge of the Association under the Board of Directors. At this time Mr. Milloy and one stenographer were the only salaried employees of the Greater North Dakota Association.

Mr. Wickham had organized a contest in order to promote enthusiaem for the organizational drive. It was decided that a "Greater North Dakota Association Boosters' Trophy" would be awarded to the county achieving the best performance in the organizational fundraising drive.

The campaign closed November 7, 1925, after having been extended because of inclement weather and delays in getting supplies to the workers. Oliver County was the winner of the Greater North Dakota Association Boosters' Trophy in the contest between counties. This county collected a total of \$710 as compared with its assigned

<sup>16.116</sup> More Than 2,000,000 Farmers Roanhed in Initial Campaign."

talks given over KFNF, Saenandoah, Iowa, WOC, Davenport, Iowa and WHDI, Minneapolis, Minnesota. 17

The launching of the advertising campaign served to focus attention on North Dakota. By May, more than 1,000 farmers in other states had written to the Association—some seeking information on farms for sale, others securing assistance in planning a trip to North Dakota, and still others securing full information about the state. 18

The campaign to this point established the fact that many farmers in the midwestern states were interested in what North Dakota had to offer.

Renewed Drive for New Settlers in 1927. —The drive for new settlers commenced again in April, 1927, with fieldmen for the Greater North Dakota Association and land selling institutions calling on prospects who had made inquiries following the advertising campaign of the previous year. Many of these prospects were in southern Minnesota and Iowa.

In September, 1927, the Association started a campaign urging North Dakota tenant farmers to purchase the land they were reating.

The association distributed 10,000 large posters throughout the state.

Many newspapers in the state assisted in the campaign by carrying editorials urging the tenants to purchase the land.

<sup>17&</sup>quot;GNDA Will Use Radio Advertising," ibid., III, No. 9, 1.

<sup>19</sup> GNDA Campaign Speeding Sales is Now Underway, "North Dakotan, III, No. 4 (September I, 1927), 1.

The Association published a pamphlet "The Third Land Movement in North Dakota" in the fall of 1927. The pamphlet was aimed at both the tenant farmers and farmers in adjacent states who were interested in purchasing land in North Dakota. The pamphlet pointed out that land prices in North Dakota were low in comparison to land prices in Illinois and lows forty years before this time. These prices were from \$8 to \$10 an acre, compared with 1927 prices of \$200 an acre in Illinois and lows.

A Greater North Dakota Association survey in the fall of 1927 revealed that approximately \$5,000,000 worth of farm land had been purchased by North Dakota farmers and new settlers from other states during the three months preceding the survey. Between 140,000 and 150,000 acres of improved and unimproved farm land were included in the transactions. Prices ranged from as high as \$100 an acre for well improved farms to less than \$20 an acre for unimproved land. The average in 230 purchases was \$33 an acre. <sup>21</sup>

### CHAPTER III

### AGRICULTURE

North Dakota is essentially an agricultural state; therefore, it is fitting that in viewing the results of progress that has been attained, agricultural growth should be given a prominent place. Agriculture is responsible for up to 80 per cent of the income of the state of North Dakota; thus, the state must look to agriculture, either directly or indirectly, as the major source of its tax dollars. The predominance of agriculture is clearly illustrated by the extensive manner in which the Greater North Dakota Association has promoted agriculture, especially in its early years.

Agricultural Committee. —The first annual meeting of the Agricultural Committee which was formed in 1926 was held in July of this same year. This meeting set agricultural improvement as the primary goal of the committee. Since 1928 many functions have been performed by the Agricultural Committee of GNDA to improve agriculture. A complete enumeration and description of these activities would require a separate study. A few of the most significant accomplishments of the Greater North Dakota Association's Agricultural Committee are as follows:

1. Introduction of better seed and grain varieties, including rust-resistant wheat.

- Promotion of rolled barley feeding for cattle and pelleted barley feeding for hoge to increase livestock and hog production and also increased utilization of barley.
- 3. Aid in the establishment of localized fertilizer manufacturing and marketing and promotion of the use of fertilizer.
- 4. Research and promotion of amendments to existing legislation to foster support for the family farm and increased moneys for better agricultural research, experimentation, and marketing procedures.
- 5. Promotion of sound development of water and soil conservation practices and land management.
- 6. Sponsorship on a co-supporting basis of the North Dakota Winter Show and State Dairy Show.
- 7. Encouragement of farm youth organizations and service as an information center for farmers and ranchers.
- 8. Conducting of statewide educational and public information campaigns on the Wheat Referendum.
  - 9. Vigorous work in developing agricultural irrigation programs.

### Livestock Promotion

The Sire Campaign. —This campaign commenced in 1927. The purpose of the campaign was to improve and increase North Dakota livestock. The Association established a \$2,000 revolving fund to purchase pure-bred cattle breeding stock. The sires were purchased jointly by the Association and the Agricultural Credit Corporation for anticipated resale. Sires were purchased from North Dakota herds except for certain individual purchasers who desired animals which could not be obtained

within the state. 1 This breeding stock was later sold in different parts This one activity has been called the foundation of the early livestock industry in North Chakota. 2 of North Dakota.

trench silo campaigns were started in the counties along the east side The pure-bred sire campaign began on a small-scale in Traill being placed for 114 pure-bred animals. <sup>10.5,000</sup> Furebred Sires Fut on North Dakota Farms in the Past Four Years," [Did., IV. No. 7 (December 1, 1928), 1.

Hog Production. --In 1928, the Greater North Dakota Association started plans for an extensive campaign to help improve the feeding and sanitation methods of hog producers. At the time hog production provided nearly \$30 million income annually to the state.

B. E. Groom, then chairman of the Agricultural Committee, stated:

The future of the hog industry will entirely depend upon whether it will pay to raise hogs or not. In years of high prices, they might be made to pay when raised under almost any conditions, but in years of low prices it takes real planning in feeding and sanitation problems to show a net profit. 11

The hog campaign was planned primarily for the purpose of presenting the latest and best ideas on economical production through the use of better pasture crops (such as alfalfa, clover, grain, peas, and corn). Hog canitation was also considered important. Hog sanitation dealt with the problems of changing hog lots and cleaning buildings to prevent livestock losses from various diseases and parasites. 12

During the 1930's, hog production was put in a still more favorable light as financing was much easier to obtain for hogs than for either cattle or sheep. Breeding gilts (young female pigs) were readily available at prices much lower than other livestock. The hog program offered fewer obstacles in the way of finances than any other livestock programs. In the first place, a sufficient number of desirable breeding animals could be secured for a smaller cash outlay than any other class of

<sup>15.</sup> Farm Magazine Laude the North Dukota Winter Show, " Bid. XV, No. 4 (April, 1940), 2.

with the North Dakota Agricultural College and the Extension Department.

In addition, other commercial organizations interested in improving the seed used in North Dakota co-operated with the project.

A series of economic conferences had been held throughout the state during the previous winter. In attendance at these meetings were leading farmers and business men who discussed farm problems. These discussions resulted in the establishment of the seed grain program.

The "Pure Seed Grain" program was launched in November,

1928, by the Greater North Dakota Association's agricultural committee.

A preliminary survey of the seed situation in the state indicated that
there was an urgent need for seed of the best varieties for most farms. 18
More than 60,000 bushels of pure seed grain of standard varieties were
approved for use in the program.

The types of grain that were emphasized in the campaign were Mindum and Kubanka Durum; Ceres and Marquis Wheat; Victory and Gopher Oats; Bison, Linota and Number 119 Flax; and Manchuria, Trebi and Hannachen Barley. Pure seed of these types was sold to eligible farmers. Only farmers with a suitable 10 or 15 acre tract of land ready for pure seed were eligible purchasers. 17

The program proceeded by the allotment enough of pure seed to farmers to plant 10 to 15 acres. The participating farmers then harvested the grop and in the next grop year distributed the seed to an

<sup>16&</sup>quot;Seed Grain Project Planned by GNDA," ibid., IV, No. 4 (September 1, 1928), 3.

<sup>17&</sup>quot;Seed Project to Reach 30 Counties," ibid., IV, No. 6 (November 1, 1928), 4.

additional group of farmers. This method promulgated seed and within acres yielded 16 bushels per acre for each of three years, the original 15 acres produced enough grain to plant approximately 28,000 acres two or three seasons pure seed became plentiful. Assuming that 15 (planting at the rate of approximately one bushel to the acre). 18

many organizations placed their efforts benind this program in an attempt The use of to rid the state of the tremendous loss of income resulting from grain After the start of the Association's campaign for pure soed, poor-quality seed had unfavorably affected total cash receipts from production using light, unclean, mined, and diseased seed. grain through deckage and down grading. 19

By 1930, North Dakota was considered a leader in crop improvement work in the United States. 20 Production soreage in North Dakota exceeded that of other states after three years although organized seed improvement work was only three years old in North Dakota.

Flax Institute of the United States. The main objectives of the Institute Greater North Dakota Association handled the secretarial work for the quality of flax grown in the Northwest. Improvement in the quality of Ine Greater North Dakota Association was at the front in the flax was especially important for the marketing of this crop as the were ways and means of increasing the quantity and improving the promotion of pure seed in the state. Beginning in July, 1931, the

<sup>20</sup> Did.

manufacturers of products from flax needed the best available grain in order to compete with flax substitutes. <sup>21</sup> Once the importance of good seed was proven to the farmers most of them established good seed programs.

The Greater North Dakota Association continues to stress the planting of better seed and grain varieties to aid North Dakota farmers in marketing their products.

Water Conservation, Irrigation, Diversion

Since its founding, the Greater North Dakota Association has promoted a sound development of water and soil conservation practices and land management.

The War Department, in 1928, made a special report to Congress on the feasibility and economic benefits of a proposed Missouri River Diversion project in North Dakota. A preliminary investigation was conducted by government engineers in cooperation with North Dakotans familiar with the proposed project. <sup>22</sup>

The Association urged all parties interested in the development of the Missouri River to be represented at a meeting to be held October 22, 1931, in Bismarck, North Dakota. The purpose of this meeting was to discuss various projects involving the use of the water of the Missouri River and its minor tributaries. The development of water resources of all tributaries received extensive attention at this meeting. <sup>23</sup>

<sup>21</sup> Ibid.

<sup>22&</sup>quot;Diversion Project," North Dakotan, IV, No. 2 (July 1, 1928), 4.

<sup>23&</sup>quot;The River Development Sessions Are Arranged," ibid., VIII, No. 5 (October, 1931), 2.

Another gathering similar to this meeting in Bismarck took place in Mobridge, South Dakota, in November, 1931. This session, similar to the Bismarck meeting was designed to help the Army engineers prepare a comprehensive plan for flood control, navigation, water power, and irrigation. <sup>24</sup>

Both hearings were conducted under the direction of
Captain Theodore Wyman, Jr., district engineer, Kansas City, Missouri.
Specific topics discussed included: (1) flood control; (2) potential
navigation of the Missouri channel; (3) the amount of freight originating
in the state which might be transported to market by boat; (4) diversion
of a quantity of river water at flood stage into the Devils Lake and Stump
Lake reservoirs, as well as through the James and Sheyeane Rivers;
(5) irrigation possibilities and the need of water in many sections of the
state which might be ultimately served by impounding of waters; (6) the
bringing about of aids to the industrial development of the slope areas
through water power generation; and (7) adequate water supplies. 25

The Greater North Dakota Association never relaxed its efforts on the Missouri Diversion Project. It took note of the accumulated deficiency of surface water and urged a review of the river diversion plan in April, 1933. North Dakota interests had felt that a high dam erected on the Missouri would back-up the water sufficiently to provide an economical means of carrying a percentage of the flood water flow over the ridge of land. The Greater North Dakota Association's

<sup>24</sup> Ibid., p. 3.

<sup>25&</sup>quot;All Sections of North Dakota Appeal for Missouri River's Development," North Dakotan, VIII, No. 6 (November, 1931), 4.

representatives investigated this and found the idea to be highly impractical because of the lack of suitable foundations for such a dam.  $^{26}$ 

The Greater North Dakota Association officials also investigated the job being done by the Army engineers, and in 1933, the Association officials came to the conclusion that the engineers' work was not up to par. The Greater North Dakota Association proposed to have the Missouri project removed from the jurisdiction of the Army engineers and placed under the Public Works Program which considered the diversion engineering project to be more feasible. Officers of the Greater North Dakota Association were quite successful in keeping the adverse reports of engineers from coming to the attention of Congress. Army engineers, for years, had frowned upon the Missouri River project and termed it impractical. Each time these engineers sought to present an unfavorable report to Congress, the Greater North Dakota Association, working with senators and congressmen from the state, asked for further investigations. The Association believed that a complete study of the diversion would find it feasible. <sup>27</sup>

Missouri River Study in 1935. —In 1935, the President asked for a federal government study of the Missouri River. The Greater North Dakota Association took this opportunity to address a direct appeal to President Roosevelt asking for a federal study of irrigation and flood control. The Association believed that a larger total irrigable acreage

funds were supplemented by a special revolving fund of \$7,500 given by F. E. Murphy, then publisher of the <u>Minneapolis Tribune</u>, for purebred sire development. This loan has since been repaid in full. <sup>36</sup>

Usually, insufficient funds was not a problem. Cooperation of North Dakota citizens in promoting agricultural improvement programs has been more than adequate.

Significant improvements were realized in livestock and crop conditions between 1925 and 1964. Ownership of farms increased.

GNDA has had a major part in the agricultural progress of the state of North Dakota.

<sup>36&</sup>quot;Revolving Fund, " North Dakotan, XXI, No. 2 (February, 1946), 2.

### CHAPTER IV

### TOURIST PROMOTION

The Greater North Dakota Association has been a large promoter of tourism in North Dakota. This function would be expected because when GNDA was first formed, an important segment of the Association was the already existing Roosevelt Park Committee. Another of the existing groups that merged into the Association was the Northwest Group, headed by H. H. Westlie of Minot, North Dakota. In 1925 these two groups and the North Dakota Automobile Association merged into one organization, GNDA. Both of these organizations had a history of promoting tourism. <sup>1</sup>

The Association handled the tourist promotion activity without a special department from 1925 to 1956.

The Publicity and Public Affairs Department. -- The GNDA

Publicity and Public Affairs Department is the communications arm

of the Association. This department works to secure favorable

publicity for the state. The department has publicized industrial and

business opportunities. Additional functions of this arm of the

Association have been the encouragement of citizenship responsibilities

<sup>&</sup>lt;sup>1</sup>Personal interview with Duane Leffrig and Mariin Roberts, Ryder, North Dakota, July 1, 1964. These men were personally acquainted with A. H. Freeden, former Ryder Hotel owner who is generally given credit for founding the idea that promulgated Roosevelt Park in North Dakota.

and the promotion of free enterprise. Recent activities in this field included:

- 1. Publishing the monthly magazine, North Dakotan, which in 1964 had a circulation of 6,000.
- 2. Sponsoring and producing the weekly television show, "Progress North Dakota," telecast every Tuesday night over four North Dakota television stations in 1964.
- 3. Encouraging active participation in governmental affairs, promoting practical political courses, and conducting get-out-the vote campaigns.
- 4. Guiding the research and legislative activities that led to the formation of a North Dakota Travel Department in the State Highway Department.
- 5. Participating in activities of the Pacific Northwest Travel Association, including state travel editors' tour, displays at travel shows and distribution of literature in North Dakota.
- 6. Maintaining an information center which annually answers thousands of requests for information on the state. This information center operates a free film library featuring movie and slide presentations on citizenship, free enterprise, agriculture, and sales training.<sup>2</sup>
- 7. Cooperating closely with the U. S. Chamber of Commerce, local chambers, civic and booster clubs and service clubs.
- 8. Playing a major role in the development of Theodore Roosevelt National Memorial Park and other scenic and historic areas. This publicity department helps promote the state's two historical dramas, "Trail West," at Mandan and "Old Four Eyes," at Medora. S

An important service rendered by the Association in its early years was aiding the state's motor tourists. The Greater North Dakota Association and the North Dakota Automobile Association were combined in their early years.

<sup>&</sup>lt;sup>2</sup>A listing of films that can be borrowed without charge is available from the GNDA.

SUnpublished brochure of GNDA Activities, n.d.

In 1929, the Greater North Dakota Association's offices in Fargo comprised the largest tourist information bureau between the Twin Cities and the West Coast. Automobile trips were planned to any part of the United States or Canada. Maps, scenic literature, and tourist information were available to branch offices of the Chamber of Commerce in the 10 largest cities of the state. By this means of early promotion, hundreds of early visitors became prospective and often later permanent citizens of North Dakota. 4

Tourist Schools. --One of the more significant tourist promotion activities carried out by the Association was an extended series of tourist promotion schools, located at 64 North Dakota cities in the spring of 1936 and 1937. <sup>5</sup>

Staff members of the tourist bureau of GNDA acted as instructors.

Pupils were principally recruited from among hotel clerks, filling station attendants, garage workers, and restaurant and cafe employees. 6

The curriculum consisted of lectures with both written and oral examinations. Chambers of commerce, civic clubs, and service clubs sponsored the events in each locality. Representatives of the State Highway Department were invited to attend and to participate in the schools within the various highway divisions.

<sup>6&</sup>quot;Tourist Promotion Program Taking Shape," ibid., XII, No. 2 (February, 1937), 4.

<sup>7</sup> Ibid.

The value of the growing tourist trade to North Dakota was heavily from the Association. Descriptions of the state's scenic and historic Correct routing devices were established in each city the schools were coached with regard to the state motor vehicle laws areas and routes to such points were provided. The pupils attending receive complete road condition reports and extensive map services Methods of emouraging such travel was pointed out at in the state, and definite agencies at each point were singled out to and regulations. these schools. emphastred.

The schools were deemed successful. The function of the school was explained as follows:

Duty roads, lengthy detours, and broad expanses of prairie may constitute a deterrant to the development of a certain type of tourist travel, declares M. O. Ryan, secretary, GNDA, but if foreign car travel throughout this entire state could be courtecusly and intelligently served, North Dakota would quickly acquire a reputation which would comprise highly desirable advertising to thousands of other potential visitors. Advertising placed in the hands of prospective visitors, but much of the value of these mediums is lost, unless coupled with competent matter, descriptive pamphlets, and adequate services may be and correct routing practices and information services.

were chosen for their knowledge of proper routing methods and familiarity with North Dakota as a whole. These travel counselors were given oral 1000 who had attended the tourist schools, was made public by GNDA. An honor list of 80 North Dakota citizens, from among over This list was composed of the state's best 'travel counselors'' who and written tests at the promotion schools. 10

<sup>10&</sup>quot;Tourist Schools Produce State-Wide Honor Roll, " ibid., MI, No. 5 (May, 1937), 2.

Traffic Count. --By 1936, a highway census revealed that 31 per cent of traffic on North Dakota federal highways consisted of out-of-state vehicles. This was a ratio of approximately one out-of-state car to every two North Dakota cars. This census comprised a seven-day count, taken at 189 different points on the federal system in the state. For 438 cars counted on the entire state system, the percentage of out-of-state car licenses noted was 25.4. 11

In August, 1937, the first attempt was made to ascertain the origin of out-of-state automobiles on highways in North Dakota. The GNDA sponsored a state-wide traffic count at this time. Seventy-two committees in as many cities, participated. It was believed that by this and successive traffic counts in North Dakota and other Pacific northwest states, definite information could be gained which would reveal the areas in the United States and Canada which most heavily contributed to the existing travel. This data was to be employed in planning future tourist promotion activities and expenditures by both North Dakota and neighboring areas. <sup>12</sup>

The number of out of state cars by state were:

Minnesota	13,121
Montana	1,228
South Dakota	878
Wisconsin	858
Illinois	695
Iowa	594
California	486
Manitoba	477
Michigan	424

<sup>11.</sup> Good Roads Committees Manifest Real Activity, " ibid., XII, No. 2 (February, 1937), 4.

<sup>12,</sup> Origin of Foreign License Cars Noted in North Dakota Count, " fbid., KII, No. 8 (August, 1937), 4.

Washington	412
Saskatchewan	384
Kansas	356
Nebraska	249
Ohio	208
New York	199
Indiana	194
Oregon	192
Missouri	133
Texas	104
Alberta	93
Idaho	91
Optario	87
Oklahoma	84
Total cars	22,505 13

From a study of these records, GNDA attempted to identify those broken lines of travel which indicated tourist travel lost to North Dakota.

One example of the conclusions drawn by GNDA from that count was that although New York State was high in automobile registrations at Yellowstone Park, only 176 cars from this state were noted in the 1937 North Dakota traffic count. Wisconsin, California, Illinois, Indiana, and Ohio were other states from which heavy automobile traffic circumvented North Dakota. GNDA in analyzing this data, concluded that intermediate routing agencies were directing motorists to avoid North Dakota. Both the North Dakota Travel Association and the State Travel Department were organized largely because of the efforts of the Greater North Dakota Association in an attempt to correct the apparent detour. The North Dakota Travel Association is supported financially by the Greater North Dakota Association and the local chambers of commerce in North Dakota. The State Travel Department is a part of the State Highway Department.

Henry J. Moore of Islington, Ontario, in 1928. Mr. Moore was a The original idea of the peace garden was conceived by the late Bini

<sup>14</sup> North Dakotans Named Peace Garden Officials," North Dakotan, XI, No. 2 (February, 1956), 1.

organization adopted the idea. The site in the Turtle Mountains was finally selected because of its natural beauty, its location midway between the Atlantic and Pacific Oceans, and because it was thirty-five miles from the spot considered to be the geographic center of the North American Continent.

The garden presently consists of 888 acres donated by the State of North Dakota and 1,451 acres donated by the Province of Manitoba. 15 The Peace Garden was dedicated by officials from Canada, the State of North Dakota, and the Greater North Dakota Association on July 14, 1932.

GNDA, by its active fund raising, helped to make this garden a reality.

Theodore Roosevelt National Memorial Park. -- The Greater North Dakota Association played a major role in the development of the Theodore Roosevelt Memorial Park. As previously mentioned, the Roosevelt Park Committee was one of the organizations that merged into the Greater North Dakota Association. This was one reason why the Association promoted the Roosevelt Park.

Theodore Roosevelt National Memorial Park is the nation's only memorial national park. The park is in the heart of the badlands in western North Dakota. The park derives its name from the fact that it lies along the Little Missouri River and was part of Theodore Roosevelt's Elkhorn Ranch. It presently consists of over 69,000 acres. 16

<sup>&</sup>lt;sup>15</sup> Publicity pamphlet from the International Peace Garden, February, 1960.

<sup>16</sup> The World Almanao. Pub., New York World Telegram and The New York Sun, 1963, p. 211.

Ernest Thompson Seaton, who made the area the locale for several of his animal stories, called the area "wonderland enchanted." The Badlands are also known as "The Nation's Sunken Garden." Here is located one of the largest petrified forests. The burning coal mines are unique tourist attractions. International geologists term the area "one of the most interesting spots on the continent." 17

In 1964 GNDA promoted the building of a new road to connect the three units of the Theodore Roosevelt Park. Final road construction plans had not been made at the completion of this thesis, and it was unknown whether the highway would be built.

The tourist department of the Association has always promoted the park area by distributing literature recommending tourist travel to the area.

Outdoor Dramas. -- The publicity department of GNDA has the task of promoting "Old Four Eyes," the story of Theodore Roosevelt as a young rancher in North Dakota. This drama could be described as a "cowboy drama," portraying the life of Roosevelt in the Badlands before the turn of the century. This drama is staged in the Burning Hills Amphitheater near Medora.

"Trail West" is promoted in a similar manner by GNDA. This drama is the story of General Custer and the United States Seventh Cavalry. This drama is staged in the 2,000 seat Custer Memorial Amphitheater overlooking Fort Abraham Lincoln near Mandan.

The job of attracting tourists requires adequate financing and much time. The work carried out by the Greater North Dakota Association and

<sup>17</sup> Dynamic North Dakota, GNDA, Fargo, N. Dak., n.d.

\$63,000,000. ## CHAPTER V

# ORGANIZATIONS DEVELOPED WITH THE ASSISTANCE OF GNDA

The early days of statebood, North Dakota raised much of its own animals. Many of the necessities required by early citizens had to be food, milled its own grain, and slaughtered most of its own meat manufactured outside the state and shipped into North Dakota.

Inis economic exchange involved a considerable loss of income This economic loss was a great problem, and GNDA and the to the state. This was caused by the fact that the state's chief product value added after processing. At the same time, North Dakotans paid Economic Development Commission have worked to alleviate this loss was sold in its raw stage, with manufacturing centers collecting the the higher prices charged for mamifactured goods, plus the cost of in any manner that could feasibly be done. North Dakota Economic Development Commission. -- The Economic the business climate of the state. The Commission has done an effective Development Commission's function has been to advertise the state's attractions, to promote the state's industrial advantages, to improve job in carrying out a program of publicity and industrial development designed to promote the general welfare of the state. This is done through the establishment of new industries, the attraction of new residents, and the improvement and enpansion of contemporary enterprise. I 1957 Legislative Assembly upon the governor's request and with vigorous The North Dakota Economic Development Commission was orested by the commission were two members of the Greater North Dakota Association, backing by the Greater North Dakota Association. Named to the first Wesley E. Keller and Harold Kelly. 2

Republican and Democrat members can be found on both sides of most questions that come up for consideration. each member usually votes his convictions as an individual rather than as a member of a political party. Hather, Therefore

years 1960-1962, one new manufacturing plant per month was established since the Economic Development Commission was founded. During the The state has made considerable progress in the seven years in North Dakota,

in recent years in per capita income and percentage of influetrial growth. that North Dakota has had one of the greatest increases among the states National figures of the U. S. Department of Commerce showed

<sup>1&</sup>quot;GNDA Endorses 'Economic Development Council'," North XXXI, No. 12 (December, 1956), 6. Dakotan,

<sup>&</sup>quot;Economic Development Commission Appointed,

<sup>5&</sup>quot;Local Industries Surge Forward With EDC Aid," Ibid .. June 30, 1964), 2.

There were 455 manufacturing plants in North Dakota in 1963.

Of these, 173 were engaged in the processing of food and kindred products. The figures compare with a total of 342 manufacturing plants in the state in 1939.

The total 1963 added value of manufactured products in North Dakota was \$70 million, of which an estimated 30 per cent was in the processing of food and kindred products. The value of all products added by manufacturing has been steadily increasing. In recent years the U.S. Department of Commerce has reported North Dakota's rate of industrial growth is the third highest in the nation.

The Inventor's Congress. --GNDA sponsored the first North Dakota Inventor's Congress in 1957. The purpose of the Congress was to disclose and publicise the hobbies and inventions of North Dakotans.

GNDA believed that the Inventor's Congress would aid the growth of North Dakota industry and assist North Dakota inventors in marketing their inventions.

If the ideas presented had commercial value, they could be the foundation of new industries in the state. Firms and investors are constantly searching for items that could possibly expand their operations, improve their product, build their sales, increase their profits, or give them rewarding investment opportunities. GNDA described the first Congress as "the end of the rainbow with its pot of gold." Harold Kelly, a member of GNDA industrial Committee, was the first chairman of the Congress. 5

## CHAPTER V

# MARKETING IMPROVEMENT PROGRAMS

Suggesting improvements in marketing practices has been an important function of GMDA, especially since the formation of the Retail Committee in 1960.

businessman's organization. However, research shows that very little was done to directly aid the businessman (excluding farmers), until the Past Programs. --GNDA, generally speaking, has been a formation of the Retail Committee.

have been a much more constant and continuing objective of the Greater Marketing assistance to retailers and other businessmen could North Dakota Association from 1926 to 1960. The sporadio attempts to aid businessmen are indicated in the following paragraphs. Cales Techniques and Trade Expansion Meetings. -- In 1936 GNDA subjects of sales techniques and trade engansion. These meetings were Minneapolls Civic and Commerce Association. The principal speaker held thirty-four meetings in various North Dakota communities on the Mr. DeWild was the author of numerous books on show card writing, retail promotion, and advertising. He was a frequent for these early meetings was John H. DeWild. He represented the arranged jointly by the Greater North Dakota Association and the trade extension division of the Minneapolis Civic and Commerce Association.

hir. DeWild instructed large groups of employees in the use of modern contributor to trade publications. In some of the communities, sales techniques and in modern merchandising methods.

president of the Greater North Dakota Association. The sponsoring agencies in the office and towns visited were the service, civic and The program ran from March 16 to April 6, 1936, and was organized under the direction of Merman Stern, Valley City, vicecommunity clubs. 1 "Face to Face with 1886" was the title under which Mr. DeWild the potential business opportunities of the year and the basic economic addressed his employer audiences. The theme of his talk emphasized improvements throughout the country. A large portion of the talk was devoted to the possibilities of future development in the Northwest trading area. in May, 1937, another sales promotional program was organized. Methods of extending a community's trade territory were outlined before several commercial organizations in a series of meetings scheduled by Commerce Association. Mr. DeWild was again the featured lecturer. GNDA and the trade extension division of the Minneapolis Civic and

Incident to his meeting in each community, DeWild analyzed the committee chairman. 2 The program is described as being almost suggestions were channeled to the retailer through the community local retail establishments. Then he suggested improvements.

<sup>2&</sup>quot;DeWild to Outline New Retail Sales Technique." Did., XII,

identical to the 1964 community promotion program carried out by the state of Minnesota. 3

Also in 1937, GNDA co-sponsored a series of business institutes in ten North Dakota communities in cooperation with the Minneapolis Civic and Commerce Association. 4

Noon sessions were held at each town sponsored by local civic, service or community clubs. Local businessmen were invited to the noon luncheons. An afternoon roundtable discussion followed the luncheons. In the evening another session was held for retailers and their sales staffs from the trade territory of the host community. 5

The speakers at these institute meetings discussed retailing selling problems, general accounting methods, successful trade promotions and sales expansion activities.

Many worthwhile suggestions were discussed at these meetings.

A suggestion made in one community in the conversion of a building to a theater. Subsequently, the theater was filled to capacity for each of the weekly shows.

Formation of the Retail Committee. —There was little retail activity on the part of the Association from 1937 to 1960. Few, if any direct improvement programs were offered by GNDA to its retailer members during this period.

Spid.

Subid.

In May, 1960, the Greater North Dakota Association formed a new retail committee. This committee was called the GNDA-State Chamber Retail Committee. Members of the committee were nominated by retail trade associations in the state, local chambers of commerce, and civic clubs affiliated with the Greater North Dakota Association. 8

In August of the same year, two subcommittees were organized: one to study the personal property tax as it affected business; the other to study the high transportation costs resulting from less-than-full carload rail shipments. At that time the GNDA-State Chamber Retail Committee started a library of sales training and courtesy films. <sup>9</sup>

The Greater North Dakota Association-State Chamber Retail
Committee along with the Industrial and Retail Committees of the State
Chamber's of Commerce sponsored an Unemployment Compensation
Seminar in October, 1969. The purpose of the seminar was to instruct
participants about the new legislative proposals to boost North Dakota
Unemployment Compensation taxes. The Greater North Dakota
Association felt that as a result of the information imparted at the
meetings, numerous employers in North Dakota would be able to effect
savings in their unemployment compensation tax contributions while
others would take steps to minimize employee turnover. 10

Non-sufficient Fund Check Law. --Retailers welcomed the passage of the law dealing with the writing of checks without sufficient funds. This

law was encouraged by the Greater North Dakota Association-State
Chamber Retail Committee. The bill facilitated enforcement and
provided that any person issuing a check without sufficient funds or
without bank credit should receive at least a minimum penalty. Other
legislative matters supported by the Retail Committee and approved by
the Legislature included the appropriation of funds for the employment
of four additional retail sales and use tax auditors and the adoption of
penalties for use tax violators. 11

Reorganization. -- In 1961, the Greater North Dakota Association-State Chamber Retail Committee was divided into four new divisions: 12

- 1. The Retail Taxes Division. -- This division expected to give primary attention to a continuing study of the personal property tax on retail inventories.
- 2. The Distributive Education Division. —This division attempted to analyze the effectiveness of present Distributive Education programs and encourage improvement of the program and adoption in more schools and communities in the state.
- 3. The Retail Schools Division. —This division planned to establish a series of schools for retail employers and employees in a number of North Dakota cities.
- 4. The Unemployment Compensation Division. —This division carried on a continuing study of State and Federal Unemployment Compensation laws with particular emphasis on retailers' tax rates.

Four Part Program. -- In October, 1961, the Greater North Dakota
Association-State Chamber Retail Committee adopted a four-part program
provided for: (1) a program of instruction for managers and owners;
(2) sales training schools for employees; (3) improvement of Distributive
Education programs in high schools where they now exist and encouragement

### CHAPTER VII

### SUMMARY AND EVALUATION OF GNDA

This thesis contained a study of the Greater North Dakota Association. The findings of this study are based on analysis of literature describing the activities of GNDA.

Summary of Main Findings. --GNDA until about 1960, was governed pretty much by the Executive Vice-President (formerly the Secretary) and a small nucleous of prominent North Dakota businessmen. Since about 1960 this practice has changed. Although the Association has worked very hard on improving the image of North Dakota, very little has been done to enhance the image of GNDA. An image improvement, in the writer's opinion, would benefit the Association.

Much of what GNDA has accomplished has been in the field of agriculture. B. E. Groom, in his many years as secretary and chairman of the Agricultural Committee, steered many of the Association's activities toward agricultural projects. In recent years as the role of agriculture became less important when compared to other business activities, GNDA has had to adjust and change its policies to cope with this trend. The writer believes GNDA, through such change, will even more satisfactorily fulfill its role of State Chamber of Commerce.

Probable Future Projects. -- The following are suggested as possible future efforts for GNDA. The Association should follow the

philosophy introduced by Gail Hernett in 1960: "Do not attempt to be all things to all people." Once GNDA has initiated a new program, it should delegate the responsibility for the program to others and simply assist in its performance. In this manner GNDA will not overextend its scope of operation.

Since GNDA, as a large organization, may be confronted by contrasting objectives among its many members, the Association should encourage organizations to represent and serve these special interests. GNDA's participation should be that of coordinating the essential functions of these organizations of the state.

Marketing Improvement. —GNDA should give primary attention to the development of marketing and technology competency within the state. Marketing competency is developed through instruction in the functions of distribution. For instructional purposes GNDA might continue to explore for future use, not only to the communities participating in the present trade seminars, but to all interested members, the following:

- Selling—that which is concerned with communicating to business and individuals through the desirable techniques, the details needed for a decision to buy and then assisting them to buy and following through with required services.
- Sales promotion—that which is concerned with stimulating sales through appropriate advertising, display and other means of publicizing available goods and services.
- Buying—that which is concerned with producing products for resale or raw materials to be transformed into products for resale or further transformation.

<sup>&</sup>lt;sup>1</sup>Statement cited in a personal interview with Don Gackle, former publicity head of GNDA, Garrison, North Dakota, June 26, 1964.

5萬

- Operations—that which is concerned with facilitating the buying and selling functions such as stockkeeping, traffic, oredit, protection, customer services and purchasing.
- 5. Market Research—that which is concerned with investigating the climate for the sale of goods and services.
- Management—that which is concerned with formulating policies and implementing policies regarding men, money and markets available for the merchandising of goods and services.

In line with the above the new Vocational Act of 1963 could and should be utilized to the maximum. GNDA through its retail committee should foster and aid in the development of this program. Special emphasis should be placed on segments of this bill which would aid the North Dakota economy and its citizens. The area of adult vocational education should be of particular benefit to the state. The writer estimates that at least four times the number of secondary schools now offering training in distribution could implement such training. Almost the same amount of increase should be possible in the post secondary schools. The impact and aid of this vocational education bill could strengthen education in the state.

In addition to the above recommendations, GNDA should:

- Be more cognizant of its members wishes, desires, and expectations.
- Be financed in a manner so as to operate with little if any fear of control or bias.
- 3. Be very flexible in serving the needs of its members so as to keep up with the times. Don't let the activities and procedures become obsolete.
- Create a better image of itself among citizens of the state, especially among small businessmen.

<sup>2&</sup>quot;Washington Report" Chamber of Commerce of the U. S. 1615 H. St. N. W., Washington 6, D. C., February 21, 1964, p. 2.

<sup>3</sup>Letter from Herman Stern, June, 1964. Mr. Stern indicated the manner of financing as a weakness of GNDA.

- 5. Organize so as to be able to follow modern progressive personnel policies. High morals is a must in any chamber office. Ealaries in the GNDA Administrative Office are not sufficient to draw and/or hold the caliber of personnel needed for such important work. Personnel turnover is too high. Ealary progression is not sophisticated nor sufficient. Non-paid officers should be chosen for their ability.
- Concentrate in the area of assisting the state and its various agencies in providing a more aggressive program to gain more and better employment opportunities for North Dakotans.
- Promote more basic and applied research both within and outside GNDA.

Improving the Greater North Dakota Association in every manner possible is a challenge to all North Dakota Citizens. With their assistance, the Association's efforts can be directed toward creating a favorable economic climate in North Dakota.
