AUTHOR Wagner, Elaine
TITLE Environmental Attitudes in the Elementary Grades: A Bibliographic Essay.
PUB DATE 1997-00-00
NOTE 15p.
PUB TYPE Reference Materials - Bibliographies (131)
EDRS PRICE MF01/PC01 Plus Postage.
DESCRIPTORS Activism; Elementary Education; *Environmental Education; Field Trips; Foreign Countries; *Futures (of Society); Group Activities; Natural Resources; Pollution; Science Fairs; Science Instruction; *Student Attitudes; Teacher Attitudes; Urban Youth; Values
IDENTIFIERS *Environmental Awareness; *Environmental Ethic; Forests; Nature

ABSTRACT

Ecological or environmental programs integrated into science courses in the elementary grades can make children aware that they can have either a positive or a negative effect on their environment. The following bibliography was compiled from articles and dissertations on environmental education and children's awareness, attitudes, and perceptions of the natural environment. Citations were retrieved from searches of Ecology Abstracts, ERIC, Dissertation Abstracts, General Science Index, and PsycLIT using online or CD-ROM databases. Topics covered include curriculum development, promoting ecological awareness in young children, development of tests for environmental attitudes, summer nature camps, learning opportunities in nearby natural resource areas, field trips to public gardens, children's experiences with vegetation on school grounds, inner-city attitudes, rural attitudes, and waste management. Contains 67 references. (PVD)

Ecological or environmental programs integrated into science courses in the elementary grades can make children aware that they can have either a positive or negative effect on their environment. Environmental awareness, concern, knowledge, and responsibility should be among the goals of early childhood education. Richard Peters suggests that an integrated curriculum of the natural and social sciences would help children acquire a social ethic that develops their awareness of the natural and social worlds around them. (Peters 1993-94) "Teachers who recognize the need for environmental education often infuse study about the environment into traditional course offerings. Many environmental educators feel that this is the best way to teach about environmental issues." (Alliance for Environmental Education 1993, p.16)

The attitudes and interests of teachers and parents affect children's perceptions of ecological issues. Classroom instruction complemented by field trips to nature centers, forest preserves, and other natural resource areas motivate children to practice environmentally responsive behavior. (Simmons 1993) Ecological experiments and science fair projects provide opportunities for parents to become involved, and recycling and other conservation efforts in the home teach children that they can have a personal impact on their environment.

T. Tanner found that childhood experience of the outdoors is the single most important factor in developing personal concern for the

environment. (Tanner 1980) These findings were reinforced by the research of Joy Palmer using a larger sample and subjects from different continents. (Palmer 1993)

The following bibliography was compiled from articles and dissertations on environmental education and children's awareness, attitudes, and perceptions toward the natural environment. Citations were retrieved from searches of Ecology Abstracts, ERIC, Dissertation Abstracts, General Science Index, and PsycLIT using online or CD-ROM databases.

II. REPRODUCTION RELEASE

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document

If permission is granted to reproduce the identified document, please CHECK ONE of the following options and sign the release below.

<input checked="" type="checkbox"/> Level 1 (permitting microfiche ("4 X 6" film), paper copy, electronic, and optical media reproduction).	OR	<input type="checkbox"/> Level 2 (permitting reproduction in other than paper copy).
(upon receipt a sticker resembling the following will be affixed to the material[s]) "PERMISSION TO REPRODUCE THIS MATERIAL HAS BEEN GRANTED BY _____ SAMPLE ONLY _____ TO THE ERIC RESOURCES INFORMATION CENTER (ERIC)." 		(upon receipt a sticker resembling the following will be affixed to the material[s]) "PERMISSION TO REPRODUCE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY _____ SAMPLE ONLY _____ TO THE ERIC RESOURCES INFORMATION CENTER (ERIC)."

Sign Here, Please *Elaine Wagner*

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by person other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."
