ABSTRACT
        This courseware evaluation rates the Hi-Res
Electronic Design program developed by Avant-Garde Creations. (The
program--not contained in this document--is designed to determine
closure and area of a survey.) Part A describes the program in terms
of subject area (schematic diagrams and symbols) and hardware
requirements (Apple II, color monitor, data disk, and mouse, paddle,
or joystick), indicates its suitability for use in grades 9-12, and
gives a time estimate (45 minutes and up). Availability information
includes backup and preview policy and contact address. Part B
contains the evaluation criteria in eight categories; reviewer
ratings appear as yes, somewhat, no, and not applicable, with
explanatory comments. Part C summarizes the evaluation. Yes ratings
were given for subject matter, technical presentation, student
interaction, and application programs; somewhat for documentation and
work behaviors; program interaction and student evaluation were not
applicable. Reviewers noted that the program uses graphics well to
teach symbols and makes schematic diagrams easier, but that printing
is difficult and documentation weak. The program is recommended as
unique, but awkward to use. (SK)

COURSEWARE EVALUATION

FOR

VOCATIONAL AND TECHNICAL EDUCATION
The evaluation of this courseware program was conducted by a team participating in the Courseware Evaluation Network. The Network, established in 1985, is coordinated by the National Center for Research in Vocational Education under the sponsorship of the U.S. Department of Education, Office of Vocational and Adult Education. The purpose of the Network is to identify and evaluate microcomputer courseware, and to disseminate courseware reviews for vocational and technical education.

Each Network team includes three members, at least one of which is, or recently has been, a vocational or technical teacher in the subject matter area of the courseware being evaluated. The evaluation represents a synthesis of the opinions of the team members. It is suggested that the evaluation be used as a first screening device for courseware and that the teacher also evaluate the courseware program on the basis of specific student needs.

The <u>Courseware Evaluation: Form and Guide</u> used for all of the Network evaluations was developed by the National Center and is available through its cost-recovery system.
