WHO WE ARE

Infopulse is a leading Ukrainian provider of Information Technology, Network Services and BPO with 5 delivery centers and several offices in Western Europe.

Our core competences include:

- Outsourcing Management and Methodology
- Software Development and Testing
- Application Packaging and Virtualization
- IT and Network Operations
- Business Process Outsourcing

Ukraine is rich in IT talents. Infopulse enables you to have flexible capacity with engagement and service model you need. The cultural and geographic proximity to Western Europe (1 hour time difference, 2 hours flight time to Frankfurt/Main) is suitable for agile development and intense collaboration surpassing the performance of in-house teams.

HOW WE HELP

- **We assign** the experts and professionals you need to deliver your project, wherever you are in the world
- **We optimize** your project by giving you an engagement model that fits your company culture and needs
- **We guarantee** quality, security and transparency in our every day operations

Contact us and your personal Account Manager will advise you how global sourcing in general and Infopulse in particular can fit the changing requirements of your business. After identifying the area of possible cooperation we can start the pilot project to show how it works and help you to make the right decision.

HOW WE WORK

Our organization is client centric. It is geared to combine the advantages of flexible engagement models with highly competent people to support global deliveries and create long term business value for our clients. We are acting according to the principles of transparency, sustainability and reliability.

Full understanding of the client challenges and requirements – from the first consultation through the whole delivery lifecycle – identifying client goals and developing a plan to complete them in the fastest and most efficient way, are the stable basis of our way to work.

RELY ON OUR COMPETENCE AND SERVICES

Rick Rasmussen

Vice President of Software Development at Xyratex

An excellent group of developers to assist us in developing new and innovative technology for our ClusterStor™ HPC data storage solution, these talented people have allowed us to deliver new features to the market in a timely manner without sacrificing quality.

Ronald Ballet

Director IT Development and Offshoring at BICS (Belgacom International Carrier Services)

Infopulse has met all major milestones and we will continue to develop our relations striving to meet the ambitious goals. Our main focus is to provide our customers with the highest levels of quality, reliability and interoperability. Main driver for the extension our relationship with Infopulse has been the flexibility and understanding of our needs and the quality and cost of the resources.
