General Information for Candidates in Graduate Medical Education at Henry Ford Hospital

Application

Application forms may be obtained from the HFH Office of Medical Education or by writing directly to the appropriate department chairman. When completed, one application form must be sent to the dean's office of the applicant's college or university, accompanied by a request for a letter of recommendation by the dean or a designated representative. The other completed form should be sent to the appropriate HFH department chairman. When applying for a flexible first-year program, applications are to be sent to the Office of Medical Education, accompanied by two or three letters of recommendation. All applications should be received by the Hospital no later than the first of the year in which the student hopes to begin house officer training.

Candidates who are interested in applying for more than one type of program must submit separate application forms as required by the National Intern Resident Matching Program. These forms must indicate dual candidacy.

Appointments

Appointments to the house officer training program are made for one year and begin on July 1. Appointees are asked to report a minimum of three days before July 1 permitting a few days of early leave at the end of the academic year. The Hospital renews appointments annually, which allows the house officer to fulfill training requirements specified by the respective American Boards. Annual renewals are contingent on the house officer's satisfactory performance. In special instances, appointments to the program may be made at times other than the beginning of the academic year.

Interviews

While not an absolute requirement for appointment, personal interviews at the Hospital are highly recommended. These visits permit the applicant to gain a first-hand view of the Hospital and its resources and, at the same time, provide the staff with an opportunity to assess the individual attributes and aspirations of the applicant. In all cases, an applicant will meet two or more senior staff members along with a house staff physician. Interviews can be arranged with the Office of Medical Education at (313) 876-1464.

National Intern Resident Matching Program

To be considered for the HFH house officer training program, applicants must be registered in the National Intern Matching Program, which uses computers to match prospective students and hospitals according to student needs and preferences. Before beginning the first year, the successful candidate is allowed to express preferences for how time will be allotted among various clinical services. Individual schedules will reflect these preferences as closely as possible.

Licensure

Michigan state law requires all first-year house officers to obtain a temporary license to practice medicine. Application for licensure must be made before training begins. The Hospital will supply the necessary application form and defray the cost of the license. Questions concerning any house officer training program may be directed to the department or division chairman concerned, or to:

Coming in the Spring 1979 Issue: "Arthritis: Modern Concepts and Ancient Evidence"

The entire next issue of the *Henry Ford Hospital Medical Journal* will be devoted to papers presented at an Arthritis Symposium held at Henry Ford Hospital in September, 1978. Co-sponsored jointly by the Paleopathology Association of Detroit and the Rheumatology Division of Henry Ford Hospital, this symposium offered a unique perspective on arthritis and featured presentations by pathologists, physicians and physical anthropologists.

Advice to Authors: Henry Ford Hospital Medical Journal

The Editorial Board of the *Henry Ford Medical Journal* welcomes papers for review and possible publication from any former or present staff member of Henry Ford Hospital. The Journal is intended to be a broad scientific forum for all areas of interest at Henry Ford Hospital: clinical, research, technical, administrative, patient care delivery. Papers are invited on a wide range of topics: review articles, research studies, case reports, philosophical discussions and theses, abstracts of staff publications in other journals.

Style of writing should be consistent with good English usage: clear, succinct, and correct. Papers accepted for publication are subject to editing and revision, if needed, with the author's approval. Within these limits, individuality will not be restricted. All papers submitted should meet the following guidelines:

1. Three copies of the manuscript are required, with the author keeping at least one more. One submitted manuscript should be the original and the other two dry copy (i.e., Xerox). One complete set of original black and white illustrations must be submitted with the three copies of the manuscript, and the author must have available, if needed, at least one complete duplicate set of illustrations. Dry copies of the illustrations should be included with the two copies of the manuscript.
2. All parts of the text, including case reports and references, should be typed double- or triple-spaced with ample margins.
3. All figures and tables should be submitted camera-ready, wherever possible. If illustrations cannot be reproduced in their original size, desired "cropping" should be shown or reduction considered.

4. Layout of the textual presentation and number of illustrations are left to the author's discretion, within reasonable limits.
5. *Dorland's Medical Dictionary*, *Webster's Third International Dictionary*, and the *Editorial Manual* (6th ed.) of the American Medical Association are the standards used, with titles as abbreviated by *Index Medicus*.
6. References should be in numerical rather than alphabetical sequence, according to the order of their appearance in the text, and in the following form:
 1. Swinger GA and Quince PD: Oxadelic levels in the newt bladder, and their clinical significance. *Ann Sci*: 42:121-35, 1967.
 2. Burns JG: *Principles of Dermatology*, ed 3. New York, McGraw-Hill, 1968, pp 31-44.
7. The author is responsible for the accuracy of all references.
8. Acknowledgments of grant support should be indicated in an initial footnote, with the departmental and divisional affiliations of the author(s) also supplied in the same note.
9. A summary / abstract, i.e., a 150-200 word statement of purpose and conclusions, should be provided for use with the paper.
10. A short list of key words should be furnished for indexing the paper in the Journal's Annual Index published in each Winter issue.

One hundred reprints will be made available without charge to the authors of each paper published. Reasonable requests for additional reprints made when the paper has been accepted for publication will be honored if possible.
