The International Association for the Evaluation of Educational Achievement, known as IEA, is an independent, international consortium of national research institutions and governmental research agencies, with headquarters in Amsterdam. Its primary purpose is to conduct large-scale comparative studies of educational achievement with the aim of gaining more in-depth understanding of the effects of policies and practices within and across systems of education.

## Supplement 2:

# National Adaptations of International Questionnaires

### Overview

This supplement describes national adaptations made to the international version of the International Civic and Citizenship Education Study (ICCS) 2009 questionnaires. This information provides users with a guide to evaluate the availability of internationally comparable data for use in secondary analyses involving the ICCS 2009 questionnaire variables. Questionnaire adaptations include questions that countries were required to adapt, questions that were not administered, and questions that countries modified to suit their national context. National adaptations are presented in six sections corresponding to the ICCS 2009 questionnaire types:

Section 1: School Questionnaire

Section 2: Teacher Questionnaire

Section 3: Student Questionnaire

Section 4: European Module Questionnaire

Section 5: Latin American Module Questionnaire

Section 6: Asian Module Questionnaire

For each question that was adapted, a national entry is included if the version of the question administered in a country was different from the international version. For each question, the following is provided:

- Question number
- Question stem and response options
- Variable name(s)
- National adaptation, listed by country

Each entry is assigned either Code D or Code X representing the following meaning.

Code D: National data for the country are included in the international database. This code is used for questions that are considered comparable to the international version.

Code X: National data for the country are not included in the international database. This code is used for questions that were not administered, not applicable, or deleted for any of several reasons (e.g., not internationally comparable, removed per country request, or removed due to other data problems)
