ABSTRACT

The National Longitudinal Study (NLS) is periodically querying a large national sample of members of the high school class of 1972 to chart their educational, vocational, and personal development and to relate this information back to earlier experiences, plans, and personal and biographical attributes. The study will provide a better understanding of the growth and development of persons under the American educational system and the factors associated with individual educational and career outcomes. This report presents data obtained from responses to selected items on the First-Followup Questionnaire which was administered in the fall of 1973. The response data was simplified, condensed, and organized for a concise presentation thought to be of general interest to a broad group of policymakers and researchers. Tables are presented, which are comparative profiles of class of 1972 high school graduates 1 and 1/2 years after graduation, on these topics: (1) male-female comparisons; (2) high school program comparisons; (3) racial-ethnic group comparisons; (4) academic ability group comparisons; (5) socioeconomic group comparisons; and (6) regional comparisons. Family status and living conditions in October 1973; plans, values, and attitudes; postsecondary education; and civilian work experiences are the classes of variables included in these tables. The NLS First Follow-Up Questionnaire, Form A, is appended. (Author/BJG)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

FOREWORD

The National Longitudinal Study (NLS) is periodically querying a large national sample of members of the high school class of 1972 to chart their educational, vocational, and personal development and to relate this information back to earlier experiences, plans, and personal and biographical attributes. The NLS is sponsored by the National Center for Education Statistics with support from various elements of the U.S. office of Education that have interests in the long-range effects of educational policy. The study will provide a better understanding of the growth and development of persons under the American educational system and the factors associated with individual educational and career outcomes. Its goal is to furnish a factual basis for verifying and refining Federal policy concerned with maximizing individual access to educational and vocational opportunity, improving the general educational system, and aiding young people to assume a productive, satisfying, and wholesome adult role in society. The secondary purpose is to extend the general scientific knowledge of human development in the important years covering the transition from high school to adult careers.

NLS First Followup Survey data was collected between late October 1973 and April 1974 from over 21,300 persons, a response rate of 93 percent. This report presents preliminary tables summarizing some of the First Followup Survey data.

The tables are provided in this form to make basic information available to educational policymakers and researchers quickly without the delay entailed in preparing conventional statistical analyses and normal publication refinements. Although the data have undergone the standard statistical edit checks, these results may contain unexpected flaws that a higher level of editing and the more thorough publication process usually uncovers and corrects. A finished report containing a complete, detailed tabular summary of First Followup survey data is being prepared for publication with issuance planned for early 1976. A set of analytical reports based on longitudinal investigation of the base-year and first followup data also will be issued beginning in early 1976.

EXPLANATIONS OF THE DATA

These tables form part of the complete National Longitudinal Study (NLS) statistical data base. A set of First-Followup Questionnaire items was selected to highlight some of the more interesting cross-sectional findings of the survey. A detailed report containing these and many other statistics and a series of analytical reports are planned. For information direct inquiries to:

For a facimile of the questionnaire, including directions for completing the form, see the appendix.

The tables contain percentages derived from responses to selected items of the First-Followup Questionnaire shown in the appendix. The responses have been simplified, condensed, and organized for a concise presentation thought to be of general interest to a broad group of policymakers and researchers. Table 1 presents a statistical profile of all persons 1½ years after high school graduation as well as comparisons for males and females. Subsequent tables compare groups of individuals based on their high school program (table 2), race-ethnicity (table 3), academic ability (table 4), socioeconomic background (table 5), and region of country where they attended high school (table 6).

The figures in the tables are national estimates based on a two-stage, deeply stratified probability sample selected from the population of about 3.0 million persons who were high school seniors in spring 1972. The Base-Year Survey was conducted at that time; First-Followup Survey data collection began in late October 1973 and extended through April 1974. Over 21,300 persons participated in the First-Followup Survey—a response rate of 93 percent. (About 99 percent had graduated from high school.)

The survey was conducted by the Research Triangle Institute under contract OEC-0-73-6666 for the National Center for Education Statistics. Dr. Kenneth A. Tabler of NCES was the project officer, Dr. Junius A. Davis of RTI the principal investigator.

NLS computer tapes containing merged base-year/first-followup data also are available, along with a Data File Users Manual, to persons and organizations wishing to do data analyses to meet their own needs.

The estimates contained in the tables are based on a sample survey, hence they are subject to sampling error as well as a variety of types of nonsampling errors that occur in complete censuses as well as sample surveys. The difference

between a statistic estimated from a sample and its corresponding census value occurs due to chance. Sampling or chance variation is measured by the standard error. The chances are 2 out of 3 that an estimate from a sample will differ from the census value by less than one standard error. The standard error does not include the effects of any biases due to nonresponse, measurement error, processing error, or other systematic errors that would occur even in a complete survey. Detailed information on the sizes of the standard errors of the estimated percentages will be presented in subsequent reports. It is safe to assume, however, that the standard error of an estimated percentage is less than 1.0 percentage point except for (1) estimates involving the two minority groups (blacks and Hispanics) and (2) estimates derived from questions that were not asked of every one (e.g., questions that only those going to school were supposed to answer.)

FOOTNOTES TO TABLE ENTRIES

¹ High school program was determined by the survey administrator's answer to the following question.
"Which of the following most clearly describes this student's present course of study?"

- General
- Academic or college preparatory
- Vocational or technical (in six categories)

In cases where the survey administrator did not provide this information, the senior's answer to a similar question was used to determine high school program.

² Race was determined by the subject's answer to the following question:

"How do you describe yourself?"

- | | |
|----------------------------------|------------------------------|
| -American Indian | -Other Latin American origin |
| -Black or Afro-American or Negro | -Oriental or Asian-American |
| -Mexican-American or Chicano | -White or Caucasian |
| -Puerto Rican | -Other |

The category "Hispanic" includes those who answered Mexican-American or Chicano, Puerto Rican, or other Latin American origin.

³ Academic ability was determined from the composite value of test scores in four areas: vocabulary, reading, letter groups, and mathematics. The mean of the four standardized scores served as a general ability index. The terms high, medium, and low ability subgroups refer to subjects in the upper, middle two, and lower quartiles, respectively, of the composite score frequency distribution.

⁴ The SES index is a composite of five components: father's education, mother's education, parents' income, father's occupation, and household items. Each component variable was standardized and then given equal weight in calculating the composite index. The terms high, medium, and low SES subgroups refer to subjects in the upper, middle two, and lower quartiles, respectively, of the composite score frequency distribution.

⁵ The States included in the four Bureau of Census Regions are as follows:

Northeast (Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania).

North Central (Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas).

South (Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas).

West (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, and Hawaii).

⁶ Columns add to more than 100 percent because many persons had planned to be engaged in more than one activity.

⁷ Detail may not add to 100 percent due to rounding.

⁸ Eight occupations each marked by fewer than 5 percent of all persons were combined into a miscellaneous category: farmer or farm manager, laborers, military, operative, proprietor or owner, protective service, sales, and service.

⁹ Calculations exclude persons who marked the response option "no opinion."

¹⁰ Other response options were "somewhat important" and "not important."

¹¹ There were 4 response options: "encouraged," "discouraged," "both," and "neither." The percentage of those who answered "encouraged" is tabulated.

¹²Data collection activities began in late October 1973 and were completed in April 1974. Over 50 percent of all responses were obtained by mid-December 1973.

¹³Other answer options were "neutral or no opinion," "somewhat dissatisfied," and "very dissatisfied."

¹⁴Percentage "very satisfied" or "satisfied." Other answer options were "dissatisfied" and "very dissatisfied."

¹⁵Figures stated are percentages who answered "used and obtained job." Other response options were "never looked or used" and "used but did not obtain job."

II. PLANS, VALUES, AND ATTITUDES—(Continued)			
● Life value (percentages answering "very important"): ¹⁰			
—marriage and family life	86	84	88
—success in line of work	79	82	76
—strong friendships	72	74	71
—steady work	67	75	59
—ability to give children better opportunities than they have had	61	61	60
—leisure time to enjoy own interests	52	57	48
—working to correct social and economic inequalities	19	18	20
—lots of money	12	16	9
—leaving this area of the country	9	9	9
—living close to parents and relatives	9	7	10
—being a community leader	8	10	6
● Encouraged by parents or guardians to do the following things since leaving high school: ¹¹			
—go to college for academic education	60	64	57
—go to school for vocational or technical training	38	38	38
—get job or go to work	59	58	59
—travel or take a break	16	15	18
—get married	7	5	9
—enter Armed Forces	7	10	3
● Encouraged by friends their own age to do the following things since leaving high school: ¹¹			
—go to college for academic education	40	40	41
—go to school for vocational or technical training	23	22	24
—get job or go to work	39	36	41
—travel or take a break	40	43	36
—get married	14	9	18
—enter Armed Forces	4	6	2
III. POSTSECONDARY EDUCATION			
● Had attended some kind of postsecondary school or college since high school	64	64	63
● When surveyed, were taking ¹²			
—vocational or technical courses at any kind of school or college	12	13	12
—academic courses at a 2- or 4-year college	38	40	36
● Type of school attended by those in school Oct. 1973: ⁷			
—vocational, trade, business, or other career training school	11	10	12
—junior or community college (2-year)	28	28	27
—4-year college or university	58	58	59
—other	3	2	3
● Fields of study of those attending school in Oct. 1973: ⁷			
—academic fields			
business	15	21	8
education	13	6	19
social sciences	12	13	12
humanities and fine arts	9	7	12

● Of those enrolled in school in both Oct. 1972 and Oct. 1973 and indicating a field of study, had changed field of study or training area	25	23	26
● Reasons for changing fields of study or training areas between Oct. 1972 and Oct. 1973 (percentage answering "applies to me"):			
—received new information about other fields	52	47	57
—interest aroused by other courses	48	47	50
—more jobs available for graduates in new field	35	33	36
—met people with new ideas	32	29	34
—content of courses differed from what expected	28	28	28
—received poor advice on original choice	24	24	23
—lacked information on jobs in original choice area	21	20	22
—courses were more difficult than expected	21	23	20
● Of those enrolled in school in both Oct. 1972 and Oct. 1973, had changed schools	17	17	17
● Reasons for changing schools between Oct. 1972 and Oct. 1973 (percentage answering "applies to me"):			
—to obtain better career opportunities	48	48	49
—to maximize intellectual and personal development	38	38	39
—interests changed to those not offered by the former school	34	32	36
—could feel more like belonged	26	29	22
—would have more group or social activities of interest	25	26	24
—to attend school closer to home	23	25	21
—to attend less expensive school	20	22	18
—to attend larger school	16	16	16
—to attend school farther from home	12	13	11
—to attend smaller school	11	13	9
—grades too low at former school	7	8	6
● Of those enrolled in school in Oct. 1972, had withdrawn altogether prior to completing training or program of studies	21	21	21
● Reasons for <i>withdrawing altogether</i> from school attended in Oct. 1972 without completing training or program of studies (percentages answering "applies to me"):			
—wanted to get practical experience	26	28	25
—had financial difficulties	24	28	21
—failed or not doing as well as wanted	22	26	17
—offered good job	18	19	18

III. POSTSECONDARY EDUCATION--(Continued)			
• Reasons for <i>withdrawing altogether</i> from school attended in Oct. 1972 without completing training or program of studies (percentages answering "applies to me")--(Continued)			
--school work not relevant to real world	18	19	16
--marriage or marriage plans	14	8	21
--courses too hard	7	8	7
--illness	6	4	8
--family emergency	4	3	4
--homesickness	3	3	4
• Grades in all course work or training since high school: ⁷			
--mostly B or better	54	48	60
--about half B and half C	26	27	24
--mostly C or worse	21	25	16
• Satisfaction with various aspects of education and training since high school (pct. very or somewhat satisfied): ¹³			
--intellectual growth	82	80	83
--development of work skills	76	74	78
--ability, knowledge, and personal characteristics of most teachers	73	72	74
--social life	68	66	70
--amount of money to get along on	58	56	59
• Of those who did <i>not</i> have any postsecondary schooling, the most frequently cited reasons for not continuing their education were:			
--wanted to earn money for myself	66	69	63
--plans did not require more education	42	35	48
--planned to be married	35	22	47
--offered job I wanted	35	36	34
--could not afford 4-year college education	32	33	31
--wanted practical experience first	32	38	26
--needed to earn money before could pay for further education	31	34	29
IV. CIVILIAN WORK EXPERIENCES			
• Had job in Oct. 1973	64	67	61
• Satisfaction with various aspects of Oct. 1973 job: ¹⁴			
--working conditions	81	78	84
--job as whole	78	77	79
--security and permanence	73	70	77
--pay and fringe benefits	69	70	68

OPERATION FOLLOW-UP

NATIONAL LONGITUDINAL STUDY OF THE HIGH SCHOOL CLASS OF 1972

First Follow-Up Questionnaire

Form A

Prepared for the
UNITED STATES OFFICE OF EDUCATION
BY RESEARCH TRIANGLE INSTITUTE □ RESEARCH TRIANGLE PARK, NORTH CAROLINA
FALL 1973

U.S. Office of Education
Department of Health, Education, & Welfare
Washington, D.C. 20202

Dear OPERATION FOLLOW-UP Participant:

More than a year has passed since you first participated in the National Longitudinal Study of the High School Class of 1972. You may remember a questionnaire you filled out during your senior year in high school, in which you were asked about your program and activities, your educational and career plans, and your opinions about many aspects of your life.

We are asking you to participate in OPERATION FOLLOW-UP. The purpose of this follow-up is to find out what has happened to you and other seniors after leaving high school. The fact that you are working, married, in college or vocational school, or starting a family is important not only to you, but also to educational planners and policymakers. Through your completion of this questionnaire, valuable information can be obtained about a very important part of this country's population—young adults who are going through some of the most significant experiences of their lives.

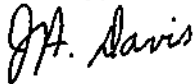

Please take some time and fill out this questionnaire. Let us know what you are doing, what you have done since high school, and what you are planning to do in the next year or so. All of the information that you provide will be absolutely confidential; your name will never be published or associated in any way with your individual answers. If there are questions that you would rather not answer, simply do not answer them.

About the questionnaire: you will not need to answer all sections of it. Begin with Section A and follow the instructions for each question. Your answers will guide you to skip parts which don't apply to you. Please follow all these instructions carefully. Most of the questions can be answered simply by circling the number for the response you choose. In some cases, you are asked to write out your answer to a question.

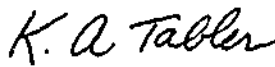

When you complete this questionnaire please return it to us in the enclosed post-paid envelope. We'll be waiting to hear from you.

We will be sending you the results from OPERATION FOLLOW-UP early in 1974. Watch for our OPERATION FOLLOW-UP Newsletters.

Sincerely,

J. A. Davis
