ABSTRACT

This document consists of the two issues of the bi-annual Population Education Accessions list, an output from a computerized bibliographic database. The first issue lists the entries from January to June, and the second issue lists the entries from July to December. The issues categorize the total of 387 entries into four parts. Part I, Population Education, consists of titles dealing with various aspects of population education arranged by country in the first section and general materials in the second section. Part II, Knowledge Base Information, consists of titles that deal with the different multidisciplinary aspects of population education. These entries are grouped into sections of the following major multidisciplinary topics: (1) Documentation; (2) Education; (3) Environment; (4) Fertility and Family Planning; (5) Health and Nutrition; (6) Information and communication; (7) Migration, Urbanization, and Human Settlement; (8) Population Policy and Trends; (9) Socio-economic Factors and Conditions; and (10) Women. Part III, Audio-visual Materials, consists of titles of various kinds of audio-visual aids dealing with both knowledge base and population education aspects. Part IV, Appendices, consists of a list of publishers and sources, and subject, author and geographical indices.

INTRODUCTION

This issue of the bi-annual Population Education Accessions List is an output from our computerized bibliographic data base using the Micro CDS/ISIS system. From hereon, the succeeding issues will be generated from this computerized bibliographic data base.

The list categorizes the entries into four parts:

- Part I - Population Education consists of titles dealing with various aspects of population education arranged by country in the first section and general materials in the second section.
- Part II - Knowledge Base Information consists of titles that deal with the different multidisciplinary aspects of population education. These entries are grouped into sections of the following major multidisciplinary topics:
1. Documentation
 2. Education (including environmental, functional literacy, family planning, and sexuality)
 3. Environment
 4. Fertility and family planning
 5. Health and nutrition
 6. Information and communication
 7. Migration, urbanization, and human settlement
 8. Population policy and trends
 9. Socio-economic factors and conditions
 10. Women
- Part III - Audio-visual Materials consist of titles of various kinds of audio-visual aids (films, slides, charts, kits, videotapes, etc.) dealing with both knowledge base and population education aspects.
- Part IV - Appendices consist of List of Publishers and Sources, Subject Index, Author Index, and Geographical Index.

Each entry or title is given a running number and bibliographical references that include: (i) either the author or corporate author; (ii) title; (iii) imprint; (iv) collation; (v) abstract; (vi) subject key words; (vii) country key words; and (viii) classification number. In addition to these, a source code is also given. The source code is an abbreviation of the name of the organization where a particular title can be acquired. For the complete names and addresses of the source codes, kindly consult the List of Publishers and Sources in the Appendices.

INDIA

00003

India. Gujarat Vidyapith. Population Education Resource Centre.
*Status report on curriculum development for population
education.* Ahmedabad, Gujarat State, [1982]. [67] p.

This book lists in detail the contents of 17 courses on Population and Population Education by 12 Indian universities either as a part of related discipline or independently. All these courses give heavy weightage to the problem of rapid population growth and the fertility and mortality trends. However, it is necessary that in developing the course content at different levels of university teaching, the courses should be adapted to the specific situation of the different developing countries.

Orientation of Key Level Personnel in Population Education, New Delhi, 15-17 July 1992.
Report. New Delhi, Training Unit, Directorate of Adult Education, Ministry of Human Resource Development, 1992. 51 p.

This is the report of the second orientation programme of key level personnel of State Directorates of Adult Education and State Resource Centres to orient them in the management of integration of population education issues in the total literacy campaign. Participants from the 15 states of DAEs and 15 SRCs participated in this programme during 15-17 July 1992. Several topics were taken up for discussions to share experiences, to deliberate on conceptual clarity and contents of population education material, to design and evaluate the training materials and to make recommendations for effective management of population education programme at the state level.

Tribhuvan University. Research Center for Educational Innovation and Development.

An inventory and review of research and evaluation studies on population education: final report. Kathmandu, 1993. 64 p.

Project Director: Ratna Man Pradhan. Project Co-ordinator: Kedar Man Shresta. Project supported by UNESCO/Bangkok.

This book contains an inventory of various studies and publications made to date in Nepal in the related area of population education. The materials are from two sources: institutions and individuals. Only seven research studies and two evaluation studies are available to be included in the inventory. Therefore, printed materials directly related to population education and reports of the seminar/workshop on population education are also included in. Altogether 19 reports and books are included. Each entry contains title, author, imprint, collation, language indication and substantial review.

Case study on values related to population education.

Islamabad, 1992. 81 p.

In collaboration with UNESCO Principal Regional Office for Asia and the Pacific.

The research study examines the values in population education in the context of Islamic society with special reference to Pakistan. It is logical and rationale to examine the existing values to know how the young people perceive them and relate their implications for population growth. Through this case study, a set of values was analyzed and categorized into five priorities to assess the level of their acceptance. For this purpose, a comprehensive questionnaire comprising 105 questions was developed and administered on curriculum developer, prospective teachers, educationists and others. Findings of the study in general, indicate that values are taking new shape, in view of the urges of time and emerging socio-economic patterns in Pakistan.

POPULATION EDUCATION - GENERAL

00011

International Congress on Population Education and Development, Istanbul, Turkey, 14-17 April 1993.

Development of UNESCO/UNFPA population education programme over the last twenty years. Bangkok, UNESCO Principal Regional Office for Asia and the Pacific, 1993. 46 p.

The booklet is part of the report presented at the International Congress on Population Education and Development, Istanbul, Turkey, 14-17 April 1993. It presents the history, the inception and development of the global population education programme. The report is divided into 5 sections, namely: I. Population education: an emerging priority; II. UNESCO/UNFPA cooperation in population education; III. Regional action at the service of national projects; IV. UNESCO/UNFPA action at the global/international level; and V. Priorities for the future.

International Congress on Population Education and Development, Istanbul, Turkey, 14-17 April 1993.

Population education: a dimension of educational policies in the 21st century - working document. Paris/New York, United Nations Educational, Scientific and Cultural Organization/United Nations Population Fund, 1993. [32] p.

The main purpose of the International Congress is to review the evolution of population education worldwide during the last two decades and to adopt a policy statement on the role of education in, and its contribution to, the promotion of human development. The Congress focuses mainly on population education at all levels of formal education systems, i.e., primary, secondary, technical and vocational, higher education and teacher training. This workshop document contains 3 chapters, namely: I. The overview and future needs in population, presenting related and pertinent issues to population education - Population and development, Rationale for population education, Role of population education, Concept of population education, Status of population education, and Overall considerations for the future; II. Draft declaration of the Istanbul International Congress on Population Education and Development; and III. Population education: an action framework on the eve of the 21st century.

This is the draft final report of the First International
Congress on Population Education and Development in Istanbul from
14 to 17 April 1993. The aims of the Congress were to review
trends in population education worldwide over the past two
decades, to adopt a Declaration on the Role of Education in Human
Development and to advise an Action Framework in this field on
the eve of the 21st century. It was attended by a total of 234
participants from 93 Member States, and others from UN
specialized agencies, and intergovernmental, non-governmental,
and governmental organizations.

Section 1: Can population problems form the subject of educational action? International Review of Education 39(1-2) : 15-29, March 1993. In English and French.

This chapter comprises three articles presenting the view points and opinion of the political decision-maker, the educator and the demographer to say why population matters should be the subject of educational action. The indications are that general socio-economic conditions, the relationship between poverty and population, human resources, health and human rights are inextricably linked with education.

Minto, George, and others.

Section 4: Population education in action. International Review of Education 39(1-2): 97-142, March 1993. In English and French.

This section presents a panorama of population education in action in the various regions of the world through eight contributions by specialists who are managing population education programmes at regional or national level in the Pacific, East Africa, the Arab States, Latin America, Madagascar, India, the USA, and Romania. In most developing countries such programmes are run by public authorities with the support of UNFPA, and UNESCO, while in Europe and North America private organizations take the lead. In numerous countries, religious circles favour uncontrolled birth, and considerable efforts have been required to overcome their resistance and to involve them in the programmes. There are still obstacles such as the unclear status of the subject, lack of financial and administrative support, insufficient trained teachers and facilities to train them. Nonetheless, appreciable results have been obtained, and the content of population education has been enlarged to include the broader social questions outlined above.

Population education. In: United Nations Educational, Scientific and Cultural Organization *Education for all: purpose and content*, prepared by Sheila M. Haggis. Paris, 1991. p. 63-72 (World Conference on Education for All, monograph 1)

This article on population education is based on materials presented or available at the Roundtable organized by the United Nations Population Fund. The paper discusses the basic concepts of the content and teaching methods of population education, and the purpose of population education to help people understand how population issues relate to the daily life. The concepts of "population education" and "improvement of the situation of women" which are closely related are also examined. The paper gives several examples of population education programmes in different parts of the world.

Connections - linking population and the environment: student resource guide, ed. by Kimberly A. Crews, and Patricia Cancellier. Washington, D.C., 1991. 96 p.

The kit aims to introduce upper elementary students (grades 4-6) to population and environment issues. The readings in the Student Resource Guide are divided into geographic units: the world, Africa, Asia and Latin America. Within each unit is an

article on the region, and when available, articles on specific countries in that region. Terms that appear in the glossary, located at the back of the Student Resource Guide, are highlighted in colour in the text. Units of measure that may be unfamiliar to the students are defined in the margin. Page-size versions of the World Population Data Sheet and World Environment Data Sheet can be found at the end of the book.

Connections - linking population and the environment: teacher's guide, ed. by Kimberly A. Crews, and Patricia Cancellier.
Washington, D.C., 1991. 80 p.

This Teacher's Guide contains 27 lessons that complement the articles, expand on selected concepts and issues and help students make the connections between population growth, environmental concerns and sustainable development. Some of the lessons are specifically tied to a particular region or country. Others are more generic and can be used when studying any of the regions and countries in the package. The lessons can be used alone or as a unit. Accompanying worksheets can be found at the end of the lessons. A learning matrix, showing the countries, topics and skills that are covered in each lesson and reading, can be found on pages 6-9. A resource list containing additional books, articles and audiovisual aids can be found at the beginning of each section.

Section 2: The content of population education. International Review of Education 39(1-2): 31-79, March 1992. In English and French.

This section discusses certain particular aspects of the content of population education. A set of concepts, which see population education as a preparation for individual responsibility and life in society, is put forward from a pedagogical point of view. The progress made in developing teaching materials are analyzed and the relationship between

population and environment, which are still too often seen in education as rival newcomers are considered. The article addresses the sensitive subject of the treatment of migration in the curriculum and points to the need to refer to the challenges posed in certain countries by the ageing of the population.

Population communication: communication theories, development and strategies, Volume One. Bangkok, 1992. 116 p. (Regional Clearing House on Population Education and Communication. Abstract-bibliography series no. 12)

This 12th abstract-bibliographic series comes in two volumes. This first volume comprises five sections, abstracting a total of 51 documents, covering materials that provide the theoretical and conceptual framework and principles and strategies for planning and managing IEC programmes. Section One builds the basic theoretical and conceptual foundation that will help deepen the readers' understanding and analysis of the nature and function of communication as applied in population and family planning programmes. Section Two deals with communication planning and strategy development. It offers alternative strategies for developing a communication programme in population and family planning. The third section calls attention to another key factor for a successful IEC programme: good management. Section Four deals with a general topic: the role of communication for rural and national development. The last section reports on the current status of population IEC programmes in Asia and the Pacific. The entries under each section are arranged alphabetically by author, institution or other main classifications. The descriptors are provided to facilitate a systematic search for references by specific subject.

(Regional Clearing House on Population Education and
Communication. Abstract bibliography series, no. 12)

The 12th abstract-bibliography series of the UNESCO Regional Clearing House on Population Education and Communication comes in two volumes. This second volume contains three large sections, abstracting 77 documents. Section One deals with population communication research and evaluation. It contains manuals and resource books offering procedural communication research and evaluation. The second section covers documents describing the use of mass media in promoting population and family planning programmes. They provide guidelines on how to plan, develop, produce, distribute, utilize, and evaluate various types of mass media, review country experiences in the use of various types of mass media; and discuss problems and issues in the use of mass media for development programmes. The last section consists of manuals, handbooks, guides, modules and training packages designed to upgrade the knowledge and skills of trainers, outreach and fieldworkers, population communicators, motivators, teachers, and administrators on various aspects of population IEC. The types of materials abstracted include monographs, case studies, research reports, technical papers, manuals, guides, handbooks and training packages.

Teaching population: which textbook to choose? - a survey of secondary science textbooks, by Andrea Doyle and others.
Washington, D.C., 1991. 8 p.

To aid secondary science instructors and supervisors in selecting texts that provide adequate coverage of population dynamics and impacts, ZPG's Population Education Program has surveyed 44 current editions of life science, biology, advanced placement biology, and environmental science textbooks. The matrices used are designed to provide objective information on each text's inclusion of specific topics related to population and human ecology. This format shows trends in the texts, allows individual texts to be compared, and serves as a tool for educators interested in supplementing weak areas of the specific text.

Environment index: ENSICNET, Vol. 1, Nos. 1&2, April/August 1992. Bangkok, Environmental Systems Information Center, 1992. 349 p.

This first edition of the Environmental Index contains the input provided by the regional information network of the Environmental Systems Information Center (ENSICNET). The participating countries in ENSICNET are: China, Indonesia, Nepal, Pakistan, Philippines, and Viet Nam. This bibliography is a joint effort to facilitate the exchange of information. It represents an attempt to disseminate widely the experiences, technologies, researches, and projects being conducted in the six countries participating in the ENSICNET network. The coverage of this bibliography includes environmental issues: non-conventional and conventional methods of collecting, treating, using and recycling water, solid wastes and wastewater, water supply management, water resources planning, hygiene education and communication participation.

Pearce, Michael, ed.
Non-standard collection management. Hants, England, Ashgate
Publishing Co., 1992. 236 p.

This volume contains chapters on a range of materials, such as
manuscripts, out-of-print books, newspapers, serials,
cartographic materials, ephemera, slides, microfilms,
microfiches, recorded sources, visual and audio, which are
different from the main book collection and are considered out of

the usual run of experience of most librarians. The book presents the information about characteristics of each type of material as well as guidance for their management and cataloguing. This volume is aimed at those who need to know how to deal with unfamiliar types of materials but not necessarily to take it into complete specialization. List of further reading and a note of some important collections are provided.

Young Child and the Family Environment Project.

International directory on the young child and the family environment. Paris, YCF Project, UNESCO, 1991. 336 p. In English and French.

The directory is based on a survey of 670 institutions from 116 countries, representing a wide range of organizations, both non-governmental and governmental, involved in early childhood development and education. It aims to provide those working with and for children with an important information source, and to encourage and facilitate communication and information sharing between institutions and individuals active in improving the situation of children worldwide. The information included in the profiles presents the activities, both in their home country and in other countries of each institution. The profiles are arranged alphabetically by country and by the official name of the institution. A reference number assigned to each profile is listed to the left of the official name. This number is used in the indexes to refer to the institution, rather than the page number of which the profile is found. Each profile contains three kinds of information about the institution: (a) identification and contact fields; (b) information concerning the focus of activities of the institution; (c) the type of activities and services of each institution. Indexes are included to facilitate information retrieval.

United Nations Office at Vienna. Centre for Social Development and Humanitarian Affairs.

Directory of selected international and regional youth and youth related organizations. Vienna, Youth Unit. Centre for Social Development and Humanitarian Affairs. United Nations Office at Vienna, [1992]. 66 p. In English, French, Spanish.

This Directory of Youth Organizations has been compiled by the United Nations Office at Vienna, Centre for Social Development and Humanitarian Affairs (UNOV/CSDHA) based on information received by the Centre up to the end of February 1988 from numerous youth organizations at the regional and interregional levels. The information on each organization is presented under five headings: name, address, aims, programmes and membership.

The name is given in English, French and Spanish even when the organization does not officially have titles in these three languages. The sections on aims and on programmes are not intended to be comprehensive, but rather indicative of the main aims and programme areas of the organization. These presentations are based on the submissions by the organizations which have been edited for brevity.

United Nations Population Fund.

Directory of training courses: family planning & maternal and child health. 1992/93 ed. New York, 1992. 37 p.

This directory contains information on short-term (one year or less) non-degree training courses in family planning and maternal and child health conducted during 1992 and 1993. Information in this directory is grouped by training area. The five training areas in family planning and maternal and child health represented are: Clinical Training; Information, Education, Communication Training; Management Training; Training of Trainers; and Other Training (research, demography, statistics, computers). All courses in the directory are listed separately, one course per page. A glossary is provided at the beginning of the directory to facilitate understanding of acronyms, abbreviations, and terms used throughout this document. At the end of the directory are three indexes: the Organization Index, the Language Index, and the Region Index. The Organization Index lists all training organizations in alphabetical order. The Language Index and the Region Index are categorized by course training area. All indexes list names of training organizations rather than titles of training courses.

Anderson, Mary B.

Education for all: what are we waiting for?. New York, United Nations Children Fund, 1992. 111 p.

The book is divided into two parts. Part I discusses and tells stories of innovations in education around the world that have succeeded in providing better learning opportunities for more children. It identifies the lessons we have learned about how to educate children in order to meet today's education challenge. Part II presents case studies and examples of educational innovations in six countries: Bangladesh, Colombia, Kenya, Dominican Republic, Zimbabwe, and Lebanon. They were chosen to illustrate a range of different local solutions to educational problems. The cases provide good ideas applicable to other places and circumstances, and they reveal the processes and approaches that, when followed, can lead to more and better education everywhere.

New directions: media education worldwide. London, British Film Institute, 1992. 242 p.

The need to education all children to understand and analyze the media critically, and to be able to use media technologies for their own messages, is going to be a crucial issue for schooling in the twenty-first century. This book combine accounts of media education practice, policy and theory from every region of the world. It includes detailed accounts by teachers, researchers, project leaders and media professionals, of their work with children in schools and educational projects. The book provides challenging new formulations of the key issues in media education: training, pedagogy, resources, evaluation and the meaning of literacy.

Nutrition education: a proposal for a community-based approach.
Food Nutrition and Agriculture 2(4): 42-48, 1992.

As the effectiveness of traditional nutrition education

approaches was questioned, this article gives a discussion on an alternative approach, the active participatory framework in nutrition education. The focus of a participatory approach is to involve community members in a critical, creative, reflexive and interactive process to assess, analyse and act upon issues of interests. The method, application, stages in a programme, a communication strategy, and limitations of a participatory theory for nutrition education are discussed.

Environmental education: a component of sustainable development
In: United Nations Educational, Scientific and Cultural Organization Education for all: purpose and context, prepared by Sheila M. Haggis. Paris, 1991. p. 53-62 (World Conference on Education for All, monograph I)

This article is based on materials presented or available at the Roundtable organized by the United Nations Development Programme. The paper focuses on the concepts, aims and programme strategies of environmental education to ensure widespread environmental literacy - the elementary knowledge, skills and motivation for people to participate in the solution, and anticipation, of environmental problems in order to make the contribution to sustainable development. A case study on the introduction of environmental education into primary schools in Malaysia and a case study of non-governmental and community organizations promoting environmental education in Thailand are presented and discussed.

Environmental Education Curriculum Workshop, Suva, Fiji, 7-14 July 1988.

Report [of the Workshop]. Noumea, New Caledonia, South Pacific Regional Environment Programme, South Pacific Commission, 1988. 122 p.

Jointly organized by Institute of Education of the University of the South Pacific and the South Pacific Regional Environment Programme with financial assistance from UNEP, Nairobi, Kenya.

This is the report of the first regional Environmental Education Curriculum Workshop held in Suva, Fiji, 7-14 July 1988. The Workshop was jointly organized by the Institute of Education of the University of the South Pacific and the South Pacific Regional Environment Programme, South Pacific Commission. The

Workshop was attended by the representatives of countries from Polynesia, Melanesia and Micronesia. Two main features of the Workshop are: (i) fact-finding, through a review on a country-by-country basis of the existing state of the region's environmental education activities, and (ii) environmental awareness-raising of participants, most of whom are curriculum developers, to seek their assistance in ensuring the incorporation of a greater degree of environmental content, across a broad range of subjects in the education systems of the South Pacific.

Viet Nam: schooling, literacy and fertility. International Journal of Educational Development 13(1): 63-80, January 1993.

This article discusses the census data, conducted in Viet Nam during the period 1979 and 1989, relative to education, schooling and literacy. It contrasts the 1989 results with those derived from the previous census in 1979. It briefly questions what may be ahead for Viet Nam's educational system during the 1990s and the likely results of its third national census when conducted in 1999. In addition to schooling, literacy, dependency, and sex ratios, other changes impacting on the life of women and girls are also considered.

The educational development of students following participation in a pre-school programme in a disadvantaged area in Ireland. The Hague, Bernard van Leer Foundation, 1993. 11 p. (Bernard van Leer Foundation. Studies and evaluation papers, 12)

This is the report of the findings of a longitudinal study about a cohort of Irish children who had attended a special pre-school programme. The study followed them until they were aged 16 years. The findings indicate that children made good progress during their attendance at the pre-school centre, but tended to drop back in primary school. The course of conducting longer term follow-up studies of participants on their later educational careers, their first experiences with work, their leisure activities, and evidence of social deviation during adolescence is made and the findings analyzed.

Status of women through teaching of mathematics: a teacher's handbook. New Delhi, National Council of Educational Research and Training, 1984. 46 p.

This handbook is an attempt to develop curriculum material in mathematics so as to achieve the sociological aim of raising the

consciousness of pupils regarding status of women in society. The objective is to cultivate a healthy attitude towards the image of women in society by freeing the minds of pupils of the stereotyped based image of women. The teacher's handbook list a set of representative problems of various mathematical concepts feature the values of highlighting the participatory role of women, dignity of labour, social evils, bride price, small family norms, etc. The handbook is divided into four broad sections - primary, middle, secondary and brief biographies of some women mathematicians.

Population research and education in Viet Nam. Asian and Pacific Population Forum 6(No. 3): 82-84, Fall 1992.

Five main groups are engaged in population research and education in Viet Nam. The General Statistics Office and the Institute of Sociology conduct quantitative and qualitative demographic studies, respectively. The National Committee for Population and Family Planning, within the Ministry of Health, carries out studies of contraceptive methods, population policies, and the national family planning system. The Ministry of Education and the Institute of Pedagogical Sciences have responsibility for population education. Finally, various entities, such as the Ministry of Labour Force, the Viet Nam Women's Union, and the Youth Union, examine specific population issues relevant to their own functions. This overview attempts to assess the data sources, data quality, and analysis underlying the studies issued by each of the five groups.

Regional Workshop for the Conduct of Skill-Based Literacy Programmes for Women, Hua Hin, Thailand, 1-22 June 1992.
A report of the Workshop. Bangkok, UNESCO Principal Regional Office for Asia and the Pacific, 1992. [200] p.
Organized by the UNESCO/PROAP under UNDP funded Project RAS/88/013.

The handbook is one in a series of three handbooks produced at the Third Regional Workshop for the Conduct of Skills-based Literacy Programmes for Women, organized by UNESCO. Twenty-one women and men from nine countries: Bhutan, China, Laos, Myanmar, Papua New Guinea, Philippines, Thailand and Viet Nam participated in this workshop. After the participants' sensitization to gender issues, they learned about principles of curriculum development, then each participant developed their own curricular units complete with teacher's guides, learner's workbook and teaching materials. This handbook contains session designs on five major groups of topics: introduction, ice-breaking; gender sensitization; designing a skills-based literacy curriculum for women; and teaching and learning principles.

*Educational developments in the Asia and Pacific Region:
graphic presentation.* Bangkok, 1993. 28 p.

The booklet is published on the occasion of the 6th Conference

of Ministers of Education and those Responsible for Economic Planning in Asia and the Pacific (MINEDAP VI) convened by UNESCO.

This publication includes a series of graphics that describe the most relevant aspects of education in the region. They have been generated with statistical data from UNESCO and other international sources. An explanatory note is also included in most of them, along with the appropriate statistical tables.

Education for all: an expanded vision, prepared by Paul Fordham
Paris, 1991. 89 p. (World Conference on Education for All, monograph II)

Roundtable themes II, World Conference on Education for All, Jomtien, Thailand.

The second monograph elaborates the five components of the expanded vision of basic education by discussing the key problems that need to be addressed and providing selected examples of possible solutions and approaches. It begins by examining the equity issues relating to the education of girls and women, the most urgent priority expressed in the World Declaration. It then deals with two interrelated aspects of enhancing the environment for learning: early childhood care and education, and health and nutrition. The focus on learning, a key component of the expanded vision, is dealt with specifically in relation to improving the quality of primary education; relevant research findings and good practice are reviewed. Distance education and non-formal programmes for youth and adults are discussed in connection with broadening the means and scope of basic education. Strengthening partnerships, the fifth component of the expanded vision, is examined from several angles, with an emphasis on the need to encourage and facilitate the participation and communication of families, communities and other factors in the provision of basic education.

Education for all: purpose and context, prepared by Sheila M. Haggis. Paris, 1991. 96 p. (World Conference on Education for All, monograph 1)

Roundtable Themes I, World Conference on Education for All, Jomtien, Thailand.

This is one of the three monographs based on the papers, statements and audio-visual materials presented during the thematic roundtables at the World Conference on Education for All. This first monograph deals with the purpose and context of basic education, starting with the basic learning needs which education must meet. These include the essential learning tools, such as literacy, numeracy and problem solving skills, as well as the knowledge, attitudes and values needed by human beings to survive and to function effectively in their societies. These learning needs change, so Education for All must be viewed in the context of lifelong learning and human development. Finally, the monograph focuses on three major educational components that can affect the quality of life and that deserve space in basic education programmes: environmental education, population education and health education.

United Nations Educational, Scientific and Cultural Organization.
Education for all: the requirements, prepared by Douglas M. Windham. Paris, 1992. 93 p. (World Conference on Education for All, monograph III)
Roundtables themes III, World Conference on Education for All, Jomtien, Thailand.

The monograph considers how a broad range of personnel, especially those at grassroots level, can be empowered to provide basic education. Particular attention is given to the role and responsibilities of the teacher, together with the conditions of service and work that can enhance the teacher's effectiveness. The involvement of parents, communities and non-governmental organizations in designing, providing and supporting basic education is discussed. It stresses the importance of instructional materials, and reviews various issues relating to their availability, cost and relevance. It also looks at ways to use technology and assessment capacities to make learning opportunities more available and effective. Finally, it reviews the implications of these several requirements on the more global issue of financing, including opportunities for reducing costs and finding alternative sources of funding.

Wilson, Ruth A.
*The importance of environmental education at the early
childhood level.* The International Journal of Environmental
Education and Information 12(1): 15-24, 1993.

Early childhood environmental education is important to both the development of the young child and the preservation of the world. It is based, in part, on the premise that, unless children develop a sense of respect and caring for the natural environment during their early years, they are at risk for developing such attitudes later in life. Environmental education during the early childhood years can help young children grow in self-confidence and in an appreciation of beauty and diversity. The emphasis of early childhood environmental education should be more on developing positive attitudes than on instructing children on facts about the natural world.

ENVIRONMENT

00069

The "Earth Summit" on population. Population and Development Review 18(3): 571-582, Sept. 1992.

The United Nations Conference on Environment and Development (UNCED), popularly referred to as the Earth Summit, took place from 3 to 14 June 1992 in Rio de Janeiro, Brazil. The majority of the 172 countries represented at the conference were led by Heads of State, making the meeting the largest-ever gathering of world leaders. The Earth Summit adopted several nonbinding documents. Two of these are of special interest. The relatively concise Rio Declaration on Environment and Development spells out 27 "principles" expressing a commitment to environmental improvement. Agenda 21, a lengthy and detailed blueprint, discusses how individual countries and the world as a whole can achieve in the next century development that is environmentally sound. Population issues, although not central in any of the Rio documents have been given significant attention in both the Rio Declaration and Agenda 21. Of the 40 chapters in Agenda 21, Chapter 5, entitled "Demography dynamics and sustainability" is fully devoted to population issues placed in the context of UNCED's special concerns. The full texts of Rio Declaration on Environment and Development, and Chapter 1 (Preamble) and Chapter 5 of Agenda 21 are reproduced in this article.

Bongaarts, John.

Population growth and global warming. Population and Development Review 18(2) June 1992.

This article focuses on two environmental issues. The first issue concerns the role of population growth in future global warming. No substantial effort has been devoted to quantifying the determinants of global warming. A second issue is the relative contributions of the developed and developing parts of the world to climate stabilization. Most proposals for action call for substantial declines in the growth of emissions from the industrialized countries, which until now have been responsible for the bulk of manmade greenhouse gases. But emissions from the developing countries are expected to rise more rapidly in the coming decades, and their role in control strategies should not be ignored. The article gives a brief review of the key factors that determine the projected future temperature rise: global warming in the absence of interventions, the "determinants" of CO₂ emission rates, population growth and future carbon dioxide emission rates, effectiveness of alternative emission control scenarios, and achieving stabilization of CO₂ emission from

fossil fuels.

Brown, Lester R., and others.

Saving the planet: how to shape an environmentally sustainable global economy. London, Earthscan Publications, 1992. 224 p.
(Worldwatch environmental alert series)

The book gives an overview of a global economy that does not compromise the prospect of future generations, and what an environmentally sustainable economic system would look like. The book's authors, of the Worldwatch Institute, attempt to answer questions such as 'How should fossil fuels be replaced?', 'How can a larger population feed itself?' and 'How can we satisfy material needs without causing pollution and resource depletion?'. They further describe the major political decisions needed, such as the restructuring tax systems to promote the shift to a sustainable society.

Commission on Developing Countries and Global change.

For earth's sake: a report from the Commission on developing countries and global change. Ottawa, International Development Research Centre, 1992. 145 p.

Global warming and the loss of biological diversity have little meaning for people suffering daily from starvation, malnutrition or lack of basic health care. Southern priorities such as resource degradation, pollution and natural disasters are immediate issues of life and death. They are issues often tied to international politics and economics. They are global problems demanding global resolution. For Earth's Sake clarifies the human dimensions of global environmental change. It helps Third World nations deal with this change. It identifies key social issues and proposes a research agenda to address them. It opens a dialogue that can change the environmental agenda into a global plan for equity, development and a sustainable ecology.

Daly, Herman E.

Sustainable development: from concept and theory to operational principles. In: Davis, Kingsley, and Mikhail S. Berstam, eds. Resources, environment and population: present knowledge, future options. New York, The Population Council Press, 1991. p. 25-43

Three conceptual issues about sustainable development and the environment in the next decade are stated and elaborated each one in turn, along with the relations among them in this article. The first issue is whether the basic conceptual starting point of economic analysis should be the circular flow of exchange value, or the one-way entropic throughput of matter energy. The second issue is to distinguish two dimensions of the throughput: its scale and its allocation. The third issue is how to attain sustainable development.

FAO-UNESCO Workshop and Project Proposal on Forests and Cultures in Asia, Bangkok, 24-26 June 1992.

Report on the Workshop. Bangkok, UNESCO Principal Regional Office for Asia and the Pacific. Regional Unit for Social and Human Sciences in Asia and the Pacific, 1992. 68 p.

In collaboration with UNESCO's International Fund for the Promotion of Culture.

This is the report of the first inter-agency action programme of the UNESCO's International Fund for the Promotion of Culture and the FAO's Forestry Operations Department under the umbrella of the World Decade for Cultural Development. The programme's main purpose is to improve the understanding and the acceptance of the socio-cultural dimensions of the relationship between people and forests and to hasten the incorporation of the knowledge into forest resource planning and management. The workshop was held on 24-26 June 1992 in Bangkok and was attended by three international consultants and officials from FAO and UNESCO with national resource persons from six countries: India, Indonesia, Malaysia, Nepal, Thailand, and Viet Nam, and several observers.

International Union for Conservation of nature and Natural Resources.

Caring for the earth: a strategy for sustainable living.

Cambridge, England, Published in partnership by IUCN, UNEP, and WWF, 1991. 228 p.

The book is published in partnership by the International Union for Conservation of Nature and Natural Resources, the United Nations Environment Programme and the World Wide Fund for Nature, the world's three most powerful organizations dedicated to preventing environmental catastrophe. The book is intended to be used by those who shape policy and make decisions that affect the course of development and the condition of the environment. The text has three parts and comprises 17 chapters. Part I, the Principles for sustainable living, defines principles to guide

the way toward sustainable societies; Part II, Additional actions for sustainable living, describes corresponding actions that are required in relation to the main areas of human activity and some of the major components of the biosphere; Part III, Implementation and follow-up, consists of one chapter which proposed guidelines to help users adapt the strategy to their needs and capabilities and implement it and sets out how the sponsors propose to follow up the strategy and involve the community of users in its follow-up.

Meadows, Donella H., and others.

Beyond the limits: global collapse or a sustainable future.

London, Earthscan, 1992. 300 p.

The book is a 20th anniversary update of the Club of Rome report, *The Limits to Growth*. The study is based on the concept of overshoot - passing limits without meaning to do so. Overshoot happens when a system grows beyond the level that limited resources and waste sinks can sustain. This corresponds to the present world situation. Population is growing faster than ever before. Only a tiny minority have any real commitment to slowing or halting economic growth. Overshoot is almost inevitable when a system is locked into growth, but knowledge about the limits is poor, and there are delays that hold up a quick response. But overshoot is almost certain the case of pollution. We are already beyond the limits for CFCs, which we must phase out altogether, and probably for greenhouse gases, where we must cut output by 60 per cent to avoid some degree of warming. In the scenarios, the collapses are hard to avoid even with ambitious measures. They happen even where resources are assumed to be doubled, where pollution and erosion are controlled, farming achieves high yields, and resource-efficient technologies are used. The only scenarios which avoid collapse involve early transitions to replacement fertility. The best combines pollution and erosion controls and higher efficiency in resource use, with a two-child family norm adopted world-wide in 1995.

Postel, Sandra.

Last oasis: facing water scarcity. New York, W.W. Norton, 1992. 239 p. (The Worldwatch environmental alert series, Linda Starke, ed.)

This volume examines the limits and scarcity of water and offers a sensible way out of such struggles. Last Oasis discloses that the technologies and know-how exist today to make every drop of water go further. With methods already up and running, farmers could cut their demand for water by 10-50 per cent, industries by 40-90 per cent, and cities by one-third, without sacrificing economic output or quality of life. Ways to conserve water and use it more effeciently, such as : recycling cooling water and treating and reusing sewage water to irrigate farmland, represent the least costly and most environmentally sound options for achieving water balance.

South Pacific Regional Environment Programme.

The Pacific way: Pacific Island Developing Countries' report to the United Nations Conference on Environment & Development. Noumea, New Caledonia, 1992. 52 p.

With the financial assistance of the Asian Development Bank and the United Nations Development Programme.

The final structure and content of this report were agreed upon at the Second Workshop on South Pacific Preparations for UNCED, Port Vila, 21-23 October 1991. The report is divided into three

chapters. The fourteen Issues and Constraints to Sustainable Development are identified, summarized and presented in Chapter 2. Chapter 3 discusses Priorities for Further Action that are fundamental to long-term survival and enhancement of the region. They are presented under five major topics: The Earth charter; Social and economic dimensions; Conservation and management of resources for development; Strengthening the role of major groups; and Means of implementation. Each topic is divided into several important aspects which contains the issues of Basis for Action, Objectives, and Activities. The Basis for Action summarizes the issues and constraints and presents a number of major responses to these concerns. The Objectives and the Activities for sustainable development are drawn from the consensus views of the 14 participating island developing countries of the region.

Environment and development: a Pacific Island perspective.
Noumea, New Caledonia, 1992. 334 p.

This background document is the product of South Pacific Regional Environment Programme (SPREP) to be submitted to the United Nations Conference on Environment and Development (UNCED) in Brazil in June 1992. The project is assisted by the Asian Development Bank and the United Nations Development Programme. The book is divided into three parts: Part I consists of summaries of 14 Pacific country reports and summaries of sustainable development prospects of these countries. Part II synthesizes the national reports and other relevant material and highlights major issues that concern both economic development and environmental management. Part III discusses the various follow-up actions that SPREP and its members have initiated, and some suggestions for improving development prospects and strengthening mechanisms for sustainable management of regional resources. Relevant statistics and basic reference documents are provided in the Appendices.

Environmental data report, prepared for UNEP GEMS Monitoring and Assessment Research Centre. 3rd ed. 1991/92. Oxford, England, Basil Blackwell, 1991. 408 p. (Blackwell reference) In co-operation with the World Resources Institute, Washington, D.C. and UK Department of the Environment, London.

This UNEP Environmental Data Report has been established as the most authoritative data book on the global environment. The information presented is compiled from a great many diverse sources, and updated biennially. The report comprises data tables supported by concise explanatory text which describes the sources and reliability of the data and gives related background information useful for interpreting environmental trends. The data provided are on environmental quality, global climate, natural disasters, health, transport, wastes, population, energy and natural resources. The book should serve as a fine reference for those who want a quick insight into global patterns and environmental trends.

Saving our planet - challenges and hopes: the state of the environment (1972-1992). Nairobi, Kenya, 1992. 200 p.

The present report attempts to identify, analyze, and interpret the different changes in various aspects of the environment and environmental situations that have taken place over the last two decades. The report is in five parts. The first part is concerned with the state of the different components of the environment: the atmosphere, marine waters, fresh waters, land, forests, biological diversity, wastes and hazards. The second part deals with different development activities and highlights the environmental impacts of such activities. A description of how the human conditions and well-being have changed in the last two decades is given in Part III of the report. The changes in perceptions and attitudes towards environmental issues, and the major responses undertaken at the national, regional and international levels are reviewed in Part IV. The fifth part of the report outlines the major challenges that face the world community in the near future and presents a number of priorities for action. Useful references for each chapter of the five parts are provided at the end of the report.

Axinn, William G.

Family organization and fertility limitation in Nepal.
Demography 29(4): 503-521, November 1992.

This paper uses the family mode of organization framework to link together hypotheses relating social change to fertility limitation. Experiences in non-family activities are predicted to affect fertility behaviour, with the outcome depending on the social, economic, and cultural context. To provide individual-level tests of hypotheses, the paper uses data from a Nepalese community which recently began dramatic family and fertility transitions. The findings show that experiences in non-family activities before marriage increase the odds of subsequently adopting fertility limitation in this setting. The evidence also demonstrates the importance of including measures of husbands' experiences in models of fertility decisions.

Caldwell, John C., and Pat Caldwell.

What does the Matlab fertility experience really show?. Studies in Family Planning 23(5): 292-310, Sept/Oct 1992.

The family planning programme in the Matlab District of Bangladesh has been described in unique detail for more than 25 years and is regarded as a model for equally poor parts of the world. Its experience has been reported as showing the ineffectiveness of contraceptive saturation approaches and the prime importance of programme management and especially of the selection of a special type of family planning household visitor, criteria that render family planning programmes relatively expensive. This reanalysis of the Matlab experience suggests that there is inadequate evidence from which to judge the record of the saturation experiment and of family planning workers from less highly selected backgrounds. It is also argued here that the role of contraceptive choice and of access to different types of contraceptives, especially injectables, delivered to the door in this society of secluded women has been underestimated, and that too little importance has been attributed to demand in contrast to supply. While it is agreed that the Matlab demonstration has been of central importance in showing that fertility can be reduced in Bangladesh, it is argued that many developing countries can draw on this experience to provide less costly family planning programmes with less emphasis on the managerial top-down approach.

East-West Center, Honolulu.

The parity structure of fertility decline in Thailand, 1953-1979, by Norman Y. Luther, and Chintana Pejaranonda. Honolulu, Hawaii, 1991. [25] p. (Reprints of the Program on Population, no. 281)

The paper presents the analysis of the parity structure of

fertility decline in Thailand during the period 1953-79. Fertility estimates for Thailand in the period 1953-79 are derived by a newly extended procedure for reconstructing birth histories from "own-children birth histories", applied to the censuses of 1970 and 1980. From the reconstructed birth histories, period parity progression ratios from women's own birth (parity 0) to first marriage, from first marriage to first birth (parity 1), and from each parity to the next are calculated for the period 1953-79. Age-specific fertility rates for 1955-79 are computed as well. The data and results indicate significantly greater underreporting of children ever born in the 1980 census than in the 1970 census. Nevertheless, there is clearly a true decline with time in progression for parity 0 to first marriage, from first to parity 1, and from each parity to the next, although the rate of decline from first marriage to parity 1, and from parity to parity 2, is slight. The decline in each case begins in the 1960s. For progression to parity 3 or higher, the rate of decline is very steep. Perhaps most surprising is the rate of decline in progression from parity 0 to parity 1, which is greater than from parity 1 to parity 2.

Effects of education on reproductive behaviour: lessons from Pakistan. Asia-Pacific Population Policy. No. 23, December 1992. 4 p.

The article discusses the reproductive behaviour in urban Pakistan, exploring the routes through which female education affects fertility among urban Pakistani women. It provides a basis for determining the potential demographic effects of educational interventions in Pakistan and in other South and West Asian settings.

Family planning and the rights of existence and development of the Chinese people. China Population Today 9(5): 12-14, October 1992.

The paper discusses the analysis from the data of population censuses and statistics to prove that the implementation of the family planning programmes in China has promoted the protection of the human rights of existence and development of the Chinese people. From the facts discussed in this paper, it can be concluded that the quality of life of China's population has improved due to the slowdown of the population growth rate resulting from the family planning programmes.

Handbook for family planning operations research design. 2nd ed. New York, Population Council, 1991. 77 p.

This handbook is specifically designed to help health and family planning researchers, programme administrators and managers develop and write a detailed operations research proposal, understand the process of operations research and the use of research findings for service delivery improvement. In this second edition, introductory section contains a more

complete and current statement on the process of health and family planning operations research. Chapters on selecting an appropriate intervention to test in an OR study and on describing the main elements of the study intervention have been included. The chapter on information dissemination has been expanded and a new chapter on the utilization of research findings has been added.

Ethnicity and fertility differentials in Peninsular Malaysia: do policies matter?. Population and Development Review 18(2): 243-267, June 1992.

This article examines the impact of Malaysian government policies, specifically the New Economic Policy and the New Population Policy, on ethnic fertility differences. The analysis uses detailed micro-level data from the First and Second Malaysian Family Life Surveys in 1976 and 1988, which together provide information on fertility over the last five decades. The article traces historical overview of socio-economic and population policy changes that have occurred in Malaysia from before Independence in 1957 to after the implementation of the NEP and NPP. The relationship between desired total fertility and the various predictor variables is analyzed using ordinary squares multiple regression. The data collected are then tabulated and discussed.

Hobcraft, John.

Fertility patterns and child survival: a comparative analysis.
In: United Nations. Department of Economic and Social
Development Population Bulletin of the United Nations, No. 33,
1992. New York, 1992. 87 p.

This article presents information on the impact of fertility patterns upon child survival for 18 countries from the Demographic and Health Surveys (DHS). The findings generally serve to confirm that children born to teenage mothers, especially those under age 18, experience considerable excess mortality before age 5. More important at the population level

is the deleterious effect of short birth intervals for child survival. Data quality, although a problem, is shown not to have a major distorting impact on these findings. Further analysis in 10 categories of family formation is carried out. The more important findings to emerge are that the overall impact of poor timing of births on child survival is substantial in many countries but has been improving over time, probably as a result of increased use of family planning, in a number of cases (e.g., Colombia, Morocco). On the other hand, child mortality gains in Senegal are being inhibited by a worsening pattern of timing of births. The policy implications of these findings are briefly assessed.

Biological and behavioural determinants of fertility in Bangladesh: 1975-1989. Asia-Pacific Population Journal 8(1): 3-18, March 1993.

This study examines the recent level and trend of fertility and the three most important factors affecting fertility in Bangladesh: marriage, contraception and lactational infecundability. The study applies the model to data obtained from two nationwide fertility surveys in 1975 and the other in 1989. The analysis shows that, although the fertility level of Bangladesh is declining, it is still very high around 5 births per woman. The analysis suggests that the fertility-reducing effect of contraception is gradually increasing and predicts that the use of contraception will be the dominant factor in any further reduction in fertility.

Costs of family planning services: a critique of the literature International Family Planning Perspective 18(4): 137-144, December 1992.

Estimates of the costs of providing family planning services have been used to assert that some types of programmes are more efficient than others. However, variations in costs may exist because of differences in the mixes of services or in the demand for services and the availability of alternative services. Moreover, cost estimates may vary simply because researchers used different methodologies, treated programme output in widely varying ways or did not always take differences in programme settings into account. The authors recommend that a common methodology be developed for determining the costs of family planning so that better comparisons are attempted and programmes from clearly different settings are not directly compared.

Family planning in Bangladesh: an unlikely success story.
International Family Planning Perspectives 18(4): 123-129,
December 1992.

The results of two independent national surveys conducted in 1989 show that Bangladesh has achieved a moderate level of contraceptive use. Among currently married women under 50 years old, 31 per cent use a contraceptive method and almost 25 per cent use a modern method. In addition, 44 per cent of ever-married women younger than 50 have used a method at some time. The method mix, historically characterized by use of a wide range of methods, is increasingly dominated by oral contraceptives, which accounted for 29 per cent of use in 1989. Reflecting the increase in contraceptive prevalence, the total fertility rate declined from seven lifetime births during the mid-1970s to about five lifetime births by the end of the 1980s. Mean and desired family size in 1989, however, was three children, indicating that there may still be considerable unmet need for family planning services.

The impact of family size on wealth accumulation in rural Thailand. Bangkok, Institute of Population Studies, Chulalongkorn University, 1990. 31 p. (Project on Socio-economic Consequences of Fertility Decline for the Thai Family (SEC), Report no. 3)

This publication is the report to be based on a research project on Socio-Economic Consequences of Fertility Decline for the Thai Family (SEC) being carried out by the IPS. The objective of the paper is to assess the economic impact of reduced family size at the household level in two selected rural areas, one in which fertility decline has reached an advanced stage (Lampun) and the other in which fertility decline is at a more intermediate stage (Suphanburi). The results of the findings are discussed and illustrated with charts and tables showing clearly the positive effects of reduced family size on a couple's ability to accumulate wealth.

The effect of attitudes on teenage premarital pregnancy and its resolution. Seattle, Washington, Graduate School of Public Affairs, University of Washington, 1991. [52 p.]. (Seattle Population Research Center. Working paper no. 2)

This study examines and provides evidence on the relationship between teenage premarital childbearing and four psychological variables: self-esteem, locus of control, attitudes towards women's family roles, and attitudes towards school. Using data from the National Longitudinal Survey of Youth (NLSY), the analysis examines the relationship of such variables to both premarital pregnancy and its resolution. The findings presents new evidence about the validity of models which predict that these attitudes affect behaviour.

Population picks & pans: embargoed until Monday, 8 March 1993. Washington, D.C., 1993. 40 p.

The booklet highlights the success or failure in providing access to family planning of 10 countries in its 1992 Population Picks & Pans. The five countries recognized for their recent progress toward universal access to family planning and population stabilization, are Indonesia, Bangladesh, Iran, Peru, and Zimbabwe. The other five countries which being selected for their lack of progress on reproductive health are Russia, Pakistan, Poland, Iraq, and Ireland. The individual experiences of these 10 countries provides valuable information on what makes for success or failure in providing family planning and reproductive health care services.

Rahman, Mizanur., and others.

Contraceptive use in Matlab, Bangladesh: the role of gender preference. Studies in Family Planning 23(4): 229-242, July/Aug. 1992.

Research in several Asian societies has suggested that sons are generally preferred over daughters. The implications of gender preferences for actual fertility behaviour have not been adequately investigated, however. This analysis examines the effect of the sex composition of surviving children on the acceptance and discontinuation of contraception in a sample of 3,145 women in Matlab, Bangladesh, who were observed for 60 months. Hazards regression analyses are employed in the analysis. Strong and highly significant effects of gender preference on contraceptive use are observed. The preference is not monotonically son-biased but is moderated toward a balanced composition, because parents desire to have several sons and at least one daughter. These findings suggest that gender preferences, particularly a preference for sons, represent a significant barrier to fertility regulation in rural Bangladesh.

The reproductive revolution: new survey findings. Population Reports. Series M, No. 11, December 1992. 43 p.

This is the report of the findings from the Demographic and Health Surveys (DHS) and Family Planning Surveys (FPS). These two large scale survey programmes have interviewed nationally representative samples of more than 300,000 women of reproductive age in 44 developing countries since 1984. The report presents the statistical results broadly representative of developing regions on major aspects, namely: fertility declines and differences, family planning, potential demand for family planning services and contraceptives, fertility determinants, child survival and health, and fertility and family planning in the future.

Patterns of fertility in low-fertility settings. New York, 1992.
134 p.

This publication contains the most recent United Nations analysis of fertility and trends in countries that are currently considered low fertility countries. It provides an overall assessment of fertility levels and trend in low-fertility countries for the period from 1965 to 1989 or to the most recent year for which pertinent data are available. The study is both descriptive and analytical. Reproductive behaviour is examined in terms not only of fertility rates (mainly period rates but of cohort rates whenever data are available), as well as in terms of total number of births. Various other aspects of fertility, including population replacement, adolescent fertility, birth order and illegitimate fertility, are also examined.

Westoff, Charles F.

Reproductive preferences: a comparative view. Columbia, Maryland, Institute for Resource Development/Macro Systems, 1991. 27 p. (Demographic and health surveys comparative studies, no. 3)

The subject of reproductive preferences has been included routinely in fertility and family planning surveys since their beginning. These surveys have attempted to quantify and measure the concepts of ideal family size, intentions to have another child, intentions to postpone the next birth, and wanted and unwanted births. This report analyzes and compares reproductive preferences in the 28 countries included in the first phase of the Demographic and Health Surveys (DHS) programme. The countries surveyed are in Sub-Saharan Africa, the Near East/North Africa, Asia, and Latin America/Caribbean. First, fertility norms are examined, that is, the desired or ideal number of children. Then the report looks at reproductive intentions, in particular the proportion of women who want no more children, and some of the associated demographic and social attempt is made to infer the preferred length of the next birth interval. Based on this information on reproductive preferences, desired fertility rates are then estimated, which are of special importance to an assessment of demographic implications. The report concludes by forecasting total fertility rates for each of the countries over the next five years. These forecasts are based on earlier research linking reproductive intentions with contraceptive prevalence and total fertility rates.

Xingyan, Wen.

The effect of sex preference on subsequent fertility in two provinces of China. Asia-Pacific Population Journal 7(4): 25-40, December 1992.

This article addresses the impact of sex preference on Chinese

couples' family-building process at both the micro-level and macro-level. The micro-level analysis begins with the association between sex of the existing surviving children and sequential parity progression, without taking socio-economic conditions into account. The analysis is then extended to incorporate some selected socio-economic and demographic characteristics of women with special reference to those who had two or more living children before or during the period of the one-child policy. This is done in order to evaluate the roles of sex preference and socio-economic characteristics of individual women in determining further childbearing under population policies and programmes of different strengths. The macro-level analysis investigates to what extent, under China's intensified family planning programme and population policy pressure, sex preference still exerts an impact on recent fertility.

Operations research methods: cost effectiveness analysis.
Bethesda, Maryland, Primary Health Care Operations Research, 1988. [92] p. (PRICOR monograph series: methods paper 2)

Cost-effectiveness analysis (CEA) is one technique that often is used in operations research. When used for primary health care planning, it can help policymakers and program managers examine alternative ways of achieving a given objective and enable them to select the method that uses available resources most effectively. In this paper, the first two chapters give a brief overview of CEA for those researchers and decisionmakers who may be interested in learning what this technique is and how it can be applied to planning and improving primary health care programs. Chapter 1 discusses the basic principles of CEA, including its benefits and limitations. Chapter 2 offers a

step-by-step approach to the design and conduct of a CEA study. Six steps are described, and each is illustrated with a case study in which CEA is used to find a solution to an operational problem in primary health care programming. Four appendices are included to provide detailed instructions for those researchers who are interested in carrying out a CEA.

Education for the prevention of AIDS, no. 1: selection of extracts from teacher's guides. Paris, AIDS School Education Resource Centre, UNESCO, 1991. 146 p. In English, French & Spanish.

The book is a collection of the selection of eight extracts from teachers guides from among 105 available throughout the world. These guides have been selected to give concrete examples of some of the teaching materials from the countries of different parts of the world. The guides do not follow a set pattern, but it can be seen that on the whole they contain approximately the same headings: one section on knowledge and information about HIV infection and AIDS data on the functioning of the immune system, in some cases on sexually transmitted diseases in general, epidemiological data and description of the clinical symptoms of the diseases, its means of transmission and ways of avoiding transmission; a section of appropriate attitudes and behaviour

towards the disease how school children can adopt responsible attitudes so as to protect themselves against this infection, this part of the programme to include participative activities concerning decision-making and how they should react to and deal with persons with AIDS.

World Health Organization.

Health dimensions of economic reform. Geneva, 1992. 68 p.

Health is an essential objective of development. It is also a condition for development. These two aspects of health and its links with development are now emerging with great force and clarity. There is a better understanding of the crucial contribution of health to economic activity, to improvement of the human condition and, through these, to all the processes of development. The achievement of appropriate health objectives is, therefore, an important measure of development strategies.

This book analyses how health conditionality can become an essential component of economic decision-making. It illustrates how the vital health objectives of protection and improvement of health status and quality of life can be defined at the very outset along with the macroeconomic objectives, and that the

processes of adjustment can achieve both sets of objectives simultaneously. It also provides examples of how health status protection and promotion can acquire an intrinsic value in the lives of all people, but especially in the lives of the vulnerable and the marginalized.

Broadcasting for non-formal education: curriculum notes and guidelines for country workshops, by Uvais Ahamed, and others.
Kuala Lumpur, [1979]. 51 p.

The objective of this curriculum is to orientate broadcasting producers to the field of non-formal education. The curriculum is designed having in mind the possibility of using either radio or television for non-formal education. It takes the form of education principles and guidelines for the workshop design and planning to bring out, through direct experience, the differences of principle and approach so that broadcasters can learn how to work with those in NFE to produce materials and programmes suitable for NFE.

Educational broadcasting: radio, ed. by Uvais Ahamed and George Grimmett. Kuala Lumpur, 1979. 118 p. (AIBD training manual)

This manual on the uses of radio for educational purposes is intended to be used by the practitioner, trainer and manager who are concerned with the uses of radio in support of formal education or non-formal education. The manual supplies information on: the communication process, the curriculum as a framework for educational broadcasting, the role of the educational producer, writing for radio, documentary, magazine and discussion programmes, evaluation of educational broadcasts, and finally the management and organizational considerations

within educational broadcasting.

Here's the news: a radio news manual, comp. and ed. by Paul de Maesencer. Kuala Lumpur, 1982. 182 p.

The manual gives practical advice and instruction on modern techniques of radio journalism. It is organized in nine units. After dealing with a number of news directives, such as the organization of the newsroom and a discussion of the question 'what is news?', the manual moves on to the basic principles of writing for radio news, reporting, interviewing, bulletin editing and presentation of news. Unit 7 focuses on specific style problems, such as how to use figures, names and titles and cliches. Unit 8 is a discussion of the problems involved with translation. Finally, Unit 9 provides the basic information on equipment used in modern radio news production.

A manual on audience research and programme evaluation: audience information by design, comp. by Brajesh Bhatia and others. Kuala Lumpur, 1988. 125 p.
Edited by Brajesh Bhatia.

This manual on audience research is designed so that each module is a unit by itself and can be used that way, or all modules can be used as a whole. The manual is structured to cover the topics: 1. What is research and why it is important?; 2. The use of research and its various forms; 3. Research methods and how to go about them. It is meant to be used for continuous reference by those who are new, and not so new to audience research, and by those who are designing development programmes or the research elements within such programmes, and by programme makers themselves.

Radio management in the small community: using the resources of the media for development, ed. by Howard Gough. Kuala Lumpur, [1979]. 131 p. (AIBD manual for media training)

This training manual on radio management presents the principles, concepts and steps of management to the would-be managers to apply what is appropriate for their roles and services. The manual with 34 units set out in a stimulating form, and are punctuated with signs which require a "stop, think, discuss, decide" kind of mental exercise. The training units may be used as the basis for group discussion or for compiling case studies.

The radio programme: planning, producing, presenting, ed. by Howard Gough. Kuala Lumpur, 1976. 247 p. (AIBD manual for media trainers)

This manual is developed to train producers in the technical skills of radio production and the art of converting ideas into programmes and presentation. The book is divided into four sections and printed in ink of four different colours. This colour coding allows the trainer to draw up a specific curriculum for a course, for example, in Programme operations, Planning the programme, Presentation and Production techniques.

Hancock, Alan.

Back to the future: communication planning. Development Communication Report(79): 1, 5-6, 1992.

The article discusses the issue of communication planning. The paper points out that the general definition of communication

planning has not changed drastically over the past decade. It still involves three main elements: development policy and philosophy; communication infrastructure; and the incorporation of innovative technologies. Changes in technology are the most obvious and dramatic. The fact that we now have more data and more sophisticated means of data collection and analysis is of limited use if the frameworks within which planning is conducted are either obsolete, or not yet developed. For this reason, the field of communication for development urgently needs a more creative coupling of actions, structures and planning processes to find a new balance between liberalization, participation and direction.

Hancock, Alan.

Communication planning for development: an operational framework. Paris, United Nations Educational, Scientific and Cultural Organization, 1980. 198 p. (Monographs on communication planning, 2)

The book sets out to provide a framework which can act as both content and instrument for the planning of communication systems, especially at the national level. The process of application and evaluation are described in the text, while the discussion of methodology is brief. The objective of the present book is to offer a practical working tool to planners, describing an approach that was evolved from first principles applied in the field, and then referred to reflect the conclusions of its evaluators.

Hornik, Robert.

Development communication today: optimism and some concerns.
Development Communication Report 79(1992): 1-4,

The article discusses four principles of doing effective development communication, namely good content, good messages, good channel use and good audience knowledge. The paper also discusses the forces that stand in the way of building and maintaining an effective development communication capacity, such as: limited political motivation; lack of fit with routine; and lack of skilled staff. The best prescription for the future is patience, some satisfaction with what has been accomplished, and some understanding that strategies for short term success have to evolve into strategies for long term stability.

International survey: journalists' access to information.
Brussels, Belgium, International Federation of Journalists,
1992. 39 p. (IFJ information, no. xxxx, 1992)
Cover title : Information: right to know?

This booklet studies the legal provisions for journalists' access to information which is the spotlight on one of the fundamental objectives of all journalism. In order to make the survey representative, the research study chooses ten countries from all regions, reflecting different legal and structural traditions. They are: Denmark, Britain and France from Europe, Zimbabwe and Senegal from Africa, Venezuela and Peru from Latin America, the United States from North America; Japan and Malaysia from Asia. The answers to the survey and the analysis are provocative and stimulating.

Murphy, Elaine M.

Communicating population research: perceptions of Third World policymakers. In: Severy, Lawrence J., ed. *Advances in population psychosocial perspectives, Volume 1.* London, Jessica Kingsley Publishers Ltd., 1993. p. 103-124

The problems involved in communication of research findings are not unique to the population field. In fact, UNESCO has taken a structured look at 'appropriate information' for development in general, realizing that appropriate technology and other innovations are unlikely to be adopted unless first they can be clearly understood. But, what is appropriate information about population research? How can it be transmitted most effectively? While there are concerns voiced and recommendations made, the

literature on population research reveals very little about how to communicate it. This report briefly describes the successes and failures of one project's efforts to communicate population research findings to LDC policymakers, and the responses of the LDC policymakers who were the 'communiquees.'

The creative use of video. Development Communication Report(78)
: 12-13, 1992/3.

As communicators know, communication for behavioural change differs from the mere transmission of facts and figures. It requires an interesting presentation of clear and culturally sensitive messages with which the target audience can relate. This article presents the case study of the impact of a series of five interactive nutrition and education video programmes and the provision of a food supplement in 12 villages in northeastern Thailand. To improve child health and development in Thailand, the Institute of Nutrition Research, Mahidol University and the Department of Pediatrics at Ramathibodi University has used a series of interactive videos to communicate with parents with encouraging results in both rural and urban settings.

Asian migration: the view from the United States, by Robert W. Gardner. Honolulu, Hawaii, 1992. [35] p. (Reprints of the East-West Population Institute, no. 279)

This essay focuses on the contemporary Asian immigration, especially as it is seen from the United States. The paper discusses the immigration policies that set the boundaries, to some extent, on the numbers and kinds of immigrants from Asia to the United States. Data on recent immigration from Asia to the United States are examined. Impacts with regard to the United States and to the immigrants themselves are discussed with conclusion on the future course of immigration to the United States from Asia.

Small town and rural human resources development to reduce migration to large cities: China, India, Indonesia, Nepal, Papua New Guinea. Bangkok, 1991. 260 p. (Asian population studies series, no. 110)

The present report presents the five studies on "Small town and rural human resources development to reduce migration to large cities", undertaken in China, India, Indonesia, Nepal and Papua New Guinea, by the Population Division, ESCAP. The study examines the effect of human resources development policies on urbanization and rural-urban migration and to develop policy

guidelines for improving such policies and their implementation. The policies recommended are intended to reduce rural-urban migration and to improve human resources and their utilization, particularly in small towns and rural areas.

Studies series, no. 111)
Selected papers of the Pre-Conference Seminar Fourth Asian and
Pacific Population Conference, Seoul; 21-25 January 1992.

The volume contains selected papers presented to the
Pre-Conference Seminar on Migration and Urbanization:
Interrelationships with Socio-economic Development and Evolving
Policy Issues, Seoul, 21-25 January 1992. Twenty-six
international experts and planners in the field of migration and
urbanization in the Asian and Pacific region participated in the
Seminar. The issues studied and discussed to present the
recommendations to the Fourth Asian and Pacific Population
Conference are: Urbanization patterns and problems into the
twenty-first century in Asia and the Pacific; National and
subnational urban development strategies and policies;
Urbanization and changing family structure; Structural
determinants of international labour migration within and out
from the ESCAP region; Migration patterns and their
socio-economic implications; and Female internal migration and
the labour market.

Migration and health in the 1990s. International Migration:
Quarterly Review. Vol. XXX, 1992. 240 p.

Papers presented at the Second International Conference on
Migration and Health, Brussels, 29 June - 1 July 1992.

This volume of papers is a synthesis of the main themes related to migration and health. The first three contributed papers describe the economic, political and legislative background of international migration. The others discuss the rights of migrants, issue of racism in the delivery of health services, health policies for migrants and refugees, international overview of epidemiology studies conducted on migrant populations, mental health issues linked to migration, problems of elderly migrants, and prevention of infectious diseases. Finally, conclusions and recommendations for improvement in both delivery of health services and health research are presented.

Asian and Pacific Population Conference, Bali, Indonesia, 19-27 August 1992.

Report of the Conference. Bangkok, Economic and Social Commission for Asia and the Pacific, 1992. 79 p. (Asian population studies series, no. 115)

The publication gives the report of the Fourth Asian and Pacific Population Conference held in Bali, Indonesia from 19 to 27 August 1992. The report traces the issues reviewed at the Meeting of Senior Officials and at the Meeting of Ministers. The issues discussed and reviewed are the population trends and policies in the region, the need to set up strategic value of formulating multidisciplinary policies and programmes, the need to integrate research and evaluation into programme planning and implementation, and the role of population data and information in the formulation of policies and the implementation of programmes. Therefore, the theme chosen for the Conference was "Population and sustainable development: goals and strategies into the twenty-first century". Finally, the Bali Declaration on Population and Sustainable Development was adopted. The full Declaration is provided at the end of the report.

Bose, Ashish, and M.K. Premi, eds.

Population transition in South Asia. Delhi, B.R. Publishing Corp., 1992. 358 p.

The book presents the 23 papers contributed to the South Asian Regional Conference on Population, organized by the Indian Association for the Study of Population, during the September 20-27, 1989. The monograph is in two parts. Part I gives an overview of an examination of demographic data on vital rates, female labour force, women status, and on contrasting patterns of nuptiality and fertility in South Asian countries. Part II presents country papers from Bangladesh, India, Nepal, and Sri Lanka. The papers are centred around health and family planning in Bangladesh; land holding, statistics of women's education in India; infant mortality, agricultural development in Nepal; and pattern of population growth in Sri Lanka. The book is intended to be used not only by the scholars but also by planners and policy makers engaged in formulating plans for social and economic development.

Chewning, Betty.

Evaluating the computer as a data camera in family planning research. In: Severy, Lawrence, ed. *Advances in population: psychosocial perspectives*, Volume 1. London, Jessica Kingsley Publishers, 1993. p. 85-101

The article explores both the potential and limitations of the microcomputer as a research tool for data collection in the area of population and family planning. Due to the sensitive nature of the data collected by family planning researchers, questions about the reliability and validity of respondents' responses are often a concern. As a result, additional data collection methods are needed to supplement current methods. The computer represents an additional method, as it simultaneously allows people to engage in an intervention while storing data about a user's responses. Each computer programme offers different applications of how the computer can be used to: (1) evaluation programmes; (2) collect descriptive data about users' values, decisions, and previous behaviours regarding sexual issues; and (3) develop and test cognitive and behaviour models. Each application also offers examples of the limitations of the computer in terms of external validity issues (i.e., how representative are samples of persons who use the computer voluntarily), the need to check the validity of responses typed by computer users, and ethical issues involved in using the computer to collect data.

Trends in female and male age at marriage and celibacy in Asia, by Peter Kenos and Socorro A. Gultiano. Honolulu, Hawaii, 1992. 46 p. (Papers of the Program on Population, no. 120)

This paper examines trends across Asia in the female and male mean ages at entrance to marriage. The female singulate mean age at marriage (SMAM) has been the object of considerable attention, while the male age at marriage has not. We show that with few exceptions the long-term trend to later female marriage continued into the 1980s and in many countries has produced quite high percentages single among the young. With the exceptions noted, there is no indication that the trend has abated. Trends for males are in sharp contrast. There has been less change and the pace of change has been slower. In fact, the underlying components of change have been different for females and males. The essential difference is that female ages at marriage have become more diverse, while there has been a homogenization of male marriage ages. A research agenda is offered stressing examination of differences among countries and between the sexes and how these differences reflect the disparate trends in economic growth that have been experienced.

Population stabilization strategies in India: an assessment, by Asok Mitra. New Delhi, 1992. 36 p. (Encounter with population crisis, no. 4)

This is the fourth publication under the series, "Encounter with population crisis" featuring an advocacy of population policy to ensure human survival. The paper attempts at critical appraisal of the demographic situation as well as an evaluation of the effectiveness of strategies adopted in India to deal with high fertility and rapid population growth.

Population, poverty and environment, by J.R.D. Tata. New Delhi, 1992. 31 p.

The booklet presents the excerpt of recent speech and observation of Mr. J.R.D. Tata, the Grand Old Man of Indian Industry. The themes of the paper are on the critical issues of our times: population, sustainable development, poverty, environment, human survival, etc. The author's firm belief is that the sustainable development based on principles of equity can be ushered in only if there is a balance between resources and population.

Indonesia. Central Bureau of Statistics.

Indonesia: Demographic and Health Survey 1991 - summary report. Jakarta, 1992. 19 p.

This report summarizes the findings of the 1991 Indonesia Demographic and Health Survey (IDHS) conducted by the Indonesia Central Bureau of Statistics, the National Family Planning Coordinating Board, and the Ministry of Health. The IDHS was designed to provide information on levels and trends of fertility, infant and child mortality, family planning, and maternal and child health. The summarized data are intended to be handy for use by programme managers and policymakers to evaluate and improve family planning programmes and maternal and child health programmes.

Indonesia. Central Bureau of Statistics.

Indonesia: Demographic and Health Survey, 1991. Jakarta, 1992. 232 p.

The report conducted by Indonesia Central Bureau of Statistics, National Family Planning Coordinating Board and Ministry of Health.

This 1991 Indonesia Demographic and Health Survey report is the second and most recent nationally representative survey of ever-married women age 15-49. More than 27,000 households throughout the 27 provinces of Indonesia were visited during the

survey and 22,909 women were interviewed. The survey was designed to provide information on levels and trends of fertility, infant and child mortality, contraceptive use dynamics, and patterns of family planning service utilization. The 1991 IDHS also provides extensive statistical data on the knowledge and use of maternal and child health (MCH) services throughout the country. These information should prove to be highly useful to the programme managers and policy makers of Indonesia's Ministry of Health and the National Family Planning Coordinating Board in assessing the coverage and quality of current MCH interventions, and developing new programme initiatives to enhance the welfare of mothers and their children.

Mongolia: recent demographic trends and implications.
Asia-Pacific Population Journal 7(4): 3-24, December 1992.

This study examines the recent levels and past trends in the basic components of Mongolia's population growth and analyzes some of the most relevant consequences of the present and expected implications. No comprehensive study of Mongolia's population situation exists and an attempt is made in this article to fill this gap. For this purpose, the most recent population projection performed in Mongolia is used.

Demographic transition in postwar Japan: a time-series analysis, by Kazumasa Kobayashi, and others. Tokyo, 1993. 26 p. (NUPRI research paper series, no. 62)

This paper examines the pattern of both fertility and mortality change in postwar Japan and attempts to analyze macrolevel time-series data to identify the factors inducing such demographic transformations. The computed results show that while the decline of mortality is linked very closely to the rising level of real GNP per capita, the course of fertility is a considerably more complicated matter. A time-series econometric analysis based upon data pertaining to period parity progression affected by a different combination of socio-economic and demographic variables.

Population Reference Bureau.

The UN long-range population projections: what they tell us. Washington, D.C., International Programs, Population Reference Bureau. [24] p. (Occasional series on population and family planning topics)

This booklet focuses on the new UN long-range global and regional population projections up to the year 2150 to help put the world's possible future population sizes into perspective. The projections highlight the following points: the future of world population; the worldwide population growth; the replacement-level fertility rate; the world's population size; and the regional total fertility rates. These projections provide planners with a framework to anticipate the future consequences of current fertility and mortality patterns, as well as the effects of changes over the next 25 to 30 years.

India's population: heading towards a billion - an analysis of 1991 census provisional results. Delhi, B.R. Publishing Corp., 1991. 159 p.

This research study provides an indepth analysis of the 1991 Population census of India. The monograph discusses the nature of demographic transition, and the likely patterns of urbanization at the state and district levels during the 1981-1991. It also analyzes the status of the literacy and family planning programme and make suggestions for implementation during the 1990s. Appendix tables give the district-wise population, number of literates, growth rate, density sex ratio and literacy rates. Valuable information is also presented for cities and urban agglomerations of 100,000 and above.

Population of Fiji, ed. by Rajesh Chandra and Jenny Bryant.

Noumea Caledonia, 1990. 258 p. (Country monograph series.

Population monograph, no. 1)

Financial assistance from UNFPA.

The monograph began as an analysis of the 1976 Fiji population census. As the 1986 census results have become available in part ahead of the publication of the monograph, some chapters, specially Chapter 3 have taken new data into account. The monograph gives an overview of Fiji and examines the size, distribution and growth of population of Fiji in Chapter II and III. The economic structure of population is reviewed in Chapter IV. Mortality levels and trends; fertility trends and differentials are examined in Chapter V and VI. Chapter VII focuses on family planning. Population projections are reviewed in Chapter VIII. The internal population mobility, and population emigration are discussed in Chapter IX and XI. Chapter X examines the level, nature and patterns of urbanization in Fiji. The provision of housing is discussed in Chapter XII. Chapter XIII discusses legal demographic issues, such as legal aspects of marriage, family, sexually transmitted diseases, fertility, equality, political rights, and work practices. The issues of food production, imports, nutritional standards, and food-related problems are examined in Chapter XIV. The broad issue of population and development is discussed in Chapter XV, and conclusion is in Chapter XVI.

Projection methods for integrating population variables into development planning: volume 1. Methods for comprehensive planning. New York, 1993. 446 p.

Module Three: Techniques for preparing projections of household and other incomes, household consumption and savings and government consumption and investment.

This is the third and final module of the first volume of the manual on projection methods for integrating population concerns into development planning. This module describes techniques for preparing projections of household and other incomes, household consumption and savings and government consumption and investment in education, health and housing. These techniques can be used to make a series of interrelated projections of demographic and socio-economic variables for comprehensive planning that take into account key linkages between population and socio-economic change.

Population policies and programmes: Proceedings of the United Nations Expert Group Meeting on Population Policies and Programmes, Cairo, Egypt, 12-16 April 1992. New York, 1993. 267 p.

As part of the preparations for the 1994 International Conference on Population and Development, six expert group meetings corresponding to the six groups of issues that it had identified as those requiring the greatest attention during the forthcoming decade. One of those six expert group meetings was on population policies and programmes; it was convened at Cairo from 12 to 16 April 1992. The Meeting was organized by the Population Division in consultation with UNFPA. Contained in this volume are the report and recommendations of the Meeting and the papers submitted to the Meeting. These materials will not only make a valuable contribution to the 1994 Conference itself but will serve as useful tools for future research on population policies and programmes, as well as contribute to the work of the United Nations in that area.

Wilmoth, John R., and Patrick Ball.

The population debate in American popular magazines, 1946-90.
Population and Development Review 18(4): 631-668, December 1992.

The article seeks to demonstrate the shifts of emphasis of the effects of growing world population from 1946 to 1990. The major task of this article is to trace the historical shifts of emphasis between the five argumentative frames and between the arguments themselves. The five frames are: limits to growth; population pressure; quality of life; growth is good; and race suicide. An important element in the consolidation of popular opinion on these matters is from the coverage of the topics provided by popular magazines, newspapers and other media during this period. The analysis uses the variety of editorial perspectives contained in articles chosen at random from the Reader's guide to represent the relevant spectrum of views. The various headings which are mostly those beginning with the word "Population" are assembled into a list of 1683 distinct citations. From these citations a sample of 548 articles are drawn for detailed analysis and discussion.

Zha, Ruichuan, and Qiao Xiacchun.

A study of the age structure of China's population. China
Population Today 9(6): 9-14, December 1992.

The paper makes a direct comparison of the indicators measuring
the age structure of China's population including the mean age,
median age, proportions of population in various age groups, such
as 0-14, 15-64 and 65 and over to judge the types of the age

structures and the trend of changes. Four China population censuses in 1953, 1964, 1982 and 1990 have been used for the comparison study of the trend of changes of the age structure of population. The paper concludes that the age structure of China's population began its change in the 1950s from a typical expanding one to a stable one because of the socio-economic development, and the successful implementation of the family planning programmes.

Child care in urban Thailand: choice and constraint in a changing society, by Kerry Richter, and others. Bangkok, 1992. [122] p. (IPSR publication no. 163)

This study examines preferences in type of care for young children with particular attention to decision-making and satisfaction with child care. The paper also investigates the interrelationships between child care arrangements and differentials in type of care by mother's work status, occupation, and family structure. Besides investigating women who currently have children under the age of five, the study presents retrospective information from mothers of older children to determine how the situation has changed for Thai children over time. The research also examines how child care issues affect fertility; in terms of number of children and particularly in terms of child spacing. Finally, the study pays special attention to the issues of the role of the father and the extended family, determinants of entry into formal care, the situation of children living apart, and child care costs.

Correlates of commuting patterns: a case study of Bangkok, Thailand by Sureeporn Punpuing. Bangkok, 1992. 38 p. (IPSR publication no. 162)

The study analyzes the relationships between demographic, socio-economic, and social environment variables and commuting patterns. The paper begins with an examination of theoretical issues related to commuting patterns, followed by a description of commuting in Bangkok. The third section assesses the data source and definitions used in the study. The choice of workplace location is analyzed in the fourth section, while the following section focuses on identifying the correlates of commuting time and commuting distance. The paper concludes with an evaluation of how commuting is linked to demographic, socio-economic, and social environment factors in Bangkok.

Jacobson, Jodi L.

Gender bias, poverty, and the population trap. Populi 19(5):
12-13, November 1992.

The article points out that without dramatic changes in the theory and practice of "development", the programmes cannot, and will not reduce poverty or remedy the growing conflicts between human populations and the environment. From food production to control over income, indications are that the position of women within subsistence economies is growing increasingly insecure. In assigning rights and duties, the emphasis is often placed on the obligations of couples to have smaller families and too rarely on the duties of governments to ensure that their people have the resources required to meet basic needs - despite the fact that poverty among women is the major cause of rapid population growth.

The effect of mandatory retirement on earnings profiles in Japan, by Robert L. Clark and Naohiro Ogawa. Tokyo, 1992. 9 p.

Using data from the Japanese Basic Survey on Wage Structure for

1981 and 1986, the authors estimate the effect of the age of mandatory retirement on the rate of growth of earnings with job tenure in Japan. The results indicate that an increase in the age of mandatory retirement reduces the rate of growth of earnings. This finding suggests that the existence of long-term employment contracts is a more likely explanation of the steep earnings-experience profiles of Japanese workers than is the specific human capital model.

Employment tenure and earnings profiles in Japan and the United States: comment, by Robert L. Clark, and Naohiro Ogawa. Tokyo, 1992. 10 p. (NUPRI reprint series, no. 41)

This paper examines the relationship between job tenure and annual earnings in Japan and in U.S.A. Using data for 1980, the study shows that Japanese men have greater job tenure than comparable workers in the United States and that the earnings of Japanese men rise more rapidly with increased tenure. They found that an additional year of tenure increases earnings in both small and large firms in Japan more than does an additional year of general market experience. Their results for the United States indicate that general market experience increases earnings more than an additional year of job tenure.

Living arrangements of elderly Japanese and attitudes toward inheritance, by Norik O. Tsuya, and Linda G. Martin. Tokyo, 1992. 10 p. (NUPRI reprint series, no. 42)

Using data from the 1988 Mainichi Newspapers/Nihon University National Family Survey, the paper analyses the living arrangements and attitudes toward inheritance of Japanese aged 60 and over. Logit analysis indicates that living arrangements are influenced by gender, age, marital status, education, urban residence, and number of living children. Long-linear modeling of inheritance attitudes shows that living with married children, lower educational attainment, and living in a traditionally agricultural area are associated with favouring bequests to eldest sons, as opposed to bequests to all children equally or to whoever takes care of the elderly person. The results are

consistent with modernization theory of gerontology and convergence theory of family sociology in that elderly persons with more "modern" characteristics are more likely to depart from prewar ideals of living with married children and preferring bequests to eldest sons only.

Resource for the elderly in economic development, by Naohiro Ogawa. Tokyo, 1992. 19 p. (NUPRI reprint series, no. 40)

The main objective of this paper is to analyze how the process of economic development affect older people and their families. It is generally considered that although family-based support systems provide a principal source of old-age security at early stages of economic development, the responsibility for taking care of aged dependents is gradually shifted to the public support system as the developmental process proceeds. Each of these systems is examined in the context of economic development in this paper.

The changing family in Asia: Bangladesh, India, Japan, Philippines, Thailand. Bangkok, 1992. 393 p. (RUSHSAP series on monographs and occasional papers, 35)

In 1987, the 24th session of the UNESCO General Conference decided to initiate work on family in anticipation of the proclamation by United Nations of 1994 as the International Year of the Family. The country studies on Family discussed in this book are carried out in Bangladesh, India, Japan, Philippines, and Thailand. Each country status report covers the following: 1. Growth-points and trends in the family studies; 2. Portrayal of the changing family; 3. Implications of research findings for policy; 4. Suggestions for future work on family; and 5. Comprehensive bibliography covering the publications of the last 5 to 10 years.

United Nations Children's Fund.

The state of the world's children, 1993. Oxfordshire, England, Oxford University Press published for UNICEF, 1993. 90 p.

The first part of the report discusses the issues which profoundly affect the larger number of children in the world especially in the developing countries. These issues are: child health, nutrition, education, and protection for girls and children. The second part presents the economic and social statistics on the nations of the world, with particular reference to children's well-being.

United Nations. Department of Economic and Social Development.

Population and development planning: Proceedings of the United Nations International Symposium on Population and Development Planning, Riga, Latvian Soviet Socialist Republic, 4-8 December 1989. New York, 1993. 285 p.

The present report reviews the history of development planning, its requirements for information on population and some new approaches to integrating the two components. It then considers

the models that have been used to represent the population and development system and the methodologies that have been used to project components of that system. It examines the relationships between population, development and economic planning addressed both to labour supply and to income consumption considerations. It addresses the role of population variables in the planning of particular sectors, such as health care or education. Lastly, it draws conclusions about the need for training researchers and planners in the methods for integrating population variables into development planning.

WOMEN

00202

Changing the status quo. WAY Forum: 30-34, October 1992.

Discrimination against women and failure to recognize the value of their contributions to society have been common, both in developing and industrialized countries. This article traces and describes how the United Nations has initiated change in this situation. By adopting international instruments which specifically aim to improve the status of women, the UN has established standards for measuring how far societies have progressed in ensuring equality between women and men. By focusing the attention of governments, academia, non-governmental organizations (NGOs) and individuals on the reality of women's lives, the UN has helped force a recognition of women's contributions. This recognition empowers women and allows them to take their place as equals with men.

Economic and Social Commission for Asia and the Pacific.

Guidelines for integrating women's concerns into development planning in Asia and the Pacific. Bangkok, 1991. 32 p.

In view of the need to bring to the notice of development policy makers and planners to take into account the integration of women's concerns into development planning in Asia and the Pacific, a meeting was convened at ESCAP headquarters from 28 to 30 November 1990 to consider a set of guidelines for integrating women's concerns into development planning. This booklet presents the strategies, guidelines of policy and planning framework to bridge the gap between the recognized role of women in development and the neglect of the acknowledged fact in the practice of development planning.

Status of elderly women in the Asian and Pacific region.
Bangkok, 1991. 65 p.

The present study has been prepared to provide a perspective on major social and economic issues related to elderly women in the Asia and Pacific region. The study provides a brief overview of the aging situation at regional, subregional and national levels,

followed by a presentation of the magnitude and distribution of elderly women in the Asian and Pacific region. It examines factors underlying the vulnerability of this subgroup of the elderly population, and analyses the economic and social implications of the growing number of elderly women. With a view to encouraging the development of policy and programme responses to address these emerging issues in the region, the major areas of immediate concern have been delineated, with a complementary set of recommendations for action by intergovernmental, governmental and non-governmental organizations.

Huang, Xiyi.

From housewife to career woman: rural china's other long march:
CERES: the FAO Review(139): 44-47, Jan-Feb. 1993.

The article gives an account of the achievement of China's rural women over the past four decades. Once confined largely to the home, Chinese women and girls now work in both fields and factories. Rural women's employment has expanded gradually from agricultural production to non-agricultural sections and from rural business to urban business. However, the paper points out that women still lack equal access and equal opportunities to acquire land or start a business. These problems should be an important objective of China's future social development.

Papua New Guinea. Department of Home Affairs and Youth. Women's Division.

Changes, challenges and choices: women and development in Papua New Guinea - issues and information. Boroko, Papua New Guinea, 1991. 256 p.

Project is funded by ILO/UNFPA. Produced by Elizabeth Cox with assistance of Molly Daure.

This training package is meant for women's organizers, educators and trainers all over Papua New Guinea. It provides the details information on women's health, family life and participation in development. The book covers the social, economic and political changes which have a heavy impact on

women. It sets out the proposals, ideas and choices women have, and suggests the actions that the women might begin to take to have more control over changes and more chances to benefit from them.

Sherpa, Lamu.

Mothers of the land: Nepalese women today. London, 1993. 32 p.

This report looks at the historical, social, economic, political and legislation background and factors which have created women in Nepal into inferior citizens. The booklet describes the women's role and status in society and how they play the major role in agriculture, animal husbandry and industry as a labour force. Extra government support in legislation is needed to create gender equality in society and to eradicate social injustice, no education, unequal treatment in family and the community.

World Health Organization.

Women's health: across age and frontier. Geneva, 1992. 107 p.

Health is the most fundamental of all human rights and yet many women throughout the world are being denied this right. This

book illustrates selected issues concerning morbidity and mortality in women. It presents women's health as a continuum covering the entire lifespan from before birth to old age. It shows the effects on female morbidity and mortality of discrimination during childhood, alcohol and drug use in adolescence, the health risks and problems inherent in women's work and time use, pregnancy and childbirth, the complexity of the problems associated with major diseases and infections, violence against women, mental disorders and the emerging health problems of elderly women.

Food for thought: hunger banquet (Flat materials kit).
Oklahoma City, Oklahoma, World Neighbours, 1992?
1 packet of materials: leader's guide, photocopy masters for menu, centerpieces, tickets, instructions for table hosts and reporters.

A Hunger Banquet is a special meal at which participants are assigned by lottery to various tables representing selected continents of the world. Although participants all pay the same entrance fee, there is great disparity in food quality and quantity. The injustice of this situation gives rise to emotions, conversations and actions, which are summarized in a final discussion in which all participants take part. The kit can be used as a teaching tool to raise awareness of issues of hunger, poverty, justice and development needs. Time involved is about 2-3 hours.

My way (video tape). Tokyo, Japanese Organization for International Cooperation in Family Planning, 1993. 1 reel, 13 min., colour No narration VHS/PAL system.

This is the first film in JOICFP's Women's Health and Status series produced specifically for the Southeast Asian region. It is an animated film jointly produced by Japan and Thailand. It is designed as an educational material to be used to stimulate discussion among young people and adolescent health instructors on sexual attitudes and behaviour. It presents how teenage girls react when they face the chance of having a sexual relationship. It portrays female characters making their own decisions about sexual behaviour to show young women that they have choices in sexual situations.

Twin lotus (video tape). Tokyo, Japanese Organization for International Cooperation in Family Planning, 1993. 1 reel, 13 min., colour. No narration VHS/PAL system.

This is the second film in JOICFP's animated Women's Health and Status series, targeted for East Asian region. It is aimed at motivating women to take initiative to protect their own health and play an active role in family planning decisions. It is a story of a newly-wed couple who live together in a beautiful riverside district in Southern China. The wife is confronted with the threat of serious illness and seeks advice from a clinic on how to overcome her illness and avoid future problems. The film also introduces the issue of family planning to delay the birth of their first child and use of modern contraceptive method.

INTRODUCTION

This issue of the bi-annual Population Education Accessions List is an output from our computerized bibliographic data base using the Micro CDS/ISIS system. From hereon, the succeeding issues will be generated from this computerized bibliographic data base.

The list categorizes the entries into four parts:

- Part I - Population Education consists of titles dealing with various aspects of population education arranged by country in the first section and general materials in the second section.
- Part II - Knowledge Base Information consists of titles that deal with the different multidisciplinary aspects of population education. These entries are grouped into sections of the following major multidisciplinary topics:
1. Documentation
 2. Education (including environmental, functional literacy, family planning, and sexuality)
 3. Environment
 4. Fertility and family planning
 5. Health and nutrition
 6. Information and communication
 7. Migration, urbanization, and human settlement
 8. Population policy and trends
 9. Socio-economic factors and conditions
 10. Women
- Part III - Audio-visual Materials consist of titles of various kinds of audio-visual aids (films, slides, charts, kits, videotapes, etc.) dealing with both knowledge base and population education aspects.
- Part IV - Appendices consist of List of Publishers and Sources, Subject Index, Author Index, and Geographical Index.

Each entry or title is given a running number and bibliographical references that include: (i) either the author or corporate author; (ii) title; (iii) imprint; (iv) collation; (v) abstract; (vi) subject key words; (vii) country key words; and (viii) classification number. In addition to these, a source code is also given. The source code is an abbreviation of the name of the organization where a particular title can be acquired. For the complete names and addresses of the source codes, kindly consult the List of Publishers and Sources in the Appendices.

College of Adult Education, Harbin.

[Adolescence education]: [physical aspect - module one].

Harbin, Heilongjiang Province, College of Adult Education, 1992
70 p. In Chinese.

Translated from UNESCO/PROAP. Adolescence education: physical
aspect - Module One, for P20 Education Programme.

This is the Chinese translated version of UNESCO Population
Education Programme Service's Adolescence education: physical
aspect - Module One. The module deals with the male and female
reproductive systems: the physical, emotional and psychological
changes that occur during puberty and the psychological process
of human conception. It is meant to serve as a practical
resource guide, primarily for teacher and secondarily for
trainers, guidance counsellors and youth workers, who are engaged
in teaching, training and communicating family life education
concepts to adolescents.

Khan, Ansar Ali.

Report of Mid-Term Review of Project CPR/90/P20 - Population Education in Peasant Schools. Bangkok, UNFPA Country Support Team for East and South-East Asia, 1993. 34 p. (mimeograph).

This is the report of the mid-term evaluation mission of the five year project CPR/90/P20 - Population Education in Peasant Schools. The project was designed and implemented as a part of the China Adult Education Department of State Education Commission so that population education be interwoven with adult education programme throughout the country. The mission visited and reviewed the programme in three out of eight provinces, Henan, Hubei and Sichuan, which were planned to have launched the programme during the first phase ending at the middle of the project period. The evaluation report provides consolidated quantitative data about project accomplishments upto December 1992, plus draft questionnaires to test knowledge and measure attitude of educational administrators, trainers, teachers and students.

Programme on Training of Trainers of SRC's on TLC: report. New Delhi, 1993. [76] p.

This is the report of the three Regional Training Programmes on training of trainers of State Resource Centres on Total Literacy Campaign (TLC). The training programmes were based upon observation of programmes conducted in the field situation, problems associated therewith, case studies available on this subject and other available information and literature on training. The report of the programme focuses on the TLC methodology, training methodologies, evaluation of training, monitoring and evaluation of TLCs and planning for post-literacy and continuing education.

India. State Institute of Education, Bhopal.
Instructor's guidebook: population education, health education and value education. Bhopal, Madhya Pradesh, Non-Formal Population Education and Health Education Cell, State Institute of Education/Madhya Pradesh State Council of Educational Research and Training, 1993. 90 p. (Non-formal education, publication no. 33)
The whole Translation Set is listed under the call No. GENP374.3 U56p.

The guidebook is developed to help the instructor understand the problems created by the rapid growth of population. It also helps to develop a positive outlook on population education, health education and value education, and to make education value-based. The format used in this publication can help the instructor easily learn the subject matter and achieve the desired competence to put it across. The activities suggested in the guidebook will help the children attending the non-formal education programme develop necessary insights and desirable habits and attitudes.

India. State Resource Centre for Adult Education, Calcutta.
Population education and evolution of human society, by Satyen Maitra. Calcutta, Bengal Social Service League/State Resource Centre for Adult Education, 1993. 49 p.
The whole Translation Set is listed under the call no. GEN 374.3 U56p.

This book attempts to acquaint the neo-literates about the importance of population dynamics in the evolutionary stages of human society. It emphasizes how human beings have progressed through domination of nature and environment. Humankind has not only used the nature and environment for achieving progress but this has also in the process abused it and stripped it practically of all valuable and natural resources. This has endangered the life on the planet. To overcome this danger, we need to think and plan rationally, and hope that population education will help us do it.

Training Workshop on Population/Puberty Education for Chinese Educators, Diliman, Quezon City, 12-31 July 1993.
[Report of the Workshop] Organized by College of Education, UP. Diliman, Quezon City, College of Education, University of the Philippines, 1993. [239] p.
In collaboration with the UNESCO/PROAP.

In view of the vital role of adolescents in molding the future of countries, the Unesco Principal Regional Office for Asia and the Pacific (PROAP) commissioned the University of the Philippines, College of Education to organize an intensive Training-Workshop on Population and Puberty Education for Educators from China. This endeavour was initiated in order to enhance teaching competencies as well as to develop skills in designing prototype curriculum and training materials in puberty and population education. The Training Workshop was participated in by 19 delegates from the different provinces of China from 12-31 July 1993 at the University of the Philippines in Quezon City. The Workshop report consists of 5 parts: Part I. Introduction; Part II. Curriculum guide in population and puberty education in China; Part III. Content/strategies of population/puberty education; Part IV. Sample lesson plans; and Part V. Workshop output and Annex.

UNESCO. Population and Preventive Education Section.

Population education. Bulletin of the International Bureau of Education(265): 84 p., October-Dec. 1992. In English and French.

This bibliography attempts to summarize the foundations of population education and to interpret its main lines and trends during the last two decades in the framework of the new educations. The references are divided into four parts: 1. General references; 2. Scientific justifications and basic knowledge about population education; 3. Population and family life education programmes; and 4. Associated educational programmes. The documents identified were published during the last ten years consisting of books, reports and studies, special editions of periodicals, and educational documents at the regional or international levels - teachers' guides, textbooks, educational kits and reference works, etc. The bibliography is intended for decision-makers and educational planners, and for those responsible at the national level for curricula and staff employed on population education projects.

United Nations Population Fund.

Reconceptualization of population education, by O.J. Sikes. New York, 1993. 46 p. (Technical paper, no. 2)

This technical paper aims to raise practical issues that will help those associated with population education activities to strengthen present and future programmes. The paper emphasizes important new issues that need explanation, along with issues for which there is a need for new direction or emphasis, based upon school programme experience. The issues discussed are as follows: Purpose and rationale of population education; the value of population education; conceptualization of population education; and the need for conceptualization: issues and trends

in population education - need for clear objectives, concerns, about content, prioritization of contents, involvement of parents, approaches to teaching, teacher training, planning, printing and distribution of materials, research needs, evaluation issues, institutionalization, role of non-governmental organizations and involvement of private schools.

Advisory Committee for the Co-ordination of Information Systems (ACCIS).

Directory of applications software of the United Nations system
New York, United Nations, 1990. 80 p.

The Directory of applications software of the United Nations system covers 81 applications software packages produced by organizations of the United Nations system. It was compiled by the Advisory Committee for the Co-ordination of Information Systems (ACCIS) on the basis of information gathered from a questionnaire sent to all United Nations system organizations. Fifteen organizations contributed information on their applications software packages for publication in this directory. Data are current as of May 1990. The directory contains three sections: a main section containing entries describing the software; an index by name and acronym; and an index by organization. Entries in the directory are divided into sections by broad subject category, and arranged in alphabetical order by title. Subject categories were taken from the ACC Programme Classification with modifications, including their rearrangement alphabetically.

Environmental studies: a bibliography of publications accessible through AIT library, by Myat Htay Kyi, and others.
Bangkok, 1993. 417 p. (HSD reference material, 25)

This bibliography lists as comprehensively as possible publications on environmental issues to serve as a tool for further search for related materials. Many of the works listed cover the subjects of planning, management, preservation and utilization of resources including environmental legislation and policies. Also listed are works on conservation and related problems affecting various ecosystems, namely, forest fires, mining, or problems arising out of population growth. The bibliography is supplemented by four indexes.

Guide to maintenance of the macrothesaurus for information processing with the field of economic and social development.
Paris, Organization for Economic Co-operation and Development,
1993. 73 p.

The aim of this guide is to ensure that input to the ongoing maintenance of the Macrothesaurus in the field of Economic and Social Development will be of the highest possible quality, based on an understanding of its philosophy and of the approach to and mechanism for its maintenance. To give users a full understanding of how their proposals for additions and changes will be processed, the guide first describes the organizational structure established for its on-going maintenance. It then explains the structure of the Macrothesaurus, before going on to explain in detail the criteria, rules and procedure for proposing additions and changes to the Macrothesaurus. The guide then describes how local descriptors can be used where necessary to supplement the Macrothesaurus descriptors. Lastly, it explains how to manage updates to the Macrothesaurus.

Inventory of population projects in developing countries around the world, 1991/92: multilateral organization assistance, regional organization assistance, bilateral agency assistance, and non-governmental organization New York, 1992. 813 p.

This 19th edition of the inventory of population projects in developing countries around the world is an annual compilation of externally-assisted projects and programmes funded, initiated or implemented by international organizations. Information is organized by geographical categories and the type of organization involved. Geographic categories consist of country, regional, interregional, and global projects. For easier reference, projects are subdivided within each geographical category according to the source of assistance, grouped into multilateral, bilateral, regional, and non-governmental and other assistance. Within each of these sections, organizations and agencies are listed by name in alphabetical order. Assistance included in the inventory covers grants, loans, technical and operational support, training and provision of equipment and supplies. The time frame for this edition is for projects carried out between 1 January 1991 through 30 June 1992.

Terminology Bulletin No. 311/Rev. 1: acronyms and abbreviations covering the United Nations system and other international organizations. New York, 1981. 406 p.

This bulletin consists of about 825 titles and their acronyms and abbreviations, chiefly names of various organizations of the United Nations System, other international organizations and subsidiary bodies. The entries are in six languages, which, for technical reasons, are arranged in the following order: English, French, Russian, Spanish, Chinese and Arabic. The bulletin is arranged in three parts. Part I gives a list of acronyms and abbreviations in English alphabetical order, together with a reference number and the full titles used in the above-mentioned languages. Part II contains separate indexes of full titles in English, French, Russian, Spanish, Chinese and Arabic. Part III contains indexes of the acronyms and abbreviations used in English, French and Spanish in one list and separate lists for Russian, Chinese and Arabic.

1992 Planning Meeting on Asian/Pacific Joint Production Programme of Materials for Neo-literates in Rural Areas, Tokyo, 19-21 May 1992.

Report. Tokyo, Asian Cultural Centre for UNESCO, 1992. 96 p.

The purpose of the Meeting is to discuss literacy programmes of ACCU to be carried out under regional co-operation such as adoption of new AJP prototype materials for neo-literates in rural areas in Asia and the Pacific and planning of workshops for training of personnel in this field, thereby contributing to the APPEAL carried out by UNESCO/PROAP. The meeting was held in Tokyo from 19 to 21 May 1992. A total of five participants from China, India, Indonesia and Mongolia and a representative from UNESCO/PROAP attended the meeting. Full texts of UNESCO report, ACCU report, country reports and draft new 1992 AJP materials are provided in the Meeting report.

Learning from evaluation: the GAFNA Nutrition Education Project Mothers & Children 12(2): 5-6, 1993.

An evaluation of a community nutrition education project was recently conducted in the Gambia by the Gambian Food and Nutrition Association (GAFNA). The active involvement of project staff in the evaluation process resulted in the development of detailed and practical lessons useful for future project activities. Fifteen steps were defined that served as a basis for organizing the evaluation process. Many of the steps in the methodology are common to conventional approaches to programme evaluation. The significant difference lies in the involvement of programme implementors at all steps in the process including their participation in the development of specific lessons learned for each evaluation question. In the last phase of the evaluation process, an action plan was developed based on the lessons learned and was then discussed with programme collaborators.

Environmental education experiences and attitudes: main report and supplementary volume - tables of results. Reading, England, Council for Environmental Education, 1987. 2 vols.

This report contains the findings of a survey of teachers, youth leaders, school pupils and students in England, Wales and Northern Ireland on their environmental education experiences, their evaluation of the experiences and the attitudes to some of the major issues and problems facing mankind in relation to the environment. The report is divided into four parts as follows: (a) Introduction and discussion of some important previous literature concerned with the nature and development of environmental education and consideration of some investigations in relevant areas of environmental education to this study. (b) A survey of the environmental education experiences and attitudes to environmental issues within different samples of people. (c) Consideration of a number of specific case studies of what may be identified as good practice in environmental education both in the formal and non-formal sectors of education. (d) Final discussion presentation of the findings and recommendations, and the tables of results in Supplementary Volume.

Changing assessments: alternative views of aptitude, achievement and instruction. Boston, Kluwer Academic Publishers, 1992. 337 p. (Evaluation in education and human services)

This book reviews new or alternative approaches to testing and assessment based on recent advances in the field of cognitive science. The contributors lay the theoretical groundwork for new measurement tools and methods such as dynamic assessment, performance-based assessment, and portfolio assessment. Finally, the book provides a conceptual framework for innovative systems - including computer-based educational strategies - that deeply integrate assessment and instruction.

Educating for sustainability in developing countries: the need for environmental education support. The International Journal of Environmental Education & Information 12(1): 1-14, Jan-March 1993.

There is need to integrate environmental concerns into all aspects of development programmes, to promote environmental education community projects and to educate decision-makers to ensure that environmental degradation does not result from the economic activities they are promoting. This paper reviews environmental education, sustainable development and environmental strategies that aid donors need to integrate into their programmes for developing countries.

The Earth Summit's Agenda for Change: a plain language version of Agenda 21 and the other Rio Agreements. Geneva, Centre for Our Common Future, 1993. 35 p.

At the Earth Summit in Rio de Janeiro during June 1992, 179 heads of government pledged to work together for our common future. The action plan, called Agenda 21 was adopted as a global plan of action to confront the world's pressing needs. This historic document is 700 pages long and covers all areas of sustainable development. In order to play the meaningful role in governance, people need the information necessary to prepare them for responsible participation. This book will help provide some of that information by making Agenda 21 and the other Rio Agreements accessible to people in an easy and understandable format. Statistical tables and charts are provided all through the text.

Fertility decline and children's education in Thailand: some macro and micro effects. New York, Research Division, Population Council, 1992. 33 p. (Population Council. Research Division. Working papers, no. 40)

The present study examines evidence from Thailand relating to the macro and micro effects of fertility decline and family size on children's education. On the macro level, lower fertility levels translate into slower growth of the school-age population, thus presumably enabling governments to achieve their educational goals at lower cost. At the micro level lower fertility is expected to lead to increased ability of families to provide higher levels of education for their children.

National Guidelines Task Force.

Guidelines for comprehensive sexuality education: kindergarten - 12th grade. New York, Sex Information and Education Council of the U.S., 1993. 52 p.

The guidelines provide the basis for a comprehensive kindergarten through 12th grade sexuality education programme. They address all aspects of sexual health, including growth and development, relationships, interpersonal skills, sexual behaviours, and health promotion. These guidelines are not a national curriculum. They are a conceptual framework that can assist local school decision makers in planning new curriculum and assessing existing programmes. The most important use of the guidelines will be for community discussion and the determination of how sexuality education could be addressed in local schools.

Private Agencies Collaborating Together.

*Participatory evaluation: a users guide, designed by Jacob
Pfohl.* New York, 1986. 81 p.

Produced for United States Agency for International
Development/Sri Lanka.

This manual offers a process for designing evaluation appropriate to local needs and realities, as well as the interest of all concerned parties. The guide is divided into two sections. Section One presents the basic concepts of evaluation, a step-by-step approach and sample indicators and tools for participatory evaluation. It is organized into easy reference parts so that it is simple to reach the material need. Section Two helps a project manager or trainer make use of the content material in the first section as a training resource. It provides a training design for involving project staff in evaluation, along with some sample exercises.

Responsible for Economic Planning in Asia and the Pacific,
Sixth, Kuala Lumpur, 21-24 June 1993.

Final report. Paris, United Nations Educational, Scientific and
Cultural Organization, 1993. 30 p.

Organized by UNESCO with the co-operation of ESCAP.

This is the final report of the Sixth Regional Conference of Ministers of Education and Those Responsible for Economic Planning in Asia and the Pacific, held in Kuala Lumpur, Malaysia from 21 to 24 June 1993. The purposes of the Conference included forming an overview of sectoral achievements, obstacles and challenges in the region; reinvigorating regional and national commitments to the goals of Jomtien and to meeting changing demands on education; and exploring potential avenues of regional and international co-operation. The government of 33 Member States of UNESCO in Asia and the Pacific were invited to participate in the Conference. The report includes five sections: I. General report; II. Report of Commission I; III. Report of Commission II. IV. Recommendations; and V. The 1993 Kuala Lumpur Declaration on Education.

Sadik, Nafis.

Education of girls. Integration: International Review of Population, Family Planning and Maternal and Child Health(36): 20-21, June 1993.

The speech delivered by Dr. Sadik on 17 December 1992 at the Fukuoka International Women's Forum 1992, Fukuoka, Japan.

The article discusses the issues of population and development as they regard women. The paper examines many issues concerning women, namely: reproductive rights and health, demand for family planning, education, value and status of women. It points out that specially designed information, education programmes, legal measures and operational programmes are needed to promote equality between women and men and also culturally sensitive counselling and appropriate contraceptive services. The International Conference on Population and Development in 1994 will be part of the wider vision on women's interests and beyond it will be the Women's Conference and the proposed Social Development Summit in 1995.

Education for development: responding to new challenges.

Bangkok, UNESCO Principal Regional Office for Asia and the Pacific, 1993. 53 p.

This working document has been prepared by UNESCO Secretariat to provide information and ideas in order to facilitate the Sixth Conference of Ministers of Education and Those Responsible for Economic Planning in Asia and the Pacific in its deliberations and the formulation of its recommendations. Chapter I draws attention to the changing context for education and reports on recent educational developments and achievements. Chapter II overviews progress with regard to achievement of the Jomtien goals of Education for All and identifies persisting problems and issues and fundamental policy issues requiring discussion and action. Chapter III draws attention to major concerns facing the countries of the region and indicates how education systems and sub-systems are responding to various new pressures and demands. The final chapter draws attention to the substantial progress made in international and regional co-operation.

Sub-Regional Workshop on the Development of Basic Literacy Reading Materials for Adults in Asia and the Pacific, First, Calcutta, India, 14-25 July 1992.
Final report. Tokyo, Asian Cultural Centre for UNESCO, 1993. 111 p.
Jointly organized by ACCU Tokyo, Bengal Social Service League, India, Department of Education, Ministry of Human Resource Development, India, UNESCO/PROAP in co-operation with Indian National Commission for Co-operation with UNESCO and Japanese National Commission for UNESCO.

This is the report of the Workshop on the Development of Basic Literacy Reading Materials for Adults in Asia and the Pacific, held in Calcutta, India on 14-25 July 1992. The Workshop was attended by 21 participants and observers from seven countries: Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan and Papua New Guinea. The main objective of the workshop was to develop effective basic literacy reading materials (Primer) containing basic learning needs for illiterate adults in Asia and the Pacific. The report presents the group work report on development of guidelines for illustration and writing curriculum and teacher's guide of basic literacy training materials. The resource person's papers, ACCU report, UNESCO report and reports of other activities are provided in the workshop report.

Tessmer, Martin.

Planning and conducting formative evaluations: improving the quality of education and training. London, Kogan Page, 1993.
159 p.

Formative evaluation is the systematic tryout of instruction for purposes of revising it. The author explains the origin, characteristics, values, and limitations of formative evaluation and then details its stages in clear and practical terms, covering expert review, one-to-one small group evaluation, and field test. Special emphasis is given to planning - indeed, a full chapter is devoted to this important aspect. Issues covered in detail include: managing interpersonal aspects; asking the right questions; relating evaluation to all media - from workshops to hypertext; making revisions.

A prototype environmental education curriculum for the middle school: a discussion guide for UNESCO Training Seminars on Environmental Education, by Harold R. Hungerford and others. Paris, 1989. 159 p. (UNESCO-UNEP International Environmental Education Programme. Environmental education series, 29)

This document presents a prototype environmental education curriculum and important associated materials for the middle school. The book is divided into 4 chapters: Chapter I focuses on goals for curriculum development in the field and their validity; Chapter II focuses on environmental education and the middle school learner using the goals presented in Chapter I to lay out options for dealing successfully with the heart of environmental education; Chapter III presents the prototype curriculum itself - in outline form. Basically, the three year curriculum is divided into three components: (1) ecological foundations; (2) environmental science and environmental health; and (3) issue investigation and citizenship action training; and Chapter IV discusses the infusion of environmental content and skills into existing courses at the middle school level.

Caring for the Earth: a learner's guide to sustainable living. New York, Regional Office for North America, United Nations Environment Programme, 1992. 32 p.
Earth Care Day Guide for the Environmental Sabbath from the United Nations Environment Programme.

This guide is intended to help users teach themselves and others how to think and work toward life-styles that will sustain life on Earth. It is designed for use by both teachers and individual learners of junior high school age and older. The Principles of a Sustainable Society (see Annex 1) are the conceptual framework on which the Earth Care Activities are built. Each Earth Care Activity provides background information and duplicable worksheets designed to reinforce basic and problem-solving skills while teaching about sustainable living. It may be used successfully as independent entities.

Council for Environmental Education.

Environmental youth work: a case for the curriculum - CEE briefing. Reading, England, 1991. 4 p.

This briefing paper demonstrates how Environmental Youth Work can fulfil the responsibilities towards young people themselves; and the present and future well-being of the environment, of which they are part. The paper offers a definition of Environmental Youth Work, and a model for its implementation. It gives clear guidelines on what the outcomes of Environmental Youth Work should be and it demonstrates how taking an environmental approach in our work with young people offers many inroads and insight into the youth service curriculum.

Making connections: linking population and the environment - elementary teacher's guide. Washington, D.C., Population Reference Bureau, Inc., 1992. 148 p. (looseleaves).

The book provides elementary teachers with materials and strategies to teach about population and environmental issues. On one level, the materials provide content in basic population dynamics and specific environmental concerns such as water use, deforestation, desertification, and urban problems. The second goal is to help students begin to understand the complexity of these issues, the relationship between population growth and environmental degradation, and the interdependence of the world's nations and people. This teaching guide consists of 28 lessons reproducible student handouts, resource materials, and data tables. It provides teachers with lessons that provide the background in population growth and geographic analysis that is necessary for understanding global issues. In the remaining lessons, students examine specific environmental concerns, focusing on specific world regions.

Environment and agriculture: environmental problems affecting agriculture in the Asia and Pacific Region, World Food Day Symposium, Bangkok, 11 October 1989. Bangkok, 1989. 102 p.

This is the collection of papers presented at the World Food Day Symposium on October 16, 1989. The papers clearly show that deforestation is occurring at an alarming rate; soils are rapidly degrading due to water and wind erosion; irrigation induced soil salinity and sodicity are on the increase; pesticide use is having adverse effects on non-target species, man and the ecosystem; while many species which form the Region's pool of genetic resources are being destroyed or disappear before their potential use by man can be realized. Causes and effects are assessed for each of those areas of concern action being taken is described, and new strategies required to achieve sustainable development which must be environmentally non-degrading, technically appropriate, economically viable and socially acceptable are discussed.

Qualitative research for family planning programs in Africa compiled and ed. by Adrienne Kols. Baltimore, Maryland, Centre for Communication Programs, Johns Hopkins School of Public Health, 1993. 62 p. (Occasional paper series, no. 2)

This report summarizes results from focus group discussion in African countries: Burkina Faso, Cameroon, Cote d'Ivoire, the Gambia, Ghana, Kenya, and Nigeria. 75 individuals were interviewed in each country. The examples illustrate the flexibility of qualitative research for exploring general attitudes and focusing on specific problems in family planning programmes. These case studies provide: An overview of focus group and in-depth interview techniques and methodology; Examples of the diverse uses of qualitative audience research including its use in program design; Steps involved in conducting qualitative research; and Lessons learned from this type of research - especially those specific to the African context. These examples may encourage wider use of qualitative research techniques. Focus group discussions and in-depth interviews offer a direct link with the audience to keep information, education, and communication (IEC) programmes on track.

The fertility decline in China: the continuation of changes in marital status and marital fertility. Asia-Pacific Population Journal 8(2): 55-72, June 1993.

This article examines the possible impacts of changes in nuptiality and marital fertility patterns on fertility in China. It quantifies the components of the decline in annual fertility from 1953 to 1981 in order to facilitate future research on the underlying and intermediate variables which are likely to affect fertility. It concludes that prospects for retaining a low level of fertility are unclear; policy makers must take into account the direct and indirect effects of socio-economic development on fertility.

Determinants of fertility and the unmet need for family planning in Indonesia. Asia-Pacific Population & Policy, No. 24, March 1993. 4 p.

The bulletin is based on the report "Indonesian fertility, the proximate determinants, and unmet need for family planning".

The article concludes that there is not single solution to bringing down fertility rates throughout the developing world. The researchers acknowledge that although contraceptive use is not the sole cause of fertility decline, it is clearly a major force in driving down fertility rates. Understanding the various determinants of fertility helps to characterize the types of unmet need for family planning that persists in countries like Indonesia. Targetting the areas of highest unmet need helps policymakers direct services and motivational efforts to couples who want to delay or stop having children but have no reliable means of doing so.

Developing plans and proposals for new initiatives. The Family Planning Manager. Volume 11, No. 4, July/Aug./Sept. 1993. 20 p.

This issue of The Family Planning Manager provides a framework for developing a plan for a new programme initiative. It then suggests how to turn this plan into a proposal for funding. In addition to providing basic guidelines on writing each section of a plan, this issue gives advice on how to create proposals that will improve an organization's chances of securing funding for their new programme activities.

Developing more effective family planning, family health and family welfare programmes: opportunities for government-NGO collaboration. Bangkok, Economic and Social Commission for Asia and the Pacific, 1992. 10 p.

Paper presented as a background paper for the Meeting of Senior Officials, 19-24 August 1992, of the Fourth Asian and Pacific Population Conference in Bali.

This paper begins by briefly assessing the consequences of the dominant role played by governments in the provision of health and welfare services. Then it outlines the roles of the non-governmental organizations (NGOs) in the evolution of family planning, health and welfare service delivery in the region. The paper considers whether NGOs are likely to assume new roles in the 1990s and beyond. It concludes by proposing two strategies that could enhance collaboration between NGOs and governments to provide a richer and more cost-effective range of services that would reach more people and provide better quality services.

Regional report on interaction between clients and grassroots family planning workers: implications for programme performance Bangkok, 1993. 77 p. (Asian population studies series, no. 117)

Achievement of family planning programme objectives is a reflection of ability of workers to inform, educate and motivate couples in the reproductive age groups to accept the small family norm and to use family planning methods. This study provides the service providers, programme managers and policy makers with information on interaction processes that will enable them to understand the strengths and weaknesses of the programme and help to improve the design of programmes, and their implementation. The study presents the report of the studies conducted in Bangladesh, India, Indonesia, Pakistan, Philippines, Republic of Korea and Thailand. The first part of the country report deals with general aspects; the second part, with clients' perspectives on interactions; the third part, with workers' perspectives on

interactions; and the fourth part, with country-specific recommendations.

Improving family planning evaluation: a step-by-step guide for managers and evaluators. West Hartford, Connecticut, Kumarian Press, 1992. 187 p. (Kumarian Press Library of Management for Development selected titles)

The twelve chapters contained in this manual are designed to provide a summary of the basic principles of project evaluation as they apply to today's issues. The manual is divided into two sections: Part I focuses on the concepts and practices that define evaluation, and Part II addresses the evaluation process. After an introduction of terminology and a discussion of the importance of evaluation, the manual focuses on how evaluation measures project strengths and weaknesses, including when and how to perform evaluations, and who should be conducting them. Part II focuses on the steps involved in planning and conducting evaluations. This includes chapters on where and how to collect data and how to analyze the results. Also included are chapters covering designing questionnaires and focus groups, presenting evaluation results, and preparing evaluation budgets. The final chapter, a case study, summarizes all of the information covered in the preceding chapters.

China's fertility drop lowers world growth rate. Population Today 21(6): 1-2, June 1993.

The article reports how China's population control programme has an effect on China and world population growth rate. In 1992, China's crude birth rate was 18.2 births per 1,000 population, down from 19.7 in 1991 and 21.1 in 1990. The 1993 edition of PRB's World Population data sheet shows a world population growth rate of 1.63 per cent, down from 1.68 on last year's edition. This marks the lowest world growth rate recorded since PRB's first edition of the annual wall chart in 1962.

*Quality of care in family planning: standards, yes. standard,
no..* Populi: the UNFPA Magazine 20(4): 12-13, April 1993.

Ensuring that clients get the highest-quality care possible is a challenge all family planning programmes face. The article argues that standards for quality of care should be set and maintained, but universal standards may prove counterproductive, especially if local family planning programme staff see them as imposed or driven by outside forces. Besides, they'd be virtually impossible to set and enforce. The quality of care problem may be international, but its solution must be local.

*Using self-assessment to improve the quality of family planning
clinic services.* Studies in Family Planning 24(4): 252-260,
July/Aug 1993.

A follow-up study was conducted to evaluate the effect of a self-assessment technique called COPE (client-oriented, provider-efficient) on the quality of family planning clinic operations in Africa. In 1991 the Association for Voluntary Surgical Contraception revisited 11 clinics where it had

introduced COPE from five to 15 months earlier. Changes that had occurred as a result of the COPE intervention were assessed by (1) determining how many of the clinic problems identified by staff at the COPE introduction had been solved; (2) comparing the results of a second client-flow analysis with the initial analysis; and (3) interviewing service providers to obtain their opinions of the effects of COPE. Of the problems identified by staff nearly three-fourths of those that could be solved internally were solved. The study revealed improvements in the quality of care provided as well as increased staff involvement in solving clinic problems.

Ringheim, Karin.

Factors that determine prevalence of use of contraceptive methods for men. Studies in Family Planning 24(2): 87-99, Mar/April 1993.

Globally, men have not shared equally with women the responsibility for fertility regulation. While family planning efforts have been directed almost exclusively toward women, the lack of male involvement may also reflect the limited opinions available to men. The 20-year history of social science research on male contraceptive methods is examined here in terms of the human and method factors related to the acceptability of hypothetical methods and the prevalence of use of existing methods. New male methods, particularly if reversible, may alter men's willingness to accept or share responsibility for the control of fertility. Research opportunities in the areas of gender, decisionmaking, communication, health education, and service delivery will be enhanced when methods for women and men are comparable.

Factors affecting the use of contraception in Bangladesh: a multivariate analysis. Asia-Pacific Population Journal 8(3): 19-30, September 1993.

This study, based on 1989 Bangladesh Fertility Survey, attempts to identify important determinants of contraceptive use among women of reproductive age. Multivariate logistic regression analysis showed that 12 variables, among the 15 selected socio-economic and demographic variables, are statistically significant factors influencing the current contraceptive

prevalence rate. Women's education emerged as the most influential factor, followed by women's participation in making decisions about family planning practice. Number of living children, religion, and education of husbands do not seem to have significant effects on current use of contraception.

High-risk births and maternity care. Columbia, Md., Macro International, 1993. 47 p. (Demographic and Health Surveys. Comparative studies, no. 8)

This report examines the potential mortality reductions which could be achieved through increased use of family planning and wider access to maternity care, for countries in sub-Saharan Africa, the Near East/North Africa, Asia, and Latin America/Caribbean. First, differentials in the coverage and utilization of maternity care are examined. Next, the fertility-related factors that place women and their children at high risk are explored. Data on women who fall into high-risk categories are then used to calculate a new measure of unmet need for family planning with the goal of avoiding high-risk births. All analyses are presented in simple tabular form, without controlling for potentially confounding variables.

*Collaboration in health development in South-East Asia,
1948-1988.* Fortieth Anniversary Volume (Revised). New Delhi,
1992. 614 p.

This book commemorates the fortieth anniversary of the World Health Organization (WHO) and of its South-East Asia Regional Office. It traces the history, since the inception of WHO in 1948, of the cooperation and collaboration in health development between the World Health Organization and its Member States in the South-East Asia Region. The present volume traces the successes and failures of the efforts of the Organization, together with its Member States, in their common endeavours for improving the health of the peoples in the Region. The work is divided into seven parts. Part 1 deals very briefly with the conditions of the countries of the South-East Asia Region before and during the Second World War. Part 2 describes the immediate post-Second World War period. Part 3 covers a period of about 20 years during which the world economy and those of most countries of the Region shared sustained growth and development. Part 4 covers a period of about 10 years from 1970-1980, which corresponds to a period of a series of political crises and economic recessions in the world. Part 5, covering the period up to 1988 describes the efforts of WHO to carry forward the momentum of its drive towards the achievement of the goal of Health for All by the Year 2000. Part 6 attempts to take a look at the future and the role of WHO in the coming years. Finally, Part 7 includes some Annexes.

Entertainment-education media: an opportunity for enhancing Japan's leadership role in third world development. Keio Communication Review(15): 81-101, 1993.

The present article investigates the use of entertainment-education mass media strategies for development and discusses their potential use by Japan as an important development tool in the 1990s. The article presents one successful strategy that combines educational entertainment uses of the media such as: radio, television, music, film, print media, and folk media, to produce effective communication change agents that promote development. The promises and problems associated with this strategy and their potential use by media planners in Japan are also discussed.

Communication, education and empowerment. Manchester, England, Centre for Adult and Higher Education, University of Manchester, 1990. 121 p. (Manchester monographs)

The book focuses on the subject of rural social development communication to answer the question: what kind of communication is required for what development? The volume is divided into 3 major chapters, namely: Chapter 1. Communication theory; Chapter 2. On the nature of rural development: rural social development, employment and participation; and Chapter 3. Participatory communication: theory and practice. Bibliography is listed at the end of the text.

The key to sustainability: Integration: International Review of Population, Family Planning and Maternal and Child Health(37): 34-39, September 1992.

The article traces the success of the Family Planning Association of Bangladesh's family planning IEC activities right from its inception to the present. FPAB's IEC programme is classified into three parts: A. IEC programme not linked to service provision; B. IEC programme linked to service delivery; and C. IEC programme with integrated community participatory approach.

Conducting and managing communication survey research: the Asian experience. Quezon City, Local Resource Management Services, 1992. 244 p.

This book explains how to conduct and manage Communication Survey Research (CSR) in Asia. It is intended to provide practical guide to students in communication and other social science and practitioners engaged in evaluating the social impact of development projects. The book is divided into three parts: I. Introduction; II. Conducting Communication Survey Research; and III. Managing Communication Survey Research. Part I is further divided into four chapters which discuss the uses, myths and realities of Communication Research (CR); developing communication researchers and managers; and formulating a CSR framework. Part II deals with the process of conducting CSR from the preparation of the research proposal to data gathering, processing, and reporting. Part III presents the concepts, approaches, methods and tools in managing large-scale CSR.

Designing messages for development communication: an audience participation-based approach. New Delhi, Sage Publications, 1991. 211 p. (Communication and human values)
Illus. by Mary Rolston Singh.

This handbook shows media producers in public service agencies how to give systematic attention to the audience, so that

decisions regarding sound, motion, and lighting reflect the preferences and customs of their audience. It is a 'do-it-yourself' text on audience based message design in Third World settings. It focuses on the difficulties of using development communication and pulls from the author's experience in advertising to show how and when communication strategies work. Topics range from effective communication messages to how and when to research and pre-test an audience. Simple and direct, this text is helpful to anyone who studies and designs development communication or implements it in the field.

KAP gap: listen to the audience. SAWA Population News 1(2): p. 6-7, June 1993.

This article discusses the issues of the KAP gap and the measures to deal with it. Communicators have tried many approaches in an attempt to bridge the KAP gap. (KAP is knowledge, attitudes and practice). One of the few things that has not been done well is listen to the audience. The co-ordinated use of multiple channels of communication is required if behaviour of the practice of contraception is to change. The paper suggests research techniques that should be used to help determine what an audience wants and needs to know. These research techniques include pre-testing, focus groups, as well as group and individual interviews.

Options for educators: a monograph for decision makers on alternative participatory strategies. New York, PACT/CDS, Inc., 1992. 156 p.

This work is written as a guide for any policy maker, trainer, educator, or programme staff member serious about using participatory strategies to combat poverty. The monograph describes three different participatory approaches and what they can do in poverty-stricken countries. It discusses ways to change the attitudes and behaviour of oppressed people from ones of low confidence and lack of trust to empowerment and creativity. A how-to section guides the trainer or manager through the methods, activities and participatory staff workshop. The Annexes provide key materials and exercises.

Mass media: The image, role, and social conditions of women - a collection and analysis of research materials, by Mieke Ceulemans and Guido Fauconnier. Paris, 1979. 78 p. (Reports and papers on mass communication, no. 84)

The study presents the preliminary examination of the literature documenting the image, role and social conditions of women in mass media. Its specific purpose is to systematize, analyze and evaluate the knowledge about the interrelationship between mass media and women's status on the basis of the literature which is currently available in this area of study. From this overview and critical analysis, the study intends to assess which aspects of women's media roles have been a frequent or neglected focus of research, which continents and countries

show concern with the issue, what major conclusions may be drawn from the available evidence, and what research and policy implications ensue from this information.

Report of the inventory and analysis of population IEC materials in Viet Nam (1988-1992). Hanoi, 1993. [124] p.

With the support from UNFPA and the Government of Viet Nam through the National Committee for Population and Family Planning, the Population Documentation and Information Centre (PDIC), GSO, in cooperation with IEC Department, NCPFP, has conducted an inventory and analysis of population IEC materials produced by related agencies, organizations in the whole country during the past 5 years (1988-1992). The results of the IEC materials inventory and analysis present the status and trends in the implementation of IEC materials production and dissemination.

Specifically, the inventory and analysis focuses on formats, years produced, resources, contents, objectives, methods of distribution, distribution and use, etc. These findings will serve as a basis for harmonized population IEC activities.

Using communication theory: an introduction to planned communication. Newbury Park, Cal., SAGE Publications, 1992.
248 p.

The book provides an overview of theories for communication planning. It is organized in three parts. Part I introduces communication planning in terms of a presentation of basic concepts and strategies as well as outlining the role of the communication planner. Part II elaborates some of the theoretical approaches among which a planner may choose. Part III presents a number of mass communication theories and elements of theories to be used in designing strategies in communication planning.

00107

Economic and Social Commission for Asia and the Pacific.

Urbanization and socio-economic development in Asia and the Pacific. Bangkok, 1993. 146 p. (Asian population studies series, no. 122)

The aim of this study is to examine in a systematic way urbanization in Asia as it relates to social and economic factors. Four country studies are conducted by study teams in the Philippines, Sri Lanka, Thailand and Viet Nam. The report aims to assist national planners to develop policies to modify urban and rural population growth. The project consists of three components. The first component reviews macro-level economic trends and rates of urbanization in the post-war period. The second component is on urbanization and the role of women, based on a small-scale survey. This component is designed to address the priority concern of incorporating women's issues. The third component is policy recommendations and programme-oriented guidelines for the formulation of migration and urbanization policies. This third component is the final part, based on the results of each country study.

Urbanization, population distribution and economic development in Asia. Manila, Economics and Development Resource Center, Asian Development Bank, 1993. [34] p. (EDRC report series, no. 58)

This paper reviews the broad trends and patterns of population distribution and urbanization in Asia, discusses other important underlying forces besides the market mechanism, and draws some considerations for policy. It examines such issues as the pace of urbanization and urban population growth and the role of migration, the characteristics of urban systems, the effects of income and sectoral growth differences and of population growth, and the relative efficacy of spatial policies. The paper then discusses some policy implications and approaches to spatial and urban problems.

World urbanization prospects: the 1992 revision. New York, 1993
164 p.

This publication presents data from the 1992 Revision of estimates and projections of the size and growth of urban and rural populations for all countries of the world. The volume consists of 4 chapters and the annex section. Chapter I presents levels of urbanization and future trends for urban and rural populations of the world. Chapter II describes the world's largest urban agglomerations - the "top 10" cities according to population size, their regional distribution, and prospects for their future growth. Chapter III is devoted to this edition's special subject: urban structure and hierarchy. Chapter IV presents the sources of data that underlie the estimation of urban population. The final section of the volume contains 16 annex tables that provide a detail about the characteristics of

urban and rural populations and urban agglomerations. Data are presented for the world, for less and more developed regions and for individual countries and regional aggregates. Estimates and projections are provided for the period from 1950 to 2025.

Horiuchi, Shiro.

World population growth rate: why declines stalled in the 1980s
Population Today 21(6): 6-7, 9, June 1993.

The article discusses the stalled world population growth declines in the 1980s. The paper points out three major factors that hamper the decline: first, fertility declines failed to develop or lagged in some developing countries; second, declines slowed in India and China; third, the increasing proportion of women at peak-child-bearing years raised the birth rate. However, it seems certain that changes in age structure will begin to favour a decline in the rate of growth. The women of childbearing age will start to decrease as the generations of the 1950s and 1960s are replaced by those born in 1970.

The future of Thailand's population policy: potential directions. Asia-Pacific Population Journal 8(3): 3-18, September 1993.

This article goes right to the heart of the matter of planning for Thailand's population and future development. After describing how, within one or two generations, parents' attitudes towards child-bearing and child-rearing have changed almost completely: from desiring a high quantity of children to desiring a high quality of children, it explains why issues such as population ageing and labour shortages cannot be addressed by reversing current fertility trends. It concludes that fertility in the long-term is unlikely to fall below the replacement level, unless there is a substantial change in the country's social and cultural context.

Newton, David E.

Population - too many people?: issues in focus. Hillside, N.J., Enslow Publishers, 1992. 128 p.

The book explores the story and factors of human population growth. It discusses such topics as: the effects of improved health policies, the migration from rural areas to cities around the world, and the effects of famine and war. The book then examines the debate around the central question of population: Are there too many people? Some believe that the world is overpopulated. Others believe that overpopulation is a myth. Many viewpoints on population size and the fact about population growth are presented and then the reader can begin to make his own informed decision.

World statistics in brief: United Nations statistical pocketbook. 14th ed. New York, Statistical Office, Department of Economic and Social Development, 1992. 117 p. (Statistical papers, series V, Number 14)

This publication is the fourteenth annual compilation of basic statistical series for countries and regions of the world. The

data shown are selected from the international statistical information compiled regularly by the Statistical Office, Department of Economic and Social Development of the United Nations Secretariat, and the statistical services of the United Nations specialized agencies and of other international organizations and institutions. The white pages show important and frequently consulted statistical indicators for 168 countries or areas. The coloured pages contain economic and social statistics for the world as a whole and selected major regions. This issue of World Statistics in brief generally covers the years 1980, 1985 and 1989 for countries and areas and the world and regions.

Statistical charts and indicators on the situation of youth 1970-1990. New York, Statistical Office, Department of Economic and Social Development, United Nations, 1992. 50 p.
(Statistics on special population groups, series v, no. 6)

This statistical and analytical sourcebook uses charts and graphs to highlight main aspects and trends in the social and economic situation of youth from 1970 to 1990. The booklet contains five chapters on different aspects on youth situation: the world youth population, education and training, economic activity, health and child-bearing, and households and marital status. Each chapter contains five to ten charts which summarize the available statistics in each field. Most of these statistics are presented in more detail in the country tables at the end of each chapter. The charts and tables are accompanied by statements of how the indicators are defined, where the data are from and how they can be interpreted.

Population Bulletin of the United Nations, nos. 34/35: Special issue on the Expert Group Meeting convened as part of the substantive preparations for the International Conference on Population and Development. New York, 1993. 153 p.

The present issue of the Population Bulletin is devoted to a review of the six expert group meetings. It includes a synthesis

of the meetings and their reports and recommendations. The synthesis gives a brief description of the organizational aspects of the meetings, a summary of their recommendations and an overview of important issues which were examined at more than one meeting. The meetings address the following issues: (a) Population growth, changes in demographic structure; (b) Population policies and programmes; (c) The interrelationships between population, development, environment, and related matters; (d) Changes in the distribution of population; (e) Linkages between enhancing the roles and socio-economic status of women and population dynamics; and (f) Family planning programmes, health and family well-being.

Population growth and policies in mega-cities: Sao Paulo. New
York, 1993. 36 p.

The present publication is one in a series of studies of mega-cities in developing countries. This study focuses on policies and plans of Sao Paulo, a mega-city in Brazil. The paper consists of five major sections. Section I. provides basic information on demographic trends and reviews the use of demographic data in planning for rapid growing urban populations. Section II. presents background information on the city's economic base. Section III reviews early decentralization strategies and examines current population distribution strategies for the metropolitan region. Section IV deals with a number of key issues and sectors - the labour market, urban land, housing, water-supply and so on. Section V. examines sectoral distribution of public investment.

World population prospects: the 1992 revision. New York, 1993. 677 p.

This volume presents the results of the United Nations 1992 Revision of the global population estimates and projections for the world, the more developed and the less developed regions, major areas and countries, including urban and rural areas, and major cities. They are based on the thirteenth round of global demographic estimates and projections undertaken by the Population Division of the Department of Economic and Social Development of the United Nations Secretariat. This revision provides data on the past demographic variables for the period 1990-2025. Country data are aggregated to provide figures for regions, major areas and development groups (more developed regions, less developed regions and least developed countries). Demographic variables calculated, and published in the 18 annex tables, include the size of the total population, its age and sex structure, growth rate and basic measures of fertility, mortality and international migration.

1990 Demographic yearbook. New York, 1992. 1020 p.

The Demographic Yearbook is a comprehensive collection of international demographic statistics prepared by the Statistical Office of the United Nations. The Demographic Yearbook 1990, which features marriage and divorce statistics as the special subject, is the forty-second in a series published by the United Nations. Through the co-operation of national statistical services, official demographic statistics are presented for about 216 countries or areas throughout the world. The tables in the Yearbook are presented in two parts, the basic tables followed by the tables devoted to marriage and divorce statistics, the special topic in this issue. The first part contains tables giving a world summary of basic demographic statistics, followed by tables presenting statistics on the size, distribution and trends in population, natality, foetal mortality, infant and maternal mortality and general mortality. In the second part, summary tables on marriage and divorce are followed by those presenting detailed statistics on marriage and divorce by age and other demographic characteristics. Tables are also presented on

population by marital status and household composition. Data are presented by urban/rural residence in many of the tables.

World Bank. Operations Evaluation Department.

Population and the World Bank: implications from eight case studies. Washington, D.C., Operations Evaluation Department, World Bank, 1992. 159 p. (A World Bank operations evaluation study)

With Foreword and Executive Summary in English, French and Spanish.

This study examines the Bank's activities in the population sector reviewing its role in eight countries: Indonesia, India, Bangladesh, Brazil, Colombia, Mexico, Kenya and Senegal. In each case, the study poses the following three issues: the demographic and related socio-economic changes since 1968; the government policies affecting these trends; and the role played by the World Bank vis-a-vis other population donors during the period. The conclusions reached are based on field visits, interviews, and a review of operations documents and literature.

Asian Development Bank. Economic and Development Resource Center.

Key indicators of developing Asian and Pacific countries, Vol. XXIII, 1992. Manila, 1992. 423 p.

Key Indicators of Developing Asian and Pacific Countries is an annual statistical publication of the Asian Development Bank, presenting the most current statistical data and socio-economic indicators from the Bank's developing member countries (DMCs).

Key Indicators comprises three parts. Part I presents data that provide a broad perspective on the situation and performance of the Asian and Pacific region in relation to industrialized countries and other developing regions of the world. Part II presents standard socio-economic data comparable among DMCs. Part III presents detailed data for each country. The 1992 Key Indicators includes for the first time coverage of the Socialist Republic of Viet Nam and of Mongolia, the Bank's newest DMC.

Colletta, Nancy Donohue.

Understanding cross-cultural child development and designing programs for children. Richmond, Virginia, Christian Children's Fund, 1992. 166 p.

This book looks at children living in the developing world and presents information about care-giving and child development in a simplified format. Each chapter begins with general or cross-cultural statements about children, moves to observations on a situation-specific level and then makes suggestions on how to apply these observations to local communication and design of programmes to meet children's needs. The book suggests ways of modifying caregiving and programmes to meet the needs of children at special risk or who show signs of distress. This book will serve as an aid to communicators, programme designers, parents and university students worldwide.

Economic and Social Commission for Asia and the Pacific.

Statistical yearbook for Asia and the Pacific, 1991. Bangkok, 1992. 467 p. English and French.

This is the twenty-third issue of the Statistical Yearbook for Asia and the Pacific. Data appearing in the publication have been compiled from periodic statements provided by the national sources and the national statistical publications supplemented, wherever necessary, by data compiled or published by the United Nations Statistical Office and the specialized agencies of the United Nations. The data up to the end of 1990, wherever available, have been included in the tables. The statistics covers a wide variety of subjects, viz., population, manpower, national accounts, agriculture, forestry and fishing, industry, energy, transport and communications, external trade, wages, prices and consumption, finance and social statistics. Summary tables, entitled "Regional statistical indicators", one relating to the ESCAP region in relation to the world and the other two relating to the whole of the ESCAP region and to the developing ESCAP region respectively, are published together for easy reference.

Ehrlich, Paul R., and others.

Food security, population, and environment. Population and Development Review 19(1): 1-32, March 1993.

The article outlines the complex of issues that are critical to humanity's ultimate success in what is the greatest challenge of the coming century - maintaining growth in global food production to match or exceed the projected doubling of human population. The issues discussed are: nutritional security, maldistribution and absolute shortage of food, food from the sea, constraints on food production, land, soil, biotic diversity, loss of genetic diversity, green revolution technologies, the outlook for expanding food production, global warming, the population-environment-food interaction, and prospect for the future, and what should be done?

Population, labour force and employment: concepts, trends and policy issues. Geneva, World Employment Programme, International Labour Office, 1992. 112 p. (Training in population, human resources and development planning, 9)

The present monograph covers a subject of unprecedented labour force growth and economic crisis causing the deterioration in employment conditions and rising in poverty by most developing countries. The monograph begins with an overview of global trends in labour force growth and unemployment. The analysis undertaken points clearly to the need for considering the two sides of the employment problem, namely the supply and demand perspectives. It provides an extensive coverage of the main labour force concepts and of major issues in the measurement of the labour force and labour underutilization. The study stresses

the importance of rigorously applying internationally accepted statistical definitions in data collection exercises, and advocates the adoption of an integrated approach to the employment problem, promoting policies and programmes aimed at slowing down the demographic components of labour force growth, as well as economic policies aimed at the removal of constraints to growth in productive employment.

*Selected indicators of food and agriculture development in
Asia-Pacific region, 1978-88.* Bangkok, 1989. 197 p.

The present publication provides information on most of the selected indicators of food and agriculture development for the period 1978-88. As many as 159 tables have been included in this publication. These tables incorporate information on: Agricultural Land and Population, Agricultural Inputs, Production Indices, Other Crops, Livestock, Agricultural Trade, Fisheries, Forestry, Nutrition and Other Indicators. Most tables show two types of information: annual figures for 1978, 1985, 1986, 1987 and 1988; the average annual growth rate for the period 1978-1988. The country groups used in the tables are: 'Developing Countries' and 'Developed Countries' of the Region. For purposes of comparison, figures relating to 'Rest of the World' and 'Total of the World' are also presented.

Kim, Yun-Hwan.

Medium-term growth - stabilization relationship in Asian developing countries and some policy considerations. Manila, Economics and Development Resource Center, Asian Development Bank, 1993. [34] p. (EDRC report series, no. 57)

The main point of the monetarist argument is that price stabilization is a prerequisite for boosting economic growth and protecting the balance of payments. Structuralists argue that economic growth inevitably brings inflation and deterioration in the balance of payments. The main purposes of this paper is to test the propositions of both the monetarists and the structuralists, by examining the relationship between economic growth and stabilization in price and the current accounts of Asian developing countries during the 1980s. Section II of the paper provides a summary of the debate between monetarists and structuralists with regard to the relationship between growth and stabilization in price and the balance of payments. Section II also discusses some other hypotheses, such as the Phillips curve and the Friedman proposition, which are to a large extent associated with the monetarist/structuralist debate. Section III compares the 1980s performances of 13 selected ADCs in the areas of growth, inflation, and the balance of payments, and attempts to identify their growth-stabilization relationship. With the findings of Section III, Section IV addresses some policy considerations of the demand and supply sides with regard to growth with stabilization in developing countries. Section V presents concluding remarks.

Bloom, David E. and Adi Brender.

Labor and the emerging world economy. Population Bulletin.
Vol. 48, no. 2, October 1993. 39 p.

The document studies the links between global labour force growth and the integration of the world economy. First, it explores recent and projected patterns of labour force growth. Then, it discusses world economic integration as a process involving the reorganization of economic activity so that production can be increased without increasing inputs. The Bulletin discusses the contribution and implications of three

possible paths to economic integration: (1) movement of workers from countries with low capital-to-labour ratios to countries with high capital-to-labour ratios (for example, from developing to developed countries); (2) the movement of capital (for example, from capital-rich to capital-poor countries); and (3) international trade of goods and services. Finally, the Bulletin examines world economic inequality, patterns of economic dependency, levels of economic well-being, and the role of multilateral economic institutions, and it speculates on the prospects for further integration.

Lee, Ronald E., and others, eds.

Population, food, and rural development. Oxford, Clarendon Press, 1988. 215 p. (International Studies in Demography)

This volume takes a close look at the impact of population growth in rural areas of developing countries that will lead to inadequate per capita output of food and will induce the decrease in land per head. It begins with an assessment of forecasts of food adequacy at the start of the twenty-first century. It then considers in more detail some of the processes which are included in the forecasts and many others which are not. The issues raised are discussed both in general terms and in the context of specific developing countries in Africa, Latin America, and Asia.

Poverty in the People's Republic of China: recent developments and scope for Bank assistance. Manila, Economics and Development Resource Center, Asian Development Bank, 1992. 15 p. (Occasional papers, no. 1)

The purpose of this paper is threefold. First, the paper describes the current poverty situation in China and discusses the policies of the government that have contributed to poverty alleviation. Second, it identifies poverty issues to be addressed and presents a broad overview of the government's policy and strategy to address the same. Finally, it outlines the scope for extending Bank assistance for poverty alleviation in China within the operational constraints. The paper focuses on rural poverty, since the bulk of the poor are rural residents; urban poverty though increasing in magnitude, at present is much

less significant.

Shifts in household demographics herald economic changes for Thailand. Asia-Pacific Population & Policy, No. 25, June 1993.

4 1

The bulletin is a summary of the publication: "Demographic change and the Thai economy: an overview", by Andrew Mason and Burnham O. Campbell.

The rapid decline in average household size and population aging in Thailand has the far-reaching effects on the Thai social and economic conditions. The article demonstrates the importance of these factors to social and economic development planning and shows how detailed household characteristics can be projected and brought into the planning process especially in two areas in particular - education and health care.

Smith, Katie, and Tetsunao Yamamori, eds.

Growing our future: food security and the environment. West Hartford, Connecticut, Kumarian Press, 1992. 172 p. (Kumarian Press Library of Management for Development)

The book addresses poor people's need for sustainable agriculture as well as the land's need for preservation. Based on the symposium, held at Arizona State University in November 1991, these collected papers advance our understanding of the current state of global famine and land degradation. Includes a section of case studies of highly successful programmes that combine issues of food security on one side and environmental conservation on the other - a balanced assessment of how collaborative efforts create sound development programmes.

UNFPA Country Support Team for the South Pacific.

Conceptualizing development and the need to integrate population factors in planning, by William J. House. Suva, Fiji, 1993. 37 p. (Discussion paper no. 2)

This discussion paper examines the recent conceptualization of development and analyses the interrelationships between population and socio-economic development. The first part of the paper surveys some of the recent literature which has promoted the broader conceptualization of 'development' and presents an extensive collection of data which compares the situation in so-called 'developed' and 'less developed' countries. Emphasis is given to World Bank data and to the most recent Human Development Index of the UNDP. Wherever possible, data from Pacific Island countries have been highlighted. The second part of the paper argues that policies and programmes which are geared to shift these 'development' indicators in the desired direction must account for the complex set of interrelationships between population-related variables and socio-economic variables. One of the great challenges for development practitioners, however, is to specify these relationships and to test their significance by collecting the requisite data.

United Nations Development Programme.

Human development report, 1993. New York, Oxford University Press, 1993. 230 p.

Human Development Report 1993 examines how - and how much - people participate in the events and processes that shape their lives. It concludes that at least five new pillars of a people-centred world order must be built: New concepts of human security that stress the security of people, not only of nations; New strategies of sustainable human development that weave development around people, not people around development; New partnerships between state and markets, to combine market efficiency with social compassion; New patterns of national and global governance; New forms of international cooperation, to focus aid directly on the needs of the people rather than on the preferences of governments. This year's Report describes specific policy actions that can make markets more "people-friendly" and rescue economic growth from becoming "jobless growth". Next, the Report examines decentralization as a step towards people's greater access to decision-making processes. And it traces the recent explosive growth of NGOs and the role they are beginning to play in influencing national and international issues.

The economic and social impacts of girls' primary education in developing countries. Washington, D.C., Creative Associates International, Inc., 1990. [112] p.

Prepared for: Advancing Basic Education and Literacy (ABEL) Project. Project No. 936-5832.

This paper has two purposes: to explore the evidence that exists worldwide on the impact of girls' education, particularly primary education; and to indicate areas in which impact probably is occurring, especially those areas that have received little or no attention in the literature or that have been studied with methodologies that limit what can be learned. A report examines the economic and social impacts of girls' primary education in developing countries. It gathers and analyzes many of the studies on education's direct and indirect positive effects on the economic and social well-being of women, their families, their communities and their countries.

Articles on special topics: a review of study of Chinese women.
China Population Today 10(3): 5-9, June 1993.

This paper gives a general review of major viewpoints concerning studies of Chinese women published in various population periodicals in the past ten years. The first subject is the survey of the social status of women in China; the second is the study of the social status of contemporary Chinese women - the role in family, community and society; and the third is the study of the relationship between employment and fertility of Chinese women.

Tietjin, Karen.

Educating girls: strategies to increase access, persistence, and achievement, ed. by Cynthia Prather. Washington, D.C., Creative Associates International, Inc., 1991. 120 p.
Prepared to Advancing Basic Education and Literacy (ABEL) Project. Project No. 9365832.

This monograph reviews the interventions-policies, programmes, and projects that have been implemented by governments, donors, and other institutions to increase girls' access, persistence, and achievement at the primary school level. It examines both the formal system of primary education and nontraditional, alternative approaches to reach out-of-school girls. Its goal is to identify the strategies, practices, inputs, and factors that have had measurable impact in improving the availability and accessibility of basic education to girls in developing countries. The monograph employs an analytic model that categorizes interventions according to whether they address supply-side school factors or demand side household factors barriers to girls' educational participation.

Tomasevski, Katarina.

Women and human rights. London, Zed Books, 1993. 162 p.
(Women and world development series)

This book describes the lack of adequate attention to the rights of women, encompassing everything from political participation to freedom from torture and from free and responsible parenthood to property. It also outlines what has been done so far to articulate and define women's rights, in particular the Convention on the Elimination of Discrimination Against Women and the continuing lack of an adequate response to violations at both national and international levels. It draws attention to those categories of women who are most at risk, including women refugees, the disabled, indigenous women and women in prison. The book concludes with the proposals for a plan of action, involving educating women as to their rights, community-level mobilization and international networking and litigation.

UNESCO Principal Regional Office for Asia and the Pacific.

Self-reliant women series: a sample curricular unit developed at the Second Regional Workshop for the conduct of Skills-Based Literacy Programmes for Women, Hua Hin, Thailand, 11-30 Nov. 1991. Bangkok, 1992. 18 booklets in one set.

This is a set of 18 booklets in the series called Self-Reliant Women. It is a self-contained learning programme or a curricular unit which is specially designed for use among women learners. Each unit is accompanied by a teacher's guide, a learner's workbook, teaching materials and instructional aids. This curricular unit represents the efforts to translate the concept of empowerment into concrete learning and teaching material which will respond to women's needs.

Women in higher education management. Paris, 1993. 202 p.

Jointly organized by Commonwealth Secretariat and UNESCO.

The book contains the collection of essays which women managers working in diverse socio-cultural and geographical contexts analyze the obstacles which they have faced and overcome during their careers. Four principal themes emerge: the general participation of women in education; the extent of their involvement in higher education management, including impediments to their advancement; the development of strategies to surmount these career limitations; and the particular contribution of women to the management of higher education.

Women and Microenterprise development: report. New York, [1992]
30 p.

This report presents various types and approaches to income-producing activities for women. The report seeks to: provide an overview of current approaches, debates and models in the field of enterprise development in countries world-wide; highlight gender issues that affect the design and approach of programmes with an enterprise component; and identify resource materials and organizations that might be helpful to consult in designing or assessing enterprise-development interventions and their impact on women's status and the achievement of population goals.

Women's education and fertility behaviour: a case study of rural Maharashtra, India. New York, 1993. 41 p.

This case study is part of an on-going programme of research concerned with the relationships between the status of women and fertility. The present study pertains to the State of Maharashtra, India. The study is divided into 3 chapters. Chapter I presents the conceptual framework underlying the analysis. Chapter II establishes the pattern of association between women's education and both socio-economic and female status. The direct relationship between female education and

family size is evaluated and the links between education and each of the channels through which it is expected to affect fertility are reviewed. A summary and conclusions are presented in Chapter III.

Wu, Zhen, and others.

The women's status and its impact on fertility transition in China. China Population Today 10(3): 10-13, June 1993.

This paper attempts to give some evidences of the current status of Chinese women in public affairs, labour participation, marriage, family life, educational attainments and maternal and child health care. The paper then analyzes the relationship between the women's status and fertility transition that affect the child bearing in Chinese families.

Decade of decision (video tape). Washington, D.C., Population Action International, 1992. 1 reel, 12.5 min., colour, English. VHS/PAL system.

This video programme was produced for the 1992 Earth Summit in Rio de Janeiro, Brazil. It examines the relationships between population growth, poverty, consumption patterns, and mounting environmental damage. It calls for universal availability of good quality family planning services by the end of the decade in order to avoid a possible tripling of world population in the next century.

Into focus: changing media images of women - an Asian resource kit (Multi-media kit). Kuala Lumpur, Asia-Pacific Institute for Broadcasting Development, 1989. 5 video cassettes; booklets and slides. English.

Contents: The 5 video cassettes (VHS system) are as follows: (1) Women and media (46 mins.); (2) Women and family (60 mins.); (3) Women and health (109 mins.); (4) Women and violence (60 mins.); (5) Women and work (88 mins.), 5 booklets, 1 offprints booklet, 5 illustrated texts, 40 slides, 1 slide series booklet, 1 contributor's list, and Guide for users.

This kit is a set of resources designed to stimulate critical thinking about women's relationship to the media: women, media and development in Asian countries. It is prepared for media practitioners, would-be media professionals such as producers and journalists, women's and social action groups, university and college students in communication, journalism and women's studies. It can be used in formal training courses, informal discussion sessions, or on a self-instructional basis. The kit contains five basic modules: media, family, work, health and violence. It explores how each of these issues is generally defined by the media, what aspects tend to be ignored and how the issue could be given a more comprehensive and constructive treatment by the media.

Women and work (video cassette). Kuala Lumpur, Asia-Pacific Institute for Broadcasting Development, 1989. 1 reel, 88 mins., sd., colour English VHS system.

This video cassette is part of a resource kit namely "Into Focus: Changing Media Images of Women". This video programme contains three units: overview, analysis, different approaches. The overview (7 mins.) explores the general work situation of women in society. It presents the environment of women in the home, agriculture, industry and the informal sector. The analysis (20 mins.) contains eight short sections on the following topics: perceptions of productivity, perceptions of housework, perceptions of home-based work, labour saving devices, typical jobs, pressures on women at work, the ideal female worker, and other images of work. The different approaches (61 mins.) contains three programmes, each of which explores a different approach to the subject of women and work: Nobody Cares for a Garment Girl; Do You Stay at Work?; Pahada. Notes on the video component is also provided. For media practitioners, journalists, women's and social action groups, and university students.

Women and family (video cassette). Kuala Lumpur, Asia-Pacific Institute for Broadcasting Development, 1989. 1 reel, 60 mins.; sd., colour English VHS system.

This video cassette is part of a resource kit namely "Into Focus: Changing Media Images of Women". It contains three units: overview, analysis and different approaches. It illustrates, analyzes issues concerning women and the family structure. The overview follows an average day in the life of an average mother which is contrasted with some common media images of women's role in the family. The analysis includes eight short sections on the topics such as: idealized family, keeping traditions, divorce, division of labour, socialization, etc. The different approaches includes two programmes: Dhamaal (Explosion), a 14-minute comedy on role reversal; and Stri (Women), a 30-minute story of a woman welder in India. Notes on the video component is also provided. For media practitioners, journalists, women's and social action groups, and university students.

Women and health (video cassette). Kuala Lumpur, Asia-Pacific Institute for Broadcasting Development, 1989. 1 reel, 109 mins., sd., colour English VHS system.

This video cassette is part of a resource kit namely "Into Focus: Changing Media Images of Women". It contains three units: overview, analysis, and different approaches. The overview (11 mins.) introduces some issues concerning women's health needs and the extent to which these are reflected in the media. The analysis (38 mins.) contains short sections on the following topics: health business, women's status and health, health messages and information, birth control: who decides?; work and women's health, mental health. The different approaches (60 mins.) contains two programs from India: (1) Puka (A Call), a 30-minute drama based on a true story of a group of women fighting against alcoholism in their area; (2) Kasauti (The Challenge), a 30-minute documentary program exploring the condition of destitute women, prostitutes, beggars and widows. Notes on the video component is also provided. For media practitioners, journalists, women's and social action groups, and university students.

Women and media (video cassette). Kuala Lumpur, Asia-Pacific Institute for Broadcasting Development, 1989. 1 reel, 46 mins., sd., colour English VHS system.

This video cassette is part of a resource kit namely "Into Focus: Changing Media Images of Women". This forty-six minute video programme contains a brief review of the role of media in creating and reinforcing images of women, introduces some techniques for analyzing media images and provides short examples of innovative approaches which create different or positive images of women. It uses technique such as slow motion and fast scans to encourage viewers to stand back from the content and to develop a more critical relationship with it. Notes on the video component is also provided. For media practitioners, journalists, women's and social action groups, and university students.

Women and violence (video cassette). Kuala Lumpur, Asia-Pacific Institute for Broadcasting Development, 1989. 1 reel, 60 mins., sd., colour English VHS system.

This video cassette is part of a resource kit namely "Into Focus: Changing Media Images of Women". It contains three units: overview, analysis, and different approaches. The overview (5 mins.) addresses the issues of violence against women: the way in which women are portrayed as objects of or commodities in media content. It examines the relationship between this type of media portrayal and violence against women in real life. The analysis (17 mins.) covers short sections on seven topics: objectification, sexual appraisal, harassment, verbal abuse, physical abuse, fear, and objectification again. The different approaches (38 mins.) presents a 38-minute documentary from India showing pressures put on victims of violence who dare to protest. Notes on the video component is also provided. For media practitioners, journalists, women's and social action groups, and university students.
