TITLE Hamilton County Public Schools, Division of Special Education, Speech and Hearing Services Handbook 1969-70.

INSTITUTION Hamilton County Public Schools, Cincinnati, Ohio. Speech and Hearing Services.

Pub Date 69

Note 71p.

EDRS Price MF-\$0.50 HC-\$3.65

Descriptors Administrative Policy, *Administrator Guides, Bibliographies, Educable Mentally Handicapped, *Exceptional Child Education, Identification, Inservice Education, Internship Programs, Parent Teacher Conferences, Records (Forms), Referral, Scheduling, Speech Evaluation, *Speech Handicapped, Speech Therapists, *Speech Therapy, Staff Meetings, Student Records, Teacher Role

Abstract

Concerned with speech and hearing services, the handbook provides guidelines, policies, or information on the following subjects: a calendar for the school year; dates of reports due; names and addresses of speech therapists; schools served and administrative personnel connected with them; screening procedures; survey reports; case loads; the waiting list; conferences with parents; home visits; parents of children with dysrhythmia; attendance problems; report cards; the semi-annual report; the final state report and closing out procedures; forms; psychological referrals; the intensive cycle approach; assignment to home schools; length of school day; and therapy plans. Also considered are speech books, coordination time, inclusion of the educable retarded in speech therapy, speech improvement, learning disabilities, staff meetings, the intern program, leave policy, conventions, therapist conferences, visitation days, organizational membership, relationship with supervisors, school meetings, committees, purchase of equipment, staff meeting assignments, speeches to community groups, the professional library, channels of referral, and state program standards. FORWARD

I am proud to have played a part in the production of this fine Handbook for the Speech and Hearing Services of the Hamilton County Schools.

It is not only a guide, but involved in its contents is the philosophy of the County Office of Education toward better services to all children.

As our staff of fine professionals increase, and as their services reach more children, we all become increasingly more humble because of this increased responsibility.

We sincerely hope this Handbook serves well the people for whom it is meant: Speech Therapists, School Administrators, School Nurses, Counselors, Students, and University personnel.

Colin P. Yacks, Director
Division of Special Education
Hamilton County Public Schools

SCREENING PROCEDURES

A. For Speech Therapy

All Children in grades 1, 3, 5, (7, 9, and 11)* as well as children in slow learning classes (See page 20), will be screened by the speech therapist to identify those with speech problems. Simultaneously, all teachers of grades K, 2, 4, 6, 8, 10, and 12 are given a "Teacher Referral" Form SH-1. The teacher lists those children who should be evaluated by the therapist. The speech therapist then administers a Diagnostic Speech Evaluation to all children identified as having a speech problem. When all the children with speech problems have been identified and tested, it is the duty of the therapist to select those needing immediate therapy. The others are placed on the waiting list. The therapist will establish and qualify the criteria used to formulate each list. Some criteria to qualify each list are:

1. Speech Age - Chronological Age
2. Mental Age - Chronological Age
3. Severity of speech problems
 - a. Organic
 - b. Functional
4. Grade Level
5. Parental Concern
6. Previous speech therapy or evaluation
7. Hearing evaluation

* Students in rotating classes can be screened during English classes after arrangements have been made with administrators and teachers involved.

Screening Procedures (Continued)

3. Emotional consideration
9. Student attitude toward therapy
10. Teacher attitude toward therapy

B. For Hearing Loss

The screening of hearing and testing of hearing in all the schools is the responsibility of the school nurse as part of the health program. It is advisable for the therapist to assist when the nurse requests an audiogram and to determine which grades are screened by the nurse.

Each child on the caseload is to be given a hearing test by the therapist (screen).

Any child revealing a loss in 2 or more frequencies in the speech range should be given a threshold test. If a hearing loss is revealed, the following procedures should be followed:

1. Therapist gives threshold test.
2. Nurse gives threshold test.
3. If both results reveal a loss make an appointment with parent for a conference at school. If child is enrolled in speech class, the therapist sets up the conference. If not, nurse follows through.
4. Give Otological form to parent at conference and suggest that the family doctor be contacted for name of an otologist. Parent will then call otologist for an appointment. If parent has no family doctor, a list of seven (7) or more names of otologists may be shown to the parent or the parent may call the Academy of Medicine.
5. Otologist completes the form and mails it to the Division of Special Education, as indicated on the form.
6. The County Office will make a copy of the report and forward the original to the speech therapist.
7. Child should be checked yearly (give new form to parent each year) or until otologist dismisses the case.

Screening Procedures (Continued)

No child may receive lip reading or auditory training until the Otolologist's Report is completed. See Form Sh-15.

C. For Voice Problems

Children with voice problems are usually detected during screening procedures. A list of these names should be given to the nurse. See Form SH-14 and SH-12. After receiving the information, the therapist will decide whether or not to recommend that a child be examined by an otolaryngologist (an ENT). If so the same procedures are followed as those for hearing loss. See numbers 3 - 7. The therapist, however, conducts all of these conferences whether the child is enrolled in speech therapy classes or not.

No child may receive voice therapy until the otolaryngologist's report is completed.

D. For Language Deficiency

Referrals for children with language deficiencies will most often come from classroom teachers and principals. Careful screening of hearing and speech will be necessary. Consultation with the classroom teacher, nurse and psychologist, as well as seeing the child will aid in evaluating the child's vocalization, his imitation of speech, his spontaneous words, phrases and sentences. Adaption of Watson and Pickles Scales for Expressive and Receptive Language are available upon request from the County Office to further screen language abilities. Caution should be used in assigning these children to a caseload without first clearing with agencies and the Supervisor of Speech and Hearing Services.

SURVEY REPORTS

As soon as all screening procedures are completed, each therapist is required to complete a "Survey Report." See Form SH-2. This report will include survey procedures (grades screened), number on waiting list, children new to this school from the previous October, children enrolled in speech class the previous year, room conditions, and equipment needed. The report also asks the therapist to divide the number of children needing therapy into: mild, moderate, and severe. Be sure of the criteria applied in each category. The Survey Reports are due in the County Office by the date listed under Block plan. See page 2.

CASE LOAD

The typed case load should include those children needing immediate therapy. It should be sent or delivered to the County Office no later than Monday, September 26, at 4:00 P.M. and should contain the following information structured as follows:

<u>8:30-9:00</u>	<u>AGE</u>	<u>GRADE</u>	<u>RM#</u>	<u>TEACHER</u>	<u>PROBLEM</u>
John Smith	7	2		Miss Farmer	Artic--(indicate most involved errors)

Each teacher should be informed as to the names of children who are enrolled in speech class and the time they will attend. See Form SH-17.

A letter should be sent to the parent of every child enrolled indicating the time for therapy and some general statements regarding the child's speech problem. See Form SH-4. Parent visitations, other than those established by the Speech Therapist, should be arranged through the principal's office

Case Load (Continued)

NOTE: Caution must be exercised in placing Kindergarten, first grade, or children from slow-learning classes.

- A. Kindergarten children are accepted with organic speech problems, hearing difficulties, and /or gross speech involvement. (See criteria under "Screening Speech.")
- B. First grade children placed after an evaluation of mental and emotional maturity is determined. This should indicate their ability to cope with the demands of a speech therapy climate.

WAITING LIST

The waiting list will include the same basic information as the active case load. A mid-year re-check will be scheduled and the waiting list revamped as necessary.

Children with minor articulation problems that will improve with maturation do not need to be on the waiting list. The waiting list means speech therapy is desirable, but cannot be scheduled at this time.

CONFERENCES WITH PARENTS

Therapists must work closely with parents to realize optimum progress in speech development with their cases. Good parent cooperation takes incessant contact through telephone contacts and visitation. Visitation should not be structured only at the end of a certain period of time (six weeks or semester) but should be continued throughout the year. Periodic conferences, such as at semesters, is good planning; but this should not constitute the only parental contact.

The following method for parent conferences may be used as a general framework. Certain alterations need to be made, but basically this is a guideline.

Items to be considered:

1. Review the pupil's record before the interview.
2. Schedule the conference in a setting of privacy and comfort.
3. Greet the parent in a friendly, normal manner.
4. Use a "warm-up" topic to open the discussion.
5. Explain the purpose of the conference (if this has not been done by other means).
6. Point out the need to know the pupil as the parent sees him. Ask the parent if he would describe the child as to the child's activities, interests, dislikes, and plans.
7. Make mental notes for further investigation.
8. Summarize the parental observations.
9. Open the therapist report with an explanation that the information to be presented is a review of the therapist's observations of the pupil.
10. Select the pupil's strongest attribute. This will serve as a cushion for the less complimentary information.

Conferences with Parents (Continued)

11. Review each of the areas of information which parents usually seek.
12. When conflict occurs between the therapist's observations and those of the parents, stop to analyze the underlying reasons.
13. Avoid giving advice; substitute instead an analysis of the situation.
14. Summarize the analysis of the child's progress.
15. Plan next step which will include assignments for the parent and the child. It is usually advisable to ask the parent to offer his suggestions before offering possible alternatives.
16. Leave the door open for the next conference and parental suggestions.

After a parent conference is held a report should be written. See Form SH-5. It should be filed with the child's folder.

At the end of each month, the therapist will send a report of the total number of conferences during that month to the supervisor. It should contain the following information:

<u>DATE</u>	<u>PARENTS' NAMES</u>	<u>CHILD'S NAME</u>	<u>TYPE</u>	<u>SCHOOL</u> (phone or personal)
-------------	-----------------------	---------------------	-------------	--------------------------------------

HOME VISITS

Home visits are usually scheduled for Wednesday afternoons or after school hours. The principal should first be notified of the therapist's intent before the parents are notified since it may not be advisable in some instances for a home visit to be made. Upon occasion the school nurse may be interested in visiting the home with the speech therapist. The nurse should be notified when home visits are scheduled as she will have pertinent information.

PARENTS OF CHILDREN WITH DYSRHYTHMIA

It is most important for a therapist to have frequent contact with the parents of children who have disfluency. It has been established that these parents should come to school to observe therapy classes and have conferences with the therapist once a month. It is helpful if a specific date be established at the beginning of the school year for monthly contact until the case is dismissed.

ATTENDANCE PROBLEMS

If for some reason a child does not attend speech regularly, he should be dropped from the active list. Before doing so, evaluate what you have been doing, check personally with the teacher, parents and child to find out possible reasons for the child's lack of interest.

REPORT CARDS

The County Office of Education will supply therapists with a report card for each child enrolled for speech therapy.

Report cards will be sent to the parents of each child when:

- a. A Child is dismissed from active therapy
 1. corrected
 2. on a clinical vacation
 3. a child moves from the district
- b. At mid-year
- c. At the close of the school year (See Form SH-6)

SEMI-ANNUAL REPORT

This report is due on January 23rd. An original and three duplicates will be made for each of the therapist's assigned schools. The original will be sent to the local district superintendent, one copy to the principal, and one copy to the supervisor, and one copy will be placed in the therapist's file. See Form SH-9.

FINAL STATE REPORT

These forms are sent to each therapist from the County Office at the close of each school year and have a deadline date included. The forms include the same basic information as the semi-annual report. (See Forms - "Annual Report of Speech Therapist"). For districts having more than one therapist, each therapist will complete a form for the assigned schools. Jointly the therapists will compile one form for the entire district.

NOTE: Statistical data: Total classification of disorder equals case load enrollment by grade level.

FINAL CLOSING-OUT PROCEDURES

The following items should be completed at the end of each school year:

1. Complete the Student Final Report (See Form 7)
 - a. Place one copy in the child's speech folder.
 - b. Place another copy in the accumulative folder.
2. Prepare the following lists:
 - a. Active Case Load
 - b. Waiting List
 - c. Children dismissed during year
 - d. Children on clinical vacation
 - e. Children transferred during year
3. Staple all reports pertaining to current year together.
4. Make out an inventory list.
5. Lock everything in file. Be sure tape recorder is locked in safe place and labeled "Speech Therapy."
6. Prepare semi-final and state final reports.
7. Be sure everything is dated and contains the therapist's name, parent's notes, teacher's notes, etc.
8. Be sure all forms are on file under their correct titles. (See Form 18)
9. Return all Speech Handbooks including principal's copy.

FORMS

It is the responsibility of the Hamilton County Office of Education to supply all forms used by speech therapists. Request for forms are made by contacting the secretary in the Division of Special Education, Speech and Hearing Services. The construction of forms is the result of committee action. The Forms Committee evaluates all forms used, as to advisability of continuing their use. Changes to be made to forms and "mock-up" of new forms is done on committee recommendation. Current forms are included in this handbook.

PSYCHOLOGICAL REFERRALS

Speech therapists realize the correlation between prognosis in speech development and intellectual capacity. Therefore, they should be supplied with detailed information relating to the children on their case load and waiting list. You are cautioned against wholesale referrals to the Division of Special Services - Psychological Services - without adequately studying the child yourself through teacher conferences, parent conferences, and general analysis with techniques of your own. When, however, you feel that a psychological evaluation is advisable, this fact should be brought to the attention of the building principal. Supply him with the necessary information and have him process it through the regular channels.

Ask the principal to note under "Comments" that this referral was initiated by the speech therapist. This will automatically indicate to the psychologist that a copy of the report should be sent to the Speech Clinic to be filed in the child's folder. See Form SH-7.

INTENSIVE CYCLE

The traditional approach to speech therapy has been itinerate planning. Recent research indicates that the intensive cycle has some outstanding advantages.

- 0. Children are seen on a daily basis.
- 0. Therapy time is shortened which results in dismissal.
- 0. Compressed and dynamic speech program for each child.
- 0. Interschool staff relationships are daily.
- 0. Rapid sequence in therapy session can be accomplished.
- 0. Quick follow-up of therapy with better carry over
- 0. Therapist's time utilization is increased.
- 0. Improvement transition is more dramatic

It is with these factors in mind, that the Hamilton County Office of Education has adopted the intensive cycle program for speech therapy in all local districts.

HOME SCHOOL

Therapists will be assigned to a "Home School." It is at this school that the therapist will join local organizations (P.T.A., H.C.E.A., etc.) and receive mail from the County Office. The local district will be advised of this assignment so that communications can be sent to this home school.

Special equipment should be stationed at each center along with tests or materials purchased by the local school district for use in their schools.

SCHOOL DAY

To provide consistency within the program, the Therapist's day should be 8:30 a.m. to 3:00 p.m. with one half hour for lunch. Although school schedules vary, a six hour program of therapy is minimum, with three and one half hours on Wednesday morning.

The organization of a good therapy program implies that time must be spent in the clinic before children enter the speech room in the morning.

Each therapist is expected to be at the assigned school and in the Speech Clinic at least 20 minutes before actual classes begin.

When a therapist changes schools anytime during the day, time should be scheduled for traveling with a maximum of one half hour.

At the close of the school day, the therapist should spend some time getting the materials prepared for the next class day. If no conferences -- with teacher, principal, or parent are scheduled -- the therapist is expected to remain in the building at least 20 minutes after the children are off the school property.

THERAPY PLANS

Each therapist will construct a daily plan for each session. Current therapy plans must be displayed in each clinic.

It is most wearisome for children to be subjected to the same routine and materials each time they enter the Speech Clinic. Therapists fall into a pattern and rarely see the monotony engendered by routine. This will become evident in therapy planning if the activities and structure of each therapy session is pre-recorded in a Lesson Plan Book. Lesson Plan Books are available in each building.

Therapy Plans (Continued)

Children must be motivated constantly, and to inculcate this motivation ingenious implementation of variety, although aiming for similar responses and reactions, is of essence in good Speech Therapy.

SPEECH BOOKS

It is the philosophy of the Department of Speech and Hearing Services that Speech Books constitute an integral part of speech therapy. The function of a Speech Book is:

- To be used as carryover material from the clinic to home drill.
- To familiarize parents with the correction program.
- To be a handy assemblage of material which can be regularly checked by classroom teachers to understand the level of accomplishment by children enrolled in therapy.

The organization and implementation of materials indicates the depth and scope of the therapy program. Therapists are to have available a supply of materials for distribution to each child. The value of "child supplied" pages should not be overlooked.

It is advisable to include in the Speech Book a page for parental initials. This will force the parents to see the contents of the book, and hopefully encourage the child to practice the drill work.

COORDINATION TIME

Wednesday afternoons are scheduled for coordination of the therapy program. This schedule indicates the pre-determined time for coordination at a specific school. This schedule may become unrealistic at which time it should be discussed with the Supervisor. It is imperative to be at the assigned school during coordination time until 20 minutes after the children leave unless conferences or meetings interfere.

Coordination Time (Continued)

Coordination time conferences should be scheduled in advance with parents, teachers, or principal. A reminder note to the participants before the conference is helpful.

Conferences, phone calls, and other arrangements to affect a total program can be accomplished before school, at noon, after school, and even on Saturdays.

POLICY FOR INCLUDING EDUCABLE MENTALLY RETARDED IN SPEECH THERAPY

In a classroom for Educable Mentally Retarded, the curriculum and course of study provide a long list of supplementary books and materials, as well as materials that give emphasis on repetition of detail. The same situations, then, would be necessary when speech therapy is attempted. The time devoted to educable mentally retarded should not only be more intensive, but more frequent.

The evaluation of educable mentally retarded children must be done on an individual basis, and the finalized evaluation based on prognosis, rather than the problem itself. Every child in an educable mentally retarded class should be given a speech and language evaluation at the beginning of each school year. These records, or copies, should be included in the cumulative folder.

When a child from an educable mentally retarded class is included in the regular therapy program, the therapist will gear the child's program of speech and/or language to the student's interest and abilities, rather than the chronological age. If the physical development of the child

Educable Mentally Retarded in Speech Therapy (Continued)

interferes with this classification, it may be advisable to re-evaluate the need for speech therapy. The therapist is cautioned that too great a spread chronologically is not advisable, unless the general physical development of the educable mentally retarded child falls in line generally to the group to which he is assigned. The guides for speech therapy will come largely from the techniques employed by the teachers of the educable mentally retarded. The activities used must be appropriate to the child's attention span, recall, and frustration level.

Prognosis for the lower level of educable mentally retarded is not favorable. It is recommended that caution be exercised before such children are included in a program, as certain basic intellectual skills are necessary for speech improvement.

A speech correction and speech stimulation program which is integrated with the entire educational and training program of the educable mentally retarded will probably be more successful than the program designed for those of normal intellect. Much of the speech therapy may not be carried out by the speech therapist, but by the parents, classroom teacher, and others who spend considerable time with the child. These persons should have frequent structured contacts with the speech therapist so that the therapy program will be continued in an appropriate manner.

In the classrooms for the educable mentally retarded, there is freedom from pressure to "stick to the curriculum." Such freedom makes possible the organization of a "Speech Time" during each school day. Therapy procedures will be cognizant of each child as an individual. If the

Educable Mentally Retarded in Speech Therapy (Continued)

evaluation proves that a child can be incorporated into speech therapy with normal children, this will be done. For the majority of the children assigned to the classes for educable mentally retarded, an in-class speech time, under the guidance and cooperation of the speech therapist and teacher may be the most meaningful.

SPEECH IMPROVEMENT

A program of speech improvement in a public school is the ground work for an accelerated speech therapy program. It serves to eliminate minimal speech problems, reach children on the waiting list and gives help to children who may not be included in speech therapy. A therapy program has the moral and professional obligation to initiate and maintain a speech improvement program. The grades, type, depth, scope, and sequence of sounds are controversial, but the values of a well thought out program are self-evident.

The therapist should be familiar with the subject and with methods to implement the program. An outline as to how a speech improvement program is planned should be sent to the County Office by October 1st. Utilize the classroom teacher in this program, with the therapist playing the role of consultant. Early in October, establish a meeting with K, 1, 2, and 3 grade teachers and give them an outline to follow. Structure visitations and conferences at times convenient for teachers.

SPECIFIC LEARNING DISABILITIES

The role of the Speech and Hearing Therapist with the teacher and class for children with Specific Learning Disabilities is basically in the general communication area. The therapist's function is to assist the classroom teacher by suggesting, selecting, offering and conferring on materials and methods to improve listening skills and oral expression.

The therapist can offer direct service by working with the students with Learning Disabilities to improve the communication skills of listening and speaking. This will be done with a few children or with the class depending on the situation, the need, the age group and the therapist's schedule in the school. Classroom service will be given after conferring with the Speech and Hearing Supervisor.

A child with learning disabilities who has a specific speech deficit will be assessed by the therapist in screening and therapy will be given to him individually or in small groups.

STAFF MEETINGS

Staff meetings are scheduled as indicated on "Calendar of Events," Page 1. The meetings will be held from 1:00 to 4:00 P.M. unless otherwise stated.

Each staff member will be notified if a change of meeting is planned.

INTERN PROGRAM

A Speech Therapy Internship Program, sponsored cooperatively by the Hamilton County Office of Education, the universities of Ohio and the State Department of Education, has been organized. The purpose of this program is to provide a comprehensive field training experience in public school speech therapy for those students majoring in Speech Pathology and Audiology. The student intern is assigned to a Speech Therapist employed through the Hamilton County Speech and Hearing Services. The Intern is directly involved in all speech and hearing screening, scheduling, parent and faculty conferences and eventually has full responsibility of speech therapy for the total caseload. The Intern is also involved in all in-service training and seminars held through the Hamilton County Office of Education for the regular staff of Speech Therapists. One positive objective of the Intern Program is daily and weekly evaluation and counseling of the Intern by the cooperating Therapist and by the University Supervisor as well. This program provides Intern Therapists with the opportunity to develop the ability to function efficiently as a Public School Speech and Hearing Therapist.

POLICY REGARDING LEAVE

Sick Leave: Each therapist is granted one and one quarter days per month for sick leave accumulative up to 120 days.

The procedure for being absent due to illness is as follows:

1. The day before your absence, or not later than 8:00 a.m. on the day of your absence, Call County Office at 632-8444 and speak to Mrs. Noyes.
2. Call the school or schools affected by the absence. Request that the school principal make a general announcement, so that all teachers in the building are notified.
3. Cancel any conferences that were scheduled for that day.

Personal Leave: Each therapist may be granted two days per year for personal leave. Apply to Division of Special Education when requesting such leave.

CONVENTIONS

Therapists are encouraged to attend national and state conventions of organizations which are directly related to the professional duties. Submit a written request to attend such meetings to the Supervisor two weeks prior to the date and time of such meetings. The County Office has limited funds available to lend financial assistance to therapists desiring to participate, but encourages all members to attend professional conventions. Some local districts may underwrite all or part of the therapists' expenses if such request is made to them.

When state or local organizations in Special Education hold their meetings in or near Cincinnati, the entire staff is expected to attend -- Saturday sessions included.

CONFERENCES - INDIVIDUAL

During the month of April, an annual conference will be scheduled with each therapist. The purpose of this individual conference is to have the Supervisor prepare each therapist for the pending close of the school year, to prepare information relating to continued employment for the succeeding school year, and to evaluate the therapist's program. The therapist has the opportunity to request personal preferences relating to assignment and case loads for the following year.

Throughout the school year, individual conferences are encouraged. These can be structured before a staff meeting, or after the Supervisor's visitation. Any therapist desiring a conference before or after a staff meeting should have an appointment in advance.

VISITATION DAYS

Visitation is a method of attaining better insight and understanding of other educational specialists' programs and techniques. There is no organized or established plan where by every therapist will be scheduled for an in-service experience. Scheduling is done on an individual basis, after the request has been reviewed by the Supervisor. Written request must be received at the County Office two weeks before visitation is planned. Visitation need not be to other speech therapy programs, but could be to specialists working with handicapped children. The purpose of visitation is to assist the therapist in better meeting the needs of her own caseload.

Suggested centers for visitations:

Cincinnati Speech and Hearing Center

Children's Hospital

Cerebral Palsy Center

Kennedy School - Dayton - Deaf

Cincinnati Public Schools:

Sixth District - Deaf

Clifton - Deaf

St. Rita's School for Deaf

Dyer School - Mentally Retarded

ORGANIZATIONAL MEMBERSHIP

The following organizations are listed as those active in our school districts and our profession. Those starred are organizations which all therapists should feel obligated to support.

This does not mean that we want you to overlook the others, as they too contribute much to our schools, community, training, and ourselves.

American Speech and Hearing Association

*Council for Exceptional Children

*Division of Children's Communication Disorders

*Hamilton County Education Association

Local Teacher Association

National Education Association

Ohio Education Association

*Ohio Speech and Hearing Association

*Parent-Teacher Organization (Home School)

*Southwestern Ohio Education Association

RELATIONSHIP WITH LOCAL SUPERVISORS

Each therapist is employed by the Hamilton County Office of Education, but is assigned to specific schools. The supervision and direction is the responsibility of the County Office.

Some local districts, however, have their own supervisors. Generally their area of responsibility lies with normal, primary, and intermediate children. We must be aware that they are deeply concerned with, and very capable of, assisting in the education of all children in their district. It is advisable, therefore, to gain their confidence and to request their aid in

Relationship With Local Supervisors (Continued)

implementing your program in Speech Therapy and Speech Improvement. Their relationship with the teaching staff can assist you in having a total program, rather than one that is shallow and superficial.

It is necessary that during the first few days of school, the therapist make direct contact with the principal and local elementary supervisors to discuss your procedure for screening, the grades to be involved and your time in that district. The exchange of school, class and class enrollment schedules is vital.

Check the previous year's active case load with the school secretary and eliminate those who have moved from that school or district. Obtain and review the school handbook which will have pertinent dates regarding that school.

SCHOOL MEETINGS

A. Board of Education

A procedure has been established which met with considerable success, whereby each therapist reports personally to the local school board. Arrangements should be made by the local superintendent for the therapist to be present at the meeting he suggests.

The therapist should be prepared to discuss the case load, as to the number enrolled during the year, the number dismissed as corrected, the number on the waiting list. The numbers should be broken down as to problem-type and severity.

School Meetings (Continued)

The therapist should also do some prognostication for the next school year, as to what the true picture in this school district will be.

Although this appearance at the school board meeting is not obligatory, this Office feels that contact with community leaders by the therapist offers a good opportunity to explain the Speech and Hearing Services program offered.

B. Building Meetings

To be cognizant of activities, philosophies and organization within a school, it is important to become involved as a member of the school staff. Attendance at building meetings is encouraged because it places the therapist as an interested, contributing member of the faculty and reminds teachers of our interest in the children attending that school.

C. P.T.A. Meetings

Attendance at P.T.A. meetings, carnivals, festivals is very helpful. Attesting to the therapist's interest in the children, school and parents, Local Parent Teacher Associations should be given a report of the progress of Speech and Hearing Services and arrangements for reporting can be made through the program chairman and/or the Special Education Chairman.

PURCHASE EQUIPMENT AND/OR SUPPLIES

To assist local districts in the purchase of special supplies and equipment for the Speech and Hearing Services Program, the following procedure is established.

Forward a request to the Supervisor listing the equipment or supplies desired, include the prices, publishers, addresses and other pertinent information.

Upon receipt of the request, the Supervisor will forward it to the appropriate person in the local district with a note approving the request, or it will be returned to the therapist requesting qualifying information.

ASSIGNMENTS

1969-1970
Staff Meetings

<u>DATE:</u>	<u>STAFF:</u>	<u>ASSIGNMENTS:</u>
September 17	Virginia Miller Martha Avant	Relationships within the School
October 15	C. Follmer Sigrid Eigenberg	Materials Workshop
November 19	Kathy Hosea Eilene Klug	Dr. Edwards, Miami University Reading
December 18	Donna Esteridge Kathy King	P. T. A. Christmas Luncheon
January 21	G. Nakamura Sandy Austin	Dr. Keith, General Hospital Audiology
February 18	Donald Turner Lois Hertzman	Joint Meeting with L. D./E. M. R.
March 18	Nita Clarisey Suzanne Fontaine	Psychologists Nurses
April 15	Sharon Stupak Mellissa Cutter	Dr. Hyman, Bowling Green State University, Voice
May 20	Barbara Doerner	

SPEECHES TO COMMUNITY GROUPS

It is believed that therapists with one or more year's experience should give talks to community groups concerning Speech and Hearing Services. A beginning therapist may be asked to report on her specific program as to number of children included, etc., this is permissible. Otherwise contact should be made with the Supervisor who will then assign a therapist to speak to the particular group.

PROFESSIONAL LIBRARY

The Hamilton County Office of Education has the beginnings of a Special Education professional library. Therapists are requested to recommend new books to be included. Present to the Supervisor the pertinent information of a desired book, so that it can be discussed at a staff meeting. If the consensus agrees to the value of this addition, it will be purchased for the use of the entire staff.

Many fine books and periodicals are published yearly containing new information about our profession. Therapists must be cognizant of these publications.

Professional books are located in the Office of Speech and Hearing Services. They may be borrowed on a regular library two week basis. The Therapist is responsible for return of the materials and a fine will be made on overdue books. Library sign out cards are available.

A collection of current professional periodicals covering a span of several years is available for reading only in the clinic. They may not be borrowed. Each therapist is urged to hold membership in the professional organizations to obtain their own journals.

The books have been classified according to subject matter. The following code is used on each book in the professional library:

Artic.	Articulation	Lang.	Language
C.P.	Cerebral Palsy	L.D.	Learning Disabilities
Cl.P.	Cleft Palate	Phon.	Phonetics
Dis.	Disfluency	Sp.	Speech
H.	Hearing	V.	Voice
	Misc.	Miscellaneous	

- Artic. 1. Correction of Defective Consonant Sounds (Nemoy-Davis)
- Artic 2. Graduate Education in Speech Pathology and Audiology (ASHA)
- Artic. 3. The Teaching of Speech (Haycock)
- Artic. 4. Speech Correction: Principles and Methods (Van Riper)
- Artic. 5. Speech Disorders (Berry and Eisenson)
- Artic., V. 6. Voice and Articulation (Fairbanks)
- Artic., V. 7. Voice and Articulation (Van-Riper and Irwin)
- H. 8. Audiometry: Principles and Practices (A. Glorig)
- H. 9. Hearing and Deafness (Davis and Silverman)
- H. 10. Hearing Therapy for Children (Alice Streng, et al)
- H. 11. Visual Communication for the Hard of Hearing (O'Neil & Oyer)
- Lang. 12. Development and Disorders of Written Language (Myklebust)
- Lang. 13. Language Disorders in Children (Nancy E. Wood)
- Lang.H. 14. Language for the Pre-School Deaf Child (Lassman)
- Lang. H. 15. A Language Outline: A Method of Teaching Language to the Deaf and Hard of Hearing
- Lang. 16. Operant Procedures in Remedial Speech and Language Training (Sloane and MacAuley)
- L.D. 17. Aphasic Children (McGinnis)
- L.D. 18. Childhood Aphasia (Institute of Childhood Aphasia)
- L.D. 19. Educating Children with Learning Disabilities (Frierson and Barbe)

Professional Books (Continued)

- L.D. 20. The Non-Verbal Child (Sol Adler)
- L.D. 21. Teaching Reading to Slow Learning Children (Kirk)
- Misc. 22. Structure of American English (Francis)

PROGRAM STANDARDS
for
Speech and Hearing Therapy

9.3 Selection of Case Load

- 9.31 Selection of children included in the program for speech and hearing therapy shall be made by the therapist.
- 9.32 The bases for selection of students for speech therapy shall be:
- 9.321 Diagnostic speech evaluation, including observation of the speech structures.
- 9.322 Audiometric evaluation, which should be completed by the time therapy commences.
- 9.323 General examination by school or family physician when indicated.
- 9.324 Referral to an otolaryngologist through the school or family physician where indicated with children with voice difficulties.
- 9.33 The bases for selection of children for speech-reading (lip-reading) and auditory training shall be:
- 9.331 Individual audiometric evaluation.
- 9.332 Otological examination, with a copy of the report filed with the speech therapist.

9.4 General Organization

- 9.41 Class size shall be limited to a maximum of five students.
- 9.42 Class periods of a minimum of thirty minutes shall be required for children seen in groups. Individual lessons may be fifteen to thirty minutes in length. High school students may be scheduled for the same length of time as regular class periods.
- 9.43 Each therapist shall maintain adequate records on all students screened, those presently a part of the case load and those dismissed from therapy.
- 9.44 Children should not be dropped from therapy before optimum improvement has been reached.

Program Standards (Continued)

- 9.45 Periodic assessment of children dismissed as corrected should be made over a two year period.
- 9.46 Each therapist should have access to a private office and a telephone for holding private conferences regarding speech and hearing cases.
- 9.47 Secretarial services should be supplied as needed.

9.5 Methods of Scheduling

9.51 Traditional Method of Scheduling

- 9.511 Elementary children shall be enrolled for a minimum of two periods weekly until such time as good speech patterns are fairly consistently maintained. Children may be seen less frequently in the "tapering off" period.
- 9.512 Children enrolled in high school classes may be scheduled once a week, although twice-weekly sessions may be desirable where scheduling permits.
- 9.513 One therapist, who devotes full-time to the program shall serve a minimum of seventy-five to a maximum of 100 students in active therapy at any one time.

9.52 Intensive Cycle Method of Scheduling

- 9.521 The speech and hearing therapist shall schedule at least four one-half days of each week in the intensive cycle in any one center, with an additional one-half per week being utilized in following up cases in previous cycles where continued reinforcement is indicated. It is anticipated that most therapists will be scheduled in two centers daily.
- 9.522 Each speech center shall be scheduled for a minimum of two to a maximum of four intensive cycles per year.
- 9.523 The length of a scheduled intensive cycle shall be a minimum of five to a maximum of ten consecutive weeks.

Program Standards (Continued)

9.524 The individual intensive cycle scheduled at a particular center shall not be consecutive, but shall be separated by the time spent in alternate blocks in other centers.

9.525 The first intensive cycle scheduled at a particular center should be the longer to provide sufficient time for screening and selecting pupils and initiating the program.

9.53 Combination of Scheduling Methods

9.531 A combination of the intensive cycle and traditional methods may be scheduled by any one therapist with the prior approval of the Division of Special Education. Either one or the other of the above methods of scheduling should be selected, except where the nature of cases indicated a combined approach is desirable.

9.6 Housing

9.61 A quiet, well-lighted and well-ventilated room with an electrical outlet shall be provided in each center where a therapist works.

9.62 The space in each center where a therapist works shall be provided with five medium size chairs, one table to fit the chairs, one teacher's chair, one bulletin board, one permanent or portable chalkboard, and one large mirror mounted so that the therapist and students may sit before it.

9.63 School districts shall make available for the use of each and hearing therapist one portable individual pure tone audiometer.

9.631 A speaker attachment should be included for use in auditory training.

9.632 The audiometer should be calibrated on an annual basis, such calibration completed at least once every three years. Calibration to International Standards Organization specifications is recommended.

9.7 Conference and Follow-Up

9.71 Not less than one-half nor more than one day per week shall be allocated for coordination of the program, parent, staff, and agency conferences concerning individual students, and related follow-up activities.

9.72 Part of the coordination time may be devoted to the development of speech and language improvement programs on a consultive basis.

Program Standards (Continued)

9.8 Qualification for Speech and Hearing Therapist

9.81 All speech and hearing therapists shall hold the special certificate in speech and hearing therapy.

9.82 Speech and hearing therapists shall possess good speech patterns and be able to hear within normal limits.

Date _____

Dear Parent:

Your child, _____, has received a speech evaluation at school. At this time your child's speech is considered to be:

_____ in need of re-evaluation at a later date and may be scheduled to receive speech services in the future.

_____ in need of speech services at the present time.

Your child is enrolled for speech therapy class at _____ on _____ from _____ to _____. This service is provided by your school at no extra cost to you. The arrangements have been made with the approval of the school administration.

I will contact you at a later date for a conference appointment. At that time we will discuss your child's speech and how you may help at home.

Feel welcome to call me to arrange an observation of the speech class on any day when your child is scheduled for therapy. Please contact me if you have any questions regarding your child's speech. I shall appreciate your cooperation.

Sincerely,

Speech Therapist
