About The Authors

James G. Anderson, Ph.D., “Influencing Test Ordering in Primary Care Using Influential Physicians,” is Professor of Sociology at Purdue University. He currently is studying physician use of computer-based medical information systems and means of influencing physicians’ practice behavior.

Marilyn Anderson, B.A., “Influencing Test Ordering in Primary Care Using Influential Physicians,” is a Senior Research Associate in the Department of Medical Research at Methodist Hospital of Indiana, Inc. in Indianapolis, Indiana.

Judith K. Barr, Sc.D., “Employee Health Benefits: Corporate Strategies for Cost Containment,” is Associate Director for Programs at New York Business Group, Inc. in New York City, and Adjunct Assistant Professor at New York University Wagner School of Health Services. Areas of current interest include working women and stress, and programs for employees who also are caregivers for a family member.

James W. Begun, Ph.D., “Translating Social Science Concepts into Medical Education: A Model and a Curriculum,” is an Associate Professor in the Department of Health Administration, Virginia Commonwealth University, Richmond, VA.

John G. Bruhn, Ph.D., “The Clinical Sociologist as Health Broker,” is Dean of the School of Allied Health Sciences, and Professor of Preventive Medicine and Community Health, The University of Texas Medical Branch at Galveston, and Professor of Preventive Medicine and Community Health, The University of Texas School of Public Health in Houston.

Elizabeth J. Clark, Ph.D., M.P.H., C.C.S. is Director of the Department of Patient and Family Counseling at Albany Medical Center, Albany, New York. A Certified Clinical Sociologist, she is a Past-President and Executive Officer of the Sociological Practice Association, and Vice President of the Research

Committee on Sociotechnis/Sociological Practice of the International Sociology Association.

Alice L. Cullinan, Ph.D., S.F.C.C., "AIDS and the Challenge of a Plague," is a Board Certified Medical Psychotherapist, and is Director of Newburgh Counseling Services in Newburgh, NY. She also serves on the adjunct faculty of New Rochelle College and the Columbia University College of Physicians and Surgeons, where she teaches trauma and grief counseling.

Andrea Doughty, Ph.D., "Evaluation of a Commodity Supplemental Food Program among the Aged Poor in Detroit," is a Senior Statistician with the Michigan Department of Public Health, where she is involved with health facility planning and the dispersion of new technology.

Reza S. Farid, B.A., "Influencing Test Ordering in Primary Care Using Influential Physicians," is a third year medical student at the Indiana University School of Medicine in Indianapolis, Indiana.

Jan M. Fritz, Ph.D., C.C.S., "The Contributions of Clinical Sociology in Health Care Settings," is a faculty member in the Department of Sociology at California State University, San Bernardino. She is President of the International Sociological Association Working Group in Clinical Sociology, Vice President for Publications of the Sociological Practice Association, and Coordinator of the California Chapter of the Sociological Practice Association.

Elizabeth Gear, M.A., "Black/White Differences in Cancer: A Framework for Intervention Linking Social Structure and Survival," is an adjunct faculty member for the Houston Community College System, and is employed in an administrative capacity in the Medical Division of a major oil company in Houston. Her current research interests include organizational structure and patterns in the workplace and occupation-related correlates of cancer survival.

Robin Gorsky, Ph.D., "Teaching Social Epidemiology: An Applied Assignment for Undergraduate Instructors," is an Associate Professor of Health, Management and Policy at the University of New Hampshire. Her research interests are in epidemiology and operations research, with a current focus on issues related to cost-effectiveness of pre-natal and anti-hypertensive interventions.

C. Allen Haney, Ph.D., M.P.H., C.C.S., "Black/White Differences in Cancer: A Framework for Intervention Linking Social Structure and Survival," is Professor of Sociology at the University of Houston. He has been a Visiting Scientist at the National Cancer Institute, and currently serves on the board of the Montrose Counseling Center and as an advisor to the Houston Hospice Association.

Stephen J. Jay, "Influencing Test Ordering in Primary Care Using Influential Physicians," is Senior Vice President for Academic and Medical Affairs

at Methodist Hospital of Indiana, Inc. in Indianapolis. He also is Professor of Medicine at the Indiana University School of Medicine.

David J. Kallen, Ph.D., C.C.S., "Evaluation of a Commodity Supplemental Food Program among the Aged Poor in Detroit," is a Professor in the Department of Pediatrics and Human Development at Michigan State University. He is editor of *Clinical Sociology Review*, and a Vice President of the Sociological Practice Association.

Charles McIntire, A.M., M.D. (1847-1920), "The Importance of the Study of Medical Sociology," was President of the American Academy of Medicine in 1902-1903, and editor of the *Bulletin of the American Academy of Medicine*. A specialist in ophthalmology, he was a Lecturer on sanitary science at Lafayette College in Easton, PA from 1880 to 1905.

Maurice Penner, Ph.D., "Predicting the Organizational Response to Employee Tobacco Use: An Environmental Model," is a faculty member in the Department of Public Management at the University of San Francisco, where he also directs the Masters in Public Administration/Health Services Administration Program.

Susan Penner, M.P.H., "Predicting the Organizational Response to Employee Tobacco Use: An Environmental Model," is a doctoral student in the Department of Health Policy and Administration, School of Public Health at the University of California, Berkeley. She also is the Assistant Project Coordinator for the California HIV Planning Project.

Harry Perlstadt, Ph.D., "Teaching Social Epidemiology: An Applied Assignment for Undergraduate Instructors," is an Associate Professor of Sociology at Michigan State University and an adjunct Associate Professor of Health Care at The University of Michigan-Flint. His current research focuses on weight loss services and providers.

Chris Reimann, B.S., "Evaluation of a Commodity Supplemental Food Program among the Aged Poor in Detroit," is Program Administrator for the Commodity Supplemental Food Program for Catholic Charities in Rockville Center, NY. She previously was Director of Focus: Hope's Food Prescription Program, the largest food program of its type in the nation.

Patricia P. Rieker, Ph.D., "Translating Social Science Concepts into Medical Education: A Model and A Curriculum," is Director of Psychosocial Research at Dana-Farber Cancer Institute, Boston, MA, and Associate Professor of Sociology in Psychiatry at Harvard Medical School.

Suzanne M. Selig, Ph.D., "Teaching Social Epidemiology: An Applied Assignment for Undergraduate Instructors," is an Associate Professor of Health Care at The University of Michigan-Flint, where she directs the Health Care Program. Her recent interests include risk factors for infant mortality, ethnic

differences in AIDS-related behavior, and factors related to motivations for filial responsibility.

Bernhard J. Stern (1894-1956), "Toward a Sociology of Medicine," received the Doctor of Philosophy degree in sociology and anthropology in 1927, and taught at Columbia University and the New School for Social Research for 25 years. He was an editor of the *Encyclopedia of the Social Sciences*, and one of the founders and editors of *Science and Society*.

Kathy Krider Trier, Ph.D., "Assessment of Health Needs in Rural America: A Comparison of Amish and Non-Amish Families," is an Assistant Professor of Sociology at Indiana University-Purdue University at Fort Wayne, Indiana. She has served as a consultant for both public and private health and human service organizations. Her current research interests include the use of alternative healing therapies, the comparison of national health care systems, and social welfare reform.

W. David Watts, Ph.D., "Drug and Alcohol Abuse Prevention: Defining the Need in Organizations," is Dean of the College of Arts and Sciences at Southeastern Louisiana University in Hammond, Louisiana. He serves as the director of two drug abuse prevention grants and as a consultant to a number of prevention projects throughout the country.

John B. Zimmerer, B.E.S., "Influencing Test Ordering in Primary Care Using Influential Physicians," is a third year medical student at the Indiana University School of Medicine in Indianapolis, Indiana.
