STATE MINIMUM WAGE LEGISLATION, A WEAPON IN THE WAR ON
POVERTY.

WOMENS BUREAU, WASHINGTON, D.C. (DEPT. OF LABOR)

PUB DATE JUN 66

EDRS PRICE MF-\$0.25 HC-\$0.80 18P.

DESCRIPTORS- *STATE LAWS, *MINIMUM WAGE LAWS, *ECONOMIC
DISADVANTAGEMENT, WAGES, SERVICE WORKERS, STATISTICAL DATA,

CENSUS DATA SHOW THAT POVERTY IS OFTEN THE RESULT OF
SERIOUS WAGE INADEQUACIES. IN 1964, NEARLY ONE-FIFTH OF THE
MORE THAN 47.5 MILLION FAMILIES IN THE NATION HAD INCOMES
UNDER \$3,000. MINIMUM WAGE LEGISLATION HELPS TO ELIMINATE
POVERTY BY SETTING A FLOOR FOR WAGES. FEWER THAN 30 MILLION
OF THE MORE THAN 47 MILLION NONSUPERVISORY EMPLOYEES IN
PRIVATE INDUSTRY ARE COVERED BY THE FEDERAL LABOR STANDARD
ACT OF 1938, AS AMENDED. MORE THAN 17.5 MILLION MUST LOOK TO
STATE LEGISLATION FOR PROTECTION. A TOTAL OF 38 STATES, THE
DISTRICT OF COLUMBIA, AND PUERTO RICO HAVE MINIMUM WAGE LAWS
ON THE STATUTE BOOKS. THE APPENDIX INCLUDES (1) TABULAR DATA
FOR LAUNDRY AND CLEANING SERVICE EMPLOYEES, EATING AND
DRINKING PLACE EMPLOYEES, AND NURSING HOME AND RELATED
FACILITIES EMPLOYEES EARNING LESS THAN \$1.25 AN HOUR, AND
HOTEL AND MOTEL EMPLOYEES EARNING LESS THAN \$1.30 AN HOUR, BY
REGION, STANDARD METROPOLITAN AREA, AND SEX FOR JUNE 1963,
(2) A CHECKLIST ON STANDARDS SET BY STATE MINIMUM WAGE LAWS,
AND (3) THE MINIMUM WAGE STATUS OF 50 STATES, DISTRICT OF
COLUMBIA, AND PUERTO RICO. (PS)

June 1966

STATE MINIMUM WAGE LEGISLATION
A WEAPON IN THE WAR ON POVERTY

What About Poverty?

Who are the poor who prick our national conscience? They are the unemployed, the sick, the aged, the disadvantaged youth. They are also the working poor--those who have jobs at which they usually work full time but are still unable to earn enough for the bare essentials of life.

Census data show that poverty is often the result of serious wage inadequacies. In 1964, nearly one-fifth of the more than 47½ million families in our Nation had incomes under \$3,000. Of the 8.4 million such families:

Almost one-half had 1 family member employed.

About one-fifth had 2 family members employed.

Nearly 300,000 families were impoverished despite the fact that 3 or more members were earners.

The remaining families had no wage earners.

2 MILLION FAMILIES LIVED IN POVERTY IN 1964
DESPITE THE FACT THAT THE HEAD OF THE HOUSE-
HOLD WORKED AT A FULL-TIME JOB 50 to 52 WEEKS.

The plight of the working poor is shown also by data on average income in 1964 for 38½ million men and more than 14 million women employed at full-time jobs for 40 weeks or more during the year:

Among the men--

Nearly 5 million, 12 percent, earned less than \$3,000.

3½ million, 9 percent, earned less than \$2,500.

Almost 2½ million, 6 percent, earned less than \$2,000.

Among the women it was even worse--

More than 5 million, 36 percent, earned less than \$3,000.

Almost 4 million, 25 percent, earned less than \$2,500.

More than 2 million, 15 percent, earned less than \$2,000.

How Does Minimum Wage Legislation Help To Eliminate Poverty?

Minimum wage legislation attacks the root of the poverty problem by setting a floor for wages. It promotes maintenance of a minimum standard of living necessary for the health, efficiency, and general well-being of the worker.

The legislation promotes a healthy economy by making money available for consumer goods.

THE WORKER WHO RECEIVES AN ADEQUATE WAGE NOT ONLY LIVES BETTER HIMSELF BUT ALSO CREATES A DEMAND FOR MORE GOODS AND SERVICES THAT RESULTS IN MORE WORK FOR OTHERS.

Does Minimum Wage Legislation Result in Other Benefits?

Yes. It provides:

For the worker--a sense of worth and human dignity; standards for working conditions; self-support in place of welfare payments.

For the employer--freedom from unfair competition of other employers who undercut wage rates; more buyers for his product; better relations with his workers; incentive to greater efficiency in management as a means of reducing production costs.

For the taxpayer--a smaller relief load; more people to share the tax burden; a more prosperous economy.

Is There a Federal Minimum Wage Law?

The Federal Fair Labor Standards Act of 1938, as amended, sets a minimum wage of \$1.25 an hour for most covered workers and requires overtime pay of not less than one and one-half times the worker's regular rate for hours worked in excess of 40 a week.

The Federal law applies to employees engaged in interstate commerce or in the production of goods for interstate commerce--primarily in manufacturing, communication, transportation, mining, and wholesale trade--and to employees in certain large enterprises that are so engaged--primarily large retail enterprises.

Millions of workers are outside the scope of coverage of the Federal Fair Labor Standards Act because they work in jobs that are primarily "intrastate" in nature, and others are specifically exempt.^{1/} Exempt employees include:

Executive, administrative, and professional employees and outside salesmen.

Employees of certain retail or service establishments that make most of their sales within the State, such as:

Hotels, motels, restaurants, motion picture theaters, seasonal amusement and recreation establishments, hospitals, and nursing homes.

Employees of certain laundries and drycleaning establishments.

Employees engaged in agriculture.

LESS THAN 30 MILLION OF THE MORE THAN 47 MILLION NONSUPERVISORY EMPLOYEES IN PRIVATE INDUSTRY ARE COVERED BY THE FEDERAL LAW. MORE THAN 17½ MILLION MUST LOOK TO STATE LEGISLATION FOR PROTECTION.

Who Should Be Covered by a State Law?

Workers who need it most are those employed in the trade and service industries, such as:

Restaurants
Hotels and motels
Laundries and drycleaning establishments
Hospitals, nursing homes, and health occupations
Small retail stores
Theaters and other places of amusement
Building cleaning services
Repair services, such as shoe repair shops and tailoring shops
Beauty parlors
Car repair, gasoline stations, parking service
Other low-paid service occupations

^{1/} The U.S. House of Representatives, on May 26, 1966, passed a bill which makes extensive changes in the Federal Fair Labor Standards Act. If enacted, approximately 8 million additional workers will be brought under coverage.

In many areas, workers in these industries are poorly organized in trade unions, have little individual bargaining power, and must depend on State laws for adequate standards of wages and working conditions.

Are Workers in These Occupations Actually Paid Low Wages?

Studies made over the years have shown that many workers in trade and service industries are paid wages inadequate to maintain their health and well-being. Recent surveys of the U.S. Department of Labor reemphasize these inadequacies. They show that substantial proportions of workers in the industries studied, and especially women, earned less than \$1.00 an hour; even larger proportions earned under \$1.25 an hour. For example, among nonsupervisory employees in laundry and cleaning services, 31 percent of the women earned less than \$1.00 an hour and 61 percent earned less than \$1.25 an hour. The comparable percentages for men employees were 9 percent and 27 percent, respectively. Additional information on earnings in this and other low-wage industries by region and by standard metropolitan area is in appendix A.

Is Minimum Wage Legislation a New Idea?

Decidedly not. The first State minimum wage law was enacted in Massachusetts in 1912, over a half century ago. Today three-fourths of the States have such laws. The Federal Fair Labor Standards Act was passed in 1938, more than a quarter century ago. By now the principle of minimum wage legislation is thoroughly established. The constitutionality of such legislation, both State and Federal, has been upheld by the U.S. Supreme Court.

States With Minimum Wage Laws

A total of 38 States, the District of Columbia, and Puerto Rico have minimum wage laws on the statute books. This includes three States with wage board laws under which no rates are currently in effect--Illinois, Kansas, and Louisiana.

The roster:

Alaska	Louisiana	Ohio
Arizona	Maine	Oklahoma
Arkansas	Maryland	Oregon
California	Massachusetts	Pennsylvania
Colorado	Michigan	Puerto Rico
Connecticut	Minnesota	Rhode Island
Delaware	Nevada	South Dakota
District of Columbia	New Hampshire	Utah
Hawaii	New Jersey	Vermont
Idaho	New Mexico	Washington
Illinois	New York	West Virginia
Indiana	North Carolina	Wisconsin
Kansas	North Dakota	Wyoming
Kentucky		

The other 12 States have no minimum wage laws on the books:

Alabama
Florida
Georgia
Iowa

Mississippi
Missouri
Montana
Nebraska

South Carolina
Tennessee
Texas
Virginia

Are There Different Types of Minimum Wage Laws?

Laws are classified in accordance with methods used in establishing the minimum wage rate. There are three basic types of laws:

1. Laws in which the rate is fixed by the legislature in the statute itself are known as "statutory" rate laws. About one-third of the jurisdictions have such laws.

2. Laws that authorize the Labor Commissioner to set a rate based on recommendations of a tripartite wage board, usually on an industry or occupation basis, are called "wage board" laws. More than one-third of the jurisdictions have them.

3. A combination of the two methods, where a rate is established by the statute and the Labor Commissioner is authorized to set wage and other standards by wage board action, are known as "statutory and wage board laws." A few States authorize a committee or board, sometimes called a wage adjustment board, not to change the basic rate, but to determine the amounts of deductions or allowances (such as tips) or to establish subminimum rates for certain categories of employees (such as learners).

What Should a Good State Minimum Wage Law Do?

At the very least, the law should:

- Cover men and women
- Apply to virtually all workers, particularly those in all low-paid occupations
- Set a minimum wage of at least \$1.25 an hour
- Require overtime at not less than one and one-half times the worker's regular rate after 40 hours a week
- Provide for adequate enforcement

The U.S. Department of Labor makes available draft bills that incorporate the basic minimum wage standards recommended by the Department, namely: Broad industry coverage of men, women, and minors; a statutory minimum, either with or without wage board procedure. The statutory minimum is basic, but the addition of wage board procedure provides flexibility and makes possible participation by employers, workers, and the public in improving standards without additional legislative action. The State itself, of course, must determine which type of bill will best meet its need and will have the best chance for favorable action by the legislature.

TODAY'S CHALLENGE:

**TO GET THE BEST POSSIBLE MINIMUM WAGE
STANDARDS ON THE BOOKS IN ALL STATES**

Where Are We Now?

12 States have no laws on the books.
Of the 40 jurisdictions with laws:

- 14 jurisdictions apply only to women and/or minors and do not cover men.
 - 15 jurisdictions do not set a statutory rate.
 - 3 States do not have minimum rates in effect for any occupation.
 - 15 jurisdictions have statutory rates lower than \$1.25 an hour.
- In many States wage orders set wage floors far below the poverty line.
Only 3 States provide for statutory overtime pay after 40 hours of work.

Although numerous States with wage board laws require payment of overtime pay after specified hours, only 3 States have a requirement on premium pay after 40 hours of work in most of their wage orders.

Unfortunately, all laws include some exemptions from coverage of the statutory rate, and some laws have many exemptions. Typical exemptions are:

Establishments with fewer than a specified number of workers.
Employees in hospitals and nursing homes; in nonprofit organizations; in theaters.

(For State minimum wage standards and rates see appendixes B and C.)

Recent Progress

We are in a "breakthrough" period on State minimum wage legislation. Legislatures are taking action.

In 1964 - Michigan enacted a minimum wage law, the first State to do so in 5 years.

In 1965 - 3 States--Delaware, Indiana, and Maryland--passed minimum wage laws for the first time.

Oklahoma, with an inoperative wage board law, passed a new statutory rate law.

2 States amended their existing laws to bring men under coverage.

6 States increased their statutory rates.

In 1966 - West Virginia enacted a minimum wage law.

2 States amended their existing laws to bring men under coverage.

How Was This Accomplished?

In many cases, women's organizations provided the leadership:

They sought the cooperation of other groups and of public-spirited citizens. Frequently they helped to organize a citizen's committee to spearhead an educational program.

They collected the facts--as related to their State--to support the need for a law.

They used the resources of the U.S. Department of Labor and the many interested State agencies--the State Labor Department, the State Employment Service, State welfare agencies, and others.

They decided on the type of minimum wage bill to support.

They organized seminars, conferences, and other educational forums.

They held public meetings throughout the State.

They got press coverage and appeared on television and radio programs.

They prepared leaflets and gave them the widest possible distribution.

They contacted their legislators.

They appeared at legislative hearings and presented an effective case for enactment of a minimum wage law.

The Right Time for Action

National women's organizations continue to work for legislation to safeguard the welfare of wage earners, both men and women. Governors of 48 States and the Virgin Islands have established Commissions on the Status of Women on which these organizations are represented. Practically all Commissions that have reported to their Governors to date have recommended minimum wage legislation, including enactment of laws in States that do not have them and amendments to strengthen existing laws.

These organizations, and the groups and individuals cooperating with them, provide the focus for educational efforts directed toward enactment of effective minimum wage laws.

The Poverty Program Provides the Incentive

In his message to Congress on March 16, 1964, President Johnson pointed out what poverty means to those who endure it:

. . . It means a daily struggle to secure the necessities for even a meager existence. It means that the abundance, the comforts, the opportunities they see all around them are beyond their grasp.

And also what the elimination of poverty can mean to the Nation as a whole:

. . . Our history has proved that each time we broaden the base of abundance, giving more people the chance to produce and consume, we create new industry, higher production, increased earnings, and better income for all.

Giving new opportunity to those who have little will enrich the lives of all the rest,

MINIMUM WAGE HELPS TO ALLEVIATE POVERTY BY
GIVING OUR NATION'S WORKERS A LIVING WAGE.
