#### Abstract

This document consists of tables and figures detailing the status of and projections for public and private institutions of higher education in the state of Washington. Following a brief introduction, Chapter 1 identifies highlights of the report, including: entrance eligibility for public institutions; Washington state higher education enrollment trends, 1980-1997; public four-year universities/colleges; private four-year universities/colleges; degrees awarded; and degree production. Chapter 2 presents data on student characteristics, including age and gender, credit hours enrolled, resident/nonresident status, geographic characteristics, class status and retention, and student flow. Chapter 3 provides data on actual and budgeted full-time equivalents of Washington state two-year and four-year public institutions. Chapter 4 provides baseline fall enrollment projections, 1999-2000 to 2020-2021. Chapter 5 reports on the Applications Match Study 1996-97 follow-up, and fall 1997. This study of unmet demand attempted to obtain an unduplicated count of qualified individuals applying to Washington state institutions who were not served by the state system. Chapter 6 presents Washington state enrollment participation rates by county. Finally, Chapter 7 provides national data for comparison, including state education attainment (1990) and state participation rates. Appendices provide additional historical and current enrollment statistics and supporting and miscellaneous enrollment projection data. (DB)

## Introduction

## - IGHER EDUCATION ENROLLMENT STATISTICS AND PROJECTIONS is

 published biennially by the Forecasting Division of the Office of Financial Management (OFM). The present publication is the most recent edition to the series of biennial documents that report on the status of higher education enrollments.Higher education budgets, faculty and staff levels, and workload are directly related to the number of students enrolled. Reliable enrollment statistics and projections are needed to help plan for the future. This publication examines the Washington higher education system from an aggregate as well as an individual school perspective. The main purposes are to present:

- A statistical overview of the entire Washington higher education system,
- Selected enrolled student characteristics,
- Actual and budgeted enrollment data,
- Enrollment projections based on current participation rates, and Senate Bill 5781 passed in the 1993 Legislative Session,
- A perspective on demand for higher education and unmet need, and
- County enrollment participation and state enrollment participation compared to other states.

OFM will publish individual school enrollment highlights as a supplement to this document. The supplement issue will include materials received from the respective schools on the following subjects:

- University/College Characteristics,
- Access,
- Service Level and Student Flow,
- Off Campus Programs, and
- Institutional Goals or Objectives.

The main sources of enrollment data included in this document are from:

- State Board for Community and Technical Colleges (SBCTC), Management Information System (MIS), and
- Higher Education Enrollment Reports (HEER) from each four-year public institution and branch campuses.

Additional data were provided by individual institutional admissions, registrar, and research offices of all public and private four-year institutions and vocational-technical institutes, the

Higher Education Coordinating Board (HECB), the National Center for Education Statistics (NCES), the U.S. Census Bureau, and the OFM Forecasting Division.

WASHINGTON'S PUBLIC HIGHER EDUCATION SYSTEM consists of 27 community colleges, five technical colleges, six four-year universities/colleges, five branch campuses, and one evening degree program.

The six, four-year universities/colleges are located in Seattle, Pullman, Ellensburg, Cheney, Olympia, and Bellingham. Branch campuses, and an evening program have been established in Bothell, Tacoma, Spokane, Richland, Vancouver, and Seattle. The community and technical college system provides access to every major city in the state. Locations are shown in Figure 1-1.

There are 22 private higher education institutions that participated in the Integrated Postsecondary Education Data System (IPEDS) by submitting various IPEDS reports to the Higher Education Coordinating Board (HECB). Eleven institutions are located in King County; three institutions in Pierce County; two institutions each in Spokane and Walla Walla Counties; and one institution each in Kitsap, Snohomish, Thurston, and Yakima Counties. Locations are shown in Figure 1-2.

## Entrance Eligibility to Public Institutions

In general, any individual is eligible to attend any of the 27 public community and five technicai colleges upon payment of tuition. Individuals participate at community and technical colleges on a first come, first served basis.

Any individual is eligible to apply to any of the six public four-year universities/colleges and branch campuses/education centers. To attend, individuals must first meet the specific admission standards of the institution to which they have applied and, in most cases, are then served on a first come, first served basis. Each school maintains its own application deadlines and operates its own admissions procedures (see Appendix B-1). A practice of "pooling" is used to make admissions determinations after the preset application deadline. A "rolling" admission practice is also used to screen applications as they are submitted. All four-year universities/colleges maintain other admission procedures for special cases.

## Washington Higher Education Enrollment Trends, 1980-1997

See History of Enrollment by Institution, Appendices A-1 to A-5
Historically, the combined two- and four-year public institution enrollments have constituted more than 85 percent of the total Washington higher education enrollment. In 1997, the public share was 88 percent. The remaining 12 percent represents service by private institutions (Figure 1-3). Within the 88 percent public institution enrollment, the community college system totals 58 percent and the public four-year institutions total 30 percent. The share of private institutions enrollment has been relatively stable at about 12 percent during 1981-97 (Table 1-1).

Table 1-1
Higher Education Fall Headcount Enrollment for Public Two- and Four-Year and Private Four-Year Schools 1980 to 1997

| Year | Public Two-Year |  | Public Four-Year ___ |  | Private Four-Year |  | Total |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

${ }^{1}$ Includes the Timber Worker Displacement enrollments, $1991=125$ and 1992 $=399$.
${ }^{2}$ Includes Timber Worker Displacement, Workforce Training, and Technical College enrollments: $1993=394,2,485$, and 27,362; 1994 $=383$, 6,564 , and 25,$074 ; 1995=366,6,903$, and 24,$926 ; 1996=487,7,061$, and 26,410 respectively.
${ }^{3}$ Beginning in 1997, the figure includes 308 Private Career Colleges enrollments in addition to 409 Timber Worker Displacement, 5,900 Workforce Training, and 24,742 Technical College enrollments.

Notes: Public two-year higher education institutions include enrollment from all 27 community colleges throughout the state. Starting with 1995, technical college enrollment is included in the total.

Figure 1-3
Fall 1997 Headcount Enrollment Public and Private Higher Education Schools

The community college system is comprised of 27 colleges and 5 technical colleges and Seattle Vocational Institute (SVI). Table 1-2 presents enrollment shares by college for Fall 1997. The enrollments range from 9,332 for Bellevue to 2,125 students for Big Bend Community College. The SVI is a part of the Seattle community college system. The
average enrollment is about 5,400 students (See Appendices A-1 \& A-2 for the community college enrollment history by college). Starting in 1993, five technical colleges were added to the community college system to constitute a new community and technical college system. These colleges are Bates, Bellingham, Clover Park, Lake Washington, and Renton. In Fall 1997, the enrollments ranged from 7,562 for Clover Park to 3,196 students for Lake Washington Technical College. The average enrollment for the technical colleges was 5,118 students.

Source: Management Information System (MIS) Fall 1997 report, includes Timber Worker Displacement program, Workforce Training program, and Private Career College enrollments.

Four-year public institution enrollments for Fall 1997 are shown in Table 1-3. Out of 88,857 total students, almost 57 percent enrolled in the main campuses of the University of Washington in Seattle and Washington State University in Pullman. The four regional universities/colleges serve about 36 percent. The remaining 6 percent are enrolled in branch campuses, one evening program (UW - Evening Degree Program), and the Timber Worker Displacement Program funded through the Higher Education Coordinating Board. See Appendix A-3 for the four-year institution enrollment history by university and college.

Source: Four-Year Institutions - Higher Education Enrollment Report (HEER) State Board of Community
Community and Technical College (SBCTC) - Management Information System Report (MIS).

Between 1970 and 1980, enrollment in public four-year universities/colleges increased by 16 percent, while two-year school enrollment increased by 70 percent. The total enrollment increase was 48 percent (Table 1-4).

During the late 1960s and through much of the 1970s, rapid enrollment growth occurred as the Baby Boom generation reached college age. Substantial increases in female participation in higher education occurred concurrently with the increase of females in the labor force. The expansion of the community college system provided widespread access to higher education and contributed to the rapid enrollment growth in this period.

Between 1980 and 1991, enrollment declined 3 percent in the four-year institutions and 27 percent in the community colleges. A weakening economy in the early 1980s combined with budgetary enrollment caps in 1983 contributed to the decline.

However, from 1983-89 enrollment at the four-year schools remained almost constant at an average of 78,000 students per year and increased by almost 3 percent in 1991 and 1992, even though the college age population of young adults decreased. The growth rates continued to increase in 1993 and 1994 by about 2 percent and 1 percent, respectively. At the same time, enrollment at the community colleges has continued to grow from 125,520 in 1983 to 138,333 in Fall 1992. Enrollment lids were raised during this period. Consequently, total two- and fouryear public institution enrollment increased by 6 percent from 1983 to 1992. In 1993, enrollment was 175,445 , an increase of 37,000 students from 1992. This increase is partly due to the beginning of Workforce Training Program ( 2,485 students) and the inclusion of technical college enrollments ( 27,362 students) in the community college system. However the 1997 enrollment decreased to 171,722 from 175,445 in 1993, a decrease of 2.12 percent during 1993-97.

(The dotted line shows enrollment without Technical Colleges)

## Degrees Awarded

The number of degrees awarded for the community and technical college system increased by 40 percent in seven years from 1990-91 to 1996-97. The increase is partially due to the inclusion of technical college degrees. The degrees for academic programs which are transferable to fouryear institutions increased by 43 percent as shown in Table 1-5.

Degrees for four-year public institutions in bachelors, masters, doctoral, and professional level increased by $25,15,11$, and 4 percent respectively. The number of private four-year degrees increased by $4,64,54$, and 19 percent in bachelors, masters, doctoral, and professional degrees respectively. See Table 1-5.

For all two- and four-year public and private schools, the total number of degrees awarded was 49,314 in 1996-97 compared to 38,586 in 1990-91, a gain of 28 percent. Again, part of this increase is due to inclusion of technical college degrees beginning in 1992-93.

Source: Integration of Postsecondary Education Data system (IPEDS) Degree and Completion Awarded reports (submitted through Higher Education Coordinating Board (HECB)).

The baccalaureate and associate degrees awarded by disciplines during 1990-91 to 1996-97 are shown in Tables 1-6A, 6B, and 6C. The total baccalaureate degrees for public four-year institutions increased by almost 25 percent during this 1990-91 to 1996-97 period (see Table 16A). By discipline, some of the high growth areas (of more than 50\% gain) are Agricultural Sciences, Renewable Natural Resources, Allied Health and Health Sciences, Liberal/General Studies, Life Sciences, Park and Recreation, and Public Affairs. Some moderate and low growth (of less than 51\% gain) disciplines are in Business Management and Administrative Services, Visual and Performing Arts, Physical Sciences, Computer and Information Sciences, Psychology, Protective Services, and Architecture and Environmental Design. Some disciplines with declining growth rates are Communication, Education, Mathematics, and Engineering.

Private four-year universities as a whole showed a decline in Business ( 17 percent), Communication (17 percent), Education ( 6 percent), Engineering ( 9 percent), Law ( 47 percent), Letter ( 9 percent) , and Mathematics ( 22 percent), but an increase in Computer and Information Sciences ( 34 percent), Life Sciences ( 35 percent), Liberal/General Studies ( 114 percent), and Park and Recreation ( 500 percent). The rest of disciplines indicate similar trends as the public four-year institutions. The total degree growth rate in all private four-year universities between 1990-91 and 1996-97 was 3.8 percent (see Table 1-6B).

For the Community Colleges, the total number of associate degrees increased by 40 percent, from 12,983 in 1990-91 to 18,145 in 1996-97 (see Table 1-6C). Associate degrees for Academic Programs increased by 43 percent (See Liberal/General Studies) while Vocational degrees, the remainder of the associated degrees, increased 34 percent. Note that technical college degrees are included in the 1992-93 to 1996-97 statistics.

## Degree Production

In 1996-97, the Washington higher education system produced 49,314 degrees with a total fall enrollment of 297,291. See Table 1-7. Forty-six percent of the degrees were from the four-year public institutions. The four-year private institutions contributed 17 percent. The remaining 37 percent were from the two-year public community college system.

The number of all public four-year institution degrees completed in 1990-91 as a percent of total enrollment five years earlier was 23.99; it increased to 26.94 in 1993-94, and 28.07 in 1996-97. For the private four-year institutions, the percentages started at 25.08 percent in 1990-91, then increased to 28.67 percent in 1993-94, but decreased to 26.1 percent in 1996-97.

## Chapter 2

Washington Higher Education Student Characteristics

FEMALE STUDENTS COMPRISE ABOUT 58 percent of the total student body for community and technical colleges (Table 2-1), slightly more than 53 percent of the total fouryear and almost 53 percent for total main-campus four-year enrollments (Table 2-2 and 2-3). At the branch campuses 63 percent (Table 2-4) of total enrollment is female.

The average age of two-year community college students is 31 years, while the four-year student is younger, at 24 years. The average branch campus student is 32 years of age.

## Credit Hours Enrolled

In Fall 1997, 55 percent of two-year students were enrolled below 10 credit hours or part-time (Table 2-5). In Fall 1998, the average four-year student enrolled at slightly more than the tuition full-time level, or 11.48 credit hours (Table 2-6).

The average four-year branch campus student enrolled at 6.81 credit hours (Table 2-8), compared to 11.90 for the average main campus student (Table 2-7). Ninty percent of four-year main campus students are full-time compared to almost 52 percent for branch campus students.

For the total main and branch campus students, 34 percent are lower division (freshman, sophomore, and other), 49 percent are upper division (junior, senior, and unclassified 5), and the remaining 17 percent are graduate and professional students (Table 2-6).

## Resident/Non-Resident Status

Ninety-four percent of students in the Community and Technical College System are domestic residents, while 6 percent are domestic non-resident and foreign students in Fall 1997 (see Table 2-9).

The percentages of resident, domestic non-resident, and foreign students of Total Four-Year Institutions are 87 percent, 9 percent, and 4 percent, respectively (Table 2-10). For the Graduate and Professional category, the percentage of resident students is only 68 percent, compared to more than 88 percent for undergraduate resident students. The regional universities have higher resident student percentages compared to the research universities ( 91 percent compared to 85 percent). See Table 210 to 2-12.

Table 2-9

## Geographic Characteristics

King, Pierce, Snohomish, and Spokane Counties contribute almost 62 percent of total enrollment at two- and four-year public institutions; 79 percent of total enrollment is from west of the Cascades. This is consistent with population patterns. More than 79 percent of the population age 17 and over resides in Western Washington (Table 2-13). The county participation rate statistics are shown in Chapter 7.

## Class Status, Retention, and Student Flow

Of the Fall 1998 enrollment of 88,857 for four-year public institutions, 13 percent are freshman entrants, 17 percent are transfer students, 67 percent are continuing students, and 4 percent are other entrants (formerly returning and unknown students). See Figure 2-1 and Table 2-14. The continuing student share has increased in the past 19 years from 59 percent in 1979 to 67 percent in 1998. While the transfer student share has been about 17 percent for the past five years (1994-98), the share of freshman entrance shows an increase from 11.25 to 13.27 percent for the same period.

Table 2-15 shows an increase in the spring to fall retention rate from 71.65 percent in 1986 to 74.69 percent in 1993, a change of +3.04 percentage points in eight years. However, the retention drops in 1994 to 73.36 percent and to 73.13 percent in 1998. These are students who were enrolled in the previous spring and who continued their enrollment to the subsequent fall term. If higher retention rates reflect measures to reduce drop-out rates, they can be viewed positively. On the other hand, higher retention rates may also represent slow progress toward completion of studies, thereby reducing entrance opportunities for first-time students.

## Student Flow

Table 2-16 indicates that for the past five years (1994-1998):

- The rate of Washington high school seniors entering the four-year institutions has gradually increased from $13.95 \%$ in 1994 to $14.46 \%$ 1998. See also Washington high school senior statistics in Appendix B-8.
- The number of out-of-state high school entrances has increased from 1,389 in 1994 to 1,654 in 1998, or from 1.63 percent of total four-year enrollment in 1994 to 1.86 percent in 1998.
- New transfers from the community college system have decreased from 15.45 percent to 14.87 percent of total community college academic FTEs.
- New transfers from Washington four-year institutions as a percentage of the total public fouryear previous spring enrollment has slightly decreased since 1994 from $15.45 \%$ to $14.87 \%$.
- Out-of-state transfers have increased from 4,628 to 4,684 from Fall 1994 to 1998. However, the percentage to total enrollment has decreased from $5.45 \%$ to $5.27 \%$.
- Continuing students have increased from 56,878 to 59,101 students. However, as a percentage of the previous spring enrollment, the rates decreased from 73.24 percent to 72.91 percent.
- During 1994-98, there have been declining rates of transfer student and continuing student categories. However, the gain in new entering freshman rates have been more than offsetting the loss and contributed to the total increasing Fall term enrollment.

## Chapter 3 <br> Actual and Budgeted Full-Time Equivalents of Washington Two- and Four-Year Public Institutions

THE OFFICE OF FINANCIAL MANAGEMENT (OFM) monitors actual budget activity of the community colleges and four-year institutions relative to budgeted full-time equivalents (FTEs).

This chapter reviews recent trends in both budgeted and actual FTEs. Sources are from OFM Budget Driver Reports.

For the public institution system, the variance between the actual and budgeted annual average FTEs ranged from 2,190, 7,430, and 1,006 during Fiscal Years 1990, 1996, and 1998 with the percent differences ranging from $+1.4,+3.9$, and +0.5 respectively.

For the two-year system, the average percentage variance during 1987-90 was +1.4 percent. The variance dropped to +0.6 percent in 1991, increased to +5.4 percent in 1996, and dropped to 3.7 percent in 1998 (Table 3-2).

For the four-year public institutions as a whole, the variances averaged about +1.0 percent during the last five years (1994-98) or about 638 FTEs. In 1998, the variance was -493 FTEs or -0.6 percent under the budgeted FTEs (Table 3-3).

Institutional actual and budgeted FTEs are shown in Tables 3-4 through 3-16.

Chapter 4 Baseline Fall Enrollment Projections, 1999-2000 to 2020-2021

\author{

- N ACCORDANCE WITH RCW 43.62.050, the Office of Financial Management (OFM) issues biennial projections of higher education enrollment based on "current" rates of participation.
}

The enrollment projections reflect the number of students that would enroll in public two- and four-year higher education institutions in the future if "current" participation rates by age and sex were maintained. The projections are based upon the actual Fall 1997 participation rate for the two-year colleges and the Fall 1998 participation rate for four-year institutions. The rates are computed by using single year of age and sex of the population age 17 years old and over.

The enrollment projections are prepared in three steps. The first step is to calculate the participation rates, which are the number of students enrolled in Fall 1997 and 1998 per 100 population of the corresponding year. The rate is computed for each single year of age and sex.

The second step is to apply the calculated participation rates to the most recent OFM population forecast (prepared in November 1999) for 1999-2020. This results in fall headcount enrollment projections by single year of age and sex categories. The primary assumption of the projections is that the participation rate for 1999-2020 is held constant at the 1997 rate for the two-year and 1998 for four-year institutions.

In the third step, the projected headcount enrollments are converted to annual average full-time equivalent (FTE) enrollments by applying the actual previous and most recent three-year average ratio of annual average FTEs to fall headcount (See Appendix B-7).

The projections represent the level of enrollments that would be attained in the future if current participation rates for 1997 and 1998 were maintained. Therefore, the projections do not reflect persons who may currently be unserved by the Washington higher education system. Chapter 5 supplements the "current participation rate" projection for the four-year institutions with an analysis of unmet demand - students who apply to Washington four-year institutions, but who are subsequently unserved by any component of the Washington higher education system.

## Baseline Enrollment Projections

Since population change and participation rates are two key ingredients in the enrollment projections, trends in these two areas will be reviewed before presenting the enrollment projections.

## Population Change, 1970-2020

See Figures 4-1, 4-2 and Appendix B-2
Higher education enrollment growth has been closely tied to the long-term demographic trends of the state, especially the prime college age population age 17 to 22 years.

Strong growth in the prime college age population groups beginning in the 1999-2001 Biennium is expected to place substantial additional enrollment pressures on the two- and four-year institutions.

After growing very rapidly during the 1970 's, the 17 to 22 age population declined through most of the 1980's and most of 1990's. The number of persons age 17 to 22 is forecast to rise sharply, from 451,007 in 1998 to 492,905 in 2001, and continue to grow rapidly after 2001, reaching 589,742 by the year 2011 and gradually decreasing to 563,428 in 2020.

The age 23 to 29-year old population, which also declined during the 1980's, is forecast to decrease by about 14,000 during the 1999-2001 Biennium. This 23 to 29-year old group will resume strong growth in the 2002 to 2018 period.

The age 30 to 44 and age 45 and over population groups, which participate in higher education at much lower rates than 17 to 22-year olds, will continue to grow during the 1999-2001 Biennium. However, due to their low participation rates, these groups will place relatively little pressure on higher education enrollments.

## Participation Rates <br> (1970-71 to 1997-98 for Two-Year and 1970-98 for Four-Year)

See Figure 4-3 and Appendix B-5 for two-year institutions
See Figure 4-4 and Appendix B-4 for four-year institutions
Highlights for the participation rate historical trends of two- and four-year system will be prepared in three separate decades during 1970 to present.

Since the new creation and early development of the community college system in 1960's, its participation rates strongly increased during the 1970's. However, the increase in the two-year system rates were at the expense of the four-year system. The evidence was apparent and reflected in the decrease of the four-year participation rates in the same period, especially in the youngest age group.

In 1980's, the earlier year rates decreased and was due mainly to the legislative enrollment lid policy. The rates picked up in the later years for the youngest prime college group, 17-22 year old, while the older group, 23-29 year old, rates continued to drop until 1990 for both two- and four-year system.

A new rise of the participation rates clearly started again from 1990 with a momentum from the late 1980's. The rates of youngest and older groups for both two- and four-year system have steadily increased. The rate was at the historical highest for the two-year youngest group in

1997-98. The inclusion of the technical college enrollment and the expansion of the workforce training program are partly contributing to the gain of enrollments. In the same fashion, the new opening of branch campuses in the late 1980's and more liberal state enrollment policy certainly adds more enrollment to the four-year system.

For the $30+$ year old group, the participation rates have been relatively low. The rates also have been stable throughout the three decades from 1970 to present.

## Baseline Enrollment Projections 1999-2000 to 2020-2021 <br> See Table 4-1, Figure 4-5

## 1999-2000 to 2000-2001 Biennium FTE Enrollment Projections

See Table 4-1 (ref: " Current Part. Rates) and Figure 4-5
To maintain the 1997 participation rates, the projected FTE enrollments of the next biennium for the two-year system are 122,141 and 123,671 for 1999-2000 and 2000-2001 fiscal year respectively. It is an increase of 3,615 FTE from 1998-99 budgeted enrollments for 1999-2000 and an increase of 1,530 FTE for 2000-2001.

The projection for the four-year system are based on the 1998 participation rates. The projected FTE enrollments are 83,321 and 84,942 for 1999-2000 and 2000-2000. They are increases of 1,319 and 1,316 FTE enrollments for each subsequent year of the 1999-2001 biennium.

## 2001-2002 to 2009-2010 Medium-Range FTE Enrollment Projections

See Table 4-1 (ref: " Current Part. Rates) and Figure 4-5
The public higher education FTE projections for the next 9 years show an average increase of about 2,500 for each fiscal year for two-year institutions. The projection for the four-year institutions indicate an increase of about 1,800 for each fiscal year during 2001-2002 to 20192110.

## 2010-2011 to 2020-2021 Long-Range FTE Enrollment Projections

See Table 4-1 (ref: " Current Part. Rates) and Figure 4-5
FTE projections over the next 11 years show a less than average enrollment increase of 1,000 FTE enrollments compared to the period in the medium-range projection for the two-year institutions. For the four-year institutions, the FTE projection indicates an annual average decrease of about 300 during 2010-2011 to 2020-2021.

${ }^{1}$ Known as the Baseline Fall Term Enrollment Projection, applying Fall 1997 and Fall 1998 participation rates of CTC (two-year) and four-year public institutions respectively.
${ }^{2}$ Known as the Fiscal Year 1993 Funded Participation Rate Carried Fonward Projection, applying Fall 1992 participation rates for each two- and four-year system. Technical Colleges not included.
${ }^{3}$ Known as the Senate Bill 5781 Higher Education Coordinating Board (HECB) Long Term Goal Projection, applying Fall 1996 Integrated Postsecondary Data System (IPEDS) participation rates: WA rates for Lower Division, national average participation rates for Upper and Graduate + Professional Division for 2010, and at the $70 \%$ participation rate among the 50 states for the Upper and Graduate + Professional Division for 2020.

Notes: FTE = Full Time Equivalent CTC = Includes Community Colleges (CC), Technical Colleges (TC), Timber Worker Enrollment in CC and TC, Workforce Training Enrollment in CC and TC, and Private Career Colleges (PCC).
Projected Fall Term figures are converted to FTE by applying the previous year FTE/Fall Headcount ratio for 1999-02, the three year average ratio for 2007-20, and the average annual increment between the projected 2002 and 2007 for 2003-2006.

Annual Average FTE Projection for Public Two- and Four-Year Universities/Colleges 1999-00 to 2019-20
(Based on Current Participation Rates)

## Senate Bill 5781 Enrollment Projections

See Table 4-1 (ref: "5781Minimum" and "5781 HECB Goal")
Pursuant to Senate Bill 5781 (RCW 28B15.515 and RCW 28B.10.776-786) passed in the 1993 Legislative Session, enrollment projections needed to reach the minimum Fiscal Year 1993 participation rate goal and the current long-term Higher Education Coordinating Board (HECB) goal are included in Table 4-1, "5781 Minimum" and " 5781 HECB Goal" respectively.

Table 4-1 on " 5781 HECB Goal" contains projections based on the HECB's current long-term goals for 2009-2010 and 2019-2020. The 2009-2010 goal reflects the 1996 national participation rate for all four-year upper division and beyond, and the 1996 actual participation rate for the lower division two- and four-year system. Table 4-1 on "5781 HECB Goal" also shows 20192020 goal which reflects the 1996 participation rates of the state at $70 \%$ ranking for the four-year upper division and beyond, and the 1996 actual participation rate for the lower division two- and four-year system.

Table 4-1 on "5781 Minimum" shows projections based on the participation rate funded in Fiscal Year 1993. The bill requires OFM to determine minimum enrollment goals based on Fiscal Year 1993 participation rate.

Two- and Four-Year Combined FTE Enrollment Projection Comparisons See Table 4-1 and Figure 4-6

Figure 4-6 illustrates three FTE enrollment levels for the two and four year systems.

1. Current (1998-99) Budgeted Enrollment.
2. Current Participation Rate. These are FTE enrollment projections based on the current participation rates carried forward for the two- and four-year systems.
3. Higher Education Coordinating Board (HECB) Goal. The two- and four-year projected FTE enrollments which are calculated from the enrollment goals currently set by the HECB for 20092010, and 2019-2020.

Chapter 5
Application Match Study 1996-97 Follow-Up And Fall 1997 - A Perspective on Unmet Needs

THE DEMAND FOR HIGHER EDUCATION may be separated into two components: (1) the actual enrollment, and (2) unmet demand. The enrollment projections in Chapter 4 are based upon population forecasts by age and sex under the assumption that participation rates will remain at the current levels. If budget constraints did not limit enrollment, this projection alone would represent expected demand for higher education. However, participation rates have been limited by budget constraints since the early 1980s and by enrollment lids until fiscal year 1994*. Potential unmet demand is assessed through the "applications" match process, which matches applicants to Washington public four-year institutions with registered students in Washington public and independent higher education institutions.

The goal of the Applications Match Study is to obtain an unduplicated count of qualified individuals applying to Washington public four-year higher education institutions who were not served by the higher education system of the state. The study is designed to provide a more accurate account of unserved applicants than can be obtained by adding the numbers of qualified applicants who are denied admission by the individual institutions. The single institutional perspective does not adjust for multiple applications by individual students; nor does it account for students denied admission by one institution, but admitted and served by another; nor does it distinguish between Washington residents and out-of-state applicants.

An applications match study has been conducted annually since Fall 1987. The data requested from institutions as well as the assumptions made in the matching process varied slightly over the first three years of the study. Data for Fall 1990 through Spring 1996 are not entirely comparable with those of preceding years.

A new perspective was added to the Applications Match Study beginning with the 1990-91 data, when data were collected for fall, winter, and spring terms. This update continues the follow-up portion of the study, started in 1990-91, providing an estimate of unserved applicants for the entire 1996-97 academic year, including persons applying for Winter 1997 and Spring 1997 terms, and matches against enrollment data for Winter 1997, Spring 1997, and the entire 1997-98 academic year.

[^4]
## Limitations

Non-applicants or incomplete applications. Applications to higher education institutions are only one measure of demand for higher education, although they are still the most concrete and objective indicator available. Other forms of demand are not fully captured by applications data, such as individuals who fail to submit applications to four-year institutions because they lack the financial resources or other support services needed to attend. Examination of applicant and enrollment data provides a measure of unmet need among Washington residents who have taken the step of applying to a four-year institution. Persons who do not submit an application because they lack the resources to participate in higher education, or who believe they will not be admitted due to enrollment limits, are not counted by this measure of unmet need. Persons who do not submit a complete application are also not counted by this measure of unmet need.

Applicants not admitted to institution of first choice. In this study, any applicant who is admitted to a four-year higher education institution is considered to be served by the higher education system of the state, whether the person actually enrolls or not. Some would suggest that unless an applicant is enrolled by his/her first-choice institution, the applicant is not completely served by the system. Applicants' priorities are not recorded in any administrative databases; they have not been a factor in determining whether an applicant has been served by the state's higher education system.

Applicants attending out-of-state institutions. Just as Washington higher education institutions serve many out-of-state residents, many Washington residents leave the state for their postsecondary education. Undoubtedly, many of the applicants who apply to in-state institutions, but never enroll, are attending institutions outside of Washington.

## Data Elements

As in the past, application and registration data were requested and received from all public fouryear institutions. Registration data from independent colleges and universities* and from community colleges were also used in the study. All type of applicants, i.e., applicants from high school, transfer applicants from two- and four-year institutions, returning students, and graduate and other post-baccalaureate applicants, are included in the study. A database emphasizing the individual applicants was created. For each applicant to public four-year institutions, information related to all applications and to enrollment status was developed. Social security number, name, and birth date were the basis of the matching procedure. Extreme care was taken to avoid any inappropriate matches.

An applicant's county of permanent residence is the county of permanent residence captured at the time of application and stored in the enrollment file, if the applicant was enrolled in a fouryear institution. If the applicant did not subsequently enroll, a county code based upon city, state, and ZIP code of permanent residence at the time of application was used.

[^5]Applicants were classified as "accepted" if they were admitted to at least one public four-year institution. They were classified as "denied" if they were denied admission to at least one public four-year institution and were not admitted by any other. If an applicant was neither admitted nor denied, but instead withdrew an application, submitted an incomplete application, or if the admission status was not provided by the institution, the applicant's admission status was classified as "other."

## Status of Applicants for Fall 1997-Total Applicant Pool

There were 63,337 applicants, who submitted 73,207 applications to public four-year higher education institutions in Washington State for Fall 1997. The subsequent status of these applicants is outlined in Table 1a.

- Of the 37,117 Washington resident applicants for Fall 1997, 24,631 were enrolled at one of the public or independent four-year higher education institutions in Washington during Fall 1997. An additional 3,054 were enrolled in a community college during Fall 1997.
- A total of 9,432 Washington resident applicants for Fall 1997 were not enrolled in any of the higher education institutions involved in this study during Fall 1997.
- Of the 9,432 Washington resident applicants for Fall 1997 not enrolled during Fall 1997, 5,488 were offered admission to a public four-year institution for Fall 1997. These applicants are considered to be served by the higher education system. Undoubtedly, many of these applicants enrolled in out-of-state institutions. The most recent student migration studies conducted by NCES* indicate that approximately 5,000 Washington resident freshmen enroll in out-of-state institutions.
- Application information provided for 1,589 of the non-enrolled Washington resident applicants for Fall 1997 indicated admission status unknown, a withdrawn application, an incomplete application, or that no admissions decision had been made as of the tenth class day of the fall term. These applications have been excluded from the analysis.
- Finally, 2,355 of the non-enrolled Washington resident applicants for Fall 1997 were denied admission by at least one public four-year institution and not admitted by any other for Fall 1997. Of these, 1,540 were known to have a grade point average (GPA) or admissions index (AI) acceptable for admission to a Washington four-year institution and 335 had GPAs or AIs lower that the minimum acceptable level. The GPA and AI for 480 of these applicants are unknown. Some of these 480 applicants may have had acceptable GPAs or AIs.

Results of the analysis indicate that for Fall 1997 between 1,540 and 2,020 qualified individuals were denied admission to a public four-year institution and not enrolled in any other public or private Washington higher education institution during that same term. Of the 2,020 potentially unserved Fall 1997 applicants, 242 were either enrolled or accepted for admission for Winter or

[^6]Spring 1998 terms. When 1997-98 data become available, it is likely that the figure of 1,778 potentially unserved Fall 1997 applicants will be reduced.

## Status of Applicants for Fall 1997 - Undergraduate Applicants

There were 44,164 undergraduate applicants, who submitted 53,456 applications to public fouryear higher education institutions in Washington State for Fall 1997. The subsequent status of these undergraduate applicants is outlined in Table 1b.

- Of the 31,730 Washington resident undergraduate applicants for Fall 1997, 21,489 were enrolled at one of the public or independent four-year higher education institutions in Washington during Fall 1997. An additional 2,986 were enrolled in a community college during Fall 1997.
- A total of 7,255 Washington resident undergraduate applicants for Fall 1997 were not enrolled in any of the higher education institutions involved in this study during Fall 1997.
- Of the 7,255 Washington resident undergraduate applicants for Fall 1997 not enrolled during Fall 1997, 4,864 were offered admission to a public four-year institution for Fall 1997. These applicants are considered to be served by the higher education system.
- Application information provided for 1,294 of the non-enrolled Washington resident undergraduate applicants for Fall 1997 indicated admission status unknown, a withdrawn application, an incomplete application, or that no admissions decision had been made as of the tenth class day of the fall term. These applications have been excluded from the analysis.
- Finally, 1,097 of the non-enrolled Washington resident undergraduate applicants for Fall 1997 were denied admission by at least one public four-year institution and not admitted by any other for Fall 1997. Of these, 754 were known to have a grade point average (GPA) or admissions index (AI) acceptable for admission to a Washington four-year institution and 181 had GPAs or AIs lower that the minimum acceptable level. The GPA and AI for 162 of these applicants are unknown. Some of these 162 applicants may have had acceptable GPAs or AIs.

Results of the analysis indicate that for Fall 1997 between 754 and 916 qualified individual undergraduate applicants were denied admission to a public four-year institution and not enrolled in any other public or private Washington higher education institution during that same term. Of the 916 potentially unserved Fall 1997 undergraduate applicants, 196 were either enrolled or accepted for admission for Winter or Spring 1998 terms. When 1998-99 data become available, it is likely that the figure of 720 potentially unserved Fall 1997 undergraduate applicants will be reduced.

## Interpretation of Results for Fall 1997 Analysis

Not all of the potentially unserved applicants (the "Waiting Line") are necessarily unserved.

- Some applicants may be attending institutions outside Washington or one of the independent institutions within the state for which no enrollment data are available.
- As shown for Fall 1990 through Fall 1996, many applicants denied admission for a fall term are admitted in subsequent terms. Availability of application and enrollment data for each academic term starting with Fall 1990 allows an analysis of the application and enrollment patterns of these individuals in subsequent terms. The complete analysis for 1996-97 is presented in the section that follows.
- Since approximately 40 percent of all individuals admitted to a four-year institution never enroll, it is likely that some of these applicants would not enroll even if accepted.

The "waiting line" as indicated by unserved applicants should not be interpreted as a measure of total unmet need for higher education. Persons who may lack the resources to attend a four-year institution, for example, and who may not submit an application, are not counted among the unserved.

## Status of 1996-1997 Academic Year Applicants

Applications match data were collected for fall, winter, and spring terms beginning with the Fall 1990 data. The traditional waiting line calculations show 1,961 potentially unserved applicants for Fall 1996, 463 potentially unserved applicants for Winter 1997 and 188 potentially unserved applicants for Spring 1997. But the traditional waiting line calculation for a single term is a snapshot in time. It is inappropriate to sum these figures for a total 1996-97 waiting line since many individuals appear in more that one term and since many individuals appearing in the waiting line in one term are subsequently admitted by a four-year institution.

To gain a more accurate picture of the magnitude of the cumulative annual waiting line a longitudinal analysis of potentially unserved applicants was performed. For the 1996-97 academic year, 33 applicants appeared in the waiting line for more than one term. Tables 5-2 and 5-3 assign unserved Washington resident applicants to four-year public institutions for the 1996-97 academic year to the first term within the academic year for which they were denied admission.

Table $5-2$ breaks out the total number of unduplicated applicants for the entire 1996-97 academic year who were unserved during the term for which they applied ( 2,313 ). The entire group of 2,313 applicants is termed the academic year waiting line prior to follow-up. Of this group, 637 applicants were served during subsequent terms of the 1996-97 academic year or during the 1997-98 academic year. The resulting number of applicants who were not served during either the 1996-97 or the 1997-98 academic year is 1,676 . This group of 1,676 is the academic year waiting line after follow-up.

Table 5-2
Summary: 1996-97 Academic Year Waiting Line Prior to Follow-Up

| Subsequently enrolled or accepted for admission, public or independent four-year or two-year institution | 637 |
| :--- | ---: |
| Remaining unserved applicants for $1996-97$ | 1,676 |
| Total | 2,313 |

Table 5-3 shows the nature of the subsequent application activity for the 2,313 individuals making up the 1996-97 academic year waiting line prior to follow-up who were unserved during the term for which they first applied, characterized by application type.

Table 5-3
Detail: 1996-97 Academic Year Waiting Line Prior to Follow-Up (Academic Year Waiting Line After Follow-Up is shaded)

|  | High School | Transfers \& Returning |  | Post-Baccalaureate |  | Special/ Unknown | Total |

|  |  | Two-year ${ }^{1}$ | FourYear | Graduate School | Other |  |  |
| Subsequently enrolled, public four-year | 15 | 82 | 52 | 142 | 19 | 2 | 312 |
| Subsequently enrolled, independent four-year | 2 | 9 | 5 | 12 | 5 | 0 | 33 |
| Subsequently enrolled, community college | 66 | 86 | 41 | 57 | 17 | 1 | 268 |
| Subsequently applied and accepted for admission | 1 | 1 | 6 | 10 | 6 | 0 | 24 |
| Subsequenty applied and denied admission | 6 | 10 | : 10 | $\because 64$ | 13 | . 2 | 105 |
| Did not subsequently apply | 144 | 218 | 146 | $936$ | 108 | 19 | 1,571 |
| Total | 234 | 406 | 260 | 1,221 | 168 | 24 | 2,313 |

${ }^{1}$ Transfers from two-year institutions are not necessarily transfers from institutions within the Washington community and technical college system, nor are they necessarily graduates of a two-year institution.

To summarize Tables 5-2 and 5-3:

- Of the total 2,313 individual applicants unserved in the term for which they applied, 637 were subsequently enrolled or accepted for admission.
- 1,676 individuals, those represented by the shaded areas in Tables 5-2 and 5-3, were unserved both in the term for which they initially applied and through the following academic year.
- Most of the 1,676 unserved, 94 percent, did not apply during the remainder of 1996-97 or during 1997-98.
- Of the 1,676 unserved individuals, over 60 percent were applicants to graduate school or other post-baccalaureate programs.
- Approximately three-quarters of the 652 unserved applicants at the undergraduate level are transfers and/or returning students. Students entering from high school accounted for 234 of the unserved applicants.

Figure 5-1 is a graphical depiction of the information contained in the shaded portion of Table 5-3, but broken out by term (fall, winter, spring). Here, transfer applicants include any who have previously attended an institution of higher education, not necessarily in the immediately preceding term. Transfers from two-year institutions have not necessarily completed a two-year degree. Returning undergraduate students are included in the four-year transfer category.

- Graduate applicants and applicants entering from high school were concentrated in the fall term. Graduate applicants dominate the fall waiting line.
- The total count of transfer applicants not subsequently served, including returning student applicants, shows much less of a fall concentration, ranging from 254 for fall term and declining to 39 for spring term.

Figure 5-1
1996-97 Academic Year Waiting Line After Follow-Up By Term and by Application Type

As a group, the 1996-97 unserved applicants generally had grade point averages and/or admission index scores toward the lower end of the admissible ranges. Table 5-4 shows college GPA, high school GPA or admissions index, as appropriate, for the 555 unserved applicants for 1996-97 not classified as graduate or other post-baccalaureate applicants.

Table 5-4
Grade Point Averages (GPA) and Admissions Indices (AI) for 1996-97 Academic Year Waiting Line After Follow-Up, Undergraduate Applicants

| Admissions <br> Index | Applicants | High School <br> GPA | Applicants | College <br> GPA | Applicants | GPA and AI <br> not reported |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $76+$ | 1 | $3.50-4.00$ | 0 | $3.50-4.00$ | 16 | 109 |
| $51-75$ | 27 | $3.00-3.49$ | 3 | $3.00-3.49$ | 49 |  |
| $28-50$ | 86 | $2.50-2.99$ | 3 | $2.50-2.99$ | 130 |  |
| $13-27$ | 17 |  | $2.00-2.49$ | 114 |  |  |

## Unserved Applicants by Institution, 1996-97

Table 5-5 shows the breakout of the 1,676 unserved applicants for 1996-97 by institution and by application type. "Multiple" indicates that the applicants were denied admission by more than one institution.

Table 5-5
1996-97 Academic Year Waiting Line After Follow-Up by Institution and by Application Type

|  | UW | WWU | EWU | TESC | CWU | WSU $^{1}$ | Multiple $^{2}$ | Total |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Graduate | 864 | 40 | 53 | 6 | 11 | 0 | 26 | 1,000 |
| Other Post-Baccalaureate | 92 | 29 | 0 | 0 | 0 | 0 | 0 | 121 |
| Two-year Transfer | 142 | 48 | 0 | 9 | 9 | 15 | 5 | 228 |
| Four-year Transfer | 80 | 33 | 1 | 5 | 2 | 5 | 3 | 129 |
| Retuming | 24 | 3 | 0 | 0 | 0 | 0 | 0 | 27 |
| High School | 75 | 48 | 2 | 6 | 4 | 8 | 7 | 150 |
| Special or Unclassified | 19 | 1 | 1 | 0 | 0 | 0 | 0 | 21 |
| Total | 1,296 | 202 | 57 | 26 | 26 | 28 | 41 | 1,676 |

${ }^{1}$ WSU graduate applicant data is incomplete.
${ }^{2}$ The 41 "multiple" applicants submitted 29 applications to University of Washington campuses, 31 to Westem Washington University, 17 to Eastem Washington University, 6 to Central Washington University, 4 to Washington State University, and 1 to the Evergreen State College.

- Post-baccalaureate applicants, graduate and other, mainly to the University of Washington, account over 65 percent of the total unserved applicants for 1996-97.
- Transfer applicants and returning student applicants, mainly to the University of Washington and to Western Washington University, account for the next largest share, 23 percent, of the total 1996-97 waiting line and almost 70 percent of the undergraduate waiting line.
- Since Fall 1993, higher education institutions have been allowed to enroll students above the number of budgeted FTEs if, in their judgment, the additional students could be accommodated without harming the quality of education. For institutions enrolling more than the number of budgeted FTEs, the "waiting line" is probably smaller than it would have been otherwise.

## County Enrollment Participation Rates

COUNTY PARTICIPATION RATES help describe the level of service provided by the public higher education system to each county in the state.

The county participation rate is the number of persons enrolled in a public college or university per 100 persons in each county, age 17 and older. (Note: Use of a single participation rate for persons age 17 and over, rather than single year of age participation rates, is valid for present point in time comparisons. Analysis involving projections, however, must use single year of age participation rates due to changes in the age composition of the population over time.)

The two-year public institutions include 27 community and five technical colleges throughout the state.

The four-year public institutions include the University of Washington and branch campuses, Washington State University and branch campuses, Central Washington University and the education center in Yakima, Eastern Washington University, Western Washington University, and The Evergreen State College.

The county of an enrolled student is taken from the permanent address as entered on the student's original application form.

Enrollment by county is taken from the official state funded enrollment reported to the Office of Financial Management. The participation rates are based on the actual Fall 1997 enrollment for two-year colleges and the Fall 1998 enrollment for four-year schools. The enrollment for twoyear colleges include Timber Worker Displacement program and Workforce Training (WFT) program, and Private Career College enrollments..

The formula for the county participation rate calculation is as follows:

## Fall Headcount Enrollment by County $X 100$ <br> Age 17+ Population by County

Tables 6-1 to 6-8 show participation rates by county in descending order with an average Washington participation rate at the bottom for each category. Figures 6-1 to 6-3 show the location of public higher education institutions in each county with county participation rates. Counties in shaded areas have a participation rate higher than the state average. In this chapter, the Lower Division includes students categorized as freshman, sophomore, and other (nonmatriculated). The Upper Division includes students categorized as junior, senior, and unclassified 5 (Post-Baccalaureate). The Graduate and Professional Division includes students
categorized as Graduate and Professional. The Upper Division and Beyond includes the Upper and Graduate and Professional Divisions.

# Chapter 7 <br> National Comparison - State Enrollment Participation Rates 

## State Education Attainment, 1990

See Table 7-1
The education attainment statistics are a product of a 1990 national survey done by the Bureau of the Census. It shows the percentage of population 25 years and over who earned a bachelors degree or higher by state. In Washington State, 23 percent of the population age 25 years and over has attained at least a four-year degree, placing Washington at the 76th percentile, or 13th, compared to all other states in the nation as of April 1990.

In spite of the low ranking of the Washington State four-year enrollment participation rate (see below), the educational attainment of the Washington population is relatively high. This suggests that Washington State has been attracting an educated population from out-of-state to sustain its labor market needs.

## State Participation Rates

See Tables 7-2 to 7-16
Participation rates for Washington and other states assist in the comparison of Washington higher education service levels with those of other states. The state participation rate is the number of persons enrolled in four-year private and two- and four-year public institutions per 100 population in each state, aged 17 years and older. Two-year private colleges are not included in the study due to the unreliability of available data. (Note: Use of a single participation rate for persons age 17 and over, rather than single year of age participation rates, is valid for present point in time comparisons. Analysis involving projections, however, must use single year of age participation rates due to changes in the age composition of the population over time.)

State population data are from the U.S. Census population estimate. The Washington population estimate is from the Office of Financial Management, Forecasting Division. The U.S. Census Bureau and the Office of Financial Management estimates for Washington are extremely close. State enrollment data by type of college and division of study are based on the National Center of Education Statistics (NCES) - Integrated Postsecondary Education Data System (IPEDS).

The formula applied in the calculation is:

| Participation Rate |
| :--- |
| (Rate per 100) |$=\frac{\text { IPEDS Fall Headcount }}{\text { Estimated Population Ages 17+ }}$ X 100

The IPEDS Enrollment figures for Washington State are not exactly the same as the Washington State Higher Education Enrollment Report (HEER) for four-year public institutions or the

Management Information System (MIS) for the two-year public colleges. Comparison of the HEER, MIS, and IPEDS enrollment is included in Appendix B-12.

For all public and private institutions (excluding the two-year private schools), the Washington State participation rate was 7.53 in Fall 1996 compared to 7.08 for the United States average. The 7.53 rate placed Washington in the top 64 national percentile ranking, or 19th out of 51 states. The state at the 70 percentile ranking had 7.89 percent participation rate (Table 7-2).

The community college participation rate ranked high in the national two-year college category during 1990-96. In 1996 the rate was 4.47 compared to a 2.68 United States average and placed Washington at the 94 percentile ranking. Note that Washington technical colleges are included in the 1993 and 1996 figures.

The four-year public institution rate was 2.13 compared to the national rate of 2.90 and was at the 4 percentile ranking.

The four-year private institution participation rate was 0.93 compared to the United States average of 1.50 .

Comparing 1996 and 1990 statistics, Washington's total higher education enrollment participation rate increased to 7.53 from 7.09. The national percentile ranking improved from 48 in 1990 to 64 in 1996.

A summary of 1990 to 1996 comparisons and full state participation rate statistics for 1996 are presented in the Tables 7-2 to 7-16.

Note: The Tri-Cities University Center opened Fall 1958 and The Evergreen State College opened Fall 1971. WSU - Tri-Cities replaced Tri-Cities University Center starting 1989, UW - Evening Degree Program, Bothell/Woodinville, and Tacoma opened Fall 1990. WSU at Spokane and Vancouver began separate funding Fall 1989. CWU Yakima started separate reporting Fall 1990 and combined reporting with the main campus again in Fall 1993. CWU 1954-1971 figures are revised numbers.

${ }^{1}$ Many departments have different deadlines. International students may have different deadlines.
${ }^{2}$ Or the day (within the 10th day of class) that an official enrollment report (HEER) is based on.
${ }^{3} \mathrm{~N} / \mathrm{A}=$ Not Applicable.
${ }^{4}$ Check with the institution for specific dates.
Note: All institutions academic calendars are in a quarter system except where indicate * for a semester system.

*October headcount $12^{\text {th }}$ grade public school enrollments from Superintendent of Public Instruction Report P105. These tabulations do not double count students attending vocational skill centers outside their home school district and will not match other published figures.
**Special forecast of $12^{\text {th }}$ grade enrollment using Report P105 data or forecast of private schools.
\# Estimated; actual data inaccurate or not available.
Note: Data on private high school graduates estimated after 1969. School year 1994-95 public graduation tabulation corrected from 49,566, a decrease of 1,378 .

${ }^{1}$ These are not unduplicated counts. Reflects applications to multiple schools. Does not include Timber Worker Program. See Table B-9 for original data.
${ }^{2}$ Undergraduates-Other includes former student returning, new professional, new post-baccalaureate new special student, and unknown.
${ }^{3}$ Use estimated numbers for 1997 Professional Student: Applied=157, Admitted=155.
Notes: Some percentage expressions are greater than 100\%. These are due to; 1) "Applied" or "Admitted" may not "Enroll(ed)" in the same class category, 2) Data on "Applied" or "Admitted" may not currently be updated as the "Enrolled" category, or 3) Special "Enrolled" student application data is not updated in the "Applied" or "Admitted" category as done for other class categories. This is true especially for TESC.

Sources: Data for "Applied" and "Admitted" is from institutional Admission Report based on the 10th day of class. For WSU, all data for the "Admitted" is from its "Offered" category except "Graduate". The "Enrolled" data is from HEER Table 10.

* Includes Timber Worker Displacement.
** Includes Technical Colleges, Timber Worker Displacement, and Workforce Training Programs.
*** Includes Technical Colleges, Timber Worker Displacement, Workforce Training Programs, and Private Career Colleges.
Notes: MIS = Management Information System, HEER = Higher Education Enrollment Report, IPEDS = Integrated Post-secondary Education Data System. The discrepancy between the MIS/HEER state report and the IPEDS is due to the following: The MIS/HEER includes only statefunded enrollment. In addition to state-funded enrollments, the IPEDS includes non-state funded (ROTC, faculty, staff and state employees enrolled under the Fee Waiver's Program, etc.) and self-sustaining (contractor supported) enrollments. Also, there are certain public service enrollments in CTC that are defined as state-funded enrollments in MIS but not in IPEDS.

## NOTICE

## REPRODUCTION BASIS

This document is covered by a signed "Reproduction Release (Blanket) form (on file within the ERIC system), encompassing all or classes of documents from its source organization and, therefore, does not require a "Specific Document" Release form.

- 

This document is Federally-funded, or carries its own permission to reproduce, or is otherwise in the public domain and, therefore, may be reproduced by ERIC without a signed Reproduction Release form (either "Specific Document" or "Blanket").

[^0]:    - Points of view or opinions stated in this document do not necessarily represent official OERI position or policy

[^1]:    Notes: Counts shown may duplicate counts in other categories. A student is counted twice if concurrently enrolled in the day and the evening programs. The unduplicated total count is 171,414 not including 308 students in Private Career Colleges (PCC).

    Source: State Board of Community and Technical Colleges-MIS report.

[^2]:    ${ }^{1}$ Final Revised Budgeted Enrollment Level.
    ${ }^{2}$ Includes Timber Worker Displacement program (See Table 3-16).
    ${ }^{3}$ includes Timber Worker Displacement and Workforce Training programs, and Technical Colleges. 1998 includes Private Career Colleges.
    ${ }^{4}$ Figures in parenthesis are for Technical Colleges without Timber Workers or WFT enrollments in TC.

[^3]:    'The Tri-Cities University Center opened in 1958. Beginning 1990, WSU is the program fiscal agent.

[^4]:    *In 1993 1st Special Session Washington Laws: "Each institution shall enroll to its budgeted biennial average FTEs, plus four percent or minus two percent. ...(A)n amount equal to the student quality standard multiplied by the number of FTE Students above or below the variances shall revert to state general fund." This language was removed effective Fiscal Year 1994.

[^5]:    *Independent institutions providing enrollment data for 1996-97 and/or 1997-98 included City University, Gonzaga University, Heritage College, Northwest College, Northwest Indian College, Pacific Lutheran University, Puget Sound Christian College, St. Martin's College, Seattle Pacific University, Seattle University, University of Puget Sound, Walla Walla College, and Whitman College.

[^6]:    *U.S. Department of Education. National Center for Education Statistics. Digest of Education Statistics 1997, NCES 98-015, by Thomas D. Snyder. Washington DC: 1997, Table 203.

[^7]:    ${ }^{1}$ Figures do not add up to corresponding totals. Each figure represents state at approximately 70 percent ranking
    2Includes 2- and 4-year public and 4-year private colleges. Does not include 2 -year private colleges.
