ABSTRACT

Information on job market trends for 1986-87 college graduates is presented in narrative summaries and statistical tables. A survey of a cross-section of 761 employers from business, industry, government, and education explored: trends in hiring, hiring quotas and the influence of the organization size, demand for various majors, job availability by geographical region, expected starting salaries, campus recruiting activities, and other related topics. It was found that new college graduates will find the market more competitive, since employers expect to hire 2.4% fewer bachelor's degree candidates. Starting salaries are expected to average \$21,815 for bachelor degree graduates, \$26,628 for master's degree graduates, and \$30,754 for those with a Ph.D. Demand for different majors include: hotel, restaurant, and institutional management (2.9%); marketing/sales (2.2%); education (1.7%); electrical engineering (1.2%); retailing (0.9%); computer science (0.9%); accounting (0.8%); and financial administration (0.8%). The greatest employment opportunities for new graduates are in the Southwest and Northeast, followed by the Southeast, the North Central, and South Central states. A list of employers responding to the survey is appended. (SW)

ACKNOWLEDGMENTS

Placement Services at Michigan State University is most appreciative for the time and effort expended by employers who so graciously responded to the Recruiting Trends survey for 1986-87. We recognize that collecting and recording data for this research poses a burden on already heavy schedules. We extend a special thanks to those employers who completed and returned questionnaires so promptly. Because of your extra efforts, we can continue to provide this information on trends in hiring of new college graduates by organizations in business, industry, government and education.

Assisting us with development of new questions for this year's survey and identifying new job market trends were Mr. Ed Fitzpatrick, Mr. Tony Rogalski, Ms. Vernicka Tyson, Dr. Jim Bowling, Ms. Pat Anderson, Ms. Kathy Flora, Ms. Sally Cook, and Mr. Bob Watts of our staff at Placement Services. Ms. Sarah Fryer, also an assistant director of Placement Services, helped with these tasks and, in addition, advised us on editing of the final report. For their efforts, we wish to thank them.

Moreover, this report could not have been completed without support from our graduate assistants and secretarial staff. Statistical analysis of responses was accomplished with valuable assistance from Hae-Ik Hwang, our research assistant. Eleni Gabre-Madhin helped with editing of the final report. Jennifer Leedy supervised our clerical staff and made important recommendations throughout the project. Medina Shaft, Denise Frederick, Rebecca Smyth, and Andrew Chiplock assisted with collection of necessary data and preparation of the final report.

To all who participated in compilation of this report, we say thank you.

John D. Shingleton

Summary of
RECRUITING TRENDS 1986-87
A Study of 761 Businesses, Industries,
Governmental Agencies, and
Educational Institutions Employing
New College Graduates

This is a summary of the sixteenth annual Recruiting Trends survey completed by Placement Services at Michigan State University. For this 1986-87 survey, a cross-section of employers from business, industry, government, and education were contacted; and responses were received from 761 organizations. The results of this survey include information regarding anticipated changes in hiring trends for new college graduates, expected starting salaries, campus recruiting activities, new recruitment techniques, and many other topics of interest to personnel directors, placement officers, career counselors, faculty, and students.

Of the respondents, 43.1% were industries and manufacturing, 32.3% businesses, 17.9% educational institutions, 4.7% governmental agencies and military services, and 2.0% conglomerates. (Pages 1-4, 79-86)

Organizations with 10,000 or more employees represent 11.4% of the respondents; those with five to ten thousand employees were 9.1% of the respondents; and organizations with a thousand to five thousand employees represent 28.3% of the respondents. Organizations with five hundred to a thousand employees were represented by 13.0% of the respondents; those with one hundred to four hundred ninety-nine employees by 24.5% of the respondents; and those with one to ninety-nine employees were represented by 13.8% of the respondents. (Pages 1-4)

Job Outlook for Graduates of 1986-87

During the 1986-87 recruiting season, surveyed employers expect to hire about 2.4% fewer bachelor's degree graduates than they hired during 1985-86. From these data, it is evident that surveyed employers are approaching this year's recruitment with caution, since they are anticipating a slight decrease from last year's job market for new college graduates. (Page 8)

For minorities, quotas are expected to increase 4.0% above last year's. These targets compare to an expected increase of 6.5% for 1985-86 and 10.2% in 1984-85. (Page 14)

For women graduates, quotas are 2.5% higher than last year. This compares to an increase of 4.7% in 1985-86 and 7.7% in 1984-85. (Page 14)

Master's quotas were expected to increase only slightly for 1986-87 (0.2%). For MBA and doctoral candidates, quotas were expected to decrease slightly, -0.2% and -0.1%, respectively. (Page 14)

Demand for Various Academic Majors

Although surveyed employers expect a decrease in hiring of 2.4% for all bachelor's degree graduates, demand for certain academic majors will increase, and demand for others will decrease. (Pages 15-16)

The greatest increases in demand will be experienced by majors in hotel, restaurant, and institutional management (2.9%); marketing/sales (2.1%); education (1.7%); electrical engineers (1.2%); retailing (0.9%); computer science (0.9%); accounting (0.8%); financial administration (0.8%); chemical engineers (0.7%); mathematics (0.7%); chemistry (0.6%); and telecommunication (0.6%).

Only slight increases in demand are expected for general business administration (0.4%); natural resources (0.3%); liberal arts/arts and letters (0.2%); communications (0.1%); industrial engineering (0.1%); and journalism (0.1%).

No change in the job market is expected for majors in personnel administration (0.0%) and social science (0.0%).

Decreases in demand are expected for majors in civil engineering (-0.1%); human ecology/home economics (-0.1%); agriculture (-0.1%); mechanical engineers (-0.3%); metallurgy materials science (-0.5%); physics (-1.0%); geology (-1.1%); and advertising (-1.4%).

Hiring Quotas

Hiring quotas for this year (1986-87) among 634 organizations expecting to hire new college graduates were a total 58,942. Among these same organizations last year, a total of 61,651 new college graduates were hired, thus a decrease of 2.4% in hiring quotas for this year. (Page 8)

This year, 103 of 761 organizations (13.5%) expect to hire no new college graduates, compared to 96 employers (12.6%) hiring no new graduates in 1985-86, 69 of 710 employers (9.7%) in 1984-85, and 80 of 658 organizations (12.2%) in 1983-84.

Size of Organization Influences Hiring Quotas

Quotas for large employers are down, while quotas for smaller organizations are up, according to surveyed employers. Those organization sizes with increases include employers with 500 to 999 employees (6.7%), employers with one thousand to 4,999 employees (5.4%), employers with one to 99 employees (2.7%), and employers with one hundred to 499 employees (2.3%). Decreases in quotas for this year versus last year were experienced by organizations with 5,000 to 9,999 employees (-1.5%); and 10,000 or more employees (-9.3%). (Pages 9-10)

Job Availability by Geographical Region

Different regions of the country are expected to vary in demand for new college graduates. Expected to increase in hiring quotas will be the northeastern region (9.8%) and the southeastern region (6.8%). All other regions of the country are expecting hiring quotas to decrease: northwestern region (-29.8%), southwestern region (-14.5%), southcentral region (-8.4%), and northcentral region (-3.8%). (Pages 10)

The greatest availability of employment opportunities for new college graduates during 1986-87 will be in the southwestern region of the United States, according to employers responding to this survey. The northeastern and southeastern regions were rated next best on the employers' list of top geographical regions for jobs. For the first time in several years, the southcentral region slipped from the employers' list of the top three regions; it is now in fifth place. (Pages 50-51)

The regions of the United States in order for best availability of jobs are southwestern, northeastern, southeastern, northcentral, southcentral, and northwestern.

Starting Salary Offers

Starting salary offers for bachelor's degree graduates will increase by 2.9% this year, according to employers responding to this survey. This compares to an increase of 1.8% predicted for last year. (Pages 21-25)

Starting salary offers for women and minorities will increase by an average of 2.9% and 3.0%, respectively. For MBA, master's and doctoral degree graduates, increases of 2.8%, 2.9%, and 2.5%, respectively, are anticipated.

Highest among anticipated increases for new graduates this year will be education majors (3.1%). Substantial starting salary increases are also expected for electrical engineers (2.6%); marketing/sales (2.5%); computer science (2.5%); accounting (2.5%); general business administration (2.3%); mathematics (2.2%); industrial engineers (2.2%); financial administration (2.2%); mechanical engineers (2.2%); chemistry (2.1%); personnel administration (2.0%); and physics (2.0%).

Moderate increases are anticipated for civil engineers (1.9%); social sciences (1.9%); chemical engineers (1.9%); liberal arts/arts and letters (1.9%); hotel, restaurant, and institutional management (1.8%); retailing (1.7%); advertising (1.7%); metallurgy materials science (1.6%); communications (1.6%); telecommunication (1.6%); human ecology/home economics (1.6%); geology (1.5%); journalism (1.4%); agriculture (1.4%); and natural resources (1.3%).

The average starting salary (all disciplines) for bachelor's degree graduates is expected to be \$21,815; for MBAs/master's, \$26,628; and for doctorates, \$30,754.

Highest among expected starting salaries again this year are electrical engineering (\$29,680), mechanical engineering (\$29,636), chemical engineering (\$29,254), metallurgy and materials science (\$28,309), and computer science (\$28,087).

Other starting salaries include industrial engineering (\$27,643), civil engineering (\$25,399), chemistry (\$23,474), physics (\$21,269), accounting (\$21,037), marketing/sales (\$20,809), mathematics (\$20,804), financial administration (\$20,517), general business administration (\$19,543), agriculture (\$19,293), personnel administration (\$19,267), telecommunication (\$18,730), advertising (\$18,307), geology (\$18,184), social science (\$17,939), hotel, restaurant, institutional management (\$17,899), education (\$17,874), communications (\$17,853), natural resources (\$17,077), liberal arts/arts and letters (\$16,975), retailing (\$16,672), human ecology/home economics (\$16,499), and journalism (\$15,743).

Just a few employer categories are expecting to offer starting salary increases of 4.0% or more. These include accounting (5.0%); service and volunteer organizations (4.8%); and educational institutions (4.2%).

Starting salary increases in the range of 3.0% to 3.9% include construction and building materials manufacturers (3.5%); electronics and instruments (3.4%); banking, finance, and insurance (3.3%); food, beverage processing, and restaurants (3.0%); and public utilities including transportation (3.0%).

Increases of 2.0% to 2.9% are anticipated by chemicals, drugs, and allied products (2.9%); merchandising and retail services (2.8%); printing, publishing, and informational services (2.8%); diversified conglomerates (2.8%); governmental administration (2.6%); communication-radio, TV, and newspapers (2.4%); electrical machinery and equipment (2.3%); and hospitals and health services (2.1%).

Increases of 1.9% or less are expected from research and consulting services (1.9%); aerospace and components (1.9%); automotive and mechanical equipment (1.8%); petroleum and allied products (1.7%); hotels, motels, resorts, and recreational services (1.7%); military services (1.7%); metals and metal products (1.5%); glass, paper, packaging and allied products (1.0%); and tire and rubber products (1.0%).

No increases in starting salary offers are expected by agribusiness organizations (0.0%).

Starting salary offers for 1986-87 bachelor's degree graduates will also be influenced by geographical regions of the country, according to surveyed employers. The greatest starting salary increases are expected for the southeastern region (3.5%), northcentral region (3.1%), southcentral region (3.1%), and southwestern region (3.1%). Moderate increases are expected in the northeastern region (2.3%). The smallest increases are expected in the northwestern region (1.8%).

Employer size will be another influence on starting salaries. The greatest increases are expected by employers with one hundred to 499 employees (3.5%) and employers with five hundred to 999 employees (3.1%). Next on the list were employers with one thousand to 4,999 employees (2.8%), five thousand to 9,999 employees (2.6%), and one to 99 employees (2.5%). The smallest starting salary increases are expected from employers with 10,000 or more employees (2.4%).

Changes in Salaried Employees Last Year

Since hiring intentions of prospective employers might be influenced by changes in numbers of salaried employees working for their organizations last year, employers were surveyed on this question. Employers responding to this year's survey reported a net increase of 1.6% in numbers of salaried employees working for their organizations last year. This compares to an increase of 1.7% experienced in 1984-85, 1.5% in 1983-84, and 1.4% during 1982-83. During the last three years, surveyed employers have increased the numbers of salaried employees working for their organizations only slightly. (Pages 5-7)

Last year, some organizations gained significant numbers of employees while others lost employees. Those organizations with increases in salaried employees included service and volunteer organizations (9.2%); food, beverage processing, and restaurants (7.4%); accounting (7.1%); research and consulting services (5.7%); electrical machinery and equipment (4.2%); banking, finance, and insurance (3.7%); printing, publishing, and informational services (3.0%); merchandising and retail services (2.6%); construction and building materials manufacturers (2.3%); and communication-radio, TV, and newspapers (2.0%).

Moderate increases in salaried employees were experienced in agribusiness (1.8%); electronics and instruments (1.7%); educational institutions (1.4%); automotive and mechanical equipment (1.2%); aerospace and components (1.1%); hospitals and health services (1.0%); military services (0.3%); governmental administration (0.3%); and glass, paper, packaging and allied products (0.2%).

Those experiencing no change or even declines in salaried employees were chemicals, drugs, and allied products (0.0%); public utilities including transportation (-0.2%); hotels, motels, resorts and recreational services (-0.3%); metals and metal products (-3.2%); petroleum and allied products (-9.6%); diversified conglomerates (-12.0%); and tire and rubber products (-13.0%).

Last year, according to surveyed employers, certain sizes of organizations experienced decreases in numbers of salaried employees while others experienced increases. The greatest increases were experienced by organizations with five hundred to 999 employees (3.4%), one to 99 employees (3.2%), one thousand to 4,999 employees (1.9%), and one hundred to 499 employees (1.9%).

Decreases were experienced by organizations with five thousand to 9,999 employees (-2.9%) and those organizations with more than 10,000 employees (-0.6%).

Anticipated Changes in Salaried Employees This Year (1986-87)

This year (1986-87), salaried employees on payrolls of surveyed employees are expected to increase at the rate of 1.5% on the average, but changes in salaried employees will vary significantly from employer to employer. (Pages 5-7)

Anticipating the greatest increases in salaried employees were research and consulting services (5.7%); accounting (5.5%); food, beverage processing, and restaurants (4.5%); banking, finance, and insurance (4.2%); glass, paper, packaging and allied products (4.1%); service and volunteer organizations (3.2%); communication- radio, TV, and newspapers (2.9%); and merchandising and retail services (2.6%).

Moderate increases were anticipated by the following organizations: governmental administration (1.6%); hotels, motels, resorts and recreational services (1.5%); educational institutions (1.0%); electronics and instruments (0.9%); electrical machinery and equipment (0.8%); military services (0.7%); hospitals and health services (0.6%); automotive and mechanical equipment (0.5%); construction and building materials manufacturers (0.5%); printing, publishing, and informational services (0.4%); and public utilities including transportation (0.1%); .

Decreases in salaried employees were reported in aerospace and components (-0.2%); tire and rubber products (-0.4%); chemicals, drugs, and allied products (-0.6%); diversified conglomerates (-0.9%); agribusiness (-0.9%); petroleum and allied products (-1.1%); and metals and metal products (-1.6%).

This year, increases are expected in numbers of salaried employees working for organizations with one to 99 employees (2.9%), one hundred to 499 employees (1.9%), one thousand to 4,999 employees (1.8%), five hundred to 999 employees (1.5%), and 5,000 to 9,999 employees (0.6%).

Organizations with 10,000 or more employees will be expecting further decreases in number of employees (-0.8%).

Percentages of Job Offers Accepted

Although one excellent measure of past job market trends is the number of new college graduates hired by surveyed employers, another is the percent of job offers accepted. Of offers made to technical college graduates during 1985-86, 61.2% were accepted with surveyed employers. This compares to an acceptance rate of 59.7% in 1984-85, 59.0% in 1983-84, and 60.1% in 1982-83. An increase in acceptance rate suggests a worsening of the job market for technical graduates. (Pages 11-13)

Offers of employment to non-technical college graduates were accepted at the rate of 68.3% during 1985-86, according to surveyed employers. This compares to an acceptance rate of 68.2% during 1984-85, 68.5% in 1983-84, and 65.3% in 1982-83. This increase in acceptance rate during the last four years suggests a continuing erosion in the job market for non-technical graduates during this time.

The highest acceptance rates for offers of employment were received from non-technical graduates by educational institutions (80.5%) and governmental agencies (79.3%). Those employer types receiving lower acceptance rates were industrial and manufacturing organizations (67.0%), conglomerates (65.1%), and businesses and services organizations (62.7%). Similar acceptance rates were found by these organizations for technical graduates, except industrial and manufacturing organizations had the highest acceptance rate (66.9%).

Acceptance rates varied by size of organization too. The highest acceptance rates were received by organizations with five hundred to 999 employees (77.3%). In the middle range of acceptance rates were employers with 1,000 to 4,999 employees (72.5%), employers with 5,000 to 9,999 employees (71.6%), employers with 10,000 or more employees (65.3%), and employers with one hundred to 499 employees (64.3%). The lowest acceptance rate for non-technical graduates was experienced by employers with one to 99 employees (50.9%). Similar rates of acceptance were experienced for technical college graduates, except employers with five thousand to 9,999 employees had the highest acceptance rate (65.1%).

Changes in Numbers of Interviewing Schedules

Employers responding to this survey report a very slight decrease in numbers of interview schedules expected on college campuses (-1.1%) this year. Last year, campus interview schedules increased by 2.6%. (Pages 17-20)

Numbers of interview schedules will vary again this year according to type of organization. Surveyed employers report that the greatest increases in interview schedules can be expected from the following: educational institutions (5.1%); merchandising and retail services (3.2%); printing, publishing, and informational services (3.0%); construction and building materials manufacturers (2.8%); banking finance and insurance (1.9%); service and volunteer organizations (1.9%); and hospitals and health services (1.6%).

Moderate increases in number of campus interview schedules are expected from hotels, motels, resorts and recreational services (0.8%); communication-radio, TV, and newspapers (0.5%); agribusiness (0.5%); and accounting (0.4%).

No change in numbers of campus interview schedules is expected for research and consulting services (0.0%); and glass, paper, packaging and allied products (0.0%).

Those organizations expecting declines in numbers of interview schedules on college campuses will include food, beverage processing, and restaurants (-0.3%); tire and rubber products (-0.8%); metals and metal products (-1.2%); military services (-1.3%); aerospace and components (-2.4%); electrical machinery and equipment (-2.5%); governmental administration (-2.8%); public utilities including transportation (-3.1%); chemicals, drugs, and allied products (-3.5%); automotive and mechanical equipment (-7.4%); electronics and instruments (-9.9%); diversified conglomerates (-11.0%); and petroleum and allied products (-23.0%).

Reneging on Job Offers

According to surveyed employers, 229 (36.3%) had at least one graduating student renege on an offer of employment last year. On the other hand, 30 employers (5.5%) reneged on job offers to new college graduates last year. According to representatives of 365 organizations (62.3%), it is against their policies to renege on offers of employment to new college graduates. The largest numbers of student renegees were reported by educational institutions (278); and food, beverage processing, and restaurants (206). (Pages 26-27)

Closed Schedules Arranged by Employers

Of 577 employers responding, 226 organizations (39%) requested closed schedules when interviewing on college campuses last year. The largest percentages of employers requesting closed schedules were accounting (67%); communication-radio, TV, and newspapers (67%); petroleum and allied products (67%); agribusiness (60%); banking finance and insurance (58%); electronics and instruments (53%); merchandising and

retail services (52%); glass, paper, packaging and allied products (50%); diversified conglomerates (50%); and metals and metal products (50%). (Pages 28-30)

Continuing the list were electrical machinery and equipment (48%); chemicals, drugs, and allied products (44%); construction and building materials manufacturers (44%); research and consulting services (44%); hotels, motels, resorts and recreational services (43%); printing, publishing, and informational services (40%); public utilities including transportation (40%); food, beverage processing, and restaurants (36%); aerospace and components (33%); tire and rubber products (33%); military services (33%); automotive and mechanical equipment (30%); governmental administration (24%); educational institutions (14%); service and volunteer organizations (0%); and hospitals and health services (0%).

Employers responding to this survey indicate that approximately 2.4% more closed schedules will be requested by their organizations when interviewing on college campuses this year (1986-87).

Organizations reporting college hires from closed schedules indicate that 15.4% of their new hires came from this source last year. The highest percentages of new college graduates coming from closed schedules were experienced by agribusiness (40.8%); accounting (33.4%); metals and metal products (28.5%); merchandising and retail services (27.8%); petroleum and allied products (25.1%); communication-radio, TV, and newspapers (25.0%); banking, finance, and insurance (22.8%); and electronics and instruments (20.7%).

Percentages of less than 20% were experienced by public utilities including transportation (19.3%); electrical machinery and equipment (19.3%); construction and building materials manufacturers (16.9%); chemicals, drugs, and allied products (16.7%); hotels, motels, resorts and recreational services (16.0%); diversified conglomerates (13.1%); aerospace and components (13.0%); glass, paper, packaging and allied products (12.6%); food, beverage processing, and restaurants (12.5%); tire and rubber products (11.7%); and printing, publishing, and informational services (10.5%).

Less than 10% were obtained by automotive and mechanical equipment (8.1%); research and consulting services (7.9%); educational institutions (6.9%); military services (5.3%); governmental administration (3.4%); hospitals and health services (2.2%); and service and volunteer organizations (0.0%);

Best Sources of New College Graduates

Sources of new college graduates are often discussed with interest by prospective employers when planning new recruitment programs or revising current ones. Also, graduating students often inquire about the best avenues for getting hired by prospective employers. (Page 31)

According to surveyed employers, certain sources of new college graduates are more results-oriented than others. The most productive sources were on-campus interviewing (43.4%), write-ins (10.5%), responses from want ads (8.7%), and job listings with placement offices (7.9%).

Percentages obtained from other sources include referrals from current employees (5.7%); walk-ins (4.5%); cooperative education programs (3.8%); internship programs (3.7%); high demand major programs (3.6%); summer employment programs (3.0%); part-time employment (2.5%); minority career programs (1.8%); referrals from campus organizations (1.8%); unsolicited referrals from placement officers (1.4%); and women's career programs (0.5%).

Prescreening Services Used By Employers

Of 592 organizations responding to this question, 388 employers (65.5%) indicated that their organizations pre-screened at colleges and universities where pre-screening was permitted last year. In 1984-85, 67.6% of employers prescreened, and in 1983-84, 69.2%. These statistics indicate a slight decline in organizations prescreening on college campuses, but a high percentage (65.5%) are still using this service where it is permitted. (Page 32)

Overseas Employment Opportunities

Of 593 employers responding, 237 organizations (40.0%) had some salaried employees in overseas locations. Of these employers, 115 (48.5%) had one to 99 employees overseas; 43 (18.1%) had 100 to 499 employees overseas; 20 (8.4%) had 500 to 999 employees overseas; 26 (11.0%) had 1,000 to 4,999 employees overseas; 9 (3.8%) had 5,000 to 9,999 employees overseas; and 24 (10.1%) had more than 10,000 employees overseas. (Page 33-34)

The employer categories with the most overseas installations were chemicals, drugs, and allied products (24); electronics and instruments (24); research and consulting services (20); automotive and mechanical equipment (19); banking, finance, and insurance (16); metals and metal products (15); electrical machinery and equipment (14); and aerospace and components (14).

Continuing the list of overseas employment opportunities were construction and building materials manufacturers (11); diversified conglomerates (11); educational institutions (9); governmental administration (8); petroleum and allied products (8); food, beverage processing, and restaurants (8); accounting (8); glass, paper, packaging and allied products (4); military services (4); public utilities including transportation (3); printing, publishing, and informational services (3); service and volunteer organizations (3); communication-radio, TV, and newspapers (2); hospitals and health services (2); agribusiness (2); merchandising and retail services (2); tire and rubber products (2); and hotels, motels, resorts and recreational services (1).

Of 586 employers responding to this question, 180 organizations (30.7%) hire foreign nationals for entry level positions, and 76 employers (13.0%) hire foreign nationals in the United States for entry level positions abroad. (Page 34)

Factors Influencing Employment Goals

According to surveyed employers, factors that will have a significant influence when calculating employment goals for new college graduates will be: organizational expansion, personnel turnover, the long-run general economy, and optimism of the organization's leadership. (Pages 37-38)

Some influence is expected from the short-run general economy, salary and wage levels, age of the organization's labor force, downsizing for worker efficiency, programmed automation, mergers or acquisitions, interest rates, strength of international markets, and job reclassifications. No influence is expected from reduction in working hours.

Internships and Cooperative Education Positions

Of employers responding to this survey, the largest average numbers of internships and cooperative education positions are provided by electrical machinery and equipment (5,029); chemicals, drugs, and allied products (2,176); hospitals and health services (1,972); public utilities including transportation (1,715); educational institutions (1,642); electronics and instruments (1,042); governmental administration (951); automotive and mechanical equipment (942); aerospace and components (919); research and consulting services (905); diversified conglomerates (566); merchandising and retail services (517); petroleum and allied products (531); food, beverage processing, and restaurants (461); banking, finance, and insurance (455); accounting (438); metals and metal products (216); military services (199); construction and building materials manufacturers (196); hotels, motels, resorts and recreational services (142); tire and rubber products (122); glass, paper, packaging and allied products (122); communication-radio, TV, and newspapers (40); service and volunteer organizations (32); printing, publishing, and informational services (18); and agribusiness (6). (Pages 37-38)

A total of 21,354 internship and cooperative education positions were provided by 421 surveyed employers last year. Of these, 18,210 positions (82.3%) were paid positions with 366 organizations.

According to surveyed employers, the greatest number of internships and cooperative education positions will be provided in the northeastern region (8,749). The northcentral region is next (6,155), then the southeastern region (3,862), and the southwestern region (1,241). The fewest numbers are expected in the southcentral region (677) and the northwestern region (656).

A very slight increase (0.9%) can be anticipated in numbers of cooperative education and summer internship positions this year (1986-87). With 658 employers responding, 157 organizations (23.8%) expected increases in numbers of these positions.

Percentage of Salaried Employees with College Degrees

Among surveyed employers, 69.6% of this year's new salaried employees have college degrees. Employer categories with the highest percentages of salaried employees with college degrees are accounting (97.0%); educational institutions (86.4%); communication -radio, TV, and newspapers (85.8%); research and consulting services (75.5%); electrical machinery and equipment (72.8%); petroleum and allied products (71.8%); diversified conglomerates (71.6%); merchandising and retail services (71.3%); printing, publishing, and informational services (70.6%); and chemicals, drugs, and allied products (70.6%). (Pages 39-40)

Percentages with other employer categories include banking, finance, and insurance (66.7%); glass, paper, packaging and allied products (65.4%); electronics and instruments (65.3%); military services (65.2%); aerospace and components (64.2%); governmental administration (63.0%); tire and rubber products (62.7%); food, beverage processing, and restaurants (61.2%); construction and building materials

manufacturers (60.8%); hospitals and health services (60.7%); service and volunteer organizations (58.4%); public utilities including transportation (56.2%); metals and metal products (53.7%); automotive and mechanical equipment (53.6%); agribusiness (53.4%); and hotels, motels, resorts and recreational services (38.0%).

Within the last five years, according to surveyed employers, the percentage of salaried employees with college degrees has increased by 4.8%. In other words, more employers are expecting salaried employees to have college degrees.

The greatest increases in percentage of salaried employees with college degrees have been in service and volunteer organizations (30.2%); printing, publishing, and informational services (13.2%); food, beverage processing, and restaurants (12.1%); and banking, finance, and insurance (11.2%).

Moderate increases have been experienced by glass, paper, packaging and allied products (8.3%); merchandising and retail services (6.5%); metals and metal products (6.2%); agribusiness (6.1%); hospitals and health services (5.9%); public utilities including transportation (5.6%); diversified conglomerates (5.5%); military services (5.3%); electronics and instruments (5.2%); automotive and mechanical equipment (5.1%); construction and building materials manufacturers (4.4%); hotels, motels, resorts and recreational services (4.1%); tire and rubber products (4.1%); petroleum and allied products (3.9%); communication-radio, TV, and newspapers (3.8%); accounting (3.7%); research and consulting services (3.5%); chemicals, drugs, and allied products (1.7%); electrical machinery and equipment (1.2%); aerospace and components (1.2%); governmental administration (0.8%); and educational institutions (0.6%).

Employers Hiring Liberal Arts Graduates

Employer categories hiring the highest percentages of liberal arts graduates among new hires last year (1985-86) were military services (38.7%); communication-radio, TV, and newspapers (32.5%); educational institutions (22.7%); glass, paper, packaging and allied products (19.3%); banking, finance, and insurance (16.9%); service and volunteer organizations (16.7%); printing, publishing, and informational services (16.6%); hotels, motels, resorts and recreational services (13.2%); and governmental administration (9.9%). (Page 41)

Employers responding to this survey indicated that 12.8% of the positions available in their organizations this year could be filled by liberal arts graduates.

Employer categories indicating the highest percentages of positions that could be filled by liberal arts graduates included military services (43.0%); service and volunteer organizations (40.6%); communication-radio, TV, and newspapers (32.5%); hotels, motels, resorts and recreational services (26.4%); banking, finance and insurance (25.6%); printing, publishing, and informational services (25.3%); educational institutions (23.1%); glass, paper, packaging and allied products (22.7%); merchandising and retail services (22.6%); food, beverage processing, and restaurants (14.1%); governmental administration (13.4%); diversified conglomerates (10.4%); construction and building materials manufacturers (10.3%); agribusiness (9.5%); and metals and metal products (9.2%).

Making Liberal Arts Graduates More Marketable

According to employers in surveyed organizations, liberal arts graduates can make themselves more suitable for employment by taking more writing skills courses, presenting a professional appearance when interviewing, identifying compatible employment objectives before contacting employers, finding related work experiences, and taking more computer science courses. (Page 42)

Liberal arts majors make themselves more suitable by taking a more appropriate degree program, gaining technical expertise that prospective employers can use, taking business course (accounting, finance, management, and business administration), providing employers with references from former work experiences, taking public speaking courses, planning a broader scope of education, and getting an advanced degree in an applied field. Seldom helpful to liberal arts graduates are additional travel experiences.

Training Programs Offered

When training new college graduates recently hired by their organizations, surveyed employers "almost always" use on-the-job training, orientation programs, and training within the organization. (Pages 43-44)

"Sometimes" used are seminars by the organization's personnel, seminars by outside consultants, rotational assignments, written format materials, and campus classes.

"Seldom" or "never" used are moves of new personnel to more than one city.

On the average, surveyed employers will give new college hires approximately 7.0 hours of training (excluding on-the-job training) each week during the first year of employment. The most hours of training are given by military services (19.1 hours); service and volunteer organizations (14.8 hours); glass, paper, packaging and allied products (12.1 hours); and banking finance and insurance (11.2 hours).

The list continues with hospitals and health services (9.6 hours); governmental administration (9.2 hours); aerospace and components (9.2 hours); automotive and mechanical equipment (8.9 hours); printing, publishing, and informational services (8.5 hours); hotels, motels, resorts, and recreational services (8.3 hours); electrical machinery and equipment (8.1 hours); construction and building materials manufacturers (7.9 hours); food, beverage processing, and restaurants (7.7 hours); electronics and instruments (7.3 hours); merchandising and retail services (6.9 hours); metals and metal products (6.7 hours); public utilities including transportation (6.6 hours); accounting (6.5 hours); research and consulting services (6.2 hours); agribusiness (5.9 hours); and communication-radio, TV, and newspapers (5.6 hours).

The fewest hours of training are given by diversified conglomerates (4.1 hours); chemicals, drugs, and allied products (3.1 hours); educational institutions (3.0 hours); petroleum and allied products (3.0 hours); and tire and rubber products (1.7 hours).

Cost of Training New College Hires

According to surveyed employers, the average cost of training each new college graduate is approximately \$7,036 during the first year on the job. (Page 45)

The categories of employers with the highest costs of training were military services (\$26,000); banking, finance, and insurance (\$16,633); aerospace and components (\$13,581); service and volunteer organizations (\$13,039); governmental administration (\$12,962); electrical machinery and equipment (\$12,820); glass, paper, packaging and allied products (\$12,217); agribusiness (\$10,321); and automotive and mechanical equipment (\$9,450).

The employer categories with the lowest costs of training were food, beverage processing, and restaurants (\$7,290); public utilities including transportation (\$7,278); hotels, motels, resorts and recreational services (\$6,917); merchandising and retail services (\$6,533); construction and building materials manufacturers (\$5,614); electronics and instruments (\$5,018); petroleum and allied products (\$5,000); chemicals, drugs, and allied products (\$4,478); research and consulting services (\$4,241); hospitals and health services (\$3,550); printing, publishing, and informational services (\$2,917); metals and metal products (\$2,663); accounting (\$2,588); diversified conglomerates (\$2,514); communication-radio, TV, and newspapers (\$2,050); educational institutions (\$1,430); and tire and rubber products (\$500).

The cost of training is different for various regions of the country, according to surveyed employers. The estimated average costs per new hire by region are: southcentral (\$10,062), southeastern (\$6,702), southwestern (\$6,440), northcentral (\$6,356), northeastern (\$5,380), and northwestern (\$3,328).

Percentage of Tuition Costs Paid by New Employers

On the average, approximately 52.7% of tuition incurred for graduate studies by new college hires is paid by surveyed organizations. (Page 46)

Employer categories paying the highest percentages of costs incurred for graduate studies are tire and rubber products (87.5%); electronics and instruments (87.2%); chemicals, drugs, and allied products (86.3%); aerospace and components (83.6%); diversified conglomerates (77.3%); petroleum and allied products (75.8%); electrical machinery and equipment (75.2%); automotive and mechanical equipment (73.0%); metals and metal products (72.2%); construction and building materials manufacturers (71.9%); public utilities including transportation (70.4%); and glass, paper, packaging and allied products (70.0%).

Less than 70% of tuition is paid by printing, publishing, and informational services (69.4%); research and consulting services (62.6%); banking, finance, and insurance (58.8%); food, beverage processing, and restaurants (46.5%); military services (44.4%); merchandising and retail services (35.5%); agribusiness (32.7%); governmental administration (31.2%); hospitals and health services (29.8%); service and volunteer organizations (26.1%); accounting (24.8%); hotels, motels, resorts and recreational services (13.7%); educational institutions (12.3%); and communication-radio, TV, and newspapers (11.3%).

Employers with one to 99 employees are likely to pay the lowest percentage of tuition costs (27.9%), while most other sizes of employers will pay between 50.4% and 70.3% of tuition costs. The largest organizations, those with 10,000 or more employees, pay the highest percentage of tuition costs (70.3%).

Percentage of New Hires Attending Graduate School

Among surveyed employers, approximately 10.4% of last year's new college hires were attending a college or university for an advanced degree this year while still working for the organization. (Page 47)

Those employer categories with the highest percentages attending graduate school included military services (20.9%); educational institutions (19.8%); tire and rubber products (13.6%); research and consulting services (13.5%); electronics and instruments (12.4%); electrical machinery and equipment (12.2%); printing, publishing, and informational services (12.2%); diversified conglomerates (10.8%); chemicals, drugs, and allied products (10.7%); and construction and building materials manufacturers (9.8%).

Those employer categories with fewer than 9% attending a college or university for an advanced degree were banking, finance, and insurance (8.8%); metals and metal products (8.3%); petroleum and allied products (8.1%); public utilities including transportation (8.1%); governmental administration (7.9%); aerospace and components (7.8%); automotive and mechanical equipment (6.5%); food, beverage processing, and restaurants (4.8%); accounting (4.1%); hospitals and health services (3.8%); communication-radio, TV, and newspapers (3.8%); merchandising and retail services (2.1%); service and volunteer organizations (1.5%); glass, paper, packaging and allied products (1.5%); hotels, motels, resorts, and recreational services (1.0%); and agribusiness (0.7%).

Grade Point Averages as a Predictor of Job Success

According to surveyed employers, grade point averages are "sometimes" predictive of future job success. When considering specific elements of job success, the only factor that "almost always" relates to high grade point average, according to surveyed employers, is analytical thinking. (Pages 48-49)

The following factors "sometimes" relate to high grade point average: solving complex problems, utilization of quantitative tools, being hardworking, application of knowledge, writing ability, coping with complex issues, ability to organize tasks productively, evaluation of alternatives, conveying meaning, originality, greater leadership, organizing and supervising others, and functioning as a member of a team. "Seldom" relating to high grade point average is social skills, and this is the most important element of success in many jobs, according to several surveyed employers.

Turnover Among New College Hires

Surveyed employers who hire technical graduates report that approximately 3.4% leave the first year, 3.8% the second, 4.9% the third, 4.1% the fourth and 4.3% the fifth year. After five years, a total of 20.7% of the technical graduates have left these employers. (Pages 51-53)

Non-technical graduates are leaving surveyed employers at the rate of 4.3% the first year, 4.6% the second, 5.1% the third, 4.2% the fourth and 4.3% the fifth year. After five years, a total of 22.8% of non-technical graduates have left these employers.

Drug Screening

According to employers responding to this survey, drug screening, in their opinion, is ethical. Of those responding, 45% said "always" or "almost always" and 41% said "sometimes." (Pages 54-57)

Drug screening of new college graduates is used by 20% of the employers responding to this survey. Of these employers, 95% will reject individuals from employment, if evidence of drug use is found in a job applicant.

Of all employers responding to the survey, 66% reject candidates who have a previous record of drug use. Of the employers who screen for drug use, 68% reject candidates who have a previous record of drug use.

Current employees are screened for drug use in 14% of the surveyed organizations. In the organizations that screen new college graduates for drugs, 42% screen current employees for drugs. According to comments from surveyed employers, drug use is especially prohibited while working with children or with volatile substances, and if drug use impairs an individual's work performance, that employee will be discharged.

When surveyed organizations find current employees who are using drugs, 60% will terminate these employees. In organizations that screen new college graduates for drugs, 66% will terminate a current employee who is using drugs.

Rehabilitation is required by 89% of all surveyed employers who find current employees who are using drugs. In organizations that screen new college graduates for drugs, 95% require rehabilitation for current employees who are using drugs.

According to one employer who screens applicants for drug use, the organization will retest individuals after six months and reconsider an application if desired by the applicant.

Among employers who screen job applicants for drug use, the following substances are "sometimes" checked: marijuana, hashish, cocaine, opiates, amphetamines, psychedelic drugs, barbituates, and tranquilizers. "Seldom" screened are volatile substances and alcohol.

Among employers who screen for drug use, the methods most often used are urine tests, physical examinations, medical history questionnaires, and interviews with the organization's nurses or doctors. Used less often are blood tests, written honesty tests, breathalyzer tests, and polygraph tests.

Of the organizations that do not screen job applicants for drug use, 10% expect to begin testing sometime in the next year, 10% more in the next two years, 2% more in the next five years, 43% at sometime in the future, and 36% never expect to test job applicants for drug use.

Factors Considered When Hiring New College Graduates

According to employers who responded to this survey, the following education factors, in order of importance, are considered when screening new college graduates for employment: academic major, degree levels attained, years of education achieved, major grade point average, overall grade point average, transcript information, part-time employment experiences, internship experiences, willingness to continue education, co-operative education assignments, and minor grade point average. Foreign language skills received a rating of "some" importance from only 24% of the surveyed employers. (Pages 57-62)

The following physical and mental health factors, in order of importance, are considered when screening new college graduates: mental stability, physical ability to do the job, physical fitness, excellent health status, physical examination results, and medical history.

Job skill factors, in order of importance, that are "always" or "almost always" considered when screening new college graduates for employment are: ability to get things done, communication abilities, ability to accept responsibility, common sense, interpersonal communication skills, speaking abilities, writing skills, decision-making abilities, motivational abilities, innovative ideas, ability to be an example to others, team management skills, and the ability to go along with the organization.

"Sometimes" important are competitive abilities, the ability to delegate, campus leadership experiences, tactical and strategic planning abilities, the ability to work in close quarters, and budgeting abilities. No job skills received overall ratings of "seldom" or "never" important.

Personality factors, in order of importance, that are "almost always" or "always" important when considering new college graduates for employment are: dependability, maturity, self-confidence/poise, flexibility, self-pride, diplomacy/tactfulness, ambition, perseverance, neatness, staying power, and stability. Receiving a rating of "sometimes" important was entrepreneurial spirit.

No personality factors received an overall rating of "seldom" or "never" being important to surveyed employers.

Personal life factors, in order of importance, that are "almost always" or "sometimes" important when considering new college graduates for employment are: suitable appearance, willingness to relocate, no criminal record, and an individual's prior knowledge of the organization.

Receiving ratings of "seldom" or "never" important to surveyed employers are memberships in organizations (campus and community), an interest in current events, attractiveness, an interest in family matters, youthfulness, passing a credit check, a compatible spouse, overseas employment experiences, overseas travel experiences, ethnic origin of the candidate, marital status of the candidate, and gender of the applicant.

Surveyed employers report that ability/aptitude tests are "seldom" used by their organizations when considering new college graduates for employment, and the following are generally "never" used: polygraph tests, I.Q. tests, and written honesty tests.

Smoking Policies of Surveyed Employers

Surveyed employers will "always" or "almost always" hire new college graduates who admit to smoking cigarettes, cigars, or a pipe as a regular habit on the job (81%), but 2% of the respondents will "seldom" hire such individuals, and 5% of the organizations will "never" hire these people. (Pages 62-63)

Of the 702 surveyed employers who responded, 486 (69.2%) do not have a "no smoking" policy for workers, but another 216 (30.8%) of the organizations have established policies regarding smoking in the working environment. As one employer commented, some laboratory situations and field work in remote locations, especially forests, may require no smoking by employees.

Surveyed employers generally permit smoking in public areas (75.0%), but smoking is not permitted in public areas by 25.0% of the employers responding to this survey.

Many of the surveyed employers (41.5%) offer "Quit Smoking" programs to their current employees. At the present time, 58.5% of the employers do not.

Reasons for New Hires Leaving Organizations

Most often used as reasons by new college graduates leaving organizations, in order of frequency, are: a better job offer, better job location, dissatisfaction with the organization, the job transfer of a spouse/partner, promotions did not meet expectations, salary did not meet expectations, dissatisfaction with the career field, or job expectations were not met. "Seldom" used are marriage, pregnancy, and the inability to conform to the organization's expectations. (Pages 64-65)

Used most often by surveyed employers as reasons for terminating employment of new college graduates were the following, in order of frequency: poor job performance, inability to conform to the organization's policies, absenteeism, pilferage, tardiness, lack of leadership skills, drug abuse, and too much consumption of alcohol.

Importance of Prior Work Experiences for New College Graduates

In order of importance, according to surveyed employers, the following career related work experiences have "high" consideration when screening new college graduates for employment: internships. Receiving a rating of "medium" importance were cooperative education assignments, summer employment, and part-time career related employment. (Page 66)

For other work experiences that may not be career related, ratings of "medium" importance were received by internships, summer employment, cooperative education, and part-time employment.

All career related work experiences received higher ratings than other work experiences that are not career related.

Handicapper Hiring Experiences

According to surveyed employers, the following percentages of positions available for new college graduates could be filled by handicapped persons: paraplegic - 20.8%, deaf - 11.5%, mute - 8.0%, blind - 6.0%, and quadriplegic - 5.2%. (Pages 67-68)

These employers indicate that hiring a handicapper would "sometimes" create additional expenses for an organization. Of the employers responding, 62% reported that hiring a handicapper would create additional expenses for their organizations. From the perception of surveyed employers, handicappers are "seldom" or "never" less productive than their able-bodied counterparts (76%).

Approximately 3.0% of salaried employees in surveyed organizations are handicappers. Those employer categories with the highest percentages of handicappers are governmental administration (6.2%); tire and rubber products (5.5%); chemicals, drugs, and allied products (5.0%); communication - radio, TV, and newspapers (5.0%); electrical machinery and equipment (4.7%); hospitals and health services (4.1%); automotive and mechanical equipment (4.0%); diversified conglomerates (3.7%); petroleum and allied products (3.5%); aerospace and components (3.3%); printing, publishing, and informational services (3.2%); research and consulting services (3.1%); and glass, paper, packaging and allied products (3.0%).

Completing the list were service and volunteer organizations (2.9%); merchandising and retail services (2.9%); public utilities including transportation (2.8%); electronics and instruments (2.8%); educational institutions (2.8%); metals and metal products (2.4%); construction and building materials manufacturers (2.1%); military services (1.8%); hotels, motels, resorts and recreational services (1.6%); food, beverage processing, and restaurants (1.6%); agribusiness (1.6%); banking, finance, and insurance (1.2%); and accounting (1.0%)

Factors Considered When Choosing Between Job Offers

When choosing among several job offers, graduating students consider the following factors most important, according to surveyed employers: challenging work assignments, reputation of the organization, opportunities for advancement, a competitive salary, full utilization of the graduate's skills, job security, personalities and abilities of supervisors and bosses, geographical location of the job, status and prestige of the job, and decision-making responsibilities of the job. (Pages 69-70)

Of medium importance to graduating students are adequate benefits and health insurance, personalities and abilities of other employees, information gleaned from talking to people who held or are in the position, payment for advanced degree courses, availability of a graduate school nearby, the services and products produced by the organization, adequate dental insurance, dependent health insurance, number of relocations required by the job, size of organization, physical facilities of the organization, problems within the organization, ability to design own work program, organizational structure, an adequate retirement plan, adequate life insurance, benefits of the investment profit-sharing program, and maternity/paternity leaves policies.

Job Search Assistance for Spouses

Approximately 5.6% of the new college graduates hired last year by surveyed employers were married and seeking job search assistance for spouses. (Page 71)

Employer categories with the highest percentages of new graduates seeking assistance for their spouses were glass, paper, packaging and allied products (14.0%); food, beverage processing, and restaurants (10.5%); educational institutions (9.1%); electrical machinery and equipment (6.7%); governmental administration (6.7%); aerospace and components (6.4%); electronics and instruments (6.3%); chemicals, drugs, and allied products (6.2%); research and consulting services (5.7%); military services (5.3%); metals and metal products (5.1%); hospitals and health services (4.8%); and merchandising and retail services (4.1%).

Transfers Required of New Employees

Employers expecting the largest numbers of new college graduates transferring to new locations within their organizations during the first year of employment were food, beverage processing, and restaurants (1.69); agribusiness (1.11); merchandising and retail services (0.97); metals and metal products (0.76); glass, paper, packaging and allied products (0.75); diversified conglomerates (0.73); governmental administration (0.71); automotive and mechanical equipment (0.69); public utilities including transportation (0.68); military services (0.67); hotels, motels, resorts and recreational services (0.67); petroleum and allied products (0.64); printing, publishing, and informational services (0.57); aerospace and components (0.56); banking, finance, and insurance (0.52); research and consulting services (0.51); and construction and building materials manufacturers (0.5). (Page 72)

Employers expecting the fewest numbers of transfers included chemicals, drugs, and allied products (0.43); hospitals and health services (0.41); electrical machinery and equipment (0.41); tire and rubber products (0.33); electronics and instruments (0.32); educational institutions (0.26); accounting (0.04); and communication-radio, TV, and newspapers (0.0).

Alternative Work Options for Employees

Among surveyed employers, the following alternative work options are "sometimes" available to employees: extended maternity/paternity leaves and educational leaves. (Page 73)

"Seldom" available are flextime, part-time professional development, leaves for extended community volunteer activities. Almost "never" available among most surveyed employers is the work-at-home option, although 49 of 658 employers indicated that their organizations offer this option.

Job Sharing

Surveyed employers reported that approximately 0.6% of their salaried employees (excluding clerical staff) were in job sharing positions. (Page 74)

Employer categories with the highest percentages of job sharing employees were service and volunteer organizations (2.89%); hospitals and health services (2.28%); educational institutions (1.44%); electrical machinery and equipment (0.79%); food, beverage processing, and restaurants (0.77%); agribusiness (0.63%); and governmental administration (0.5%).

Toxic Chemicals and Other Health Hazards

In the opinions of surveyed employers, medical insurance is the toxic chemical and other health related topic that has "high" importance for new college graduates. Over 61% of the employers responding to this survey thought medical insurance was either "extremely high" or "high" in importance to graduating students. (Page 75)

Of "medium" importance to graduating students are safety checks, education on toxic substances, the organization's location relative to toxic chemical and potential radiation hazards, the organization's policies on toxic substances, radiation monitoring, hazardous duty benefits, and high risk pay.

Recommendations for Improved Placement Services

What can colleges and universities do to improve their services to employers seeking new college graduates? When making recommendations, employers submitted the following: (Pages 76-78)

- * Standardized Interview Data Sheets- To improve employer efficiency and reduce errors caused by the multitude of forms which employers must complete, one form could be used.
- * Standardized Resume Formats- Contrary to the popular myth perpetrated by well meaning but misinformed counselors and guidance professionals, highly individualized or stylized resumes tend to receive less attention. Standardization will be dictated by computer generated profiles.
- * Improved Communication- Between employers, graduating students, faculty, and placement personnel, lines of communication should be two-way and maintained at their maximum potential. Better advertising of employer visits, calendars of campus events, faculty and staff contact lists, and "open houses" were suggested.
- * Better Career Counseling- Colleges and universities should provide all students with the best and most complete information possible about employment prospects and the outlook for their chosen career fields. Especially for liberal arts graduates, early thinking about possible careers, taking relevant courses, and getting career related work experiences might help with placement.
- * Better Preparation For Interviewing- Organization and preparation for arrival of prospective employers on campus would help significantly. Also, graduating students should be properly prepared for interviewing by reading employer literature and by attending personal counseling sessions.
- * A List Of Successful Prerecruitment Activities- A compendium of successful prerecruitment activities with recommendations regarding facilities, time-frames, etc. would be helpful.
- * More Real World Experiences- New college graduates are often very unrealistic about entry level salaries and job expectations. Classroom lectures, if permitted, by recruiters might help alleviate this situation. More information about the actual number of hours a graduate is expected to work -- versus the conventional 40-hour work week -- might be helpful too.
- * Better Prescreening Services- Publications with numbers of graduates, names, and mini-profiles for each academic major and degree level could be issued.

Which category best describes your organization, and how many SALARIED employees (excluding clerical staff) are on the payroll of your organization? Absolute frequencies are listed for each answer on the first line, percentages of totals on the second line, percentages of rows on the third line, and column percentages on the fourth line of each block.

Employer Categories

FREQUENCY PERCENT ROW PCT COL PCT	Number of Salaried Employees						TOTAL

Observations: Responses to the 1986-87 Recruiting Trends survey were received from 761 employers representing businesses, industries, governmental agencies, and educational institutions. Organizations with 10,000 or more employees represent 11.4% of the respondents; those with five to ten thousand employees were 9.1% of the respondents; and organizations with a thousand to five thousand employees represent 28.3% of the respondents. Organizations with five hundred to a thousand employees were represented by 13.0% of the respondents, those with one hundred to four hundred ninety-nine employees by 24.4% of the respondents, and those with one to ninety-nine employees by 13.8% of the respondents.

These numbers display the diversity of employers included in this survey.

Which category best describes your organization, and how many SALARIED employees (excluding clerical staff) are on the payroll of your organization? Absolute frequencies are listed for each answer on the first line, percentages of totals on the second line, percentages on the third line, and column percentages on the fourth line of each block.

OVERALL TOTAL	737	1.6	738	1.5

Observations: Since hiring intentions of prospective employers might be influenced by changes in numbers of salaried employees working for their organizations last year, employers were surveyed on this question. Employers responding to this year's survey reported a net increase of 1.6% in numbers of salaried employees working for their organizations last year. This compares to an increase of 1.7% experienced in 1984-85, 1.5% in 1983-84, and 1.4% during 1982-83. During the last three years, surveyed employers have increased the numbers of salaried employees working for their organizations only slightly.

Last year, some organizations gained significant numbers of employees while others lost. Those organizations with increases in salaried employees included service and volunteer organizations (9.2%); food, beverage processing, and restaurants (7.4%); accounting (7.1%); research and consulting services (5.7%); electrical machinery and equipment (4.2%); banking, finance, and insurance (3.7%); printing, publishing, and informational services (3.0%); merchandising and retail services (2.6%); construction and building materials manufacturers (2.3%); and communication-radio, TV, and newspapers (2.0%).

Moderate increases in salaried employees were anticipated in agribusiness (1.8%); electronics and instruments (1.7%); educational institutions (1.4%); automotive and mechanical equipment (1.2%);

aerospace and components (1.1%); hospitals and health services (1.0%); military services (0.3%); governmental administration (0.3%); and glass, paper, packaging and allied products (0.2%).

Those expecting no increases or even declines in salaried employees were chemicals, drugs, and allied products (0.0%); public utilities including transportation (-0.2%); hotels, motels, resorts and recreational services (-0.3%); metals and metal products (-3.2%); petroleum and allied products (-9.6%); diversified conglomerates (-12.0%); and tire and rubber products (-13.0%).

This year (1986-87), salaried employees on payrolls of surveyed employees are expected to increase at the rate of 1.5%, on the average but changes in salaried employees will vary significantly from employer to employer.

Anticipating the greatest increases in salaried employees were research and consulting services (5.7%); accounting (5.5%); food, beverage processing, and restaurants (4.5%); banking, finance, and insurance (4.2%); glass, paper, packaging and allied products (4.1%); service and volunteer organizations (3.2%); communication- radio, TV, and newspapers (2.9%); and merchandising and retail services (2.6%).

Moderate increases were experienced by the following organizations: governmental administration (1.6%); hotels, motels, resorts and recreational services (1.5%); educational institutions (1.0%); electronics and instruments (0.9%); electrical machinery and equipment (0.8%); military services (0.7%); hospitals and health services (0.6%); automotive and mechanical equipment (0.5%); construction and building materials manufacturers (0.5%); printing, publishing, and informational services (0.4%); and public utilities including transportation (0.1%); .

Decreases in salaried employees occurred in aerospace and components (-0.2%); tire and rubber products (-0.4%); chemicals, drugs, and allied products (-0.6%); diversified conglomerates (-0.9%); agribusiness (-0.9%); petroleum and allied products (-1.1%); and metals and metal products (-1.6%).

If the recent history of anticipated changes and actual changes are any indication, even an expected decrease of 2.4% might be optimistic. During the last four years, the following employer responses were received:

<u>Year</u>	<u>Percent Change Expected</u>	<u>Actual Percent Change</u>
1983-84	2.3%	1.5%
1984-85	3.5%	1.7%
1985-86	2.8%	1.6%
1986-87	-2.4%	

From these data, it is evident that employers have provided optimistic predictions when reporting hiring goals, so a decrease of more than 2.4% might be expected, at best, if employers are predicting a 2.4% decrease.

In the LAST YEAR (1985-86), what change occurred in the number of SALARIED employees working for your organization, and THIS YEAR (1986-87), what change do you anticipate in the number of SALARIED employees working for your organization? Responses are listed by EMPLOYER SIZE.

.....EMPLOYER SIZES	CHANGE LAST YEAR		CHANGE THIS YEAR	
	N	MEAN	N	MEAN
1-99	102	3.2	104	2.9
100-499	181	1.9	183	1.9
500-999	97	3.4	97	1.5
1000-4999	206	1.9	204	1.8
5000-9999	68	-2.9	67	0.6
10,000+	83	-0.6	83	-0.8
OVERALL TOTAL	737	1.6	738	1.5

Observations: Last year, according to surveyed employers, certain sizes of organizations experienced decreases in numbers of salaried employees while others experienced increases. The greatest increases were experienced by organizations with five hundred to 999 employees (3.4%), one to 99 employees (3.2%), one thousand to 4,999 employees (1.9%), and one hundred to 499 employees (1.9%).

Decreases were experienced by organizations with five thousand to 9,999 employees (-2.9%) and

those organizations with more than 10,000 employees (-0.6%).

This year, increases are expected in numbers of salaried employees working for organizations with one to 99 employees (2.9%), one hundred to 499 employees (1.9%), one thousand to 4,999 employees (1.8%), five hundred to 999 employees (1.5%), and 5,000 to 9,999 employees (0.6%).

Some other organizations with 10,000 or more employees will be expecting further decreases in number of employees (-0.8%).

How many new college graduates were hired by your organization last year (1985-1986), and how many do you expect to hire this year (1986-1987)? Responses are listed by EMPLOYER CATEGORY.

EMPLOYER CATEGORIES	NUMBER OF NEW HIRES LAST YEAR		ANTICIPATED NEW HIRES THIS YEAR		% CHANGE FROM LAST YEAR
	NUMBER OF EMPLOYER	TOTAL NUMBER	NUMBER OF EMPLOYER	TOTAL NUMBER	
TOTAL NUMBER OF NEW HIRES	647	61651	634	58942	-2.4

Observations: Last year, 642 employers responding to this survey hired a total of 61,651 new college graduates. This compares to 593 employers who hired 66,012 new graduates in 1984-85, and 499 employers who hired 60,076 new graduates in 1983-84.

No new college graduates were hired during 1985-86 by 96 of 761 employers responding to this year's survey. This compares to 69 of 710 organizations in 1984-85, and 80 of 658 organizations in 1983-84.

This year (1986-87), quotas for hiring new college graduates among 634 organizations who expected to hire totaled 58,942. This compares to an anticipated goal of 67,347 in 1985-86 for 619 of 710 organizations and 66,500 in 1984-85 for 514 of 658 organizations.

This year, 103 of 761 organizations do not expect to hire new graduates, compared to 72 in 1985-86 and 69 in 1984-85 who indicated no new college graduate quotas.

How many new college graduates were hired by your organization last year (1985-86), and how many do you expect to hire this year (1986-87) for professional positions? Responses are listed by EMPLOYER SIZE.

EMPLOYER SIZES	NUMBER OF NEW HIRES LAST YEAR		ANTICIPATED NEW HIRES THIS YEAR		% CHANGE FRDM LAST YEAR
	NUMBER OF EMPLOYER	TOTAL NUMBER	NUMBER OF EMPLOYER	TOTAL NUMBER	
1-99	62	383	64	406	2.7
100-499	151	2101	145	2063	2.3

TOTAL NUMBER OF NEW HIRES	647	61651	634	58942	-2.4

Observations: Quotas for large employers are lower, while quotas for smaller organizations are higher, according to surveyed employers. Size of organizations with increases include employers with 500 to 999 employees (6.7%); one thousand to 4,999 employees (5.4%); employers with one to 99 employees (2.7%); and employers with one hundred to 499 employees (2.3%).

Decreases in quotas for this year versus last year were experienced by organizations with 5,000 to 9,999 employees (-1.5%); and 10,000 or more employees (-9.3%).

How many new college graduates were hired by your organization last year (1985-86), and how many do you expect to hire this year (1986-87) for professional positions? Responses are listed by GEOGRAPHICAL REGION.

	NUMBER OF NEW HIRES LAST YEAR		ANTICIPATED NEW HIRES THIS YEAR		% CHANGE FROM LAST YEAR MEAN
	NUMBER OF EMPLOYER	TOTAL NUMBER	NUMBER OF EMPLOYER	TOTAL NUMBER	
GEOGRAPHICAL REGIONS					
NORTHEAST	135	15182	132	16203	9.2
SOUTHEAST	73	7795	74	8441	6.8
NORTHCENTRAL	309	20170	303	19033	-3.8
SOUTHCENTRAL	49	7070	46	6081	-8.4
NORTHWEST	31	2512	30	1707	-29.8
SOUTHWEST	50	8922	49	7477	-14.5
TOTAL NUMBER OF NEW HIRES	647	61651	634	58942	-2.4

Observations: Last year, the geographical regions with the most hires were the northcentral region (20,170) and the northeastern region (15,182). Hires in the other regions ranked as follows: southwestern region (8,922), southeastern region (7,795), southcentral region (7,070), and the northwestern region (2,512).

This year, the greatest numbers of new hires will remain in the northcentral region (19,033) and the northeastern region (16,203). These will be followed by the southeastern region (8,441), southwestern region (7,477), the southcentral region (6,081), and northwestern region (1,707).

Expected to increase the most in hiring quotas will be the northeastern region (9.2%) and the southeastern region (6.8%). All other regions of the country are expecting hiring quotas to decrease: northwestern region (-29.8%), southwestern region (-14.5%), southcentral region (-8.4%), and the northcentral region (-3.8%).

For 1985-86, what percent of your offers of employment to new college graduates were accepted? Responses are listed for both TECHNICAL and NON-TECHNICAL college graduates.

EMPLOYER CATEGORIES	TECHNICAL COLLEGE GRADUATES			NON-TECHNICAL COLLEGE GRADUATES

(Continued)

Continued . . .

Observations: Although one excellent measure of past job market trends is the number of new college graduates hired by surveyed employers, another is the percentage of job offers accepted. Of offers made to technical college graduates during 1985-86, 61.2% were accepted with surveyed employers. This compares to an acceptance rate of 59.7% in 1984-85, 59.0% in 1983-84, and 60.1% in 1982-83. An increase in acceptance rate suggests a worsening of the job market for technical graduates.

Offers of employment to non-technical college graduates were accepted at the rate of 68.3% during 1985-86, according to surveyed employers. This compares to an acceptance rate of 68.2% during 1984-85, 68.5% in 1983-84, and 65.3% in 1982-83. This increase in acceptance rate during the last four years suggests a continuing erosion in the job market for non-technical graduates during this time.

JOB OFFERS ACCEPTED

For 1985-86, what percent of your offers of employment to new college graduates were accepted? Responses are listed by EMPLOYER TYPE.

EMPLOYER TYPES	TECHNICAL COLLEGE GRADUATES			NON-TECHNICAL COLLEGE GRADUATES		
	NUMBER OF EMPLOYER	TOTAL %	MEAN	NUMBER OF EMPLOYER	TOTAL %	MEAN
INDUSTRY & MANUFACTURER	247	16514	66.56	202	13542	67.04
BUSINESS & SERVICE	130	6904	53.11	167	10468	62.68
GOVERNMENT	17	1070	62.94	17	1348	79.29
EDUCATION	48	2646	55.13	85	6844	80.52
CONGLOMERATES	12	671	55.92	11	716	65.09
TOTAL	454	27805	61.24	482	32918	68.29

Observations: The highest acceptance rates for offers of employment to non-technical graduates were received by educational institutions (80.5%) and government agencies (79.3%). Those employer types receiving lower acceptance rates were industrial and manufacturing organizations (67.0%), conglomerates (65.1%), and business and service organizations (62.7%). Similar acceptance rates were experienced by these organization types for technical graduates.

Responses are listed by EMPLOYER SIZE.

EMPLOYER SIZES	TECHNICAL COLLEGE GRADUATES			NON-TECHNICAL COLLEGE GRADUATES		
	NUMBER OF EMPLOYER	TOTAL %	MEAN	NUMBER OF EMPLOYER	TOTAL %	MEAN
1-99	40	2292	57.30	44	2238	50.86
100-499	106	6839	64.52	107	6880	64.30
500-999	60	3747	62.45	64	4944	77.25
1000-4999	142	8234	57.99	153	11094	72.51
5000-9999	47	3061	65.13	51	3651	71.59
10,000+	59	3632	61.56	63	4111	65.25
TOTAL	454	27805	61.24	482	32918	68.29

Observations: For non-technical college graduates, the highest acceptance rates were received by organizations with five hundred to 999 employees (77.3%). In the middle range of acceptance rates were employers with 1,000 to 4,999 employees (72.5%), employers with 5,000 to 9,999 employees (71.6%), employers with 10,000 or more employees (65.3%), and employers with one hundred to 499 employees (64.3%). The lowest acceptance rate for non-technical graduates was experienced by employers with one to 99 employees (50.9%). Similar, but higher, rates of acceptance were experienced for technical college graduates.

This year (1986-87), what changes does your organization anticipate in the hiring of new college graduates? Responses are listed by TYPE OF GRADUATES.

..... TYPES OF GRADUATES	TOTAL	
	N	MEAN
BACHELORS GRADUATES	523	-0.5
WOMEN GRADUATES	537	2.5
MINORITY GRADUATES	527	4.0
HANDICAPPER GRADUATES	426	0.1
MASTER GRADUATES	385	0.2
MBA GRADUATES	309	-0.2
DOCTORAL GRADUATES	237	-0.1

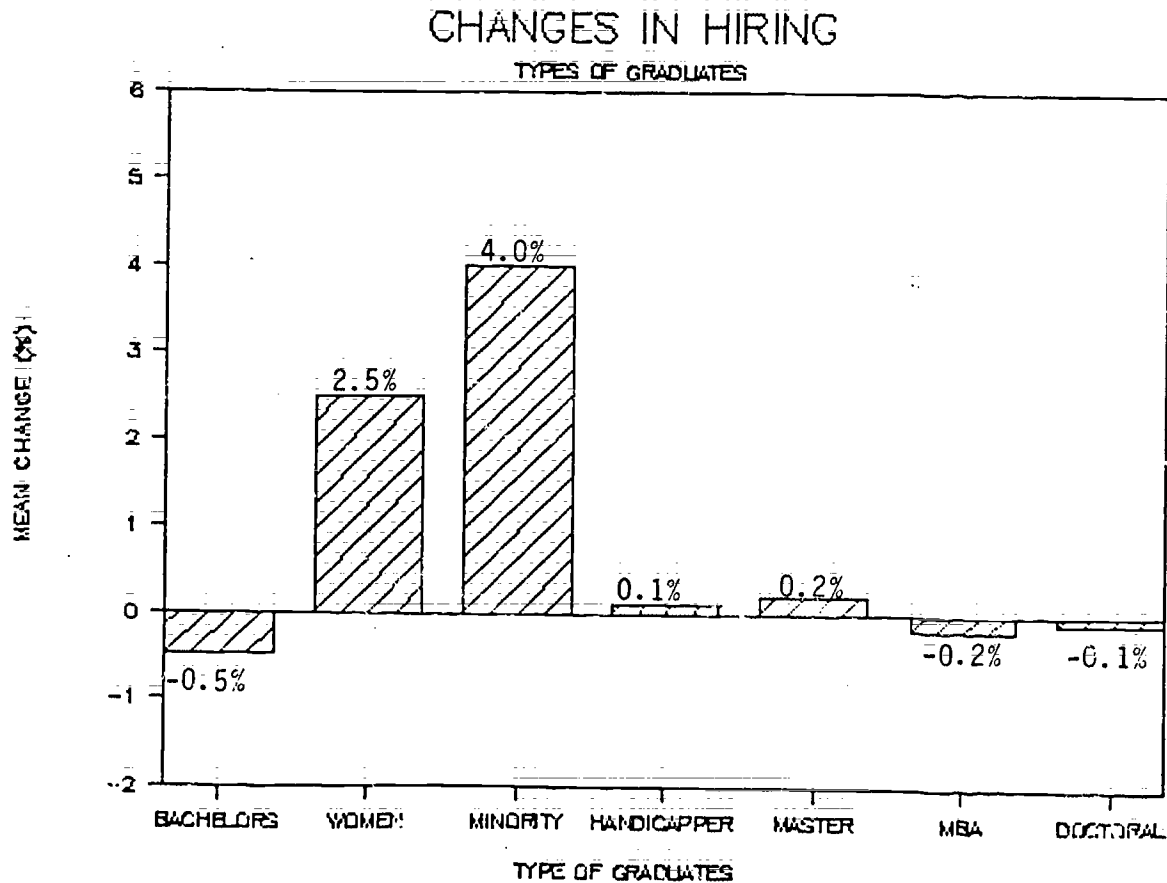

Observations: During the 1986-87 recruiting season, surveyed employers expect to hire about 0.5% fewer bachelor's degree graduates than they hired during 1985-86. This compares to an expected increase of 1.4% in 1985-86, 9.2% in 1984-85, and 5.0% in 1983-84. From these data, surveyed employers are anticipating only a slight decrease from last year's job market for new college graduates.

For minorities, quotas are expected to increase 4.0% above last year's quotas. These targets compare to an expected increase of 6.5% for 1985-86 and 10.2% in 1984-85.

For women graduates, quotas are 2.5% higher than last year. This compares to an increase of 4.7% in 1985-86 and 7.7% in 1984-85.

Master graduates quota were expected to increase only slightly for 1986-87 (0.2%). MBA and doctoral candidate quotas were expected to decrease only slightly for 1986-87: -0.2% and -0.1%, respectively.

For handicapper graduates, not much change in quotas is expected (0.1%).

This year (1986-87), what changes does your organization anticipate in the hiring of new college graduates? Responses are listed for each ACADEMIC MAJOR at the bachelor's degree level.

	TOTAL	
	N	MEAN

SOCIAL SCIENCES	147	0.0

Observations: Although surveyed employers expect to hire about 0.5% fewer bachelor's degree graduates this year (1986-87), demand for individual academic majors will vary significantly.

The greatest increases in demand will be experienced by majors in hotel, restaurant, and institutional management (2.9%); marketing/sales (2.1%); education (1.7%); electrical engineers (1.2%); retailing (0.9%); computer science (0.9%); accounting (0.8%); financial administration (0.8%); chemical engineers (0.7%); mathematics (0.7%); chemistry (0.6%); and telecommunication (0.6%).

Only slight increases in demand are expected for general business administration (0.4%); natural resources (0.3%); liberal arts/arts and letters (0.2%); communications (0.1%); industrial engineering (0.1%); and journalism (0.1%).

No change in the job market is expected for majors in personnel administration (0.0%) and social science (0.0%).

Decreases in demand are expected for majors in civil engineering (-0.1%); human ecology/home economics (-0.1%); agriculture (-0.1%); mechanical engineers (-0.3%); metallurgy materials science (-0.5%); physics (-1.0%); geology (-1.1%); and advertising (-1.4%).

This year (1986-87), what change does your organization anticipate in the hiring of new college graduates? Responses are listed by EMPLOYER SIZE for hiring new college graduates at the bachelor's degree level.

	TOTAL	
	N	MEAN
.....EMPLOYER SIZES		
1-99	48	-1.6
100-499	127	-0.1
500-999	67	-0.8

CONGLOMERATES	11	-11
OVERALL TOTAL	539	-1.1

Observations: Employers responding to this survey report a very slight decrease in numbers of interview schedules on college campuses (-1.1%) this year. Last year, campus interview schedules increased by (2.6%).

Changes in numbers of interview schedules will vary again this year according to type of organization. Surveyed employers report that the greatest increases in interview schedules can be expected from the following: Educational institutions (5.1%); merchandising and retail services (3.2%); printing, publishing, and informational services (3.0%); construction and building materials manufacturers (2.8%); banking finance and insurance (1.9%); service and volunteer organizations (1.9%); and hospitals and health services (1.6%).

Moderate increases in number of campus interview schedules are expected from hotels, motels, resorts and recreational services (0.8%); communication-radio, TV, and newspapers (0.5%); agribusiness (0.5%); and accounting (0.4%).

No change in numbers of campus interview schedules is expected for research and consulting services (0.0%); and glass, paper, packaging and allied products (0.0%).

Those organizations expecting declines in numbers of interview schedules on college campuses will include food, beverage processing, and restaurants (-0.3%); tire and rubber products (-0.8%); metals and metal products (-1.2%); military services (-1.3%); aerospace and components (-2.4%); electrical machinery and equipment (-2.5%); governmental administration (-2.8%); public utilities including transportation (-3.1%); chemicals, drugs, and allied products (-3.5%); automotive and mechanical equipment (-7.4%); electronics and instruments (-9.9%); diversified conglomerates (-11.0%); and petroleum and allied products (-23.0%).

Of the employers responding to this year's Recruiting Trends survey, 97 do not expect to interview on any college campuses.

What change do you anticipate in the number of INTERVIEW SCHEDULES arranged by your organization on college campuses this year (1986-87)? Responses are listed by EMPLOYER SIZE.

EMPLOYER SIZES	TOTAL	
	N	MEAN
1-99	48	1.4

OVERALL TOTAL	543	-1.3

Observations: Employers are expecting to conduct approximately -1.3% less campus visits this year, according to those organizations surveyed. This compares to an increase of 2.8% last year. However, 96 organizations do not expect to visit any college campuses this year.

Again this year, changes in numbers of campus visits will vary significantly among categories of employers, according to surveyed organizations. Those employers with increases in campus visits planned for this year include military services (12.0%); educational institutions (4.7%); service and volunteer organizations (3.3%); printing, publishing, and informational services (3.0%); banking finance and insurance (2.5%); construction and building materials manufacturers (1.3%); hotels, motels, resorts and recreational services (1.3%); accounting (1.2%); tire and rubber products (0.8%); merchandising and retail services (0.5%); communication-radio, TV, and newspapers (0.5%); food, beverage processing, and restaurants (0.3%); and agribusiness (0.3%).

Decreases in numbers of campus visits can be expected from glass, paper, packaging and allied products (-0.1%); research and consulting services (-0.2%); metals and metal products (-1.4%); chemicals, drugs, and allied products (-2.2%); governmental administration (-2.3%); public utilities including transportation (-3.6%); diversified conglomerates (-4.0%); electrical machinery and equipment (-4.3%); aerospace and components (-4.5%); automotive and mechanical equipment (-6.7%); hospitals and health services (-6.8%); electronics and instruments (-8.7%); and petroleum and allied products (-23.0%).

What change do you anticipate in the number of CAMPUS VISITS for recruiting by your organization this year (1986-87)? Responses are listed by EMPLOYER SIZE.

EMPLOYER SIZES	TOTAL	
	N	MEAN
1-99	46	0.6

Observations: Starting salary offers for new bachelor's degree graduates are expected to increase by an average of 2.9% for 1986-87, somewhat higher than last year's increase of 1.8%. Highest among anticipated increases for new bachelor's degree graduates with specific academic majors this year will be education majors (3.1%).

Substantial starting salary increases are also expected for electrical engineers (2.6%); marketing/sales (2.5%); computer science (2.5%); accounting (2.5%); general business administration (2.3%); mathematics (2.2%); industrial engineers (2.2%); financial administration (2.2%); mechanical engineers (2.2%); chemistry (2.1%); personnel administration (2.0%); and physics (2.0%).

Moderate increases are anticipated for civil engineers (1.9%); social sciences (1.9%); chemical engineers (1.9%); liberal arts/arts and letters (1.9%); hotel, restaurant, and institutional management (1.8%); retailing (1.7%); advertising (1.7%); metallurgy materials science (1.6%); communications (1.6%); telecommunication (1.6%); human ecology/home economics (1.6%); geology (1.5%); journalism (1.4%); agriculture (1.4%); and natural resources (1.3%).

What percentage change does your organization anticipate in salary offers to 1986-87 college graduates by academic major and degree level? Listed below are anticipated changes in salary offers for bachelor's degree graduates expected in GEOGRAPHICAL REGIONS of the United States.

..... GEOGRAPHICAL REGIONS	TOTAL	
	N	MEAN
NORTHEAST	103	2.3
SOUTHEAST	62	3.5
NORTHCENTRAL	249	3.1
SOUTHCENTRAL	36	3.1
NORTHWEST	26	1.8
SOUTHWEST	40	3.1
OVERALL TOTAL	516	2.9

Observations: Starting salary offers for 1986-87 bachelor's degree graduates will also be influenced by geographical regions of the country, according to surveyed employers. The greatest starting salary increases are expected for the southeastern region (3.5%), northcentral region (3.1%), southcentral region (3.1%), and southwestern region (3.1%). Moderate increases are expected in the northeastern region (2.3%). The smallest increases are expected in the northwestern region (1.8%).

Listed below are anticipated changes in salary offers for bachelor's degree graduates among various EMPLOYER SIZES.

..... EMPLOYER SIZES	TOTAL	
	N	MEAN
1-99	45	2.5
100-499	127	3.5
500-999	72	3.1
1000-4999	153	2.8
5000-9999	53	2.6
10,000+	66	2.4
OVERALL TOTAL	516	2.9

Observations: Employer size will also influence starting salaries. The greatest increases are expected by employers with one hundred to 499 employees (3.5%) and employers with five hundred to 999 employees (3.1%). Next on the list were employers with one thousand to 4,999 employees (2.8%), five thousand to 9,999 employees (2.6%), and one to 99 employees (2.5%). The smallest starting salary increases are expected from employers with 10,000 or more employees (2.4%).

ACADEMIC MAJORS, ESTIMATED PERCENT CHANGE,
AND ESTIMATED STARTING SALARIES FOR 1986-87

<u>Academic Majors Bachelor's Degrees</u>	<u>Estimated % Change</u>	<u>Estimated Starting Salary 1986-87</u>
Electrical Engineering	2.6%	\$ 29,680

Averages for Different Degree Levels		
Bachelor's	2.9	21,815
Master's	2.9	26,628
Ph.D.	2.5	30,754

*Source for base starting salaries when preparing this chart: John D. Shingleton and Edwin B. Fitzpatrick, Annual Salary Report---1985-86. East Lansing, Michigan: Placement Services, Michigan State University, 1986.

Observations: Highest among starting salaries this year for new college graduates are electrical engineering (\$29,680), mechanical engineering (\$29,636), chemical engineering (\$29,254), metallurgy materials science (\$28,309) and computer science (\$28,087). The greatest increases in starting salary offers this year were for education (3.1%), electrical engineering (2.6%), computer science (2.5%), accounting (2.5%), and marketing/sales (2.5%). Estimated starting salary offers for other academic majors are listed above.

Did your organization have any students renege on offers of employment last year (1985-86)?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
NO RESPONSE	215			
YES	229	229	46.926	46.926
NO	259	488	53.074	100.000

Observations: Of 488 employers who responded to this question, 229 (46.9%) had at least one graduating student renege on an offer of employment last year.

Did your organization renege on any offers of employment last year (1985-86)?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
NO RESPONSE	211			
YES	27	27	5.488	5.488
NO	465	492	94.512	100.000

Observations: Of 492 employers who responded, 27 organizations (5.5%) reneged on job offers to new college graduates last year.

Is it against your organization's policy to renege on an offer of employment to a new college graduate?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
NO RESPONSE	117			
YES	365	365	62.287	62.287

TIRE RUBBER	2	3.8
CONGLOMERATES	13	1.7
OVERALL TOTAL	525	2.4

Observations: Employers responding to this year's survey indicate that approximately 2.4% more closed schedules will be requested by their organizations when interviewing on college campuses this year (1986-87).

These organizations expecting substantial increases in closed schedules include printing, publishing, and informational services (18.0%); agribusiness (13.1%); construction and building materials manufacturers (10.5%); merchandising and retail services (7.3%); banking, finance, and insurance (6.6%); and accounting (6.1%).

Moderate increases are expected by metals and metal products (5.0%); chemicals, drugs, and allied products (4.8%); aerospace and components (4.4%); tire and rubber products (3.8%); hotels, motels, resorts and recreational services (3.3%); research and consulting services (3.0%); public utilities including transportation (2.3%); diversified conglomerates (1.7%); automotive and mechanical equipment (1.0%); communication-radio, TV, and newspapers (0.9%); food, beverage processing, and restaurants (0.4%); and educational institutions (0.4%).

No change is expected by glass, paper, packaging and allied products (0.0%); hospitals and health services (0.0%); and service and volunteer organizations (0.0%).

Slight decreases in closed schedules are expected by governmental administration (-0.2%); electronics and instruments (-1.5%); military services (-3.5%); petroleum and allied products (-4.5%); electrical machinery and equipment (-5.3%);

That percentage of new hires in your organization came from closed schedules last year (1985-86)? Responses are listed by EMPLOYER CATEGORY.

TIRE RUBBER	3	35	11.67
CONGLOMERATES	8	105	13.13
TOTAL	460	7070	15.37

Observations: Organizations reporting new college hires from closed schedules indicate that 15.4% of their new hires came from this source. The highest percentages of new college graduates coming from closed schedules were experienced by agribusiness (40.8%); accounting (33.4%); metals and metal products (28.5%); merchandising and retail services (27.8%); petroleum and allied products (25.1%); communication-radio, TV, and newspapers (25.0%); banking, finance, and insurance (22.8%); and electronics and instruments (20.7%).

Percentages of less than 20% were experienced by public utilities including transportation (19.3%); electrical machinery and equipment (19.3%); construction and building materials manufacturers (16.9%); chemicals, drugs, and allied products (16.7%); hotels, motels, resorts and recreational services (16.0%); diversified conglomerates (13.1%); aerospace and components (13.0%); glass, paper, packaging and allied products (12.6%); food, beverage processing, and restaurants (12.5%); tire and rubber products

(11.7%); and printing, publishing, and informational services (10.5%).

Less than 10% were obtained by automotive and mechanical equipment (8.1%); research and consulting services (7.9%); educational institutions (6.9%); military services (5.3%); governmental administration (3.4%); hospitals and health services (2.2%); and service and volunteer organizations (0.0%);

What percent of new college graduates hired last year (1985-86) by your organization were from the following sources?

	TOTAL	
	N	MEAN
SOURCES OF NEW COLLEGE GRADUATES		
ON-CAMPUS INTERVIEWING	553	43.4
JOB LISTINGS WITH PLACEMENT OFFICE	465	7.9
UNSOLICITED REFERRALS FROM PLACEMENT	446	1.4
REFERRALS FROM CAMPUS ORGANIZATIONS	433	1.8
REFERRALS FROM CURRENT EMPLOYEES	476	5.7
MINORITY CAREER PROGRAMS	448	1.8
WOMENS CAREER PROGRAMS	427	0.5
HIGH DEMAND MAJOR PROGRAMS	418	3.6
COOPERATIVE EDUCATION PROGRAMS	445	3.8
SUMMER EMPLOYMENT	457	3.0
PART-TIME EMPLOYMENT	440	2.5
INTERNSHIP PROGRAMS	449	3.7
WALK-INS	453	4.5
WRITE-INS	485	10.5
RESPONSES FROM WANT ADS	471	8.7

Observations: Sources of new college graduates hired are often discussed with interest by prospective employers when planning new recruitment programs or revising current ones. Also, graduating students often inquire about the best avenue for getting hired by prospective employers.

According to surveyed employers, certain sources of new college graduates are more results-oriented than others. The most productive sources were on-campus interviewing (43.4%), write-ins (10.5%), responses from want ads (8.7%), and job listings with placement offices (7.9%).

Percentages obtained from other sources include referrals from current employees (5.7%), walk-ins (4.5%), cooperative education programs (3.8%), internship programs (3.7%), high demand major programs (3.6%), summer employment programs (3.0%), part-time employment (2.5%), minority career programs (1.8%), referrals from campus organizations (1.8%), unsolicited referrals from placement officers (1.4%), and women's career programs (0.5%).

Did your organization visit college campuses last year (1985-86) knowing that no openings were expected for interviews being conducted?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
	269			
YES	48	48	11.060	11.060
NO	386	434	88.940	100.000

Observations: Of 434 respondents, 48 organizations (11.1%) indicated that their recruiters visited college campuses last year (1985-86) knowing that no openings were expected for interviews being conducted.

Does your organization pre-screen at colleges and universities where pre-screening is permitted?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
	111			
YES	388	388	65.541	65.541
NO	204	592	34.459	100.000

Observations: Of 592 organizations responding to this question, 388 employers (65.5%) indicated that their organizations pre-screened at colleges and universities where it was permitted last year. In 1984-85, 67.6% of employers prescreened, and in 1983-84, 69.2%. These statistics indicate a slight decline in organizations prescreening on college campuses, but a high percentage (65.5%) are still using this service where it is permitted.

How many SALARIED employees (excluding clerical staff) are on the payroll of your organization in OVERSEAS locations?

REDUCTION IN WORKING HOURS	2	0	18	4	430	93	12	3	.	.	462	100	3.0	
JOB RECLASSIFICATION	6	1	72	16	363	79	17	4	1	0	459	100	2.9	

Observations: When predicting employment goals for new college graduates this year, surveyed employers expect only one factor, salary and wage levels, to have "some increase," and thus an influence on hiring goals.

Only slight increases, if any, are expected in organizational expansion, optimism of the organization's leadership, programmed automation, personnel turnover, mergers or acquisitions, age of the organization's labor force, short-run general economy, long-run general economy, downsizing for worker efficiency, interest rates, strength of international markets, and job reclassifications.

No change is expected in working hours for employees.

Continued . . .

INTEREST RATES	8	2	33	8	97	22	84	19	211	49	433	100	4.1
MERGERS OR ACQUISITIONS	20	5	42	10	70	16	63	14	241	55	436	100	4.1
PROGRAMMED AUTOMATION	7	2	47	11	85	20	100	23	196	45	435	100	4.0
SALARY AND WAGE LEVELS	8	2	40	9	139	31	131	29	137	30	455	100	3.8
ORGANIZATIONAL EXPANSION	44	9	136	29	133	29	57	12	96	21	466	100	3.1
AGE OF ORG.'S LABOR FORCE	10	2	40	9	121	26	115	25	173	38	459	100	3.9
PERSONNEL TURNOVER	26	6	92	20	154	33	121	26	76	16	469	100	3.3
DOWNSIZING FOR WORKER EFFICIENCY	16	4	51	12	89	20	65	15	222	50	443	100	4.0
OPTIMISM OF ORG.'S LEADERSHIP	24	5	98	22	129	29	59	13	136	30	446	100	3.4
REDUCTION IN WORKING HOURS	1	0	14	3	49	11	61	14	311	71	436	100	4.5
JOB RECLASSIFICATION	3	1	25	6	68	15	82	19	263	60	441	100	4.3

Observations: According to surveyed employers, those factors that will have a "medium" level of influence when calculating employment goals for new college graduates will be: organizational expansion, personnel turnover, the long-run general economy, and optimism of the organization's leadership.

"Low" levels of influence are expected from short-run general economy, salary and wage levels, age of the organization's labor force, downsizing for worker efficiency, programmed automation, mergers or acquisitions, interest rates, strength of international markets, and job reclassifications.

"No" influence is expected from reduction in working hours.

How many students were provided with internships and/or cooperative education positions by your organization last year (1985-86), and how many students did your organization pay for internships and/or cooperative education positions last year (1985-86)?

OVERALL TOTAL	681	9.4	694	12.8

Observations: On the average, approximately 9.4% of the new hires in surveyed employers' organizations last year were liberal arts graduates.

The employer categories hiring the highest percentages of liberal arts graduates among new hires last year (1985-86) were military services (38.7%); communication-radio, TV, and newspapers (32.5%); educational institutions (22.7%); glass, paper, packaging and allied products (19.3%); banking, finance, and insurance (16.9%); service and volunteer organizations (16.7%); printing, publishing, and informational services (16.6%); merchandising and retail services (13.9%); hotels, motels, resorts and recreational services (13.2%); and governmental administration (9.9%);

Employers responding to this survey indicated that 12.8% of the positions available in their organizations this year could be filled by liberal arts graduates.

Employer categories indicating the highest percentages of positions that could be filled by liberal arts graduates included military services (43.0%); service and volunteer organizations (40.6%); communication-radio, TV, and newspapers (32.5%); hotels, motels, resorts and recreational services (26.4%); banking, finance and insurance (25.6%); printing, publishing, and informational services (25.3%); educational institutions (23.1%); glass, paper, packaging and allied products (22.7%); merchandising and

retail services (22.6%); food, beverage processing, and restaurants (14.1%); governmental administration (13.4%); diversified conglomerates (10.4%); construction and building materials manufacturers (10.3%); agribusiness (9.5%); and metals and metal products (9.2%)

To make liberal arts majors more suitable for employment in your organization, how important are the following?

	FREQUENCY OF RESPONSE										TOTAL RESPONSE	TDT-AL	
	ALWAYS		ALMOST ALWAYS		SOMETIMES		SELDOM		NEVER

WELL-TRAVELED	3	1	18	3	128	23	258	46	151	27	558	100	4.0
ADVANCED DEGREE IN APPLIED FIELD	57	10	97	17	230	40	122	21	66	12	572	100	3.1

Observations: To make liberal arts majors more suitable for employment in surveyed organizations, the following will "almost always" be helpful: writing skills courses, a professional appearance, compatible employment objectives, related work experiences, and computer science courses.

"Sometimes" helpful to make liberal arts majors more suitable are a more appropriate degree program, technical expertise, accounting and finance courses, management courses, business administration courses, references from former work experiences, public speaking courses, a broader scope of education, and an advanced degree in an applied field.

"Seldom" or "never" making liberal arts majors more suitable is being well-traveled, according to surveyed employers.

Observations: According to surveyed employers, the average cost of training each new college graduate is approximately \$7,036 during the first year on the job.

The categories of employers with the highest costs of training were military services (\$26,000); banking finance and insurance (\$16,633); aerospace and components (\$13,581); service and volunteer organizations (\$13,039); governmental administration (\$12,962); electrical machinery and equipment (\$12,820); glass, paper, packaging and allied products (\$12,217); agribusiness (\$10,321); and automotive and mechanical equipment (\$9,450).

The employer categories with the lowest costs of training were food, beverage processing, and restaurants (\$7,290); public utilities including transportation (\$7,278); hotels, motels, resorts and recreational services (\$6,917); merchandising and retail services (\$6,533); construction and building materials manufacturers (\$5,614); electronics and instruments (\$5,018); petroleum and allied products (\$5,000); chemicals, drugs, and allied products (\$4,478); research and consulting services (\$4,241); hospitals and health services (\$3,550); printing, publishing, and informational services (\$2,917); metals and metal products (\$2,663); accounting (\$2,588); diversified conglomerates

(\$2,514); communication-radio, TV, and newspapers (\$2,050); educational institutions (\$1,430); and tire and rubber products (\$500);

The cost of training is different for various regions of the country: southcentral (\$10,063), southeastern (\$6,702), southwestern (\$6,440), northcentral (\$6,356), northeastern (\$5,380), and northwestern (\$3,328).

What percentage of tuition incurred by new college hires for graduate studies are paid by your organization? Responses are listed by EMPLOYER CATEGORY.

CONGLOMERATES	15	77.3
OVERALL TOTAL	658	52.7

Observations: On the average, approximately 52.7% of tuition incurred for graduate studies by new college hires are paid by surveyed organizations.

Employer categories paying the highest percentages of costs incurred for graduate studies are tire and rubber products (87.5%); electronics and instruments (87.2%); chemicals, drugs, and allied products (86.3%); aerospace and components (83.6%); diversified conglomerates (77.3%); petroleum and allied products (75.8%); electrical machinery and equipment (75.2%); automotive and mechanical equipment (73.0%); metals and metal products (72.2%); construction and building materials manufacturers (71.9%); public utilities including transportation (70.4%); glass, paper, packaging and allied products (70.0%).

Less than 70% of tuition is paid by printing, publishing and informational services (69.4%); research and consulting services (62.6%); banking, finance, and insurance (58.8%); food, beverage processing, and restaurants (46.5%); military services (44.4%); merchandising and retail services (35.5%); agribusiness (32.7%); governmental administration (31.2%); hospitals and health services (29.8%); service and volunteer organizations (26.1%); accounting (24.8%); hotels, motels, resorts and recreational services (13.7%); educational institutions (12.3%); and communication-radio, TV, and newspapers (11.3%).

Employers with one to 99 employees are likely to pay the lowest percentage of tuition costs (27.9%), while most other sizes of employers will pay between 50.4% and 70.3% of tuition costs. The largest organizations, those with 10,000 or more employees, pay the highest percentage of tuition costs (70.3%).

If your organization hired new college graduates last year (1985-86), what percentage attended a college or a university for an advanced degree this year while working for your organization? Responses are listed by EMPLOYER CATEGORY.

OVERALL TOTAL	558	10.4

Observations: Among surveyed employers, approximately 10.4% of last year's new college hires were attending a college or university for an advanced degree this year while still working for the organization.

Those employer categories with the highest percentages attending graduate school included military services (20.9%); educational institutions (19.8%); tire and rubber products (13.6%); research and consulting services (13.5%); electronics and instruments (12.4%); electrical machinery and equipment (12.2%); printing, publishing, and informational services (12.2%); diversified conglomerates (10.8%); chemicals, drugs, and allied products (10.7%); and construction and building materials manufacturers (9.8%).

Those employer categories with fewer than 9% attending a college or university for an advanced degree were banking, finance, and insurance (8.8%); metals and metal products (8.3%); petroleum and allied products (8.1%); public utilities including transportation (8.1%); governmental administration (7.9%); aerospace and components (7.8%); automotive and mechanical equipment (6.5%); food, beverage processing, and restaurants (4.8%); accounting (4.1%); hospitals and health services (3.8%); communication-radio, TV, and newspapers (3.8%); merchandising and retail services (2.1%); service and volunteer organizations (1.5%); glass, paper, packaging and allied products (1.5%); hotels, motels, resorts, and recreational services (1.0%); and agribusiness (0.7%).

Some organizations are only requesting new college graduates with high grade point averages on their interview schedules. In your opinion, is a high grade average predictive of future job success? Responses are listed by EMPLOYER CATEGORY.

CONVEYING MEANING	7	1	147	23	440	67	54	8	4	1	652	100	2.8	
ABILITY TO ORGANIZE TASKS	17	3	240	37	339	52	55	8	3	0	654	100	2.7	
COPING WITH COMPLEX ISSUES	18	3	205	32	367	56	54	8	5	1	650	100	2.7	
ORGANIZING AND SUPERVISING OTHERS	1	0	56	9	364	56	205	31	27	4	653	100	3.3	
FUNCTIONING AS A MEMBER OF A TEAM			53	8	380	58	201	31	23	4	657	100	3.3	
EVALUATION OF ALTERNATIVES	9	1	181	28	385	59	72	11	9	1	656	100	2.8	

Observations: According to surveyed employers, the only factor that "almost always" relates to high grade point average is analytical thinking.

The following factors "sometimes" relate to high grade point average: solving complex problems, utilization of quantitative tools, hard working, application of knowledge, writing ability, coping with complex issues, ability to organize tasks, productivity, evaluation of alternatives, conveying meaning, originality, greater leadership, organizing and supervising others, and functioning as a member of a team.

"Seldom" relating to high grade point average is sociability skills.

In the opinion of one surveyed employer, those who use grade point average as their only criterion when screening candidates are missing some potential high performers. Possibly the graduating student did not know how important grades were until their sophomore or junior year. In this case, this employer can understand and forgive the individual.

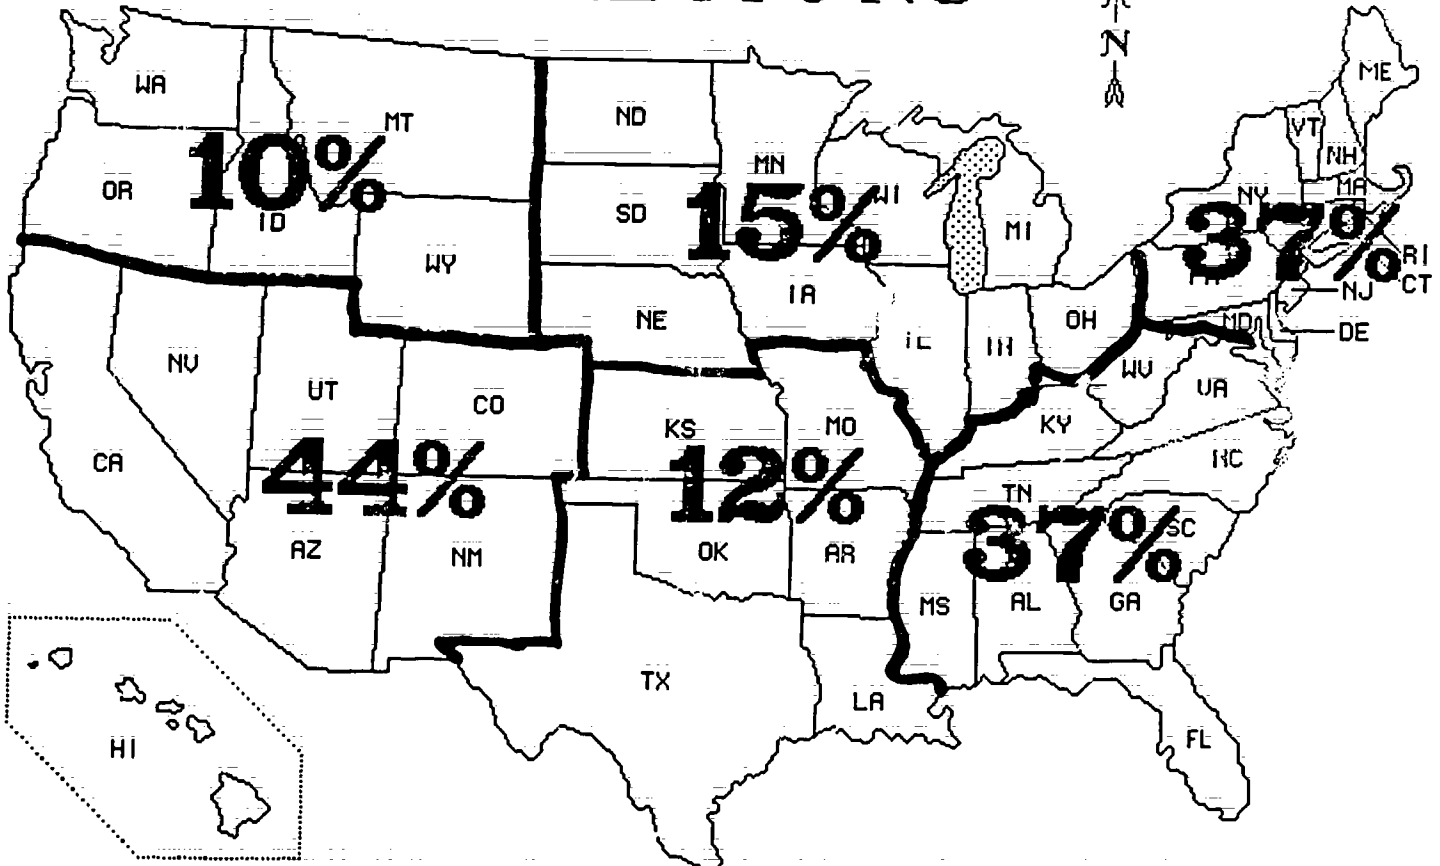

Continuing, this employer was concerned that a grade point average might reflect the candidate's attitude towards their college performance. If they felt that GPA was not important, they might feel this way about other things too.

Based on your experiences, what will be the availability of employment opportunities during 1986-87 for new college graduates in each geographical region of the United States? Respondents only rated geographical areas that were familiar to them.

GEOGRAPHICAL REGIONS

*Indicates percentages of employees rating each region with "always" and "almost always" excellent availability of employment.

(Continued)

Continued . . .

Observations: The greatest availability of employment opportunities for new college graduates during 1986-87 will be in the southwestern region of the United States, according to employers responding to this survey. The northeastern and southeastern regions were rated next best on the employers' list of top geographical regions for jobs. For the first time in several years, the southcentral region slipped from the employers' list of the top three regions, now in fifth place.

The regions of the United States in order of best availability of jobs are southwestern, northeastern, southeastern, northcentral, southcentral, and northwestern.

What percentage of new college hires leave your organization? Responses are listed for TECHNICAL and NON-TECHNICAL graduates.

	TOTAL	
	N	MEAN
TECHNICAL GRADUATES LEAVING		
FIRST YEAR	469	3.4
SECOND YEAR	458	3.8
THIRD YEAR	439	4.9

REQUIRE REHAB. FOR CURR. EMPLOYEES	178	34	148	29	134	26	22	4	34	7	516	100	2.2		

Observations: According to employers responding to this survey, drug screening, in their opinion, is ethical. Of those responding, 45% said "always" or "almost always" and 41% said "sometimes."

Drug screening of new college graduates is used by 20% of the employers responding to this survey. Of these employers, 95% reject individuals from employment, if evidence of drug use is found in a job applicant.

Of all employers responding to the survey, 66% reject candidates who have a previous record of drug use. Of the employers who screen for drug use, 68% reject candidates who have a previous record of drug use.

Current employees are screened for drug use in 14% of the surveyed organizations. In the organizations that screen new college graduates for drugs, 42% screen current employees for drugs. According to comments from surveyed employers, drug use is prohibited while working with children, and if drug use impairs an individual's work, they are discharged.

When surveyed organizations find current employees who are using drugs, 60% will terminate these employees. In organizations that screen new college graduates for drugs, 78% will terminate a current employee who is using drugs.

Rehabilitation is required by 89% of all surveyed employers who find a current employee who is using drugs. In organizations that screen new college graduates for drugs, 95% require rehabilitation for current employees who are using drugs.

According to one employer that does screen applicants for drug use, their organization will retest individuals after six months and reconsider an application if desired by the applicant.

Does your organization screen new college graduates for drug use when considering them for employment? Responses are listed by EMPLOYER TYPE.

Observations: Surveyed employers will "always" or "almost always" hire a new college graduate who admits to smoking cigarettes, cigars, or a pipe as a regular habit on the job (81%), but 2% of the respondents will "seldom" hire such individuals, and 5% of the organizations will "never" hire these people.

PROBABILITY OF EMPLOYERS HIRING NEW GRADUATES WHO SMOKE

Does your organization have a "no smoking" policy for employees while working?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
	52			
YES	216	216	30.769	30.769
NO	486	702	69.231	100.000

Observations: Of the 702 surveyed employers who responded, 486 (69.2%) do not have a "no smoking" policy for workers, but another 216 (30.8%) of the organizations have established policies regarding smoking in the working environment. As one employer commented, some laboratory situations and field work in remote locations, especially forests, may require no smoking by employees.

Does your organization permit smoking in public areas?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
	45			
YES	532	532	75.035	75.035
NO	177	709	24.965	100.000

Observations: Surveyed employers generally permit smoking in public areas (75.0%), but smoking is not permitted in public areas by 25.0% of the employers responding to this survey.

Does your organization offer a "Quit Smoking" program for employees?

	FREQUENCY	CUM FREQ	PERCENT	CUM PERCENT
	51			
YES	292	292	41.536	41.536
NO	411	703	58.464	100.000

Observations: Many of the surveyed employers (41.5%) offer "Quit Smoking" programs to their current employees. At the present time, 58.5% of the employers do not.

How often are the following factors used as reasons for new college graduates leaving your organization?

	FREQUENCY OF RESPONSE												TOTAL RESPONSE	TOT- AL	MEAN
	ALWAYS		ALMOST ALWAYS		SOMETIMES		SELDOM		NEVER		TOTAL				
	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN			
EMPLOYEE RESIGNS BECAUSE OF															
DISSATISFACTION WITH ORGANIZATION	8	1	56	9	386	63	139	23	19	3	608	100	3.2		
INABILITY TO CONFORM	3	1	20	3	260	43	261	44	55	9	599	100	3.6		
SALARY DID NOT MEET EXPECTATIONS	4	1	48	8	342	56	159	28	43	7	606	100	3.3		
PROMOTIONS NOT MET EXPECTATIONS	4	1	47	8	361	60	159	26	34	6	605	100	3.3		
JOB TRANSFER OF SPOUSE/PARTNER	10	2	54	9	355	58	148	24	40	7	607	100	3.3		
MARRIAGE	2	0	25	4	314	52	208	34	59	10	608	100	3.5		
PREGNANCY			17	3	296	49	227	38	64	11	604	100	3.6		
BETTER JOB OFFER	22	4	198	32	328	53	56	9	12	2	616	100	2.7		
BETTER JOB LOCATION	14	2	85	14	366	60	121	20	24	4	610	100	3.1		
DISSATISFACTION WITH CAREER FIELD	6	1	40	7	327	53	205	33	34	6	612	100	3.4		
JOB EXPECTATIONS NOT MET	2	0	56	9	294	48	224	37	33	5	609	100	3.4		

Observations: Most often used as reasons by new college graduates leaving organizations, in order of frequency, are: a better job offer, better job location, dissatisfaction with the organization, the job transfer of a spouse/partner, promotions did not meet expectations, salary did not meet expectations, dissatisfaction with the career field, or job expectations were not met. "Seldom" used are marriage, pregnancy, and the inability to conform to the organization's expectations.

How often are the following factors used as reasons for organizations terminating employment of new college graduates?

	FREQUENCY OF RESPONSE												TOTAL RESPONSE	TOTAL MEAN
	ALWAYS		ALMOST ALWAYS		SOMETIMES		SELDOM		NEVER					
	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN		
ORGANIZATIONAL TERMINATION BECAUSE OF														
POOR JOB PERFORMANCE	61	10	145	24	251	41	138	23	15	2	610	100	2.8	
UNABLE TO CONFORM TO ORG. POLICIES	17	3	44		237	39	253	42	55	9	606	100	3.5

COOPERATIVE EDUC ASSIGNMENTS	105	17	215	34	183	29	95	15	28	4	626	100	2.6		

Responses are listed for OTHER WORK EXPERIENCES (NOT CAREER RELATED):

	FREQUENCY OF RESPONSE											TOTAL	TOTAL	MEAN		
	EXTREMELY HIGH		HIGH		MEDIUM		LOW		NO		ALL				N	PCTN
	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN						
OTHER WORK EXPERIENCES																
INTERNSHIPS	22	3	120	19	286	45	161	25	50	8	639	100	3.2			
PART TIME EMPLOYMENT	14	2	103	16	293	46	188	29	45	7	643	100	3.2			
SUMMER EMPLOYMENT	23	4	112	16	290	45	183	28	48	7	646	100	3.2			
CO OPERATIVE EDUC ASSIGNMENT	14	2	112	18	277	43	179	28	54	8	641	100	3.2			

Observations: In order of importance, according to surveyed employers, the following career related work experiences have "high" consideration when screening new college graduates for employment: internships. Receiving a rating of "medium" importance were cooperative education assignments, summer employment, and part-time career related employment.

For other work experiences that may not be career related, ratings of "medium" importance were received by internships, summer employment, cooperative education, and part-time employment.

All career related work experiences received higher ratings than other work experiences that are not career related.

In your opinion, what percentage of the positions available for new college graduates in your organization could be filled by a handicapped person?

PERCENTAGE OF POSITIONS AVAILABLE

TYPES	POSITION AVAILABLE FOR THE HANDICAPPED															WEI- GHT- ED MEAN	
	0	1-2%	3-4%	5-6%	7-8%	9-10%	11-20%	21-30%	31-40%	41-50%	51-60%	61-70%	71-80%	81-90%	91-100%		ALL

When choosing between several job offers, how important, in your opinion, are the following factors to graduating students?

FACTORS TO CHOOSE BETWEEN JOB OFFERS	FREQUENCY OF RESPONSE										TOTAL RESPONSE		TOTAL MEAN
	EXTREMELY HIGH		HIGH		MEDIUM		LOW		NO		N	PCTN	
	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN			
GEOGRAPHICAL LOCATION OF THE JOB	87	13	336	51	212	32	27	4			662	100	2.3
NO OF RELOCATIONS REQUIRED BY THE JOB	49	7	216	33	248	38	98	15	44	7	655	100	2.8
SERV/PRODUCTS PRODUCED BY ORG.	64	10	236	36	246	38	71	11	35	5	652	100	2.7

Observations: When choosing between several job offers, graduating students consider the following factors most important, according to surveyed employers: challenging work assignments, reputation of the organization, opportunities for advancement, a competitive salary, full utilization of the graduate's skills, job security, personalities and abilities of supervisors and bosses, geographical location of the job, status and prestige of the job, and decision-making responsibilities of the job.

Of medium importance to graduating students are adequate benefits and health insurance, personalities and abilities of other employees, information gleaned from talking to people who held or are in the position, payment for advanced degree courses, availability of a graduate school nearby, the services and products produced by the organization, adequate dental insurance, dependent health insurance, number of relocations required by the job, size of organization, physical facilities of the organization, problems within the organization, ability to design own work program, organizational structure, an adequate retirement plan, adequate life insurance, benefits of the investment profit-sharing program, and maternity/paternity leaves policies.

Employers responding to this survey believe that adequate day care facilities have "low" or "no" importance to graduating students.

Approximately what percentage of new college graduates hired last year by your organization were married and seeking job search assistance for spouses? Responses are listed by EMPLOYER CATEGORY:

EMPLOYER TYPES	% OF SEEKING JOB SEARCH ASSISTANCE		
	N	TOTAL %	MEAN

SERV VOL ORGS	9	26	2.89
TIRE RUBBER	4	0	0.00
CONGLOMERATES	13	6	0.46
TOTAL	634	390	0.62

Observations: Surveyed employers reported that approximately 0.6% of their salaried employees (excluding clerical staff) were in job sharing positions.

Employer categories with the highest percentages of job sharing employees were service and volunteer organizations (2.89%); hospitals and health services (2.28%); educational institutions (1.44%); electrical machinery and equipment (0.79%); food, beverage processing, and restaurants (0.77%); agribusiness (0.63%); and governmental administration (0.5%).

Percentages in other employer categories include chemicals, drugs, and allied products (0.47%); diversified conglomerates (0.46%); aerospace and components (0.38%); petroleum and allied products (0.38%); public utilities including transportation (0.35%); banking finance and insurance (0.3%); metals and metal products (0.29%); merchandising and retail services (0.27%); hotels, motels, resorts and recreational services (0.22%); research and consulting services (0.22%); printing, publishing, and informational services (0.14%); glass, paper, packaging and allied products (0.14%); construction

and building materials manufacturers (0.11%); electronics and instruments (0.05%); accounting (0.04%); automotive and mechanical equipment (0.0%); military services (0.0%); tire and rubber products (0.0%); and communication-radios, TV, and newspapers (0.0).

With the increased exposure to toxic chemicals and other health related materials, what importance do you think new college graduates are placing on the following?

	FREQUENCY OF RESPONSE												TOT- AL MEAN
	EXTREMELY HIGH		HIGH		MEDIUM		LOW		NO		ALL		
	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	N	PCTN	
HEALTH RELATED MATERIALS													
HIGH RISK PAY	42	7	137	24	189	33	135	24	71	12	574	100	3.1
HAZARDOUS DUTY BENEFITS	45	8	143	25	183	32	126	22	76	13	573	100	3.1
MEDICAL INSURANCE	127	22	222	39	147	26	56	10	24	4	576	100	2.4
RADIATION MONITORING	87	15	145	25	147	26	123	22	70	12	572	100	2.9
SAFETY CHECKS	94	16	180	31	155	27	106	18	40	7	575	100	2.7
EDUCATION ON TOXIC SUBSTANCES	67	12	180	32	148	26	131	23	44	8	570	100	2.8
ORGANIZATION'S LOCATION	55	10	182	32	199	35	97	17	39	7	572	100	2.8
ORG.S POLICIES ON TOXIC SUBST.	95	17	158	28	154	27	113	20	50	9	570	100	2.8

Observations: In the opinions of surveyed employers, medical insurance is given "high" importance by new college graduates who are exposed to toxic chemicals and other health related materials. Over 61% of the employers responding to this survey thought medical insurance was either "extremely high" or "high" in importance to graduating students.

Of "medium" importance to graduating students are safety checks, education on toxic substances, the organization's location relative to toxic chemical and potential radiation hazards, the organization's policies on toxic substances, radiation monitoring, hazardous duty benefits, and high risk pay.

MISCELLANEOUS EMPLOYER COMMENTS

What can colleges and universities do to improve their services to employers seeking new college graduates? Employers were encouraged to make comments and return them with their questionnaires. The following recommendations were received.

According to one surveyed employer, placement offices could facilitate the interaction between themselves and employers by implementing standardization in two areas: standardized data sheets and standardized resume formats.

STANDARDIZED DATA SHEETS

Despite earlier efforts by the College Placement Council (CPC), employers are still faced with as many different data sheets as schools they visit. Standardization would improve an employer's efficiency and reduce the errors received by placement offices. It is this employer's hypothesis that the large number of errors is a function of the multitude of forms which employers must complete. If one form was used, the form could be placed on a word processor and transmitted electronically. While electronic transmission might be a little bit too much to expect in 1986, it could be accomplished within the next few years since the necessary technology already exists.

STANDARDIZED RESUME FORMATS

Contrary to the popular myth perpetrated by well-meaning but misinformed counselors and guidance professionals, highly individualized or stylized resumes tend to receive less attention. Furthermore, as employers become more and more computerized, the "individuality" of any one candidate will be blurred by the standardization implicit in computer generated profiles. While this may be sad news to some, it will be a reality for more and more employers as they move into the 1990's.

IMPROVED COMMUNICATION (between employers, graduating students, faculty, and placement personnel)

Lines of communication with prospective employers should be two-way and maintained to their maximum potential, according to another response. For instance, employer and college advisory councils should include college and university faculty and staff, personnel administrators, school administrators, and business executives.

Placement offices should provide better means of advertising an organization's presence on campus beyond typical job postings and also provide better pre-visit publicity.

Calendar of events should be published and include such items as term breaks, holiday breaks, major social events, and graduation dates.

Faculty and staff contact lists should be distributed and included names, addresses, and telephone numbers of department chairpersons and other contact persons in each curriculum and a convenient time to contact them.

An "open house" was another idea that might be helpful to employers who will be recruiting on campuses, especially those visiting a college or university for the first time. This program might be held in the summer to introduce recruiters to the campus and staff available to help them.

BETTER CAREER COUNSELING

Comments from another employer included the recommendation that colleges and universities provide all students with the best and most detailed information possible about employment prospects and the outlook for their chosen career fields. In the words of this employer, this would be a valuable service both to students and future generations.

For liberal arts graduates, one employer stressed the importance of thinking about possible careers, business courses, computer science courses, and career related work experiences early in their college careers. Liberal arts majors need to offer something more than "good communication skills" and "good analytical skills."

BETTER PREPARATION FOR INTERVIEWING

One surveyed employer wrote with amazement that placement offices often seemed disorganized and unprepared for the interviewer's arrival. After witnessing such activities, this employer wondered how much attention the students on those campuses were receiving. He continued, saying that without students, placement offices have no reason for being, and interviewers have no one to recruit. Therefore, he said, it is essential that students' needs be addressed by placement offices. By offering written information and personal counseling sessions, placement offices will inform students about the countless opportunities that await them and, more importantly, help them feel well-prepared - personally, academically, and professionally, for careers they select.

Graduating students should understand that an excellent grade point average and outstanding technical skills are often useless, unless they can communicate their capabilities to other people.

Another employer reported that the most frustrating experience a recruiter can have is that interviewing candidates who know nothing about the interviewer's organization. He noted, students only need to take fifteen minutes to prepare.

Another noted that employer literature should be readily available for prospective job candidates to become up-to-date on an organization.

Enactment of tougher policies on interview "no shows" was suggested by another.

A LIST OF SUCCESSFUL PRERECRUITMENT ACTIVITIES

One employer, suggested that a compendium of successful prerecruitment activities with recommendations regarding facilities, time-frames, etc. would be helpful. It seems that some universities provide this service already, and it is very useful.

MORE REAL WORLD EXPERIENCES

As a recommendation from one recruiter, employers might be allowed to participate in classroom lectures, so students can see the real world as it is today.

As another employer stated the problem, new college graduates are often very unrealistic about entry level salaries and job expectations. In his words, an entry level position is an opportunity for the individual to prove his or her worth to the employer. Generally, entry level personnel do not make company policy decisions, much less criticize them. In the opinion of this employer, some of the attitude problems may develop from the nature of upper-level management courses. As examples, simulated exercises in high-level decision-making and development of complete marketing plans may encourage students to expect too much responsibility too soon.

New college graduates are also unrealistic about the nature of a work week. There is, of course, the official work day, which should be strictly observed, and there is the expectation. Some overtime and some work on Saturdays might be the norm. Especially in retailing, weekend work is required.

BETTER PRESCREENING SERVICES

Better candidate pre-screening services should be provided by placement offices, according to another recruiter. As one example, a publication with numbers of graduates expected for each academic major and degree level could be issued.

Employers should also be kept informed with names and mini-profiles of qualified individuals who could fill possible positions within the job market. At some institutions, these lists of graduates or resume books are available for nominal fees.

Among these recommendations are some very good ones. Placement directors should take note.
