IDENTIFIERS Apple II GS; \*AppleWorks; Dependents Schools

## ABSTRACT

This manual is a hands-on teaching tool for beginning users of the AppleWorks database software. It was developed to allow Apple IIGS users who are generally familiar with their machine and its peripherals to build a simple AppleWorks database file using version 2.0 or 2.1 of the program, and to store, print, and manipulate the file. The materials were designed to be used without outside aid. Eight chapters cover: (1) loading the AppleWorks program into the computer memory; (2) formatting the blank disk for use as a data storage device; (3) and (4) constructing and printing database files; (5) exercising database print options; (6) obtaining help with database files; (7) merging database and word processing files; and (8) converting spreadsheet files into database files. Examples of computer monitor screens are provided throughout the manual. (DB)

## FORWARD

Getting Started In Appleworks Data Base is a hands-on teaching tool for beginning users of AppleWorks data base. Its development was accomplished using the Apple IIGS computer, one 3 1/2" and one 5 1/4" disk drives. The intent at the time of development was to produce a document which would allow Apple IIGS users, generally familiar their machine and its peripherals, to build a simple AppleWorks data base file using version 2.0 or 2.1 of the program, store, print and manipulate the file. In addition, it was envisioned that users would be able to accomplish the building, printing and storing tasks without having to resort to outside aid.

As you use these instructions, you'll see many computer monitor screen examples. The examples appear, generally, the way the screen should appear after completing an operation when that operation was accomplished using version 2.0 or 2.1. Other versions of the AppleWorks program (V1.2, 1.3, 3.0) may be used with this document but there may be some differences in the way the monitor screen appears when a task is completed. You'll also find that the instructions provided here may be used with computers having only one disk drive.

There is some redundancy of Figures and tasks between chapters. These duplications should allow you to complete a task without having to retrace your steps to earlier pages in the text.

RMS

# CHAPTER ONE

## LOADING APPLEWORKS

### INTRODUCTION

Chapter One takes users of this publication through the step-by-step process of loading the AppleWorks program into the computer memory. This process must be accomplished before data base computer files can be constructed, manipulated or printed.

S  
T  
E  
P  
S

### DIRECTIONS

01. Energize The Computer. Turn on the power switches external to the computer and the power switch on the back of the computer.
02. Energize The Computer Monitor. Place the monitor power switch in the on position. It is located on the right side of the monitor as you face the monitor front. The screen will tell you that you do not have a startup device inserted in the disk drive.

ROM Version 01

---

Figure 1-1. The Beginning Screen Picture.

03. Inserting The Disk. Place the AppleWorks program in Disk Drive #1, Slot #5. This is generally, the normal configuration and if you are using 3.5" and 5.25" inch disk drives together drive #1, slot #5 should be the 3.5" drive. If you are unsure of the configuration, place the program in one disk drive or the other. The computer will search both disk drives for a program.
04. Apple-Control-Reset Function.
  - a. Identifying Keys. Identify the OPEN-APPLE, the CONTROL and the RESET keys. The OPEN-APPLE key has an outline of an apple on its face. The RESET key is located just above

the row of number keys at the top of the keyboard and has a triangle on its face.

- b. **Pressing and Holding Keys.** Press and hold down the OPEN-APPLE and the CONTROL keys. While these keys are held down, press the RESET key, releasing it after about 5 seconds.
- c. **Releasing Keys.** Release the OPEN-APPLE and the CONTROL keys. With this task completed, your screen should look like Figure 1-1. Then, it will automatically shift to look like Figure 1-2 and then shift looking like Figure 1-3.

## DISK FORMATTING

### INTRODUCTION

Formatting of blank disks for use as data storage devices is discussed in this chapter. The discussion revolves around the use of two disk drives, one setup as Disk 1 Slot (5) and the second as Disk 1 Slot (6). With computer systems using a single disk drive, the disk slot assignment is often Disk 1 Slot (5). If the computer monitor screen indicates a different slot assignment has been selected by the software, then a change must be made. That change can be made using the procedure described below even though the procedure was written for a two disk drive system.

1. Add files to the Desktop
2. Work with one of the files on the Desktop
3. Save Desktop files to disk
4. Remove files from the Desktop
5. Other Activities
6. Quit

---

Type number, or use arrows, then press Return

G-? for Help

---

Figure 2-1. The Computer Screen With Disk 1 Slot (5) Selected.

If this is the case, proceed to step 02. If you see Disk 2 (slot 6), Disk 1 (slot 5), Disk 2 (slot 5) or some other wording in the upper left hand corner, skip steps 02 and 03, proceeding directly to step number 04.

02. Selecting Other Activities. Select option #5, "Other Activities" from the "Main Menu." This is accomplished as follows:

---

Disk: Disk 1 (Slot 6)                      OTHER ACTIVITIES                      Escape: Main Menu

---

```

Main Menu |
|         |
| Other Activities |
| 1. Change current disk drive or ProDOS prefix |
| 2. List all files on the current disk drive   |
| 3. Create a subdirectory                     |
| 4. Delete files from disk                   |
| 5. Format a blank disk                      |
| 6. Select standard location of data disk    |
| 7. Specify information about your printer(s) |
|_____|

```

---

Type number, or use arrows, then press Return                      533K Avail.

Figure 2-2. The Screen After Selecting, the "Other Activities" Option From The "Main Menu."

- a. Press the NUMBER-5 key once or the DOWN-ARROW key several times to highlight the option.
  - b. Press the RETURN key once. Your monitor screen should look like the picture shown in Figure 2-2 following this action.
03. Jumping To Step 08. If you have successfully reached this point, jump to step 08.
04. Wrong Disk or Slot Selected. If the screen looks like the picture shown in Figure 2-3 (note the Disk 2 Slot (5) in the upper left corner of the Figure), select option #1, "Add files to the Desktop," from the "Main Menu." To do this:
- a. Press the RETURN key once. The monitor screen picture should shift to look like the picture shown in Figure 2-4.

```
Main Menu |

      2. List all files on the current disk drive
      3. Create a subdirectory
      4. Delete files from disk
      5. Format a blank disk
      6. Select standard location of data disk
      7. Specify information about your printer(s)
```

---

```
Type number, or use arrows, then press Return  _      532K Avail.
```

Figure 2-11. "Other Activities" Menu.

14. Escaping The Other Activities Option. Press the ESCAPE key to return to the "Main Menu" (see Figure 2-12).

```
Disk: Disk 1 (Slot 6)                MAIN MENU                Escape: "DATA.BASE"
```

---

```
  Main Menu | _____ |
      1. Add files to the Desktop
      2. Work with one of the files on the Desktop
      3. Save Desktop files to disk
      4. Remove files from the Desktop
      5. Other Activities
      6. Quit
```

---

```
Type number, or use arrows, then press Return      ␣-? for Help
```

Figure 2-12. "Main Menu."

15. Information Storage. The disk can now be used for data storage.

# CHAPTER THREE

## CONSTRUCTING DATA BASE FILES

### INTRODUCTION

Constructing Data Base Files provides a step-by-step description of the process required to construct a new data base file from scratch. In Chapter Eight you'll learn how to construct data base files from spreadsheet files.

S  
T  
E  
P  
S

### DIRECTIONS

#### 01. Program Loading.

- a. Place the AppleWorks program in disk drive #1, slot #5 and load the program into the computer. With this task completed, your screen should look like Figure 3-1 (the "Main Menu" is on the screen). In the upper left corner of the screen, you should find Disk 1 (slot 6).
- b. If this is the case, proceed to step 02.

---

Disk: Disk 1 (Slot 6)

- c. If you see Disk 2 (slot 6), Disk 1 (slot 5), or Disk 2 (slot 5) in the upper left hand corner, return to the beginning of Chapter Two and follow the directions for shifting to a different disk. They start with step 1 of Chapter Two.
02. Selecting The Add Files Menu. Select option #1, "Add files to the Desktop," from the "Main Menu." This is accomplished by:
- a: Insuring the "Add files to the Desktop" is highlighted, and;
  - b. Pressing the RETURN key once. The monitor screen will shift so that it appears like the picture shown in Figure 3-2.

---

```

Disk: Disk 1 (Slot 6)                ADD FILES                Escape: Main Menu

```

11. File Saving. Press the OPEN-APPLE and the "S" keys at the same time to save the file on the data disk in Disk 1 Slot (6). Note that normally, a red light over the disk drive slot comes on while the file is being saved. When the light is again extinguished, your file has been saved on your data disk.

# CHAPTER FOUR PRINTING DATA BASE FILES

## INTRODUCTION

The procedures one follows to print data base files are discussed in this chapter. It is important to remember that there two basic formats, tables and labels. The labels format is used to print address and other types of labels. Printing your data base file or a part of it as a table is accomplished using the tables format.

# CHAPTER FIVE

## EXERCISING DATA BASE PRINT OPTIONS

### INTRODUCTION

A number of different printing options can be exercised using the AppleWorks program. The procedures users follow to execute those options are explained in this chapter.

S  
T  
E  
P  
S

### DIRECTIONS

01. In The Beginning. There are two types of formats that can be used when printing AppleWorks data base files: labels, and tables. The print options are somewhat different for each format. The labels format is discussed first. If you wish to print your file in a tables format and are interested in the print options for that format, proceed directly to Step 03. Bring the file to be printed to the Desktop. Your monitor screen will appear similar to the example shown in Figure 5-1.

(b) Delete.

- I. Press the DOWN-ARROW several times until the cursor is under the first letter in the DISK NO. category.
- II. Press the OPEN-APPLE and the "D" key at the same time. This action deletes the DISK NO. and leaves a blank space where the category was (see Figure 5-11). When the file is printed, a blank space appears where the field was removed. The category, however, has not been lost from the computer memory and can be reinserted if a mistake has been made. If you want to see the way a file record will look when it is printed, press the OPEN-APPLE and the "Z" keys at the same time.

Type entry or use ⌘ commands

⌘-? for Help

Figure 6-1. Example Data Base File.

02. Help List.

- a. Examining the list.

- (1) Press the OPEN-APPLE key and while it is held down, press the "?" key. Your monitor screen will appear identical to the one shown in Figure 6-2.

```
=====
á-A  Arrange (sort) on this category
á-C  Copy records (includes cut and paste)
á-D  Delete records
á-F  Find all records that contain.....
á-I  Insert new records before the
      current record
á-L  Change record layout
á-M  Move records (cut and paste)
=====
```

Use arrows to see remainder of Help

514K Avail.

---

Figure 6-2. The Monitor Screen Showing One Third Of The Monitor Screen.

---

```
=====
á-N  Change name of file. Insert,
      delete, and rename categories
á-P  Print reports
á-R  Change record selection rules
á-V  Set/remove standard values for
      a category
á-Z  Zoom In to one record, Zoom Out
      to multiple records
á-"  Copy entry directly above
      (multiple-record layout only)
=====
```

Use arrows to see remainder of Help

514K Avail.

---

Figure 6-3. The Monitor Screen Showing The Second Third Of The Help List.

---

- (2) Press the DOWN-ARROW key until OPEN-APPLE-N is at the top of the monitor screen. The screen now looks like Figure 6-3.
- (3) Press the DOWN-ARROW key until RETURN is at the top of the screen. The monitor screen now shows the remainder of the help list (see Figure 6-4).

b. Copying the list.

- (1) Insure that your printer is properly connected and has paper fed to it.
- (2) Press the OPEN-APPLE and the "H" keys at the same time. This action will cause a screen dump or cause the printer to print exactly what is seen on the screen.
- (3) When the printer stops printing, press the UP-ARROW key several times until OPEN-APPLE-N is at the top of the screen.
- (4) Press the OPEN-APPLE and the "H" keys at the same time.
- (5) When the printer stops printing, advance the paper to the beginning of the next page of paper.
- (6) Press the UP-ARROW key several times until the original

third of the "Help" list is shown on the screen.

(7) Press the OPEN-APPLE and the "H" keys at the same time.

Type entry or use & commands

&-? for Help

Figure 6-41. The File Before Duplicating Information In One Category.

- (b) Press the OPEN-APPLE and the "2" keys at the same time (see Figure 6-39).
  - (c) Press the OPEN-APPLE and the "2" keys at the same time to return to all records (see Figure 6-40).
- (11) Copying an entry. This option is used when you have one or more successive entries in a category that are all the same.
- (a) Suppose you have 10 successive records, all of which have the same entry in the first category, say the first category (the DOC. NO. category in Figure 6-41).
  - (b) Duplicate 10 blank records as follows (this process can be accomplished also by inserting blank records as described above):
    1. Zoom in on the last record of the file so that it appears similar to the example shown in Figure 6-42.

## CHAPTER SEVEN

# MERGING DATA BASE AND WORD PROCESSING FILES

## INTRODUCTION

At times AppleWorks users need to use information contained in data base files in word processing files. Such is often the case when reports are written. In this chapter, we go through the steps necessary to complete the task of transferring data base file records into wordprocessing files.

S  
T  
E  
P  
S

### DIRECTIONS

01. File Loading. Bring the data base and the word processing files with which you wish to work from your storage disk to the AppleWorks desktop.
02. Transferring The Data Base File.
  - a. Selecting the data base file.

---

Disk: Disk 1 (Slot 6)

MAIN MENU

Escape: Main Menu

---

Main Menu

1. Add files to the Desktop
2. Work with one
3. Save Desktop
4. Remove files
5. Other Activit
6. Quit

| Desktop Index |                 |    |
|---------------|-----------------|----|
| 1.            | WP01199.007     | WP |
| 2.            | DOC.LIBRARY.007 | DB |
| 3.            | LIB.008         | DB |
| 4.            | PI RESEARCH     | SS |

### I. OVERVIEW

In this activity students experiment by moving familiar objects across a smooth surface and then a rough surface. The number of breaths required to move each object across the 1 meter distance is recorded. Students will discover that many variables can affect the amount of energy required to move the objects. They will see that the objects move slower over the rough surface energy, aerodynamics, lung capacity, bearing surface, sail area may result. Students should then be able to predict the number of breaths necessary to move other objects across the distance on various surfaces.

## II. TEACHER BACKGROUND

(A note of caution--while some teachers need some background before they can comfortably conduct an activity, we feel students should not be provided with the scientific principles behind an activity prior to conducting the activity. It may not be necessary to provide students with any of the facts.)

Remember when you were young, how difficult it was for

 Type entry or use ⌘ commands Line 251 Column 6 ⌘-? for Help

Figure 7-19. The Monitor Screen Showing The Altered Data Base Information.

(11) Move the cursor to the row directly following the last data base information.

(12) Press the OPEN-APPLE and the "O" keys at the same time and using the same procedure as you used to make the margins narrower, restore each margin to 1 inch.

(13) Press the ESC key. Your monitor screen should now appear similar to the example shown in Figure 7-19.

04. Additional Help. If you need additional help altering your file, press the OPEN-APPLE and the "?" keys at the same time and or consult the AppleWorks instruction manual that accompanied the program when it was purchased.

## CHAPTER EIGHT

### CONVERTING SPREADSHEET FILES INTO DATA BASE FILES INTRODUCTION

The procedure described in this chapter makes it possible to convert spreadsheet files to data base files. Conversions of this nature are important because each type file has its own set of manipulative functions. Without this facility, the need for a data base file using information already contained in a spreadsheet file would require constructing a new data base file from scratch. As can be seen, this AppleWorks option is a real time saver.

Type entry or use  $\uparrow$  commands

$\uparrow$ -? for Help

Figure 8-12. The Monitor Screen After Printing The Spreadsheet To A DIF File.

Disk: Disk 1 (Slot 6)

MAIN MENU

Escape: "SS01352.008"

Main Menu

1. Add files to the Desktop
2. Work with one of the files on the Desktop
3. Save Desktop files to disk
4. Remove files from the Desktop
5. Other Activities
6. Quit

Type number, or use arrows, then press Return

$\uparrow$ -? for Help

Figure 8-13. The Monitor Screen Showing The AppleWorks Main Menu.

(6) Type the pathname as follows:

(a) /SOME.NAME/ The name of your spreadsheet file (see Figure 8-11).

(7) Press the RETURN key once (see Figure 8-12)

g. Press the ESC key once and return to the "Main Menu" (see Figure 8-13).

04. Using The DIF File To Form A New Data Base File.

a. Add files to the desktop.

(1) Insure that the Add files option is highlighted and press the RETURN key once (see Figure 8-14).

---

Disk: Disk 1 (Slot 6)

ADD FILES

Escape: Main Menu

---

```

Main Menu | _____ |
Add Files	_____
Get files from:	
1. The current disk: Disk 1 (Slot 6)	
2. A different disk	
Make a new file for the:	
3. Word Processor	
4. Data Base	
5. Spreadsheet	
_____	_____

```

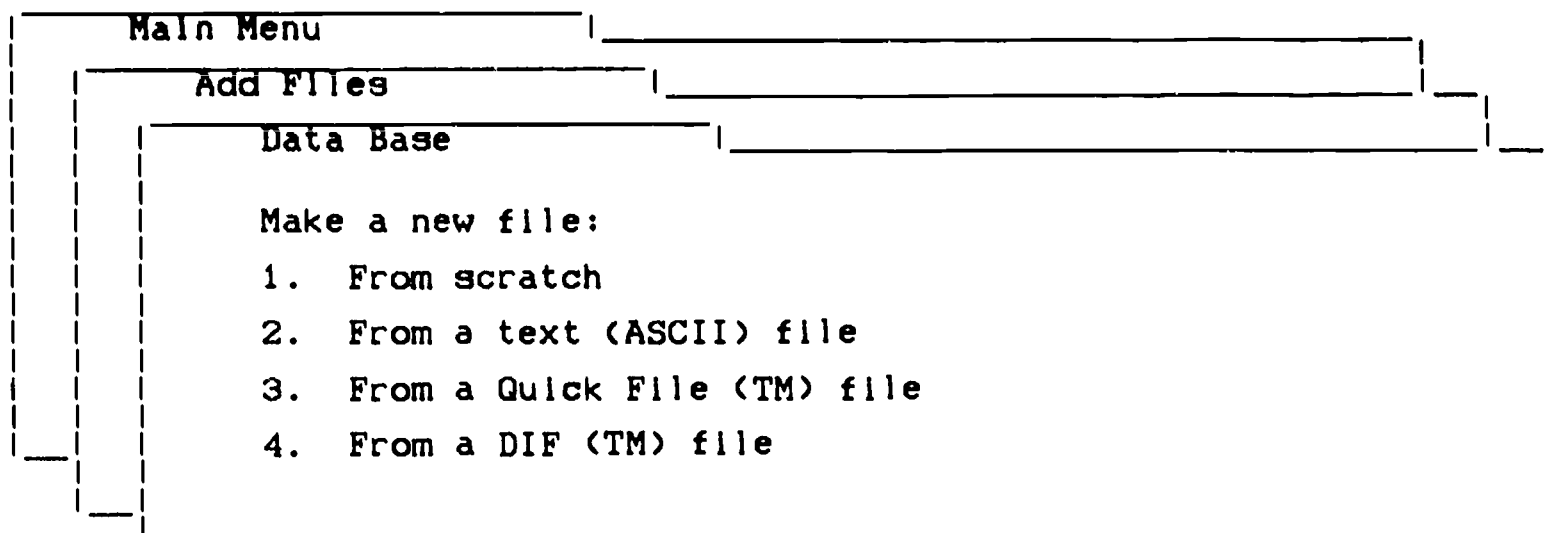

---

Type number, or use arrows, then press Return \_\_\_\_\_ 481K Avail.

Figure 8-14. The Monitor Screen Showing The ADD Files Menu.

(2) Press the #4 key (data base option) once.

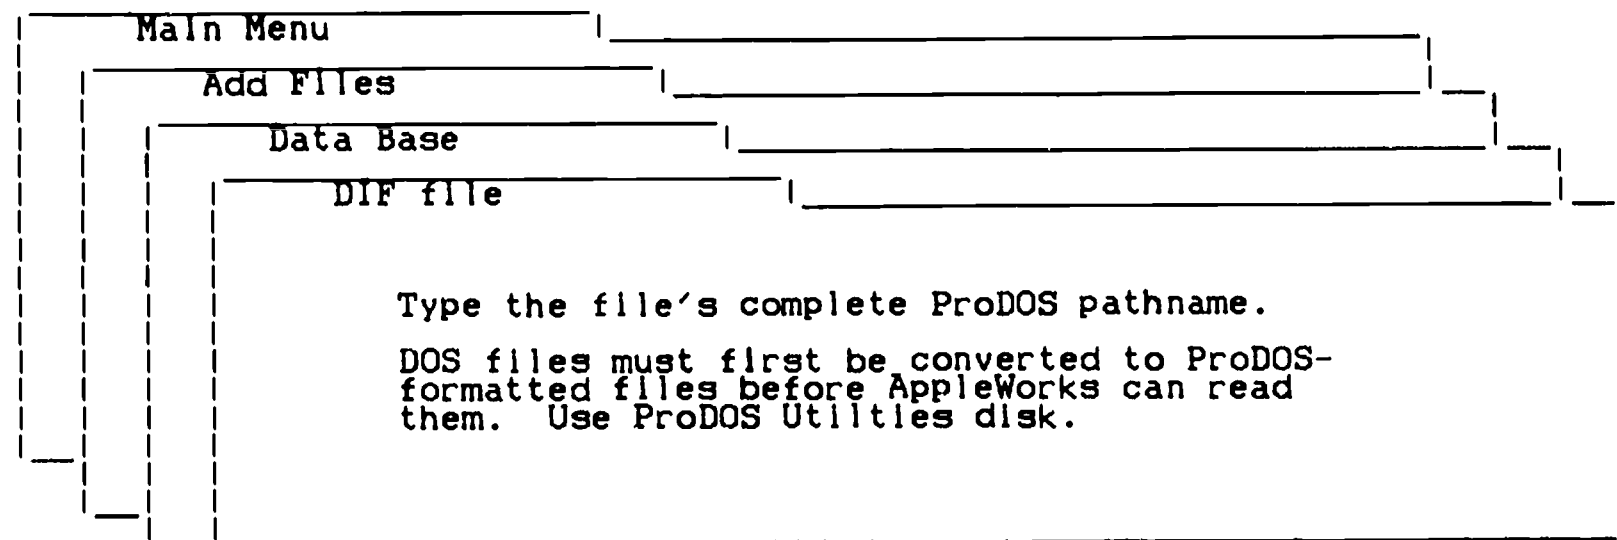

(3) Press the RETURN key once (see Figure 8-15).

Type number, or use arrows, then press Return \_ 443K Avail.

Figure 8-15. The Monitor Screen After Selecting The Data Base Option.

- (4) Use the DOWN-ARROW key to highlight, "From a DIF (TM) file."
- (5) Press the RETURN key once and compare the picture in Figure 8-16 with that seen on your monitor screen.

Pathname?

443K Avail.

Figure 8-16. The Monitor Screen After Selecting The DIF Option.

- (6) Type the complete pathname of the spreadsheet file which is being converted to a data base file ( /DISK NAME/SPREADSHEET FILE NAME/ ). Your monitor screen should appear similar to the example shown in Figure 8-17.

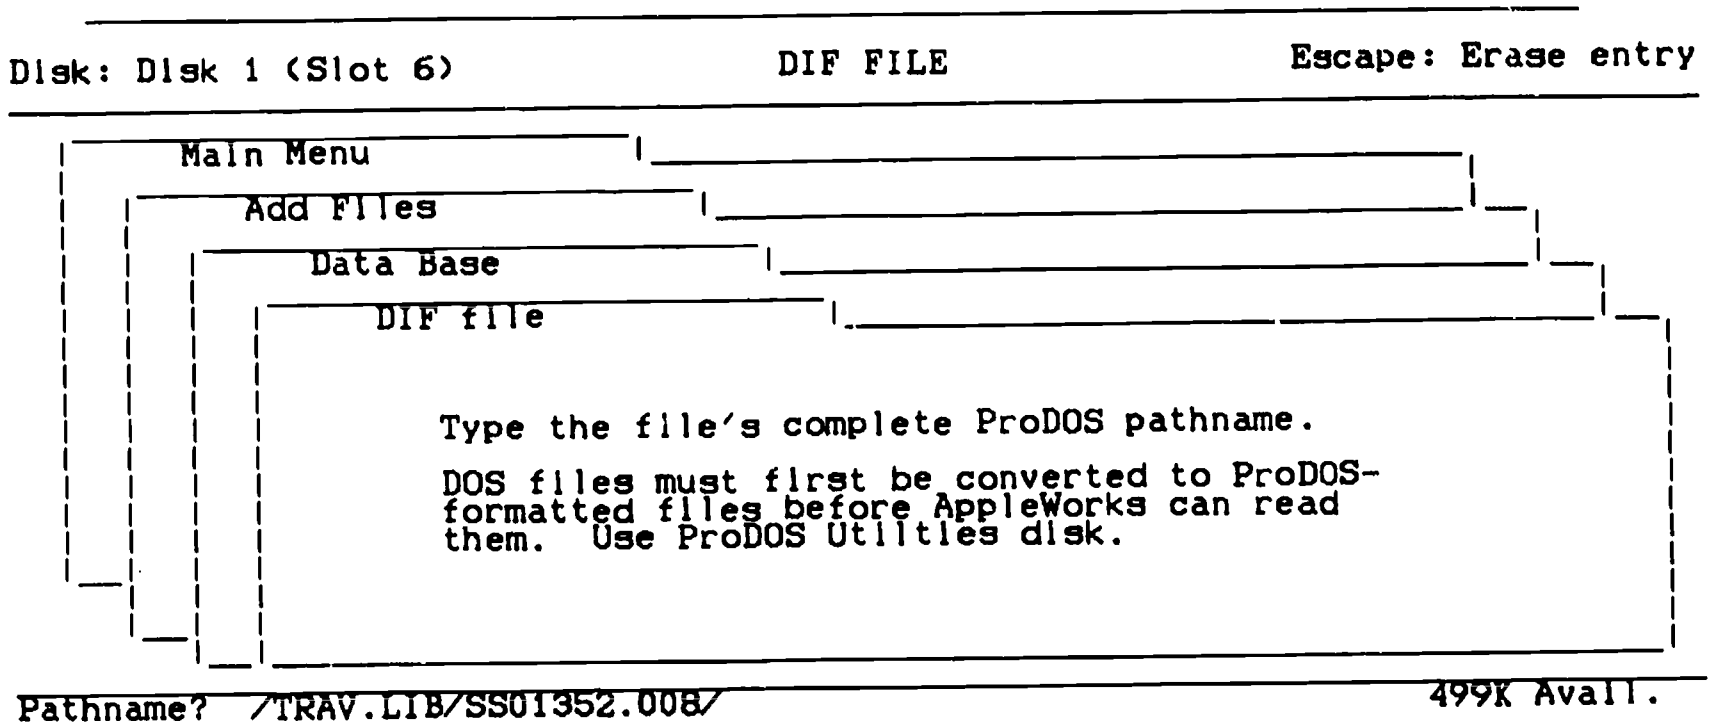

Figure 8-17. The Monitor Screen Showing The Pathname Typed.

- (7) Press the RETURN key once (see Figure 8-18).

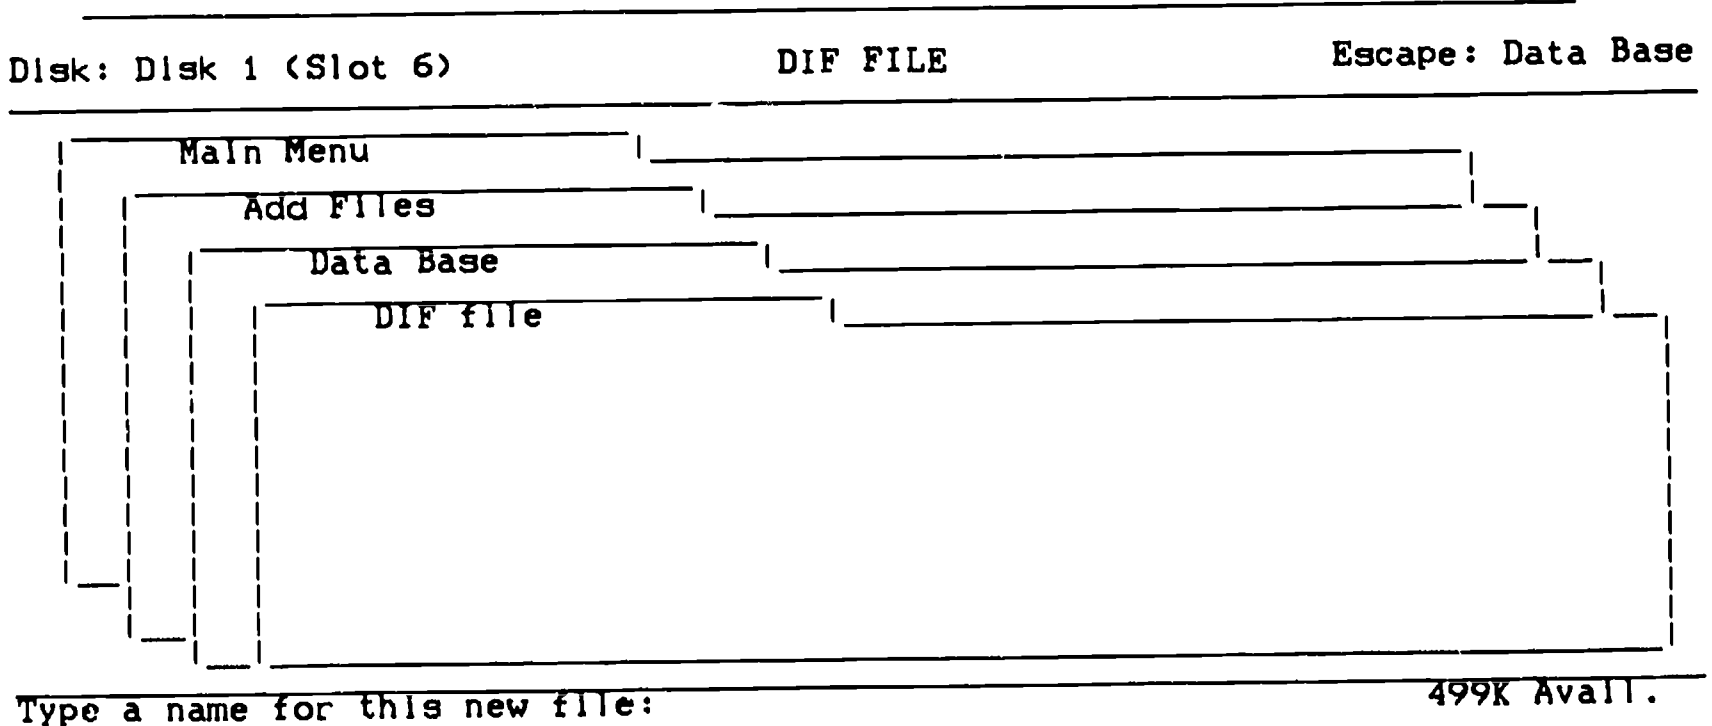

Figure 8-18. The Monitor Screen After Entering The Pathname.

(8) Type the name you want to use for your new file (see Figure 8-19).

Disk: Disk 1 (Slot 6) DIF FILE Escape: Erase entry

Type a name for this new file: DATA.BASE 499K Avail.
