IDENTIFIERS Texas State Technical College

ABSTRACT

A project at Texas State Technical College developed a curriculum to bridge the gap between the competency level of persons who enter college having completed the secondary component of a tech prep program and those who had not. The project used a technical advisory committee, two task forces, and a panel of experts to identify the competency profile of tech prep completers and to create a curriculum based on these competencies. (It was determined that students who had not completed a tech prep program possessed few, if any, of the competencies of those who had completed a tech prep program). The curriculum that was developed focused on competency-based, individualized, self-paced courses for mathematics, writing, and reading courses. Instructors were trained in the unique needs of adult students and the use of course development software. A management system was developed for tracking individual students through the self-paced process. The result of the project is a Bridge Program Quarter that provides concentrated effort to prepare students for college-level work. This quarter enables students to progress through two mathematics courses and two communications courses that move them from basic mathematics to intermediate algebra and from basic writing skills to college-level composition and prepare them to pass a competency test. (The self-paced modules for courses in mathematics, writing, reading, and drafting are included. Modules include a course description, course objectives, course outline, learning activities, assignments, and evaluation criteria. Also included in the report are the competency descriptions, workshop materials, complete project materials, and an annotated bibliography listing 28 references.) (KC)

Executive Summary

A Model Bridge Program for Tech Prep Non-Completers

EXECUTIVE SUMMARY

This project was undertaken to develop curriculum to bridge the gap between the competency level of persons who enter college having completed the secondary component of the Tech Prep program and those who had not. The project activities identified the competency profile of Tech Prep completers. The competencies on this profile were the basis of the curriculum that was developed.

The project was guided and assisted by the expertise of members of the Technical Advisory Committee, two task forces, and a panel of experts. Inservice was provided for instructional staff on teaching adults and the use of software to develop curriculum materials.

The competency profile for completers of Tech Prep secondary component was developed by Task Force 1 from a variety of competency lists. Task Force 2 met to identify the competency profile of non-completers of Tech Prep and determined that a large majority of the persons entering the programs or industries represented on TF-2 had mastered few, if any, of the competencies on the completer's profile. Therefor the "gap" between the attainment of these two groups was virtually the whole competency list.

The competency profile of completers of Tech Prep was then used as the basis for competency-based, individualized, self-paced curricula for mathematics and writing courses. The activities in the curricula were developed for the specific needs of the major programs of study available to students at this site. Instructors were trained in the unique needs of adult students and the use of course development software. A management system was developed for tracking individual students through the self-paced process. Also, technical program courses were identified in which students with limited math and writing skills could be successful.

The result of the project is a Bridge Program Quarter that provides concentrated effort to prepare students for college-level work. This quarter enables students to progress through two mathematics courses and two communications courses which move them from basic mathematics to intermediate algebra and from basic writing skills to college-level composition, and prepare them to pass the TASP test. Part of the Bridge Program Quarter will be at least one program course to provide a connection to the profession for which the student is preparing.

The findings and activities of the project were disseminated at a statewide conference in March.

FINAL REPORT

PURPOSE

The purpose of this project was to develop and validate a model competency-based, non-collegiate-level curriculum designed to prepare non-Tech Prep students for high-priority, advanced-level Tech Prep programs. This project targeted dislocated workers, high school non-graduates, high school graduates who had not completed the secondary component of a Tech Prep program, and other students who entered college without the fundamental competencies needed to be successful at the college level.

Non-Tech Prep students have widely varying knowledge and skill levels. Many of these students are non-traditional in terms of age, economic status, disability, race, sex, etc. They have multiple demands on their time with responsibilities of families, jobs, and college schedules. To meet their needs, it is imperative that where possible, non-college level bridge courses be open-entry/open exit and self-paced. Through the bridge program, these students can enter advanced level Tech Prep programs at community and technical colleges.

PROJECT IMPLEMENTATION

GOAL I: CREATE AND USE A TECHNICAL ADVISORY COMMITTEE.

Objective I-A: Create the TAC

Technical Advisory Committee, TAC, members were selected with the intent to provide guidance and resource information. The members were selected from Tech Prep practitioners, vocational and technical educators from both secondary and post-secondary levels, business and industry, Quality Work Force Planning, and Councils of Government. The list of TAC members is in Appendix B-1.

Objective I-B: Use the TAC

The TAC met in October 6, 1993 to review the proposal and suggest resources and activities to meet the goals. At this meeting, the TAC determined they preferred written progress reports, to which they could respond, rather than quarterly committee meetings. Progress reports were sent in November, December, March, and April. They included copies of resource materials used by the Task Forces and the Panel of Experts, copies of any documents developed by the Task Forces, evaluations done by the Panel of Experts, and meeting notes, as well as, a report on the activities of the director. A final meeting of the TAC was held in May. Copies of the Quarterly Report to the Texas Higher Education Coordinating Board were sent to TAC members in October, January, April, and July. Copies of these reports are in Appendix A-2.

GOAL II: CONDUCT A DISCREPANCY ANALYSIS OF TECHNICAL, ACADEMIC, AND WORK PLACE BASIC KNOWLEDGE AND SKILLS TO DEVELOP A MODEL NON-COLLEGIATE-LEVEL, COMPETENCY-BASED CURRICULA

Objective II-A: Review Literature

Literature for review was identified through ERIC search and through resources suggested by Tech Prep practitioners, Texas educators, and other contacts throughout the duration of the project. The Project Director was experienced in competency-based, individualized, self-paced instruction at the high school level, but not in the Texas education system nor the recent progress of the Tech Prep program. Therefore, materials chosen for review, and identified in the bibliography, reflect a search for knowledge in those areas.

Objective II-B: Develop a criterion-referenced profile of competency achievement for completers of secondary Tech Prep programs

A Task Force, TF-1, composed of professionals from secondary and post-secondary institutions, adult educators, industrial experts, and Tech Prep practitioners identified the competency profile for completers of secondary Tech Prep programs. A list of Task Force members are in Appendix B-2.

A variety of competency lists were obtained from various sources; i.e. TEA Essential Elements, Vernon Regional Junior College, courseware developers and publishers, and other technical/vocational education institutions; were used as resources to select the competencies to be included in the profile.

The competency profiles were developed for mathematics, communication, and drafting. These profiles were reviewed by the TAC members, business/industry representatives, and instructors of academic and technical programs at TSTC-ETC. Bridge Program instructors who have used the profiles, have further clarified and expanded them into practical, workable documents. These competency profiles are part of the curriculum materials in Appendix E.

Objective II-C: Develop a profile of competency achievement for a typical non-completer of secondary Tech Prep programs

A second Task Force, TF-2, composed of persons representing adult educators, industry persons involved in hiring and training, and post-secondary counselors and developmental studies instructors met to identify the competency profile of students who had not completed the secondary component of Tech Prep. A list of Task Force members are in Appendix B-3.

This Task Force reviewed the competency profile developed by TF-1. The initial response by most members was that persons they take into their courses, programs, or job sites, have mastered few, if any, of the competencies on the profile. After discussion, they held firm to their conviction of the lack of significant competency mastery within the target population. Therefore, the competency profile of noncompleters was virtually blank. Members of both Task Forces stressed the need to teach basic math, writing, and reading skills; that with these skills, workers can learn the technical information needed on the job. Also stressed was the need to consider basic computer skills to be just as fundamental as math and English.

Following the Task Force meeting, and feeling there was more to the picture of incoming students than this finding indicated, some investigation was made by the project staff as to the results of placement tests used by various colleges and the data collected at the state level on the TASP test. According to this data as much as 40 to 60 percent of students entering college are underprepared to work at the college level and have remediation needs ranging from learning or relearning, the basics, to just brushing up on skills previously learned.

Objective II-D: Determine the gap in achievement between completers and non-completers of secondary Tech Prep programs

Activity II-D-1: Compare the competency profile of completers with the competency profile of non-completers.

The proposal called for a Panel of Experts composed of members of both Task Forces to identify competencies where a significant gap exists between the achievement levels for secondary Tech Prep completers and non-completers. This meeting of the Panel of Experts was not held because of TF-2 identified the "gap" as virtually all of the competencies on the profile. This change in grant activities was discussed with the THECB staff member assigned to this grant.

Activity II-D-2: Develop course syllabi for leveling and bridge courses.

Project staff led the Pre-Technical Studies instructional staff at TSTC-ETC in developing and refining the syllabi for courses designed for competency-based, individualized, self-paced instruction of all of the courses in the department. These included: Basic Mathematics, Beginning Algebra, Intermediate Algebra, Occupational Mathematics, Reading Improvement 2 and 3, Writing Skills 1 and 2, and TASP preparation courses.

The Pre-Technical Studies department faculty developed competency-based courses by dividing the competency profile list into courses as described in the Catalog. Performance standards and instructional activities were identified for each competency and instructional plans aligned to competencies were processed through the use of Course Developer software provided by Doug Goodgame of Ed Tech. Separate competency profiles were identified for each course and used to document the competencies mastered by the end of the course. In these courses, students work individually and at their own pace. Every effort is made to enable the students to complete the course within the time constraints of the quarter term. Those who accelerate through the material, are encouraged to

continue into the work of the next course. Those who do not master the competencies identified for the course, are given grades of incomplete and continue their efforts during the next quarter until all are mastered. A change of grade form is then completed and the student gets credit for completing the course. This flexibility allows students who need only to refresh their understanding of the material the opportunity to accelerate the remediation portion of their activities.

Competency-based education as used in the Bridge program, was planned around three major components: First, goal must be known and agreed upon, next, the current status must be identified and accepted, and then the process of attaining mastery and reaching the goal must be clearly, presented and understood.

In building the Bridge Program, these components were considered through the following activities:

The Goal. The goal of the student in the Bridge Program, is success in the technical courses in his/her major program. To customize the Bridge Program for specific core technology programs, the competency profile of completers of Tech Prep secondary programs was reviewed by instructors in the technical programs available at this site. Any competencies not on the profile, identified as important by the instructor for entry level students were added to the competency profile. The ultimate goal of the students is to become employed in the advanced and emerging technology work place. Therefore, input of persons from business and industry was also solicited. Recognizing that incoming students need to experience some link to their personal reason for being in college, the project staff worked closely with technical course instructors to identify program courses students with limited basic skills could successfully undertake. These courses were then linked to the Bridge Program. These program courses, are listed as follows in Appendix E, Math F-1, Writing F-2.

Current Competency Status. The current status of the student's competency profile was determined by pre-tests. Also considered was the student's educational experiences, learning style, and confidence level. Following the pre-test, student/instructor conferences ensured that the student had a clear understanding of his current status and the process necessary to attain the competency profile needed for his choice of program. Technical program areas are currently developing assessment tools to administer to incoming students which will identify students needing remediation prior to entering the program courses.

Path to Attaining Competency Profile. It is important that the student be cognizant of the level of competency required to reach the goal. Many competency-based programs develop learning modules for each competency. Given the constraints of time and resources, it was determined, for this project, to develop a clear path for student through the resources currently available. To accomplish this, the assignment for each competency or group of competencies was clearly identified. The student knew what competency was being taught, on exactly what page, in which text, or which lesson on a computer program, how mastery is to be demonstrated, and what level of mastery is required. Where possible, specific needs of specific programs were considered. For example, the set of competencies for measurement skills will be used in different ways with different programs. Therefore, a different set of measurement assignments and applications was developed for students in each of the six major program options at this site.

To integrate these courses and to provide maximum exposure for students entering college at the lower skill levels, a schedule was developed to immerse the student in the Bridge Program experience.

Our goal is to provide concentrated exposure of sufficient length to ensure learning. These students will attend math and English courses two hours a day, five days a week. Along with the immersion block of courses, students can be registered in at least one major program course from the list of those identified as requiring minimum basic skills. This program is to be implemented in the Fall 1994 quarter.

The project staff has worked with faculty advisors/instructors from all program areas at this site to develop remediation plans for entering remediation students at all levels of basic skills. Faculty advisors have course schedule plans for students entering at three levels of math skills and two levels of English skills. Technical program courses that are at high school level, but earn college credit are included in these schedules. Curriculum resources are in the following appendices: Math F-1, Writing F-2, Reading F-2, Drafting F-3.

GOAL III: FIELD TEST THE MODEL CURRICULUM

The field test, a trial use of the curriculum in the operational setting, was to focus on five aspects of quality: effectiveness, efficiency, acceptability, practicality, and generalizability. Members of the Technical Advisory Committee were surveyed by phone to determine which courses to field test. They chose Beginning Algebra and Writing Skills II.

Objective III-A: Conduct Field Test

The Bridge Program was field tested at TSTC-East Texas Center in Marshall in the Pre-Technical Studies department. The staff of the department included one full-time English instructor, one full-time and one part-time math instructor. The part-time math instructor was also an instructor in the Plant Engineering Technology program. There were some realities of this site that precluded using student progress comparisons for evaluation. The courses in this department have been individualized and self-paced since the institution began classes in the Fall of 1992. Therefore, comparisons of pre-post test results between individualized and traditional classes were not available. Comparison of the relative merits of individualized and traditional modes of delivery was made by instructors who had previously taught in traditional classrooms. The number of students in the field test was limited by the total number enrolled in specific courses. All sections of each course were included in the field test. Because most of these students had previously taken remediation classes here, the student responses may reflect experiences in all classes they had taken in the Pre-Technical Studies department, not just those used for field testing. The major differences in the field test quarter were in the use of competency profiles and improved assignment plans.

Field Test Procedures:

Develop course competency profile.

The first step was to develop course objectives from the competency profile. This process involved courses currently available in the TSTC, Waco/Marshall, Course Catalog. Competency profiles for math and communications were divided into course sections based upon the Catalog's course descriptions. Each course competency profile was evaluated with the following considerations: all competencies needed for success in major program courses were identified; evaluations made of relevancy to business and industry; and to meet TASP objectives.

Identify resources available.

A matrix was developed to identify the appropriate resources for each competency from the computer lessons and/or texts available. This identified the applicable material on hand and indicated those competencies for which resources still needed to be found.

Develop instructional path.

Assignment Completion Records were developed that clearly state the specific text or computer program, page number, lesson number, and exercises, and/or applications to be completed by the student. Where applicable, these are specific for the major technical program of the student. Course Progress Records are simply a list of units completed and grades earned on unit tests to provide documentation for grade reports. They provide an immediate, current "snap shot" of the students progress through the course.

Evaluate each student's needs, develop individual study plan.

The results of placement tests administered to each student upon entry determined the initial course placement. Within the course, a diagnostic pre-test was given each student to document competencies

previously mastered. An individual study plan was developed based on results of the diagnostic pre-test and considering the student's TASP responsibilities. The plans were reviewed with the students and amended where students' information indicated. Each student must be clear as to exactly what was to be expected for this course; ie what competencies were to be mastered and how to proceed to mastery, the preferred time frame, the acceleration or deceleration options available as applicable. The instructors' responsibilities were to facilitate, encourage, prod, and whatever else was needed to maintain the student's progress through the course.

Provide Instruction

The competency profiles for English and mathematics encompass the whole spectrum of competencies for each subject area. Diagnostic pre-tests given the first day of class documented the starting level of mastery and identified the specific competencies needed and thus specific assignments to be completed.

The instruction mode was an individualized, self-paced process through text or computer software assignments designed for the student's specific major program of study. When appropriate, concepts were introduced through lecture, following which, students completed assignments at their own pace, getting help from the instructor as needed. The instructor was a facilitator of learning and worked one-on-one with students as needed. Class size was limited to twenty, to allow sufficient time for personal attention. Upon completion of assignments for the group of competencies that comprise a unit, the unit post test was given.

Students were encouraged to accelerate through the material - or allowed move through it more slowly if necessary. Accelerated students who completed all assignments for the course in which they were registered, were encouraged to continue into the next course in the sequence. Students who required more than the term's expected time frame received an incomplete and continued their efforts the next quarter.

Complete student's personal Competency Profile

This is a seamless Competency Profile for the whole spectrum of competencies for the subject (math or writing). After post-testing by units, each student's personal profile was updated. Post-testing by course was done for the purpose of the field test, but not for competency documentation.

EVALUATIONS

Field Test Evaluation by Focus Areas

The project proposal called for the field test evaluation to focus on the following aspects of quality: effectiveness, efficiency, acceptability, practicality, and generalizability.

Effectiveness

Each student's needs were clearly identified and addressed in an individualized study plan. The students understood the process and proceeded at his own pace through the assignments. This is more effective with the objectiveness of mathematics than it is with the more subjective writing, and reading courses. Instructor survey results support the effectiveness of competency-based, individualized education for the following reasons: effective and efficient use of student's time, decreased fear of failure, acceleration or deceleration possibilities (flexibility), and enhancement of students sense of responsibility toward learning. A significant number of students passed the TASP test on their first attempt after remediation.

Efficiency

This is an especially efficient education delivery mode through which to address the needs of a relatively low number of students with a wide range of remediation needs. It allows students of varying skill levels to be concurrently guided to competency mastery in one classroom. This is especially true for the Basic Mathematic through Beginning Algebra courses, including Occupational Mathematics. It is a labor intensive method of instruction. A low instructor to student ratio is required to permit the

individual interactions. However, if retention rates are increased students are more successful in college-level courses, and graduates are better prepared, the efficiency will increase.

Acceptability

The Pre-Technical Studies department at TSTC-East Texas Center was organized on an individualized, self-paced basis at its inception in the Fall of 1992. The department instructors, all new employees this year, successfully adapted to the process. The idea of competency-based education is not clearly understood or accepted by many faculty at the college level, although Tech Prep activities and Carl Perkins grant directives are making them more familiar with it. Students, accustomed to a more spoon-fed approach of having the instructor tell them what they need to know, have to learn to be more self-reliant, taking more responsibility for their own learning. Competency-based practices in the classroom were well-accepted by students just needing to brush up on concepts already learned and by students who were more mature and used to being responsible for themselves. Instructor and student survey results are in Appendix D.

Practicality

Texas State Technical College- East Texas Center at Marshall adapted to the realities of self-paced learning requirements regarding flexible timing. The results of allowing students to master only needed competencies, rather than going over material already learned because it is in the course outline, and of allowing students to work at their own pace, were that some students accelerated through the requirements for the course in which they are registered, others worked through the required material in the usual amount of time, and still others needed more than the weeks defined by the term to complete the course. Students who completed early were encouraged to continue into the next course where possible. Those who did not complete within the term's time frame were given incompletes and were allowed to finish the course the next quarter--or later. For example, one student, for whom learning math is a slow process, has used three quarters

to complete the basic mathematics course and will need another three quarters to complete an occupational mathematics course. However, he has done well in the other courses in his program and will have a good understanding of math, and a certificate, where as in a traditional system he would have probably failed and dropped out by the end of the second quarter. There are more incompletes than in a traditional program, with "failures" only for students who did not meet the attendance, and/or effort requirements.

Generalizability

Competency-based, individualized, self-paced learning can be fairly easily instituted in any program willing to take the time to carefully prepare. The mechanics of the process and activities are adaptable...people often are reluctant. Care must be given to prepare for change and for understanding and acceptance of a different instructor/student relationship. Instructors need to have good interpersonal communication skills, be flexible, have a strong sense of responsibility, and excellent organization management skills. The instructor's role is more of a facilitator of learning than an importer of knowledge.

Product Evaluations

The project proposal called for the following product evaluations:
General formative evaluation was by the Technical Advisory Committee. The TAC met in October and reviewed the negotiated budget and evaluated the goals, objectives and activities. TAC members requested written progress reports rather than quarterly meetings. Names of Task Force members and copies of the packet of resources to be used by the task forces were submitted to TAC members and meeting notes of the Task Force meetings were sent to each TAC member. As little feedback was received, positive evaluation was assumed.

Other products were approved as follows, as directed by the proposal:

TAC membership, approved by Project Administrator

Quality and quantity of TAC meetings, approved by Project Administrator, supported by minutes of meetings and progress reports.

Annotated bibliography, approved by Panel of Experts at the meeting on April 13, 1994, and the TAC at the meeting on May 12, 1994.

Competency profile for Tech Prep completers, approved by Panel of Experts and TAC at above named meetings.

Competency profile for non-completers, as determined by Task Force 2, is virtually empty and the "gap" as virtually the entire spectrum of competencies in the completers' profile. This finding was accepted by the Panel of Experts and the TAC.

Field Test procedures, results, conclusions, and recommendations were evaluated by the Project Director. Analysis of pre-post test data indicated significant increase in mastery of basic skills. Competency Profiles of individual students documented mastery of specific competencies. The survey results from students and technical faculty were positive, and the responses of the Pre-Technical Studies' instructors supported continuance of the competency-based, individualized, self-paced instructional mode for the courses tested. Survey responses and instructor responses are in Appendix D.

Statewide dissemination was accomplished at a Presentation at the Texas State Tech-Prep conference on March 30, 1994. Participant survey responses indicated satisfactory responses. Presentation outline and survey results are in Appendix C-1.

Results

Through the efforts of this project, competency profiles that reflect attainments of persons who have completed the secondary component of Tech Prep have been identified for mathematics, writing, reading, and

rafting. Curricula was developed to address the mathematics and writing needs of students who have not mastered these competencies. Integration activities with instructors of technical courses resulted in assignments and activities in these courses tailored to meet the competency requirements for the specific program of study the student has chosen. Competency-based, individualized materials were developed for Basic Mathematics, Beginning Algebra, Introductory Algebra, Intermediate Algebra, Mathematics, Writing Skills I, and Writing Skills II. Competencies were established and some curriculum development was done for reading and drafting.

These materials are in Appendix F.

Recognizing the need for a quarter dedicated to basic skills improvement, a new configuration of courses will be offered 1994 Fall Quarter. This Bridge Program Quarter will provide a daily sustained effort to remediate the lower level students. It is designed to immerse them in mathematics and communication skill building activities for four hours daily. In response to the recommendations of business and industry, a beginning keyboarding course will be part of this remediation core.

Realizing the need for students to be working toward and involved in their chosen program, cooperative efforts with instructors of technical courses identified courses in each program that could be successfully undertaken by students with limited math and/or communication skills. This has resulted in scheduling packets for faculty advisors to enable them to better advise underprepared students and to enhance the student's opportunity for success. These courses, along with the remediation courses taken through immersion or the regular schedule, comprise the Bridge Program Quarter. Bridge Program information is in Appendix E.

Conclusions

Competency-based, individualized, self-paced learning is especially compatible with remediation activities at the college level. It recognizes the uniqueness of each student and accepts him as he is and helps him to go on

with dignity. The personal attention available to each student helps to overcome fear and embarrassment and fosters advancement. It is helpful for those who are able to accelerate as they recall concepts previously learned. More rewarding, it provides the student who must re-learn expanded time and attention necessary for success. Competency-based learning is especially effective for re-entry students, men and women who are returning to college for various reasons. Often layoff or divorce adds to their concerns and impacts their powers of concentration. These students are keenly aware of their lack of skills and the need for these skills in the work place. They accept the need for remediation and are willing to give time and personal attention to the effort.

Difficulties

The difficulties that occurred centered around those students most recently out of high school, who do not, as yet, fully accept their personal responsibility for their education. They come from a system where the teacher tell them what they need to know so they are not adept at learning. These students often do not use their time wisely because they see no immediate repercussions to their lack of progress. When they do not learn the expected material, they report it is because the instructor did not present it in a lecture. Older students, especially those who have been in the work force, more readily accept the responsibility for learning and understand the need to know.

Print and media resources are readily available; more difficult to find are activities to demonstrate application of knowledge. This will be the focus of the Pre-Technical Studies department's continuing effort to build the Bridge Program. The required concepts do not vary much from one technical program to another, but the ways in which the concepts are used differ considerably. Students, especially those with low basic skills, need to know the "why" of what they are trying to learn to be able to better grasp the "what".

The decision was made in consultation with the TAC to have the dissemination workshop at the statewide Tech Prep practitioners conference. The Tech Prep - Texas State Conference was held March 28-30 in San Antonio. The Bridge to Technology presentation was at 8:30am to 9:30pm on Wednesday, March 30 to 35-40 attendees. The following areas of the project were covered:

- An overview of the grant project
- Explanation of the process used to identify the competencies.
- Overview of competency-based education
- Development of courses from list of competencies
- Management system for student progress records.

The presentation evaluation survey indicated the following responses by those in attendance. On a rating scale of 1 being highest and 5 being lowest rating, these responses resulted:

1. The presentation was well organized. Avg. 2.4
2. The information presented was concise and understandable. Avg. 2.5
3. The handouts were pertinent and helpful. Avg. 1.8
4. Your program can use this information. Avg. 2.1

Half of the written comments received indicated it was difficult to hear because of the noise level from the adjoining room and the lack of a microphone. Half of the remaining comments reflected negative response to information being read to them. The presentation had opened with a reading of an overview of the Tech Prep program at the college site. Presentation outline and survey results are in Appendix C.

recommendations

Go for it. It's worth the effort. Competency-based, individualized, self-paced education is one of the most effective ways to help people rebuild their basic skills.

This mode of delivery is different and does not fit the picture people have of how "school" is to be from their own personal experiences. Therefore, these recommendations are offered:

Prepare for change. Recognize the differences and accept that preparation is needed. Involve all the stakeholders in the change process: instructors, faculty advisors, lab assistants, administrators, students, etc.

Spend some time with the stakeholders determining exactly what they need/want to do, then work toward a curriculum plan you can adapt to fit their needs.

Develop institution-wide support of the effort. Educate the faculty to the idea and the processes. Their understanding is necessary for their acceptance of the Bridge Program as an important and integral part of their own programs.

The realities of today's incoming students' lack of basic skills and knowledge mandates an effective remediation program for the continued success of the college. Give the remediation program, whether it be the Bridge Program or another process, the attention, support and respect due a department charged with preparing students to learn at the college level. Back-up the efforts of the remediation department to maintain high levels of competency for advancement into college courses. The more effective the remediation program is, the more ready the student is to learn. This should result in better prepared students and higher retention rates, graduates, and enhance the institution's ability to provide workers prepared for the emerging advanced, high-tech jobs that industry offers.

Nobles, Diane. Learning to Work: Career Pathway. Texas State Technical College-East Texas Center, Marshall, Texas 1994. A counselors guide to Tech-Prep in manufacturing Technologies.

Parnell, Dale. The Neglected Majority. Community College Press, Washington DC, 1985. Emphasizes the need for integration of learning with work, leisure time, citizenship "across life's experience as well as throughout life's adventure." Points out necessity of meeting the student at the point of his or her "learner" needs. Proposes strategies of coordination and cooperation between high schools and colleges that evolved into the Tech-Prep program. Dale Parnell is currently a professor of English at Oregon State University, Corvallis, Oregon. 503-737-0123.

*Project Synergy: Software-Support for Underprepared Students. Year Three Report. Miami-Dade Community College, Miami, 1993. Development of a system for researching, evaluating, and integrating computer software to raise basic skills levels. Identifies competency lists for mathematics, reading, and writing. Teachers of remediation classes nationwide evaluated software in use as to instructional mode, the topics, content attributes, meeting faculty needs, meeting student needs, and attributes of software implementation (1990-1994). In process of developing an integrated computerized management system using an holistic approach (1992-1997). Also developing bank of items for mastery testing. Addresses process of change needed to develop environment for computer-based learning that requires instructors to focus more on learning than teaching, to think of individual students rather than groups of students, to perceive themselves as facilitators of learning rather than givers of information. Reviews available on Internet through IKE. The project Synergy data base, called PS³ is available on IKE (IBM Kiosk for Education), an electronic bulletin board and

database developed and operated by the University of Washington accessible and accusable by Internet. For further information call the ISAAC office at (206)543-5604 between 8am and 4:30pm. Pacific time, or via E-mail at ike@ike.engr.washington.edu, or write to ISAAC Access, m/s FC-06, U of W, Seattle, Wa, 98195. If you access IKE and would like to see the projects software reviews, choose DATABASES at the main menu. Then choose Software Reviews(Project Synergy) then type in one or more search words. TEXAS HIGHER EDUCATION COORDINATING BOARD
GRANT APPLICATION
PROGRAM YEAR 1993 - 1994

ABSTRACT PAGE

CB Category: **TECH-PREP, Category 1700-D, Non-collegiate-level academic and technical leveling or bridge courses for Tech-Prep non-completers.**

Facilitator: Texas State Technical College--East Texas Center at Marshall (TSTC-ETC).

Funding: 75,000.

Staffing: Full-time project director and half-time project secretary.

Our educational system at all levels has been criticized by government, business, and industry leaders for producing graduates that lack the knowledge and skills required in today's workplace. The workplace not only requires technical skills. The workplace requires greater knowledge of academic subject matter (English, science, and mathematics) and workplace basic skills (SCANS and TQM) as well.

The Tech-Prep initiative has great potential for providing workplace relevant knowledge and skills to both secondary and postsecondary graduates. Tech-prep, however, lacks a model competency-based curriculum targeting displaced workers, high school non-completers, and high school graduates not completing a Tech-Prep sequence of courses. Such a model curriculum is needed to prepare non-Tech-Prep students for entry into high-priority, advanced-level Tech-Prep programs at community and technical colleges.

The purpose, therefore, of the proposed project is to develop and validate a model competency-based, non-collegiate-level curriculum designed to prepare non-Tech-Prep students for high-priority, advanced-level Tech-Prep programs.

Goal I: Create and use a technical advisory committee (TAC) composed of: (a) vocational-technical administrators, counselors, and instructors from both local education agencies (LEAs) and postsecondary institutions (PSIs), and (b) representatives of councils of government (COGs), business, and industry.

Goal II: Conduct a discrepancy analysis of technical, academic, and workplace basic knowledge and skills to develop a model non-collegiate-level, competency-based curricula to bridge the gap between Tech-Prep non-completers and the entry requirements of high-priority, advanced-level Tech-Prep programs at community and technical colleges

Goal III: Field test the model curriculum to determine appropriateness of selected curriculum resources and make recommendations for further development.

The proposed project will be conducted in conjunction with the Deep East Texas, East Texas, Northeast Texas Tech-Prep Consortia, Quality Work Force Planning Committees, and Councils of Government, and the Texas Employment Commission. The project results will be disseminated statewide. If the proposed project is funded, TSTC-ETC at Marshall will provide up to \$50,000 for curriculum resources selected for field testing.

1st QUARTER REPORT

Institution Name: Texas State Technical College
East Texas Center, Marshall

Project Name: Collegiate-Level Academic and Technical Leveling or
Bridge Courses for Tech-Prep Non-Completers Project #44170028
Fice Code: 003634 Appropriation: \$ 73,3000

1. An advisory committee meeting is required no later than the first quarter and as needed to meet the goals of the project. Please provide the date of Advisory Committee Meeting(s) during the current quarter.
The Technical Advisory Committee met on Oct. 6, 1993
2. Comment on the project's progress (to date) on the achievement of goals/objectives in terms of the stated performance measures (Refer to Operational format, Part F).
Goal I: TAC formed and meet--completed
Goal II, Objective II--A Literature review--continuing
Objective II-B Competency profile of TP Completers--in process
Objective II-C Competency profile of Non-Completers--just begun
3. Identify anticipated goals/objectives not achieved during the current quarter.
Goal II, Objectives II-B was to have been completed by end of third month.
Projected completion- end of fourth month.
4. List any problems or obstacles to successful completion of the project which were identified during this quarter.
Not a problem--a suggested change of focus emerged from discussions at TAC meeting. Instead of focusing on development of extended syllabi for courses, it would be more useful to focus on identification of gap in competencies of completers to that of non-completers of Tech-Prep and creation of a process to aid others in developing/adapting courses to address the identified gap. This would result in extended syllabi for 2 courses rather than "courses".
5. Describe how the problems or obstacles are being addressed.
By concentrating more effort on development of gap identification.
6. Describe assistance requested from Staff Advisor and /or Federal Projects staff.
Staff Advisor, Mr. Ron Curry, attended the TAC meeting on 10-6-93.
He contributed ideas, suggested resources, and helped to clarify goals.

Ann Lewis
Project Director

2nd QUARTER REPORT

Institution Name: Texas State Technical College
East Texas Center, Marshall

Project Name: Collegiate-Level Academic and Technical Leveling or
Bridge Courses for Tech-Prep Non-Completers Project #44170028
Fice Code: 003634 Appropriation: \$ 73,300.00

1. An advisory committee meeting is required no later than the first quarter and as needed to meet the goals of the project. Please provide the date of Advisory Committee Meeting(s) during the current quarter.
The Technical Advisory Committee requested, in lieu of meetings, regular written updates on activities to which they would respond. Updates mailed to TAC members in November and December.
2. Comment on the project's progress (to date) on the achievement of goals/objectives in terms of the stated performance measures (Refer to Operational format, Part F).
Obj. I Tech. Adv. Com. complete. Obj. II.b&c Competency Profiles, Completer and Non-Completer complete
Obj. IIa literature search, continuing.
Obj. IIc gap in competency profiles identified.
3. Identify anticipated goals/objectives not achieved during the current quarter.
Second quarter goals and objectives were met.
4. List any problems or obstacles to successful completion of the project which were identified during this quarter.
Panel of experts comprised of both Task Forces was to meet Jan. 26 to identify the gap between completers and non-completers competency profiles. The Non-Completer Task Force determined entry-level students/workers have few, if any, of the listed competencies. Thus the gap was identified as the entire completer's competency profile. I feel the non-completer's profile can be more clearly defined.
5. Describe how the problems or obstacles are being addressed.
The TAC was informed of the stated problem in an update and will consider this at the 3rd quarter meeting. I am currently researching placement tests at technical and community colleges and JTPA programs to identify statistical information for possible use in clarifying this gap.
6. Describe assistance requested from Staff Advisor and /or Federal Projects staff.
Requested of Ron Curry:
1. authorization to move some money from project directors salary to that of clerk to enable hiring clerk full time for 3/4 of the project year. Approved
2. authorization to postpone Panel of Experts meeting until after TAC has met.
Approved

Ron Curry
Project Director

TECHNICAL ADVISORY COMMITTEE

AGENDA

October 6, 1993

Materials needed:

- List of Committee members
- Project Outline
- Extra copies of first 22 pages of proposal

Introductions

John Carnes

Ann Lewis

- Pertinent background information

- Committee members (distribute list)

- Correct any erroneous information on list

- Any additions recommended?

Overview of Project

- Form Technical Advisory Committee

- Conduct discrepancy analysis

- Literature search

- Tech-Prep Completer's profile

- Non-completer of Tech-Prep profile

- Identify gaps

- Develop course curriculum

- Design course syllabi

- Determine courses to develop

- Develop selected courses

- Field Test

- Disseminate findings (statewide)

Completed

- TAC identified

In Progress

- Literature search

- Identification of other resources (persons/places)

TECH-PREP BRIDGE PROJECT

TECHNICAL ADVISORY COMMITTEE

Meeting Notes

10-06-93

South Padre Island

The following adaptations, suggestions, changes were recommended at this meeting of the TAC:

Definitions:

Competency-Based: Recognize that in some cases, though self-paced, individualized delivery system is desirable, the constraints of semester and quarter systems impose end time considerations.

Non-collegiate: Use term "Bridge" and define it. Courses may be "non-collegiate", but result in credits not to be counted toward a degree.

High Priority approved, post secondary level Tech-Prep Programs: defined as post secondary portion of Tech-Prep educational plans.

Education plan includes attention to barriers, such as child care and transportation, and counseling needs. (Student services)

In addition to developmental courses, include for consideration those courses such as Principles of Technology that have been added at the high school level and were not available to students in high school earlier.

TAC

TAC Members

Add: Jo Huffman
Curriculum Coordinator
Deep East Texas Tech-Prep Consortium
PO Box 1768
Lufkin, TX 75902
409-633-5307 FX 639-4299

Resource Persons

Task forces possibilities etc.
Seek out doers instead of writers.

Sandra Evert; Loraine, Ohio. Has created Bridge program for dislocated workers.

CORD helped Alabama with Bridge program. "Transformations"
David England; McLennans CC, VP of Research and Development.
Dissertation on Bridge courses.

Kay Grasby; Greenwood Tech, SC. Tech transfer and Pre-Tech.
Works with industry training and retraining.

T J Aspland: (Tech-Prep high school grad) Has been promoted several times. Not time to go on to college.
JTPA teacher from exemplary program. Check with TJC
Dr. Linda Watkins, ABE and Aubrey Sharp, JTPA
Jan S (?) and Al Dias; Temple CC, Silver Bridge (name of program may have changed).
Wesley Campbell; TJC
Frank Mitten; Crocket, developmental algebra
Barbara Flornoy; Angleina College, reading specialist
Kathy Gillispi; Austin
Stan Addleman; Amarillo College

Re future TAC meetings. Prefer frequent updates in writing to which can respond via phone or fax. Interaction without formal meetings.

Literature Review: Look for doers not writers--in industry, military, labor. (review material and contacts from last Fall in pursuit of JSEP) B. Russell has contact at Ft. Hood.

COMPLETER PROFILE

Information resources

Association of Building Contractors has national competency based courses.
Check on exit exams or competency lists
Skills certifications, Dept. exams
TASP Objectives and skills
TSTC Sweetwater--End of high school test for competency-based program. Computer applications exams
Challenge exams for tech occupation courses
Read the 30 reports (TP?) for commonalities of curriculum--go into specific curriculum areas such as electronics.
B. Russell coordination JTPA/GED/ABE bridges--goal Dec. 13

NON-COMPLETERS PROFILE

Establish entry level points and referral systems for those not at entry level. (JTPA, GED, Literacy)
Tap teaching knowledge of DVS instructors.
Ask of business and industry what is it about non-completers that makes them unemployable.
Identify range of profile, then identify part of range to be addressed by this project. (see first item in this section)
Phone survey of TP Directors (25) to determining who has Bridge programs already in place or forming one.
Compare entry placement testing at CC/TC...Amarillo TSTC, Amarillo College (Stan Addleman, researcher at AC.)

TASK FORCES

50% from business and industry. Seek persons who could describe

prospective employees that would be valued by employers.
Look at all aspects of industry.
When hold meetings, be careful all persons feel their ideas are valued. Persons with more education or "presence" can easily intimidate others.
ASTD studies, work-place basics

IDENTIFY GAP

Chart: Vision (completer) Status (non-completer) Gap Action
Timeline

Assessment important--include work experience evaluation by employer--applied tasks--course exams.

Panel of Experts: invite everyone on task forces

COURSES

Have work-based learning component
Computer skills specific to program--Word Perfect not best for all.
Not end up with just a rehash of currently used courses
Implementation may be 2-3 years down the road
Define Tech-Prep Bridge to give Tech-Prep something to give to community colleges to take to support agencies.
Consider need for "quick" reading comprehension upgrade.

Concerns.

Professional Development for CC/TC instructors in SCANS, Applied learning, etc.
Deans to identify PD needs, encourage/require staff to participate

END RESULTS

Look for ways to market product to fund continued efforts.
Coorelate, fold-in, with School-To-Work ideas.
Colleges want something to take to Coordinating Board to support course funding requests.
Student and instructors evaluate courses two years after start-up.

FOCUS

A model to develop courses linked to competency statements and levels.
Generate general average competency differences.
Expanded syllabi (syllabi to delivery system) for 1-2 specific programs.
Each Tech-Prep Consortium should be able o take the identified competency gap and use it to evaluate, adapt, develop their own courses.

DISSEMINATION

Progress report at Spring meeting.
School-to-work/Tech-Prep meetings
Consider brochure and video.

**TECHNICAL ADVISORY COMMITTEE
C. PERKINS DISCRETIONARY GRANT: BRIDGE PROGRAM
May 12, 1994**

Meeting Agenda

"The TAC will meet a total of four times, The initial meeting will provide approval of negotiated budgets, goals, objectives, and activities.

The overall goal of this first meeting is project installation."

Met on October 6, 1993 at Corpus Christi

"The second and third meetings will involve the TAC in approval of all project participants and processes (formative evaluation)."

Decision at time of initial TAC meeting was to have the Project Director mail written progress reports to each TAC member. TAC members would then send to the Project Director their comments, suggestions, recommendations. Progress reports were sent on October 11, February 5, April 15, and copies of official Quarterly Reports on October 15, January 15, and April 15.

"The fourth meeting will seek TAC input concerning the project products (summative evaluation)."

At the conclusion of the project period, the TAC will make recommendations for the future including need to seek continuation funding.

Evaluation Plan To be considered today:

TAC listed as evaluator of:

1. Annotated Bibliography. Quantitative review
2. Competency profile for completers. Quatitive review
3. Profile of competency achievement for a typical non-completer. Quantitative review.
4. Competencies where a gap exists between the two groups. Quantitative review.

Field Testing

Competency Profiles: Reading, Writing, Mathematics, Drafting
Resource Lists

Course materials

Syllabi

Goals and objectives

Course outline

Performance Standards

Project Product

Two copies of each product draft must be provided to the Coordinating Board by **February 7, 1994** for approval prior to printing the final project. After approval, the contractor must submit twenty copies of the final product(s)

Propose developing a "how to" book describing the process involved in creating this Bridge Program.

Final Report

The final report will include a one -page executive summary and a detailed narrative report describing activities and accomplishments. Ten copies of the final report must be provided to the Coordinating Board by August 15, 1994. Also due with the final report are any products or processes described as deliverable in the contract. This report will include data from July 1, 1993 through June 30, 1994

Dear

I appreciate very much your willingness to help with the Task Force for identifying the competency profile of completers of secondary component of Tech Prep. This Task force will meet twice. The first meeting will be on November 18, 1993 at the University of Texas in Tyler, in room 423 of the Muntz Library, from 9am to 4pm. Enclosed you will find a map UT Tyler.

Another Task Force will meet in December to compile a profile of non-completers of secondary Tech Prep programs. The two Task Forces in the grant will meet together as a Panel of Experts in January. The date and place of this meeting is not yet determined.

A summary of parts of the grant proposals and a compilation of competencies are also included in this packet. The grant summary will give you a clearer picture of the project and where your fit into the total project.

Task Force - Completers
November 18, 1993

Dear Mr. Smith:

These are the competency profiles for mathematics, communications, and drafting that were developed by the Task Force of which you were a part. Please review these lists carefully and determine if there are items to be added, items you feel should be deleted, any changes needed in the way competencies are stated- anything you think will improve these competency profiles. Mark any suggested changes on the pages I have sent and return them to me by Jan. 10, if possible.

Thank you again for sharing your time and expertise with this Task Force. I am looking forward to seeing you at the Panel of Experts meeting in Jan. 26.

Sincerely,

Ann Lewis, Director

Longview, TX 75606

Dear Mr. Denson

I want to thank you for your participation in the Task Force that met in Tyler last Thursday. Your willingness to give of your time and share your knowledge and ideas is much appreciated. The competencies you helped to identify will be compiled and you will be sent a copy of the ones you worked with. I welcome any further additions or changes you may want to suggest at that time.

I am looking forward to the joint meeting of the two Task Forces as a Panel of Experts on January 26, 1994. This meeting will be to look at the results of the previous activities and identify the gap in the competencies attained by completers and non-completers of the Tech Prep secondary component.

Sincerely,

Ann Lewis

Ms. Jo Huffman
Deep East Texas Tech-Prep Consortium
P.O. Box 1768
Lufkin, TX 75902

Dear Ms. Huffman:

I appreciate very much your willingness to help with the Task Force for identifying the competency profile of non-completers of the Tech-Prep high school component. This Task Force will meet twice. The first meeting will be on December 12, 1993 at the University of Texas in Tyler, in room 426 of the Muntz Library from 9:00 a.m. to 4:00 p.m.

Enclosed you will find a map of UT Tyler that will show the location of the Library. If you park in lot # 10 on Campus Drive, you will enter the Library on the second floor. There are stairs and elevators near the circulation desk. If you take the elevator, turn right when you exit it and go through the double doors. If you use the stairs, as you reach the fourth floor, the double doors are facing you. Room 426 will be off the corridor behind the double doors.

Another Task Force has met and compiled competency profiles for completers of the Tech-Prep high school component. On January 26, the members of these two Task Forces will convene as a Panel of Experts to identify the gap in competency attainment of these two groups of students.

I am also including a summary of parts of the grant proposal so you will have a clear picture of the project and where this activity fits into the total project.

Again, thank you for being part of this project!

Sincerely,

Ann Lewis, Director

UT Tyler, Muntz Library

MEETING NOTES

Reviewed Process:

Outlined scope of project
Described focus of today's activities

Introduction- Name and background that relates to today's activities. This was a group of persons from diverse areas of involvement with skills levels of persons entering college or workplace.

Two were Human Resource people in industry.
One worked with JTPA clients.
One with dislocated workers.
Two college remediation instructors.
One developer of training for industry.

They shared the frustrations and realities of working with persons who were educationally and socially unprepared for the step they were taking (job ap., college enrollment, and job training). Though the frame of reference from which they worked was different, the commonalities of their experience and concerns was evident.

Evaluated Non-Completers attainment of Completers Competencies

1. Described process through which competency list was developed.
2. Each considered the attainment of these competencies by persons entering into their job site or institution.
3. Divided into two groups- one to consider math, one to consider communications.
Actuality- both groups considered communications. One group also considered math.

General Response- "Our people can't do any of these." Further reflection identified a few that some persons could do, but felt the majority could do few if any. Perhaps because they felt there was little they could do with a competency profile list, the discussions kept reverting to sharing of personal experiences and observations of the needs of the non-completers.

Response to CP Activity

Basically majority of students lack all competencies listed.

Math- most handle whole numbers.

Don't have concept of decimals. Even if can work problems.

Thiokol people TABE results average 8th grade math. Many persons had learned to rely on calculators to do even simple math(TABE allowed no calculators, cause of concern for test takers)

Discussion:

Centered around need for interaction of business/industry and education entities. Educators- feel they have educated the students; hand them over to business. Business needs to be involved in the education and education need to experience business use of skills.

Example- need of math to do Statistical Process Control. Need of keyboarding skills to do data input at workstation level.

Business- educators exchange/shadowing. Some type of reciprocals hands on experience.

Include TQM- importance of knowing how to work as a team(orientation).

Student needs to get a clearer perception of how skills and education is used on the job.
TEACH TEAMWORK, TEAMWORK, TEAMWORK!

WRAP Up:

Because of the direction the discussions look and the seeming lack of connectedness of the competency profile idea, I decided to come to closure through a round robin summing up of what value this experience might have had for each of the TF participants.

Velma- felt more like an observer gathering ideas of what's needed. Excited to be here and be a part of this effort. Her job entails setting ed. program in place to meet specific, contracted need of industry and of coordinating testing activities.

Ruana- encourage industry persons to be involved in education. Actively recruit/gather in industry persons. Find ways to foster conception/preception of what job entails for students. Deal with self perception/low self-esteem-thinking people are born with knowledge, so if don't know it, can't learn it.

Cheryl- get a newly hired person to share with students what he/she feels they need to know, but haven't learned yet. Keyboarding skills should be considered a new required basic skill.

Claudia- suggests I go to Lone Star Steel to see their culture/environment. Computer terminals are part of all work areas- data is input by workers at the site, not by secretary. Keyboarding skills necessary for all workers. Computer literacy = usability, not history and bytes. For Tech-Prep to be successful, needs to get into the home. Parents need to realize it's not voc. ed., but it is "technical". Need to get past "it was good enough for me(or my dad), it's good enough for my kid(self)". Colleges need to get Tech Prep brochures to industrial sites to share with employees as parents of prospective students. LS has basic ed, GED prep, program for workers and community. Encourage all non-grad applicants to come there and study for GED. Can take small groups only on tours. Can split classroom size groups into more than one small group per tour. Consider flexible timing for education opportunities for shift workers. (We can help here at Pre-tech level.)

Al- time is now for tech-prep. Need to combine schools, industry, society. Involve society to inform people of options. Many who want to be doctors and make a lot of money have not considered time and expense of training. What will happen if they don't make it? What are the options along the way? HS students looking at next step usually don't consider job demand market or amount of money you make from what you do. Take away stigma of voc. ed./Tech. prep and move toward today's industry(jobs) and today's money market.

Velma- look at telecommunication linkage possibilities(to interface industry/education). Use video of industrial experience with live industry person to facilitate follow up discussion.

Jim Leather- Tap into Chambers of Commerce experts. Boss' message to TF- teach TQM.Basic English and Math. Can pick up slack in tech knowledge through on the job training.

Dear Ms. Henderson:

I want to thank you again for your participation on the Task Force activities for the Carl Perkins Bridge Project and to let you know that the January 26 joint meeting of the two Task Forces will not be held.

The purpose of the joint meeting of the Task Force to identify the competency profile of completers of the secondary (high school) component of Tech Prep and the Task Force to identify the competency profile of non-completers of this part of Tech Prep was to look at the differences and identify the gap in the competency profiles of the two groups.

The Task Force for non-completers determined that the majority of persons entering their program or facility had attained few, if any, of the competencies on the profile identified by the completers's Task Force. This identified the gap in the competency levels of the two groups as basically the whole list and give us the information we need to go forward with the project's curriculum development activities.

I realize this is a very wordy letter. So, to put it more clearly, you have done your work so well, you have already accomplished what the joint meeting was to have done.

Thanks again for your valuable contributions! I will probably be contacting you again to get your input on curriculum development ideas.

Sincerely,

Ann Lewis, Director
Tech-Prep Bridge Project

MEETING NOTES
PANEL OF EXPERTS
UT TYLER

4-13-94

The Panel of Experts is composed of the members of the two task forces that worked on the Competency Profiles. This composition was recommended by the TAC at the initial meeting in September, 1993, (at the TAPSOEA meeting at South Padre Island).

Four of the eighteen persons on these two task forces attended this meeting: Ruana Sullivan, counselor, Clyde Ford, college science instructor, Cori Stanley, remedial English instructor, and Claudia Henderson, industry manager of workplace training.

The purpose of this meeting was the quantitative evaluation of: 1) the Competency Profile for completers of the secondary component of the Tech-Prep program, 2) the competency profile of non-completers of the secondary component of the Tech-Prep program, and 3) the identification of the competencies in the gap between the two competency profiles.

Members of the Panel evaluated the Competency Profile of completers of the secondary component of Tech-Prep as sufficiently comprehensive in scope. They identified some poorly worded phrases and typos. They discussed general vs detailed competencies but did not suggest any specific changes. Most of the competencies are in general concept terms requiring simplification into sub-competencies (objectives, sub-objectives).

The Task Force that was responsible for determining the competency profile of non-completers, used the completers competency profile as a starting point and considered which of these competencies would have been mastered by persons entering their training center, workplace, or college. Their response was that few, if any, of the competencies on the completers' competency profile had been mastered by persons they have entering their programs or workplace. Therefore, the competency profile of non-completers is blank, no specific competencies consistently mastered. The Panel of Experts agreed that this is a valid finding. Evaluation: the scope and comprehensiveness of this "non" profile represented the true picture from the perspective of this Panel.

The members of the Panel agreed that this established the gap in the two competency profiles as all of the competencies on the completer's competency profile. At this site, TSTC-ETC, the college placement tests indicate that about 50% of the incoming students need remediation. Perhaps the majority of the persons on the non-completers task force were the front-line educators for those needing remediation. In some ways, the difference is academic because an effective Bridge Program will need to provide

learning opportunities for the whole spectrum of the Competency Profile in order to meet the needs of students entering at the lower levels.

The following products, developed in the process of preparing to use the competency profiles in field test classes, were shared with the members of the Panel of Experts:

- Model Bridge Curriculum Plan (graphic)
- Matrix that identified core secondary courses
- List of possible secondary school courses to include

- Competency list to course development process
 - Competency Profile check lists
 - Competency-resource matrix
 - Specific course:
 - Syllabus
 - Objectives, Sub-objectives of course
 - Course outline
 - Sample of Competency Standard of Mastery

My thoughts:

With all of the above, the prevailing mood was one of "pie in the sky" -- if they only really knew how to read and do math, we could teach them what we need them to know. It takes being tough and unpopular to create valid expectations and then hold the line against advancement until standards are met.

CALL FOR PROPOSALS

Texas Tech Prep Conference
March 28-30, 1994
Red Lion Hotel
Austin, Texas

DEADLINE: November 30, 1993

The Professional Development Committee is searching for presenters for the statewide Tech Prep conference to be held March 28-30. In order to have as much input as possible, please provide the committee with as many presenters/presentations as possible from your area. All presenters will participate without remuneration. Each consortium or presenter will be responsible for the travel and presentation costs incurred.

Focus : The focus of the conference will be to show off the best programs in the state which highlight Tech Prep, Work Force Development, Apprenticeships, School-to-Work Transition, etc. Presenters should be from business as well as secondary and post secondary education. It is also suggested that some students talk about what they are getting out of Tech Prep. We are looking at a variety of presentations in a number of innovative formats (small group, large groups, demonstrations, interactive, etc.).

Bridge to Technology
Title of Presentation

Ann Lewis
Name of Contact Person/Major Presenter

Name(s) of Other Presenters

Length of Presentation 1/2 to 1 hr.

Address of Contact PO Box 1269, Marshall, TX 75671

903-935-1010
Phone Number of Contact

903-935-9554
FAX Number of Contact

Projected Audience: Teachers Business People Administrators
 Counselors Tech Prep Coordinators

Audio-Visual Equipment: _____
(Overhead projectors and screens will be provided at no charge. Other equipment will be charged directly to the consortium or presenter)

Please provide any other information which you think would help the committee make a decision to include this presentation in the Conference agenda.

To share preliminary findings of the Perkins Tech-Prep Bridge Grant activities that identified the gap in competencies between completers and non-completers of Tech-Prep secondary components.

PRESENTATION DESCRIPTION FORM

Education that Works Conference.
Red Lion Hotel, Austin, Texas
March 28-30, 1994

(Note: This form will be used to collect information to be printed in the conference proceedings. A copy of the conference proceedings will be provided to each registered participant. Please make certain that all information is complete and correct. The information must be returned by March 1.)

Title of Presentation: BRIDGE TO TECHNOLOGY

Name(s) and Affiliations of Presenters

(e.g., John Doe, Principal, Jane Smith High School):

1. Dr. John Carnes, Associate Dean of Instruction, Texas State Technical College
 2. Ann Lewis, Director of Pre-Technical Studies, TSTC - East Texas Center
 3. Diane S. Nobles, Director of Technical Preparation, TSTC - East Texas Center
- College Full Name → 4. Texas State Technical College - East Texas Center in Marshall

BRIDGE PROJECT PRESENTATION

OUTLINE

Overview of Grant project ---- CBE process being field tested
Bridge Project Outline--Ann Lewis

Result of Carl Perkins TP supplementary grant
I. Objectives of Grant

A. Tech. Adv. Committee

B. Identify comps. to be addresses in Bridge Program

-- Establish competency profile of completers of
TP hs component

-- Establish competency profile of non-completers

-- Determine gap

C. Develop model non-collegiate-level curricula to bridge the gap
between Tech-Prep non-completers and the entry requirements of
Tech Prep programs at community and technical colleges.

-- competency-based

-- open-entry, self-paced to extent possible

D. 1. Field test the model curriculum

determine appropriateness of curriculum resources

2. Make recommendations for further development

E. Statewide dissemination--this workshop

IDENTIFY COMPETENCIES TO BE INCLUDED IN BRIDGE PROGRAM

Task Forces

Task Forces composed of technical, academic, and workplace basic skills
educators from community and technical colleges, regional education service
centers, public schools, industry.

A. Task Force I: to identify competency profile of completer

1. Resources:

-- Essential Elements (9-12)

-- Competency lists from existing programs

-- Program needs

-- Workplace expectations.

2. Process: teams of Task Force members

-- Evaluated resource info.

-- Created competency lists for Reading, Writing,
Math, and Drafting.

-- Considered sciences, did not complete
competency lists.

3. Results: Reading, writing, math, drafting
competency profiles of TP completers of HS programs.

- B. Task Force II: To identify competency profile of non-completer.
1. Resource: Competency Profiles from TF I
TF members experience as educators
 2. Process: teams of Task Force members
 - Considered completer profile competencies
 - Identified those not usually attained by persons who enter their school, program, or workplace.
 3. Results: Determination that the GAP was essentially the whole Competency profile

Approximately 50-60% incoming students need remed.

Findings of Task Force activities:

An effective bridge program must be prepared for the whole range of remediation courses.
competency-based
open entry/ self-paced/ open exit

IV. Competency-Based Education

Duty-Task, task = comps; Units-Lessons, lesson = competency
Define: A performance-based process leading to demonstrated mastery of identified skills necessary for the individual to function proficiently at the next (college) level.

Know where going--goal
Know how to get there--plan
Know when "arrived"--mastery

1. Known Goal:

Competency Profile. Know where you are headed.

- A. Competencies for learning unit are carefully identified
- B. All concerned know what these competencies are
employer, instructor, STUDENT
- C. Standards for mastery are clearly stated and openly shared

Know how to get there

Personal Education Plan:

- A. Determine students current level of competency mastery
 1. Pre-test to document prior learning or achievement
 2. Note mastered competencies on Competency Profile

- B. Identify curriculum resources (learning modules) for each competency
 - 1. Focus of learning process is transfer of knowledge, application

Know when you "arrive"

Document mastery of individual competencies mastered.

- 1. Application of concept demonstrates mastery
- 2. Competency Profile indicates mastery

V. Competency Profile to Course

- (1) A. Identify competencies to be addressed in course
 - 1. Competency profile of TP completers
 - Spectrum of profile
- (2) 2. Divide into course segments
- (3) 3. Consider specific competency needs for entry into specific program courses.
 - Work with staff of program area, ex. chem tech
 - Identify competencies on list that are needed for entry level students of first quarter courses.
 - Identify competencies not on the list that are needed for entry level students of first quarter courses.
- (4) B. Develop course syllabus and outline
(Process) Using competency profile selected for the course
 - 1. Divide competencies into units of study
 - Develop each competency statement into an instructional objective, considering:
 - competency to be attained.
 - learning domain (cognitive, psychomotor, affective)
 - (5) 2. Determine assessment method (knowledge, written, performance based)
 - (6) 3. Identify standard for mastery
- C. Identify instructional curriculum resources
 - Match competencies with instructional resources
 - 1. Evaluate current resources for addressing specific competencies.

TSTC-ETC (Matrix)

- (a) Computer-based instruction
 - (1) JSEP: Developed by the Army
 - TSTC-ETC named beta test site
 - Largest computer-based basic skills prog developed for adults
 - Job Specific, Prescriptive
 - (2) Skills Bank, review of basic skills

- (3) Queue Algebra, Math topics, Grammar
- (4) Text publisher's software support
- (b) Print material: Texts, handouts, etc instructional resources.
- 2. Identify competencies with insufficient instructional resources
- 3. Fill the resource gaps
- 4. Develop unit assignments that address competencies

CBE Curriculum/Student Management -- suggestions

Management tools (Paper-based, can be computer generated with appropriate software)

A. Individual students' Course Competency Profile:

- 1. Competency Profile: competencies to be mastered in each course.
- 2. Each competency mastered is noted
- 3. At end of course, not only grade, but what actually has demonstrated as mastered or not mastered. (Learn. disab. -- drafting)

B. Assignment Completion Record:

- 1. List of assignments to be done for each unit.
- 2. Assignments reflect resources for the competency and are specific as to text or computer (lesson, page, number of problems)
- 3. All pertinent information is provided to enable the student to progress through the unit at his/her own pace, getting help from instructor as needed

C. Course progress record:

- 1. List of all units to be completed for the course.
- 2. Provides compact status record
- 3. Can be used to record unit post test scores

Process:

- A. Pre-test: identifies competencies already mastered
- B. Course progress record indicates units previously mastered and those yet to be completed.
- C. Assignment completion record needed only for units not mastered
- D. Post-test (course final)

Bridge To Technology
Carl Perkins Tech Prep
Supplementary Grant

Handouts & overheads

Objectives of Grant

I. Identify comps. to be addresses in Bridge Program

- **Establish competency profile
of completers of TP high
school component**
- **Establish competency profile
of non-completers**
- **Determine gap**

II. Develop model non-collegiate- level curricula to bridge the gap

III. Field test the model curriculum Make recommendations for further development

IV. Statewide dissemination --this workshop

Competency-Based Education

Define: A performance-based process leading to demonstrated mastery of identified skills necessary for the individual to function proficiently at the next level.

Three Basic Parts

- 1. Known Goal: Competency profile.
Competencies for learning unit
are carefully identified**
- 2. Know what you have to do:
Personal Education Plan
Document prior knowledge**
- 3. Know When You Get There:
Document competencies mastered.**

Competency Profile -- Course

- 1. Identify competencies addressed in course from Competency Profile**
- 2. Divide into course segments**
- 3. Work with staff of program area**
- 4. Develop course outline**
Divide competencies into units of study

- 5. Develop each competency statement into instructional objective**

- 6. Identify standard for mastery**
 - Criterion referenced to known standards.**

Match Competencies to Resources

- **Identify instructional curriculum resources**
- **Identify competencies with Insufficient instructional resources**
- **Fill the resource gaps**
- **Develop unit assignments that address competencies**

Management Tools

Individualized

Course Competency Profile:

- **Lists competencies to be mastered in each course.**

Assignment Completion Record:

- **List of assignments to be done for each unit.**

Course Progress Record:

- **Record of course units completed**

CBE PROGRAM CHARACTERISTICS

- Program goals are agreed upon by representatives of the community, employers, the agency staff, and the participants concerned.
- The process for placing, monitoring, and certifying participant competency parallels the program's goals and in an integral part of program planning.
- Individualization of instruction is based on participant or learners needs as indicated by pre/post testing of competency attainment and are not on what others in a group are achieving.
- Instruction is frequently developed in modules and sometimes packaged in developmental sequences.
- Instructional strategies teach course concepts and basic skills through their application in a functional context that is relevant to the learner's goals.
- Because assessment, placement, and instruction are integrated components of CBE, it is essential that agency personnel responsible for management, guidance and instruction work closely together as a team.

PROGRAM COMPONENTS OF COMPETENCY-BASED AND NON-COMPETENCY-BASED PROGRAMS

Program Components	Competency-Based Programs	Non-Competency-Based Program
Desired outcomes	Specific, measurable statements; typically at an objective level	Non-specific, not necessarily measurable; typically general statements
Instructional content	Outcome or competency based	Subject-matter based
Amount of time provided for instruction	Continue until participant demonstrates mastery	Fixed units of time (e.g. semester, term)
Mode of instruction	Emphasis on instructor as facilitator of participant performance. Uses a variety of instructional techniques and groups	Emphasis on instructor presentation
Focus of instruction	What the participant needs to learn (especially related to employability and employment)	What instructor is able to teach
Instructional materials	Variety of texts and media based on the various learning styles of the participants in the program	Single sources of material (Text and/or workbook)
Feedback on performance	Results reported immediately after performance in understandable terms to the participant	Delayed feedback
Pace of instruction	Paced to each individual's rate of learning	Instructor or group paced
Testing	Criterion(competency) referenced-test measures participants' progress toward attaining intended outcomes	Norm referenced-based relative performance of
Exit Criteria	Participant demonstrates the specified competencies	Final tests and grades

COURSE: ENGL.010 WRITING SKILLS I
DEPARTMENT: ENGL PRE-TECH ENGLISH

SEQ. NO.	G/O NUMBER	TITLE
	E010.01.01	Demonstrate knowledge of proper verb usage.
		SUB-OBJ. NUMBER TITLE
	E010.01.01.01	Recognize action and linking verbs.
	E010.01.01.02	Identify helping verbs.
	E010.01.01.03	Identify and correctly use the principal parts of verbs, both regular and irregular.
	E010.01.01.04	Generate sentences using identified verb type.
	E010.01.02	Demonstrate knowledge and proper use of adjectives and adverbs.
		SUB-OBJ. NUMBER TITLE
	E010.01.02.01	Identify the function of adjectives and adverbs in a sentence.
	E010.01.02.02	Differentiate between adjectives and adverbs.
	E010.01.02.03	Use the comparison process for adjectives and adverbs.
	E010.01.02.04	Generate sentences using adjectives and adverbs.
	E010.01.03	Demonstrate proper use of verbal and prepositional phrases.
		SUB-OBJ. NUMBER TITLE
	E010.01.03.01	Define a phrase.
	E010.01.03.02	Identify the prepositional phrase and its function in a sentence.
	E010.01.03.03	Identify the verbal phrase and its function in a sentence.
	E010.01.03.04	Generate sentences using verbal and prepositional phrases.
	E010.01.04	Demonstrate understanding of subject-verb agreement.
		SUB-OBJ. NUMBER TITLE
	E010.01.04.01	Identify correct subject-verb agreement by applying practical methods of sentence

TO: Presenters at Texas Tech Prep Conference
FROM: Doris Sharp *DS*
SUBJECT: KUDOS TO YOU!!

Thanks and kudos to each of you for your presentations at the first annual state Tech Prep Conference! Your willingness to serve, coupled with your great presentations, helped to make this the successful conference that it was.

Dr. Kenneth Ashworth's comments are attached. He felt the same way that most of the 1,300 attendees did.

Also attached is information on presenting at the AVA National Conference in December in Dallas. Hope some of you will consider it!

If you haven't turned in all of your outstanding expenses, please contact Gayle Ferrell. She'll get you taken care of!

Earle Ann, Gayle, and I appreciate you.

 - 1. Helpful Responses
 - 2. Unhelpful Responses
 - 3. Pitfalls

COMPETENCIES FOR THE ROLE OF ADULT EDUCATOR/TRAINER

Name _____

Program _____

Indicate on the six-point scale below the level of each competency required for performing the particular role you plan to engage in by placing an "R" at an appropriate point. Then indicate your present level of development of each competency by placing a "P" at the appropriate point. For example, if you plan to make your career in teaching, you might rate required competencies as a learning facilitator as high and as a program developer and administrator as low to moderate; whereas if you plan a career as a college administrator, you might rate the competencies as a learning facilitator as moderate and as a program developer and administrator as high. (Blanks have been provided at the end of this section for the learners to add competencies of their own.)

Essential Competencies

Competency Scale

As a Learning Facilitator

A. Regarding the conceptual and theoretical framework of adult learning:

1. Ability to describe and apply modern concepts and research findings regarding the needs, interests, motivations, capacities,

BEST COPY AVAILABLE

0 1 2 3 4

Ability to describe the differences in assumptions about youths and adults as learners and the implications of these differences for teaching.

0 1 2 3 4 5

Ability to assess the effects of forces impinging on learners from the larger environment (groups, organizations, cultures) and manipulate them constructively.

0 1 2 3 4 5

Ability to describe the various theories of learning and assess their relevance to particular adult learning situations.

0 1 2 3 4 5

Ability to conceptualize and explain the role of teacher as a facilitator and resource person for self-directed learners.

0 1 2 3 4 5

6.

0 1 2 3 4 5

Regarding the designing and implementing of learning experiences:

1. Ability to describe the difference between a content plan and a process design.

0 1 2 3 4 5

2. Ability to design learning experiences for accomplishing a variety of purposes that take into account individual differences among learners.

0 1 2 3 4 5

3. Ability to engineer a physical and psychological climate of

0 1 2 3 4 5

- 4. Ability to establish a warm, empathic, facilitative relationship with learners of all sorts. 0 1 2 3 4
- 5. Ability to engage learners responsibly in self-diagnosis of needs for learning. 0 1 2 3 4
- 6. Ability to engage learners in formulating objectives that are meaningful to them. 0 1 2 3 4
- 7. Ability to involve learners in the planning, conducting, and evaluating of learning activities appropriately. 0 1 2 3 4

C. Regarding helping learners become self-directing:

- 1. Ability to explain the conceptual difference between didactic instruction and self-directed learning. 0 1 2 3 4
- 2. Ability to design and conduct one-hour, three-hour, one-day, and three-day learning experiences to develop the skills of self-directed learning. 0 1 2 3 4
- 3. Ability to model the role of self-directed learning in your own behavior. 0 1 2 3 4
- 4. 0 1 2 3 4

D. Regarding the selection of methods, techniques, and materials:

- 1. Ability to describe the range of 0 1 2 3 4

BEST COPY AVAILABLE

Essential Competencies

Competency Scale

2. Ability to describe the range of techniques available for facilitating learning.

0 1 2 3 4 5

3. Ability to identify the range of materials available as resources for learning.

0 1 2 3 4 5

4. Ability to provide a rationale for selecting a particular method, technique, or material for achieving particular educational objectives.

0 1 2 3 4 5

5. Ability to evaluate various methods, techniques, and materials as to their effectiveness in achieving particular educational outcomes.

0 1 2 3 4 5

6. Ability to develop and manage procedures for the construction of models of competency.

0 1 2 3 4 5

7. Ability to construct and use tools and procedures for assessing competency-development needs.

0 1 2 3 4 5

8. Ability to use a wide variety of presentation methods effectively.

0 1 2 3 4 5

9. Ability to use a wide variety of experiential and simulation methods effectively.

0 1 2 3 4 5

10. Ability to use audience-participation methods effectively.

0 1 2 3 4 5

11. Ability to use group dynamics and small-group discussion techniques effectively.

0 1 2 3 4 5

12. Ability to invent new techniques to fit new situations.

0 1 2 3 4

13. Ability to evaluate learning outcomes and processes and select or construct appropriate

0 1 2 3 4

14. Ability to confront new situations with confidence and a high tolerance for ambiguity.	0	1	2	3	4
15.	0	1	2	3	4

As a Program Developer

A. Regarding the planning process:

1. Ability to describe and implement the basic steps (e.g., climate setting, needs assessment, formulation of program objectives, program design, program execution, and evaluation) that undergird the planning process in adult education.	0	1	2	3	4
2. Ability to involve representatives of client systems appropriately in the planning process.	0	1	2	3	4
3. Ability to develop and use instruments and procedures for assessing the needs of individuals, organizations, and subpopulations in social systems.	0	1	2	3	4
4. Ability to use systems-analysis strategies in program planning.	0	1	2	3	4
5.	0	1	2	3	4

B. Regarding the designing and operating of programs:

1. Ability to construct a wide variety of program designs to meet

mental education, supervisory and management development, organizational development, etc.).

2. Ability to design programs with a creative variety of formats, activities, schedules, resources, and evaluative procedures.

0 1 2 3 4 5

3. Ability to use needs assessments, census data, organizational records, surveys, etc., in adapting programs to specific needs and clientele.

0 1 2 3 4 5

4. Ability to use planning mechanisms, such as advisory councils, committees, task forces, etc., effectively.

0 1 2 3 4 5

5. Ability to develop and carry out a plan for program evaluation that will satisfy the requirements of institutional accountability and provide for program improvement.

0 1 2 3 4 5

6.

0 1 2 3 4 5

As an Administrator

A. Regarding organizational development and maintenance:

1. Ability to describe and apply theories and research findings about organizational behavior, management, and renewal.

0 1 2 3 4 5

2. Ability to formulate a personal philosophy of administration

Blocks to Effective Communication

1. Ordering, directing, commanding--telling the other person to do something; giving him/her a command.
2. Warning; admonishing, threatening. Telling the other person what consequences will occur if she/he does something; alluding to use of your power.
3. Moralizing, preaching. Telling another person what she/he ought to do.
4. Advising, giving suggestions or solutions. Telling the other person how to solve a problem, giving him/her advice or suggestions, providing answers or solutions.
5. Lecturing, teaching (this is not referring to a classroom situation), giving logical arguments. Trying to influence the other person with facts, counter-arguments, logic, information, or your own opinions.
6. Judging, criticizing, disagreeing, blaming. A negative judgment of your own opinions.
7. Praising (flattery), offering a positive judgment.
8. Name-calling, ridiculing, shaming. Making the other person feel foolish.
9. Interpreting, analyzing, diagnosing. Telling a person what his/her motives are, or analyzing why he or she is doing or saying something, or communicating that you have him/her figured out or diagnosed.
10. Reassuring, sympathizing, consoling. Trying to make the other person feel better, by talking him/her out of his/her feeling, trying to make the feeling go away, denying the strength of the feelings.
11. Probing, questioning, interrogating, trying to find reasons, motives, causes; searching for information.
12. Withdrawing, distracting; humoring. Trying to get the person away from the problem; withdrawing from the problem yourself; distracting the person, kidding him/her out of the feelings, pushing the problems aside.

Self Exploration: Questions to Get to Know Yourself By

1. Who am I?
2. Who am I deep down inside?
3. How do I reveal myself to others?
4. How do I feel about me?
5. Am I likeable?
6. How do I feel about me?
7. Am I likeable? shameful? worthwhile?
8. How do I meet my own needs?
9. How do I solve my own problems?
10. Do I blame others?
11. Who do I care about?
12. How do I show people that I care?
13. What do I care about?
14. What will I stand up and be counted for?
15. What are my basic values?
16. How do my values and beliefs influence my life?
17. How do I perceive the world? Is it fearful or fun?
18. What are my strengths? Of what am I the proudest about myself?
19. What do I like most about me?
20. What are my weaknesses? Do I know and respect my limits?
21. Is my balance--between work, play, self, and others--a healthy one?
22. What would I most like to change about myself?
23. What pleases me? How do I please myself? How do I find gratification? What do I enjoy?
24. What are my inner resources?
25. What do I fear? do I know why?
26. What do I strive for? Why is it so important to me?
27. How do I spend time? Do I use it, or kill it?
28. How do I handle my anger? Am I in touch with it?
29. Am I a "winner" or a "loser"? What makes me think so?
30. What do I think of my physical self?

INSTRUCTOR RESPONSE

To: Competency-Based, Individualized, Self-Paced Education

Prepared by: Gregory B. McDaniel

Response:

Over the past year, I have served TSTC-ETC at Marshall in two separate but connected roles as an instructor. My primary role has been as a Mathematics instructor in the Pre-Technical Studies department. My other role has been as an adjunct Mathematics instructor for Panola College as part of the consortium by which Panola instructs TSTC-ETC's students in General Education, college-level coursework. These dual roles have provided me with the opportunity to observe the ability of our students from the Basic Mathematics level to the Plane Trigonometry level.

I have found competency-based, individualized, self-paced education the best way to go in our Pre-Tech Math classes. Many students would have failed if their particular course had not been self-paced. With the self-paced mode, they were allowed to make an incomplete and thus finish their course in more than one quarter. Also, many of our students have not taken a math course for several years. A lot of these students can complete their coursework fairly rapidly after just becoming familiar with mathematical concepts again.

Self-paced education is effective in all of our Pre-Tech Math courses. It is most effective at the Beginning Algebra level. It is least effective at the Intermediate Algebra level.

I do not use competency-based, individualized, self-paced education in my college-level courses (College Algebra and Plane Trigonometry). But, I have observed how it could be used in this setting. I would only want to use the self-paced mode in order to accelerate the students through the coursework. I feel as though students should have to complete a certain amount of work within a term in order for them to receive college credit. Thus, I can envision using an effective pre-test in order to place a student in an "accelerated" or a "regular" mode of instruction.

In summation, I will always push for us to use self-paced instruction in our Pre-Technical Studies Mathematics courses. In addition to this, I would like to pilot an accelerated program for our College Algebra classes.

TO: Ms Ann Lewis
FROM: Jack Miller
DATE: 25 July 94
SUBJECT: Instructor Evaluation of Competency Based, Self-Paced, Accelerated Learning in Pre-Tech Mathematics

For the past several months, I have utilized the competency based, self-paced, accelerated learning technique of instruction in three mathematics classes.

Overall, it is effective in enabling students to bridge the gap from their wide range of starting capabilities to the specified competencies required of the follow-on "customer courses", whether they are technical courses or higher level mathematics. In this respect, I have been very pleased with the results of this non-traditional approach. I have seen several students begin slowly (in fact, almost imperceptibly), but react well to the lack of pressure to "stay with the class", and then accelerate their pace of learning after mastering some mathematical or personal obstacle to progress. Often these accelerated students master the competencies well before the end of the established quarter, and are able to concentrate their efforts in other courses.

Of course, there has been the occasional person who did not stay on the theoretical schedule, or who did not conquer a hurdle and then move along quickly enough to catch-up and then finish the course within the 12 week quarter. For those in this category who were making conscientious efforts to learn and apply the required mathematical competencies, I designated the grade of "Incomplete", permitting them to return for whatever time it took to finish their learning during the following quarter. Conversely, for those whose effort was not conscientious, I rewarded them with the failing grade that they earned. There has not been one instance of a student stating that he or she was treated unfairly, or that the conscientiousness of his or her efforts had been misinterpreted. Therefore, I am very pleased with the aspect of this program that focuses on the individual's sense of responsibility for learning.

The concept of efficiency should be considered before implementation of this type of instruction. It is undeniable that one instructor cannot adequately facilitate the learning of as many self-paced students as an instructor in a more conventional lecture mode. This requires the dedication of more personnel resources than that to which a school may be accustomed, and may therefore be considered inefficient. However, the success rate with non-traditional students appears

to be more than worth what might be considered by some to be the inefficient use of instructor resources.

As a final note, it becomes obvious after only a short exposure to competency based, self-paced, accelerated learning, that its success requires the assignment of instructors with well developed inter-personal skills, senses of responsibility, and flexibility of focus.

Teaching within a competency based, self-paced, accelerated learning environment for the past several months has caused me to realize the value of this style of learning/teaching, and I support further work to fine tune this technique for appropriate courses.

BRIDGE PROJECT PRE-TECH ENGLISH SUMMARY

By Cori Stanley

Having taught in both self-contained and competency-based, individualized programs, I see the value of both types of environments; there is a time and place for each. In my Pre-Tech English classes, I believe I have successfully utilized both approaches.

Lecture and whole-class activities are necessary when introducing new concepts, administering tests, discussing assignments, and writing situations. Writing is a process which involves brainstorming and sharing ideas with others; peer responding is a necessary part of this process both for the writer and the responder. Many skills are incorporated in the writing process such as analyzing, making decisions, listening, speaking, etc.; this interaction would be lost in an individualized setting.

Competency-based objectives are extremely helpful when teaching remedial subjects. It enables the instructor to determine exactly what skills the student has and what is lacking; time is not lost repeating instruction on skills the student already possesses. Instead, all energies can be directed to providing the tools, materials, and instruction necessary to meet the student's needs. At the end of the quarter, the instructor can

provide the student, counselor, or advisor with concrete information on the student's progress, what was completed, and what is still lacking. All parties involved know exactly what the student has achieved or still requires.

An individualized setting allows students to work at their own pace without the fear of failure or competition; they do what they can in the time allotted. If they cannot complete their work, they do not receive an "F", but are considered "In Progress" and are allowed to continue their work until they do complete it. They, rather than the instructor, are accountable for their success or failure.

The main problems I have encountered in an individualized setting are in student time management. Most of the students do not know how to prioritize their college schedule or tend to procrastinate. As a result, they are often caught in a "crunch" and find themselves playing "catch up" for the rest of the quarter.

Students react differently to these conditions. Many prefer the individualized approach and find it less stressful; others like the structured whole-group concept and find it keeps them "on track". However, it is important for students to be successful in both arenas.

BRIDGE PROJECT PRE-TECH ENGLISH SURVEY RESULTS

By Cori Stanley

INSTRUCTORS:

All instructors received the following survey. Only five instructors responded, as follows:

		Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
1.	Students showed improvement in reading.	1	2	2		
2.	Students showed improvement in writing.		3	2		
3.	Students showed improvement in understanding and following directions.		3	1	1	
4.	Students showed improvement in attitude toward education.		3	1	2	
5.	Students paid more attention.		4	2		
6.	Students were more productive.	1	2	1		
7.	Students made no significant progress.			1	3	1
8.	Pre-Tech English has been effective.	4	1	1		

In addition, the following comments were made on two surveys:

1. "Already had good attitude...responses based on one student and opinions of one other student."
2. "These questions do not really apply. Some of the TSTC students have terrible writing skills. Without the Bridge program, the Pre-Tech English, the less skilled students would not be able to satisfy writing requirements for any classes. Cori Stanley does a great job with the people who managed to avoid learning almost any grammar in their educational experience. I commend Cori for her hard work, perseverance, and success."

CONCLUSIONS:

Many of the instructors verbally expressed difficulty completing the survey because they may not have had the same student before and after Pre-Tech classes. This is not uncommon; most students take Pre-Tech before taking their program classes.

Most of the instructors have been very supportive of Pre-Tech and have encouraged their students to consult me regarding their assignments; I am frequently invited to observe and critique oral presentations and written reports required for program courses.

It is the general consensus of most of the faculty that Pre-Tech is a valued and necessary part of the students' education, particularly for those entering with limited skills.

STUDENTS:

All available, former Pre-Tech students received the following survey. (Current students were not included). Ten students responded as follows:

		Strongly Agree	Agree	No Opinion	Disagree	Strongly Disagree
1.	I believe I have made improvement in reading.	1	7	2		
2.	I believe I have made improvement in writing.	3	6	1		
3.	I believe I have made improvement in understanding and following directions.	2	6	2		
4.	I believe I have made improvement in my attitude toward education.	3	5	2		
5.	I believe I pay more attention.	2	5	3		
6.	I believe I am more productive.	2	5	3		
7.	I have made no significant progress.			2	1	7
8.	Pre-Tech English has been effective.	3	6	1		

CONCLUSIONS:

The feedback received from students has been very favorable. Most of the students have seen the difference Pre-Tech has made in their college-level classes. As a result of Pre-Tech, a significant number of students have passed TASP their first try.

SUMMARY OF
INSTRUCTOR SURVEY:
PRE-TECH MATH BRIDGE PROJECT

Nine of TSTC-ETC at Marshall's Instructors were interviewed. These instructors were chosen based on the fact that they had been with the institution since the Fall of '93 or before. Also, at least one instructor was chosen from each of the six program areas.

These instructors were asked 6 different questions about Pre-Tech Math and were asked to give numerical ratings to these six questions. In addition to this, they were asked to give open responses to the questions.

The questions, ratings, and responses follow.

Question 1. How significant is math proficiency to a student's success in your program?

Rating mean = 3.8 with 4 representing highly

Some of the responses were:

"It is an absolute necessity for our higher-level courses."

"Math provides a process of thought."

Question 2. What level of mathematics is required for success in your program?

Rating mean = 3.2 with 3 representing College Algebra and 4 representing Trigonometry

Some of the responses were:

"Students must be able to manipulate formulas and solve quadratic equations from the first quarter on."

"Students must at least be able to use a handbook of formulas."

Question 3. In general, students who have not "needed" pre-tech math have performed how well in math-related aspects of your program?

Rating mean = 3.6 with 4 representing very well

Outside of the rating, there were no meaningful responses.

Question 4. In general, students who have "needed", but did not complete pre-tech math have performed how well in math-related aspects of the program?

Rating mean = 1.5 with 1 representing minimally

Some of the responses were:

"They have done a minimal job in math-related aspects."

"They have barely gotten by."

"You can tell a difference."

Question 5. In general, students who have "needed", and completed pre-tech math have performed how well in math-related aspects of the program?

Rating mean = 2.6 with 1 representing minimally and 4 representing very well

Some of the responses were:

"These students would never be going full-speed without pre-tech."

"It has given these students a chance."

Question 6. In your opinion, how significant is pre-tech math in preparing students for success in the math-related aspects of your program?

Rating mean = 3.7 with 4 representing highly

Some of the responses were:

"I can't imagine some students making it without pre-tech math."

"It is absolutely essential."

"Some students would never have a chance to get through our program and thus make a living without pre-tech."

SUMMARY OF
BRIDGE PROJECT
STUDENT SURVEY
OF PRE-TECH MATH

In order to evaluate our program from a student's perspective, we requested that our former Pre-Tech students completed a survey. They were asked to respond to 7 statements and to base their responses on their experiences in Pre-Tech Math.

28 students returned their surveys. The statements and the mean of the students' responses are recorded below.

Statements and Responses:

1. I believe I have made improvement in math.

mean = 1.9 with 1 representing strongly agree and 2 representing agree

2. I believe I have made improvement in understanding and following directions.

mean = 2.0 with 2 representing agree

3. I believe I have made improvement in my attitude toward education.

mean = 1.9 with 1 representing strongly agree and 2 representing agree

4. I believe I pay more attention.

mean = 2.1 with 2 representing agree and 3 representing no opinion

5. I believe I am more productive.

mean = 1.9 with 1 representing strongly agree and 2 representing agree

6. I have made no significant progress.

mean = 4.2 with 4 representing disagree and 5 representing strongly disagree

7. Pre-Tech Math has been effective.

mean = 2.1 with 2 representing agree and 3 representing no opinion

SUMMARY OF
BRIDGE PROJECT
STUDENT SURVEY
PRE-TECH MATH

In order to evaluate our program from a student's perspective, we requested that our former Pre-Tech students complete a survey. They were asked to respond to 7 statements and to base their responses on their experiences in Pre-Tech Math.

Six students from the Friday afternoon class responded. The statements and the mean of the students' responses are recorded below.

Statements and Responses:

1. I believe I have made improvement in math.

mean = 1.5 with 1 representing strongly agree and 2 representing agree.

2. I believe I have made improvement in understanding and following directions.

mean = 1.8

3. I believe I have made improvement in my attitude toward education.

mean = 1.5

4. I believe I pay more attention.

mean = 1.8

5. I believe I am more productive.

mean = 1.8

6. I have made no significant progress.

mean = 4.7 with 4 representing disagree and 5 representing strongly disagree.

7. Pre-Tech math has been effective.

mean = 1.3

Bridge Program Quarter

BRIDGE PROGRAM QUARTER SUGGESTIONS

The need for a Bridge Program quarter is based on low CPT scores. The CPT/TASP information sheet the student brings to the faculty advisor will direct you to enroll the student into specific academic courses. If these scores indicate a need to start at MATH 050, ENGL 010, REA 020, a Pre-Tech quarter is advised.

- 1 Cohorts start in Fall and Spring Quarters, but a first time enrollee in either of those quarters (and needing Pre-Tech courses) will have two quarters to concentrate on Pre-Tech courses before joining the next official cohort. This student would enter the cohort with some program courses completed as they were taken as options during Bridge Program quarters.
2. First time enrollees entering Winter or Summer quarters may have only one Bridge Program quarter and be ready to join the next cohort. This student may enter the cohort still needing some Pre-Tech courses but would still be better prepared than without one Bridge Program quarter.

NOTE: Students can register for two courses of the same subject at the same time. Because the work is individualized and students work at their own pace, they can work both class times on one course for half of the quarter, complete that course, then work during both class times on the second course. They do need to register for both courses and come both class times.

3. If the student's CPT report indicates a need for reading remediation starting at the REA 020 course, he/she should be scheduled for both REA 020 and 030 to get their reading skills improved as fast as possible as that impacts every other course they take.
4. Make a serious attempt to complete Pre-Tech needs (except TASP classes, 090 classes) prior to beginning the 3rd quarter. To do this, consider where they start in math and count the courses needed. If starting at 050, and all goes well, they will need to double up in math as there are 4 quarters of Pre-Tech math, 050, 060, 070, 104, needed to be ready for College Algebra.

There are four Pre-Tech math courses, two Pre-Tech writing and two Pre-Tech reading courses, so plan accordingly.

From: Ann Lewis

Re: Pre-Tech Immersion Quarter

Date: 6-30-94

In addition to the regular Pre-Tech courses, we will offer immersion, block time Bridge Program Fall quarter.

The immersion Bridge quarter is for students whose CPT scores indicate they need to start at the lowest level of Math and English (MATH 050 and ENGL 010 or REA 020). In this arrangement the student will concentrate on remediation in a daily exposure schedule rather than once a week. Thus:

MATH MTWTF 8:00am to 9:50am,
ENGL MTWT 11:00am to 11:50, and/or
REA MTWTF 10am to 11:50am.
(Orientation will be offered Fri, 11:00 to 11:50am.)

This will take an intensive effort on the part of the student, so the student must understand the focus is on preparing to be successful, rather than beginning immediately in "real" courses. Your older students will probably be most successful in this program. Recent high school graduates may not have enough motivation to hang in there and be committed to a remediation effort.

THE BIG PICTURE--Progression of PTS Courses

REA 020	ENGL 010	MATH 050	
REA 030	ENGL 020	MATH 060	
and	and	MATH 070	MATH 101
Pass TASP	Pass TASP	MATH 104	
		and	
	Ready for	Pass TASP	
	ENGL 1301		
		Ready for	
		MATH 1314	

TO REGISTER STUDENTS IN THE IMMERSION BRIDGE PROGRAM

The goal is to register students for four Pre-Tech courses to be taken 8am to 12 noon, Monday through Friday to provide a concentrated effort to build the skills needed.

The students will be registered in two Pre-Tech math and two Pre-Tech English courses.

Both of these:

MATH 050	M1	2-3-3	RM 108	MTWTF	8:00am-8:50am
MATH 060	M1	2-3-3	RM 108	MTWTF	9:00am-9:50am

Register the student for both MATH 050 and MATH 060

These students will work the two hours each day on 050 until that is done, then continue on into 060. (Hopefully also complete 070 and be ready for Intermediate Algebra Winter quarter.

AND

ENGL 010	M1	1-3-2	RM 108	MTWT	10:00am-10:50am
ENGL 020	M1	1-3-3	RM 108	MTWT	11:00am-11:50am

Total 11 credit hours

AND/OR

REA 020	MI	2-3-3	RM 108	MTWTF	10:00am-10:50am
REA 030	M1	2-3-3	RM 108	MTWTF	11:00am-11:50am

Instead of or along with ENGL, depends on need.

Register the students for two of the above ENGL or REA courses. If reading is needed, register for one REA and one ENGL course. Example: REA 030 and ENGL 010
The students will work on these simultaneously as the instructor directs.

The plans are to have an additional ORI 102 section from 11-12 on Fridays. This would make the required 12 credits for full time student status.

Students who are in this program can take a 3 credit "real" course in the afternoon.

QUARTER 2

MATH 070	Beginning Algebra II	3	5
MATH 104	Intermediate Algebra	3	5

any REA or ENGL courses not completed 1st Quarter

If the CPT/TASP information sheet indicates a student needs MATH 050, that student could be enrolled in 050 and 060 the first quarter, then 070 and 104 the second quarter.

If the CPT/TASP information sheet indicates a student needs REA 020 and ENGL 010, the student will need four Pre-Tech English classes (two reading, RES 020 and 030, ENGL 010 and 020) -- so he/she could register for all four the first quarter or one of each for the first and second quarter.

From: Ann Lewis

Re: Bridge Program Immersion Quarter

Date: 6-30-94

In addition to the regular Pre-Tech courses, we will offer immersion, block time Bridge Program Fall quarter.

The immersion Bridge quarter is for students whose CPT scores indicate they need to start at the lowest level of Math and English (MATH 050 and ENGL 010 or REA 020). In this arrangement the student will concentrate on remediation in a daily exposure schedule rather than once a week. Thus:

MATH MTWTF 8:00am to 9:50am,
ENGL MTWT 11:00am to 11:50, and/or
REA MTWTF 10am to 11:50am.
(Orientation will be offered Fri., 11:00 to 11:50am.)

This will take an intensive effort on the part of the student, so the student must understand the focus is on preparing to be successful, rather than beginning immediately in "real" courses. Your older students will probably be most successful in this program. Recent high school graduates may not have enough motivation to hang in there and be committed to a remediation effort.

THE BIG PICTURE--Progression of PTS Courses

REA 020	ENGL 010	MATH 050
REA 030	ENG 107	MTH 115

TO REGISTER STUDENTS IN THE BRIDGE IMMERSION PROGRAM

The goal is to register students for four Pre-Tech courses to be taken 8am to 12 noon, Monday through Friday to provide a concentrated effort to build the skills needed.

Both of these:

MATH 050	M1	2-3-3	RM 108	MTWTF	8:00am-8:50am
MTH 115	M1	3-2-4	RM 108	MTWTF	9:00am-9:50am

Register the student for both MATH 050 and MTH 115

These students will work the two hours each day on 050 until that is done, then continue on into 115.

AND TWO of the following:

ENGL 010	M1	1-3-2	RM 108	MTWT	10:00am-10:50am
----------	----	-------	--------	------	-----------------

Total 9 credit hours

AND/OR

REA 020	MI	2-3-3	RM 108	MTWTF	10:00am-10:50am
REA 030	M1	2-3-3	RM 108	MTWTF	11:00am-11:50am

If the student needs reading, register him/her for the recommended REA course and ENGL 010. If the student only needs ENGL 010, register them for only that course using the 10am time and he/she will be able to take some other course the fourth hour or use it for study time.

This would complete your math requirements and qualify these students for ENG 107 the following quarter.

The plans are to have an additional ORI 102 section from 11-12 on Fridays.

Students who are in this program can take a 3 credit "real" course in the afternoon.

BRIDGE PROGRAM QUARTER

PRE-MECHANICS CORE (IMM)

QUARTER 1

Course #	Title	Credits/Hours	
MATH 050	Basic Mathematics	3	5
REA 020	Reading Improvement II	3	5
REA 030	Reading Improvement III	3	5
ENGL 010	Writing Skills I	2	4

OPTIONS Courses not requiring high level math or English skills

ORI 102	Introduction to College	1	1
BUS 101	Basic Keyboarding	2	4
IMT 2060	Applications Software	3	6
IMM 103	Mechanical Power Transmission	3	6
OSH 216	Safety and Accident Prevention	3	5
PSY 112	Human Relations	3	4
WLT 105	Welding Practices and Applications	4	6

QUARTER 2

MATH 115	Occupational Mathematics	4	5
ENG 107	Oral and Written Communications	3	3

If the CPT/TASP information sheet indicates a student needs MATH 050, that student could be enrolled in MATH 050 and MTH 115 the first quarter.

If the CPT/TASP information sheet indicates a student needs REA 020 and ENGL 010, the student will need three Pre-Tech English classes (two reading, REA 020 and 030, and one writing, ENGL 010) and ENG 107.

Model Curriculum

PRE-TECHNICAL STUDIES
FACULTY LIST
Summer 1994

Elizabeth Ann Lewis, Program Director
Carl Perkins Discretionary Grant--Bridge Program
Employed, 8-92
Masters of Arts, Education Leadership
Bachelors of Arts, Education, Recreation
Fifteen years experience in management/development of
computer-based, individualized instruction
1993-94: Instructor. Developed individualized instruction
for developmental mathematics courses.

Gregory B. McDaniel, Mathematics Instructor
Employed, 8-93
Masters of Science, Secondary Education
Eighteen graduate credits hours in Mathematics
Bachelor of Science, Mathematics

Courses: Basic Mathematics, Beginning Algebra, Introductory
Algebra, Intermediate Algebra, Occupational
Mathematics, TASP Remediation/Math

Corinda Stanley, Reading/Writing/English Instructor
Employed 8-93
Bachelor of Arts, English/Speech and Theatre
Currently working on PhD Education, projected awarded Sp. 95
Committees: Computer Committee, PTS Advisory Committee,
Grant Task Force.

Courses: Reading Improvement II&III, Writing Skills I&II,
Oral and Written Communication, Interpersonal
Communication, TASP Remediation/reading & writing

John E. Miller, Mathematics Instructor (also PET)
Employed, Fall 1992
Bachelors of Science, Industrial Distribution (Half
Industrial Engineering, half Industrial Management)

Courses: Basic Mathematics, Beginning Algebra, Introductory
Algebra, Intermediate Algebra, Occupational
Mathematics, TASP Remediation/Math, Applications
Software

Mathematics

STUDENT COMPETENCY PROFILE

NAME _____
 S.S.# _____
 DATE _____

COMPETENCY STATEMENT	MASTERY			
	MATH	Mastery Level	Date	Initials
WHOLE NUMBERS				
1. Read and count single and multiple digit whole numbers.				
2. Write whole numbers from oral statement and written text (six thousand three = 6003).				
3. Round off single and multiple digit whole numbers.				
4. Add single and multiple digit whole numbers.				
5. Subtract single and multiple digit whole numbers.				
6. Multiply single and multiple digit whole numbers.				
7. Divide single and multiple digit whole numbers.				
8. Perform arithmetic operations using correct order of operations.				
9. Use arithmetic operations to solve work problems with whole numbers.				
FRACTIONS				
10. Read and write common fraction with understanding of relative size.				
11. Add like common fractions.				
12. Subtract like common fractions.				
13. Multiply common fractions.				
14. Divide common fractions.				
15. Add unlike fractions.				
16. Subtract unlike fractions.				
17. Simplify fractions to solve problems.				

18. Solve word problems with common fractions.			
19. Reduce fractions to lowest terms.			
20. Find lowest common denominator.			
21. Change fractions from denominator to another.			
22. Translate a mixed number into an improper fraction and reverse.			
23. Perform computations with mixed numbers.			
DECIMALS			
24. Understand relative size of decimal numbers.			
25. Write digit equivalent of orally stated decimal number.			
26. Read and write decimals with one or more places.			
27. Add and subtract decimals with one or more places.			
28. Multiply decimals with one or more places.			
29. Divide decimals with one or more places.			
30. Carry out arithmetic computations involving dollars and cents.			
31. Convert fraction to decimal equivalent and vice versa.			
32. Solve word problems with decimals in one or more places.			
33. Read and write percents.			
34. Find the percents of a number.			
35. Find the number when a percent is given.			
36. Compute percent of increase.			
37. Compute percent of decrease.			
38. Solve word problems involving percent.			
MIXED OPERATIONS			
39. Convert mixed numbers to decimals and decimal fractions to mixed numbers.			
40. Solve word problems containing a mix of fractions and decimal numbers.			
41. Compute averages.			

42. Solve basic ratio problems.			
43. Solve proportion problems with one or two unknowns.			
44. Reduce ratios to lowest terms.			
45. Utilize ratio and proportion to solve word problems.			
MEASUREMENT AND CALCULATION			
46. Perform conversions within metric system (weight, distance, volume)			
47. Use metric and customary units of measurements.			
48. Solve problems involving time, weight, distance and volume.			
49. Rename large and small numbers using scientific notation.			
50. Use scientific notation to solve problems.			
51. Use a calculator to perform basic arithmetic operations.			
52. Use a calculator to solve problems using scientific notation.			
53. Graph data using bar, line and pie graphs.			
ESTIMATION			
54. Determine if a solution to a mathematical problem is reasonable.			
55. Estimate distances in inches, feet, yards and miles.			
ALGEBRA			
56. Find missing addends.			
57. Find missing factors.			
58. Collect like terms in an algebraic expression.			
59. Add and subtract algebraic expressions.			
60. Multiply and divide algebraic expressions.			
61. Solve linear equations in one variable.			
62. Solve linear inequalities.			
63. Solve systems of linear equations.			
64. Construct graphs on coordinate plane.			

65. Find factors and multiples.			
66. Factor algebraic expressions and equations.			
67. Add, subtract, multiply and divide algebraic fractions.			
68. Add, subtract, multiply and divide square roots.			
69. Use exponents and square roots appropriately.			
70. Use direct and inverse variation to solve word problems.			
71. Solve quadratic equations by square roots, factoring, completing the square and using the quadratic formula.			
GEOMETRY			
72. Use geometry elements (point, line, ray, etc) to label drawings.			
73. Use appropriate formula to determine length, width, circumference, area, and volume.			
74. Recognize and name types of angles.			
75. Recognize and name geometric figures.			
76. Use Pythagorean Theorem to find missing measures of a triangle.			
77. Find sine, cosine and tangent of an angle using a table and calculator.			
78. Solve problems to find length of sides and angles of geometric shapes.			
PRACTICAL MATHEMATICS			
79. Use formula to convert Fahrenheit, Celsius, and Kelvin temperatures.			
80. Rearrange symbols in equations to isolate specific unknowns.			
81. Solve problems by substituting given numerical values for symbols in a formula.			
82. Identify mode, median, and mean.			
83. Find measures of central tendency (mode, median, mean).			
84. Construct graphs from gathered data.			
85. Interpret graphs and analyze data presented.

PRE-TECH MATH

MATH 050

BASIC MATHEMATICS (2-3-3)

The purpose of this course is to give background in the fundamentals of mathematics. It includes the very basic concepts of whole numbers, number theory, fractions, decimals, percentages, scientific notation and measurements. Prerequisite: Placement determined by MATH placement test. (Developmental/No college credit granted)

MATH 060

BEGINNING ALGEBRA I (2-3-3)

The purpose of this course is to give a background in pre-algebra and elementary algebraic concepts. It includes the concept of signed numbers, evaluating expressions, polynomials, operations with algebraic expressions, and factoring. Prerequisite: MATH 050, or MATH placement test. (Developmental/No college credit granted)

MATH 070

BEGINNING ALGEBRA II (2-3-3)

This course is a continuance of MATH 060, Beginning Algebra I. It begins with rational expression, followed by linear and quadratic equations, formulas and work problems. A basic geometry section will also be included. Prerequisite: MATH 060 (Developmental/No college credit granted)

MATH 090

MATH TASP REVIEW (0-2-1)

An intensive review of mathematics for students who have not passed the math portion of the TASP. Instruction is focused on individual needs, employing computer software and videotape study guides. Instruction is presented through lecture and experience in the developmental and/or math labs.

MATH 101 (MATH 060 AND 070 -- 101 split for 2 qtrs)
INTRODUCTORY ALGEBRA (2-3-3)

An introductory algebra course covering operations involving real numbers, poly-nominals and rational expressions; solutions of linear equations and formulas; and factoring. Placement determined by MATH placement test. (Developmental/No college credit granted)

MATH 1312 OR 104
INTERMEDIATE ALGEBRA (4-0-3)

A study of relations and functions; inequalities; factoring; polynomials; rational expressions and quadratics with an introduction to complex numbers; exponential and logarithmic functions; determinants and matrices; sequences and series. Prerequisite: MATH 101 or equivalent as determined by MATH placement test. (Developmental/No college credit)

I. COURSE DESCRIPTION (catalog description)

DEPARTMENT: Pre-Technical Studies

COURSE: Math 050 Basic Mathematics (2-3-3)

The purpose of this course is to give a background in the fundamentals of mathematics. It includes the very basic concepts of whole numbers, number theory, fractions, decimals, percentages, scientific notation and measurements.

PREREQUISITE: Placement determined by MATH placement test.
(Developmental/No college credit granted)

II. COURSE GOALS AND OBJECTIVES:

GOAL 1: Perform operations and applications with whole numbers

Obj. 1a: Perform the four basic operations with whole numbers.

Sub-obj. 1a(1): Define whole numbers.

Sub-obj. 1a(2): Demonstrate the understanding of the place-value of whole numbers.

Sub-obj. 1a(3): Add whole numbers.

Sub-obj. 1a(4): Use the concept of estimation to check the reasonableness of answers.

Sub-obj. 1a(5): Subtract whole numbers.

Sub-obj. 1a(6): Multiply by zero and one.

Sub-obj. 1a(7): Multiply whole numbers.

Sub-obj. 1a(8): Divide whole numbers.

Sub-obj. 1a(9): Follow the correct order of operations.

Sub-obj. 1a(10): Solve word problems involving whole numbers.

Obj. 1b: Use the four basic operations of whole numbers to solve number theory problems.

Sub-obj. 1b(1): Recognize prime and composite numbers.

Sub-obj. 1b(2): Find the factors of whole numbers.

GOAL 2: Perform operations and applications with fractions.

Obj. 2a: Multiply and divide fractions.

Sub-obj. 2a(1): Define numerator and denominator.

Sub-obj. 2a(2): Use proper and improper fractions.

Sub-obj. 2a(3): Find equivalent fractions.
Sub-obj. 2a(4): Write a fraction in lowest terms.
Sub-obj. 2a(5): Compare fractions.
Sub-obj. 2a(6): Multiply fractions.
Sub-obj. 2a(7): Divide fractions.

Obj. 2b: Add and subtract fractions.

Sub-obj. 2b(1): Add and subtract fractions with like denominators.
Sub-obj. 2b(2): Find the least common denominator.
Sub-obj. 2b(3): Add and subtract fractions with unlike denominators.
Sub-obj. 2b(4): Solve word problems involving fractions.

Goal 3: Perform operations and applications with decimal numbers.

Obj. 3a: Perform the four basic operations with decimal numbers.

Sub-obj. 3a(1): Demonstrate the understanding of the place value of decimal numbers.
Sub-obj. 3a(2): Define decimal digits.
Sub-obj. 3a(3): Add decimal numbers.
Sub-obj. 3a(4): Subtract decimal numbers.
Sub-obj. 3a(5): Multiply decimal numbers.
Sub-obj. 3a(6): Divide decimal numbers.

Obj. 3b: Use the four basic operations to solve problems with decimal numbers.

Sub-obj. 3b(1): Round decimal numbers.
Sub-obj. 3b(2): Compute the average of a set of numbers.
Sub-obj. 3b(3): Change fractions to decimals.
Sub-obj. 3b(4): Solve word problems involving decimal numbers.

Goal 4: Perform operations and applications with percents.

Obj. 4a: Apply the definition of percent to fractions and decimals.

Sub-obj. 4a(1): Define percent.
Sub-obj. 4a(2): Change decimal numbers to percents.
Sub-obj. 4a(3): Change fractions to percents.
Sub-obj. 4a(4): Change percents to decimal numbers.

Obj. 4b: Solve problems involving percent.

- Sub-obj. 4b(1): Find the percent of a number.
Sub-obj. 4b(2): Find the percentage one number is of another number.
Sub-obj. 4b(3): Find the total when the percent of a number and the percentage are known.
Sub-obj. 4b(4): Solve word problems involving percent.

Goal 5: Be able to use the basic concepts of scientific notation.

Obj. 5a: Acquire basic skills in the area of scientific notation.

- Sub-obj. 5a(1): Demonstrate the understanding of the concepts of scientific notation.
Sub-obj. 5a(2): Convert a number from decimal form to scientific notation.
Sub-obj. 5a(3): Convert a number from scientific notation to decimal form.

Goal 6: Use measurements in a program-specific area.

Obj. 6a: Make measurement conversions.

- Sub-obj. 6a(1): Add and subtract measurement numbers.
Sub-obj. 6a(2): Multiply and divide measurement numbers.
Sub-obj. 6a(3): Round measurement numbers.
Sub-obj. 6a(4): Convert measurements of time, length, weight, capacity, area and volume.
Sub-obj. 6a(5): Change English to metric units.
Sub-obj. 6a(6): Change metric to English units.

Obj. 6b: Perform program-specific direct measurements.

III. COURSE OUTLINE

Lecture/Lab

Students enrolled in Math 050 are scheduled in class for a period of 2 lecture hours per week and 3 lab hours per week.

Pre-Technical Studies is a self-paced, individualized program. For each course, students are given a diagnostic pre-test, a set of assignments over objectives they have not yet mastered (based on the diagnostic pre-test), and a comprehensive course mastery test.

In addition to scheduled lectures, one-on-one time with the instructor (based on the individual student's need) is considered to be part of the 2 hours of lecture per week.

CONTENT:

The content of the course is contained on the following pages.

Math 050

Course Progress Record

	Grade	Date Completed
Pre-Test	_____	_____
Unit 1 Whole Numbers.....	_____	_____
Unit 2 Fractions.....	_____	_____
Unit 3 Decimals.....	_____	_____
Unit 4 Percents.....	_____	_____
Unit 5 Measurements.....	_____	_____
Course Grade.....	_____	_____

Math 050

Assignment Completion Record

Unit 1 (CHT) Arithmetic of Whole Numbers

Textbook: Mathematics for the Trades, 3rd ed.

Computer: JSEP

*** Course: zcht0501 ***

Computer: Skills Bank II

	Grade	Date Completed
JSEP Lessons:		
1h Count Forward or Backward by a Given Number	_____	_____
1g Round Numbers.....	_____	_____
12a Add and Subtract Whole Numbers - No Carrying	_____	_____
12b Add and Subtract Whole Numbers - Carrying and Borrowing	_____	_____
12h Estimate a Sum or Difference.....	_____	_____

JSEP Lessons 1h, 1g, 12a, 12b, and 12h will replace textbook sections 1-1 and 1-2.

1-1 Addition of Whole Numbers, pp. 6-14 (optional)

Book: Exercise 1-1

A. 1, 6, 11, 16, 21

B. 2, 7, 14

C. 1, 3, 5, 7..... _____

1-2 Subtraction of Whole Numbers, pp. 14-22 (optional)

Book: Exercise 1-2

A. 1, 5, 13, 19, 25, 31

B. 1, 7, 13, 19, 25

C. 3, 4, 7, 8..... _____

JSEP Lessons:

12c Add and Subtract Decimals..... _____

13a Multiply and Divide Whole Numbers.. _____

13b Multiply and Divide Decimal Numbers _____

13c Divide Numbers with Decimals..... _____

16b Compute Averages..... _____

JSEP Lessons 12c, 13a, 13b, 13c, and 16b will replace textbook sections 1-3 and 1-4.

1-3 Multiplication of Whole Numbers, pp. 22-30 (optional)

Book: Exercise 1-3

A. 1, 7, 13, 19, 25, 31

B. 1, 6, 20

C. 2, 5, 7..... _____

1-4 Division of Whole Numbers, pp. 31-39 (optional)

Book: Exercise 1-4

A. 1,7,13,16,25

B. 1,7,10,14,26

C. 1,8.....

Skills Bank II (optional)

Word Problems:

Lesson 8 Needed Operations.....

1-5 Order of Operations, pp. 39-42

Exercises 1-5

A. All evens

B. 3.....

Unit 1 Turn in exercises and ask for Test 1.

Unit 1 Exercises.....

Math 050

Assignment Completion Record

Unit 2 (CHT) Fractions

Textbook: Mathematics for the Trades, 3rd ed.

Computer: JSEP

*** Course: cht0502 ***

Computer: Skills Bank II

	Grade	Date Completed
JSEP Lessons:		
13a Multiply and Divide Whole Numbers..	_____	_____
14b Reduce Fractions to Lowest Terms...	_____	_____
14g Estimate Parts Using Common Fractions	_____	_____
2-1 Working with Fractions, pp. 53-63		
Book: Exercise 2-1		
A. All evens		
B. All odds		
C. All evens		
D. all odds		
E. All evens		
F. 2, 4, 6, 8.....	_____	_____
JSEP Lesson:		
14f Multiply and Divide Fractions.....	_____	_____
2-2 Multiplication of Fractions, pp. 63-68		
Book: Exercise 2-2		
A. 4, 8, 12, 16, 22, 25		
B. 4, 8, 12, 16		
C. 6, 8, 10, 11, 14, 15, 26, 27.....	_____	_____
2-3 Division of Fractions, pp. 68-73		
Book: Exercise 2-3		
A. 4, 8, 12, 16, 24		
B. 1, 2, 6, 9, 10.....	_____	_____
JSEP Lessons:		
12a Add and Subtract Whole Numbers - No Carrying	_____	_____
12b Add and Subtract Whole Numbers - Carrying and Borrowing	_____	_____
14e Add and Subtract Fractions.....	_____	_____
2-4 Addition and Subtraction of Fractions, pp. 73-83		
Exercise 2-4		
A. 3, 6, 9, 15, 18, 21, 24, 27,		

B. 1,3,7,8,9,10,11,12

C. 1,3,5,6,9,10,13,19,21.....

Unit 2 Turn in exercises and ask for Test 2.

Unit 2 Exercises.....

Unit 3 (CHT) Decimal Numbers

Textbook: Mathematics for the Trades, 3rd ed.

Computer: JSEP

*** Course: zcht0503 ***

Grade Date Completed

JSEP Lessons:

12a Add and Subtract Whole Numbers - No Carrying

12b Add and Subtract Whole Numbers - Carrying and Borrowing

12c Add and Subtract Decimals.....

JSEP Lessons 12a, 12b, and 12c will replace textbook section 3-1.

3-1 Addition and Subtraction of Decimals, pp. 91-100 (optional)
Book: Exercise 3-1

A. 5, 10, 15, 20, 21, 30, 33, 36

B. 1, 2, 3, 7.....

JSEP Lessons:

13a Multiply and Divide Whole Numbers..

13b Multiply and Divide Decimal Numbers

JSEP Lessons 13a and 13b will replace textbook section 3-2

3-2 Multiplication and Division of Decimal Numbers, pp. 100-112 (optional)

Book: Exercise 3-2

A. 5, 10, 15, 20, 25, 30, 35

B. All evens

C. 3, 5, 6, 8, 9, 12.....

JSEP Lesson:

14c Use a Conversion Table to Convert Decimals and Fractions

3-3 Decimal Fractions, pp. 113-121

Book: Exercise 3-3

A. 1, 5, 9, 13, 17, 21

B. 1, 2, 5, 8

C. 4, 7, 8.....

Unit 3 Turn in exercises and ask for Test 3.

Unit 3 Exercises.....

Assignment Completion Record

Unit 4 (CHT) Percent

Textbook: Mathematics for the Trades, 3rd ed.

Computer: JSEP

*** Course: zcht0504 ***

Computer: Skills Bank II

Grade Date Completed

JSEP Lessons:

- 13a Multiply and Divide Whole Numbers.....
- 12a Adding and Subtracting Whole Numbers - No Carrying
- 12b Add and Subtract Whole Numbers - Carrying and Borrowing
- 12c Add and Subtract Decimals.....
- 13b Multiply and Divide Decimal Numbers.....
- 14d Convert Decimals, Percents, and Fractions

4-1 Introduction to Percent, pp. 133-140

Book: Exercise 4-1

A. 1, 5, 9, 13, 17, 19

B. 1, 5, 6, 7, 9, 12, 13.....

Computer: Skills Bank II (optional)

Word Problems:

Lesson 12 Finding a Percent Using Proportions

4-2 Percent Problems, pp. 140-152

Book: Exercise 4-2

A., B. All evens

C. 1, 3, 5, 6, 8.....

Computer: Skills Bank II (optional)

Word Problems:

Lesson 17 Percent of Change.....

4-3 Applications of Percent Calculations, pp. 152-166

Exercise 4-3

1, 2, 3, 4, 5, 6, 9, 10, 11, 12, 13, 15, 17, 19

Unit 4 Turn in exercises and ask for Test 4.

Assignment Completion Record

Unit 5 (CHT) Measurement

Textbook: Mathematics for the Trades, 3rd ed.

Handout taken from: A Basic Math Approach to Concepts of Chemistry, 4th ed.

Computer: JSEP
*** Course: zcht0505 ***

Grade _____ Date Completed _____

JSEP Lessons:

2b Identify Units of Measure and Classify by Type of Measure _____

1c Order Numbers in Specific Sequence.. _____

2a Interpret the Markings on Linear Scales _____

5a Read and Interpret Gauges..... _____

12g Add and Subtract Measurements..... _____

5-1 Working with Measurement Numbers, pp. 173-187

Book: Exercise 5-1

A., B All evens

C. 1, 3

D. 1, 4, 7..... _____

JSEP Lessons:

5b Using Gauges with Digital Readouts.. _____

5d Read and Interpret Scales with Positive and Negative Markings _____

5-2 Units and Unit Conversion, pp. 187-197

Book: Exercise 5-2

A., B. All odds

C. 1, 4, 7, 10, 13..... _____

JSEP Lessons:

2d Identify Measures of Weight, Pressure, and Torque _____

5e Read and Interpret Multi-Scale Gauges _____

5-3 Metric Units, pp. 197-213

Book: Exercise 5-3

A., B., C. All evens

D. 1, 4, 7, 10, 12..... _____

IV. MATERIALS INVENTORY SHEET

The following materials are required for Math 050:

Textbook:

Mathematics for the Trades, 3rd ed., Carman and Saunders, Prentice-Hall Publishing Company.

Additional Materials:

No. 2 pencils

Loose-leaf notebook paper

An electronic calculator

V. GRADING/ATTENDANCE POLICY

Course grades are based on quizzes, tests, and attendance. A unit or objective is not considered to be complete unless the student has a grade of 70 or higher on the quiz or test covering the unit or objective.

Class is scheduled for five hours per week. If a student misses 10 or more hours of class, an excessive absence report will be filed on them with student services. If a student is absent for 5 hours or less during the quarter, they will receive an additional 5-point bonus on their course grade.

SCANS

The Three-Part Foundation competencies of SCANS is in the process of being fully integrated in Pre-Technical Mathematics.

These competencies are listed below.

Basic Skills: Reads, writes, performs arithmetic and mathematical operations, listens and speaks

A. Reading - locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules

B. Writing - not applicable to Pre-Technical Mathematics

C. Arithmetic/Mathematics - performs basic computations and approaches practical problems by choosing appropriately from a variety of mathematical techniques

D. Listening - receives, attends to, interprets, and responds to verbal messages and other cues

E. Speaking - not applicable to Pre-Technical Mathematics

Thinking Skills: Thinks creatively, makes decisions, solves problems, visualizes, knows how to learn, and reasons

A. Creative Thinking - generates new ideas

B. Decision Making - specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative

C. Problem Solving - recognizes problems and devises and implements plan of action

D. Seeing Things in the Mind's Eye - organizes, and processes symbols, pictures, graphs, objects, and other information

E. Knowing How-to-Learn - uses efficient learning techniques to acquire and apply new knowledge and skills

F. Reasoning - discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem

Personal Qualities: Displays responsibility, self-esteem, sociability, self-management, and integrity and honesty

A. Responsibility - exerts a high level of effort and perseveres toward goal attainment

B. Self-Esteem - believes in own self-worth and maintains a positive view of self

C. Sociability - demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings

D. Self-Management - assesses self accurately, sets personal goals, monitors progress, and exhibits self-control

E. Integrity/Honesty - chooses ethical courses of action

Course Syllabus

I. COURSE DESCRIPTION (catalog description)

DEPARTMENT: Pre-Technical Studies

COURSE: Math 060 Beginning Algebra I (2-3-3)

The purpose of this course is to give a background in pre-algebra and elementary algebraic concepts. It includes the concept of signed numbers, evaluating expressions, polynomials, operations with algebraic expressions, and factoring.

PREREQUISITE: MATH 050, or MATH placement test. (Developmental/No college credit granted)

II. COURSE GOALS AND OBJECTIVES:

Goal 1: Perform operations and applications with signed numbers.

Obj. 1a: Add and subtract signed numbers.

Sub-obj. 1a(1): Demonstrate the understanding of the meaning of signed numbers.

Sub-obj. 1a(2): Use absolute value.

Sub-obj. 1a(3): Add signed numbers.

Sub-obj. 1a(4): Subtract signed numbers.

Obj. 1b: Multiply and divide signed numbers.

Sub-obj. 1b(1): Multiply signed numbers.

Sub-obj. 1b(2): Divide signed numbers.

Goal 2: Perform operations with exponents and square roots.

Obj. 2a: Perform operations with exponents.

Sub-obj. 2a(1): Define exponent.

Sub-obj. 2a(2): Perform operations with exponents.

Sub-obj. 2a(3): Follow the order of operations with exponents.

Obj. 2b: Use square roots.

Sub-obj. 2b(1): Define square root.

Sub-obj. 2b(2): Compute square roots.

Goal 3: Perform the four basic operations with algebraic expressions.

Obj. 3a: Add and subtract algebraic expressions.

Sub-obj. 3a(1): Define variable, constant, and coefficient.

Sub-obj. 3a(2): Combine like terms.

Sub-obj. 3a(3): Simplify by removing parentheses.

Sub-obj. 3a(4): Add and subtract algebraic expressions.

Obj. 3b: Multiply and divide algebraic expressions.

Sub-obj. 3b(1): Multiply simple factors.

Sub-obj. 3b(2): Use the rules for multiplying numbers written in exponential form.

Sub-obj. 3b(3): Divide simple factors.

Sub-obj. 3b(4): Work with negative exponents.

Sub-obj. 3b(5): Multiply and divide algebraic expressions.

Goal 4: Demonstrate the understanding of factoring.

Obj. 4a: Demonstrate the understanding of factoring.

Sub-obj. 4a(1): Define factor.

Sub-obj. 4a(2): Find the factors of a whole number.

III. COURSE OUTLINE

Lecture/Lab

Students enrolled in Math 060 are scheduled in class for a period of 2 lecture hours per week and 3 lab hours per week.

Pre-Technical Studies is a self-paced, individualized program. For each course, students are given a diagnostic pre-test, a set of assignments over objectives they have not yet mastered (based on the diagnostic pre-test), and a comprehensive course mastery test.

In addition to scheduled lectures, one-on-one time with the instructor (based on the individual student's need) is considered to be part of the 2 hours of lecture per week.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 060.1a Add and subtract signed numbers.

Competencies 52-55

IMPORTANCE OF OBJECTIVE

Signed numbers are used to represent positive and negative quantities.

STUDENT WILL

Be able to add and subtract signed numbers.

TO THIS STANDARD

Students will pass Quiz 060.1a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 060.1b Multiply and divide signed numbers.

Competencies 56-57

IMPORTANCE OF OBJECTIVE

Signed numbers are used to represent positive and negative quantities.

STUDENT WILL

Be able to multiply and divide signed numbers.

TO THIS STANDARD

Students will pass Quiz 060.1b with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 060.2a Perform operations with exponents.

Competencies 58-60

IMPORTANCE OF OBJECTIVE

Exponents are used when the same number appears many times in a multiplication.

STUDENT WILL

Be able to perform operations with exponents.

TO THIS STANDARD

Students will pass Quiz 060.2a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 060.2b Use square roots.

Competencies 61-62

IMPORTANCE OF OBJECTIVE

Square roots allow us to solve problems involving area.

STUDENT WILL

Be able to compute square roots.

TO THIS STANDARD

Students will pass Quiz 060.2b with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 060.3a Add and subtract algebraic expressions.

Competencies 63-66

IMPORTANCE OF OBJECTIVE

Manipulating expressions is a useful procedure in algebra.

STUDENT WILL

Be able to add and subtract algebraic expressions.

TO THIS STANDARD

Students will pass Quiz 060.3a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 060.3b Multiply and divide algebraic expressions.
Competencies 67-71

IMPORTANCE OF OBJECTIVE

Manipulating expressions is an important part of algebra.

STUDENT WILL

Be able to multiply and divide algebraic expressions.

TO THIS STANDARD

Students will pass Quiz 060.3b with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 060.4a Demonstrate the understanding of factoring.
Competencies 72-73

IMPORTANCE OF OBJECTIVE

It is sometimes necessary to break an expression into its factors.

STUDENT WILL

Be able to find the factors of a whole number.

TO THIS STANDARD

Students will pass Quiz 060.4a with a score of 70% or better.

IV. MATERIALS INVENTORY SHEET

The following materials are required for Math 060:

Textbook:

Mathematics for the Trades, 3rd ed., Carman and Saunders, Prentice-Hall Publishing Company.

Additional Materials:

No. 2 pencils

Loose-leaf notebook paper

An electronic calculator.

V. GRADING/ATTENDANCE POLICY

Course grades are based on quizzes, tests, and attendance. A unit or objective is not considered to be complete unless the student has a grade of 70 or higher on the quiz or test covering the unit or objective.

Class is scheduled for five hours per week. If a student misses 10 or more hours of class, an excessive absence report will be filed on them with student services. If a student is absent for 5 hours or less during the quarter, they will receive an additional 5-point bonus on their course grade.

SCANS

The Three-Part Foundation competencies of SCANS is in the process of being fully integrated in Pre-Technical Mathematics.

These competencies are listed below.

Basic Skills: Reads, writes, performs arithmetic and mathematical operations, listens and speaks

- A. Reading - locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules
- B. Writing - not applicable to Pre-Technical Mathematics
- C. Arithmetic/Mathematics - performs basic computations and approaches practical problems by choosing appropriately from a variety of mathematical techniques
- D. Listening - receives, attends to, interprets, and responds to verbal messages and other cues
- E. Speaking - not applicable to Pre-Technical Mathematics

Thinking Skills: Thinks creatively, makes decisions, solves problems, visualizes, knows how to learn, and reasons

- A. Creative Thinking - generates new ideas
- B. Decision Making - specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative
- C. Problem Solving - recognizes problems and devises and implements plan of action
- D. Seeing Things in the Mind's Eye - organizes, and processes symbols, pictures, graphs, objects, and other information
- E. Knowing How-to-Learn - uses efficient learning techniques to acquire and apply new knowledge and skills
- F. Reasoning - discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem

Personal Qualities: Displays responsibility, self-esteem, sociability, self-management, and integrity and honesty

A. Responsibility - exerts a high level of effort and perseveres toward goal attainment

B. Self-Esteem - believes in own self-worth and maintains a positive view of self

C. Sociability - demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings

D. Self-Management - assesses self accurately, sets personal goals, monitors progress, and exhibits self-control

E. Integrity/Honesty - chooses ethical courses of action

Course Syllabus

I. COURSE DESCRIPTION (catalog description)

DEPARTMENT: Pre-Technical Studies

COURSE: Math 070 Beginning Algebra II (2-3-3)

This course is a continuance of MATH 060, Beginning Algebra I. It begins with rational expressions, followed by linear and quadratic equations, formulas and work problems. A basic geometry section will also be included.

PREREQUISITE: MATH 060 (Developmental/No college credit granted)

II. COURSE GOALS AND OBJECTIVES:

Goal 1: Solve equations and formulas.

Obj. 1a: Solve equations.

Sub-obj. 1a(1): Define equivalent equations.

Sub-obj. 1a(2): Solve linear equations.

Obj. 1b: Solve formulas.

Sub-obj. 1b(1): Evaluate formulas.

Sub-obj. 1b(2): Solve a formula for an indicated variable.

Goal 2: Work with fractions in beginning algebra.

Obj. 2a: Solve problems with fractions in beginning algebra.

Sub-obj. 2a(1): Solve equations involving fractions.

Sub-obj. 2a(2): Define ratio.

Sub-obj. 2a(3): Define proportion.

Sub-obj. 2a(4): Solve proportions.

Sub-obj. 2a(5): Solve word problems involving ratio and proportion.

Sub-obj. 2a(6): Distinguish between direct and inverse proportions.

Goal 3: Solve word problems involving algebra.

Obj. 3a: Solve word problems involving algebra.

Sub-obj. 3a(1): Translate words to algebra.

Sub-obj. 3a(2): Translate sentences to equations.

Sub-obj. 3a(3): Solve word problems using algebraic models.

Goal 4: Use concepts of geometry.

Obj. 4a: Apply angle facts.

Sub-obj. 4a(1): Label angles.

Sub-obj. 4a(2): Measure angles.

Sub-obj. 4a(3): Classify angles by their measures.

Sub-obj. 4a(4): Apply angle facts.

Obj. 4b: Solve problems involving polygons.

Sub-obj. 4b(1): Define polygon.

Sub-obj. 4b(2): Compute the perimeter of a polygon.

Sub-obj. 4b(3): Compute the area of a polygon.

Sub-obj. 4b(4): Use the Pythagorean theorem.

Obj. 4c: Solve problems involving circles and volume.

Sub-obj. 4c(1): Compute the circumference of a circle.

Sub-obj. 4c(2): Identify the parts of a circle.

Sub-obj. 4c(3): Compute the area of a circle.

Sub-obj. 4c(4): Compute the volume of a prism or pyramid.

Sub-obj. 4c(5): Compute the volume of a cylinder, cone, or sphere.

III. COURSE OUTLINE

Lecture/Lab

Students enrolled in Math 070 are scheduled in class for a period of 2 lecture hours per week and 3 lab hours per week.

Pre-Technical Studies is a self-paced, individualized program. For each course, students are given a diagnostic pre-test, a set of assignments over objectives they have not yet mastered (based on the diagnostic pre-test), and a comprehensive course mastery test.

In addition to scheduled lectures, one-on-one time with the instructor (based on the individual student's need) is considered to be part of the 2 hours of lecture per week.

JSEP Lesson:		
16h Use Word Problems.....		
7-4 Solving Word Problems, pp. 311-320		
Book: Exercise 7-4		
A. 1,4,7,10		
B. 1,4,7,10,13,16.....		
JSEP Lessons:		
12a Add and Subtract Whole Numbers - No Carrying		
12b Add and Subtract Whole Numbers - Carrying and Borrowing		
13a Multiply and Divide Whole Numbers..		
14b Reduce Fractions to Lowest Terms...		
14f Multiply and Divide Fractions.....		
16g Solve Problems Involving Ratio and Proportion		

7-5 Ratio and Proportion, pp. 320-341

Book: Exercise 7-5

A. 1,3

B. All odds

C. 1,4

D. 1,4,7,10,13,16

E. 1,2.....

7-6 Multiplying and Dividing Algebraic Expressions, pp. 341-346

Book: Exercise 7-6

A., B. All evens.....

Computer: Skills Bank II

Geometry and Algebra:

Lesson 15 Scientific Notation.....

7-7 Scientific Notation, pp. 346-352

Book: Exercise 7-7

A., B., C., D. All odds.....

Unit 7 Turn in exercises and ask for Test 7.
Unit 7 Exercises.....

Math 060, 070, or 101

Assignment Completion Record

Unit 7 (INT) Basic Algebra

Textbook: Mathematics for the Trades, 3rd ed.

Computer: Skills Bank II

	Grade	Date Completed
Skills Bank II (optional)		
Geometry and Algebra:		
Lesson 17 Simplifying Expressions.....	_____	_____
7-1 Algebraic Language and Formulas, pp. 275-284		
Book: Exercise 7-1		
A., B. All evens		
C. 1, 4, 7, 10, 13, 16, 19, 22.....	_____	_____
7-2 Adding and Subtracting Algebraic Expressions, pp. 284-290		
Book: Exercise 7-2		
A., B. All odds.....	_____	_____
Skills Bank II (optional)		
Math Concepts:		
Lesson 13 Missing Numbers in Equations.....	_____	_____
7-3 Solving Equations and Formulas, pp. 290- 310		
Book: Exercise 7-3		
A., B. All evens		
C. 1, 4, 7, 10, 13, 15.....	_____	_____
Skills Bank II (optional)

Unit 8 (CHT) Practical Plane Geometry

Textbook: Mathematics for the Trades, 3rd ed.

Computer: JSEP

*** Course: zcht0608 ***

Note - JSEP Lessons for Unit 8 will replace all Exercises for Unit 8. All Unit 8 exercises are optional.

	Grade	Date Completed
JSEP Lessons:		
1c Order Numbers in Specific Sequence..	_____	_____
2a Interpret the Markings on Linear Scales	_____	_____
3a Use Degrees as Units of Angular Measurement of Temperature	_____	_____
9a Identify Angles.....	_____	_____
3b Estimate the Size of an Angle not Greater than 180 Degrees	_____	_____
11a Identify Shape and Position Terms..	_____	_____
7a Identify Points, Lines, Line Segments, and Rays	_____	_____
8b Identify Characteristics of Plane Shapes	_____	_____
12a Add and Subtract Whole Numbers - No Carrying	_____	_____
12b Add and Subtract Whole Numbers - Carrying and Borrowing	_____	_____
13a Multiply and Divide Whole Numbers..	_____	_____
7b Identify Parallel, Intersecting, and Other Lines	_____	_____
7c Identify Perpendicular and Intersecting Lines	_____	_____
8-1 Angle Measurement, pp. 361-372 (optional)		
Book: Exercise 8-1		
A., B. All problems.....	_____	_____
JSEP Lessons:		
15c Identify Parts of Geometric Figures	_____	_____
8a Identify Geometric Shapes.....	_____	_____
15f Compute the Area and Perimeter of a Rectangle	_____	_____
8-2 Area and Perimeter of Polygons, pp. 372-385 (optional)		
Book: Exercise 8-2		
A., B. All problems.....	_____	_____

JSEP Lessons:

9c Identify Types of Triangles..... _____
15b Match Geometric Figures with Their Names _____

8-3 Triangles, pp. 385-403 (optional)
Exercises 8-3
A. 1, 2, 4, 6, 8, 9, 10, 11, 13, 15
B. 1, 3, 4, 5, 6, 8, 9, 10, 11, 12..... _____

JSEP Lesson:

15a Draw Plane Geometric Figures..... _____

9-4 Circles, pp. 403-414 (optional)
Exercises 9-4
A. All evens..... _____

Turn in Unit 8 Exercises and ask for Unit 8 test.

Math 060 or Math 070

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 070.1a Solve equations.

Competencies 75-77

IMPORTANCE OF OBJECTIVE

Equations are an integral part of algebra.

STUDENT WILL

Be able to solve linear equations.

TO THIS STANDARD

Students will pass Quiz 070.1a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 070.1b Solve formulas.

Competencies 74 and 77

IMPORTANCE OF OBJECTIVE

Very often a formula is not written in the form that is most useful. To use it you may need to rewrite the formula, solving it for the letter whose value you need to calculate.

STUDENT WILL

Be able to manipulate formulas.

TO THIS STANDARD

Students will pass Quiz 070.1b with a score of 70% or better.

INSTRUMENTATION TECHNOLOGY

ECC										
DEVELOP PROCESS CONTROL SYSTEM						COMPETENCY NUMBER				
						1004	1104	1203	1404	1503 160
NIET.08.01										
Understand fundamentals and contemporary process control theory.									3B	
NIET.08.02										
Select Electronic and Pneumatic devices used in measurement and control.										
NIET.08.03										
Knowledge of valve sizing and actuator selection aiterice.										
WORK KEYS SKILL

APPLIED TECHNOLOGY						4	5	6	6	6 6

TEXAS STATE TECHNICAL COLLEGE

EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 070.2a Solve problems with fractions in beginning algebra.

Competencies 78-83

IMPORTANCE OF OBJECTIVE

Technical workers use the ideas of ratio and proportion to solve very many technical problems.

STUDENT WILL

Be able to solve ratios and proportions.

TO THIS STANDARD

Students will pass Quiz 070.2a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE

EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 070.3a Solve word problems involving algebra.

Competencies 84-86

IMPORTANCE OF OBJECTIVE

Algebra is a very useful tool for solving real problems.

STUDENT WILL

Be able to solve word problems using algebraic models.

TO THIS STANDARD

Students will pass Quiz 070.3a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 070.4a Apply angle facts.

Competencies 87-90

IMPORTANCE OF OBJECTIVE

Knowing angle facts is useful throughout geometry and trigonometry.

STUDENT WILL

Be able to measure angles and apply angle facts.

TO THIS STANDARD

Students will pass Quiz 070.4a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 070.4b Solve problems involving polygons.

Competencies 91-94

IMPORTANCE OF OBJECTIVE

An understanding of polygons is important for every technical worker.

STUDENT WILL

Be able to compute the perimeter and area of a polygon.

TO THIS STANDARD

Students will pass Quiz 070.4b with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 070.4c Solve problems involving circles and volumes.

Competencies 95-99

IMPORTANCE OF OBJECTIVE

Technical workers must be able to identify solid figures and their component parts, and compute their volume.

STUDENT WILL

Be able to solve problems involving circles and volume.

TO THIS STANDARD

Students will pass Quiz 070.4c with a score of 70% or better.

IV. MATERIALS INVENTORY SHEET

The following materials are required for Math 070:

Textbook:

Mathematics for the Trades, 3rd ed., Carman and Saunders, Prentice-Hall Publishing Company.

Additional Materials:

No. 2 pencils

Loose-leaf notebook paper

An electronic calculator

A protractor

V. GRADING/ATTENDANCE POLICY

Course grades are based on quizzes, tests, and attendance. A unit or objective is not considered to be complete unless the student has a grade of 70 or higher on the quiz or test covering the unit or objective.

Class is scheduled for five hours per week. If a student misses 10 or more hours of class, an excessive absence report will be filed on them with student services. If a student is absent for 5 hours or less during the quarter, they will receive an additional 5-point bonus on their course grade.

SCANS

The Three-Part Foundation competencies of SCANS is in the process of being fully integrated in Pre-Technical Mathematics.

These competencies are listed below.

Basic Skills: Reads, writes, performs arithmetic and mathematical operations, listens and speaks

- A. Reading - locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules
- B. Writing - not applicable to Pre-Technical Mathematics
- C. Arithmetic/Mathematics - performs basic computations and approaches practical problems by choosing appropriately from a variety of mathematical techniques
- D. Listening - receives, attends to, interprets, and responds to verbal messages and other cues
- E. Speaking - not applicable to Pre-Technical Mathematics

Thinking Skills: Thinks creatively, makes decisions, solves problems, visualizes, knows how to learn, and reasons

- A. Creative Thinking - generates new ideas
- B. Decision Making - specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative
- C. Problem Solving - recognizes problems and devises and implements plan of action
- D. Seeing Things in the Mind's Eye - organizes, and processes symbols, pictures, graphs, objects, and other information
- E. Knowing How-to-Learn - uses efficient learning techniques to acquire and apply new knowledge and skills
- F. Reasoning - discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem

Personal Qualities: Displays responsibility, self-esteem, sociability, self-management, and integrity and honesty

A. Responsibility - exerts a high level of effort and perseveres toward goal attainment

B. Self-Esteem - believes in own self-worth and maintains a positive view of self

C. Sociability - demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings

D. Self-Management - assesses self accurately, sets personal goals, monitors progress, and exhibits self-control

E. Integrity/Honesty - chooses ethical courses of action

Course Syllabus

I. COURSE DESCRIPTION (catalog description)

DEPARTMENT: Pre-Technical Studies

COURSE: MTH 115 Occupational Mathematics (3-2-4)

This course includes basic English and Metric units of measurements, geometric principles, solutions of basic algebraic equations, and solution of right triangles. Problems from specific occupational areas will be stressed.

PREREQUISITE: Placement as determined by the MATH placement test.

II. COURSE GOALS AND OBJECTIVES:

Goal 1: Use measurements in a program-specific area.

Obj. 1a: Make measurement conversions.

Sub-obj. 1a(1): Convert measurements of time, length, weight, capacity, area, and volume.

Sub-obj. 1a(2): Change English to metric units.

Sub-obj. 1a(3): Change metric to English units.

Goal 2: Perform operations and applications with signed numbers.

Obj. 2a: Add and subtract signed numbers.

Sub-obj. 2a(1): Add signed numbers.

Sub-obj. 2a(2): Subtract signed numbers.

Obj. 2b: Multiply and divide signed numbers.

Sub-obj. 2b(1): Multiply signed numbers.

Sub-obj. 2b(2): Divide signed numbers.

Goal 3: Solve problems involving exponents.

Obj. 3a: Perform operations with exponents.

Sub-obj. 3a(1): Perform operations with exponents.

Sub-obj. 3a(2): Follow the order of operations with exponents.

Goal 4: Perform the four basic operations with algebraic expressions.

Obj. 4a: Add and subtract algebraic expressions.

Sub-obj. 4a(1): Add algebraic expressions.

Sub-obj. 4a(2): Subtract algebraic expressions.

Obj. 4b: Multiply and divide algebraic expressions.

Sub-obj. 4b(1): Multiply algebraic expressions.

Sub-obj. 4b(2): Divide algebraic expressions.

Goal 5: Solve equations and formulas.

Obj. 5a: Solve equations.

Sub-obj. 5a(1): Define equivalent equations.

Sub-obj. 5a(2): Solve linear equations.

Obj. 5b: Solve formulas.

Sub-obj. 5b(1): Evaluate formulas.

Sub-obj. 5b(2): Solve a formula for an indicated variable.

Goal 6: Demonstrate the understanding of ratio and proportion.

Obj. 6a: Solve problems with ratio and proportion.

Sub-obj. 6a(1): Define ratio.

Sub-obj. 6a(2): Define proportion.

Sub-obj. 6a(3): Solve proportions.

Sub-obj. 6a(4): Distinguish between direct and inverse proportions.

Goal 7: Use concepts of geometry.

Obj. 7a: Apply angle facts.

Sub-obj. 7a(1): Label angles.

Sub-obj. 7a(2): Measure angles.

Sub-obj. 7a(3): Classify angles by their measures.

Sub-obj. 7a(4): Apply angle facts.

Obj. 7b: Solve problems involving polygons.

Sub-obj. 7b(1): Define polygon.

Sub-obj. 7b(2): Compute the perimeter of a polygon.

Sub-obj. 7b(3): Compute the area of a polygon.

Sub-obj. 7b(4): Use the Pythagorean theorem.

Obj. 7c: Solve problems involving circles and volume.

Sub-obj. 7c(1): Compute the circumference of a circle.

Sub-obj. 7c(2): Identify the parts of a circle.

Sub-obj. 7c(3): Compute the area of a circle.

Sub-obj. 7c(4): Compute the volume of a prism or pyramid.

Sub-obj. 7c(5): Compute the volume of a cylinder, cone, or sphere.

Goal 8: Solve problems involving basic trigonometry.

Obj. 8a: Solve right triangles using basic trigonometry.

Obj. 8a(1): Define the sine, cosine, and tangent ratios.

Obj. 8a(2): Solve right triangles using the basic trigonometric functions.

III. COURSE OUTLINE

Lecture/Lab

Students enrolled in Math 115 are scheduled in class for a period of 3 lecture hours per week and 2 lab hours per week.

Pre-Technical Studies is a self-paced, individualized program. For each course, students are given a diagnostic pre-test, a set of assignments over objectives they have not yet mastered (based on the diagnostic pre-test), and a comprehensive course mastery test.

In addition to scheduled lectures, one-on-one time with the instructor (based on the individual student's need) is considered to be part of the 3 hours of lecture per week.

The content of the course is contained on the following pages.

Math 115

Assignment Completion Record

Unit 5 (IMM) Measurement

Textbook: Mathematics for the Trades, 3rd ed.

Computer: JSEP

*** Course: zimml155 ***

Computer: Skills Bank II

Grade Date Completed

Computer: Skills Bank II (optional)

Word Problems:

Lesson 12 Finding a Percent Using Proportions

4-3 Applications of Percent Calculations, pp. 152-166

Exercises 4-3

1-6, 17, 34.....

JSEP Lesson :

5c Read a Color Band Gauge.....

1c Order Numbers in Specific Sequence.....

2a Interpret the Markings on Linear Scales

5d Read and Interpret Scales with Positive and Negative Markings

5h Read a Moving Gauge.....

5-2 Units and Unit Conversion, pp. 187-197

Book: Exercise 5-2

A., B. All odds

C. 3, 3, 9.....

JSEP Lessons:

5e Read and Interpret Multi-Scale Gauges

5a Read and Interpret Gauges.....

5f Match a Gauge Reading to a Specification

5i Adjust Gauges to Meet Specifications

5-3 Metric Units, pp. 197-213

Book: Exercise 5-3

A., B., C. All evens

D. 1, 4, 5, 11.....

Unit 5 Turn in exercises and ask for Test 5.

Unit 5 Exercises

Assignment Completion Record

Unit 3 (IMM) Practical Plane Geometry

Textbook: Mathematics for the Trades, 3rd ed.

Computer: JSEP

*** Course: zimm0608 ***

Note - JSEP Lessons for Unit 3 will replace all Exercises for Unit 3. All Unit 3 exercises are optional.

	Grade	Date Completed
JSEP Lessons:		
1c Order Numbers in Specific Sequence..	_____	_____
2a Interpret the Markings on Linear Scales	_____	_____
3a Use Degrees as Units of Angular Measurement of Temperature	_____	_____
9a Identify Angles.....	_____	_____
3b Estimate the Size of an Angle not Greater than 180 Degrees	_____	_____
11a Identify Shape and Position Terms..	_____	_____
7a Identify Points, Lines, Line Segments, and Rays	_____	_____
7b Identify Parallel, Intersecting, and Other Lines	_____	_____
7c Identify Perpendicular and Intersecting Lines	_____	_____
3-1 Angle Measurement, pp. 361-372 (optional)		
Book: Exercise 3-1		
A., B. All problems.....	_____	_____
JSEP Lessons:		
15c Identify Parts of Geometric Figures	_____	_____
8a Identify Geometric Shapes.....	_____	_____
8b Identify Characteristics of Plane Shapes	_____	_____
15b Match Geometric Figures with Their Names	_____	_____
12a Add and Subtract Whole Numbers - No Carrying	_____	_____
12b Add and Subtract Whole Numbers - Carrying and Borrowing	_____	_____
13a Multiply and Divide Whole Numbers..	_____	_____
15f Compute the Area and Perimeter of a Rectangle	_____	_____
3-2 Area and Perimeter of Polygons, pp. 372-385 (optional)		

Book: Exercise 3-2
A., B. All problems.....

JSEP Lessons:

9b Identify Types of Angles.....
9c Identify Types of Triangles.....

3-3 Triangles, pp. 385-403 (optional)
Exercises 3-3
A. 1, 2, 4, 6, 8, 9, 10, 11, 13, 15
B. 1, 3, 4, 5, 6, 8, 9, 10, 11, 12.....

JSEP Lesson:

12c Add and Subtract Decimals.....
13b Multiply and Divide Decimal Numbers.....
15g Compute the Area and the Circumference of a Circle
.....

3-4 Circles, pp. 403-414 (optional)
Exercises 3-4
A. All evens.....

Math 060

Assignment Completion Record

Unit 9 (IMM) Solid Figures and Geometric Constructions

Textbook: Mathematics for the Trades

Computer: JSEP

*** Course: zimm1159 ***

Note - JSEP Lessons for Unit 9 will replace the Exercises for Unit 9. Unit 9 Exercises are optional.

JSEP Lessons:

10a Recognize Solid Figure Shapes and Match them to their Names _____

15h Compute the Area and Volume of Rectangular Solids _____

9-1 Prisms and Pyramids, pp. 423 - 436 (optional)

Exercises 9-1, pp. 433 - 436

A. 1, 2, 4, 6

D. 1, 2, 3..... _____

JSEP Lessons:

11a Identify Shape and Position Terms..... _____

3b Identify Characteristics of Plane Shapes _____

15f Compute the Area and Perimeter of a Rectangle _____

12a Add and Subtract Whole Numbers - No Carrying _____

12b Add and Subtract Whole Numbers - Carrying and Borrowing _____

12c Add and Subtract Decimals..... _____

13a Multiply and Divide Whole Numbers.. _____

13b Multiply and Divide Decimal Numbers _____

15g Compute the Area and the Circumference of a Circle _____

15i Use Formulas to Solve Problems Involving Geometric Figures _____

9-2 Cylinders, Cones, and Spheres, pp. 436-447 (optional)

Exercises 9-2, pp. 444-446

A. 1-10 All (volume only)

C. 1, 2, 3..... _____

JSEP Lessons:

9d Draw Bisectors of Angles and Altitudes of Triangles _____

15b Match Geometric Figures with Their Names _____

15a Draw Plane Geometric Figures.....

9.3 Geometric Constructions, pp. 447-461 (optional)

study the definitions of:

- bisecting a line segment
- bisecting an angle
- perpendicular
- congruence
- segment.....

Turn in Units 3 and 9 Exercises and ask for Units 3 and 9 Test.

Assignment Completion Record

MTH 115

Unit 10 Triangle Trigonometry

Date Completed

10-3 Solving Right Triangles, pp. 491-498

A. 4, 3, 12, 16

B. 7, 13..... _____

Unit 10 Turn in exercises and ask for Test 10.

Unit 10 exercises..... _____

IV. MATERIALS INVENTORY SHEET

The following materials are required for Math 115:

Textbook:

Mathematics for the Trades, by Carman and Saunders, Prentice-Hall, Inc., 3rd ed.

Additional Materials:

No. 2 pencils

Loose-leaf notebook paper

An electronic calculator

V. GRADING/ATTENDANCE POLICY

Course grades are based on quizzes, tests, and attendance. A unit or objective is not considered to be complete unless the student has a grade of 70 or higher on the quiz or test covering the unit or objective.

Class is scheduled for five hours per week. If a student misses 10 or more hours of class, an excessive absence report will be filed on them with student services. If a student is absent for 5 hours or less during the quarter, they will receive an additional 5-point bonus on their course grade.

SCANS

The Three-Part Foundation competencies of SCANS is in the process of being fully integrated in Pre-Technical Mathematics.

These competencies are listed below.

Basic Skills: Reads, writes, performs arithmetic and mathematical operations, listens and speaks

A. Reading - locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules

B. Writing - not applicable to Pre-Technical Mathematics

C. Arithmetic/Mathematics - performs basic computations and approaches practical problems by choosing appropriately from a variety of mathematical techniques

D. Listening - receives, attends to, interprets, and responds to verbal messages and other cues

E. Speaking - not applicable to Pre-Technical Mathematics

Thinking Skills: Thinks creatively, makes decisions, solves problems, visualizes, knows how to learn, and reasons

A. Creative Thinking - generates new ideas

B. Decision Making - specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative

C. Problem Solving - recognizes problems and devises and implements plan of action

D. Seeing Things in the Mind's Eye - organizes, and processes symbols, pictures, graphs, objects, and other information

E. Knowing How-to-Learn - uses efficient learning techniques to acquire and apply new knowledge and skills

F. Reasoning - discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem

Personal Qualities: Displays responsibility, self-esteem, sociability, self-management, and integrity and honesty

A. Responsibility - exerts a high level of effort and perseveres toward goal attainment

B. Self-Esteem - believes in own self-worth and maintains a positive view of self

C. Sociability - demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings

D. Self-Management - assesses self accurately, sets personal goals, monitors progress, and exhibits self-control

E. Integrity/Honesty - chooses ethical courses of action

TASP OBJECTIVES/SKILLS

MATHEMATICS

OBJECTIVE 1. Use number concepts and computational skills

- Skill: 1. Operations with fractions
- . mixed numbers, reducing (simplifying)
 - . adding, subtracting
 - . multiplying, dividing
2. Operations with decimals
- . meaning of
 - . changing fractions to decimals
 - . adding and subtracting
 - . multiplying and dividing
3. Operations with integers (the counting numbers, positive and negative)
- . rules for operations with signed numbers
4. Exponents/ Scientific Notation
5. Order of operations
(Pretty Please My Dear Aunt Sally)
6. Percents
7. Estimating
8. Less than, greater than (comparing fractions)

OBJECTIVE 2. Word problems involving integers, fractions, decimals, percents ratios and proportions.

OBJECTIVE 3. Interpret information from a graph, table, or chart

OBJECTIVE 4. Graph numbers or number relationships

- Skill 1. One variable graphing
2. Two variable graphing
- . finding coordinates of a point
 - . graphing $3x + 2y = 6$
 - . graphing intercept points
 - . horizontal and vertical lines
 - . graphing $2x - y \leq 5$
 - . graphing $x + 3y < 6$
3. Slopes and intercepts of lines
4. Direct and inverse variation

OBJECTIVE 5. Solve one- and two-variable equations

- Skill 1. One-variable equations
- . $2x - 3 = 7$
 - . $3x - 4 = -8x + 5$
 - . $2(x-3) + 2 = 4x$
 - . $-3/5 x + 2 = 5$
2. Two-variable equations
- . $3x + 2y = 6$, for x
 - . $5/2 x - 2/3 y = 4$, for y

~~$\frac{5}{2}x - \frac{2}{3}y = 4$, for y~~

3. Solving a system of linear equations
 - . solving a system of equations
 - . eliminating y to solve a system
 - . inconsistent system of equations
 - . dependent system of equations

- OBJECTIVE 6. Word problems involving one and two variables
- . guidelines for solving word problems
 - . word problems using one or two variables
 - . coin word problems
 - . interest word problems
 - . distance word problems
 - . distance/time word problems
 - . solving word problems using a picture

- OBJECTIVE 7 Understand operations with algebraic expressions

Skill 1. Adding and Subtracting polynomials

2. Multiplying polynomials
 - . multiplying polynomials
 - . the FOIL method
 - . applications of FOIL method
 - . multiplying polynomials using a vertical arrangement
3. Factoring polynomials
 - . finding common monomials factors
 - . factoring by the common factor method
 - . factoring trinomials by considering possible FOIL combinations
 - . possible factors of $6x^2 + 5x - 6$
 - . factoring $8x^2 - 10x + 3$
 - . factoring $x^2 + 8x + 16$
 - . factoring differences of two squares
 - . sum and difference of two cubes
 - . factoring sums and differences of cubes
4. Simplifying or reducing rational expressions
5. Multiplying and dividing rational expressions
6. Adding and subtracting rational expressions

- OBJECTIVE 8 Solve problems involving quadratic equations

Skill 1. Graphing quadratic equations

- . preparing to graph equation
 - . graphing equation
2. Solving quadratic equations
 - . by factoring
 - . by using the formula
 3. Solving word problems involving quadratics
 - . the process
 - . age problems
 - . geometry problem
 4. Identifying algebraic relationships which are represented by quadratics
 - . writing equation for word problems

- OBJECTIVE 9. Solve problems involving geometric figures
- Skill 1. Identifying geometric formulas
 - 2. Solving problems using two- and three-dimensional geometric figures
 - . a process for solving geometric problems
 - . perimeter, circumference
 - . area
 - . surface area, volume
 - 3. Solving right triangle problems using the Pythagorean theorem
- OBJECTIVE 10. Apply reasoning skills
- Skill 1. Basic definitions, terms, and assumptions
 - 2. Drawing conclusions using the principles of similarity, congruence, parallelism, and perpendicularity.
 - . Proportions used with similar triangles
 - . Solving problem of similar triangles
 - . Solving isosceles triangle problem
 - 3. Using inductive and deductive reasoning
 - . deductive and inductive reasoning
 - . patterns in number sequences.
 - . looking for patterns

Course Syllabus

I. COURSE DESCRIPTION (catalog description)

DEPARTMENT: Pre-Technical Studies

COURSE: Math 090 Math TASP Review (0-2-1)

An intensive review of mathematics for students who have not passed the math portion of the TASP. Instruction is focused on individual needs, employing computer software and videotape study guides. Instruction is presented through lecture and experience in the developmental and/or math labs.

II. COURSE OBJECTIVES:

1. Mathematics fundamentals
2. Solve word problems involving integers, fractions, decimals, and units of measurement
3. Solve problems involving data interpretation and analysis
4. Graph numbers or number relationships
5. Solve one- and two-variable equations
6. Solve word problems involving one and two variables
7. Understand operations with algebraic expressions and functional notation
8. Solve problems involving quadratic equations
9. Solve problems involving geometric figures
10. Solve problems involving geometric concepts
11. Apply reasoning skills
12. Solve problems involving a combination of mathematical skills

III. COURSE OUTLINE

Lecture/Lab

Students enrolled in Math 090 are scheduled in class for a period of 2 lab hours per week.

Pre-Technical Studies is a self-paced, individualized program. For each course, students are given a diagnostic pre-test, a set of assignments over objectives they have not yet mastered (based on the diagnostic pre-test), and a comprehensive course mastery test.

| <u>Ch. 19</u> | Solve Problems Involving Geometric Concepts | _____ |
| <u>Ch. 20</u> | Apply Reasoning Skills | _____ |
| <u>Ch. 21</u> | Solve Problems Involving a Combination of Mathematical
Skills | _____ |

* Note - Each chapter will consist of a Practice Test and
Diagnostic Review.

3. Retake the Practice Test _____

* Note - The student's grade will be based upon attendance and
effort.

IV. MATERIALS INVENTORY SHEET

The following materials are required for Math 090:

Textbook:

The Official TASP Test Study Guide, 1993 --ed., National Evaluation Systems, Incorporated.

Additional Materials:

No. 2 pencils

Loose-leaf notebook paper

V. GRADING/ATTENDANCE POLICY

Course grades are based on quizzes, tests, and attendance. A unit or objective is not considered to be complete unless the student has a grade of 70 or higher on the quiz or test covering the unit or objective.

Class is scheduled for two hours per week. If a student misses 4 or more hours of class, an excessive absence report will be filed on them with student services. If a student is absent for 2 hours or less during the quarter, they will receive an additional 5-point bonus on their course grade.

SCANS

The Three-Part Foundation competencies of SCANS is in the process of being fully integrated in Pre-Technical Mathematics.

These competencies are listed below. ---

Basic Skills: Reads, writes, performs arithmetic and mathematical operations, listens and speaks

- A. Reading - locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules
- B. Writing - not applicable to Pre-Technical Mathematics
- C. Arithmetic/Mathematics - performs basic computations and approaches practical problems by choosing appropriately from a variety of mathematical techniques
- D. Listening - receives, attends to, interprets, and responds to verbal messages and other cues
- E. Speaking - not applicable to Pre-Technical Mathematics

Thinking Skills: Thinks creatively, makes decisions, solves problems, visualizes, knows how to learn, and reasons

- A. Creative Thinking - generates new ideas
- B. Decision Making - specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative
- C. Problem Solving - recognizes problems and devises and implements plan of action
- D. Seeing Things in the Mind's Eye - organizes, and processes symbols, pictures, graphs, objects, and other information
- E. Knowing How-to-Learn - uses efficient learning techniques to acquire and apply new knowledge and skills
- F. Reasoning - discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem

Personal Qualities: Displays responsibility, self-esteem, sociability, self-management, and integrity and honesty

A. Responsibility - exerts a high level of effort and perseveres toward goal attainment

B. Self-Esteem - believes in own self-worth and maintains a positive view of self

C. Sociability - demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings

D. Self-Management - assesses self accurately, sets personal goals, monitors progress, and exhibits self-control

E. Integrity/Honesty - chooses ethical courses of action

Course Syllabus

I. COURSE DESCRIPTION (catalog description)

DEPARTMENT: Pre-Technical Studies

COURSE: Math 101 Introductory Algebra (2-3-3)

An introductory algebra course covering operations involving real numbers, polynomials and rational expressions, solutions of linear equations and formulas, and factoring.

PREREQUISITE: Placement determined by MATH placement test.
(Developmental/No college credit granted)

II. COURSE GOALS AND OBJECTIVES:

Goal 1: Perform operations with signed numbers.

Obj. 1a: Perform operations with signed numbers.

Sub-obj. 1a(1): Add signed numbers.

Sub-obj. 1a(2): Subtract signed numbers.

Sub-obj. 1a(3): Multiply signed numbers.

Sub-obj. 1a(4): Divide signed numbers.

Goal 2: Perform operations with exponents.

Obj. 2a: Perform operations with exponents.

Sub-obj. 2a(1): Perform operations with exponents.

Sub-obj. 2a(2): Follow the order of operations with exponents.

Goal 3: Perform the four basic operations with algebraic expressions.

Obj. 3a: Perform the four basic operations with algebraic expressions.

Sub-obj. 3a(1): Add and subtract algebraic expressions.

Sub-obj. 3a(2): Multiply and divide algebraic expressions.

Goal 4: Solve problems involving equations and formulas.

Obj. 4a: Solve problems involving equations and formulas.

Sub-obj. 4a(1): Evaluate formulas.

Sub-obj. 4a(2): Solve linear equations. ---

Sub-obj. 4a(3): Solve a formula for an indicated variable.

Goal 5: Perform operations involving factoring.

Obj. 5a: Demonstrate the understanding of the basic concepts of factoring.

Sub-obj. 5a(1): Define factor.

Sub-obj. 5a(2): Find the factors of a whole number.

III. COURSE OUTLINE

Lecture/Lab

Students enrolled in Math 101 are scheduled in class for a period of 2 lecture hours per week and 3 lab hours per week.

Pre-Technical Studies is a self-paced, individualized program. For each course, students are given a diagnostic pre-test, a set of assignments over objectives they have not yet mastered (based on the diagnostic pre-test), and a comprehensive course mastery test.

In addition to scheduled lectures, one-on-one time with the instructor (based on the individual student's need) is considered to be part of the 2 hours of lecture per week.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 101.1a Perform operations with signed numbers.

Competencies 54-57

IMPORTANCE OF OBJECTIVE

Signed numbers are used to represent positive and negative quantities.

STUDENT WILL

Perform operations with signed numbers.

TO THIS STANDARD

Students will pass Quiz 101.1a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 101.2a Perform operations with exponents.

Competencies 59-60

IMPORTANCE OF OBJECTIVE

Exponents are used when the same number appears many times in a multiplication.

STUDENT WILL

Be able to perform operations with exponents.

TO THIS STANDARD

Students will pass Quiz 101.2a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 101.3a Perform the four basic operations with algebraic expressions.

Competencies 66 and 71

IMPORTANCE OF OBJECTIVE

Manipulating expressions is a useful procedure in algebra.

STUDENT WILL

Be able to add, subtract, multiply, and divide algebraic expressions.

TO THIS STANDARD

Students will pass Quiz 101.3a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 101.4a Solve problems involving equations and formulas.

Competencies 74, 76-77

IMPORTANCE OF OBJECTIVE

Equations are an integral part of algebra.

STUDENT WILL

Be able to solve linear equations and manipulate formulas.

TO THIS STANDARD

Students will pass Quiz 101.4a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 101.5a Demonstrate the understanding of factoring.
Competencies 72-73

IMPORTANCE OF OBJECTIVE

It is sometimes necessary to break an expression into its factors.

STUDENT WILL

Be able to find the factors of a whole number.

TO THIS STANDARD

Students will pass Quiz 101.5a with a score of 70% or better.

IV. MATERIALS INVENTORY SHEET

The following materials are required for Math 101:

Textbook:

Mathematics for the Trades, 3rd ed., Carman and--Saunders,
Prentice-Hall Publishing Company.

Additional Materials:

No. 2 pencils

Loose-leaf notebook paper

An electronic calculator

V. GRADING/ATTENDANCE POLICY

Course grades are based on quizzes, tests, and attendance. A unit or objective is not considered to be complete unless the student has a grade of 70 or higher on the quiz or test covering the unit or objective.

Class is scheduled for five hours per week. If a student misses 10 or more hours of class, an excessive absence report will be filed on them with student services. If a student is absent for 5 hours or less during the quarter, they will receive an additional 5-point bonus on their course grade.

SCANS

The Three-Part Foundation competencies of SCANS is in the process of being fully integrated in Pre-Technical Mathematics.

These competencies are listed below.

Basic Skills: Reads, writes, performs arithmetic and mathematical operations, listens and speaks

- A. Reading - locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules
- B. Writing - not applicable to Pre-Technical Mathematics
- C. Arithmetic/Mathematics - performs basic computations and approaches practical problems by choosing appropriately from a variety of mathematical techniques
- D. Listening - receives, attends to, interprets, and responds to verbal messages and other cues
- E. Speaking - not applicable to Pre-Technical Mathematics

Thinking Skills: Thinks creatively, makes decisions, solves problems, visualizes, knows how to learn, and reasons

- A. Creative Thinking - generates new ideas
- B. Decision Making - specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative
- C. Problem Solving - recognizes problems and devises and implements plan of action
- D. Seeing Things in the Mind's Eye - organizes, and processes symbols, pictures, graphs, objects, and other information
- E. Knowing How-to-Learn - uses efficient learning techniques to acquire and apply new knowledge and skills
- F. Reasoning - discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem

Personal Qualities: Displays responsibility, self-esteem, sociability, self-management, and integrity and honesty

A. Responsibility - exerts a high level of effort and perseveres toward goal attainment

B. Self-Esteem - believes in own self-worth and maintains a positive view of self

C. Sociability - demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings

D. Self-Management - assesses self accurately, sets personal goals, monitors progress, and exhibits self-control

E. Integrity/Honesty - chooses ethical courses of action

Course Syllabus

I. COURSE DESCRIPTION (catalog description)

DEPARTMENT: Pre-Technical Studies

COURSE: Math 104 Intermediate Algebra (4-0-3)

A study of relations and functions, inequalities, polynomials, rational expression and quadratics with an introduction to complex numbers, and determinants.

PREREQUISITE: Math 101, or equivalent as determined by MATH placement test. (Developmental/No college credit granted)

II. COURSE GOALS AND OBJECTIVES:

Goal 1: Demonstrate the understanding of the real number system.

Obj. 1a: Demonstrate the understanding of the real number system.

Sub-obj. 1a(1): Determine whether a number is natural, an integer, rational, or irrational.

Sub-obj. 1a(2): Order real numbers.

Sub-obj. 1a(3): Determine the distance between two real numbers.

Goal 2: Demonstrate the understanding of exponents.

Obj. 2a: Solve problems involving exponents.

Sub-obj. 2a(1): Define exponent.

Sub-obj. 2a(2): Perform operations with exponents.

Sub-obj. 2a(3): Follow the order of operations with exponents.

Goal 3: Demonstrate the understanding of radicals.

Obj. 3a: Solve problems involving radicals.

Sub-obj. 3a(1): Distinguish between the parts of a radical expression.

Sub-obj. 3a(2): Use the properties of radicals.

Sub-obj. 3a(3): Simplify radicals.

Sub-obj. 3a(4): Rationalize numerators and denominators.

Goal 4: Demonstrate the understanding of polynomials.

Obj. 4a: Solve problems involving polynomials.

Sub-obj. 4a(1): Define polynomial.
Sub-obj. 4a(2): Add and subtract polynomials.
Sub-obj. 4a(3): Multiply and divide polynomials.
Sub-obj. 4a(4): Find special products of polynomials.

Goal 5: Factor polynomials.

Obj. 5a: Perform operations involving the factoring of polynomials.

Sub-obj. 5a(1): Factor polynomials with common factors.
Sub-obj. 5a(2): Factor the difference of two squares, perfect square trinomials, and the sum and difference of cubes.
Sub-obj. 5a(3): Factor trinomials with binomial factors.
Sub-obj. 5a(4): Factor by grouping.

Goal 6: Solve problems involving fractional expressions.

Obj. 6a: Perform operations involving fractional expressions.

Sub-obj. 6a(1): Determine the domain of an algebraic expression.
Sub-obj. 6a(2): Simplify rational expressions.
Sub-obj. 6a(3): Add and subtract rational expressions.
Sub-obj. 6a(4): Multiply and divide rational expressions.
Sub-obj. 6a(5): Simplify compound fractions.

Goal 7: Solve problems involving linear equations.

Obj. 7a: Solve problems involving linear equations.

Sub-obj. 7a(1): Solve linear equations.
Sub-obj. 7a(2): Solve equations involving fractions.
Sub-obj. 7a(3): Solve word problems using algebraic models.

Goal 8: Solve quadratic equations.

Obj. 8a: Use various techniques to solve quadratic equations.

Sub-obj. 8a(1): Define quadratic equation.
Sub-obj. 8a(2): Solve quadratic equations by factoring.

Sub-obj. 8a(3): Solve quadratic equations by extracting square roots.

Sub-obj. 8a(4): Solve quadratic equations by completing the square.

Sub-obj. 8a(5): Solve quadratic equations by using the Quadratic Formula.

Goal 9: Demonstrate the understanding of complex numbers.

Obj. 9a: Perform the basic operations with complex numbers.

Sub-obj. 9a(1): Define the imaginary unit i .

Sub-obj. 9a(2): Add and subtract complex numbers.

Sub-obj. 9a(3): Multiply and divide complex numbers.

Goal 10: Demonstrate the understanding of linear inequalities.

Obj. 10a: Solve problems involving linear inequalities.

Sub-obj. 10a(1): Determine the intervals on the real number line for an inequality.

Sub-obj. 10a(2): Solve a linear inequality.

Sub-obj. 10a(3): Solve an inequality involving absolute value.

Goal 11: Solve systems of equations.

Obj. 11a: Use various techniques to solve systems of linear equations.

Sub-obj. 11a(1): Solve systems of linear equations by the method of substitution.

Sub-obj. 11a(2): Solve systems of linear equations by the method of elimination.

Sub-obj. 11a(3): Solve systems of linear inequalities.

Goal 12: Demonstrate the understanding of graphing.

Obj. 12a: Solve problems involving graphing.

Sub-obj. 12a(1): Graph linear equations.

Sub-obj. 12a(2): Graph linear inequalities.

Sub-obj. 12a(3): Graph linear functions.

Sub-obj. 12a(4): Graph quadratic functions.

III. COURSE OUTLINE

Lecture/Lab

Students enrolled in Math 104 are scheduled in class for a period of 4 lecture hours per week.

Pre-Technical Studies is a self-paced, individualized program. For each course, students are given a diagnostic pre-test, a set of assignments over objectives they have not yet mastered (based on the diagnostic pre-test), and a comprehensive course mastery test.

In addition to scheduled lectures, one-on-one time with the instructor (based on the individual student's need) is considered to be part of the 4 hours of lecture per week.

Cumulative Review, p.164, 1, 3-7.....	_____	_____
Ask for the Unit 7 Test.		

Math 070, Math 101, or Math 104

After you have completed all of the units (1-7), you will take a Course Mastery Test.

The Final Review will help you prepare for the Course Mastery Test.

Exercises:

Final Review, p.165-168, 1, 2-8(a,b,d), 9-14, 15-18(a,b,d), 19-22, 23-27(a,c), 28-29, 30-36(a,c), 37-38

Ask for the Course Mastery Test.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.1a Demonstrate the understanding of the real number system.

Competencies 100-102

IMPORTANCE OF OBJECTIVE

It is important to understand the forms in which a number can be expressed.

STUDENT WILL

Be able to tell the type of number a quantity is.

TO THIS STANDARD

Students will pass Quiz 104.1a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.2a Solve problems involving exponents.

Competencies 58-60

IMPORTANCE OF OBJECTIVE

Exponents are used when we encounter a number which is to be multiplied by itself several times.

STUDENT WILL

Be able to perform operations with exponents.

TO THIS STANDARD

Students will pass Quiz 104.2a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.3a Solve problems involving radicals.

Competencies 103-106

IMPORTANCE OF OBJECTIVE

Roots are used in many applications.

STUDENT WILL

Be able to simplify radicals.

TO THIS STANDARD

Students will pass Quiz 104 3a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.4a Solve problems involving polynomials.

Competencies 107-110

IMPORTANCE OF OBJECTIVE

Polynomials can be applied to real situations requiring operations with algebraic expressions.

STUDENT WILL

Be able to perform the four basic operations with polynomials.

TO THIS STANDARD

Students will pass Quiz 104.4a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE

EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.5a Perform operations involving the factoring of polynomials.

Competencies 111-114

IMPORTANCE OF OBJECTIVE

Complicated algebraic expressions can often be expressed in a simplified form through the process of factoring.

STUDENT WILL

Be able to factor polynomials.

TO THIS STANDARD

Students will pass Quiz 104.5a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.6a Perform operations involving fractional expressions.

Competencies 115-119

IMPORTANCE OF OBJECTIVE

Algebraic fractions form a basis which enables us to solve many applied problems.

STUDENT WILL

Be able to perform the basic operations with fractional expressions.

TO THIS STANDARD

Students will pass Quiz 104.6a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.7a Solve problems involving linear equations.
Competencies 76, 78, and 86

IMPORTANCE OF OBJECTIVE
Solving for unknowns is an essential component of algebra.

STUDENT WILL
Be able to solve linear equations.

TO THIS STANDARD
Students will pass Quiz 104.7a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.8a Use various techniques to solve quadratic equations.

Competencies 120-124

IMPORTANCE OF OBJECTIVE

Quadratic equations are used in many applications.

STUDENT WILL

Be able to solve quadratic equations.

TO THIS STANDARD

Students will pass Quiz 104.8a with a score of 80% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.9a Perform the basic operations with complex numbers.

Competencies 125-127

2400 EAST END BLVD. SO.
MARSHALL, TEXAS 75670

P.O. BOX 1269
MARSHALL, TEXAS 75671

903/935-1010
FAX: 903/935-9554

IMPORTANCE OF OBJECTIVE

Complex numbers are used in the development of shapes and in many electrical applications.

STUDENT WILL

Be able to add, subtract, multiply, and divide complex numbers.

TO THIS STANDARD

Students will pass Quiz 104.9a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.10a Solve problems involving linear inequalities.

Competencies 128-130

IMPORTANCE OF OBJECTIVE

Inequalities are used in many technical applications.

STUDENT WILL

Be able to solve linear inequalities.

TO THIS STANDARD

Students will pass Quiz 104.10a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.11a Use various techniques to solve systems of linear equations.

Competencies 131-133

IMPORTANCE OF OBJECTIVE

Many types of stated problems from a wide variety of fields lead to systems of equations.

STUDENT WILL

Be able to solve systems of linear equations.

TO THIS STANDARD

Students will pass Quiz 104.11a with a score of 70% or better.

TEXAS STATE TECHNICAL COLLEGE
EAST TEXAS CENTER AT MARSHALL

PERFORMANCE STANDARDS

OBJECTIVE: 104.12a Solve problems involving graphing.

Competencies 134-137

IMPORTANCE OF OBJECTIVE

Graphs depict some type of relationship between variabl quantities.

STUDENT WILL

Be able to linear and quadratic functions.

TO THIS STANDARD

Students will pass Quiz 104.12a with a score of 70% or better.

IV. MATERIALS INVENTORY SHEET

The following materials are required for Math 104:

Textbook:

Working with Numbers: Algebra, 1990 ed., Shea, James T.,
Steck-Vaughn Company.

Additional Materials:

No. 2 pencils

Loose-leaf notebook paper

An electronic calculator

V. GRADING/ATTENDANCE POLICY

Course grades are based on quizzes, tests, and attendance. A unit or objective is not considered to be complete unless the student has a grade of 70 or higher on the quiz or test covering the unit or objective.

Class is scheduled for four hours per week. If a student misses 8 or more hours of class, an excessive absence report will be filed on them with student services. If a student is absent for 5 hours or less during the quarter, they will receive an additional 5-point bonus on their course grade.

SCANS

The Three-Part Foundation competencies of SCANS is in the process of being fully integrated in Pre-Technical Mathematics.

These competencies are listed below.

Basic Skills: Reads, writes, performs arithmetic and mathematical operations, listens and speaks

- A. Reading - locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules
- B. Writing - not applicable to Pre-Technical Mathematics
- C. Arithmetic/Mathematics - performs basic computations and approaches practical problems by choosing appropriately from a variety of mathematical techniques
- D. Listening - receives, attends to, interprets, and responds to verbal messages and other cues
- E. Speaking - not applicable to Pre-Technical Mathematics

Thinking Skills: Thinks creatively, makes decisions, solves problems, visualizes, knows how to learn, and reasons

- A. Creative Thinking - generates new ideas
- B. Decision Making - specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative
- C. Problem Solving - recognizes problems and devises and implements plan of action
- D. Seeing Things in the Mind's Eye - organizes, and processes symbols, pictures, graphs, objects, and other information
- E. Knowing How-to-Learn - uses efficient learning techniques to acquire and apply new knowledge and skills
- F. Reasoning - discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem

Personal Qualities: Displays responsibility, self-esteem, sociability, self-management, and integrity and honesty

A. Responsibility - exerts a high level of effort and perseveres toward goal attainment

B. Self-Esteem - believes in own self-worth and maintains a positive view of self

C. Sociability - demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings

D. Self-Management - assesses self accurately, sets personal goals, monitors progress, and exhibits self-control

E. Integrity/Honesty - chooses ethical courses of action

Communications

STUDENT COMPETENCY PROFILE

NAME _____

PRE-TECH CLASS COURSE DESCRIPTION

PRE-TECH ENGLISH

ENG 010

WRITING SKILLS I (1-3-2)

An introductory course designed to instruct students in essential written communication skills. It includes studies in the sentence and its parts, punctuation, capitalization, the parts of speech, spelling, and language usage. Prerequisite: English placement test.

ENG 020

WRITING SKILLS II (2-2-3)

Review of basic sentence grammar and mechanical skills, with an emphasis on writing, editing, and revising paragraphs. Introduction to the multi-paragraph essay. Prerequisite: English placement test.

ENG 090

WRITING TASP REVIEW (0-2-1)

An intensive review of writing for students who have not passed the writing portion of the TASP. Instruction is focused on individual needs, employing computer software, written exercises, and videotape study guides. Instruction is presented via lecture and practice in the Developmental and/or English labs.

ENGLISH 010/020 and
READING 020/030

INSTRUCTIONAL MODE:

This is a self-paced, individualized class. You will be given a diagnostic test to help determine what you already know and where best to begin. Your progress through assignments are recorded in your class folder. You need to be sure this is kept up to date. Work through your assignments, completing all exercises as indicated.
YOU ARE RESPONSIBLE FOR THE COMPLETION OF ALL ASSIGNMENTS.

COMPUTER:

There are various computer programs we will be using depending upon individual student need. The reading classes will be working with the SkillsBank program. The writing classes will be using Practical Grammar, Job Skills Educational Program, and SkillsBank. You will be assigned an ID number and a password. It is your responsibility to keep this information accessible. A checklist will be provided to be kept in your folder. As you pass each lesson test, record your score on the checklist. If you do not pass the test, you may repeat it.

JOURNALS:

All writing students are required to keep a writing/spelling/vocabulary journal, which will be turned in for grading at the end of the quarter. Writing activities will be assigned during the lecture portion of the class. Students are to continuously add misspelled or difficult words to their spelling list by writing each word three times and then using it in a sentence. Students should continuously add new or unknown words to their vocabulary list by writing the definition and using the word in a sentence.

REFLECTION LOGS

At the end of each class all students will complete a Reflection Log, which is self-explanatory.

RULES FOR PAPERS TO BE TURNED IN:

All work which is turned in for grading must be properly headed. In the upper righthand corner write your name, your course, the current date, and the assignment. All work must be typed or written legibly. Sloppy work will not be accepted.

TEXTBOOKS:

In addition to the required textbooks listed in the course syllabus, all students **must** have a dictionary.

CLASS FOLDERS:

Each student will be given a class folder which will contain your Assignment Completion Record. The folder is to be filed in the white box for the English/Reading classes behind the appropriate section.

ATTENDANCE:

You are expected to attend all classes until all requirements are satisfactorily met. There will be a daily sign-in sheet. You must sign-in when you enter and leave class, for any reason, including breaks. You must have the instructor or lab assistant verify your sign-in and out times.

GRADES:

Assignments will be graded on completion and accuracy. The grading scale is indicated in the course syllabus. Class participation is expected. Excessive absences will result in a lower grade.

You are expected to complete all assignments. If you attend all classes, but are unable to complete all assignments, you will be assigned an Incomplete. It is your responsibility to make arrangements with the Instructor to clear the incomplete. If you do not complete because of attendance or attitude, you will be given an F and expected to repeat the entire class.

LECTURE/LAB:

All students are scheduled for one to two hours of lecture per week. During this time the Instructor will lecture on text material, including grammar, spelling, vocabulary, and reading, and assign various writing activities. Lecture time is not the place to do homework. Lab time is for working on your computer assignments, getting help as needed, reviewing homework, taking tests, etc. It is not the place to do homework, unless instructed to do so.

FINAL EXAMINATION: All classes will have a final exam, as indicated in the course syllabus.

TASP TEST:

IF YOU HAVE NOT TAKEN TASP, YOU MUST DO SO BEFORE CONTINUING WITH YOUR MAJOR SUBJECTS. THE NEXT TASP TEST WILL BE GIVEN ON JUNE 18, 1994. THE REGISTRATION DEADLINE IS MAY 20, 1994. YOU MUST PASS TASP PRIOR TO OBTAINING 60 CREDIT HOURS. IF YOU DO NOT, YOU MUST REMAIN IN PRE-TECH CLASSES ONLY.

SYLLABUS

ENGLISH 010

COURSE DESCRIPTION:

An introductory course designed to instruct students in essential written communication skills. It includes studies in the sentence and its parts, punctuation, capitalization, the parts of speech, spelling, and language usage. Prerequisite: English placement test.

COURSE OBJECTIVES:

Upon completion, students will be able to:

1. Demonstrate knowledge of proper verb usage.
2. Demonstrate knowledge of proper use of adjectives and adverbs.
3. Demonstrate proper use of verbal and prepositional phrases.
4. Demonstrate understanding of subject-verb agreement.
5. Demonstrate use of independent and dependent clauses.
6. Demonstrate knowledge of punctuation.
7. Demonstrate understanding of fragmented sentences.
8. Demonstrate knowledge of proper use of pronouns and antecedents.
9. Use all parts of speech effectively in sentences.
10. Refine spelling techniques and patterns.
11. Produce sentences that convey coordinate and subordinate ideas appropriately.
12. Use a variety of sentence structures including simple, compound, complex, and compound-complex.
13. Demonstrate the fundamentals of paragraph writing.

COURSE OUTLINE:

This is an individualized, self-paced course. All students are responsible for attending all classes until the requirements are met. Students will take a diagnostic test to determine placement and assignments. Students will be assigned various grammar modules (or comparable computer activities). At the completion of each module, the student will be given an appropriate module test. If the test is passed with 75% or better, the student will be given an applied writing exercise, including those for exempted modules. At the completion of all modules and applied writings, the student will take an in-class final grammar test. Upon passing, the student will go on to the paragraph writing module.

The class is scheduled for lecture and lab. During the lecture portion, the Instructor will review text material, grammar, spelling, vocabulary, and reading, and assign various writing activities. Lab time is for working on your computer assignments, getting help as needed, reviewing homework, taking tests, etc. During lab, students will complete JSEP Lessons 26, 36, 34, 27, and 25, in this order. The instructor will be available during all lab times. Lecture/lab hours will vary according to student needs.

All students will keep a writing/vocabulary/spelling journal. This journal will be collected at the end of the quarter.

There will be a final grammar exam and a final in-class paragraph writing assignment.

ENGLISH 010/020 and
READING 020/030

INSTRUCTIONAL MODE:

This is a self-paced, individualized class. You will be given a diagnostic test to help determine what you already know and where best to begin. Your progress through assignments are recorded in your class folder. You need to be sure this is kept up to date. Work through your assignments, completing all exercises as indicated. **YOU ARE RESPONSIBLE FOR THE COMPLETION OF ALL ASSIGNMENTS.**

COMPUTER:

There are various computer programs we will be using depending upon individual student need. The reading classes will be working with the SkillsBank program. The writing classes will be using Practical Grammar, Job Skills Educational Program, and SkillsBank. You will be assigned an ID number and a password. It is your responsibility to keep this information accessible. A checklist will be provided to be kept in your folder. As you pass each lesson test, record your score on the checklist. If you do not pass the test, you may repeat it.

JOURNALS:

All writing students are required to keep a writing/spelling/vocabulary journal, which will be turned in for grading at the end of the quarter. Writing activities will be assigned during the lecture portion of the class. Students are to continuously add misspelled or difficult words to their spelling list by writing each word three times and then using it in a sentence. Students should continuously add new or unknown words to their vocabulary list by writing the definition and using the word in a sentence.

REFLECTION LOGS

At the end of each class all students will complete a Reflection Log, which is self-explanatory.

RULES FOR PAPERS TO BE TURNED IN:

All work which is turned in for grading must be properly headed. In the upper righthand corner write your name, your course, the current date, and the assignment. All work must be typed or written legibly. Sloppy work will not be accepted.

TEXTBOOKS:

In addition to the required textbooks listed in the course syllabus, all students **must** have a dictionary.

CLASS FOLDERS:

Each student will be given a class folder which will contain your Assignment Completion Record. The folder is to be filed in the white box for the English/Reading classes behind the appropriate section.

ATTENDANCE:

You are expected to attend all classes until all requirements are satisfactorily met. There will be a daily sign-in sheet. You must sign-in when you enter and leave class, for any reason, including breaks. You must have the instructor or lab assistant verify your sign-in and out times.

GRADES:

Assignments will be graded on completion and accuracy. The grading scale is indicated in the course syllabus. Class participation is expected. Excessive absences will result in a lower grade.

You are expected to complete all assignments. If you attend all classes, but are unable to complete all assignments, you will be assigned an Incomplete. It is your responsibility to make arrangements with the Instructor to clear the incomplete. If you do not complete because of attendance or attitude, you will be given an F and expected to repeat the entire class.

LECTURE/LAB:

All students are scheduled for one to two hours of lecture per week. During this time the Instructor will lecture on text material, including grammar, spelling, vocabulary, and reading, and assign various writing activities. Lecture time is not the place to do homework. Lab time is for working on your computer assignments, getting help as needed, reviewing homework, taking tests, etc. It is not the place to do homework, unless instructed to do so.

FINAL EXAMINATION: All classes will have a final exam, as indicated in the course syllabus.

TASP TEST:

IF YOU HAVE NOT TAKEN TASP, YOU MUST DO SO BEFORE CONTINUING WITH YOUR MAJOR SUBJECTS. THE NEXT TASP TEST WILL BE GIVEN ON JUNE 18, 1994. THE REGISTRATION DEADLINE IS MAY 20, 1994. YOU MUST PASS TASP PRIOR TO OBTAINING 60 CREDIT HOURS. IF YOU DO NOT, YOU MUST REMAIN IN PRE-TECH CLASSES ONLY.

TEXTBOOK AND REQUIRED MATERIAL:

1. WRITING SKILLS FOR TECHNICAL STUDENTS, Delaware Technical & Community College, Prentice Hall.
2. College-level Dictionary
3. Notebook or binder and paper (not spiral)
4. 3-section notebook or binder
5. Writing implements

GRADING POLICY:

CLASSWORK

1 JOURNAL (W = 5/V = 2.5/S = 2.5)	=	10 POINTS
5 TESTS @ 2 POINTS EACH	=	10 POINTS
5 COMPUTER @ 1 POINTS EACH	=	5 POINTS
5 IN-CLASS PARAGRAPHS @ 5 POINTS EACH	=	25 POINTS
		50 POINTS (25%)

TEXTBOOK

8 GRAMMAR MODULE @ 1.5 POINTS EACH	=	20 POINTS
4 PARAGRAPHS @ 5 POINTS EACH	=	20 POINTS
1 IN-CLASS GRAMMAR FINAL	=	10 POINTS
		50 POINTS (25%)

FINAL EXAMS

1 GRAMMAR FINAL	=	50 POINTS
1 PARAGRAPH FINAL	=	50 POINTS
		100 POINTS (50%)
TOTAL POINTS	=	200 POINTS

A	=	180 +
B	=	160-179
C	=	140-159
F	=	Below 140

ABSENCES = -5 POINTS EACH

COURSE: ENGL.010 WRITING SKILLS I
DEPARTMENT: ENGL PRE-TECH ENGLISH

OBJECTIVE: E010.01.00 LEARNING BASIC GRAMMAR SKILLS

OBJECTIVE: E010.01.01 Demonstrate knowledge of proper verb usage.

IMPORTANCE OF OBJECTIVE

It is necessary for students to understand verb usage so that will be able to construct effective sentences.

STUDENT WILL

Be able to recognize, identify, and properly use action, linking, helping and irregular verbs.

TO THIS STANDARD

Students will pass all tests with a score of 75 percent or better, and generate effective sentences in all Applied Writings to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module I Test A and Applied Writing I.

OBJECTIVE: E010.01.02 Demonstrate knowledge and proper use of adjectives and adverbs.

IMPORTANCE OF OBJECTIVE

It is necessary for students to understand adjectives and adverbs so that they will be able to construct effective sentences.

STUDENT WILL

Be able to recognize, identify, and properly use adjectives and adverbs.

TO THIS STANDARD

Students will pass all module tests with a score of 75 percent or better and generate effective sentences in all Applied Writings, to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module II Test A and Applied Writing II.

OBJECTIVE: E010.01.03 Demonstrate proper use of verbal and prepositional phrases.

IMPORTANCE OF OBJECTIVE

It is necessary for students to understand verbal and prepositional phrases so that they will be able to construct effective sentences.

STUDENT WILL

Be able to recognize, identify, and properly use verbal and prepositional phrases.

TO THIS STANDARD

Students will pass all module tests with a score of 75 percent or better and generate effective sentences in all Applied Writings, to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module III Test A and Applied Writing III.

OBJECTIVE: E010.01.04 Demonstrate understanding of subject-verb agreement.

IMPORTANCE OF OBJECTIVE

It is necessary for students to understand subject-verb agreement so that they will be able to construct effective sentences.

STUDENT WILL

Perform the described task/skill.

TO THIS STANDARD

Students will pass all module tests with a score of 75 percent or better and generate effective sentences in all Applied Writings, to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module IV Test A and Applied Writing IV.

Students will complete Module V Test A and Applied Writing V.

OBJECTIVE: E010.01.06 Demonstrate knowledge of punctuation.

IMPORTANCE OF OBJECTIVE

It is necessary for students to understand punctuation so that they will be able to construct effective sentences.

STUDENT WILL

Perform the described task/skill.

TO THIS STANDARD

Students will pass all module tests with a score of 75 percent or better and generate effective sentences in all Applied Writings, to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module VI Test A and Applied Writing VI.

OBJECTIVE: E010.01.07 . Demonstrate understanding of fragmented sentences.

IMPORTANCE OF OBJECTIVE

It is necessary for students to understand sentence fragments and run-ons so that they will be able to construct effective sentences.

STUDENT WILL

Be able to recognize, identify, and correct sentence fragments and run-ons.

TO THIS STANDARD

Students will pass all module tests with a score of 75 percent or better and generate effective sentences in all Applied Writings, to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module VII Test A and Applied Writing VII.

OBJECTIVE: E010.01.08 Demonstrate knowledge and proper use of pronouns and antecedents.

IMPORTANCE OF OBJECTIVE

It is necessary for students to understand pronoun usage so that will be able to construct effective sentences.

STUDENT WILL

Be able to recognize, identify, and properly use pronouns.

TO THIS STANDARD

Students will pass all module tests with a score of 75 percent or better and generate effective sentences in all Applied Writings, to the instructor's satisfaction.

COURSE: ENGL.010 WRITING SKILLS I
DEPARTMENT: ENGL PRE-TECH ENGLISH

OBJECTIVE: E010.01.01 Demonstrate knowledge of proper verb usage.

SUB-OBJECTIVE: E010.01.01.01 Recognize action and linking verbs.
DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To distinguish between action and linking verbs and their role in sentence construction.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

The verb is one of the most important parts of speech and must be understood in order to write effectively.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module I.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module I.

SUB-OBJECTIVE: E010.01.01.02 Identify helping verbs.
DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify helping verbs.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

The verb is one of the most important parts of speech and must be understood in order to write effectively.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules; prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module I.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module I.

SUB-OBJECTIVE: E010.01.01.03 Identify and correctly use the principal parts of verbs, both regular and irregular.

DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify and correctly use the principal parts of verbs, both regular and irregular.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

The verb is one of the most important parts of speech and must be understood in order to write effectively.

INSTRUCTIONAL METHODS

Textbooks, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module I.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module I.

SUB-OBJECTIVE: E010.01.01.04 Generate sentences using identified verb
type.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To generate sentences using identified verb types.

PRETEST

None.

INTEREST

The verb is one of the most important parts of speech and must be understood in order to write effectively.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook; assign CAI modules, prepare necessary checklists, assign Applied Writing activities.

STUDENT ACTIVITIES

Complete all assignments in Module I.

ASSESSMENT

Instructor verification and Module I test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E010.01.02 Demonstrate knowledge and proper use of adjectives and adverbs.

SUB-OBJECTIVE: E010.01.02.01 Identify the function of adjectives and adverbs in a sentence.

DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify the function of adjectives and adverbs in a sentence.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write descriptive sentences.

INSTRUCTIONAL METHODS

Textbooks, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in Textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module II.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module II.

SUB-OBJECTIVE: E010.01.02.02 Differentiate between adjectives and adverbs.

DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To differentiate between adverbs and adjectives.

PRETEST

Diagnostic knowledge-based pre-test consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write descriptive sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules; prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module II.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module II.

SUB-OBJECTIVE: E010.01.02.03 Use the comparison process for adjectives and adverbs.

DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

Use the comparison process for adjectives and adverbs.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write descriptive sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules; prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module II.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module II.

SUB-OBJECTIVE: E010.01.02.04 Generate sentences using adjectives and adverbs.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

Generate sentences using adjectives and adverbs.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write descriptive sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules; prepare necessary checklists, assign Applied Writing activities.

STUDENT ACTIVITIES

Complete all assignments in Module II.

ASSESSMENT

Instructor verification and Module II test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E010.01.03 Demonstrate proper use of verbal and prepositional phrases.

SUB-OBJECTIVE: E010.01.03.01 Define a phrase.
DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To define phrases and their function.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write effective sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module III.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module III.

SUB-OBJECTIVE: E010.01.03.02 Identify the prepositional phrase and its function in a sentence.

DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify the prepositional phrase and its function in a sentence.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assigns.

INTEREST

To write effective sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module III.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module III.

SUB-OBJECTIVE: E010.01.03.03 Identify the verbal phrase and its function
in a sentence.
DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify the verbal phrase and its function in a sentence.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple
choice items to determine placement and assignments.

INTEREST

To write effective sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules,
prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module III.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module III.

SUB-OBJECTIVE: E010.01.03.04 Generate sentences using verbal and prepositional phrases.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To generate effective sentences using verbal and prepositional phrases.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write effective sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists, assign Applied Writing activities.

STUDENT ACTIVITIES

Complete all assignments in Module III.

ASSESSMENT

Instructor verification and Module III test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E010.01.04 Demonstrate understanding of subject-verb agreement.

SUB-OBJECTIVE: E010.01.04.01 Identify correct subject-verb agreement by applying practical methods of sentence analysis.

DOMAIN: COGNITIVE LEVEL: EVALUATE

PURPOSE

To identify correct subject-verb agreement by applying practical methods of sentence analysis.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

All sentences must have subject-verb agreement. Student must be able to recognize and correct agreement errors.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module IV.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module IV.

SUB-OBJECTIVE: E010.01.04.02 Generate sentences using correct subject-verb agreement.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

Generate sentences using correct subject-verb agreement.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

All sentences must contain subject-verb agreement. Students must be able to write properly constructed sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists, assign Applied Writing Activities.

STUDENT ACTIVITIES

Complete all sections in Module IV.

ASSESSMENT

Instructor verification and Module IV test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E010.01.05 Demonstrate use of independent and dependent clauses.

SUB-OBJECTIVE: E010.01.05.01 Identify independent clauses.
DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify independent clauses.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write effective sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all sections in Module V.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module V.

SUB-OBJECTIVE: E010.01.05.02 Identify dependent clauses.
DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify dependent clauses.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To write effective sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module V.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module V.

SUB-OBJECTIVE: E010.01.05.03 Recognize appropriate clause connectors.
DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

Recognize clause connectors.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Effective writing requires the use of compound and complex sentences, which requires proper use of clause connectors.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module V.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module V.

SUB-OBJECTIVE: E010.01.05.04 Recognize and punctuate clauses correctly.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To recognize and punctuate clauses correctly.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Effective writing requires the use of compound and complex sentences, which must be properly punctuated.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module V.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module V.

SUB-OBJECTIVE: E010.01.05.05 Generate sentences using a variety of independent/dependent clause combinations.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To generate compound and complex sentences.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Effective writing requires the use of compound and complex sentences.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists, assign Applied Writing activities.

STUDENT ACTIVITIES

Complete all assignments in Module V.

ASSESSMENT

Instructor verification and Module V test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E010.01.06 Demonstrate knowledge of punctuation.

SUB-OBJECTIVE: E010.01.06.01 Identify the five basic patterns of punctuation.

DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify the five basic patterns of punctuation.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

All writing must be properly punctuated.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module VI.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module VI.

SUB-OBJECTIVE: E010.01.06.02 Generate sentences using the five punctuation patterns.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To write correctly punctuated sentences.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

All writing must be properly punctuated.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules; prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module VI.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module VI.

SUB-OBJECTIVE: E010.01.06.03 Apply the five basic comma rules for correct sentence construction.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

Apply comma rules for correct sentence construction.

PRETEST

Diagnostic knowledge-based pretest consisting of fil-ins and multiple choice items to determine placement and assignments.

INTEREST

All writing must be properly punctuated and constructed.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign module sin textbook, assign CAI modules; prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module VI.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module VI.

SUB-OBJECTIVE: E010.01.06.04 Apply the two rules governing the
apostrophe to show possession.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

Appropriate use of the apostrophe.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple
choice items to determine placement and assignments.

INTEREST

It is necessary to understand how the apostrophe is used to show possession.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules,
prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module VI.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module VI.

SUB-OBJECTIVE: E010.01.06.05 Use the five-step process to form possessives.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To properly form possessives.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Properly constructed possessive are necessary for effective writing.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists, assign Applied Writing activities.

STUDENT ACTIVITIES

Complete all assignments in Module VI.

ASSESSMENT

Instructor verification and Module VI test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E010.01.07 Demonstrate understanding of fragmented sentences.

SUB-OBJECTIVE: E010.01.07.01 Identify and correct sentence fragments.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To identify and correct fragmented sentences.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

A sentence must express a complete thought and may not contain fragments.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module VII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module VII.

SUB-OBJECTIVE: E010.01.07.02 Identify run-on sentences and punctuate them for clarity.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To identify and correct run-on sentences.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Run-on sentences are not appropriate to effective writing.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists, assign Applied Writing activities.

STUDENT ACTIVITIES

Complete all assignments in Module VII.

ASSESSMENT

Instructor verification and Module VII test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E010.01.08 Demonstrate knowledge and proper use of pronouns and antecedents.

SUB-OBJECTIVE: E010.01.08.01 Identify correct forms of personal pronouns for various uses in a sentence.

DOMAIN: COGNITIVE LEVEL: RECALL

PURPOSE

To identify correct forms of personal pronouns.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Personal pronouns have a variety of uses in a sentence and must be used correctly.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module VIII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module VIII.

SUB-OBJECTIVE: E010.01.08.02 Apply the six rules governing pronoun-
antecedent agreement in number.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

Apply pronoun-antecedent rules.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple
choice items to determine placement and assignments.

INTEREST

Pronouns and antecedents must agree in number.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules,
prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module VIII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module VIII.

SUB-OBJECTIVE: E010.01.08.03 Generate sentences using proper pronoun-
antecedent agreement.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To generate sentences using proper pronoun-antecedent agreement.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple
choice items to determine placement and assignments.

INTEREST

Effective sentences require pronoun-antecedent agreement.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules,
prepare necessary checklists, assign Applied Writing activities.

STUDENT ACTIVITIES

Complete all assignments in Module VIII.

ASSESSMENT

Instructor verification and Module VIII test.

NEXT ASSIGNMENT

Next module on assignment sheet.

COURSE: ENGL.010 WRITING SKILLS I
DEPARTMENT: ENGL PRE-TECH ENGLISH

OBJECTIVE: E010.02.01 Demonstrate the fundamentals of paragraph writing.

SUB-OBJECTIVE: E010.02.01.01 Choose an appropriate topic for a paragraph.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To select an appropriate topic for a paragraph.

PRETEST

None.

INTEREST

Before beginning any writing project, an appropriate topic must be selected.

INSTRUCTIONAL METHODS

Textbook, lecture, brainstorming, guided writing.

INSTRUCTOR'S ACTIVITIES

Discuss and demonstrate topic selection methods, including brainstorming techniques; assign guided writing activity; assign textbook activity.

STUDENT ACTIVITIES

Complete all assignments.

ASSESSMENT

Instructor verification,

NEXT ASSIGNMENT

Complete next section in Module IX.

SUB-OBJECTIVE: E010.02.01.02 Construct a topic sentence with a
controlling idea.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

An unified paragraph requires an effective topic sentence and controlling
idea.

PRETEST

None.

INTEREST

Effective paragraph structure requires an appropriate topic sentence and
controlling idea.

INSTRUCTIONAL METHODS

Textbook, CAI modules, lecture, guided writing.

INSTRUCTOR'S ACTIVITIES

Assign textbook activity; assign guided writing activity, assign CAI
modules.

STUDENT ACTIVITIES

Complete all assignments.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Complete next section in Module IX.

SUB-OBJECTIVE: E010.02.01.03 Outline a coherent paragraph.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To use outline techniques.

PRETEST

None.

INTEREST

Outlining techniques lead to enhanced writing skills.

INSTRUCTIONAL METHODS

Textbook, CAI modules, guided writing.

INSTRUCTOR'S ACTIVITIES

Assign textbook activity, assign CAI modules, assign guided writing activity.

STUDENT ACTIVITIES

Complete all assignments.

ASSESSMENT

Instructor verification,

NEXT ASSIGNMENT

Complete next section in Module IX.

SUB-OBJECTIVE: E010.02.01.04 Write a cohesive reasons paragraph.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To write a paragraph with supporting reasons.

PRETEST

None.

INTEREST

Students need to be able to support their position in an clear and concise manner.

INSTRUCTIONAL METHODS

Textbook, demonstration, lecture, guided writing.

INSTRUCTOR'S ACTIVITIES

Demonstrate assignment, assign textbook activity, assign guided writing activity.

STUDENT ACTIVITIES

Complete all assignments.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Complete next section in Module IX.

SUB-OBJECTIVE: E010.02.01.05 Write a cohesive reasons and examples paragraph.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To write a paragraph with supporting reasons and examples.

PRETEST

None.

INTEREST

Students need to be able to support their position and provide examples in a clear and concise manner.

INSTRUCTIONAL METHODS

Textbook, demonstration, lecture, guided writing.

INSTRUCTOR'S ACTIVITIES

Demonstrate assignment, assign guided writing activity, assign textbook activity.

STUDENT ACTIVITIES

Complete all assignments.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Complete next section in Module IX.

SUB-OBJECTIVE: E010.02.01.06 Write a cohesive pro and con paragraph.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To write a paragraph presenting both sides of an issue.

PRETEST

None.

INTEREST

Students must be able to present and develop both sides of an issue.

INSTRUCTIONAL METHODS

Textbook, demonstration, lecture, guided writing.

INSTRUCTOR'S ACTIVITIES

Demonstrate assignment, assign textbook activity, assign guided writing activity.

STUDENT ACTIVITIES

Complete all assignments.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Complete next section in Module IX.

SUB-OBJECTIVE: E010.02.01.07 Write a cohesive process paragraph.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To present a step-by-step process in paragraph form.

PRETEST

None.

INTEREST

Students must be able to provide explicit instructions.

INSTRUCTIONAL METHODS

Textbook, demonstration, lecture.

INSTRUCTOR'S ACTIVITIES

Demonstrate assignment, assign textbook activity.

STUDENT ACTIVITIES

Complete all assignments.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

None unless directed by instructor.

TEXAS STATE TECHNICAL COLLEGE

SYLLABUS

ENGLISH 010

COURSE DESCRIPTION:

An introductory course designed to instruct students in essential written communication skills. It includes: language usage and mechanics, grammar, the writing process, and paragraph writing.

COURSE OBJECTIVES:

To help students write and prepare various documents and presentations using appropriate and correct language mechanics including: grammar, spelling, capitalization and punctuation.

TEXTBOOK AND REQUIRED MATERIAL:

1. WRITING SKILLS FOR TECHNICAL STUDENTS, Delaware Technical & Community College, Prentice Hall.
2. Dictionary
3. 3-ring binder and paper (not spiral)
4. Notebook
5. Writing implements

E010SYL-CS0394

COURSE OUTLINE

All students will take a diagnostic test to determine placement and assignments. Students will be assigned various grammar modules (or comparable computer activities). At the completion of each module, the student will be given an appropriate module test. If the test is passed with 75% or better, the student will be given an applied writing exercise, including those for exempted modules. At the completion of all modules and applied writings, the student will take an in-class final grammar test. Upon passing, the student will go on to the paragraph writing module.

During lab, students will complete JSEP Lesson 26, 36, 34, 27, and 25.

All students will keep a writing/vocabulary/spelling journal.

In addition, students will be given a variety of in-class tests on spelling, vocabulary and sentence structure, as well as, various writing assignments.

There will be a final grammar exam, including paragraph writing.

TEXAS STATE TECHNICAL COLLEGE

SYLLABUS

ENGLISH 020

COURSE DESCRIPTION:

Review of basic sentence grammar and mechanical skills, with an emphasis on writing, editing, and revising paragraphs. Introduction to the multi-paragraph essay. Prerequisite: English placement test.

COURSE OBJECTIVES:

Upon completion, student will be able to:

1. Recognize and correct shifts or inconsistencies to attain smoothness and clearness in writing.
2. Develop writing clarity and prevent misunderstanding.
3. Demonstrate accelerated techniques to make writing more concise.
4. Choose appropriate words to convey intended meaning.
5. Expand vocabulary usage.
6. Vary word and sentence choice for purpose and audience.
7. Refine sentences and paragraphs into compositions exhibiting unity, clarity, and coherence.
8. Use the composing process and electronic media to plan and generate writing.
9. Write descriptive, persuasive, narrative, and expository paragraphs of increasing length and complexity.
10. Use electronic media to compose multiple-paragraph compositions.

11. Evaluate and revise content, organization, topic development, appropriate transition, clarity of language and appropriate word and sentence choice according to the purpose and audience for which the piece is intended.
12. Proofread written work for punctuation, spelling, grammatical and syntactical errors, paragraph indentation, margins, and legibility of writing.
13. Expand paragraphs into common types of reports.
14. Compose business letters and communications.

COURSE OUTLINE:

This is an individualized, self-paced course. All students are responsible for attending all classes until the requirements are met. Students will take a diagnostic test to determine placement and assignments. Students will be assigned various grammar modules (or comparable computer activities). At the completion of each module, the student will be given an appropriate module test. If the test is passed with 75% or better, the student will be given an applied writing exercise, including those for exempted modules. At the completion of all modules and applied writings, the student will take an in-class final grammar test. Upon passing, the student will go on to the report writing module, followed by the business letter module.

The class is scheduled for lecture and lab. During the lecture portion, the instructor will review text material, grammar, spelling, vocabulary, and reading, and assign various writing activities. Lab time is for working on your computer assignments, getting help as needed, reviewing homework, taking tests, etc. During lab, students will complete SkillsBank, as assigned. The instructor will be available during all lab times. Lecture/lab hours will vary according to student needs.

All students will keep a writing/vocabulary/spelling journal. This journal will be collected at the end of the quarter.

There will be a final in-class report and a final grammar examination.

TEXTBOOK AND REQUIRED MATERIAL:

1. WRITING SKILLS FOR TECHNICAL STUDENTS Delaware Technical & Community College, Prentice Hall.
2. College-level Dictionary
3. Notebook or binder and paper (not spiral)
4. 3-section notebook or binder
5. Writing implements

ENGLISH 010/020 and
READING 020/030

INSTRUCTIONAL MODE:

This is a self-paced, individualized class. You will be given a diagnostic test to help determine what you already know and where best to begin. Your progress through assignments are recorded in your class folder. You need to be sure this is kept up to date. Work through your assignments, completing all exercises as indicated. **YOU ARE RESPONSIBLE FOR THE COMPLETION OF ALL ASSIGNMENTS.**

COMPUTER:

There are various computer programs we will be using depending upon individual student need. The reading classes will be working with the SkillsBank program. The writing classes will be using Practical Grammar, Job Skills Educational Program, and SkillsBank. You will be assigned an ID number and a password. It is your responsibility to keep this information accessible. A checklist will be provided to be kept in your folder. As you pass each lesson test, record your score on the checklist. If you do not pass the test, you may repeat it.

JOURNALS:

All writing students are required to keep a writing, spelling, vocabulary journal, which will be turned in for grading at the end of the quarter. Writing activities will be assigned during the lecture portion of the class. Students are to continuously add misspelled or difficult words to their spelling list by writing each word three times and then using it in a sentence. Students should continuously add new or unknown words to their vocabulary list by writing the definition and using the word in a sentence.

REFLECTION LOGS

At the end of each class all students will complete a Reflection Log, which is self-explanatory.

RULES FOR PAPERS TO BE TURNED IN:

All work which is turned in for grading must be properly headed. In the upper righthand corner write your name, your course, the current date, and the assignment. All work must be typed or written legibly. Sloppy work will not be accepted.

TEXTBOOKS:

In addition to the required textbooks listed in the course syllabus, all students must have a dictionary.

CLASS FOLDERS:

Each student will be given a class folder which will contain your Assignment Completion Record. The folder is to be filed in the white box for the English Reading classes behind the appropriate section.

ATTENDANCE:

You are expected to attend all classes until all requirements are satisfactorily met. There will be a daily sign-in sheet. You must sign-in when you enter and leave class, for any reason including breaks. You must have the instructor or an assistant verify your sign-in and out times.

GRADES:

Assignments will be graded on completion and accuracy. The grading scale is indicated in the course syllabus. Class participation is expected. Excessive absences will result in a lower grade.

You are expected to complete all assignments. If you attend all classes, but are unable to complete all assignments, you will be assigned an incomplete. It is your responsibility to make arrangements with the instructor to clear the incomplete. If you do not complete because of attendance or attitude, you will be given an F and expected to repeat the entire class.

LECTURE/LAB:

All students are scheduled for one to two hours of lecture per week. During this time the instructor will lecture on text material, including grammar, spelling, vocabulary, and reading, and assign various writing activities. Lecture time is not the place to do homework. Lab time is for working on your computer assignments, getting help as needed, reviewing homework, taking tests, etc. It is not the place to do homework, unless instructed to do so.

FINAL EXAMINATION: All classes will have a final exam, as indicated in the course syllabus.

TASP TEST:

IF YOU HAVE NOT TAKEN TASP, YOU MUST DO SO BEFORE CONTINUING WITH YOUR MAJOR SUBJECTS. THE NEXT TASP TEST WILL BE GIVEN ON JUNE 18, 1994. THE REGISTRATION DEADLINE IS MAY 20, 1994. YOU MUST PASS TASP PRIOR TO OBTAINING 60 CREDIT HOURS. IF YOU DO NOT, YOU MUST REMAIN IN PRE-TECH CLASSES ONLY.

COURSE: ENGL.020 WRITING SKILLS II
DEPARTMENT: ENGL PRE-TECH ENGLISH

OBJECTIVE: E020.01.00 LEARNING ADVANCED GRAMMAR SKILLS

OBJECTIVE: E020.01.01 Recognize and correct shifts or inconsistencies to attain smoothness and clearness in writing.

IMPORTANCE OF OBJECTIVE

It is important for students to master this objective to develop their thoughts clearly and concisely so that they move easily from one sentence to the next.

STUDENT WILL

Be able:

To identify and to correct inconsistencies in tense and voice of a verb.

To identify and to correct shifts in two pronoun forms: person and number.

TO THIS STANDARD

Students will pass all tests with a score of 75 percent or better, and generate effective sentences in all Applied Writings to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module X Test A and Applied Writing X.

OBJECTIVE: E020.01.02 Developing writing clarity and preventing misunderstanding.

IMPORTANCE OF OBJECTIVE

In order for writing to be meaningful, it must be understood.

STUDENT WILL

Be able:

To identify and correct unclear pronoun reference.

To identify and correct unclear or misplaced modifiers.

To define certain confusing pairs of words.

To identify and correct problems in parallel construction.

TO THIS STANDARD

Students will pass all tests with a score of 75 percent or better and generate effective sentences in all Applied Writings to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module XI Test A and Applied Writing XI.

OBJECTIVE: E020.01.03 Accelerating techniques to make writing more concise.

IMPORTANCE OF OBJECTIVE

Students must train themselves to take a second look at their own writing so that they catch and eliminate errors and tighten their writing.

STUDENT WILL

Be able:

To eliminate unnecessary words in a sentence.

To eliminate clichés and slang in writing samples.

To combine like subjects and verbs for the purpose of brevity.

To subordinate ideas.

To reduce dependent clauses to single words.

TO THIS STANDARD

Students will pass all tests with a score of 75 percent or better, and generate effective sentences in all Applied Writings to the instructor's satisfaction.

ON THIS TYPE TEST(S)

Students will complete Module XII Test A and Applied Writing XII.

DATE: 06/09/94

TEXAS STATE TECHNICAL COLLEGE
PERFORMANCE STANDARDS

PAGE:

OBJECTIVE: E020.02.00 REPORT WRITING

OBJECTIVE: E020.02.01 Expanding the paragraph into common types of reports.

IMPORTANCE OF OBJECTIVE

The formats for the paragraph and the report are almost identical. Before a report can be constructed, it is necessary to understand the essential points in constructing a unified paragraph. The most important principle is that of logical organization.

STUDENT WILL

Be able:

To define the function of an outline in multiparagraph writing.

To prepare a multiparagraph report outline given three principles of organization.

To identify and use appropriately different report formats.

To write a variety of reports using the appropriate report format for each.

TO THIS STANDARD

Students will complete all assignments to the instructor's satisfaction.

ON THIS TYPE TEST(S)

None.

PURPOSE

To recognize when shifts in voice and tense occur, and to make appropriate corrections.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple-choice items to determine placement and assignments.

INTEREST

Unity is important to good writing. Once shifts are identified, errors that contribute to breakdowns in unity can be avoided.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module X.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module X.

SUB-OBJECTIVE: E020.01.01.02 Identify and correct shifts in prnoun
forms: person and number.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To recognize when shifts in person and number occur, and to make appropriate corrections.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Unity is important to good writing. Once shifts are identified, errors that contribute to breakdowns in unity can be avoided.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module X.

ASSESSMENT

Instructor verification and Module X test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E020.01.02 Developing writing clarity and preventing misunderstanding.

SUB-OBJECTIVE: E020.01.02.01 Identify and correct unclear pronoun reference.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To make sure every pronoun has a clear antecedent; to be sure there is no doubt about what the pronouns refers to.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To avoid confusing the reader.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module XI.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XI.

SUB-OBJECTIVE: E020.01.02.02 Identify and correct unclear or misplaced modifiers.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To eliminate confusion by repositioning misplaced phrases or clauses next to the words they modify.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

A modifier in the wrong place can cause confusion.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module XI.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XI.

SUB-OBJECTIVE: E020.01.02.03 Define confusing word pairs.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To be sure the word chosen means what the student intended.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

To eliminate confusion for the reader.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all activities in Module XI.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XI.

SUB-OBJECTIVE: E020.01.02.04 Identify and correct problems in parallel construction.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To identify and correct problems in parallel construction.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

The reader should be unaware of the passage of words; violations of parallel construction can interrupt the reader's flow of thought.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module XI.

ASSESSMENT

Instructor verification and Module XI test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E020.01.03 Accelerating techniques to make writing more concise.

SUB-OBJECTIVE: E020.01.03.01 Eliminate unnecessary words in a sentence.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To eliminate unnecessary words in a sentence.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Redundancy draws attention to itself and slows down the reader.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module XII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XII.

SUB-OBJECTIVE: E020.01.03.02 Eliminate cliches and slang in writing samples.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To eliminate the use of cliches and slang from writing.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Cliches and slang indicate the writer is too lazy to find an appropriate, clear, and fresh way to convey the meaning; they tend to bog the reader down, causing him or her to be distracted from the writer's message.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module XII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XII.

SUB-OBJECTIVE: E020.01.03.03 Combine like subjects and verbs for brevity.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To smooth and refine writing.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

A sentence is sometimes slowed down by a needless interruption of thought. Combining subjects or verbs can add smoothness to the writing.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all assignments in Module XII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XII.

SUB-OBJECTIVE: E020.01.03.04 Subordinate ideas.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To smooth choppy sentences by using clause signals and subordinating secondary thoughts into dependent clauses.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assignments.

INTEREST

Frequently used short, choppy sentences give an unpleasant "bumpy" impression.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign textbook modules, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all activities in Module XII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XII.

SUB-OBJECTIVE: E020.01.03.05 Reduce dependent clauses to single words.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

Reducing dependent clauses to make a sentence flow better.

PRETEST

Diagnostic knowledge-based pretest consisting of fill-ins and multiple choice items to determine placement and assessment.

INTEREST

To enhance readability.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Administer Diagnostic Test, assign modules in textbook, assign CAI modules, prepare necessary checklists.

STUDENT ACTIVITIES

Complete all activities in Module XII.

ASSESSMENT

Instructor verification and Module XII test.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E020.02.01 Expanding the paragraph into common types of reports.

SUB-OBJECTIVE: E020.02.01.01 Define the function of an outline in multiparagraph writing.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

The most important principle in report writing is that of logical organization; an outline is a way to categorize all the various points to be included in the report, to get all ideas down in the proper order.

PRETEST

None.

INTEREST

When you set out to write a report, your task will go smoothly if you approach it in a systematic manner.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Assign modules in textbook and assign CAI modules.

STUDENT ACTIVITIES

Complete all assignments in Module XIII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XIII.

SUB-OBJECTIVE: E020.02.01.02 Prepare a multiparagraph report outline given three principles of organization.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To prepare a report outline.

PRETEST

None.

INTEREST

Outlining is not as difficult as many writers think it is. The outline should present the subject of your report and a procedure for discussing the subject.

INSTRUCTIONAL METHODS

Textbook, CAI modules.

INSTRUCTOR'S ACTIVITIES

Assign modules in textbook and assign CAI modules.

STUDENT ACTIVITIES

Complete all assignments in Module XIII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XIII.

SUB-OBJECTIVE: E020.02.01.03 Identify and use appropriately two report formats.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

There are two basic formats which can be used to create reports: inverted triangle and report plan.

PRETEST

None.

INTEREST

Having a choice of report formats will give more flexibility in writing.

INSTRUCTIONAL METHODS

Textbook.

INSTRUCTOR'S ACTIVITIES

Assign textbook modules.

STUDENT ACTIVITIES

Complete all assignments in Module XIII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XIII.

SUB-OBJECTIVE: E020.02.01.04 Write a technical procedure report, persuasive report, summary report, and recommendation report, using appropriate form for each.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To write a variety of reports using appropriate report formats.

PRETEST

None.

INTEREST

A technical procedure report explains how to do something; the persuasive report presents an argument to readers and then asks them to act; a recommendation report examines several alternatives, compares the results, and recommends one for adoption; a summary report summarizes a magazine article, progress on a project, or research on a subject.

INSTRUCTIONAL METHODS

Textbook.

INSTRUCTOR'S ACTIVITIES

Assign modules in textbook.

STUDENT ACTIVITIES

Complete all assignments in Module XIII.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next module on assignment sheet.

OBJECTIVE: E020.03.01 Writing the main types of business letters and communications.

SUB-OBJECTIVE: E020.03.01.01 Define the purpose and focus of business letter writing.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To define purpose and focus of business letter writing.

PRETEST

None.

INTEREST

When you write business letters, it is critical the reader understand the message; your letter should focus on the reader.

INSTRUCTIONAL METHODS

Textbook.

INSTRUCTOR'S ACTIVITIES

Assign modules in textbook.

STUDENT ACTIVITIES

Complete all assignments in Module XIV.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XIV.

SUB-OBJECTIVE: E020.03.01.02 Write various types of business letters
using appropriate form and focus.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

To learn and use various type of letter formats.

PRETEST

None.

INTEREST

You can achieve success in your letter writing by paying careful attention to (1) your purpose of clear communication, (2) your emphasis on the reader's self-interest, and (3) your positive wording.

INSTRUCTIONAL METHODS

Textbook.

INSTRUCTOR'S ACTIVITIES

Assign modules in textbook.

STUDENT ACTIVITIES

Complete all assignments in Module XIV.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XIV.

SUB-OBJECTIVE: E020.03.01.03 Compare the business letter and the office memo.

DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

The memorandum is a form of communication used to relay information within a company.

PRETEST

None.

INTEREST

Like a business letter, the memo is an important part of business communication.

INSTRUCTIONAL METHODS

Textbook.

INSTRUCTOR'S ACTIVITIES

Assign modules in textbook.

STUDENT ACTIVITIES

Complete all assignments in Module XIV.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

Next section in Module XIV.

SUB-OBJECTIVE: E020.03.01.04 Write various types of interoffice memos.
DOMAIN: COGNITIVE LEVEL: APPLY

PURPOSE

There are three main types of memos.

PRETEST

None.

INTEREST

The memo follows the same basic guidelines of all good business writing: it should be organized, be proper in tone and form, and its message should be clear and concise.

INSTRUCTIONAL METHODS

Textbook.

INSTRUCTOR'S ACTIVITIES

Assign modules in textbook.

STUDENT ACTIVITIES

Complete all assignments in Module XIV.

ASSESSMENT

Instructor verification.

NEXT ASSIGNMENT

None.

TEXAS STATE TECHNICAL COLLEGE

SYLLABUS

ENGLISH 020

COURSE DESCRIPTION:

Review of basic sentence grammar and mechanical skills, with an emphasis on writing, editing, and revising paragraphs. Introduction to the multi-paragraph essay. Prerequisite: English placement test.

COURSE OBJECTIVES:

Upon completion, student will be able to:

1. Recognize and correct shifts or inconsistencies to attain smoothness and clearness in writing.
2. Develop writing clarity and prevent misunderstanding.
3. Demonstrate accelerated techniques to make writing more concise.
4. Choose appropriate words to convey intended meaning.
5. Expand vocabulary usage.
6. Vary word and sentence choice for purpose and audience.
7. Refine sentences and paragraphs into compositions exhibiting unity, clarity, and coherence.
8. Use the composing process and electronic media to plan and generate writing.
9. Write descriptive, persuasive, narrative, and expository paragraphs of increasing length and complexity.
10. Use electronic media to compose multiple-paragraph compositions.

E020SYL-CS0594

11. Evaluate and revise content, organization, topic development, appropriate transition, clarity of language and appropriate word and sentence choice according to the purpose and audience for which the piece is intended.
12. Proofread written work for punctuation, spelling, grammatical and syntactical errors, paragraph indentation, margins, and legibility of writing.
13. Expand paragraphs into common types of reports.
14. Compose business letters and communications.

COURSE OUTLINE:

This is an individualized, self-paced course. All students are responsible for attending all classes until the requirements are met. Students will take a diagnostic test to determine placement and assignments. Students will be assigned various grammar modules (or comparable computer activities). At the completion of each module, the student will be given an appropriate module test. If the test is passed with 75% or better, the student will be given an applied writing exercise, including those for exempted modules. At the completion of all modules and applied writings, the student will take an in-class final grammar test. Upon passing, the student will go on to the report writing module, followed by the business letter module.

The class is scheduled for lecture and lab. During the lecture portion, the Instructor will review text material, grammar, spelling, vocabulary, and reading, and assign various writing activities. Lab time is for working on your computer assignments, getting help as needed, reviewing homework, taking tests, etc. During lab, students will complete SkillsBank, as assigned. The instructor will be available during all lab times. Lecture/lab hours will vary according to student needs.

All students will keep a writing/vocabulary/spelling journal. This journal will be collected at the end of the quarter.

There will be a final in-class report and a final grammar examination.

E020SYL-CS0594

TEXTBOOK AND REQUIRED MATERIAL:

1. WRITING SKILLS FOR TECHNICAL STUDENTS, Delaware Technical & Community College, Prentice Hall.
2. College-level Dictionary
3. Notebook or binder and paper (not spiral)
4. 3-section notebook or binder
5. Writing implements

GRADING POLICY:

TASP OBJECTIVES/SKILLS

WRITING SKILLS

- OBJECTIVE 1. To recognize the appropriate purpose, audience or occasion for a piece of writing
- Skill 1. Recognize the appropriate purpose, audience or occasion for a piece of writing
2. Recognize writing that is appropriate for different purposes, audiences or occasions
- OBJECTIVE 2. To recognize unity, focus and development in writing
- Skill 1. Recognize writing that is not unified or focused
2. Maintain a consistent point of view
3. Recognize adequate development in a piece of writing
- OBJECTIVE 3. To recognize effective organization in writing
- Skill 1. Recognize methods of paragraph organization and the appropriate use of transitional words or phrases to connect ideas
2. Reorganize sentences to improve cohesion and the effective sequence of ideas
- OBJECTIVE 4. To recognize effective sentences
- Skill 1. Recognize ineffective repetition and inefficiency in sentence construction
2. Identify sentence fragments and run-on sentences
3. Identify standard subject-verb agreement
4. Identify standard placement of modifiers, parallel structure, and use of negatives in sentence formations
5. Recognize imprecise and inappropriate word choice
- OBJECTIVE 5. To recognize edited American English usage
- Skill 1. Recognize the standard use of verb forms and pronouns
2. Standard formation and use of adverbs, adjectives, comparatives, superlatives, and plural and possessive forms of nouns
3. Standard punctuation

WRITING SAMPLE

These characteristics will be considered in scoring the writing samples.

1. Appropriateness
2. Unity and focus
3. Development
4. Organization
5. Sentence structure
6. Usage
7. Mechanical conventions

TASP PREPARATION CHECK LIST

READING

- _____ Obj.1. Meaning of words and phrases..using context clues.
_____ Obj.2. Main idea and supporting ideas.
_____ Obj.3. Writer's purpose, pt. of view, intended meaning.
_____ Obj.4. Method of organization, draw conclusions.
_____ Obj.5. Relevance, importance; fact and opinion.
_____ Obj.6. summarize a passage; interpret graphs.

WRITING

- _____ To recognize:
_____ Obj.1. Purpose, audience
_____ Obj.2. Unity, focus, and development
_____ Obj.3. Effective organization
_____ Obj.4. Effective sentences
_____ Obj.5. English usage

ENGLISH 090

COURSE DESCRIPTION:

An intensive review of writing for students who have not passed the writing portion of the TASP.

COURSE OBJECTIVES:

1. To recognize purpose and audience.
2. To recognize unity, focus and development in writing.
3. To recognize effective organization in writing.
4. To recognize sentences.
5. To recognize edited American English usage.
6. To pass the Writing Section of TASP.

COURSE OUTLINE:

Two (2) designated class hours are utilized for skill reinforcement through independent study and tutorial assistance. Computer-aided instruction is also provided using the SkillsBank program.

TEXTBOOK AND REQUIRED MATERIALS:

The Official TASP Test Study Guide, NES, 1991.

1. Paper and writing implements

GRADING POLICY:

The course graded pass/fail. Students are required to attend all classes until they are able to pass the Pre-TASP test with a score of 75% or better. Any student who is absent more than three (3) times will not receive credit for the course.

TEXAS STATE TECHNICAL COLLEGE

SYLLABUS

READING 020

COURSE DESCRIPTION:

Part I of an intermediate reading course designed to develop vocabulary, comprehension, study skills, and reading rate through lecture and independent study for students functioning on reading grade levels 5.0-7.9. Prerequisite: REA 010 or placement by diagnostic test.

COURSE OBJECTIVES:

A. Vocabulary

1. The ability to use context clues to determine the meaning of words.

B. Comprehension

1. Topic/Main Idea, and Supporting Details: The ability to identify the topic, main idea and supporting details of various works of writing, including technical materials.
2. Author's Intent: The ability to recognize an author's purpose and intent and evaluate the relevance of written material for a specific purpose or audience.
3. Organization of Ideas: The ability to organize ideas, identify transition words, make comparisons, recognize and analyze relationships, categorize, condense, and identify sequences in technical, scientific and research-related material.
4. Critical Reasoning: The ability to evaluate validity of author's argument, evaluate relevance of details, differentiate between fact and opinion, and draw logical conclusions.

C. Reading Rate

1. The ability to increase reading speed while comprehending what is read.

COURSE OUTLINE:

All students will take a Pre-TASP test to assess their reading abilities. This is an individualized, self-paced class. Students are responsible for completing all assignments in the textbook. Students are to read each chapter, complete drills and activities, check their answers with instructor, and complete the chapter test. There are nine chapters. In addition, there is a Unit test after Chapter 3, Chapter 6, and Chapter 9. At the end of the quarter students will retake the Pre-TASP test as a final exam to measure their growth. If all assignments are completed, students do not need to attend class. Instructor-supervised lab time is provided for independent study using the SkillsBank program, and/or conferencing.

TEXTBOOK AND REQUIRED MATERIALS:

PREP FOR BETTER READING, Adams, Harcourt Brace, 1992

1. 3-ring binder and paper (not spiral)
2. Writing implements

COURSE OUTLINE:

All students will take a Pre-TASP test to assess their reading abilities. This is an individualized, self-paced class. The textbook is divided into four parts, plus a fifth section on reading textbooks. Each part contains reading instruction and a Vocabulary Preview. Each part also contains various reading selections, followed by a quiz. There are a total of 40 reading selections. Students are to read each chapter and complete all exercises, complete the Vocabulary Preview, read the selections, and complete the quiz. Students are expected to complete at least four reading selections from each chapter. At the end of the quarter students will retake the Pre-TASP test as a final exam to measure their growth. If all assignments are completed, students do not need to attend class. Instructor-supervised lab time is provided for independent study using the SkillsBank program, and/or conferencing.

TEXTBOOK AND REQUIRED MATERIALS:

DEVELOPING COLLEGE READING, Jacobus, Harcourt Brace, 1991.

1. 3-ring binder and paper (not spiral)
2. Writing implements

GRADING POLICY:

20 READING QUIZZES @ 2.5 POINTS EACH	=	50 POINTS
5 VOCABULARY @ 10 POINTS EACH	=	50 POINTS
1 FINAL EXAMINATION	=	100 POINTS
TOTAL POINTS	=	200 POINTS

A	=	180+
B	=	160-179
C	=	140-159
F	=	Below 140

ABSENCES = -5 POINTS EACH

TASP OBJECTIVES/ SKILLS READING

- OBJECTIVE 1. To determine the meaning of words and phrases
- Skill 1. To use the context of a passage to determine the precise meaning of words with multiple definitions.
2. Use the context of a passage to determine the meaning of unfamiliar words and phrases
 3. Use the context of a passage to determine the particular meaning of figurative language in a passage
- OBJECTIVE 2. To understand the main idea and supporting details in written materials
- Skill 1. Identify explicit and implicit main ideas in written passages
2. Recognize ideas that support, illustrate or elaborate the main idea in a passage
- OBJECTIVE 3. To identify a writer's purpose, point of view and intended meaning
- Skill 1. Recognize a writer's expressed or implied purpose for writing
2. Evaluate the appropriateness of passage for a particular audience
 3. Use the content, word choice and phrasing to determine the writers point of view or opinion
- OBJECTIVE 4. To analyze the relationship among ideas in written material
- Skill 1. To identify the method of organization used in a reading passage
2. Draw conclusions from information stated or implied in a passage
- OBJECTIVE 5. To use critical reasoning skills to evaluate written material
- Skill 1. Judge the relevance and importance of facts, reasons, examples, expert opinions or analogies used in written materials
2. Distinguish between fact and opinion in written material
- OBJECTIVE 6. To apply study skills to reading assignments
- Skill 1. Organize or summarize a passage for study purposes
2. Interpret the information presented in a graph

SYLLABUS

READING 090

COURSE DESCRIPTION:

An intensive review of reading for students who have not passed the reading portion of the TASP.

COURSE OBJECTIVES:

1. To determine the meaning of words and phrases.
2. To understand the main idea and supporting details in written material.
3. To identify a writer's purpose, point of view and intended meaning.
4. To analyze the relationship among ideas in written material.
5. To use critical reasoning skills to evaluate written material.
6. To apply study skills to reading assignments.
7. To pass the Reading Section of TASP.

COURSE OUTLINE:

Two (2) designated class hours are utilized for skill reinforcement through independent study and tutorial assistance. Computer-aided instruction is also provided using the SkillsBank program.

TEXTBOOK AND REQUIRED MATERIALS:

Reading Skills: Preparing for the TASP Test, Vern, Harcourt Brace, 1992.

1. Paper and writing implements

GRADING POLICY:

The course graded pass/fail. Students are required to attend all classes until they are able to pass the Pre-TASP test with a score of 75% or better. Any student who is absent more than three (3) times will not receive credit for the course.

ENGLISH 010/020 and
READING 020/030

INSTRUCTIONAL MODE:

This is a self-paced, individualized class. You will be given a diagnostic test to help determine what you already know and where best to begin. Your progress through assignments are recorded in your class folder. You need to be sure this is kept up to date. Work through your assignments, completing all exercises as indicated. **YOU ARE RESPONSIBLE FOR THE COMPLETION OF ALL ASSIGNMENTS.**

COMPUTER:

There are various computer programs we will be using depending upon individual student need. The reading classes will be working with the SkillsBank program. The writing classes will be using Practical Grammar, Job Skills Educational Program, and SkillsBank. You will be assigned an ID number and a password. It is your responsibility to keep this information accessible. A checklist will be provided to be kept in your folder. As you pass each lesson test, record your score on the checklist. If you do not pass the test, you may repeat it.

JOURNALS:

All writing students are required to keep a writing/spelling/vocabulary journal, which will be turned in for grading at the end of the quarter. Writing activities will be assigned during the lecture portion of the class. Students are to continuously add misspelled or difficult words to their spelling list by writing each word three times and then using it in a sentence. Students should continuously add new or unknown words to their vocabulary list by writing the definition and using the word in a sentence.

REFLECTION LOGS

At the end of each class all students will complete a Reflection Log, which is self-explanatory.

RULES FOR PAPERS TO BE TURNED IN:

All work which is turned in for grading must be properly headed. In the upper righthand corner write your name, your course, the current date, and the assignment. All work must be typed or written legibly. Sloppy work will not be accepted.

TEXTBOOKS:

In addition to the required textbooks listed in the course syllabus, all students **must** have a dictionary.

CLASS FOLDERS:

Each student will be given a class folder which will contain your Assignment Completion Record. The folder is to be filed in the white box for the English/Reading classes behind the appropriate section.

ATTENDANCE:

You are expected to attend all classes until all requirements are satisfactorily met. There will be a daily sign-in sheet. You must sign-in when you enter and leave class, for any reason, including breaks. You must have the instructor or lab assistant verify your sign-in and out times.

GRADES:

Assignments will be graded on completion and accuracy. The grading scale is indicated in the course syllabus. Class participation is expected. Excessive absences will result in a lower grade.

You are expected to complete all assignments. If you attend all classes, but are unable to complete all assignments, you will be assigned an Incomplete. It is your responsibility to make arrangements with the Instructor to clear the incomplete. If you do not complete because of attendance or attitude, you will be given an F and expected to repeat the entire class.

LECTURE/LAB:

All students are scheduled for one to two hours of lecture per week. During this time the Instructor will lecture on text material, including grammar, spelling, vocabulary, and reading, and assign various writing activities. Lecture time is not the place to do homework. Lab time is for working on your computer assignments, getting help as needed, reviewing homework, taking tests, etc. It is not the place to do homework, unless instructed to do so.

FINAL EXAMINATION: All classes will have a final exam, as indicated in the course syllabus.

TASP TEST:

IF YOU HAVE NOT TAKEN TASP, YOU MUST DO SO BEFORE CONTINUING WITH YOUR MAJOR SUBJECTS. THE NEXT TASP TEST WILL BE GIVEN ON JUNE 18, 1994. THE REGISTRATION DEADLINE IS MAY 20, 1994. YOU MUST PASS TASP PRIOR TO OBTAINING 60 CREDIT HOURS. IF YOU DO NOT, YOU MUST REMAIN IN PRE-TECH CLASSES ONLY.

SEQ. NO G/O NUMBER TITLE

principle orthographic views (glass box).

DFTG.02.03.03 Demonstrate auxiliary view construction.

DFTG.03.01 Perform basic dimensioning.

SUB-OBJ NO TITLE

DFTG.03.01.01 Relate need for size and shape description
of mechanical components.

DFTG.03.01.02 Identify lines and figures used in
dimensioning.

DFTG.03.01.03 Illustrate basic dimension placement.

DFTG.03.01.04 Illustrate dimensioning based on part
geometric breakdown.

DFTG.03.01.05 Demonstrate mechanical part dimensioning.

DFTG.03.02 Perform basic tolerancing.

SUB-OBJ NO TITLE

DFTG.03.02.01 Relate need for tolerancing (total amount a
specific dimension is permitted to vary).

DFTG.03.02.02 Define related terms: nominal size, basic
size, tolerance, limit and allowance.

DFTG.03.02.03 Illustrate methods of specifying tolerances
(unilateral, bilateral, limit).

DFTG.03.02.04 Demonstrate mechanical part tolerancing.

DFTG.03.02.05 Relate need for geometrical tolerancing
(variation of form or position).

DFTG.03.02.06 Define geometric characteristics and their
symbols.

DFTG.03.02.07 Illustrate methods of specifying geometric
tolerances.

COURSE: DDT.104 DRAFTING PRINCIPLES
DEPARTMENT: DDT DRAFTING AND DESIGN TECHNOLOGY

SEQ. NO G/O NUMBER TITLE

tolerancing.

DFTG.04.01 Construct axonometric drawing.

SUB-OBJ NO TITLE

DFTG.04.01.01 Define axonometric drawing and its place in
technical drawing applications.

DFTG.04.01.02 Define and illustrate types of axonometric
drawings (isometric, dimetric, trimetric).

DFTG.04.01.03 Demonstrate axonometric construction from a
multi-view drawing.

DFTG.04.02 Construct oblique drawing.

SUB-OBJ NO TITLE

DFTG.04.02.01 Define oblique projection and its place in
technical drawing applications.

DFTG.04.02.02 Illustrate principals of oblique projection
construction.

DFTG.04.02.03 Demonstrate oblique projection construction
from a given multi-view drawing.

DFTG.04.03 Construct perspective drawing.

SUB-OBJ NO TITLE

DFTG.04.03.01 Define perspective and it place in
technical drawing applications.

DFTG.04.03.02 Define and illustrate main elements of
perspective drawing: observers eye, object
being viewed, plane of projection, and
projectors from the observers eye to all points

DFTG.04.03.03 Illustrate simple perspective construction.

DFTG.04.03.04 Demonstrate perspective construction from
given multi-view drawing.

COURSE SYLLABUS

PREREQUISITES: None

COURSE DESCRIPTION: A course consisting of basic exercises in geometric construction, orthographic projection, dimensioning and tolerancing, and pictorial representation.

TEXTBOOK AND REQUIRED MATERIALS: Technical Drawing, Giesicke
Drafting Kit #1

EXPECTED LEARNING OUTCOMES: At completion of course student will be able to construct and dimension industry standard orthographic and pictorial drawings.

METHODS OF EVALUATION: Drafting work completed by the student will be evaluated based on the following criteria: accuracy, speed, legibility, and neatness.

SEQ. NO.	G/O NUMBER	TITLE
	DFTG.01.01	Perform basic instrument drawing.
	SUB-OBJ. NUMBER	TITLE
	DFTG.01.01.01	Learn identity and use of basic drafting tools.

DATE: 03/25/94

TEXAS STATE TECHNICAL COLLEGE
PERFORMANCE STANDARDS

PAGE: 1

COURSE: DDT.104 DRAFTING PRINCIPLES
DEPARTMENT: DDT DRAFTING AND DESIGN TECHNOLOGY

OBJECTIVE: DFTG.01.00 DEVELOPING BASIC DRAFTING SKILLS

IMPORTANCE OF OBJECTIVE

Basic drafting principles are the building blocks for being able to graphically represent information regardless of form.

OBJECTIVE: DFTG.02.00 DRAWING ORTHOGRAPHIC PROJECTIONS

IMPORTANCE OF OBJECTIVE

Orthographic projection is the standard for mechanical part representation throughout the world. It is the control document for design, manufacture, and quality in the manufacturing workplace. Knowledge of orthographic projection is a mandatory prerequisite for working in a manufacturing environment.

GIVEN THESE RESOURCES

STUDENT WILL

Successfully create a multi-view drawing to text standards.

TO THIS STANDARD

Satisfactory performance will require the completion of a multi-view drawing to text standards, completed in a timely manner.

ON THIS TYPE TEST(S)

Hands-On Performance showing proficient use of drafting instruments and knowledge of basic drafting principles.

DEVELOPMENT SOURCE

OBJECTIVE: DFTG.03.00 DESCRIBING FEATURE SIZE AND SHAPE

IMPORTANCE OF OBJECTIVE

The drawing gives a graphical representation of the part - dimensions tell the manufacturer what size to make it to. Dimensioning and tolerancing make or break a products development. It is the designer's responsibility to make sure the part is properly defined.

GIVEN THESE RESOURCES

The student will have access to the text and a copy of ANSI Y 14.5.

STUDENT WILL

Construct and fully dimension a multi-view drawing of a mechanical part.

TO THIS STANDARD

Satisfactory performance will require adherence to industry drawing standards set forth in the text and in ANSI Y14.5. The results will be due within the scheduled laboratory time period.

ON THIS TYPE TEST(S)

Hands-On Performance showing individual problem solving and drafting technique application.

DEVELOPMENT SOURCE

To be developed.

OBJECTIVE: DFTG.04.00 DRAWING PICTORIAL DRAWINGS

IMPORTANCE OF OBJECTIVE

A fully dimensioned and accurately drawn multi-view drawing can be somewhat difficult to read. The mechanical designer must be able to relate ideas back and forth between two and three dimensional representation types. This is important in all phases of product development.

GIVEN THESE RESOURCES

The student will have access to the text and other necessary references.

STUDENT WILL

Construct pictorial drawings from given multi-view mechanical drawings.

TO THIS STANDARD

Satisfactory performance will require adherence to specifications/standards described in the text and ANSI Y14.5. A time limit corresponding to the scheduled lab time will be enforced.

ON THIS TYPE TEST(S)

Hands-On Performance based on adherence to text standards.

DEVELOPMENT SOURCE

To be developed.
