ABSTRACT

The study analyzes (1) expenditure patterns that relate costs per full-time equivalent student to faculty salaries and benefits, direct instructional support costs and indirect of overhead support costs; (2) overall student/faculty ratios, and (3) average salaries and benefits for three categories of faculty (full-time, part-time, and graduate assistants). Separate sections analyze the departmental administration and health science areas, compare the 1976-77 results to 1978-79, and examine faculty resource allocations as well as research and public service expenditures. In most instances the results are displayed by course level (lower division, upper division, etc.) and institutional type (doctoral and regional universities, The Evergreen State College, and community colleges). The community college data are displayed by academic and vocational categories. Direct instructional costs per FTE student are determined by adding faculty salaries and benefits and direct support cost per FTE student. Total instructional and related costs are the sum of the direct instructional and the indirect or overhead costs per FTE student. Among the findings is that support costs for the vocational programs at the community colleges and the upper division and graduate programs at the regional and doctoral universities are somewhat higher than the lower division academic average costs for direct support. The methodology used to relate student tuition and operating fee levels to the total instructional and related costs is described. Appendices provide data for each individual community college, student credit hour and faculty FTE information by level and discipline, and an outline of the step-by-step process used to allocate indirect costs. ## ABSTRACT

The 1978-79 Unit Expenditures Study analyzes expenditure patterns that relate costs per full-time equivalent student to faculty salaries and benefits, direct instructional support costs and indirect or overhead support costs. Also included in the report is an analysis of overall student/faculty ratios, as well as average salaries and benefits for three categories of faculty (full-time, part-time, and graduate assistants). The comparative analysis is exclusive of the four-year health science disciplines and departmental and academic administration. Separate sections have been included, however, which analyze the departmental administration and health science areas. Separate analysis is also provided comparing the 1976-77 results to 1978-79. Also included are separate sections on faculty resource allocations as well as research and public service expenditures.

In most instances the results are displayed by course level (lower division, upper division, etc.) and institutional sector (doctoral and regional universities, The Evergreen State College, and community colleges). The community college data are displayed by academic and vocational categories with an overall total combining the two, for both the first and second year course levels.

Direct instructional costs per FTE student are determined by adding faculty salaries and benefits and direct support cost per FTE student. Total instructional and related costs are the sum of the direct instructional and the indirect or overhead costs per FTE student.

The report also includes the methodology developed and used to relate student tuition and operating fee levels to the total instructional and related costs derived from the Unit Expenditure's data for each institutional sector within the state. Appendices are also included which provide data for each individual community college, student credit hour and faculty FTE information by level and discipline, as well as an outline of the step-by-step process used to allocate indirect costs.

## INTRODUCTION

The Council's Unit Expenditures Study remains one of the few state-level efforts to clearly relate all costs to the instructional, research and public service functions for all public two- and four-year colleges and universities. The instructional information base is built from each detailed course level, such as lower division biology courses or dental hygiene technology courses, and aggregated by course level and discipline (biology, geography, etc.).

The 1972-73, 1974-75, and 1976-77 Unit Expenditure Studies have been used to respond to executive and legislative questions and concerns, as well as graduate program review, tuition and fee policy analysis and in the review of state budget formulas. In 1976 the Council based its tuition and fee policy recommendations on an objective of undergraduate tuition and operating fees equal to specific percentages of instructional costs. Legislation passed in 1977 included an intent section which stated that amounts charged for general tuition and operating fees should reflect the proportional operating cost of instruction at the state universities. The Legislature also directed the Council to continue its review of the instructional formula. Consequently, data from the 1978-79 Unit Expenditures Study already have been incorporated in both tuition and fee and budget formula policy analysis and were used by the 1981 Legislature in determining tuition and fee levels. That body also decided to create a direct link between instructional costs and tuition and fee levels in future years.

The format and table sequence for this report are similar to those in the January, 1980 document entitled "1976-77 Unit Expenditures Study." This report is divided into ten sections plus appendices. The first section contains five tables which provide summary data for each sector (community

colleges, doctoral and regional universities, and The Evergreen State College). The following six sections contain additional analyses of the data for the community college system, regional and doctoral universities, and The Evergreen State College, faculty staffing allocation patterns and percent of formula analysis, the four-year health science programs and expenditures for the research and public service programs. The next two sections provide an analysis of departmental administration followed by a comparative analysis of the 1976-77 results vis-a-vis 1978-79. The final section provides a discussion of instructional costs and the policy of relating tuition and fee rates to the cost of instruction, and a description of the process used in calculating budgeted instructional cost levels for 1979-81. Appendix A provides the individual community college data, Appendix B details the student credit hour information by level and discipline category, Appendix C includes faculty FTE information by level and discipline, and Appendix D contains a detailed step-by-step explanation of the indirect cost allocation process.

In reviewing the figures contained in this report, the reader should avoid comparisons of overall averages except in those cases where the institutions offer reasonably similar instructional programs. The same caution applies to comparisons of graduate costs at the doctoral and regional universities and The Evergreen State College, where differences in program size and type significantly affect costs. It should also be understood that the data do not necessarily reflect an optimum situation or represent a standard benchmark. They represent the best approximation of what actually occurred in 1978-79. This information should serve as a resource in further policy studies of factors affecting higher education costs and the allocation of resources.

1978-79 UNIT EXPENDITURES STUDY

SUMMARY RESULTS

Universities, Regional Universities, The Evergreen  
State College, and Community Colleges

## FACULTY SALARIES AND BENEFITS PER FTE STUDENT

The easiest costs to associate with the instruction of students are the costs of faculty salaries and related fringe benefits. These costs represent the portion of the faculty members' workload which has been attributed to the courses which they teach. The amounts shown in Table 1 do not include the portion related to directed (officially recognized) research or public service activities. Deans and directors, as well as departmental chairpersons are also excluded from the calculations. No supporting costs, e.g., clerical services, supplies, equipment, etc., are included in these figures. Personnel and costs related to the health science discipline categories are excluded due to the substantial differences in the programs at the various institutions.

For the community colleges, a distinction has been made between first year and second year course levels. The "First Year" designation represents courses numbered 100-199 with the "Second Year" designation representing courses numbered 200-299. A general conclusion suggested by the data by course levels is that student-faculty ratios will be lower and costs will be higher for the second year. This is because while the community colleges offer a two-year curriculum, there are proportionally fewer students available for the second year class offerings.

Data for the four-year institutions show that faculty salary and benefit costs at the undergraduate level (both lower division and upper division course work) range from a low of \$1,082 per FTE student at Western Washington University to \$1,428 per FTE student at The Evergreen State College. The weighted average faculty salary and benefit cost per FTE undergraduate

student for the two research universities is only slightly higher than the weighted average for the regional universities and The Evergreen State College (\$1,222 vis-a-vis \$1,155).

In the 1976-77 Unit Expenditures Study, The Evergreen State College had a faculty and benefit cost pattern for undergraduate instruction similar to the other four-year institutions. However, in 1978-79 lower than expected enrollment levels resulted in lower student/faculty ratios (Table 2) and higher comparative cost totals. However, subsequent Evergreen reports indicate a turnaround from 1978-79 levels.

## FTE STUDENTS PER FACULTY

One of the major factors which affect higher education cost patterns is the relationship of students to faculty. Table 2 presents student/faculty ratios by course level and academic/vocational courses. Deans and directors, as well as departmental chairpersons, are excluded from the ratios.

High student faculty ratios generally mean a lower cost per FTE student. For the four-year institutions, the ratios for the undergraduate level range from 21.8 at Washington State University (next to the lowest faculty salary and benefit cost - see Table 1) to 15.8 at The Evergreen State College which has the highest salary and benefit costs per FTE student. The other major factor (salaries and benefits per FTE faculty) is described in the next section and reflected in Table 3 and is the reason why Western Washington University with its somewhat higher student faculty ratio (21.1) actually has a lower cost per FTE undergraduate student than Washington State University.

Two University Average	30.8	--	14.3	20.8	10.9	8.1	9.8	17.5

## SALARIES AND BENEFITS PER FTE FACULTY

Salaries and benefits paid to faculty are another major factor in higher education costs. Table 3 divides these costs into two categories: Full-time faculty for the community college system and total FTE faculty other than teaching and research assistants (both full-time and part-time) for the four-year institutions and either part-time faculty (community colleges) or teaching and research assistants (universities) with an average for the two groups. It should be noted that these amounts will differ from those shown in salary survey comparisons and the Council's reports on faculty salaries. This is due to the fact that the information in Table 3 includes all personnel engaged in instruction while salary survey comparisons are limited to full-time faculty with nine month contracts at the rank of instructor or above.

Community college FTE salaries for part-time faculty are approximately 48 percent of the amount paid to full-time faculty. This relationship represents a considerable decline (8%) in the salary and benefit relationship since 1976-77. By comparison, there was a 1 percent decline in this relationship between 1974-75 and 1976-77.

Teaching assistant average salaries are based on an FTE count that is determined by dividing the total number of half-time teaching assistants by four. This derived FTE for teaching assistants is then divided into their respective salaries and fringe benefit amounts to determine average salaries. The calculated equivalent salary and fringe benefit amount for teaching assistants working approximately 20 hours per week was \$5,605 at the doctoral universities and \$3,745 at the regional universities.

21

## TOTAL DIRECT INSTRUCTION COST PER FTE STUDENT

Direct support costs include such departmental, divisional and/or college costs as other wages and salaries (clerical staff, laboratory assistants, etc.), equipment, supplies and other current expenses. Adding these amounts to the cost of faculty salaries and benefits (shown in Table 1) equals total direct instruction cost as outlined in Table 4. After the faculty salary and benefits were calculated and related to the disciplines and the course levels, the direct support costs were distributed among the various instructional categories by the community college system and the individual four-year institutions based on criteria outlined in the Unit Expenditures Study Guidelines.

In terms of direct support costs per FTE lower division academic student, the community college system had costs that were \$146 less than the weighted average for the three regional universities and The Evergreen State College, and \$107 less than the weighted average for the universities. (The differences were \$66 and \$91 respectively in 1974-75 and \$58 and \$114 respectively in 1976-77.)

As one might expect, the support costs for the vocational programs at the community colleges and the upper division and graduate programs at the regional universities and the two doctoral universities are somewhat higher than the lower division academic average costs for direct support. The comparisons with lower division academic costs are as follows: Vocational - \$225 vis-a-vis \$153; upper division (regional universities and The Evergreen State College) - \$340 vis-a-vis \$214; upper division (doctoral

universities) - \$588 vis-a-vis \$259; graduate (regional universities) - \$405 vis-a-vis \$214; and graduate (doctoral universities) - \$990 vis-a-vis \$259.

The percentage increases in support costs to the various levels between 1976-77 and 1978-79 were as follows:

	<u>1976-77</u>	<u>1978-79</u>	<u>Percentage Increase</u>
<u>Community Colleges</u>			
Academic	\$ 102	\$ 153	50%
Vocational	198	225	14%
<u>Regional Universities/The Evergreen State College</u>			
Lower Division	\$ 160	\$ 214	34%
Upper Division	275	340	24%
Graduate	386	405	5%
<u>Doctoral Universities</u>			
Lower Division	\$ 216	\$ 259	20%
Upper Division	437	588	35%
Graduate	699	990	42%

Undergraduate level direct instructional costs are highest at the University of Washington and The Evergreen State College. The high cost at Evergreen is due to its overall relatively low student/faculty ratio (15.8). The high cost at the University of Washington is attributed to both its overall average faculty salary levels, as well as the high costs associated with their upper division level. As Table 2 indicates, the University of Washington has the lowest student/faculty ratio (13.8) at the upper division level.

## TOTAL INSTRUCTIONAL AND RELATED COSTS PER FTE STUDENT

Instructional and related costs are those institutional expenditures which can be attributed to the educational activities of students. The allocation of indirect costs (administration, physical plant, libraries, etc.) is the final step in the process. In this allocation, the costs of the supporting programs are distributed to "final cost objectives" including the three primary programs of instruction, research and public service. This is accomplished through the use of allocation procedures and parameters as outlined in Appendix 4 which contains a detailed step-by-step explanation of the indirect cost allocation process. The figures on Table 5 reflect these allocations added to the direct costs shown in Table 4.

The indirect or "overhead" instructional costs (lower division instruction) for the four-year institutions other than The Evergreen State College reflect a spread of \$419 with the "high" being Eastern with \$1,198 and the "low" being the University of Washington with \$779, with Central, Western, and Washington State University falling between these two with costs of \$1,116, \$807, and \$910 respectively. The explanation for the high indirect instructional cost per FTE student at The Evergreen State College is discussed in the "Regional Universities and The Evergreen State College" portion of the report. In terms of the community college system, their indirect costs per FTE student for their lower division academic category totaled \$737, lower than any of the four-year institutions.

A comparison of undergraduate level costs for the four-year institutions, other than The Evergreen State College, shows the resulting dollar amounts to

be reasonably close to one another. Four hundred and thirty-six dollars separate the high (Central with \$2,875) and the low (Western with \$2,439). Eastern's costs are \$87 lower than Central's costs and \$349 higher than Western's costs. The overall weighted average for undergraduate instruction for the three institutions is \$2,660. The two doctoral universities have cost patterns similar to the three regional universities with their overall weighted average cost at the undergraduate level only \$134 higher than the corresponding amount for the regional institutions.

Graduate level costs are not only considerably higher than the overall undergraduate costs for the three regional universities and the two doctoral universities\* but the cost patterns among institutions are considerably different from the relationships observed in the undergraduate cost areas. For instance, Western has the highest graduate costs of the three regional universities and Washington State University's graduate costs are considerably higher than the University of Washington's graduate costs. Also, the overall average graduate cost between the two sectors is considerably higher for the doctoral universities (\$6,319 vis-a-vis \$3,996).

---

\* Graduate over undergraduate costs are 50 percent higher at the regional universities (\$2,660 vis-a-vis \$3,996) and 133 percent higher at the doctoral universities (\$2,794 vis-a-vis \$6,319).

## COMMUNITY COLLEGE ANALYSIS

Tables 6 through 9 provide the detailed information supporting the community college summary data found in Tables 1 through 5. Table 6 provides a sequential picture of the effect of allocating all direct and indirect costs, thus providing a clearer understanding of the composition of the full instructional cost per FTE student.

Table 7 illustrates the student/faculty ratio, the percentage distribution of full and part-time faculty and the average salary of faculty by full-time and part-time.

Table 8 is a comparison of the FTE enrollments, student/faculty ratios, cost of faculty salary and benefits per FTE student and direct instructional costs per FTE student by first and second year students within each academic and occupational discipline. In the academic area, only two discipline categories (Business and Management and Education) have greater numbers of FTE students in the second year than in the first year. All of the other categories have substantially larger enrollments in the first year, and a high percentage of disciplines have larger student/faculty ratios in the first year portion.

In the vocational area, none of the disciplines have a second year FTE student count greater than those observed in the first year. Second year direct instructional costs are higher than first year costs for all the identified disciplines.

Of the total FTE students by course level for both academic and vocational, 82.2 percent were in first year courses and 17.8 percent were in second year courses. The first year/second year split for 1978-79 is

within two tenths (82.4 and 17.6) of the values reported in the 1976-77 study results. By comparison, 78.6 percent of the total direct instructional costs were expended on the first year courses as contrasted to 21.4 percent for second year courses. This represents a 2.3 percent decline in the total direct instructional resources expended on second year offered courses.

As noted earlier, one of the major differences in the composition of community college costs is the high proportion of part-time faculty and the salaries and benefits paid to those personnel. The current relationship of the part-time faculty salaries and benefits to those paid to full-time faculty is 44.2 percent in the academic area and 51.9 percent in the vocational category for an overall relationship of 48.0 percent. Analysis of the overall relationship for prior studies (1976-77, 1974-75, and 1972-73) indicates a moderate decline between 1976-77 and 1978-79 (56.0 vis-a-vis 48.0); the 48.0 value remains somewhat higher than the 46.3 percent relationship observed in 1972-73.

Table 9 illustrates the impact on the full cost per FTE student that would occur if the average part-time salaries and benefits were adjusted to various percentages of the average salaries and benefits paid to full-time faculty. The analysis indicates that the salary differentials are the main reason for the lower per student direct costs in community colleges.

1978-79 UNIT EXPENDITURES STUDY  
REGIONAL UNIVERSITIES AND THE EVERGREEN STATE COLLEGE ANALYSIS

## REGIONAL UNIVERSITIES AND THE EVERGREEN STATE COLLEGE

Tables 10 through 15 present the detailed information supporting the summary tables (1 through 5) for the regional universities and The Evergreen State College.

Table 10 provides an insight into the costs at The Evergreen State College. When the indirect costs for administration and general expense, physical plant, libraries, etc., are added to the direct instructional costs at the undergraduate level, the full costs at The Evergreen State College reflect a dollar range that is approximately \$1,200 - \$1,590 higher than the three regional universities. This is related to the high per student cost associated with the expenditure for the library and plant operation and maintenance programs which were established to serve a student body approximately double Evergreen's current size.

In Table 11, the lower student/faculty ratio for the graduate level courses is one of the major contributing factors to the higher instructional costs per FTE student indicative of these levels.

Tables 12 and 13 provide the discipline detail for the regional universities and The Evergreen State College by undergraduate and graduate levels respectively. Costs are not shown in some disciplines due to the low number of FTE students enrolled. Table 14 includes both undergraduate and graduate full-time equivalent students by the major discipline categories used in the study. Table 15 provides both undergraduate and graduate level full-time equivalent faculty for the corresponding major discipline categories.

1978-79 UNIT EXPENDITURES STUDY  
DOCTORAL UNIVERSITY ANALYSIS

## DOCTORAL UNIVERSITY ANALYSIS

The supporting detail for the universities is presented in Tables 16 through 21.

In Table 16 the expenditure data for undergraduate instruction indicate similar cost patterns for the two universities. At the graduate level, however, Washington State University's overall costs are somewhat higher than the comparable costs at the University of Washington.

In Table 17, the lower student/faculty ratio for the graduate level courses for both universities is one of the major contributing factors to the higher instructional costs per FTE student indicative of these levels.

Tables 18 and 19 provide the discipline detail for the two universities by undergraduate and graduate levels, respectively. Table 20 includes both undergraduate and graduate full-time equivalent students by the major discipline categories used in the study. Table 21 provides both undergraduate and graduate level full-time equivalent faculty for the corresponding major discipline categories.

It should be kept in mind that all the averages are weighted. The influence of this is especially true in the graduate area for the two universities where the number of FTE graduate students at the University of Washington is over three times as large as the comparable total for Washington State University.

1978-79 UNIT EXPENDITURES STUDY  
FACULTY STAFFING: PERCENT OF FORMULA ANALYSIS

## FACULTY STAFFING - PERCENT OF FORMULA ANALYSIS

Since the current overall formula ratios are based on an analysis of actual instructional patterns observed in 1968 and these ratios reflect an average for all disciplines, one of the uses of the Unit Expenditures Studies, therefore, has been to compare the way resources are allocated in the budget process and how they are ultimately used or expended by each of the institutions. This is done to determine if any major imbalances are developing among institutions due to shifts in student demand resulting in changes in enrollment patterns at one or more institutions or in terms of institutional resource allocation decisions.

In the current budgeting process, several disciplines at the two doctoral universities have much more favorable ratios for their lower and upper division course levels. At the lower division, the "high cost"\* discipline ratios at 100 percent of formula funding provide one FTE faculty member for every 180 student credit hours. This compares to a ratio of 300 for all other disciplines at the lower division level. The comparable ratios for upper division student credit hours are 105 and 165 respectively.

Since the last Unit Expenditures Study, there has been considerable discussion regarding actual resource allocation to the "high cost" disciplines by the two doctoral universities. This report is intended to provide information on experienced per student allocation patterns and does not deal with the policy aspects of such patterns.

---

\* High cost disciplines at the University of Washington include Engineering, Architecture, Forestry, and Fisheries. In addition to the Engineering discipline at Washington State University, one-half of the Agricultural discipline is funded as a high cost discipline.

The discipline-by-discipline review of faculty entitlement and faculty FTE allocations found in Tables 22 through 27 does provide an insight into how each of the four-year institutions expend their faculty resources. In addition, the distribution of overall faculty entitlement at a particular institution must take into account types of instruction, available facilities, and discipline interest. It is, therefore, reasonable to expect variations from the overall formula ratios due to specific institutional decisions, needs, and circumstances in any given academic year.

1978-79 UNIT EXPENDITURES STUDY  
HEALTH SCIENCE DISCIPLINE CATEGORY ANALYSIS

81

## HEALTH SCIENCES CATEGORY ANALYSIS BY DISCIPLINE

Table 28 displays student credit hours and faculty distribution, the total direct instructional costs, cost per FTE student, and FTE student/faculty ratio for health service disciplines. The information is displayed by discipline and institution.

The University of Washington offers course work in all of the listed health sciences disciplines except veterinary medicine. Washington State University offers some course work in medicine under the WAMI program, nursing in conjunction with the Intercollegiate Center for Nursing Education (ICNE), pharmacy, speech and audiology, and veterinary medicine. Speech and audiology and health professions - general are offered at Central. Nursing, in association with the ICNE, dental hygiene, and speech and audiology are offered at Eastern. Western offers course work in nursing and speech pathology and audiology.

The differences in offerings and programs in terms of scope, size, level of offerings, and approach are such that any comparisons between the regional university costs and doctoral university costs should be done with the utmost caution. To a lesser extent, this is also true of comparisons between and among institutions of the same general type.

\* Includes clinical and departmental administration faculty.

\*\* Nursing faculty are assigned to the Intercollegiate Center for Nursing Education, not Eastern Washington University.

<sup>1</sup>This category is made up of the following programs: Public Health; Biomedical Communication; and General Health.

<sup>2</sup>This category is made up of the program -- Health Professions, General.

1978-79 UNIT EXPENDITURES STUDY  
RESEARCH AND PUBLIC SERVICE ANALYSIS

## RESEARCH AND PUBLIC SERVICE

Table 29 encompasses all research activity by fund source and expenditure subprogram categories. The Agricultural Research Centers and Institutes' subprogram is unique to Washington State University. The Other Institutes and Research Centers contains all research related program elements that are part of a formal research organization except those units specifically chartered to conduct agricultural research. The final subprogram (Individual or Project Research) contains the research program elements that are normally managed within the academic departments that have been created as a result of a contract, grant, or specific allocation of institutional resources, including cost sharing. A review of the detailed data indicates that the University of Washington and Washington State University identified \$1,738,364 and \$692,436 of their General Academic Instruction dollars as their respective cost sharing commitments to Grant and Contract research for 1978-79.

All six four-year institutions reported expenditures in the community service subprogram. Total dollars expended by institution are shown below.

### Community Service Expenditures 1978-79

<u>Institution</u>	<u>Expenditures</u>		
	<u>State Funds</u>	<u>Dedicated Local Fund - 149</u>	<u>Total</u>
University of Washington	\$ 328,002	\$ 1,417,060	\$ 1,745,062
Washington State University	1,353,034 <sup>1</sup>	--	1,353,034
Central Washington University	136,409	--	136,409
Eastern Washington University	487,567	--	487,567
Western Washington University	66,722	--	66,722
The Evergreen State College	4,101	--	4,101

<sup>1</sup> Includes \$557 in federal funds.

TABLE 29  
RESEARCH EXPENDITURES BY  
SUBPROGRAM AND FUND SOURCE  
1978-79

	<u>State Funds</u>	<u>Federal and Other Funds</u>	<u>Total</u>
<u>Agricultural Research Centers and Institutes</u>			
Washington State University	--	--	\$ 11,682,554 <sup>1</sup>
<u>Other Institutes and Research Centers</u>			
University of Washington	\$ 80,555	\$ 394,050 <sup>2</sup>	\$ 474,505
Washington State University	2,133,911	--	2,133,911
Eastern Washington University	40,845	--	40,845
Western Washington University	72,263	--	72,263
<u>Individual and Project Research</u>			
University of Washington	\$ 4,204,225	\$ 65,427,376 <sup>3</sup>	\$ 69,631,601

Central Washington University	25,566	42,885	68,451
Eastern Washington University	--	132,208	132,208
Western Washington University	28,614	1,026,564	1,055,178
The Evergreen State College	--	6,242	6,242

<sup>1</sup> Includes both federal and state matching funds.

<sup>2</sup> Medical aid and accident funds.

<sup>3</sup> State funded share not identified separately.

1978-79 UNIT EXPENDITURES STUDY  
DEPARTMENTAL ADMINISTRATION ANALYSIS

88

## DEPARTMENTAL ADMINISTRATION ANALYSIS

In 1976-77, the Washington Legislature through its Legislative Budget Committee asked the Council to report on the amount of departmental administration for 1976-77. This request was incorporated into the Unit Expenditures Study data base and the full-time equivalents and related dollars are now uniquely identified within the direct instruction subprogram.

Table 30 shows total FTE by institution and total direct cost dollars for 1978-79. The administrative structure for The Evergreen State College is such that no departmental administrative activities are identified in the data base. In the case of the community colleges, only dollars are identified.

TABLE 30

DEPARTMENTAL ADMINISTRATION  
1978-79 UNIT EXPENDITURES STUDY

	<u>FTEF</u>	<u>Total Direct Instructional Dollars</u>
University of Washington	43.58	\$ 1,532,683
Washington State University	31.00	985,500
Central Washington University	13.66	440,346
Eastern Washington University	14.50	375,084
Western Washington University	14.00	344,543
Community Colleges	*	2,269,442

\* The community college system did not separately identify full-time equivalent faculty (FTEF).

1978-79 UNIT EXPENDITURES STUDY

• COMPARISONS:

1976-77 Vis-a-Vis 1978-79

## UNIT EXPENDITURES STUDY COMPARISONS

As one would expect with the inflationary economy and budgets, that have reflected this phenomenon, overall expenditures were higher for 1978-79 over the 1976-77 instructional expenditures (Table 31). For instance, the community college system increased by 25.9 percent (\$1,751 vis-a-vis \$1,391). The overall weighted average for the regional universities and The Evergreen State College increased by 13.4 percent (\$2,897 vis-a-vis \$2,555). The comparable increase for the two doctoral universities was 21.1 percent (\$3,381 vis-a-vis \$2,791). These increases compare to the Consumer Price Index increase of 16.8 percent for the 1976-77-1978-79 period.

TABLE 31

UNIT EXPENDITURES STUDY COMPARISONS  
1976-77 AND 1978-79

	Student/Faculty Ratios		Direct Costs		Full Costs	
	1976-77	1978-79	1976-77	1978-79	1976-77	1978-79
All Community Colleges	23.0*	20.7	\$ 797	\$ 1,000	\$ 1,391	\$ 1,751
-----						
Eastern Washington University	18.8	20.3	\$ 1,227	\$ 1,405	\$ 2,514	\$ 2,864
Central Washington University	18.2	19.2	\$ 1,371	\$ 1,520	\$ 2,650	\$ 2,915
Western Washington University	19.3	20.2	\$ 1,240	\$ 1,433	\$ 2,278	\$ 2,554
Three Institution Average	18.8	20.0	\$ 1,274	\$ 1,448	\$ 2,457	\$ 2,745
-----						
The Evergreen State College	19.6*	15.8	\$ 1,325	\$ 1,776	\$ 3,382	\$ 4,447
Four Institution Average	18.9	19.5	\$ 1,279	\$ 1,478	\$ 2,555	\$ 2,897
-----						
University of Washington	16.3	16.9	\$ 1,805	\$ 2,148	\$ 2,895	\$ 3,457
Washington State University	19.9	18.7	\$ 1,336	\$ 1,717	\$ 2,603	\$ 3,241
Two University Average	17.6	17.5	\$ 1,638	\$ 1,995	\$ 2,791	\$ 3,381

\* The Evergreen State College and the Community College System did not separately identify and consequently did not report any faculty positions in academic administration.

RELATIONSHIP OF 1978-79 UNIT EXPENDITURES STUDY  
TO TUITION AND FEE LEGISLATION

RELATIONSHIP OF 1978-79 UNIT EXPENDITURES STUDY TO  
TUITION AND FEE LEGISLATION

The process outlined in Table 32 for the two universities was used to establish the tuition and fee levels as directed in RCW 28B.15.075. The instruction costs were determined using the contracted enrollments and state general fund dollars budgeted for the current biennium less the 2.5 percent biennial reductions. The calculations were based on the relationships and factors established in the Council's 1978-79 Unit Expenditures Study and the actual 1978-79 expenditure patterns in the program areas.

Table 33 reflects a decision on the part of the Council and eventually the Governor and Legislature to include all General Academic Instruction expenditures in the cost base for calculating the cost of instruction. The difference between Tables 32 and 33 is that in Table 33 faculty research and public service allocations are included in the general academic instruction totals. It should also be noted that this approach has a slight impact on the redistribution of support costs.

Tables 34 and 35 were developed to provide similar cost base information for the regional universities and the community college system in order to calculate their respective tuition and operating fee levels.

Table 36 provides the calculation process used by the 1981 Legislature to establish the 1981-82 and 1982-83 rates. Table 37 displays the tuition and fee rates that evolved from this approach and reflects a 75/25 percent phase-in.

TABLE<sup>f</sup> 32

CALCULATION OF 1979-81 OPERATING COSTS OF INSTRUCTION  
PER FULL-TIME EQUIVALENT UNDERGRADUATE STUDENT  
UNIVERSITY OF WASHINGTON AND WASHINGTON STATE UNIVERSITY  
RCW 28B.15.075

	<u>1978-79 Actual</u>	<u>1979-81 Budgeted</u>
<b>A. <u>Direct Costs</u></b>		
1. Total Academic Instruction (1978-79 Actual and 1979-81 Budgeted)	\$ 89,645,997	\$196,717,000*
2. Academic Instruction as reported in the 1978-79 Unit Expenditures Study (UES)	84,193,276	
3. Relationship: A2 ÷ A1	.939	.939
4. 1979-81 Direct Instructional Costs		\$184,717,263
<b>B. <u>Indirect Costs</u></b>		
1. "Overhead" - Budget Programs 04, 05, 06, 08, and 09**	\$105,570,373	\$225,113,000*
2. Overhead Allocated to Instruction in the 1978-79 UES	58,420,685	
3. Relationship B2 ÷ B1	.553	.553
4. 1979-81 Indirect Costs		\$124,487,489
<b>C. <u>Enrollment</u></b>		
1. Average Annual FTE (1978-79 UES) and 1979-81 Contracted Levels	42,181	85,369
<b>D. <u>Cost Per Student Calculations - All Levels</u></b>		
1. Direct Cost Per FTE Student (A2 ÷ C1)	\$ 1,996	\$ 2,164
2. Indirect Cost Per FTE Student (B2 ÷ C1)	1,385	1,458
3. Total Cost Per FTE Student - All Levels	<u>\$ 3,381</u>	<u>\$ 3,622</u>
<b>E. <u>Cost Per FTE Undergraduate Student</u></b>		
1. 1978-79 Total Cost Per FTE Undergraduate Student from UES	\$ 2,794	
2. Cost Per FTE Undergraduate Student Relationship - All Levels (E1 ÷ D3)	.826	.826
3. Full Instructional Cost Per FTE Undergraduate Student 1979-81 - Combined Universities		<u>\$ 2,992</u>

\* These amounts reflect a 2½ percent biennial reduction in the institutional budgets.

\*\* 04 - Primary Support; 05 - Libraries; 06 - Student Services; 08 - Administration; and 09 - Plant Operation and Maintenance.

NOTE: Numbers vary slightly from those contained in Table 1 on Page A-1 of the Council report entitled: "Tuition and Fee Policy Recommendations 1981-83" due to updated information received from the University of Washington.

TABLE 33

CALCULATION OF 1979-81 OPERATING COSTS OF INSTRUCTION  
PER FULL-TIME EQUIVALENT UNDERGRADUATE STUDENT  
UNIVERSITY OF WASHINGTON AND WASHINGTON STATE UNIVERSITY

	1978-79 Actual	1979-81 Budgeted
<b>A. <u>Direct Costs</u></b>		
1. Total Academic Instruction (1978-79 Actual and 1979-81 Budgeted)	\$ 89,645,997	\$196,717,000*
2. Total Academic Instruction (1978-79 Actual)	89,645,997	
3. Relationship: A2 ÷ A1	1.00	1.00
4. 1979-81 Direct Instructional Costs		\$190,717,000
<b>B. <u>Indirect Costs</u></b>		
1. "Overhead" - Budget Programs 04, 05, 06, 08, and 09**	\$105,570,373	\$225,113,000*
2. Overhead Allocated to Instruction in the 1978-79 UES	57,996,127	
3. Relationship B2 ÷ B1	.549	.549
4. 1979-81 Indirect Costs		\$123,587,000
<b>C. <u>Enrollment</u></b>		
1. Average Annual FTE (1978-79 UES) and 1979-81 Contracted Levels	42,181	85,369
<b>D. <u>Cost Per Student Calculations - All Levels</u></b>		
1. Direct Cost Per FTE Student (A2 ÷ C1)	\$ 2,125	\$ 2,304
2. Indirect Cost Per FTE Student (B2 ÷ C1)	1,375	1,448
3. Total Cost Per FTE Student - All Levels	\$ 3,500	\$ 3,752
<b>E. <u>Cost Per FTE Undergraduate Student</u></b>		
1. 1978-79 Total Cost Per FTE Undergraduate Student from UES	\$ 2,910	
2. Cost Per FTE Undergraduate Student Relationship - All Levels (E1 ÷ D3)	.831	.831
3. Full Instructional Cost Per FTE Undergraduate Student 1979-81 - Combined Universities		<u>\$ 3,118</u>

100

\* These amounts reflect both the 1½ percent biennial reduction mandated by Executive Order and an additional 1 percent biennial reduction now pending.

\*\* 04 - Primary Support; 05 - Libraries; 06 - Student Services; 08 - Administration; and 09 - Plant Operation and Maintenance.

1. Average Annual FTE (1978-79 UES) and 1979-81 Contracted Levels	20,514	42,478
<b>D. <u>Cost Per Student Calculations - All Levels</u></b>		
1. Direct Cost Per FTE Student (A2 ÷ C1)	\$ 1,513	\$ 1,806
2. Indirect Cost Per FTE Student (B2 ÷ C1)	1,290	1,343
3. Total Cost Per FTE Student - All Levels	<u>\$ 2,803</u>	<u>\$ 3,149</u>
<b>E. <u>Cost Per FTE Undergraduate Student</u></b>		
1. 1978-79 Total Cost Per FTE Undergraduate Student from UES	\$ 2,694	
2. Cost Per FTE Undergraduate Student Relationship - All Levels (E1 ÷ D3)	.961	.961
3. Full Instructional Cost Per FTE Undergraduate Student 1979-81 - Combined Universities		<u>\$ 3,026</u>

\* These amounts reflect a 2½ percent biennial reduction in the institutional budgets.

\*\* 04 - Primary Support; 05 - Libraries; 06 - Student Services; 08 - Administration; and 09 - Plant Operation and Maintenance.

TABLE 35

CALCULATION OF 1979-81 OPERATING COSTS OF INSTRUCTION  
PER FULL-TIME EQUIVALENT UNDERGRADUATE STUDENT  
COMMUNITY COLLEGE SYSTEM  
COUNCIL FOR POSTSECONDARY EDUCATION RECOMMENDATIONS

1979-81 Budgeted Levels: \$376,631,284*	
Less known and anticipated Budgeted Adjustments (.975)** (\$376,631,284 X .975) =	\$367,215,502
Less calculated amount for Financial Aid and Community Relation Expenditures. 1978-79 Unit Expenditures Study Factor (.978)*** (\$367,215,502 X .978) =	\$359,136,761
1979-81 Contracted Enrollment: 182,004	
1979-81 Operating Cost of Instruction (\$359,136,761 ÷ 182,004) =	<u>\$ 1,974</u>

\* The dollar total was obtained from the Office of Financial Management report entitled, "1981-83 Budget Forecast, All Budgeted Operating Expenditures By Agency, Program, Fund, and Sub-Fund." The budgeted level includes total state and local funds for the 1979-81 biennium for the Instruction, Public Service, Primary Support, Libraries, Student Services, Institutional Support, and Plant Operations and Maintenance Programs.

\*\* Reflects both the 1½ percent biennial reduction mandated by Executive Order and an additional 1 percent biennial reduction now pending.

103 \*\*\* Financial Aid Administration and Community Relations expenditures (non-instructional expenditures) are excluded from the operating cost of instruction calculation per the Unit Expenditures Study guidelines.

APPENDIX D

ALLOCATION PROCEDURES FOR THE  
INDIRECT COST ALLOCATIONS

137

- D-1 -

The Council recommends that the 1979-81 instructional cost base include:

- (1) Direct instruction costs such as salaries and fringe benefits of instructional staff, support personnel, such as laboratory assistants, supplies, equipment, etc.;
- (2) Other instructional costs such as admissions, registration and other student services not financed by service and activities fees;
- (3) A proportional share of such indirect costs as libraries, administration, etc.

In addition, the Council recommends that the cost base not include the direct and indirect costs of research and public service activities, self-sustaining activities, summer programs, capital amortization costs, intercollegiate athletics, auxiliary enterprises (dormitories, etc.), financial aid grants and student activities financed from services and activities fees.

The above criteria were the assumptions used in the calculations of both the 1975-77 and 1977-79 instructional costs used to calculate tuition and operation fee rates.

The following listing provides the detailed allocation procedures recommended for the indirect cost allocations.

Program 10 - Sponsored Programs: Final cost objective - receives allocations from Institutional Support and Plant Operation and Maintenance programs.

Program 9 - Plant Operation and Maintenance: Allocate expenditures to all programs based on assignable square feet with the exception of the summer session, intercollegiate athletics from other than state and general local funds and auxiliary enterprises from other than state or general local funds. Within programs the allocation will be based on total expense.

Program 8 - Institutional Support

Category 8.3 - Unemployment Compensation/Supplementation: Allocate expenditures on the basis of total salaries and wages to all accounts other than Sponsored Programs, Harborview Hospital, Plant Operation and Maintenance, Institutional Support, Student Financial Aid Grants, and Separately Organized Summer Sessions.

Category 8.2 - Community Relations: Final cost objective - receives allocations from Plant Operation and Maintenance and Institutional Support account.

Category 8.1 - Institutional Management, Services, and Fiscal Operations: Allocate expenditures on the basis of total expense to all accounts other than Plant Operation and Maintenance, Student Financial Aid Grants, and Separately Organized Summer Sessions.

## Program 7 - Hospitals

Category 7.3 - Patient Service: Final cost objective - receives allocations from Institutional Support and Plant Operation and Maintenance Programs.

Category 7.2 - Harborview Hospital: Final cost objective - receives no allocations.

Category 7.1 - Teaching Hospitals: Final cost objective - receives allocations from Institutional Support and Plant Operation and Maintenance Programs.

## Program 6 - Student Services

Category 6.6 - Student Financial Aid Grants: Final cost objective - receives allocations from Student Financial Aid Administration.

Category 6.5 - Auxiliary Enterprises: Final cost objective - receives allocations from Institutional Support Program.

Category 6.4 - Intercollegiate Athletics: Final cost objective - receives allocations from Institutional Support Program and to the extent supported from state or general local funds, from Plant Operation and Maintenance.

Categories 6.1.7100, 6.2 and 6.3 - All Other Student Services Accounts: Allocate expenditures to Academic and Vocational Instruction on the basis of student credit hours.

Category 6.1.7200 - Financial Aid Administration: Allocate expenditure to Student Financial Aid Grants based on total expense.

Program 5 - Libraries: Allocate to Academic and Vocational Instruction, Community Education, Research, and Public Service on the basis of a weighted measure equal to the sum of full-time equivalent faculty and full-time equivalent students.

## Program 4 - Primary Support Services

Categories 4.2 and 4.3 - Ancillary Support and Academic Administration: Allocate expenditures to Academic and Vocational Instruction, Community Education, and Community Service on the basis of total full-time equivalent faculty.

Category 4.1 - Academic Computing: Allocate expenditures to Academic and Vocational Instruction and Community Education on the basis of total cost.
