ABSTRACT
                This resource guide for the marketing education
teacher provides a competency listing, expected student learning
outcomes, and cross-referenced instructional materials by
competencies for supervir y management. The first section discusses
1991 revisions to the Miss ari marketing education core curriculum
for supervisory management. The processes of revalidation of core
competencies and revisions in the core curriculum are outlined. A
competency listing divides the competencies into these areas:
functions of management, study of management, planning, decision
making, controlling, organizing, directing, communications,
motivation, leadership, government regulation, and information
systems and management. Next, a section on competency-based marketing
education covers the instructional mission, the curriculum, the
curriculum alignment, and recordkeeping. the mission, curriculum,
curriculum alignment, and recordkeeping. Other contents include the
expected student learning outcomes based on the core curriculum for
supervisory management; a suggested curriculum model for supervisory
management, with primary focus, for each week in the school year; and
a list of cross-referenced instructional materials by competencies.

1991 REVISIONS TO THE MISSOURI MARKETING EDUCATION CORE CURRICULUM (SUPERVISORY) MANAGEMENT

The Marketing and Cooperative Education section of the Division of Vocational and Adult Education, through a funded project with the Marketing Education program at the University of Missouri-Columbia, established a minimum core curriculum for "Management" as part of the Vocational Instructional Management System (VIMS) implementation in 1984. These were the minimum core competencies that should be utilized in this course in Marketing Education programs on the secondary level.

In order to insure that the secondary programs of Marketing Education are providing up-to-date instruction in the discipline of management, the core competencies were revalidated by marketing instructors and business/industry representatives and appropriate revisions and/or modifications made in the core competencies of the curriculum during the 1990-91 academic year. Revisions and modifications of the core competencies were reviewed by the Missouri Marketing Education Curriculum Team.

Revalidation Process

The following activities were undertaken as part of the revalidation process:

1. Each marketing instructor teaching a course in management completed a survey instrument utilizing a five-point likert scale for each core competency. The likert scale ranged from "very critical" to "not critical" for the assessment of each core competency in the current curriculum. In addition, each marketing instructor was asked to add any additional competencies which they deemed "critical" to the curriculum. Marketing instructors were also asked to indicate the titles of instructional resources that were utilized within the program.

2. Upon completion of the data gathering from the survey, the data was tabulated and presented to the Missouri Marketing Education Curriculum Team for their review. Utilizing the data provided, members of the team made revisions and/or modifications to the core competencies.

3. Following the revisions and/or modifications made by the Missouri Marketing Education Curriculum Team, the "revised" core curriculum was reviewed by a select group of business and industry representatives in marketing for their input and modification.

4. A second survey instrument, based on revisions by business and industry representatives, was completed by marketing instructors teaching a course in management.

5. Upon completion of the second survey, data was tabulated and a focus group was established. The purpose of the focus group was to review the "revised" core curriculum, solicit information concerning instructional resources for the purpose of cross-referencing, and to sort the competencies into topical headings under each major duty band.

6. Once the "revised" core competencies were determined, the project staff "cross-referenced" the core competencies with selected textbooks and resource materials. In addition, expected student learning outcomes were developed for major subdivisions of the core curriculum for Management.

7. The Missouri Marketing Education Curriculum Team conducted a final review of all materials for accuracy and useability and established the "revised" core curriculum for Management.

Revisions in the Core Curriculum

The following revisions were made in the Management Core Curriculum:

1. Tne core competencies were revised to reflect a supervisory level of management rather than a higher management level to more adequately reflect the level of employment of students completing Marketing Education programs.

2. Many of the competencies within the Management core curriculum were reworded and/or modified to provide greater depth in the teaching of the competencies and to reflect current marketing standards. In many instances, competencies were dropped from the listing, but the intent of the content of the competency was included within another competency.

3. Competency numbering schemes were maintained in order to assist those instructors utilizing computerized record keeping and to maintain cross listing of test questions, performance assessment techniques, and Instructional Management Plans orovided to marketing instructors as part of the implementation of the Vocational Instructional Management System process.

L001   Identify federal, state, and local government regulations with which supervisory management should be familiar

M. INFORMATION SYSTEMS AND MANAGEMENT

M001   Differentiate between data processing and management information systems
M002   Analyze the types of data and reports from basic software packages utilized by supervisory managers (i.e. word processing, data-base management systems, and electronic spreadsheets)

COMPETENCY BASED MARKETING EDUCATION

Marketing Education represents a body of instruction focused on marketing, including merchandising and management. It includes multiple instructional programs to meet the education and training needs of youth and adults who have employment or self-employment goals in marketing or have employment goals in another career field and wish to acquire marketing competencies as part of their preparation.

Mission

The mission of marketing education is to develop competent workers in and for the major occupational areas within marketing; assist in the improvement of marketing practices; and build understanding of the range of social and economic responsibilities that accompany the right to engage in marketing in a free enterprise system.

Nature of Marketing

Marketing consists of those activities that make products and services readily available to consumers and businesses. Essentially, marketing is the bridge between production, including the creation of services and ideas, and consumption. Most of these activities are performed by retailers, wholesalers, and businesses providing services. Marketing occupations, however, are found in all types of for-profit business, including those that manufacture products, as well as in not-for-profit organizations.

Curriculum

In broad terms, successful workers in marketing are skilled in the functions of marketing; know how to relate to people; are computer literate and able communicators; reflect a positive work ethic; draw on all of their educational achievements; know their product or service area; and apply economic understandings in a private enterprise system and international commerce.

Based on these desirable competencies for initial employment and upward mobility, the Missouri Marketing Education curriculum framework for instructional content in (Supervisory) Management is as follows:

        *Functions of Management
        *Study of Management
        *Planning
        *Decision Making
        *Controlling
        *Staffing
        *Directing
        *Communications
        *Motivation
        *Leadership
        *Government Regulation
        *Information Systems and Management

Competency Based Instruction

Briefly stated, competencies (objectives), competency-referenced instruction (curriculum content), and competency-referenced assessment (testing/evaluation) are matched or made congruent. The assessment samples the student learning and does not measure anything other than the stated objectives of the program. Students have the opportunity to learn what they are expected to learn and teachers have test data to determine learning.

Curriculum Alignment

The process of proper curriculum alignment involves describing the ends of the Marketing Education program (knowledge, skills, attitudes). Instructional materials, procedures, and activities are then referenced to the learning outcomes. A regular, reliable assessment of learning with respect to expected outcomes is also necessary.

In practical terms, "we should teach students what we expect them to learn, and we should only test students on what they have had an opportunity to learn." This model implies that objectives are derived first; then, instructional resources are outlined for each objective; last, in the sequence, but prior to the beginning of instruction, assessment instruments are constructed to measure the exact objectives outlined and not others.

Objectives. In the rational decision-making model, the objectives are written prior to selection of curriculum materials, instructional methods, and methods of assessment. It is generally recommended that three elements or components be included in a performance (instructional/behavioral) objective:

1. the behavior expected of the student
2. the conditions under which the behavior is to be demonstrated
3. the degree of mastery required.

Textbooks. (Instructional Resources). In the curriculum alignment model, the curriculum content is the middle element, chosen to facilitate the objectives. Practically, the curriculum content is equivalent to the textbook but, since the textbooks are composed by different writers, a match does not always exist. In this case, the teacher has to try to align textbook content with stated objectives and tests.

Testing. The curriculum alignment model assumes a competency-referenced test that is referenced to the identified explicit objectives of the instructional program in marketing. Competency-referenced tests measure each student's achievement against an absolute standard of accomplishment rather than a relative ranking against peers as the norm-referenced test does. If the competency-referenced test is tailor-made to evaluate student progress on specific objectives, after outcomes-referenced teaching, a viable curriculum can exist.

Evaluation. There are four steps associated with evaluation:

Step 1:   Administrating a competency (criterion) test. This may involve a demonstration of a hands-on skill or the taking of a paper-and-pencil test.

Step 2: **Scoring the test.** This requires an assessment of the students' attempts to demonstrate mastery (or competency attainment). This phase of evaluation consists of tallying up the correct responses or scoring student performance and assigning a score based on a rating scale set up for the specific competency which has been observed.

Step 3: **Assessing the results.** This is the instructor's evaluation of student performance with respect to the overall objectives and relative student progress.

Step 4: **Recording student achievement.** This generally refers to a tabulation of the results of the evaluation on a form which can be used as a record of student competency attainment.

Record Keeping (Reporting System). The effective management of an instructional system depends on an accurate record of student performance. Various systems are available for use by the marketing instructor: student profile records, Comp VIMS microcomputer system, mini VAMS system and the VAMS system. A reporting system must be developed to document student outcome measures.

(SUPERVISORY) MANAGEMENT

EXPECTED STUDENT LEARNING OUTCOMES
BASED ON THE CORE CURRICULUM
FOR (SUPERVISORY) MANAGEMENT

Upon completion of the course, (Supervisory) Management, the student will be able to:

Functions of Management

analyze the levels and responsibilities of management

Study of Management

identify the functions of management activities
analyze the types of supervision

Planning

recognize the components of the planning process
define management by objectives

Decision Making

identify employer reward techniques
develop decision-making abilities

Organizing

develop organizational charts
identify specific methods of departmentalization
recognize the importance of supervisory objectives
identify the organizing functions of management

Staffing

utilize systematic employee selection processes
apply appraisal techniques and procedures
develop an appropriate training program for an organization
describe (supervisory) manager's role in staffing decisions

Directing

distinguishing between different types of authority
identify the components of delegation

Communications

analyze the components of managerial communication
apply conflict resolution approaches in given situations

Motivation

develop and evaluate a motivational program
recognize management's role in assisting employees in goal achievement
differentiate between various motivational techniques

Leadership

recognize and differentiate between various models of leadership
identify leadership styles
identify the supervisor's role in discipline of employees
identify the leadership role of management in preventive control measures

Government Regulation

identify government regulations that apply to business

Information Systems and Management

analyze data provided by basic software packages
