**PUBLICATIONS LIST**  
on  
**TILLAGE AND TRACTION**  
**TILLAGE MACHINERY LABORATORY**

**Plant Industry Station  
Beltsville, Maryland**

February 1957

This list of publications represents the results of research at the Tillage Machinery Laboratory at Auburn, Ala. Such publications are an important contribution to the scientific literature of tillage and traction equipment and related phases of soil science. In many cases they report findings of research from which cooperating equipment-manufacturing companies have obtained data that helped them to serve the American farmer better.

Early publications in the list report the results of research by agricultural engineers of the Alabama Agricultural Experiment Station. Results of this research led to a cooperative project with the United States Department of Agriculture and this in turn influenced the establishment of the Laboratory in 1935.
