DOCUMENT RESUME

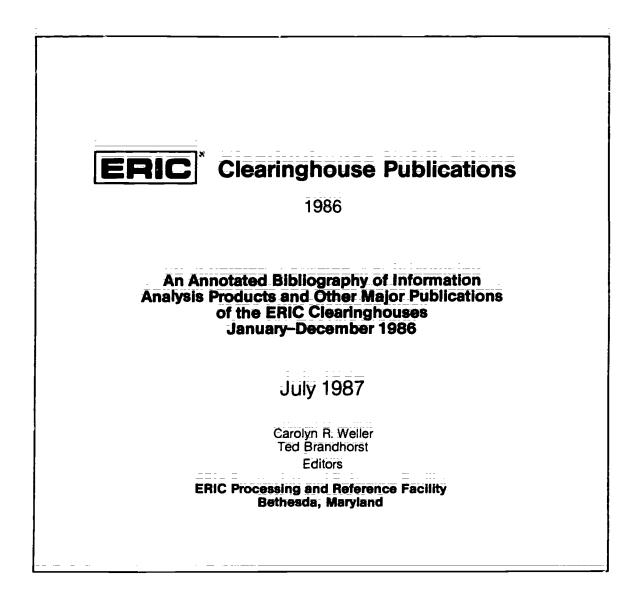

ED 283 535	IR 052 097
AUTHOR TITLE INSTITUTION	Weller, Carolyn R., Ed.; Brandhorst, Ted, Ed. ERIC Clearinghouse Publications, 1986. An Annotated Bibliography of Information Analysis Products and Other Major Publications of the ERIC Clearinghouses, January-December 1986. ERIC Processing and Reference Facility, Bethesda, Md.
SPONS AGENCY	Office of Educational Research and Improvement (ED), Washington, DC.
PUB DATE Contract	Jul <u>87</u> 300-87-0004
NOTE	89p.; For 1985_edition, see ED 271 125.
PUB TYPE	Reference Materials - Bibliographies (131) Information Analyses - ERIC Information Analysis Products (071)
EDRS PRICE	MF01/PC04 Plus Postage.
DESCRIPTORS	Abstracts; Annotated Bibliographies; *Clearinghouses; *Education; Educational Research; Federal Programs; Literature Reviews; *Publications; *Resource Naterials; *State of the Art Reviews
IDENTIFIERS	Educational Information; *ERIC

ABSTRACT

A broad range of education-related topics are addressed_in_this annotated bibliography, which presents citations and abstracts for 229 publications produced by the 16 ERIC Clearinghouses in 1986. An introduction describes the ERIC system, clearinghouse publications, the organization of this bibliography, and the availability of clearinghouse publications. A statistical summary by year (1968-1986) shows the number of publications included for each clearinghouse in the series of which this bibliography is the most recent. Document resumes are provided from the following clearinghouses: (1) Adult, Career, and Vocational Education; (2) Counseling and Personnel Services; (3) Reading and Communication Skills; (4) Educational Management; (5) Handicapped and Gifted Children; (6) Languages and Linguistics; (7) Higher Education; (8) Information Resources; (9) Junior Colleges; (10) Elementary and Early Childhood Education; (11) Rural Education and Small Schools; (12) Science, Mathematics, and Environmental Education; (13) Social Studies/Social Science Education; (14) Teacher Education; (15) Tests, Neasurement, and Evaluation; and (16) Urban Education. Indexes for subject, author, and institution are provided. A listing of ERIC Digests, i.e., short user-oriented reference_sheets_iormerly called Fact Sheets or Short Reports, is also provided for 1986. Also included is ERIC Ready Reference #9, which provides information on ERIC Digests, the ERIC Digests Online (EDO) database, and how to get connected to BDO and search it online, as well as a form for ordering ERIC documents from the ERIC Document Reproduction Service (EDRS). (BBM)

Introduction

The ERIC System

The Educational Resources Information Center (ERIC) is a nationwide information system sponsored and supported by the U.S. Department of Education. ERIC is dedicated to the progress of education through the dissemination of education research results, practitioner-related materials, and other resource information that can be used in developing more effective educational programs. ERIC is a network that consists of a coordinating staff in Washington, D.C. and a number of Clearinghouses (located at universities or with professional organizations) across the country. (For a complete list of ERIC components, see the back of this publication.)

Through this network of specialized centers or Clearinghouses, each of which focuses on a specific field in education, information is acquired, evaluated, cataloged, indexed, abstracted, and announced in ERIC abstract journals. These abstract journals—*Resources in Education* (RIE) and *Current Index to Journals in Education* (CIJE)—provide access to reports of innovative programs, research results, and other significant efforts in education, both current and historical, which might otherwise not be readily available.

RIE is a monthly abstract journal devoted to the report literature. Each issue announces approximately 1,200 documents. RIE is published by the U.S. Government Printing Office (GPC) and is available on subscription from GPC.

CIJE is a monthly index journal which cites articles from over 750 education periodicals. The core journal literature in the field of education is covered, as well as numerous other educationelated articles appearing in journals only peripheral to the field. Each issue announces approximately 1,400 journal articles. CIJE is available on subscription from Oryx Press.

Clearinghouse Publications

In addition to collecting the literature of education for announcement in RIE and CIJE, the ERIC Clearinghouses analyze and synthesize the literature into research reviews, bibliographies, state-of-the-art studies, interpretive studies on topics of high current interest, digests, and many similar documents designed to meet the information needs of ERIC users. These publications are announced in RIE and are available in the ERIC microfiche collections provided by the ERIC Document Reproduction Service (EDRS).

6

Bibliographies of ERIC Clearinghouse Publications

Periodically, ERIC prepares bibliographies of its Clearinghouse publications. Only substantive publications are selected for these bibliographies. Routine brochures, accession lists, computer searches, newsletters, etc., are not normally included. This is the seventeenth bibliography in the series. All items in the series to date are listed below:

NUMBER

ACCESSION NUMBER			NUMBER OF
OF BIBLIOGRAPHIES	PAGES	PERIOD COVERED	ITEMS

ED-	p.	Jan-Dec 1986	229
		TOTAL (1968–1986)	4680

This bibliography covers the calendar year period from January through December 1986. It lists a total of 229 documents. Publications that have been produced through the cooperative endeavors of two or more Clearinghouses have been listed under the Clearinghouse processing the item for announcement in the ERIC abstract journal *Resources in Education (RIE)*.

Organization of This Bibliography

The format and arrangement of citations in this bibliography conform to that in the original announcement in RIE. Citations are arranged by Clearinghouse. Within each Clearinghouse section, documents are listed in accession number order. The content of the citations is the same as that in RIE. A sample citation is provided immediately preceding the citation section.

Three indexes are provided: Subject, Personal Author, and Institution. Index entries lead the user to an accession number. The Clearinghouse section in which the item is listed is indicated by a two-character alphabetic code in parentheses following the accession number, e.g. ED 123 456 (TM).

Availability of ERIC Clearinghouse Publications

ERIC Clearinghouse publications are published by the individual ERIC Clearinghouse responsible for producing them. As long as stocks last, original copies are usually available directly from the responsible Clearinghouse. In addition, however, they are announced in RIE. They are then contained in all ERIC microfiche collections and may be ordered in microfiche or paper copy from the ERIC Document Reproduction Service (EDRS).

For instructions on how to order materials see the back of this publication.

Carcers, *Demand Occupations, *Employed Women, *Employment Opportunities, Females, Labor Force, Labor Market, *Labor Needs, Occupational Aspiration, Occupations Identifiers - Consortium of States, *National Oc-cupational Competency Testing Institute

Women's opportunities for employment will be directly related to their level of skill and experience and also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1980 and 1990, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent); managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance that are available to them. This fourth edition of a review and synthesis of agricultural education research concentrates on the period from 1978 to 1984. The review covers research published in papers and bulletins, compila-tions of abstracts, proceedings of regional and national agricultural education research meetings, material in the ERIC database, masters' theses, and doctoral dissertations. Criteria for selection include the extent to which findings are generalizable, sa-liency of the research, and importance of the re-search question to agricultural education trends and issues. The document covers these aspects of agricultural education: (1) vocational-technical agricultural programs, encompassing curriculum and instruction, student organizations, supervised occupational experience, summer programs, and student recruitment, retention, placement, and followup; (2) personnel preparation, including teacher education programs, methods, and organizations; (3) instructional materials and technology, focusing on mi-crocomputer applications; (4) professionalism, discussing master teachers, morale and satisfaction, and teacher retention; (5) relationships with publics, including public perceptions and program promo-tion; (6) international agricultural education; and (7) extension education. A summary section highlights areas for future research and the need for a istional research agenda. An extensive bibliography of the cited studies concludes the document. (SK)

Identifiers-Instructional Systems Development, Story Boards

This paper provides teachers and trainers with the concepts and procedures involved in using interac-tive videodisc technology for instruction. Described first are types of individualized instruction that have influenced videodisc development: programmed and computer-aided instruction, as well as computer graphics. Then the author explains how video tech nology operates, stating the advantages of the optinotogy operates, staining the advantages of the oppi-cal videodisc over videotape. Next, he illustrates different configurations for learner interaction with video. Advantages and disadvantages of such deliv-ery systems as optical reflective disc players and direct-read-after-write disc recorders are de Examples of the use of interactive videodisc in on-the-job training and instruction are provided. meno-yoo training and instruction are provided. Because few such programs are available, the next three sections elaborate a systematic process for de-signing, producing, and implementing video train-ing materials. The design section follows the five steps of the Instructional Systems Development steps of the instructional Systema Development, implemen-tation, and evaluation). The topic of production cen-ters around the use of the storyboard as a guideline for all production elements. Film and video produc-tion are compared. Next, major considerations in implementation are discussed: site preparation, fa-cility requirements, teacher training, management involvement, and evaluation. The last section deinvolvement, and evaluation. The last section describes the author's production of a videodisc on machine lathe operations, a case study encompass-ing the stages of development, site preparation, field trials, and evaluation. cational Benefits, Educational Research, "Educ-tional Status Comparison, "Education, Work Relationship, Employed Women, Employment Level, Job Skills, Occupational Mobility, "Out-comes of Education, Racial Discrimination," Role of Education Status Withow Women Differential of Education, Salary Wage Differentials, Sex Discrimination, Vocational Adjustment, Voca-tional Education, Work Environment

An enormous body of literature illuminates various facets of the relationship between education and employment. Views of the proper role of education have ranged from cultural transmission to societal transformation and individual development, to the current belief that it prepares for transition to adulthood, i.e., the movement from school to work. The majority of research on the education-work rela-tionship has used the status-attainment model to demonstrate that educational level is strongly related to occupational attainment. However, the ex-perience of blacks and women, who are overrepresented in traditional; low-level, and low-paying occupations, refutes this explanation. There is evidence that the differential returns to education for minorities and women result from continued discrimination in hiring and compensa-tion. Another issue of education-work research concerns the benefits of vocational education. Despite the evidence, researchers appear reluctant to con-clude that it provides little advantage. However, it may be more appropriate to judge vocational educa-tion by how well it does what it is meant to do. Research has also found that many workers are se-Research has also found that many workers are se-verely disadvantaged by lack of basic, employabil-ity, and job adjustment skills. Evidence also exists that both transferable and transfer skills are neces-sary for occupational adaptability. Research indi-cates that these skills are learned mostly in the work environment and not in school. This body of re-search indicates the second second second second second environment and not in school. search could be improved by focus on specification of variables, less reliance on economic formulations and overinterpretation of data, increased hypothesis testing, and interdisciplinary collaboration. Although volunteer tutors traditionally have formed the basis of the programs of Laubach Liter-scy. Action and Literacy. Volunteers of America, volunteers have begun to play a greater role in adult literacy instruction provided through commu-nity-based organizations, correctional institutions,

Ź

3

churches, and federally funded adult basic educatioo. Ilsley has identified five elements common to all Biered volunteer programs: purpose, scope, or-ganizational control, professionalism, and finance. No single combination of these variables is appro-priste for every station; instead, programs should be tailored to the needs of the group or community to be served. I iterative scleroting are appropriate admin tailore⁴ to the needs of the group or community to be served. Likewise, scl-cting an appropriate admin-istrative approach is important. Criteria for select-ing volunteers, clarification of the assumptions about volunteers that are held by the organization developing the literacy program, and specification of the relationship between organizational setting and the establishment of a climate for volunteer participation are some of the many considerations that must be addressed. Administrators deciding to incornorate volunteers into adult literacy operators incorporate volutescu. Administrators deciding to incorporate volutiteers into adult literacy programs must also consider the myths, advantages, aud dis-advantages associated with literacy volunteerism. There is no shortage of resources available for those wishing to develop administrative guidelines and procedures for adult literacy volunteer programs, with as much as three-fourths of the literature base being devoted to administrative aspects of program development. Laoguage problems are likely the strongest single barrier to success facing limited English proficient (LEP) immigrants to the United States. Therefore, instruction in English as a second language (ESL) for immigrants must be given a high priority. Voca-tional ESL (VESL) provides adult immigrants with Eoglish skills on an as-needed basis in cooperation with a program of vocational trainer coordinate their efforts theraphy allowing students coordinate their efforts, thereby allowing students to see the connoction between their needs and their English lessons. Because cultural laws have not been codified and are not formally taught, cultural adjustment may be more difficult for many LEP immigrants then learn-ing English. Activities that allow students to experience real-world situations in a nonthreatening eovironment are necessary to help LEP individuals build cultural self-confidence and adjust culturally. VESL include introducing one concept at a time, using a slower pace in introducing information, us-ing shorter lectures and more demonstrations, pro-viding bilingual glossaries, explaining key concepts to the outing language using timel concepts tion the oative language, using visual support materials, and modifying tests to evaluate mastery of con-tent rather than English. The work experience and workplace training approaches are also effective in teaching employability skills. (MN)

Relevance (Education), Secondary Education, Skill Development, "Transfer of Treining, "Voca-tional Adjustment, Work Attitudes Identifiers—ERIC Digests. A solid body of empirical research supports the view that educational level is strongly related to occupational attainment. In the final analysis, how-ever, it appears that although education does lead to a better job, how much better is determined by one's gender and race. Research on the relative need for training in basic, general employability and transfer-able skills indicates that training in proper work habits, attitudes, and interpersonal skills is generally considered as important to job success as is training in the basic skills. At least one researcher has hy-pothesized that although the schools are teaching the transferaide skills necessary for employment pothesized that although the schools are teaching the transferacie skills necessary for employment (mathematics, communication, interpersonal, rea-soning, and manipulative skills), students are not being taught how to transfer these skills from school to work. Many young people and women entering or returning to the work force are not even aware of the transferability of their skills to the workplace. Most research indicates that the workplace remains the site of most learning concerning work. The cur-rent public education system must do more to show teachers how to teach transfer akills so that future teachers how to teach transfer skills so that future workers will not see their skills as irrelevant, past accomplishments but will instead view them as tools for the future. "Videotape Recordings, "Vocational Education Identifiers—ERIC Digests Interactive video, a combination of computer-as-sisted instruction and video technology, is an impor-tant new development in instructional media. Because interactive video has its roots in individualbecause interactive video has its roots in individual-ized instruction, it is particulary useful in personal-izing instruction by allowing students to proceed at their own pace (one of the tenets of programmed instruction) and to receive immediate feedback (an advantage made possible by the advent of com-puter-assisted instruction). Two main types of video technology are available: videotapes and videodiscs. Despite their higher cost, videotapes and videotapes. Despite their higher cost, videotapes, including alow access time, poor freeze-frame characteristics, and costly maintenance. Because video technology is failed from the manual section of the technology and costly maintenance. Because video technology is fairly new, few programs are available. For this reason, teachers and trainers desiring to develop interactive video instructional materials will require training in the five-step process of instructional sys-tems design (ISD): analysis, design, development, implementation, and evaluation. A research project conducted at the Ontario Institute for Studies in Education illustrated the successful use of ISD in developing interactive video materials to train madeveloping interactive video materials of ISD in developing interactive video materials to train ma-chine lathe operators. Other examples of interactive video in training include those produced and used by General Motors, IBM, and the American Heart Association. (MN)

Descriptors-Career Counseling, *Career Development, Career Education, *Dual Career Family, ^oEmployed Parents, Family Characteristics, ^oFamily Counseling, Family Problems, Family Programs, ^oFamily Relationship, Family Struc-ture, Fathers, Females, Mothers, Parent Role Identifiers—ERIC Digests

Recent changes in the family structure and in the work setting are forcing many families to reexamine and redefine the family-career relationship. Until and recently, most research on career and family pat-terns has focused on traditional sex roles. Although competition between career and family roles has caused pain in many families, recent research addressing the nontraditional roles of men and women indicates that most women do derive a sense of personal accomplishment from work and that most fathers who are more actively involved in parenting report that they have a better relationship with their children because of this involvement. Persons in dual-career families need to recognize that planning for career roles and planning for family roles are closely related tasks. Career development programs are needed to help individuals develop career and family goals that are personally satisfying and mutu-ally supportive of other family members. Such programs, should focus on increasing swareness of current and future trends affecting the family-carter connection, identifying and coping with family and career development stages that carry heavy role de-mands, addressing barriers to implementing family and career plans and explaining the mount have and career plans, and explaining the personal bene-fits of combining family and career. This is a Searchlight Plus document, an informational analysis paper based on a computer search of the ERIC database from 1966 through November 1985 and on pertinent outside resources. This paper reviews, analyzes, and interprets the literatu the topic of substance abuse prevention in schools and points out the implications of the information for human services professionals. The problems of for human services processionants, and provide an aicohol and drug abuse among young people are discussed. It is noted that, while drug abuse by youth is declining, drinking and driving is the lead-ing cause of death in the United States for young people. The rationale of substance abuse prevention programs as well as their components, planning, and implementation are discussed. Included in this dis-cussion are extensive references to relevant ERIC sources. A resource list of agencies involved in sub-stance abuse prevention is given. Sixty-four pages of computer search from the ERIC database with complete bibliographic citations are included. (Author-(ABL)

Many factors, including changes in the family, drug abuse, high technology, crime, population shifts, and television are changing schools. These forces have already had an impact on the counselor's job or will have an impact in the future. Coun-selors should be prepared for these social changes and manage them better than their predecessors in the 1960's did. An inadequate response will maintain the status quo. Appropriate responses include: (1) identifying problems facing young people and informing the public; (2) outreach to the commumorning the public; (2) outreach to the commu-nity; (3) greater research and evaluation; (4) creat-ing super-counselors who perform more tasks than counselors in the past; and (5) viewing counselors as educators also. School counselors should engage in skill building activities. Professional organizations should give assistance to counselors. University programs should offer a fine education and recognize current social forces. Counselors should use computers and other means to free themselves from recputers and other means to free themselves from rec-ordkeeping burdens. Students wanting to work in school counseling should study counseling in a pro-gram which emphasizes school counseling. The best help to young people will be provided by counselors who are aware of current and future trends. (ABL)

The major purpose of this monograph is to pro-vide counselors in elementary and secondary schools with information on learning style to enable them to diagnose the learning style of each student, utilize counseling interventions that complement unitize counseling interventions that complement individual learning style preferences and consult with teachers and parents regarding the accomoda-tion of student learning atyle preferences in the classroom and at home. Application of the learning style approach is described as involving: (1) asses-sing the learning style of each student; (2) identifying patterns within the counseling caseload for grouping students according to learning style preferences; (3) interpreting learning style requirements of students for counseling purposes and applying complementary counseling approaches; and (4) evaluating student outcomes as a result of using the learning style model. Case attadies are provided to assist counselors in applying the model at the eleassus counscions in applying the model at the ele-mentary and secon lary school levels. The learning style needs of special populations (gifted, physically disabled, school dropouts) are described. Descrip-tions of counseling programs that use learning pref-erences in counseling are provided. Research studies are outlined that show evidence that using the learning style approach in teaching and counsel-ing results in improved academic achievement. ing results in improved academic achievement, more positive attitudes toward school, and selected developmental gains, such as increased career awareness. This fact sheet presents teenage suicide as a reac-tion to stress in adolescence compounded by in-creasing stress in the environment. It can also be examined as part of a three-step process: a previous history of problems, problems associated with adolescence, and a precipitating event. Contrary to popular belief, aucide is not an impulsive act but a culmination of long-term problems. Warning signs are given and nine strategies for counseling suicidal terms are listed. Prevention efforts for community members, mental health workers, school counselors, teachers, peers, and parents are included. (NRB)

Identifiers-*Computer Assisted Counseling

This document is a guide for computer enhanced counseling program development. An introductory overview on counselors and computers focuses on the use of microcomputers, the use of computers in the use of microcomputers, the use of computers in test scoring and recordkeeping, and computer-as-sisted career guidance systems. Other chapters in-clude the following: (1) Becoming a Computer Literate Counselor; (2) Designing a Computer En-hanced Counseling Program; (3) Locating Re-sources; (4) Putting Your Plan into Action; (5) Preparing for Accountability; (6) Sharing Ideas and Resources; and (7) Generalizations about Counsel-ing and Computers. Appendices include a list of recommended resources, sample exercises in the BASIC computer language, an ERIC computer BASIC computers language, an ERIC computer search, an ERIC reproduction release form, and a CAPS:HITECH electronic network application form. Identifiers-Teacher Researchers

Written for teachers who want introductions to conducting school assessments and to studying features of writing, this book is intended (1) to provide ways for teachers to analyze writing samples and the writing process for school or program assessment, and (2) to promote the development of teacher re-search among kindergarten through grade 12 teach-ers by providing examples of different ways teachers can study writing in their classrooms. The first chap-ter presents an overview of procedures in teacher ter presents an overview of procedures in teacher research. The next four chapters introduce various theoretical frameworks within which researchers have been working, with each chapter discussing a different level of analysis-syntax, text, information processing, and social context. The final chapter for the student action of a student action processing, and social context. Ine final chapter lo-cuses on errors, teaching practices, and student atti-tudes toward writing. Appendixes contain information on the results of teacher research, eval-uation designs for practitioners, sampling and statis-tical tests, and using expressive writing to teach biology. (EL)

Reflecting changes in the focus and methodology of writing research over the past 20 years, this book provides a meta-analysis of studies on teaching ap-proaches and focuses on composition instruction at proaches and locusts on composition instruction at the elementary, secondary, and college levels. The first chapter of the book examines general studies of the composing process, studies of process in class-rooms, and studies of planning, production factors, revision, and writing apprehension. Summaries of the limitations and key findings of the research on process are included. The second chapter explores example as the metric of latical unstruction of research on the repertoire of lexical, syntactic, or rhetorical forms which writers call upon in their writing. The third chapter examines criticisms of experimental studies and the difficulties in doing them, then explains the techniques used in the meta-analysis of such studies, the selection of studies, and the variables examined. The next four chap-ters analyze the studies in the areas of modes of instruction, grammar and the manipulation of syntax, criteria for better writing, and invention. The eighth chapter presents the results of the meta-anal-ysis for the dimensions examined: grade level, durayas for the dimensions examined grade level, dura-tion of treatment, mode of instruction, focus of instruction, revision, and feedback. The final chap-ter discusses the compatibility of results of treat-ment or method studies with those of processes studies, and offers recommendations for future re-search. (HTH)

Identifiers—"Language across the Curriculum The language across the curriculum approach ex-plored in this book implies the restructuring of cur-ricula away from so-called "coverage" of content and toward creation of opportunities for learning in discussions, games, and in-class writing projects. Following an introduction and overview in chapter one, chapter two summarizes and analyzes the re-search in this field over the last two decades, touches on the major disciplines in order to cite significant research, and suggests practical tech-niques for bringing a learning-through-language approach to bear on the teaching of all subjects. Chapters three through seven explore five different classrooms, showing how language across the cur-riculum occurs among children of widely varying interests, in different grade levels, and in different types of classes. Specifically, these chapters discuss learning through language in third grade math and science, in first grade, in a class for the learning disabled, in a speech therapy class, and in the sixth grade. This monograph highlights important findings and guidelines that have emerged from over a deand guidelines that have emerged from over a de-cade of research at the University of Oregon's Cen-ter for Educational Policy and Management (CEPM) concerning the continued professional de-velopment of school personnel. After a brief intro-duction, the booklet is divided into three sections. The first, "Foundations," introduces a framework for thinking about continued Professional develop-ment. The framework identifies key factors in ana-lyzing a redessional development ment. The framework identifies key factors in ana-lyzing or designing a professional development program and introduces basic concepts. This is fol-lowed by a brief review of prevailing staff develop-ment practices. The second section, "Research and Development," consists of three chapters that de-scribe CEPM-affiliated projects aimed at increasing the effectiveness, respectively, of teachers, pro-grams, and the organization as a whole. Section 3, "Action," presents guidelines for district adminis-trators in designing professional development pro-grams and for principals in implementing them at the school level. The booklet closes with a discus-sion of challenges that lie ahead for professional development. A bibliography is included. (TE)

This publication focuses on the retention/promo-tion debate regarding failing and low-achieving stu-dents. An introductory essay describes the inherent limitation in the research done on this issue-the impossibility of obtaining an appropriate control group-and suggests that the retention/promotion quandary can best be resolved by accommodating the present educational system to the special needs of low-schieving students. Thereafter, five recent studies on this issue are summarized and reviewed. The first, by Doug Chafe, is a review of the literature on criteria for retention or promotion. The second, by Jane K. Elligett and Thomas S. Tocco, describes the stringent promotion/retention policy in Pinellas County, Florida, and analyzes its results. The third, by Nancy B. Schuyler, is a technical report from the Austin (Texas) Independent School District on its new stringent promotion/retention policy at the ele-mentary level. Fourth is a California study, by Jona-than Sandoval and G. Penee Hughes, that analyzed a wide variety of indicators to determine predictors a whot valies for retained first-grade students. The final study, by Marilyn Pheasant, describes a first-grade readiness program at the Aumsville (Oregon) School District. ERIC document numbers are noted. (TE)

change that allows for integration of computers into articulated learning environments that will enhance the learning goal of students. The first chapter presents four major themes to increase the likelihood of combining computers and individualized instruction in schools: (1) a revitalized form of comput-er-assisted instruction (CAI); (2) the utilization of computers by students for their own learning goals; (3) the use of a comprehensive instructional man-agement system; and (4) the willingness of educa-tors to provide alternative educational environments in harmony with technology. Chapter 2 begins the discussion of CA1 with a brief history and moves to the four levels of CA1 that range from drill and practice to systems that create a model for each student and modify it as learning progresses.

Chapter 3 presents a Student-Computer Integrated Learning (SCIL) model that shifts the focus from students being passive recipients to their use of com-puters as a medium for learning. This model makes extensive use of computer-based simulations. Ways to reorganize schools consistent with SCIL that would personalize an individual's educational expe-iment and uncertain character 4. In observe 5. riences are suggested in chapter 4. In chapter 5, a 4-year training program, using the "coaching" model, is proposed for educators and administrators to transfer skills to the educational process. The last chapter describes the need for a sophisticated in-structional management system-Educator-Computer Integrated Management (ECIM)-to keep track of the progress of each student. Three pages of references complete the booklet. (MLF)

Identifiers-Instructional Leadership

Instructional leadership is leadership that is directly related to the processes of instruction where teachers, learners, and the curriculum interact. These three elements constitute the domains of the instructional process. The principal alone often can-not be effective in the supervisory role because of lack of time; lack of specific training and expertise in the techniques of supervision, and the tension caused by the fact that the principal is usually the evaluator as well as the supervisor of teachers. The supervisory role could be carried out more effectively if the evaluation and supervision functions were separated and if principals were given training and experience in systematic observation and feed-back techniques. The principal would provide for-mal evaluation for summative purposes while teachers would be trained to observe one another and to provide feedback for formative purposes as part of the staff development program. Other instructional leadership roles would be assigned to department heads, teaching colleagues, project di-rectors, computer coordinators and program devel-opers, and other administrators. Supplementary resources that could be tapped include students, self-analysis, support groups, referrals, and plans of assistance. In this way, principals could assume im-portant new roles in such areas as inservice training, staff development, and probationary teacher work. (GJ)

The 12 publications in this annotated bibliography The 12 publications in this annotated bibliography highlight different aspects of the assistant princi-pal's role. One Ohio school district has created the title of "Ausociate Principal," a position that in-volves participating with the principal in planning, organizing, and evaluating the whole school pro-gram. Three articles deal with enriching and en-hancing the role of the assistant principal in ways that will develop leadership capabilities as well as benefit schools. Another writer cites being a counbenefit schools. Another writer cites being a counselor and a mediator as probably the most humane and challenging aspect of the assistant principal's role. The professional development of assistant principals, according to two other articles, depends on the school principals involving them in responsion the school principals involving them in responsi-bilities. One assistant principal, writing under the pseudonymn "Lee Marsh," recounts the wide range of duties and input from six principals during her career. Dealing with social problems existing in schools is a large part of an assistant principal's function. Ways to diffuse this stress are discussed in another entry. The final article admoniable the coanother entry. The final article admonishes the as-sistant principals to treat as conscious human beings the uncelebrated and unhonored students as well as the elite students. (MLF)

Preventing dropouts is the main topic of the 12 publications reviewed in this annotated bibliography. A statistical analysis of dropouts in Portland, prov. A statistical analysis of dropouts in Portland, Oregon, revealed that the correlation by school was far greater than correlation by residential area. In another study, approximately 155 droputs were questioned and most believed that the school system had given up on them. Responses from 44 administrators of exemplary vocational education programs gave the highest rating for dropout pre-vention to students' self-concept levelopment. Beck and Muia summarized the literature on dropouts and found the key factor to be the student's socioeconomic class. Programs that work in preventing dropouts are described in three publica-tions. O'Connor studied 3 effective dropout programs and highlights 10 characteristics of effecprograms and highlights 10 characteristics of effec-tive programs, emphasizing such points as identify-ing potential dropouts earlier, and encouraging, rather than coercing, students to participate in spe-cial programs. Wehlage presents a set of guidelines for the marginal student. Mahood summarizes the cost to society of dropouts and recommends in-school suspension for disruptive students. The Sara-cing and a participate in accel skille sons report on an experiment in social skills training. Finally, a report summarizing the findings of a conference of high school administrators sug-gests that high school students be allowed the op-tion of spreading their education over a longer period. 10

109 researchers and practitioners from the United States and several foreign countries encompasses a broad range of topics in education. The monographs report on regulation and legalization in education, finance and cost models, education and labor martinance and cost models, education and isoor mar-kets, educational technology, governance, tuition tax credits, and public and private schools. Research was conducted from a vareity of disciplinary per-apectives. Several kinds of reports, which are coded, are available. "Project Reports" represent results of specific projects; "Program Reports" include papers written by individuals; and "Policy Papers" are directed at current educational issue s affecting development of state and federal policy. Fifteen papers presented for a seminar comprise a complete current source of information on tuition tax credits. Twelve reports prepared for a conference on public and private schools cover a range of topics and include comparative works. An author index is included. (CJH)

The digest addresses, in question-and-answer format, ways to promote peer acceptance of handi-capped students. Topics covered include the effects of first impressions on conhandicapped students and the impact of physical proximity, and the nature of interdependence among students' learning goals and rewards as structured by the teacher. A comparison of the dynamics of a cooperative learning situa-tion and a competitive or individualistic one highlights the ways in which a cooperative situation fosters an atmosphere of trust and higher valuing of classmates. Regular class teachers are urged to teach social skills by carefully planned modeling programs in which accurate information about handicaps to jaces fears and prejudice. The impornancicaps it jusces tears and prejudice. It in high tance of teaching handicapped students such skills as sccepting responsibility for their actions, follow-ing instruction, and resisting peer pressure is stressed. The digest concludes with a cote on the importance of individualized instruction for basic skills, time management, study habits, and other skills. An attached bibliography lists 25 sources oo the topic. (CL)

- The digest presents the background and reasons for early intervention with children at risk for handi-caps. Early interventioo is defined, and three primary reasons for intervention are cited: (1) to enhance the child's development, (2) to provide support and assistance to the family, and (3) to maximize the child's and family's benefit to society. Research on the effectiveness of interventioo is briefly reviewed, and it is stated that despite research problems, qualitative and quantitative data show that early intervention increases the developmental/ed-ucational gains for the child, improves the family's functioning, and provides long-term beoefits to society. Long-term cost savings are noted from three research studies. Three factors important in effective intervention are coted: interventico as early as possible; involvement of parents; and programs fea-turing a high degree of structure, intense services, and an individualized approach. A list of references and resources concludes the digest. (CL)

Identifiers-ERIC Digests; Excellence in Education

tion The digest excerpts major points of the report of the Council for Exceptional Children's Ad Hoc Committee to Study and Respond to the 1983 Re-port of the National Commission on Excellence in Education. The committee also examined the reports of the Education Commission of the States, the Twentieth Century Fund, and the Carnegie Council. General concerns cited included the re-ports' lack of recognition of exceptional children and special education, and the need to evaluate excellence in terms of the learner's individuality. The dangers of using singular standards for assessing achievement in exceptional students are considered, and the committee asserts that a system of singular criteria for curricula and assessment to determine competence, graduation, or program evaluation is immoral as well as poor educational practice. The committee further suggests caution in interpreting the reports' calls for firm discipline. The importance of the individual professional educator's role in achieving excellence in education is stressed. The digest concludes with a list of ways in which the federal government should support greater excellence in exceptional child education. (CL)

*Evaluation Methods, *Gifted, *Program Evaluation tion, *Talent Identifiers-ERIC Digests

The digest presents an overview of program evalu-ation in gifted and talented education. Reasons for program evaluation are offered, including the need to base decision "aking on valio and reliable dats and the demands of accountability. Eight purposes of program evaluation are briefly considered: (1) documentation of the need for a program; (2) docu becchmining of the result of a program, (4) documentation of the feasibility of a program; (4) documentation of program implementation; (5) identification of program strengths and weaknesses; (6) provision of data for in-progress revisions of the program; (7) documentation of the results or im-acts of the program and (6) explanation and depects of the program; and (8) explanation and de-scription of the program to interested and uninformed audiences. Steps in developing effective evaluation designs are traced, including basic steps of planning and identifying both decision makers and key evaluation questions. Two final sections address selection of evalue ion instruments and reporting of findings. (CL)

Highly able

amines reading curriculum strategies. Highly able readers are seen to have needs for specific assistance in developing more complex skills in choosing books and materials for particular purposes, and in applying learning to real-life problems. Components of superior reading curricula should include language-related strategies, context-related strategies, meaning-related strategies, and rer-oning-related strategies. The types of books which present complex concepts in interesting and unusual ways are advocated as particularly valuable for gifted youth. It is further suggested that books for gifted readers be judged on the quality of language, substantive-ness of content, and complexity of structure. The potential benefit of carefully chosen and applied software in the reading curriculum is noted. (CL)

Supply and Demand

Identifiers-ERIC Digests

The digest examines the supply and the quality of special education personnel and notes problems in the area of personnel preparation. Statistics are cited to show that the current supply of qualified personnel does not meet demand, particularly in such important areas as special education. Similarly, efforts in recent years to strengthen the quality of teacher preparation programs in colleges and uni-versitites are noted. The "quandry" facing special education because of the limited numbers of available persons and the large numbers of uncertified and untrained personnel in some areas is discussed. Further difficulties are traced to low salary levels and diminishing popular respect for the teaching profession. The digest concludes with a statement emphasizing the connections of quality and quantity in personnel matters to the nation's problems in education. (CL)

Education: "Gifted; Government Role; "Student Characteristics Identifiers—ERIC Digests

The digest examines conceptions of giftedness. A brief historical review notes L. Terman's work and impetus for increasingly broadened definitions since the 1940's. The 1969 Marland Report is cited and its definition of giftedness is presented. Current re-sponse to that definition's inclusion of six achievesponse to that definition's inclusion of six achieve-ment areas (general academic ability, specific academic aptitude, creative or productive thinking, leadership ability, visual and performing arts, and psychomotor ability) is noted. The federal definition of giftedness as contained in the Omnibus Budget Reconciliation Act of 1981 is provided. More recent

emphasis on high performance capability in mathematics, science, foreign languages, or computer learning is noted. It is suggested that the ways in which schools operationally define giftedness are often based on the needs of society. Concluding points center on reasons for defining giftedness and considerations in deciding not only what giftedness is but how the gifted are identified and what services schools should provide. The digest addresses issues related to preschool gifted and talented children. Such a child is defined as one who functions significantly above average age level in language development, thinking skills, creative thinking skills, physical adaptability, social skills, and/or leadership. Early identification is viewed as important, and the use of teacher and parent checklists is considered. Teachers are urged to note behaviors; such as the use of advanced vo-cabulary, spontaneous elaboration on new experiences and demonstration of abstract concept understanding. Parents should observe their child's behavior in terms of dramatic play, constructive play, and humor. Children's peers may also be sources of information for the identification of a gifted child. A brief list of resources concludes the digest. (CL)

The book provides suggestions for activities de-signed to infuse life skills into the basic curriculum for addrescents and older students with disabilities. Modeled after the Life Centered Career Education approach, the book presents activities geared to three domains (sample competencies in parentheses): (1) daily living skills (managing family fi-nances, buying and preparing food, using recreation

and leisure, and getting around the community); (2) personal-social skills (achieving self awareness, maintaining good interpersonal skills, achieving independence); and (3) occupational guidance and preparation (knowing and exploring occupational possibilities, obtaining a specific occupational skill; and seeking, so ring, and maintaining employ-ment). For each activity, informatioo is presented on relevant competancies and subcompetencies, ac-ademic component, objective, type of activity, and followup/evaluation. (CL)

tors (Learning) This state-of-the-art review explores types of for-eign language (FL) programs, the rationale for early FL study, research evidence, program development, evaluation issues, and areas for further develop-ment. Chapter I outlines the various types of early FL programs that have been implemented, such as foreign language experience (FLEX) programs, foreign language in the elementary school (FLES) programs, and immersion programs. These are discussed with respect to goals, the degree of integration with the total curriculum, and the roles played by English and the foreign language. Chapter 2, on rationale, discusses two perspectives: that of the first wave of early FL programs in the 1950s and 1960s, according to which earlier language study was always better, and that of the current wave, which acknowledges both the advantages and disadvantages of early foreign language learning. Chapter 3 discusses research evidence on the effectiveness of early FL programs in light of current second language acquisition theory and suggests areas for fu-ture research. Chapter 4 focuses on the procedures involved in program implementation, from the establishment of a steering committee to the formulation of evaluation procedures. Chapter 5 presents basic concepts in evaluation design and an outline of evaluation procedures. Chapter 6 notes areas need-ing further study, and Chapter 7 provides a bibliog-raphy and a resource list. (MSE)

Identifiers-*Authentic Msterials

This volume outlines potential uses of many of the topics associated with daily newspapers, music, film, theater, and sports for vocabulary develop-ment and grammar review in French language instruction. The emphasis is on the advantage of using authentic, current materials prepared for the general authentic, current material prepared for the general public but somewhat familiar to students. The chap-ters focus on: reviewing grammar with headlines and comic strips, film reviews and scenarios, teach-ing about music through reviews, advertisements and product copy, housing and real estate, the finan-cial pages, the Thomas Cook International Timeta-ble, the "Syndicat d'Initiative" (Chamber of Commerce), the telephone directory, mail order catalogs, crime stories, commercial television, the Tour de France bicycle race, and North American football. Most chapters introduce basic vocabulary for understanding current articles and provide a series of general questions applicable to articles on the topic and designed for student response using aptopic and designed for student response using up propriate vocabulary. A final chapter gives instruc-tions for students on preparing so article summary and medium-specific exercises, as well as activities intended for further vocabulary development. A list of references and suggested additional readings is appended. (MSE)

The design of an effective reading course in En-glish for academic purposes must be based on an understanding of the reading process (including perceptual skills and cognitive processing), an under-standing of problems in mastering the English writing system (punctuation, decoding handwriting, and confusion between typefaces), and an aware-ness of the deficiencies the particular learner group must overcome. Assessment of learners' reading skills, by a variety of techniques, in the context of their language backgrounds can then lead to devel-opment of materials and methods for effective reading instruction. English as a secood language (ESL) programs have adopted a number of approaches to these issues; both theories and procedures are in the process of being refined. Instructor familiarity with foreign languages, especially those with a different writing system, is also helpful in ESL reading instructioo. Examples of a number of teaching and testiog exercises are included. A six-page bibliography concludes the document. (MSE)

Identifiers-Paculty Reassignment, Program Discontinuance

Academic staffing practices used at four-year colleges and universities are identified, and recommendations are offered for achieving staffing flexibility in the face of conditions such as scarce resources. In addition to considering faculty flow models (e.g., Markov models and simulators) as a management/-planning tool to evaluate personnel and fiscal strategies, four reallocation and reduction strategies are examined: across-the-board attrition, across-the-board decrements, selective attrition, and selective decrements. General factors that limit an institution's flexibility in managing scarce resources and adapting to environmental uncertainty include: excessive external budgetary controls, limited time to respond to change, limited capacity to reallocate resources, and internal opposition. The following 13 staffing practices are examined: flexibility in tenure and staffing, control of academic positions by attri-tion, contract systems, nontenure-track appointments, part-time appointments, tenure quotas, extended probation and suspension of "up-or-out" rules, stricter tenure standards, review of tenured faculty, early retirement incentives, retrenchment, closure of scademic programs, and retraining and reallocating faculty. Descriptora--*College Faculty, *Compensation (Remuneration), *Consultants, Employment Practices, Faculty Workload, Higher Education, Income, *Multiple Employment, *Personnel Pol-icy, Teacher Responsibility, *Teacher Salaries The incidence and extent of faculty consulting are examined, along with the characteristics of faculty who consult and those who do not, costs and bene-fits of faculty consulting, the economic status of

fits of faculty consulting, the economic status of faculty, and policy considerations. A conceptual framework and historical context are provided that relate consulting and other faculty activities to the traditional mission of most academic institutions. Various claims made about the benefits of faculty consulting are reviewed, along with potential costs. Attention is directed to trade-offs involved whenever faculty effort and other institutional resources are involved in an allocation decision. Information on the economic status of faculty and the economic position of the academic profession is considered, based on empirical research. Faculty salaries are compared to those of other similar professional groups, and the amount and kinds of supplemental income earned by faculty (from inside and outside the institution) are examined. Also considered are institutional policies and practices on faculty consulting and other activities producing supplemental income, with attention to major colleges and univerleges. Areas for further research are suggested. (SW)

- Purposes for academic program review and di-verse institutional approaches to college program

review are considered, along with possible outcomes and ways to improve program review. Attention is and ways to improve program review. Artendon is directed to program review practices at 30 repre-sentatives institutions. As background, predomi-nant types of program review over the past 15 years levels are briefly uddressed: state-review, multicam-pus system review, and college review. At the col-lege level, major issues include: choosing programs tege tever, major issues intrince through programs to review, accommoduting multiple purposes, se-lecting an evaluation model, assessing quality, using external reviewers, increasing use of evaluations and assessing the impact of evaluations. Program reviews at most institutions draw heavily on one of reviews at most institutions draw heavily on one of more of several models: goal-based, responsive, de-cision-making, or connoisseurship. Four different perspectives have been offered on how quality should be defined: the reputational view, the re-sources view, the outcomes view, and the value-added view. Criteria for evaluating programs include: quality of faculty, students, curricula, support services, the relevance of the program to mis-sion, student demand and demand for graduates, and costs. Ten tentative proposals for improving program review are offered that relate to purposes, processes, and use of results. (SW)

Workers

Internal and external changes affecting higher ed-ucation and responses that student personnel work-ers can take are discussed. Societal changes that influence colleges include a deciming birth rate, changing sex roles, and shifts to an informa-tion-based society. Notable political trends that af-fect colleges include accountability requirements, concern for quality, and financial problems. In addi-tion, student services have responded to the needs of nontraditional students (women, minorities, for-eigners, older people, the disabled, part-time stu-dents, and academically underprepared students). To deal with the various changes, colleges have em-ployed a variety of strategies that have implications for student affairs organizations. New strategies concern: comprehensive planning, enrollment man-agement, preventive law, resource management, Internal and external changes affecting higher edagement, preventive law, resource management,

and changing relationships of business and colleges. The atudent affairs worker can help to integrate both atudent and institutional needs. In serving as an integrator, the student affairs worker needs to develop skills in management and research, as well as political and organizational skills. College prepaas pointed and organizational asins. Concept preparation provide training for these new roles. Student de-velopment theory also faces challenges from changes that are occurring. Thirteen pages of references and an index are provided. (SW)

Identifiers--Collegiality

Identifiers—Collegiality The literature concerning higher education and generic organization theory is reviewed to address various questions relating to faculty participation in institutional decision-making. Attention is directed to: the rationale for faculty participation, alternative types of participation, participation in academic senates, participation by functional area, participa-tion at the system and state levels, participation and centralization, decentralization, attengthening, con-sultative runceases, and increasing faculty vasifac. sultative processes, and increasing faculty savisfac-tion and participation. Generic organization theory provides extensive reasons why participation in or-ganizational decision-making can improve employ-ees' satisfaction and performance. Types of faculty participation in institutional decision-making are expanse invisidentians, abased authority and ising separate jurisdictions, shared authority, and joint participation. Faculty participation can involve cur-riculum design, faculty personnel status, selection and evaluation of administrators, planning, budget-ing, and planning for retrenchment or financial exi-gency. Joint faculty and administrator efforts may focus on four important areas: rebuilding collegial foundations, shaping the consultative framework, increasing the availability of information, and facilitating group deliberations. Areas for further analysis are auggested. (SW)

Structure, Teacher Administrator Relationship, Unions

The body of rhetorical writing and research stud-ics about the interrelationship of faculty bargaining and campus governance are compared and synthe-sized. The research is emphasized so that the findings can inform and advance the ongoing debate and operational decision about this issue. Qualified, but not complete, support is found for the belief that lack of faculty influence in institutional decision-making causes faculty unionization. Other sig-nificant variables, such as the institutional context. enter into this equation. The view that faculty bar-gaining causes significant increase in the faculty's influence in institutional decision-making is not clearly supported, particularly for academic matters at mature universities. The notion that faculty bar-gaining will bring about the end of faculty senates is premature. The literature aupports the assertion that other collegial governance structures, such as per-sonnel and academic committees, will be either sigsomet and academic committees, will be either sig-inficantly eroded or enhanced. Finally, to the extent that faculty have collectively gained influence in decision-making, it seems that their gains have been generally paralleled by centralization of administrative authority, largely at the expense of deans and department chairs. A 59-item reference list is included. (SW)

Factors that have led to post-tenure evaluation of faculty are considered, along with limitations of tengeneral and current post-tenure evaluation practices. Positions of advocacy and opposition to post-tenure evaluation are identified, along with practical considerations that institutions might consider before modifying or implementing a formal process for post-tenure evaluation. Three purposes of post-tenure evaluation are identified: to aupply documentation for removal for incompetence; to provide input for decisions in the areas of reductions in force, merit raises, and promotions; and espein force, merit raises, and promotions; and espe-cially to aupport faculty development and improved instruction. Five principles of faculty evaluation are recommended: a clearly defined purpose, multiple sources of input to the evaluation, identifying areas and criteria to be assessed, measurable standards; and a flexible and individualized evaluation plan. Appended is a summary of a survey of 30 institu-tions, 16 of which had a formal post-tenure evaluation plan. Information is provided on evaluation objectives, effectiveness, frequency, participants, process followed, and the names of the 16 instituitions. Also appended are 16 pages of references and information on sources of sample rating forms for faculty evaluation. (SW)

from 1965-1983 are reviewed, and two commissions from 1905-1965 are revewed, and two commissions are covered in-depth. Attention is directed to: na-tionally-oriented blue-ribbon commissions, state-level commissions, blue ribbon commissions on campus, and factors that make commissions effective. For purposes of the study, a blue ribbon com-mission was defined as effective if it appeared to have produced an immediate and recognizable change in postsecondary structure, functions, or processes in a state. The two commissions studied in detail are: the Temporary State Commission on the Future of Postsecondary Education in New York State (Wessell Commission) and Maryland's Com-mission on the Structure and Governance of Educa-tions (Reachers Commission) A blue cibbon tion (Resenberg Commission). A blue ribbon commission has the following characteristics: a pre-determined life span, the involvement of eminent individuals from a variety of backgrounds, staff and funds to assist in fulfilling its charge, and a charge to investigate and/or to recommend changes in fundation durations or processes (here to investigate and/or to recommend charges in structures, functions, origins, or processes. Guber-natorially or legislatively created commissions were established on at least 48 occasions in 25 states be-tween 1965 and 1983. In many instances they have made recommendations that have changed the di-rection of higher education in the state; in other instances their impact has been minimal. (SW)

Papers Identifiers—Copyright Law 1976, ERIC Digests, *Policy Interpretation, *Software Copying This digest presents a reprint of an article which addresses the issue of the rights of computer soft-ware owners to duplicate materials. A conservative approach to software copyright is taken which looks to how the law will likely be interpreted, rather than waiting for the definitive decision by a court. Three major issues involved with software duplication are discussed: back-up copies, multiple loading or boot-ing from one disk onto multiple machines at the same time, and networks. It is concluded that: (1) same time, and networks. It is concluded that: (1) although back-up copies (number uncertain) are allowed for use on a second machine in the event the original fails, the copy is not to be used on a second machine at the same time as the original; (2) in the absence of a license that explicitly permits loading multiple computers with the contents from one disk for use at the same time, users would likely be in

violation of the copyright law if they did so; and (3) in the absence of a network license, users would likely be in violation of copyright laws if they downloaded a program to multiple stations at the same time from their network. A 13-item reading list completes the digest. (JB)

Focusing on how to use a microcomputer as a rocusing on how to use a microcomputer as a terminal for searching online databases, this digest addresses the following topics: (1) hardware and software requirements; (2) configuring the software; and (3) basic requirements for specific microcom-puters. Special features in communications software which allow microcomputer users to do database searching are described such as microcommand. searching are described, such as print commands, save commands, access to command mode, format display, default setting, and status indicator. Sugges-tions for software configuration include telephone numbers for three major database vendors-DIA-LOG, BRS (Bibliographic Retrieval Services), and SDC (System Development Corporation). Finally, the hardware necessary to use a computer as a ter-minal is discussed, including interface modules, modems, modular jacks, acoustic couplers, and in-

ternal modems. A list of 10 different microcomputers and the hardware and software necessary to use them as terminals completes this digest. (JB)

Descriptors - Academic Aspiration, College Transfer Students, Community Colleges, School Surveys, *Student Attitudes, *Student Educa-tional Objectives, Two Year Colleges, *Two Year College Students, Urban Schools - In spring, 1984, a study was conducted by the Center for the Study of Community Colleges to ex-antine various facets of transfer education at urban community colleges. Part of the study focused on

community colleges. Part of the study focused on the large discrepancy between the number of com-munity college students saying they wanted to earn a bachelor's degree and the actual number who st-tained the baccalaureate. A survey of students in randomly selected transfer-credit course sections at 22 urban community colleges yielded 1,163 usable responses. Study findings included the following: (1) 74% of the students planned to attain a baccalaureate degree or higher, yet only 54% indicated transfer as their primary reason for attending college; (2) 44% expressed strong feelings about the relative importance of transfer; (3) only 12% could be classified as exhibiting behavior highly indicative of transfer, and most had not taken the initiative in planning for transfer; and (4) students with high transfer attitudes and behaviors were concentrated among those who had completed 45 to 59 units, were attending full-time; and were of traditional college age. The study findings suggested that community colleges concerned with the identification of potential transfer students should collect other data besides planned degree attainment. (LAL)

In spring 1984, as part of a larger study of transfer education in urban community colleges, the Center for the Study of Community Colleges conducted a vey to analyze faculty involvement in the transfer function. A questionnaire was distributed to 444 randomly selected faculty members teaching transfer courses at 24 colleges, requesting information on faculty awareness of student characteristics, faculty interaction with students, how faculty prepare stu-dents for the four-year college environment, faculty involvement in transfer-related activities, and faculty attitudes toward transfer and other community college functions. Study findings, based on a 78% concept runchords. Study manufic, ossed on a 75% response rate, included the following: (1) 67% of the instructors did not have information on student transfer aspirations, 81% had no information on per-formance on basic skills tests, and 80% had no information on students' employment status; (2) 61% met with students during office hours, yet very few indicated communication with students in other set-tings; (3) 45% did not use casay exams at all in determining course grades; (4) most faculty engaged in a variety of activities to achieve course equiva-lency between community colleges and senior institutions; (5) most faculty were not greatly involved in formal transfer activities outside the classroom, in formal transfer activities outside the classicolar, but many were involved in less formal ways, and (6) only 19% agreed that the primary function of the community college should be transfer. The study findings suggested that lack of faculty involvement in the transfer function was due to the perception by faculty that transfer education was the domain of administrative personnel, and that transfer educa-tion had become a secondary function. College Students Identifiers- *Reverse Transfer Students

A review is provided of statewide and institutional data-reflecting the magnitude and causes of the re verse transfer phenomenon. First, data from Cali-fornia, North Carolina, Illinoia, Missouri, and Minnesota are presented, contrasting the numbers of students who transfer from two- to four-year col-leges to the sometimes greater number of students transferring from four- to two-year colleges. Next, the digest reviews three research efforts undertaken is individual adjama to identify the observer tries by individual colleges to identify the characteriziics and needs of reverse transfer students, including: (1) a study conducted at Piecmont Virginia Commua study conducted at Pleamont virgina Commu-nity College (PVCC), which focused on the demo-graphic characteristics and reasons that students with certificates or degrees attend PVCC; (2) a study conducted at Santa Ana College (California) to determine the educational interests and matriculation patterns of students who had previously attation patterns of students who had previously at-tended a four-year institution; and (3) research undertaken at the Los Rice Community College District (California), which compared the charac-teristics and objectives of students with five differ-ent educational backgrounds. Finally, the digest offers conclusions shout reverse transfers, indicat-ing that: (1) those holding four-year degrees repre-sent one of the most academically able segments of the community college student body; (2) those without a baccalaureate come to the community college for a variety of reasons, only one of which is academic difficulty at the senior institution; and (3) while reverse transfers constitute only a minority of the community college population, their presence is further evidence of the growing complexity of the community college environment. An overview is provided, examining the types of associate degrees that are awarded, the number that are awarded, the students who receive them, and the problems related to associate degree curricula. First, a list is provided of the different types of associate degrees awarded, followed by an enumeration of the vocational and non-vocational categories into which these degrees are divided: Arts and Sciences or General Programs for non-vocational degrees; and Data Processing, Health Sciences/Paramedical, Mechanical/Engineering, Natural Science, Busi-ness and Commerce, and Public Service for voca-tional degrees. Next, information is provided on tional degrees. Next, information is provided on degree awards, indicating that in absolute numbers, 158,000 non-vocational and 276,493 vocational de-grees were awarded in 1981-82. The next section looks at trends in the participation of women in associate degree education, showing that since 1976-77, over 50% of the degrees have been earned by women, though most in health; office; and public

service occupations. The final section addresses several issues that must be addressed in the future planeral index that must be addressed in the future plan-ning of associate degree programs, including the relatively low prestige of the degree, variations among colleges with respect to subject area and unit requirements, the need to keep up with technological advances in vocational curricula, and the trans-ferability of the degree. Communications technologies have the potential to transform the educational process. In the community college context, these technologies have the power to change the the roles of faculty. On one hand, these changes might mean a reduction in the number and status of teachers. On the other hand, communications technologies may afford teachers greater opportunities for role differentiation and specialization. Another change made possible by the introduction of new technologies has been an upset of traditional power relationships in the learning process, with teachers relinquishing authority and students assuming more control over their own learning. Communications technologies also allow for much greater individualization of learning, permitting students to progress at their own speed and freeing teachers from repetitious analysis and prescription. As educators realize the potential of com-puters for innovation in education, many possibilities for enhancing student learning arise: (1) computers can create realistic models and involve students in real-world computer applications; (2) throughout the college, students are using the computer as a tool to analyze data, draft and revise sketches, perform laboratory experiments, or draft and revise re; orts; and (3) individualized instruction is available via computers in public libraries, video outlets, and electronic universities, diffusing higher education's monopoly on learning beyond high school. A final area in which communications technologies can affect the educational process lies in their potential for furthering the professional development of faculty. Realizing this potential requires that administrators and policymakers help faculty develop new skills throug a planning and alcating adequate resources for computer skills and ourseware development. Perhaps 'echnology's pri-mary gift to community college faculty is the demand that they look again at the essentials of seaching and learning. (RO)

in the development of American education, have suffered from an image and identity problem since their inception. To deal with this problem, community colleges should position themselves as unique community-based service-oriented colleges and market a specific focus to the general public. The first and most important step in the positive positioning of a college in/o)/es a commitment from top administration to a strategic marketing process that includes a clear focus of institutional mission, a clear understanding of whom the college serves, and pre-cise knowledge of what makes its services unique. Throughout this positive positioning process, com-munity colleges must view themselves as part of the mainstream of their communities and develop pro-grams and services to meet the identified needs of

JC 860 267

22

their external publics. One fundamental and natural connection between colleges and their communities is in the local economy. This connection should be used as a major vehicle for positioning community colleges in the public's mind as a respected and integral part of society. A positioning strategy re-lated to economic development would involve the following steps: (1) the coll-ye president must be-lieve in and gain acceptance for the marketing mis-sion; (2) a strategic action plan must be developed with input from internal and external publics; (3) the college must get involved with its community's eco-nomic development and chamber of commerce ac-tivities by, for example, developing a small business assistance center, assisting in visitation teams to compete for relocating industry, customizing indus-try-specific training programs, and publicizing the college's role in these activities; and (4) the college their external publics. One fundamental and natural college's role in these activities; and (4) the college must follow through with its commitment and de-velop a reputation for integrity, responsiveness, and cooperation. Community colleges have been at the forefront in providing contract training programs for clients such as businesses, health care organizations, and sovernment agencies. Many state governments are beginning to provide resources for these programs beginning to provide resolutes of these programs as an incentive to a struct or retain business and in-dustry. One of the consequences of the demand for and growth of contract training programs has been a heightened interest in creating special centers to market and deliver these programs. The advantages of creating separate centers include the enhanced increasing apparate centers include the enhanced image and public relations value of having a special-ized organizational unit; their income-generating potential; and the provision of new opportunities for potentials and the provision of new opportunities to faculty to broaden their experience. Unfortunately, the rapid growth of contract training centers may also lead to some significant problems (e.g., lack of instructors qualified to competently and profession-ally represent the college, inability of the college to provide materials and facilities that meet corporate competitions and staff emismance). To maximize provide materials and facilities that meet corporate expectations, and staff resistance). To maximize benefits and minimize problema, institutions inter-ested in establishing such centers should consider the following issues: (1) college staff must carefully analyze the role and goals of a center for contract training; (2) there is a need to develop separate ad-visory structures for represents tives from businesses and the college; (3) center staff should have a strong business background; and (4) the college needs to develop policies (RO)

Followup Identifiers-ERIC Digests A review of 48 follow-up surveys of two-year col-lege vocational education graduates conducted at the institutional and state levels reveals some common findings regarding the graduates' employment experiences. Most survey respondents (70% to 80%) experiences. Most airvey response that (100 above) reported that they were employed full-time; 66% to 96% indicated that their jobs were in some way re-lated to their programs of study at college; rad most indicated satisfaction with the technical knowledge or job skills they gained at college, while expressing less satisfaction with the colleges' helpfulness in satisfaction with the college' helpfulness in satisfaction with the college' helpfulness in providing knowledge about career opportunities or in preparing them for career advances. In spite of the commonality of these findings, survey limita-tions and methodological weaknesses make it diffecult to assess the extent to which graduates' career cult to assess the extent to which graduates Careet outcomes can be attributed to their vocational stud-ies. Among these weaknesses are the fact that most studies were conducted on s "one-shot" basis; many studies were conducted too soon after graduation to studies were conducted too soon after graduation to provide a long-tic, m view of students' career lives; many surveys obtained low response rates; and many suffered from a lack of control groups against which to assess graduates' employment experiences. To improve vocational follow-up studies several steps could be taken, including: (1) reduce the size of the survey instrument to improve readonse rates: of the survey instrument to improve response rates; (2) solicit information on graduates' educational goals and prior employment experiences; (3) gather longitudinal data to trace career development pat-terns; and (4) base studies on well-chosen samples as an alternative to sorveying all program graduates. EDRS Price - MP01/PC01 Plas Postage. Descriptora-College Faculty, Community Col-leges, *Faculty Development, Research, *Schol-arship, Teacher Burnout, Teacher Improvement, *Teaching (Occupation), Two Year Colleges Identifiera-ERIC Digests The community colleges on teaching

The emphasis in community colleges on teaching as a primary faculty responsibility has frequently caused classroom teaching to be divorced from scholarship. Although the teaching role is not a nec-cisary condition for successful scholarship, some form of scholarahip appears to be a necessary condi-tion for successful teaching over an extended period of time. Therefore, the atress on teaching in community colleges may have actually led to a decline in the quality of teachin. The facts that new colleges are not being opened, that enrollments are declining, that funds for professional development are scarce, and that community college faculty are ag-ing all reinforce the importance of scholarship as a means of enhancing faculty members' performance and image as professionals. While at the university level scholarship is equated with research, at the community college level a more liberal definition of scholarship should be employed, including profes-sional activity, research/publication, artistic endeavors, engagement with novel ideas, community service, and pedagogy. The systematic processes in-volved in each of these activities will do much to strengthen teaching and combat boredom and burn-out. Though examples of scholar-teachers exist on

every campus, there is a need for the formal encouragement, support, and reward that would institutionalize the role of the scholar-teacher, and, in doing so, revitalize the teaching role. (EJV)

Identifiers-Developmental Patterns, *Negotiation Processes, Process Analysis, Process Skills, Scripts (Knowledge Structures), Social Interaction

The primary aim of this discussion is to demon-strate that social pretend play is a process of negotiation involving children's attempts to reach minimal agreements in order to maintain the play activity. The second purpose is to show that the quality of negotiation changes in content and form as social pretense evolves and that this process is reflected in different phases of play. To these ends, the paper provides a theoretical framework for the discussion

of shared and personal foundations of negotiations. Additionally, current research findings are reviewed in terms of developmental patterns in the negotiain terms of developmental patterns in the negotia-tions that transpire during four phases of social play: (1) becoming a member of a play group; (2) making a transition into the pretend mode; (3) planning and maintaining social pretend play; and (4) terminating pretend play. Concluding, remarks point out that, while a complete cycle of social pretend play in-cludes these four phases, not every instance of social pretense involves all four, the phases may not occur sequentially, and play can be terminated before the cycle is completed. Depending upon the degree of shared representation of evests and forms of com-munication, children's play may take different shared representation of events and forms of com-munication, children's play may take different forms. It is likely that play becomes more scripted with age, although it retains its personal qualities. Future research needs to identify developmental changes in the evoluation of play interaction. Extensive references are included. (RH)

children's verbal attainment scores by examining mothers' education and parenting styles and chil-dren's experience of preschool. Data are derived from a group of 5,362 children burn in England, Wales, and Scotland in March of 1946. The parent-ing styles have been studied from the time the paradministered when the children were 4 years old. Tests administered when the children were 8 years old assessed the children's abilities in vocabulary, reading, and sentence completion. Study findings fo-cused on five areas: (1) parents' educational and socioeconomic characteristics in relation to their children's preschool experience; (2) styles of parenting as associated with children's preschool atten-dance or nonattendance; (3) maternal assessments of self and child; (4) association of preschool experience and parenting characteristics, styles and self-assessments with children's verbal attainment scores; and (5) verbal attainment of children who experienced relatively low levels of maternal stimu-lation. Although preschool experience was an independent and significant predictor of verbal attainment scores, its power was small when com-pared with mothers' education. In acuition, preschool attendance had no significance in predicting the scores of children whose mothers were rela-tively understimulating. (DST)

In order to describe early childhood care and education in Canada and to discuss some related politi-cal realities and issues, this overview paper is divided into four sections. The first section concerns the use and administration of early childhood pro-grams, including some discussion of the cultural and linguistic realities confronted by Canadian early childhood education and the variations in programs provided by the different provinces and territories. The second section describes current trendo in care and educational programs, including the following: expansion of day care centers, licensed private home care, after school day care, and kindergarten for 4-year-olds; and exploration of the "family cen-ter" concept. Examined ir, the third section are two issues presently receiving attention in provincial and federal policy discussion and in research pro-grams: How much and what kinds of day care should be provided? and, How much and what kinds of early childhood education should be provided? Finally, the fourth and fifth sections respectively provide a brief review of some Canadian research concerned with the study of social and cognitive development of young children and offer a discussion of future trends in early education in Canada. Guidelines for teaching early childhood teachers and other adults about computers and their use are offered. Discussion focuses on how attitudes of the adult learner can impede learning, how the trainer can encourage teachers and other school personnel to learn about computers, and the trainers' "invisible sgenda" of educational goals that supplements the program of formal instruction. Trainers are ad-vised to vary the pace and rhythm of instruction; avoid jargon while introducing basic coocepts; en-courage the development of useful computer nobits by learners; recognize that, for adults beginning to learn about computers, memorization of routines a not as effective a strategy as understanding the pro-gram; provide explicit models for understanding ts; and suggest strategies for continued learnoocer ing. Children ought to have satisfying friendships because they otherwise may miss out on opportunities to learn important social skills, develop little faith io their abilities to achieve interpersonal goals, suffer

painful feelings of isolation, and become vulnerable to influence by delinquent peers. Factors contributto influence by definduent peers, ractors controlu-ing to children's peer relationship problems include unacceptable social behavior, "differentness" from other children, family problems, and a rejutation as a social outcast. Children with relationship prob-lems can be belped through social skills training, interventions focused on related problems, prov-ion of nontherations accial experiences, and consion of nonthreatening social experiences, and cooperative classroom projects. Adults are urged to give children evident opportunities to share peer-related concerns, show respect for children's unique social needs, and create social options for children without creating pressures. Identifiers-Incongruence (Psychology)

Highlighting pertinent research in the area of young children's development of humor, this paper reviews four areas from a cognitive-developmental perspective: (1) humor as a cognitive process, (2) humor and the developmental process, (3) research on young children's humor, and (4) humor and early childhood education. First, the structural properties of incongruity and resolution are discussed in terms of the forms that humor can take as a cognitive process. The stages involved in humor processing are examined in relation to the structure of humor and the cognitive status of the recipient. Secondly, humor is viewed as a developmental process which reflects underlying cognitive changes. General cog-nitive prerequisites for incongruity humor are defined and the stage at which young children first are capable of understanding comic incongruity is iden-tified. Thirdly, research is reviewed and findings summarized in the areas of laughter-provoking situations, cognitive mastery, moderately novel humor stimuli, and structural aspects of humor. Lastly, the role of humor in four areas of early childhood education are explained; humor as a motivating factor; the value of humor in spontaneous play activitica; the role of humor in the learning process; and the types of humor most appropriate for young children. Examples of children's jokes, riddles, etc. are used to illustrate important concepts throughout the pa-per. An 11-page reference list is appended. (DST)

 Identifiers-Professional Ethics, *Professionalism Based on the current drive toward professionalism

Based on the current drive toward professionalism in early childhood education and the low status and prestige afforded teachers in this field, this paper applies some of the main concepts of professionalism to the current state of the art of early childhood education. Two uses of the term "professional" are delineated: the "folk" concept and the scientific concept. The first use is explained in terms of an honorific designation, and early childhood practiachieved the goals implicit in this concept. Io the scientific conceptions of the term "professioo," eight criteria must be met: social necessity, altruism, autooomy, code of ethics, distance from client, standards of practice, prolooged training, and special-ized knowledge. The current status of different aspects of early childhood education is theo as-sessed in relation to meeting these individual criteria. In a closing section, the work of several contemporary developmental researchers is cited as rich io implications for principles of educatioo in the early years. Finally, the difficulty that the field of early childhood education experieoces to produciog reliable and persuasive empirical evideoce for the activities of its practitiooers is discussed. (DST)

Phenomenological Research, Piagetian Theory, *Psychological Influences Questions of how and why early childhood educa-

tion has come to rely on a psychological perspective are examined and problematic aspects of the dis-course of early childhood education are explored. course of early childhood couction are explored. An overview of the history of early education dis-cusses the replacement of idealistic by pragmatic perspectives, the influence of Darwin's use of the scientific method on educatory thought, the emersence of the field of child development, the role of normative studies of children, and the current relinormative studies of children, and the current reu-ance of early childhood educators on psychological rationales for program design. Subsequent discus-sion of educational interests and psychological the-ory initially differentiates the two domains and explores the limitations of the psychological per-spective for the educator through a brief analysis of Piaget's work that focuses on decontextualized knowledge, reason and value in psychology, and the metaphoric view of stage theories of development. Concluding discussion deals with perennial prob-lems, such as the nature of appropriate knowledge for the young and the basis for the early childhood educator's professional expertise; future directions are advocated for early educators that would in-volve a qualitative shift in how and where knowl-edge is sought and in how they think about themselves, their work, and the children they teach. to be at special risk. Also covered are the common cold, some infectious disease problems receiving media attention, and some other annoying but not serious diseases, such as head lice, pinworms, and contagious akin conditiona. Causes, characteristica, symptoms, treatment, prophylaxis, and/or serious-ness of diseases, as well as public attitudes toward them, are discussed. Focusing on respiratory diseases, chapter I describes soute upper respiratory illnesses (common cold), streptococcus sore throst, otitis media with effusion (O'AE), Hemophilus in-Juenzae Type B disease (HIB), realingococcal men-ingitis, and tuberculosis. Chapter II concerns gastrointest al infectious diseases, including heps-titis A, abigellosis, giardiasis, and rotavirus infec-tion. Infections of the skin are described in chapter tion. Infections of the skin are described in chapter III. These include impetigo, fungus infections, ring-worm of the scalp and body, scables, and cold sores (herpes labislis). Other illnesses of special signifi-cance in day care are described in chapter IV: cyto-megalovirus (CMV) infection, chicken pox, hesd lice, pinworms, and Acquired Immune Deficiency Syndrome (AIDS). Chapter V discusses immuniza-tion for dischapting county (latenus the tion for diptheria/whooping cough/tetanus, the safety of immunization, and vaccination for measles (rubeola) and German measles (rubella). Chapter VI suggests guidelines for dealing with communicable diseases. (RH)

Descriptors-Early Childhood Education, *Educa-tional Development, *Educational Quality. Fam-ily Characteristics, Individual Characteristics, Contomes of Education. Parached. Children Outcomes of Education, Preschool Children, • Preschool Education, • Program Evaluation, Research Methodology

Changing ideas about the role of early education increasingly point toward universal preschool edu-cation for all children. Early education has come to serve many purposes but, as it expands, there is danger that the particular needs of young children will be overlooked by both professionals and parents. This essay underlines the vulnerability of young children and calls attention to the lifelong consequences of preschool experiences. Examining issues concerning the long term effects of preschool experiences, the discussion suggests that the value of early education will vary as a function of a matrix of factors including program quality, the vulnerabil-ity of individual children, and family needs. Addi-tionally, the achievements and limitations of evaluation research are described within the context of possible deleterious effects of preschool educa-tion. Emphasis is given to the importance of developing ideographic methods of study to achieve more valid assessments of children's response to early ed-ucation. It is suggested that more time be devoted to understanding the effects of substitute child care on parental attitudes and behavior and to delineat-ing and documenting the damaging consequences of poorly run early childhood programs. This digest reviews a variety of strategies that might be employed by school districts, teacher edu-cation institutions, and state educational agencies to attract, train, and retrain Hispanic teachers in math and science. The need for long-term solutions is discussed. Five action-oriented steps to attract His-panic high school graduates into the teaching pro-fession include identifying talented Hispanic high

school students, developing their interest in teach-ing, locating and engaging "master" teachers, ar-ranging significant student-teacher contact, and providing incentives for students to participate in special programs. Adaptations of recommendations special programs. Adaptations or recommendations by Franz, Aldridge, and Clark are also listed. Short-term solutions are listed, e.g., providing readily available opportunities for recertification, offering improved working conditions, offering teachers financial assistance during additional years of college preparation, providing summer jobs in industry, recruiting part-time instructors from other segments of society, and borrowing skilled profes-sionals from industry. Options for financing pro-grams for youths in teacher education programs and for Hispanic teachers currently employed or under-employed are presented. (PM)

Identifiers-ERIC Digests, "Undocumented Students

The issue of providing public education for un-documented students (children of foreign-born per-sons who reside and/or work in the United States without proper permission from immigration au-thorities) is receiving current attention for two major reasons: (1) fear that the financial burden on local taxpayers will increase in areas with increasing concentrations of undocumented students; and (2) Supreme Court declaration that Section 21.031 of Title 1 of the Texas Education Code, which denies reimbursement of funds to local school districts for educating undocumented children, is unconstitu-tional. While Texas estimates \$85 million a year is spent to educate undocumented students and Los Angeles estimates annual expenditures of \$415 mil-lion, the question of the actual cost of educating undocumented students continues because most states lack actual enrollment figures. The cost of developing and implementing programs for undocu-mented children depends upon district characteristics (numbers of students, taxable property per pupil, teacher linguistic characteristics, presence of programs for limited-English-speaking students, puprograms for manuely-program speaking subsettiering, put-pit-teacher ratios, historical enrollment patterns, status of physical facilities, and proximity to migra-tion streams used by undocumented persons) and student characteristics (numbers, age dispersion, geographic dispersion, English fluency, prior educa-tional experiences, length of presence in this coun-try, and senioneonomic status) (NEC) try, and socioeconomic status). Identifiers-ERIC Digests

Outdoor education is an informal method of teaching and learning which offers opportunities for elementary school students, regardless of intellec-tual abilities, to learn about and appreciate their environment and acquire skills with which to enjoy a lifetime of creative, productive, and healthful liv-ing. Outdoor education can enrich, vitalize, and complement all content areas of school curriculum by means of first-hand observation and direct expe-rience out-of-doors. School grounds, regardless of locale, can afford learning opportunities. This publi-cation discusses the need for and focus of outdoor education, outlines six school ground activities adaptable to any elementary grade level, and pro-vides specific language arts, social studies, science, health, mathematics, art, and music projects for each outdoor activity. The outdoor activities in-clude: marking shadows at different time intervals; collecting insects and other animals; observing the concerning insects and other animals observing the flagpole; observing a partly cloudy sky; and observ-ing birds near feeders or shrubs. Interdisciplinary activities suggested from a visit to the school park-ing lot include composing words from license plate letters, determining distances to capital cities of states represented by cars in the parking lot, sug-gesting parking lot safety rules, computing parking lot size, designing a car using basic shapes and col-ors, and composing a song or rhythmic reading. ment, Teacher Role Identifiers—ERIC Digests Addressing the problems of recruiting and retain-ing qualified teachers for small and rural schools, this digest outlines improvements that could be

made by teacher education programs, state education agencies, school superintendents, and teachers themselves. Suggested guidelines for teacher educa-

tion programs stress nontraditional approaches that would allow teachers to obtain the multiple teaching

endorsements usually needed in small school dis-

tricts. Suggested delivery systems include the use of telecommunications, weekend courses, correspon-dence courses, intensive on campus courses, and ru-centers for preservice and inservice teachers.

Change strategies proposed for state agencies focus on certification requirements and funding strate-

gies. At the school district level, suggestions include

schools and using shared services to provide staff development activities. Teachers are urged to pre-

pare themselves as generalists rather than sub-ject-matter specialists and to recognize the demands of teaching and living in suall communities. A list

In rural areas the responsibility for good school-community relations rests with the principal, who must develop a strategy for community rela-tions, understand the people of the community and their values, and know their formal and informal leaders. School principals can use various strategies to increase community involvement. They can simply extend an invitation to visit the school, allow the school building to be used for community activities, sctively ecruit community volunteers, and publish a school newsletter. One study showed positive school-community relations in schools that allowed citizens to use the library, advertised events in the news media, or had s cafeteris or gym open to com-munity members. Because small and rural schools are often closely identifed with the community, community cooperation is usually easy to secure and community members may be eager, or at least willing, to assist. They can serve on staff develop-ment planning committees, identify community resources, teach minicourses on local history, serve on advisory boards for various programs, and help to recruit teachers who fit the community. A key to good school-community relations may be community-minded administrators and teachers who par-ticipate in civic activities outside the school and feel comfortable in the community. (JHZ)

Information concerning methods and available materials for conserving energy is needed by small, rural schools to offset continued increasing energy costs and lack of financial support and technical assistance. The first step in developing an energy conservation policy is to obtain school board commitment and to establish an energy saving policy. Next, an energy coordinator should be appointed and commitment and involvement of school and community members enlisted. An energy sudit fo-cusing on human, structural, lighting, mechanical, and special systems should occur and generate data on annual energy costs, climate conditions, and building strengths and weaknesses. Based on the audit, achievable goals should be set. Inexpensive energy conservation practices can include lowering thermostata and water temperatures; removing dec-orative/unnecessary lights, caulking and/or weatherstripping windows/doors: Mindows/doors; limiting/consolidating evening activities including custodial work. Conservation methods requiring small capital outlays include installing smaller, well insulated windows, adding vestibules at outside doors; switching to fluorescent, sodium or mercury lamps; planting shade trees; installing heat recovery

RC 015 450

equipment and attic fans; repairing leaking faucets; repainting/resurfacing roofs to increase reflective-ness; developing vacation shutdown procedures. Energy saving school rescheduling programs, in-cluding the successful 4-day week, can be implemented. References and sources of additional information and available materials are provided. (NEC)

Education Identifiers-ERIC Mini Reviews **Jational Com-mission on Excellence in Education, *Nation at Risk (A)

The National Commission on Excellence in Education has challenged educators across the nation to drastically change the course of education during the 1980s. While rural educators share the desire to provide excellence in education, the Commission and the United States Department of Education must recognize the unique characteristics of rural schools and provide appropriately different strate-gies to enable rural schools to meet the new goals. gies to enable rural schools to meet use now gonae. Rural educators urge national policy makers to rec-ognize diverse rural subcultures, support innovative teacher training programs, develop career ladder and merit pay systems designed to retain quality rural personnel, support more comprehensive inser-tions training researces, support intermediate educavice training programs, support intermediate educa-tional unita, and provide adequate rural special education aervices support. Problems for rural schools include insufficient funding and inadequate specialists to provide higher level basics, foreign lan-turate and educated placement discusses treases guages, and advanced placement classes recomguages, and advanced piecement classes recom-mended as graduation requirements by the Commission. To strengthen programs, rural schools should consider senior atudent schedules, non-aca-demic programs, classroom time on task, traveling teachers, and community participation. To support rural school reform ~ cymakers should address recruitment, suppo______etention of rural teachers by providing flexible certification requirements, career ladder and metit pay programs, and adequate university teacher training programs. The first in a series of booklets on using outdoor education methodologies to enhance the academic curriculum, this guide is written to help teachers of grades K-8 develop activities to enrich science in-struction. The introductory sections define outdoor education and provide a rationale for outdoor sci-

ence teaching stressing the opportunities it provides for creativity, inquiry, and problem solving. The bulk of the guide consists of detailed plans for out-door sites. Each activity is adaptable for use in several grades and follows a basic lesson plan format stating purpose; concepts; objectives for learners; materials; and procedures. The first set of three activities illustrates ways to introduce student: to the school grounds as an outdoor laboratory. Topics are soil, leaves, and litter. The remaining six activities cover concepts of observation, classification, logical cover concepts of observation, classification, logical thinking and inference, interdependence, and cosi-munity. Activity titles include: "Observing: The Ba-sis of Science," "A School Yard Alphabet Hike," "The Mystery-Sack," "Similarities and Differ-ences," "The Web of Life," and "The 113 Unit Homestead." An appendix lists 17 organizations providing information about outdoor education. (JHZ)

written for teachers in elementary and middle schools and for personnel at outdoor education cen-trs, this sublication is the second in an ERIC/ CRESS series on utilizing outdoor education meth-odologies to enhance the academic curriculum. The resource guide suggests ways of getting atudents in-terested in arithmetic and mathematics and how to make teaching math fun. Fifteen outdoor activities are keyed to the basic mathematics (ills which the National Council of Teachers of Mathematics (NCTM) advocates each student acquire before completing high school. The skills include problem solving; applying mathematics in everyday situa-tions; alertness to reasonableness of results; estimation and approximation; appropriate computational skills; geometry; measurement; reading, interpret-ing, and constructing tables, charts, and graphs; using mathematics to predict; and computer literacy. Each lesson is presented as an "ides" and contains descriptions of the NCTM skill, purpose, materials required, specific activity, and procedures. The lesson titles are: "Outdoor Shapes," "Hull Gull," son titles are: "Outdoor Shapes," "Hull Gull," "Arithmetic Treasure Hunt," "Cricket Thermome-ters," "Popcorn Scramble," "Seesaw Equations," "Practice with Dimensions of Circular Objects," "Outdoor Sets," "Ant and People Race," "Can You Locate the Center of an Acre?" "How Many Deer and Moose," "How Tall is That Tree?" "Lumber-jack Lesson," "Hunting Buried Treasure," and "Building and Using a Measuring Wheel." (NEC)

- Identifiers-*Effective Schools Research, ERIC Digesta

Small schools (with enrollments of 300 or less) are

being rediscovered as models for effective schools. Currently 26.9% of America's school systems enroll over 500,000 students in more than 26,000 small schools staffed by 50,000 teachers. Small schools have pioneered many educational "innovations": non-graded classrooms, individualized instruction, cross-age groupings, peer tutoring, and emphasis on the basics. Current efforts to reduce atudent/ teacher ratios, use the community as a resource, and "mainstream" mildly handicapped pupils also have their roots in the amall schools of the past. Small schools offer benefits in areas of personal relationschools other benefits in areas of personal relation-ships, student morale, teacher-student interaction, administration, and curriculur.1 and instruction. Al-though research on optimum school size is mixed, research suggests that class size is related to pupil achievement, smaller classes are more conducive to improved pupil performance, smaller classes provide more opportunities to meet individual needs, pupils in small classes have more interest in learning, and teacher morale is higher in smaller classes. Strengths inherent in small schools that support characteristics/practices associated with findings from "effective schools' research" include orderly, serious, safe, attractive school climate, clear school mission; strong administrative leaders who empha-size instruction; high expectations for student achievement; presence of student, staff, and school evaluation systems; supportive home/school rela-tions. Directed primarily toward small school administrators and school boards, this publication describes a consortium of five rural school districts in central Missouri and how they used a traveling teacher to facilitate incorporation of microcomputer capabili-ties into the school systems' operation and curriculum. The paper describes the use of the consortium to provide teacher inservice training in each district and discusses curriculum applications of microcomputers. Topics include development of the training program, delivery system, methods of instruction, evaluation of the inservice program, and explanation of the post inservice use of computers in the consortium schools. A discussion of the suggested principles of consortium operation covers the need for a clear advantage to cooperation, optimal num-ber of members, geographic proximity and size of member schools, leadership, organization, finances, and the use of outside resources. Background material includes a description of the roles to be played by small school consortia, a review of literature conschools, and a history of the Mid-Missouri Small School Consortium (MMSSC) with attention to features that made for successful sharing of services. Appendices contain tables showing participant rat-ings of inservice training topics, characteristics of schools and communities forming the MMSSC and a short list of references. (JHZ)

Written for rural educators, this handbook pro-vides practical guidelines for working with rural youth who will be seeking jobs in urban areas. The suggested learning activities can be used for an inde-pendent course; integrated into existing programs;

or applied in counseling. The introduction discusses needs of rural students and relates positive rural values to urban work success. Section 2 suggests ways to help rural students explore personal charac-teristics, careers, and jobs. Section 3 covers practical steps in getting a job including how to find openings, complete applications, prepare resumes, and cope with interviews. Sections 4 and 5 deal with what rural students will need to know after getting a job in an urban area. Discussion of the urban workplace covers issues such as time clocks and work days, bosses, promotions, changing jobs, and being fired or laid off. Discussion of adjustment to the urban community covers where to live, utilities, insurance, taxes, transportation, banking, credit, etc. Section 6 explores entrepretentiable, disking, creat, etc. Section of explores entrepretentiable as an option for rural youth who would like to remain in rural areas and lists numerous resources including some specifically for women in business. Bibliographies list studies of rural youth and career development materials for use with rural students. (JHZ)

The role of review in mathematics instruction is briefly summarized in terms of reasons, timing, and types. Promoting retention is the primary reason for reviewing; continuity, assimilation, diagnosis, learning prerequisites, and confidence are also noted. Re-search clearly indicates that review should be systematically planned and incorporated into the instructional program at regular intervals. Among the types of review discussed (with some specific examples) are outlining, questioning, testing, group aize, homework content, difficulty level, and games. Nine references are included. (MNS)

tudes, Teacher Attitudes

This information bulletin reviews the research literature on blacks and mathematics. The amount of research that focuses specifically on race differences in mathematics in an attempt to explain and lessen those differences is small. Research of the past ten years indicates that black atudents, when compared to white students, take fewer mathematics courses and achieve at a significantly lower level, although the differences are growing smaller. Some factors which may explain why these differences exist are presented, with the focus on race, gender, and social class. A model relating these factors is presented and described. The review of the literature concerns societal influences, teacher attitudes, school mathematics curricula, student attitudes and student achievement-related behaviors, classroom pro-cesses, and student achievement. Following the concluding summary, in which directions for future research are also noted, an extensive 'ist of references is included. (MNS)

SE 045 915

Identifiers-ERIC Digests, *Science Education Re-

The first science education digest for 1985 focused on data obtained by use of meta-analysis techniques on research studies of science instruction. Instruction seldom takes place without instructional materials, so this second digest is a companion one containing a discussion of science education re-search on instructional materials. Data are shown which support the idea that the science curriculum improvement project materials developed after 1955 were successful in promoting student achieve-ment in the use of science process skills, in creativity, and in higher cognitive skills at both elementary and secondary school levels. Research, however, has focused more on programs than on textbooks. Because teaching from, and with, textbooks is the dominant method of instruction in many science classes, research is needed on such areas as how students learn to use textbooks to become independent learners and how to write them to promote efficient learning. Identifiers-ERIC Digests, Piagetian Theory

The principal focus of this brief report is on find-ings and observations from relatively recent research on the learning of mathematics. The distinction between learning and the concepts of curriculum and instruction is first reviewed. Then Piaget's theory of intellectual development is dis cussed, with the conclusion that it does not provide a basis for determining readiness for mathematics instruction. The contribution of information processing theory is then noted. Four additional observations from contemporary research concern the following: the focus on individuals (versus groups), behavioral objectives, invention or construction of knowledge by young children, and metacognition. A list of references is included. (MNS)

Problems related to the handling of hazardous substances and toxic wastes have escalated making this environmental dilemma a national concern. This digest provides an update of key legislative and management efforts associated with hazardous wastes and reviews current instructional materials in the area. Major topics addressed include: (1) waste disposal laws (summarizing major legislative attempts); (2) superfund (describing its intent and parameters); (3) management options (assessing current procedures and techniques); (4) teaching materials (providing a representative sample of ma-terials available in the ERIC system); and (5) additional sources (identifying programs and resources that could assist in the development of instructional materials). Technology Identifiers—*Canada, Excellence in Education, Sci-ence and Society, *Science Education Research The two science education digests for 1985 con-

tained reports of research related to science curridulum and instruction. This information bulletin has been designed to continue making suggestions for improving education, more specifically education in science classrooms. It focuses on: (1) findings from science education studies (including "Project Syn-thesis"); (2) findings from reports dealing with ex-cellence in education (such as "A Nation at Risk: The Imperative for Educational Reform"); (3) findings from science education research studies; (4) why there is an impetus for change in science of ucawhy there is an impetus for change in science educa-tion; (5) information from Canadian science educa-tors, considering steps involved in "deliberative inquiry," seven curricular emphases in science, and issues related to incorporating a science and tech-nology focus into science curricula; and (6) who decides curriculum questions. One generalization offered is that persons interested in improving sci-ence education have some positive findings from the meta-analysis research data upon which to build in terms of instructional strategies that lead to interms of instructional strategies that lead to increased student learning and other positive out-comes. In addition, science for general education should not be neglected since science instruction should be geared toward both the ciuzen and the future scientist. Thirty-five references are viso included. (JN)

- Note-4p. Pub Type-- Information Analyses ERIC Informa-
- America

This ERIC Digest considers the present state of teaching about Latin America in elementary and

secondary schools in the United States, the need and rationale for Latin American studies, effective approaches to teaching Latin American studies, and resources to supplement textbooks that treat Latin America inadequately. Following an introductory section describing the incomplete or biased portrait of Latin America frequently presented in social studies textbooks and the media, four considerations for including more about Latin America in the curriculum are listed: (1) foreign policy-interna-tional controversies over the influence of other govtional controversies over the influence of other gov-eraments in the politics of Latin America need analysis and examination; (2) physical proximity -Latin American countries are virtually next-door neighbors, with close political, commercial, and cul-tural interactions with the United States extending over many years, (3) the American heritage-Latin American culture and the Spanish language are part of the American beritage correctly and conof the American heritage, exerting early and con-tinuing influence on the southwestern region of the United States, and (4) negative stereotyping-it is well documented that Hispanic Americans in gen-eral suffer from explicit negative stereotyping. The world history course is recommended as an espe-cially fertile ground for introducing a Latin Ameri-can perspective into a study of world events. Classroom strategies and suggestions for a separate Latin American studies course are followed by in-formation on sources of materials and a list of resources. (LH)

Fact Sheets This ERIC Digest describes research findings,

mainly in elementary social studies classrooms, on the effects of cooperative learning on multicultural swareness and cross-ethnic friendships, interper-sonal relationships, and prosocial behavior. Research findings on cooperative techniques in the classroom are summarized as follows: compared with other methods, cooperative learning produces strater academic learning, better intergroup rela-tions among black, white, and Hispanic students, enhanced self-esteem, and improved relationships between mainstreamed academically handicapped students and other students. Brief sections describstudents and other students. Bhet sections describ-ing the positive effects of cooperative learning are followed by descriptions of three widely used ap-proaches to cooperative learning: (1) Student Teams-Achievement Divisions (STAD)-a method in which students with widely varying academic abilities are assigned to four- or five-member teams; (2) the "Jigsaw" method-in which students become "experts" on a topic, then meet with other experts to study their assigned topic; and (3) the Group Investigation Model, which attempts to eliminate committion astignib he involving accompating action competition entirely by involving cooperative group inquiry emphasizing data gathering by pupils, inter-pretation of information through group discussion, and synthesis of individual contributions into a group project. A list of references concludes the document. (LH)

Identifiers -ERIC Digests

This ERIC Digest examines the nature of peace and nuclear war education, rationales for its inclu-sion in public school programs, and ways to deal with the controversial nature of the topics. A distinction between peace education and nuclear war education is followed by a description of four basic themes offered as a rationale for peace and nuclear war education: peace and nuclear war education are appropriate content for developing capable, thinking, competent young adults; peace and nuclear war-related content are highly relevant in today's world; openly addressing and confronting psychological concerns of young people regarding nuclear war with information and appropriate pedagogy can help young people cope with these concerns; and by addressing peace and nuclear issues, teachers can prepare young adults for participation in the na-tion's democratic institutions by helping them make decisions regarding leaders and policy. Challenges for dealing with the controversial nature of peace and nuclear war education include (1) those teaching peace and nuclear war education must familiarize themselves with both the content and processes necessary for credibly teaching this information and must take great care in selecting only age-appropri-ate lessons; (2) the controversial nature of peace and nuclear war education must be recognized, con-fronted, and honestly addressed; and (3) sdvocates of peace and nuclear war education need to work diligently, patiently, and cooperatively in bringing about the changes they seek. A list of 15 related resources concludes the digest. (LH)

Conservatism, Court Litigation, Elementary Secondary Education, Library Material Selection, Public Schools, *School Libraries

Identifiers—ERIC Digests, Fact Sheets This ERIC Digest synthesizes current attitudes on library censorship in the public schools, as reflected in state statutes and federal court cases. Separate sections describe the rise of censorship, recent court cases and incidents related to library censorship, who the censors are; what is being censored; a framework for academic freedom in schools, and a distinction between selection and censorship. Following a discussion of the recent rise of consorship in the nation's classrooms and school libraries, a comparison of the views of proponents of academic freedom and the views of proponents of censorship is offered. Recent court cases and incidents related to library censorship are offered as examples of the recent challenges coming from the conservative side of the political spectrum by leaders such as Phyllis Schlafly, Jerry Falwell, and Mel and Norma Gabler. Examples of the most frequent targets of protests are followed by a framework which librarians and other decision makers may use to maintain the right of academic freedom. This framework holds that educators may use methods, symbols, or materials (1) relevant to the subject matter being taught, (2) not in violation of valid laws, (3) compatible with current standards of decency, (4) reasonable for stu-dents' level of maturity, (5) intended for a legitimate educational purpose, and (6) unlikely to result in substantial disruption of school activities. A distinctioo between selection and censorship is made and the importance of sustaining a commitment to the concept of academic freedom is emphasized. (LH)

Identifiers-ERIC Digests, Fact Sheets This ERIC Digest reports oo the findings of a 1984 Wiogspread Conference on Strengthening High School World Studies Courses. The digest considers key challenges that the course poses for educators, the goals of the conference, long-term efforts that have been initiated, activities recommeoded by conference participants that would provide practical help to local schools, and current efforts to implement conference recommendations. Challenges facing educational leaders as they attempt to strengthen their world studies courses in-clude the fact that there is oo universal approach for teaching "world studies," that there is no mecha-nism for educational leaders to identify and assess successful practices, and that there is a critical need to help teachers and administrators enhance their capacity to teach world studies. Conference goals are then outlined, followed by four activities recom-mended as a way of providing practical help to local schools: (1) the development of a handbook outlining and analyzing alternative conceptual ap-proaches to high school world studies courses, (2) the collection and dissemination of syllabl and other appropriate descriptions of world studies course being taught in high schools across the mation, (3)

the development of model resources for developing a global relations course, and (4) the strengthening of preservice and inservice programs by focusing on leadership and teacher preparatioo. A description of two projects resulting from these recommendations is followed by a list of nine related resources. (LH)

Objectives, Elementary Secondary Education, *Information Retrieval, Information Systems, *Online Searching, Research Tools, Search Strategies, "Social Studies Identifiers-ERIC Digests, Fact Sheets

This ERIC Digest examines the uses of databases in the social studies, including what a database is and how to use it, types of databases available for social studies classroom use, and the role this educational tool can play in achieving the goals and objec-tives of the social studies. A distinction between print and computerized database files and a simplified example of the use of Boolean logic in searching computer databases is provided. Two types of data-bases currently applicable in the social studies classroom, on-line databases and database software, are then examined. Listed are some of the on-line dataes relevant as student research tools in the social studies, including The New York fimes Informa-tion Service; America: History and Life; Historical Abstracts; Facts on File; Educational Resources In-formation Center (ERIC); and Magazine Index. Uses of database software are discussed and examples of commercially available database software programs are also provided. That database develop-ment and maintenance are fast becoming essential skills for effective citizenship participation is offered as a compelling rationale for incorporating this tool into social studies instruction. By creating and using databases, students develop research and organization skills. By searching databases, they learn to Montify information oceds, make problem statements, retrieve and sort information, and design strategies for organizing data. (LH)

lotended for educators interested in providing peace and ouclear war education in the public schools, this publication examines the nature of peace and ouclear war educatioo, rationales for its ioclusioo in the public school program, and ways to deal with the controversial nature of the topics. The first of eight chapters presents a four-fold rationale. Peace and nuclear war education are considered appropriate content for (1) developing reflective and competent young adults, (2) increasing the rele-vancy of peace- and nuclear war-related content in today's world, (3) addressing psychological con-cerns of students, and (4) preparing young adults for civic involvement. Chapter 2 defines peace and nuclear war education and addresses commonalities between the two. Chapter 3 presents a rationale and criteria for teaching controversial issues. Chapter 4 examines biased and unbiased instructional materials, personal beliefs, age appropriateness, teaching methods, infusion of peace and ouclear war education into the middle school, junior high, and elemen-tary school curriculum, and some helpful teaching hints. Materials and instructions for a curriculum materials analysis system are provided in Chapter 5. Chapter 6 gives suggestions for dealing with school and district level resistance to the political and conand district level residuate to the pointcar and con-troversial nature of peace and ouclear war topics. Annotated citations for over 20 teaching resources in Chapter 7 are followed by five concluding chal-lenges in Chapter 8. A list of over 50 related references coocludes the publication. (LH)

A brief summary of social studies research from 1976 to 1983 is divided into five parts. "Cognitive Thinking and Cognitive Process Research" presents a definition of critical thinking, recommendations for cognitive process instruction, and results of cog-nitive process instruction, and results of cognitive process research concerning the relationship between learning style and developmental level. "Early Childhood/Elementary Social Studies Re-search" discusses recent research indicating the connection between the development of the young child's sense of self, school performance, and social relationships. Also discussed is research in the areas of spatial development, general concept formation skill development, and information processing skill development. "Research in the Socio-Moral Dodevelopment. "Research in the Socio-Moral Do-main" considers research on values clarification, community involvement and social action ap-proaches to social studies education, and coopera-tive learning. "Ethnographic Research" focuses on the effects of significant changes in curriculum, in-structional practices, and personnel. The role of eth-nographic research in sensitizing social educators to the complex interactive nature of instruction is also discussed. "Research on the Foundations of Social Education" outlines debates regarding the purpose of social education, particularly those debates aris-ing over the "Three Traditions" approach. A list of references concludes the paper. (LP)

Descriptors—"Citizenship Education, "Constitu-tional History, Elementary Secondary Education, History Instruction, Learning Activities, National Organizations, "National Programs, Resource Materials, School Involvement, "United States History

Identifiers--Bicentennial, ERIC Digests, *United States Constitution

This overview of nationwide bicentennial efforts with particular relevance for elementary and sec-ondary educators deals with three apsects of the commemoration. First discussed is the program-ming that national organizations, such as the Com-mission on the Bicentennial of the U.S. Constitution, Project '87, The American Bar Associstion (ABA), and the National Council for the Social Studies (NCSS), are undertaking to commemorate the event. Next described are several naincluding participatory school-based programs, including the "Young Scholars Bicentennial Project," sponsored by the National Endowment for the Humanities (NEH); "We the People," a mock trial program and student seminar sponsored by the ABA; a national writing competition for high school students on "The Constitution: How Does the Separation of Powers Make I Work?"; a na-tional "History Day" on "Rights and Responsibili-ties in History"; and "The Jefferson Meeting on the Constitution: The Constitution in the Classroom." Lastly, examples are given of how schools can work with other educational groups to commemorate the Bicentennial; examples include the James Madison Fellowship Program and a National Bicentennial Competition. A list of 11 pertinent resources and addresses concludes the overview (CC)

Critical thinking is a major goal of social studies education. Teachers need to know what critical thinking is before they can successfully incorporate the skill into their teaching strategies. Understanding why critical thinking is a major goal of education in a free society helps teachers prepare students to be informed and rational participants in civic affairs and to gather enduring intellectual abilities to make themselves more effective as students. To develop skills for critical thinking requires that teachers ask challenging questions and require students to pro-vide evidence for their answers or opinions. Encouraging students to examine different positions on controversial topics in an open supportive classroom environment prepares them for the responsi-bilities of participating in a free society. Included in this document are nine related references. (JEH)

The authors in this volume propose expanding the topic of motivation in the preservice teacher education program by including contemporary research. Margaret W. Cohen reviews a body of research and theory concerned with the effects of extrinsic rein-former of including contemporary research. forcers on intrinsic motivation. She notes that con-temporary research in the area of intrinsic motivation has consistently demonstrated that ex-trinsic reinforcers may undermine rather than facilitate performance on and interest in activities that are intrinsically motivating. Carole Ames addresses the implications of attribution theory for the teacher preparation curriculum. She believes it is important for teacher educators to help preservice teachers understand the positive and negative effects of types of classroom structure and evaluation on attribu-tion. Dale H. Schunk suggest that solid comparis tion. Dale H. Schunk suggests that social compari-son is an inherent factor in every classroom and can have positive or negative motivation effects. M. Kay Alderman suggests that the preservice component in motivation should provide the preservice teacher with a repertoire of motivation-linked strategies, such as goal-setting, in order to facilitate learning and to educate students with high-achievement pat-terns of thought and action. Drawing from research on teacher effectiveness and decision making, Mary Rohrkemper argues that if preservice teachers are to be adequately prepared, they need concrete skills that will enable them to observe motivation, diagnose the need for motivational strategies, and assess the effectiveness of strategy implementation. Bibli-ographics accompany each of the articles. (JD)

tion Programs Identifiers---Evaluation Problems, Ohio State University

This monograph grew out of an effort to develop I has monograph grew out of an entor to develop a new and comprehensive system for evaluation of teacher education programs at Ohio State Univer-aity (OSU). The need for a more sophisticated eval-uation system became apparent as it was noted that follow-up studies revealed that many graduates of

the College of Education took their first jobs unequipped with many skills the curriculum was sup-posedly providing. Also, the system had no feedback loop which would enable the College to identify and correct student and program deficien-cies. The monograph provides an overview of the literature on teacher education evaluation systems, and describes insues at OSU that can be generalized or other institution. and describes insules at OSU that can be generalized to other institutions. Descriptions are provided of the student and program evaluation system that has emerged at OSU, including its conceptual base, the components of the system, and its implementation process. The instrumentation used in the program its emerged at a null a machine soft data and and the presented, as well as analyses of data produced from the system. Discussions are included on the implications drawn from the findings of the system, the proposed next step in the system's development, and the significance of such a system to the im-proved effectiveness of the teacher education enterprise. It is believed that this system is replicable in whole or in part in many other settings, and special care is taken to explain the rationale, to provide many examples of forms and materials used, and to many examples of forms and materials used, and to document the implementation process at each supp of the way. Appendixes present: a hypothetical indi-vidual profile; the Freshman Early Experiencing Program (FEEP) exploration profile, 1982-83; an analysis of teacher candidate profile ratings, 1982-83; a summary of findings from a follow-up questionnaire, -1982-83; and elements, activities, and strategies for implementing an evaluation sys-tem. The articles in this monograph provide a frame-work for reflecting on a variety of educational is-sues. In section one the historical roots of teacher education are examined. The second section deals more directly with what a teacher is and how the definitional properties of "the teacher" is and now the definitional properties of "the teacher" begin to dic-tate a curriculum for teacher education. The impact of regulation and testing on teacher education is the focus of the third section. The final chapter describes the nature of the federal government's in-volvement with teacher education. The following volvement with teacher education. The following papers were selected from papers prepared for the National Commission for Excellence in Teacher Education: (1) "An Evaluation of the Rationale for Required Teacher Education: Beginning Teachers with and without Teacher Preparation" (Martin Ha-berman); (2) "From Quantity to Quality Teacher Education in Britain" (Harry Judge); (3) "Recent Reports on Education: Some Implications for Pre-paring Teachers" (Edward J. Meade); (4) "The 's braska Consortium for the Improvement of Tea. Education" (Mary M. Kluender); (5) "The Implica-tions for Teacher Education of Computer Technol-ogy" (Barbara Dubitsky); (6) "Preparing Teachers

tion for reacher Bancanon of Computer Technor ogy". (Barbara Dubitsky): (6) "Preparing Teachers for Schools of Choice" (Mary Anne Raywid); (7) "Defining the Excellent Teacher Preparation Pro-gram" (Norma Nutter); (8) "Toward a More Desir-able Profession" (Sharon P. Robinson); (9) "Testing Teachers for Certification and Recertification" (Eva Colorbeach (1) "Berformance Read Cartification" (Eva C. Galambos); (1.) Chapter 1 of this monograph dealing with basic physical education instruction programs traces the history of physical education in colleges and univerrities from 1885 to 1985. Physical education pro-grams became strongly entrenched within the higher education curriculum with the sanction of college administrators who recognized a responsi-bility to college students for their physical health as well as their mental growth. The changing emphasis in the physical education curriculum from formal health-oriented calisthenics to programs offering development of lifetime sport skills is discussed, as development of lifetime sport skills is discussed, as well as the societal pressures that brought about these changes. In chapter 2, the current status of the basic instruction program in physical education in institutions of higher education in the United States is described. A discussion is presented on the prob-lem of whether the physical education program in a college or university should consist of required or elective courses. Questions on tenure for physical education faculty, financing the athletic program, credits given toward graduation and the seneral credits given toward graduation, and the general design of the physical education program are also considered. The final chapter offers reflections on the future of physical education on college cam-puses. It is pointed out that at present there is no consensus on the goal-orientation of physical education programs. The future direction of physical edu-cation may either be toward developing skills for the enjoyment of individual lifetime sports, or toward an emphasis upon health education and physical fitness. This report provides an overview of the current applications of computer technology to onstruct test items and/or to formulate tests according to sound measurement principles. The test items may be computer-generated from strategies programmed by test constructors, or pre-constructed by item writers and stored in computer memory. The tests formulated may be administered interactively by the computer or as paper and pencil tests. Studies dealing with computer applications in item con-

TM 860 186

struction, iter canking, test design, and test admin-istration (both adaptive and nonadaptive) are grouped for review in four sections: (1) theoretical and philosophical propositions; (2) applications and implementations; (3) evaluation and research; and (4) prospects for the future and implications for educational testing. It is concluded that while there have been many attempts to utilize computers for have open maby attempts to traize computers for test construction, actual successful, large scale ap-plications are relatively few. Most of these simply use computers to replace pencil and paper tests or human labor. With the exception of adaptive testing, there is little documentation to show that the quality of assessment processes is improved by com-puter utilization. However, with continuing rapid technological developments to overcome current computer limitations, and with attention to mea-surement quality, the future of computer-assisted test construction should be very bright. The growing interest in human resources develop-ment. (HRD) is a response to the increasingly competitive business environment which, in turn, has been shaped by such forces as the emergence of global competition, the quickening pace of techno-logical innovation and the reduction of federal regu-lations in some industries. This monograph seeks to contribute to the current momentum of HRD by describing the state of the art for HRD evaluation. The needs of business managers and academicians are addressed by describing the applications of evaluation methods to decision-making within the train-ing or HRD organization. Both formative and summative training evaluations are discussed in terms of issues, constraints, and techniques. Models for training evaluation are analyzed into a number for training evaluation are analyzed into a number of components: (1) definition of perspective; (2) de-scription of variables; (3) use of flowcharts or de-scriptive matrices; (4) lists of questions; (5) data collection technique; (6) data analysis techniques; (7) research designs; (8) reporting procedures; and (9) detailed examples. A section on evaluation prac-tice summarizes analyses of evaluations to show how training evaluations are settably done. Concern how training evaluations are actually done. Concep-tual and strategic issues that challenge the evaluator are described. An appendix outlines methods for training economic impact analysis. (LMO)

 Descriptors - Adolescents, *Blacks, *Desegrega-tion Effects, Dropouts, *Early Parenthood, *Fe-males, Outcomes of Education, *Pregnancy, Deschart Reduction Science (1997) Preschool Education; Secondary Education; Student Needs Black teenage girls have more than half the babies

bind to single temagers, and as they are more fre-quently poor as well, they are more susceptible to the negative effects early childbearing has on future schooling and jobs. Studies show that teenage moth-ers are far less likely to complete high school or enter the work force than other teenagers. Educational opportunities available to Blacks that enhance their appreciation of school and encourage them to enter the work force are found to be important factors in reducing early childbearing. These include preschool programs (shown to reduce ater preg-nancy and dropout rates which are important facschool programs are less likely to have a child before the age of 18); and high educational aspirations, specifically the desire to have a college degree (a study shows that these teenagers are 85% less likely to get pregnant). In order to reduce the incidence and negative effects of teenage pregnancy, the fol-lowing strategies should be employed: (1) a curriculum leading to further schooling and/or jobs should turn reasons to turner schooling and/or joos should be offered; (2) concrete information on the realities and responsibilities of parenting should be made available to teenagers; (3) parents of teenagers should be involved in programs before as well as after pregnancy has brought on a crisis; and (4) the involvement of teenage fathers should be fostered. The impact of the technological revolution on education is examined in this monograph, which fo-cuses primarily on computers. First, the history of the educational uses of a variety of media (film, radio, television, teaching machines, and videodisc systems) is traced and casessed. As instructional aids, it is said, the media economize teachers' time and efforts, impart information efficiently, and can make learning more fun, but research has strongly suggested that the effectiveness of media is largely dependent on the abilities of a good teacher who researcher on the abilities of a good reactine who reses them effectively. Next, the report describes current and emerging applications of the new com-puter-based technologies, including: (1) manage-ment of curriculum content; (2) management of pupil information; (3) presentation and monitoring of drill and practice; and (4) computer-assisted tuto-bil instancios. Following this discussion an ever rial instruction. Following this discussion, an over-view of research on the effect veness of computers in instruction, and particularly in compensatory education, is presented. Next, difficulties in evaluating cost-effectiveness and feasibility of computer-based instruction are described. Finally, findings on the possible uses of computers in attaining educational equity are discussed. Striking inequities are said to exist between the affluent and the poor; differentials in access to equipment, program quality, and the usages of computers are reported. (KH)

Characteristics, "Student Needs This review of research brings together a variety of data on pregnant and parenting teenagers and on the range and effectiveness of school-based pro-grams. The report is divided into two main sections, the first of which describes the population at risk; motivations, choices, and consequences of teenage pregnancy and motherhood; adolescent fathers; and pregnant and parenting teenagers' expressed needs for services. Section 2 presents an overview of what is being done for pregnant and parenting edoles-cents. In general, it is said, the existing programs cents, in general, it is said, the example programs address only a portion of the problems of pregnant teenagers identified in the research. First, because the attraction of parenting is inversely proportion-ate to the possibility of other options, dropout rates must be lowered and jobs should be created for out-of-school youth. Second, counseling courses in workplacement and femily life sould help dedegrams out-on-school youth. Second, Could help adolescents resolve the ambivalences between autonomy and childhood dependency. Third, because ternagers have unrealistic fantasies about what having a child will imply, they must be helped to understand the responsibilities involved. Fourth, because parents usually play an important role in teens' pregnancy resolution decisions, programs must be created to draw in the mothers and fathers of pregnant teenagers. Finally, programs oeed to involve the teenage father directly and to help enhance his capacity for immediate and long-term caring. (KH)

This brief digest discusses teenage pregnancy and various educational strategies that appear to affect various educational strategies that appear to affect pregnancy rates. While pregnancy among white teenagers has increased since the 1970s, the birth-rate among black teenagers is still five to eight times higher. Teenage mothers and fathers have lower ed-ucational attainment and income than their peers who delay, childbearing. Early, parenthood, has short- and long-term consequences for the children as well. Babies of teenage mothers are at risk for low birth reight and high infant mortality; moreover, children of adolescent parents tend to become teen-age parents themselves. Some studies show that teenage parents risk allenastic n from school: memage parents internetives. Some studies show that teenage parents risk alienatic 1 from school, unem-ployment, or underemployment. In contrast, posi-tive school experiences and steady progress toward employment reduce the changes of teenage preg-nancy. Preschool education has been found to correlate positively with later lower delinquency and pregnancy rates in teenagers. Desegregation was

also found to correlate positively with a reduction in pregnancy before the age of 18. High educational goals appear to be related to a lower incidence of adolescent pregnancy. Finally, several studies of job training programs show that for those students who do not have aspirations towards higher education, appropriate preparation for employment may serve the same positive purpose in reducing teenage pre-nancy. Identifiem Cooperative Learning, ERIC Digests Identifiers - Cooperative Learning, Ends Indense This brief digest reviews research findings on achieving racial integration in desegregated magnet schools. Studies show that resegregation tends to occur in most schools after desegregation as a result of tracking and ability grouping; furthermore, as the numbers of blacks rise in a school, the resegregation is clearerererere tends to rise A ourset of cooperative in classrooms tends to rise. A oumber of cooperative learning techniques have recently been developed which seem to work well in the integrated, heteroge-neous classroom and are found to have a positive effect on race relations and achievement. Newly desegregated schools are found to expel a disproportionately high number of black students and, in gen-eral, discipline of these students is found to be more severe than with white students. Here again, cooperative learning techniques are found to build a more positive climate and reduce suspensions. Blacks and other minorities are heavily represented in compensatory education classes which, because in compensatory education classes which, because they are pull-out programs, tend to increase resegre-gation. In planning desegregated magnet schools, it appears useful to: (1) maintain \leq mixed stable stu-deot body, (2) include children of different abilities in each classroom; (3) avoid trackin. (4) encourage interracial contact in academic and extracurricular activities, (5) recruit teachers and principals who are concerned with racial equality, (6) initiate staff de-velopment programs dealing with desegregation: and (7) involve parents in classroom instruction. (CG) (CG)

This digest consolidates recent, key information on minority representation in the teaching profes-sion. Despite widespread efforts to recruit minority teachers, by 1983 the total had decreased 1.5% (down to 11% since 1973). Therefore, many stu-dents will go through their entire achool career with no minority teachers, oo role models, and oo sense that teaching is a profession for minorities. Some reasons for this decrease are: (1) increased possibilities for minorities to make more money and win greater prestige in other professions; (2) decrease in minority recruitment and enrollment in colleges; (3) dissatisfaction with the teaching profession; (4) a

popular misconception that there is a teacher sur-plus; and (5) state testing in which minority teachers have low pessing rates. Other problems with minornave tow peasing rates. Other proviets which infinity ity teacher employment include the desegregation efforts which have given many more white teachers jobs which black teachers would otherwise have held; seniority and tenure provisions that have kept white teachers in jobs; and government moves toward incentive gravits and tax incentives that di-minish programs traditionally employing minority minish programs traditionally employing minority teachers. Some suggestions on how to increase minority participation in the teaching profession are included. (CG)

(Announced in 1986)

The defield Graninghouses produce short (usually 2-page), user-oriented reference shee 3 called "Like Digents (formerly "Fact Sheets" or "Short Reports"), on topics of high current interest. A standard for dut has been developed for "ERIC Digests."

ERIC Dirests were not initially regarded as major ERIC Clearinghouse products and therefore were not regularly entered into the ERIC database or announced in the monthly abstract journal *Resources in Figuration*. Beginning in mid-1985, however, a policy was established of entering all ERIC Digests in the ERIC database.

Listed below, under the name of the Clearinghouse responsible for their development, are the ERIC Digests announced during 1986. Most of the 1986 Digests have ED accession numbers and appear in the body of this bibliography, but a few do not. Single copies of ERIC Digests are generally available from the responsible Clearinghouse as long as the printed supply lasts.

An online file containing the full text of selected ERIC Digests is offered via The Source. Details are available immediately following this list. (See ERIC Ready Reference #9).

ERIC Digests

ERIC Digests are:

- short reports (1000-1500 words on one or two pages) on topics of prime current interest in education
- targeted specifically for teachers, administrators, policymakers, and other practitioners, but generally useful to the broad educational community
- designed to provide an overview of information on a given topic, plus references to items providing more detailed information
- produced by the 18 subject specialized ERIC Cleaninghouses, and reviewed by experts and content specialists in the field
- funded by the Office of Educational Research and Improvement (CERI), of the U.S. Department of Education
- available in original printed form directly from the producing Clearinghouses (ask to be placed on their mailing lists — ERIC Ready Reference #6 lists the Clearinghouses, together with full addresses, telephone numbers, and brief scope notes describing the areas they cover)

ERIC Digests Online (EDO) is:

- a full-text database containing the complete text of recent ERIC Digests
- a fast, accurate, and dependable source of directly usable and practical information for the educational community, including teachers, administrators, counse fors, policymakers, and parents
- available on ED-LINE (an online news, information, and electrome mail system for educators and others interested in education) via THE SOURCE online information network
- accessed on THE SOURCE by entering "EDLINE ERIC," or, alternatively, ED-LINE's main manu
- sear: able either by general topical categories (menu items) or key words (ERIC Descriptors)
- an online bulletin board (via a "user notespace"), allowing users to comment on the Digests or to read others' comments
- updated monthly, with at least 10 new Digests added each month
- approximately 190 Digests in size as of June 1987

How to Get Connected to EDO:

- Hardware/Software Needer
 - a terminal used to communicate with online services
 - a microcomputer, telephone line, modem, and communications software (directions on how to use specific hardware/software for online access can be found in the manufacturers' manuals)
- Subscription to ED-LINE

For information on subscribing to ED-LINE, including membership in THE SOURCE, contact ED-LINE at the address or telephone listed on the verso. An ED-LINE subscription includes *The Source Manual* and a unique ID number and password to THE SOURCE. THE SOURCE gives ED-1. INE subscribers a reduced hourly connect charge.

Searching EDO On-Line

- Sign on to THE SOURCE (see "Sign On" in The Source Manual)
- THE SOURCE menu appears
- At first prompt (:), type "Q"
- At "command level" prompt (->),
 - a Type "EDLINE," which takes you to ED-LINE's main menu; Select EDO from the menu

OR

b. Type "EDLINE ERIC" and go directly to EDO

• EDO main menu appears, as follows:

- 1 Using EBIG Digests Online (EDO)
- 2 Search Cigests by Menu Categories
- 3 Search Digests by Key Words
- 4 New ERIC Digests
- 5 User Notespace
- 6 ERIC Information

Any item selected from the EDO main menu will guide you through a series of sub-menus to the information you need. Digests can be searched for by using ERIC Descriptors (main menu item 3) or by using topical categories (main menu item 2). The "New Digests" option (main menu item 4) lists just the new Digests added that month — about 10. The "User Notespace" (main menu item 5) provides a means for users to make comments on EDO, suggestions for new Digest topics, or comments on specific Digests, users can read the remarks in the notespace and/or add to them. The sub-monst of the "User Notespace" has an item labeled from How to Use EDO User Notespace," which, when selected, prints out or displays a complete list, by Clearinghouse, of the ERIC Digests currently on the EDO file. Users not yet signed up with ED-LINE and THE SOURCE can obtain this list by contacting EDO at the address/telephone number provided below.

At any menu (numbered group of categories), a category is chosen by entering its number at the prompt(:). At any prompt, typing ".P" returns you to the previous menu: ".M" returns you to EDO's main menu; ".Q" leaves EDO and returns you to ED-LINE's main menu. Pressing the Return key at any prompt displays the particular list of options available at that prompt.

Typing "Q" at the prompt following ED-LINE's main menu returns you to a "command level" prompt (->), at which time you can proceed with a session on THE SOURCE or enter "OFF" to disconnect. Or, you can enter the appropriate number from the ED-LINE menu that will disconnect you from both ED-LINE and THE SOURCE.

For information on how to subscribe to ED-LINE, contact:

ED-LINE National School Public Relations Association (NSPRA) 1501 Lee Highway Arlington, VA 22209 Telephone: (703) 528-5840

For more information about EDO, including a current list of titles, contact:

ERIC DIGESTS ONLINE (EDO) ERIC Clearinghouse on Elementary and Early Childhood Education University of Illinois 805 West Pennsylvania Avenue Urbana, IL 61801-4897 Telephone: (217) 333-1386

The ERIC Clearinghouses have responsibility within the network for acquiring the significant educational literature within their periodular areas, selecting the highest quality and most relevant material, processing (i.e., cataloging, indexing, abstracting) the selected items for input to the data base, and also for providing information analysis products and various user services based on the data base.

The exact number of Clearinghouses has fluctuated over time in response to the shifting needs of the educational community. There are currently 16 Clearinghouses. These are listed below, together with full addresses, telephone numbers, and brief scope notes describing the areas they cover.

86

ERJC Clearinghouse on Adult, Career, and Vocational Education (CE)

Ohio State University National Center for Research in Vocational Education 1960 Kenny Road Columbus, Ohio 43210-1090 Telephone: (614) 486-3655; (800) 848-4215
