FOREWORD

Teaching English to the foreign-born has traditionally been one of the major responsibilities of the public schools. The degree to which such instruction is successful may be of profound importance to the individual student. This publication is designed to provide teachers with detailed examples of some of the methods which have proven to be highly successful in teaching English as a second language. The lessons detail a variety of techniques which may be used in conjunction with any of several approaches in current use. The teacher may select those which are likely to be most successful with his students.

The Bureau of Continuing Education Curriculum Development expresses appreciation to the members of the planning committee for their work in the early planning stages of the project. Committee members are: David Alexander, Adult Education Teacher, Rochester Public Schools; James Jones, Adult Education Teacher, White Plains Public Schools; Margaret Kielty, Director of Adult Education, Fitchburg, Massachusetts; Mary McDonald, Assistant Director, Bureau of Community Education, New York City Public Schools; Jeanette Macero, Director, Americanization Center, Syracuse; David Thomas, Adult Education Teacher, Rochester Public Schools; and Josephine White, Adult Education Teacher, New York City Public Schools.

Special appreciation is expressed to Mary Finocchiaro, Professor of Education, Hunter College, for her dedicated effort in designing and writing the original manuscript. Appreciation is also extended to Jeanne Levie, Student Teacher Supervisor, New York University, who assisted in the preparation of materials for this publication. Gina L. Moore, Assistant Professor, State University of New York at Albany, made valuable contributions in reviewing and revising the material in the individual lessons.

Gratitude is also expressed to Boyd Campbell, Associate, Bureau of Special Continuing Education, for his assistance in reviewing and coordinating the field test of these materials. The final manuscript was edited and prepared for publication by William Jonas, Associate, Bureau of Continuing Education Curriculum Development.

A MESSAGE TO THE INSTRUCTOR

English is a second language for many of our native-born adults as well as those who were born in other countries. Developing the ability to communicate effectively in English is necessary for members of both groups if they are to function effectively in our society. This publication attempts to provide instructors with detailed examples of techniques, developed in the form of lesson plans, to facilitate learning experiences in the classroom. It is hoped that the exercises and activities recommended herein will encourage instructors to examine and improve their methods of instruction as well as providing them with detailed model lesson plans.

There are several approaches in the teaching of English as a second language which are widely used, each having its ardent advocates. Each has been used effectively by competent instructors. This handbook does not single out any one method or system. It does suggest procedures which combine successful elements of several nonconflicting methods of teaching English as a second language. The instructor is encouraged to use those approaches and teaching devices which are most suitable to the particular adult students being taught, the community setting in which they live, and the instructor's own personality.

The following five steps are recommended in teaching any language element in this publication:

1. Lead students toward *understanding* the material. (Students should not be asked to repeat or practice material whose meaning is not clear.)
2. Provide suitable models for students to repeat in *pronouncing* the material. (This should be done frequently.)
3. Encourage students to *practice* the material repeatedly.
4. Train students to *choose* the correct word, expression, or structure from a variety of contextual situations.
5. Help students to *use* the new material in any communication situation.

All the steps need not be developed in any one lesson. For example, only steps 1, 2, and some aspects of 3 might be used in one lesson at the beginning level. Step 4 might not be applied for one or more weeks after a language item has been introduced.

This handbook is part of a series of publications designed to improve instruction in Americanization classes. Other publications in this series include:

- *Bibliography for Teachers of Americanization*
- *Filmstrip Manual for Americanization Teachers* (for use with 25 Americanization filmstrips entitled "Our Language and Culture")
- *Our Language and Culture* (a series of 25 filmstrips)

ORGANIZATION AND DESIGN OF THIS PUBLICATION

Purpose

The teaching plans in this Manual are designed to help you familiarize your students with some of the basic features of the English language. Provision has been made for you to give students practice in:

- Many of the troublesome sounds of the language
- Some of the important structures which will be used to understand and say the everyday things which native speakers do
- Some of the vocabulary areas which newcomers to a country need in their school and community environments

The activities suggested within the lessons include those which will enable the students to learn to make statements, to ask and answer questions, and to respond freely and meaningfully in the social and cultural situations in which human beings communicate and interact.

Numerous other activities effective in developing and/or reinforcing the language skills of listening, speaking, reading, and writing may be found in the Americanization Manual. In that Manual you will also find specific suggestions for presenting dialogs, for using visual materials, and for developing reading and writing skills. In addition, recommendations are made for giving the students many other experiences which will help them grow toward linguistic competency at the same time that they are acquiring insight into some of the socio-cultural patterns of life in the United States.

Format

Each lesson is usually divided into the following sections:

- **Warmup:** Here you will find activities which will enable you to review previously taught material. This material serves two principal purposes during each lesson--to reinforce a language item or several combined language items and lead into the development of the material to be introduced.
- **Oral Presentation and Repetition:** Some suggested situations are given to clarify the meaning of the structure to be developed. You should feel free, however, to use any other situation which may be more relevant to your students and which will help them associate the sounds you are making with the meaning of the structure. Moreover, where more than one item is being taught, it may be desirable to engage the students in repetition and substitution practice of one structure before proceeding to the next one.

Before presenting the Dialog for Dramatization, you should teach any of the new vocabulary items which have been included, primarily to render the Dialog as close to normal everyday speech as possible. Not every language item in the Dialog need be made part of the students' active vocabulary when the Dialog is first presented. Many, you will notice, will be made active in subsequent lessons of the program.

- **Reading and Writing (group and/or individual instructions):** Suggestions are made in many of the lessons to have all students copy and say the more difficult sound combinations which have been selected for emphasis. Group I activities have been limited to simple copying and, in later stages, to the writing of pattern practice activities. Group II students are encouraged to go from tightly structured activities to "freer" ones. Again, only you, the teacher, know what each student is capable of doing. Whatever students are asked to read and write, should be done orally with you first.

- **Summary (entire class):** When students come together again after they have worked individually, there should be a complete review of the new material that has been presented. Also, whenever possible, the groups should be given an opportunity to dramatize the Dialog, to ask questions of their classmates, or to engage in a language activity which will help them to "show off" the skill which they have acquired or "shaped" during their group study period.

In addition, you will note a section entitled "Pronunciation Emphasis" in the lesson plans. The symbols used are modified symbols of the International Phonetic Alphabet (shown below). It is important to remember that you may—indeed you should—emphasize any troublesome sound long before it appears in the lesson if your students are likely to have difficulty with it and that the learning of intonation is a continuing process. As you teach any structure in a normal utterance, you will automatically teach its intonation. Good pronunciation, free of a foreign accent, is extremely difficult for students to acquire. While you should spend several minutes during each session on the systematic teaching of pronunciation, you should not expect or demand a near-native production of a sound before proceeding to the development of the rest of the lesson; that is, to the items of structure or vocabulary. As you develop these, the students will hear your model pronunciation. As you engage in repetition based on your model, they will have continuing opportunities to produce increasingly native English sounds and intonation patterns.

Additional Recommendations

- Present everything orally before expecting the students to mimic, copy, or read. Your model should always precede students' responses when new material is presented.
- Vary the type of pupil participation you will require within each activity. Go from choral repetitions, to smaller group, to individual.
- Use gestures to ask for choral, group, or individual response.
- Leave all the material you have presented on the chalkboard so that the lesson summary (the final review) will be more systematically and efficiently reproduced.
- Use the native language of your students—if you know it—judiciously. Do not use it when the word or concept can be illustrated or dramatized. Use it—but only once—if an entire segment of the lesson will not be understood unless you give the native language equivalent.
- It is not expected that you will complete all the material in one lesson. Go as slowly—or as quickly—as your students' abilities and needs require. Every lesson should strike a balance between review and new material.
- Perhaps your most important job is to give the students the feeling that they will eventually be able to use English to say anything they would say in their own language.
