IDENTIFIERS \*Illinois

ABSTRACT

This survey is a first attempt to ascertain the existing and planned roles of the community college learning resource centers in meeting the total educational communication and service needs of the community college. It is the purpose of this survey to examine existing and planned library services. A committee analyzed each aspect of community college libraries--philosophy, staff, budget, collection, facilities, systems and services. Realizing that each aspect affects every other aspect, the committee has formulated specific recommendations that if implemented would further develop the total library program of community colleges of the state. This is the first step in a plan to help clarify the steps for achieving the total implementation of the learning resource center philosophy. It is strongly urged that a second survey funded by the state organizations be conducted during the 1972-1973 school year in order to help establish the advances, shortcomings and impediments in the achievement of total learning resource center philosophy. # A MULTIMEDIA SURVEY OF THE COMMUNITY COLLEGE LIBRARIES OF THE STATE OF ILLINOIS

NI 002582

This survey report is for the Legislative Library Development Committee of the Illinois Library Association. This report is the work of the Survey Committee.

1970

## MEMBERS OF THE LIBRARY SURVEY COMMITTEE

George A. Fox, Chairman  
Dean - Learning Services  
Prairie State College  
Chicago Heights, Illinois

Kenneth Allen  
Director - Learning Resource Center  
Waubesaee Community College  
Aurpra, Illinois

Loren Allen  
Director - Learning Resource Center  
Illinois Central College  
East Peoria, Illinois

Robert Baker  
Associate Dean - Learning Services  
Prairie State College  
Chicago Heights, Illinois

Mrs. Imogene Book, Librarian  
Rend Lake College  
Mount Vernon, Illinois

Carl Cottingham, Librarian  
John A. Logan Junior College  
Herrin, Illinois

Miss Elizabeth Cummings  
Head Librarian  
Illinois Valley Community College  
Oglesby, Illinois

David Johnson  
Director - Learning Resource Center  
Parkland College  
Champaign, Illinois

Richard L. Taylor  
Head Librarian  
Chicago City College  
Wright Campus  
Chicago, Illinois

## RECOMMENDATIONS

The community college is now a reality in Illinois, and the learning resource center philosophy is widely accepted, as evidenced by the results of the survey. Since no printed standards for the learning resource center exist, it is felt that standards should be developed and written to reflect the importance of the learning resource center in the total concept of the community college. It is hoped that the following recommendations will be of help in formulating such written standards.

This survey is a first attempt to ascertain the existing and planned roles of the community college learning resource centers in meeting the total educational communication and service needs of the community college. This is the first step in a plan to help clarify the steps for achieving the total implementation of the learning resource center philosophy. It is strongly urged that a second survey funded by our state organizations be conducted during the 1972-1973 school year in order to help establish our advances, shortcomings and impediments in the achievement of total learning resource center philosophy.

### I. STAFF

- A. The learning resource center (L.R.C.) should be administered as one unit under a single director.
  - 1. The director of the L.R.C. should be a part of the administrative staff, not necessarily a tenured position, and employed on the same basis as other administrators.
  - 2. If it is not a tenured position, the director's contract should be for two years or more.
  - 3. The director should be responsible for long range planning and all phases of budgeting.
- B. There should be three professional staff members in the L.R.C. for a community college with a full time equivalent enrollment of five hundred students and thirty faculty members.
  - 1. Two of the professionals should have no less than a Master of Science degree in library science, while the third should have a Master of Arts degree in one of the audiovisual disciplines.
  - 2. Professional staff should be added as enrollment increases, with one professional (M.S.L.S.) for each three hundred F.T.E. increase in students, and one professional (M.A. in Audiovisual) for each thirty faculty members.
  - 3. All professionals should have no less than faculty rank and should be able to achieve tenure.
  - 4. When appropriate, a professional consultant should be called in to support or supplement existing staff.
- C. Supporting staff should include technicians, secretaries and clerks.
  - 1. Training of this staff could range from a high school diploma to an associate of arts degree or bachelor's degree or special training.
  - 2. A ratio of two supporting staff members to one professional should be maintained as a minimum number.
  - 3. Student assistants should not be considered as part of the supporting staff or equated with them in any way.

4. Recognition of specific skills that have required special training should be given by differentiation in salary.
5. Recommendations for placement and salary should be made by the director of the L.R.C.

## II. BUDGET

- A. The ratio of the L.R.C. budget to the general and educational budget should be not less than 8%.
- B. This percentage should begin in the third year only if the basic collection and equipment have been acquired in the first two years.
- C. Since the state and federal governments directly support many functions of education such as vocational technical, counseling, etc., they should be urged to support directly and generously the L.R.C.

## III. COLLECTIONS

- A. The basic collection of twenty-thousand books is to be achieved in two years. The first ten thousand books must be ready before classes begin.
- B. Along with the basic book collection, the basic audiovisual materials and equipment should also be selected, catalogued, and organized for use.
- C. Second campuses within the district should be covered by recommendation stated in III, A & B.
- D. Two hundred and fifty periodical titles, not counting duplicates, should be part of the basic collection.
- E. When enrollment reaches a 2,500 F.T.E. students, the periodical titles, without duplicates, should be five hundred titles.

## IV. FACILITIES

- A. Student seating in the L.R.C. should accommodate a minimum of twenty-five percent of the total enrollment of the institution. (This is "head count" and not F.T.E. The community college is a commuter college; consequently, "peak loads" are crucial for determining seating capacity needs.)
- B. The director of the L.R.C. should be responsible for planning physical facilities and selecting furniture and equipment for the L.R.C. and its areas of responsibility.
- C. Since many community colleges are now housed in temporary quarters which are very limited facilities, the Illinois Junior College Board needs to have some publicized quantitative standards to use in approval of temporary, as well as permanent, facilities.

## V. AUTOMATION

- A. Pilot projects in computer automation for the community college learning resource center should be written and funded through federal and state programs.
- B. It is recommended that all programs for computer automation be written for the IBM 360 format, since this is the most generally used computer program in community colleges in Illinois.

## VI. AUDIOVISUAL EQUIPMENT

- A. Regional consortia should be established among the community colleges in which individual institutions would specialize in particular areas of production.
- B. Colleges in the consortia would exchange information and materials.
- C. These cooperative efforts could be funded on a state and federal level.

## VII. TELEVISION

- A. Television is a medium that is part of the Learning Resource Center services and must be the responsibility of the Director of the L.R.C.
- B. The committee recommends that the minimum standard be a complete distribution system of at least seven channels available in the L.R.C. so that broadcast TV 2500 MHZ, UHF, or VHF, video tape recorder, or other input devices can be employed to send information to each receiver from a central source.
- C. The system should have the capability of sending and receiving signals simultaneously.
- D. When a central TV distribution system is developed, appropriate staff must be employed for planning and implementing services.

## VIII. LECTURE HALL

- A. The Director of the L.R.C. should be responsible for the planning of media distribution systems implemented in all instructional areas.
- B. Materials used in lecture halls, and suitable for individual use, should be available in the L.R.C.

## IX. LEARNING RESOURCE CENTER ORIENTATION

- A. Student and faculty L.R.C. orientation must be planned and implemented by the professional staff of the L.R.C.
- B. Programs should be planned to accommodate individual needs of students in each area of curriculum.

## **X. LIBRARY TECHNICIAN INSTRUCTION PROGRAM**

- A. The Illinois Junior College Board should not approve additional Library Technician Instruction Programs until present programs have demonstrated their validity.
- B. The director of each L.R.C. should do a job analysis to determine actual needs and future needs for technicians.

## **XI. LIBRARY SCHOOLS**

- A. The curricula in the graduate library schools should be designed to educate and offer an option to people for the specific needs of the Community College L.R.C.
- B. It is strongly recommended by the committee that a representative of community college librarians be appointed to the advisory curriculum committees of the graduate library schools.

## **XII. LEGISLATION**

- A. Legislative action should be taken to assure that each community college will be able to have the support necessary to meet minimal requirements of staff, facilities, budget, materials, equipment, and services.
- B. Schools less than three years old should be exempt from the "maintenance of effort" requirement now being used as one criterion in connection with H.E.A. Title II, A federal grant program.

## INTRODUCTION

This Survey of Junior College Libraries was made under the auspices of the College and Research Library Section and the Legislative-Library Development Committee of the Illinois Library Association. The committee was composed of people presently involved as interested leaders in community college development. Care was taken also to select committee members representative of various geographic areas of the state.

The committee began planning the survey on April 10, 1968. The survey was to be taken during February and March of 1969, with all returns made by the first part of April, 1969. As a course of action, the committee decided to explore existing conditions in community colleges using multi media approach to determine what is planned in temporary and permanent situations under the Master Plan for Higher Education in Illinois. The complete range of survey topics includes:

- Range of Philosophy of Library Services
- Staff
- Budget
- Collection
- Audiovisual Materials
- Physical Facilities (Work Areas and Staff Areas)
- Physical Facilities (Student)
- Automation
- Audiovisual Equipment
- Dial Access Information Retrieval System
- Television
- Lecture Halls
- Library Orientation
- Library Technical Instruction Program

Questionnaire sections were developed by members of the committee in a series of meetings over a period of a year. Each section of the questionnaire was then refined by the whole committee. Preliminary to collecting the data, letters were sent to the community college president, the director of library services, and, if applicable, to the director of audiovisual services to explain the survey. A copy of the survey was sent to these people along with the explanatory letter. Information was given, too, that each college would be visited by a member of the committee for a personal interview with the director of library services and/or director of audiovisual services. Each member of the committee was also interviewed in turn at his own college. Most of the assignments for the personal interviews were determined by geographic location. Each person answering the survey questions could have help from a committee member assigned to his college if he so desired. The survey was to be available at the time of the interview. Follow up visits were also made in a few cases. Completed questionnaires were returned to the chairman for compilation. Various sections of the survey were summarized by those committee members who developed the questions originally. As with the development of the questions, the section summaries were then reviewed by the whole committee. Final conclusions and recommendations were written by the committee as a whole.

Fifty-seven questionnaires were sent out, and forty-six were returned and could be used for statistical analysis. Of the forty-six, six Chicago campuses responded and their questionnaires were used on an individual basis. Two questionnaires were sent to Black Hawk College, but the returns were compiled and used as though from one institution. For statistical analysis forty-five questionnaires were used as the number to equate with 100%. Of the eleven questionnaires not considered, only two represented institutions failing to respond. They are listed as colleges 3c and 3d on the tables in the Appendix. In Table I of the Appendix are listed the code numbers for all the community colleges. These are used where possible throughout the survey, since the purpose is to compare data rather than the colleges. For an individual analysis of each school, the Appendix should be consulted. The other colleges for which questionnaires could not be used were colleges 39, 44, and 47 which were no longer in operation or were phasing out of community college education; numbers 16 and 29 were so newly organized that data were incomplete; number 40 was in the process of becoming a four year institution; number 37, 42, and 49 were so specialized that the information to be gained would not be appropriate.

The arrangement of statistics and the tables are in the same order as that used by the Illinois Junior College Board in listing public and private junior colleges in the state. Therefore, in the statistical data, colleges numbered 1-35 represent public community colleges and 36-49 the private community colleges. Of the 36-49 group, only six private colleges have goals and objectives similar to those of the emerging public community colleges.

## LIBRARY SURVEY

### GENERAL INFORMATION ON ENROLLMENT

Two year college libraries are serving student populations that range from seventy full time equivalent (F.T.E.) to 4,650 (F.T.E.) with the distribution shown in the table below.

<u>ENROLLMENT (F.T.E.)</u>	<u>% OF TOTAL IN SURVEY</u>
Under 500	13.15%
500 to 1,000	33.33%
1,000 to 1,500	13.25%
1,500 to 2,000	8.44%
2,000 to 2,500	17.78%
2,500 to 3,000	4.44%
3,000 to 3,500	6.67%
3,500 to 4,000	0.00%
4,000 to 4,500	0.00%
Above 4,500	2.22%

With almost half of the colleges having an enrollment of 1,000 (F.T.E.) or less, it is important that developing guidelines for community colleges encourage highest quality collections and services for the growing institutions.

### GENERAL INFORMATION ON FACULTY

Although the largest student enrollment is served by the largest faculty group, the smallest student body is not necessarily served by the least number in faculty. This fact is substantiated by the analysis of the survey data. Numbers range from six faculty members to 270.75, using the full time equivalents. Distribution is given in the following tabulation. For example, 15.56% of the colleges answering the questionnaire have a faculty numbering fewer than twenty five while more than fifty percent of the colleges have more than twenty five faculty members but fewer than seventy five.

<u>FACULTY (F.T.E.)</u>	<u>% OF TOTAL IN SURVEY</u>
Under 25	15.56%
25 to 75	35.56%
75 to 125	26.67%
125 to 175	11.11%
175 to 225	8.44%
225 to 275	2.22%

## RANGE OF PHILOSOPHY OF LIBRARY SERVICES

As indicated by the tabulations on range of philosophy, Illinois Junior Colleges are far from traditional in philosophy of library services. There was common agreement on the traditional library, but many went beyond the idea of the printed materials used in a reading room and circulated by librarians as evidenced by the percentages representing the responses to the survey. All items that expressed philosophy were to be checked.

<b>I. Collection</b>	
Books and other printed materials	100.00%
Non-print materials	93.33%
Create original materials for instructional program	86.67%
Total responsibility for circulating and distribution	86.67%
<b>II. Equipment</b>	
Basic audiovisual equipment such as 16mm, tape-recorders, etc.	97.78%
Programmed instruction, video tape recorders, computer assisted instruction	62.22%
Audio system	64.44%
Video system	44.44%
<b>III. Facilities</b>	
Stack area, reading room work area, media production areas, photo-lab, audio studio for recording	60.00%
Electronics lecture hall with response system	33.33%
Closed circuit T.V., T.V. studio, F.M. radio	44.44%
<b>IV. Staff</b>	
Librarian(s), Clerk(s), Students	100.00%
Technician(s)	60.00%
Professionals in media and communications	46.67%
Professional consultants	40.00%
<b>V. Community Service</b>	
Use of facilities	68.89%
Use of collection	75.56%
Consultant services	55.56%

Of significance is the 86.67% who subscribe to the philosophy that the director of the learning resource center should have total responsibility for circulation and distribution of the collection of all learning materials. It would seem that librarians in the community colleges of Illinois are interested in having the library become a true learning resource center. Range of philosophy indicates that if librarians are given financial support to implement ideas and plans, resulting library services for all junior colleges in Illinois would be at least adequate.

## STAFF

A principal criterion in measuring the effectiveness of a learning resource center program is the number, nature and status of its staff. In the junior college philosophy of emphasis upon quality instruction and individual guidance, it follows that the learning resource specialist must be considered a vital team member in this teaching/learning process. The materials specialist's contribution is to provide the instructional resources necessary to support the objectives and goals of the curriculum.

The rapid creation of new junior colleges in Illinois has made the task of the materials specialist the very difficult one of trying to build a large collection quickly; making do with small, inadequate temporary quarters; and trying to make the resources usable to many types of students. At the same time, it has offered an opportunity for some new creative thinking regarding the place of the learning resource center in the college program.

## ADMINISTRATIVE ORGANIZATION

The survey shows that 75.5 percent of the colleges administer library and audiovisual services on a single service basis. The head of the learning resource center is directly responsible to the Dean of Instruction in a majority of the colleges (58.8%). In only 10.8 percent of colleges was he responsible to the President as is recommended by ALA Standards for Junior College Libraries. Nearly one fourth of the colleges did not answer this question. This suggests that some do not know clearly to whom they are responsible. Since the learning resource center should be a part of the instructional program, it is recommended by the Committee that the head of the learning resource center should be directly responsible to the Dean of Instruction. The head of the learning resource center should have a clear understanding of the administrative structure in which he works.

## MATERIALS SPECIALIST STATUS

It is disappointing to find that at the time of this survey, in six junior colleges, audiovisual personnel do not have faculty rank. Almost one fourth indicated ambiguity by not answering this question. In one college which employed a librarian and an audiovisual specialist, the librarian has faculty rank and the audiovisual specialist does not. Audiovisual professional personnel should have no less than faculty status. The head of the learning resource center many times is of administrative status. This is recommended by the Committee. It is best, however, for the other professionals to be on regular faculty pay schedule.

About 60 percent report that they do have tenure. It is suggested that if personnel are on the faculty salary schedule with faculty status they be on tenure. The director of the learning resource center who will probably have administrative status should seek an extended contract (more than one year).

## SALARIES

Beginning salaries range from a minimum of \$6,000, at two junior colleges, to \$7,800. These figures are for a basic nine month contract. Only nine of the forty-four colleges reporting on this question employ their audiovisual and library professionals for only nine months. Nine colleges report ten month contracts, ten report eleven month contracts and sixteen report twelve month contracts. Data on salaries of heads of learning resource centers was inconclusive.

## ACADEMIC PREPARATION

With only seven exceptions, the Master's Degree is required for professional learning resource center personnel in Illinois junior colleges. Two require the Doctor of Philosophy or Doctor of Education, which probably was a requirement for the director, and five require a Bachelor of Science Degree of a Bachelor of Science Degree working towards a Master's Degree.

### NUMBER OF STAFF MEMBERS

The objectives of the learning resource center program cannot be met without continuous cooperation and planning with other members of the instructional staff. There also must be time to work with groups and individuals to teach them how to use instruction materials in their learning processes.

The A.L.A. Junior College Library Standards set two professional librarians and at least one non-professional library staff member as the minimum required for effective service for an enrollment up to five hundred students. These standards did not include the audiovisual service as a function of the library. When audiovisual service is included, the Standards recommend the addition of another professional. The new Standards for School Media Programs recommends one learning resource center full time professional staff (library and audiovisual) member for every two hundred and fifty students, or fraction thereof. Other standards suggest using the number of faculty members as a more accurate determination of needs, especially audiovisual specialists who work primarily with faculty.

The study has revealed severe shortages in staffing in Illinois Junior Colleges.

The ratio of professional staff to students (F.T.E.) in the public junior colleges of Illinois is reported to be an average of one professional for every 576 F.T.E. students. If the ratio of F.T.E. students and professional staff has any meaning, the only conclusion that can be drawn from the statistical data is that community college learning resource centers are aiming at mediocrity.

### RATIO OF PROFESSIONAL TO SUPPORTING STAFF

In junior college learning resource centers a reasonable balance between professional and supporting staff is one to two. ALA standards do not specify an exact ratio. Standards for School Media Program say:

"In order to meet the needs of an effective media program and its diversified activities, it is recommended that there be at least one technician and one media aide for each professional, and as many additional aides and technicians as are needed to support special media programs of the school, such as television broadcasting, dial access and language laboratories."

Fifteen of the junior colleges responding do not employ enough supporting staff to maintain the recommended one professional to two supporting staffs. Eight colleges report a one to two ratio. Thirteen range from one to three, to one to eight.

Practically all junior college learning resource centers reported use of student assistants on an hourly, part-time basis. The average number of total student-assistant hours per week is 115. The average hourly pay rate is \$1.82. It appears that some colleges with a low percentage of clerical to professional staff are attempting to substitute part-time student workers for well-trained, more permanent clerical and technical workers. A variety of tasks in the learning resource center function can be assigned to student assistants, but they are not an adequate substitute for full-time workers.

### CONCLUSIONS AND RECOMMENDATIONS

Increased financial support on a continuing basis is required to enable junior college learning resource centers to overcome severe understaffing. A recommended minimum standard for a beginning learning resource center with up to five hundred students should begin with a minimum of three professionals; two specialists with Master's Degrees in Library Science and one Master of Arts in the audiovisual discipline.

Consideration should be given to increased state and federal aid to staff beginning colleges adequately. With the present financing situation, the beginning junior college in Illinois simply does not have the funds to hire the staff and purchase the resources that are needed in the first two or three years.

The head of the learning resource center should be directly responsible to the Dean of Instruction. Material specialists, librarians and audiovisual personnel should have no less than faculty status.

Salaries for beginning and upper-level positions should be increased to a level that will be competitive in the national frame of reference.

## JUNIOR COLLEGE LIBRARY SURVEY

### BUDGET

Adequate financial support for resources, staff, space and equipment is essential to a strong junior college library. To determine what is adequate would require a thorough examination of each local situation. However, there are certain factors that can be taken into account to determine if adequate financial resources are available. Such factors would include the size of the student body and faculty, whether the library is new or well established, the methods of instruction and the philosophy of library service.

According to the ALA Junior College Library Standards adopted by the College and Research Division of the American Library Association.

“The library budget should be determined in relation to the total budget of the institution for educational and general purposes, but the amount to be allocated to the library should be squarely based upon a program of optimum library service in support of the junior college’s goals. The execution of the library program as it is outlined in these standards normally requires a minimum of 5 percent of the total educational and general budget. ‘This minimum percentage’ is for a well established library with an adequate collection. It would have to be augmented if there is a rapid increase in the student body or in course offerings; it would again need to be increased if the library is responsible for an audiovisual program. The library budget for a newly organized junior college should be considerably higher than 5 percent. The figure might be determined by establishing rather precise acquisition goals over an initial period of several years.”

Comparing the library budget to the total institutional budget, the ranges were from 1.59% to 12% for public institutions, and 3.4% to 12% for private institutions. The following is a breakdown of each institution indicating the percentage of the total budget allocated to the library and whether the audiovisual program is included in the library budget:

<u>COLLEGE</u>	<u>% OF TOTAL BUDGET</u>	<u>A-V INCLUDED</u>
Belleville Area College	6.4	yes
Black Hawk College	5.0	yes
Amundsen—Mayfair Campus	5.1	yes
Bogan Campus	6.6	yes
Loop Campus	7.0	yes
Southeast Campus	5.4	yes
Wilson Campus	5.0	yes
Wright Campus	5.0	yes
Danville Jr. College	5.4	yes
College of DuPage	9.0	yes
John A. Logan College	5.0	yes
Elgin Community College	4.0	no
William Rainey Harper College	9.0+	yes
Highland Community College	5.0	yes

<u>COLLEGE</u>	<u>% OF TOTAL BUDGET</u>	<u>A-V INCLUDED</u>
Illinois Central College	5.0	yes
Illinois Valley Community College	6.1	yes
Joliet	3.6	yes
Kankakee Community College	6.6	yes
Kaskaskia College	5.0	yes
Kiskwaukee College	8.1	no
Lake Land College	5.0	yes
Lincoln Land Community College	5.0	yes
McHenry County College	12.0	----
Moraine Valley Community College	11.0	no
Morton	1.59	----
Olney Central College	5.0	----
Parkland College	7.0	no
Prairie State College	5.8	yes
Rend Lake	5.0	yes
Rock Valley College	4.8	yes
Carl Sandburg College	5.0	yes
Sauk Valley College	8.6	yes
Shawnee Community College	10.0	no
Southeastern Jr. College	4.0	yes
Spoon River College	3.0	----
Thornton Junior College	2.6	no
Triton College	7.0	yes
Waubensee Community College	8.1	----
Wabash Valley College	5.0	----
Central YMCA Junior College	3.0	yes
Felician College	12.0	yes
Lincoln College	5.0	yes
Monticello College	3.4	no
Robert Morris Jr. College of Carthage	3.7	yes
Springfield Junior College	6.0	no

Eighty two percent of the public junior colleges and fifty percent of the private junior colleges had budgets that were 5% of the total budget or over. The average of all public institutions was 5.9% and for private institutions 5.5%.

It should be noted that seventy percent of the public and sixty six percent of the private institutions included support for the audiovisual program. According to the ALA Standards, five percent of the total institutional budget is not adequate if the audiovisual program must be supported from the library budget.

In the section dealing with the collection, it was pointed out that only four junior colleges in Illinois met the minimum quantitative standards prescribed by ALA. Since most of the Illinois Junior Colleges do not have well established collections, the five percent standard is much too low. It should be noted that 77% of all junior colleges have budgets that are over five percent of the total institutional budget. However, only nine percent of the junior colleges have budgets that exceed ten percent of the total budget.

Total library budgets reported by the Illinois Junior Colleges showed a range from \$15,550.00 to \$424,338.00, and an average per student range from \$26.59 to \$271.20. If these were combined into an "average junior college in Illinois," the total library budget would be \$117,779.00 serving 1,597 students (F.T.E.). This would give an average expenditure of \$48.45 per junior college student in Illinois. The following is a breakdown of the junior colleges reporting their total library budget and the amount spent per student for library purposes:

<u>INSTITUTION</u>	<u>OPENING DATE</u>	<u>F.T.E.—1968 ENROLLMENT</u>	<u>TOTAL—1968 BUDGET</u>	<u>PER STUDENT TOTAL—1968</u>
Belleville Area College	(1946)	1,968	\$119,956	\$ 60.12
Black Hawk College	(1946)	1,995	52,044	26.59
Amundsen—Mayfair Campus	(1956)	2,061	117,794	57.20
Bogan Campus	(1960)	2,474	136,061	54.99
Loop Campus	(1962)	3,409	142,000	32.85
Southeast Campus	(1957)	2,228	121,423	54.56
Wilson Campus	(1934)	2,946	180,942	60.74

Trinity Christian College	(1929)	690	32,919	47.70

It should be pointed out that twenty three institutions were founded before 1965 and seven were founded after that date. The twenty three institutions founded before 1965 had an average budget of \$87,846.17, where the seven institutions founded after 1965 had an average budget of \$171,276.00.

The ALA Standards state that "a good junior college library usually spends twice as much for salaries as it does for book and periodicals." Applying this criterion to Illinois Junior Colleges, it is found that this is not generally true. However, in looking that the budget increases from 1966 to 1968, it was noted that increases for staff amounted to an average of 120% as compared to an increased average of only 22% for books and periodicals. This seems to indicate that the trend is in the direction of the standard.

The ALA Standards also indicates that the librarian should assume the leadership in planning for future needs. Of the junior colleges reporting, only five institutions indicated that the library budget is projected in order to cover a period of years.

Another important aspect of financial support is the amount of federal funds that are used for library purposes. Of the junior colleges in Illinois, 74% received H.E.A. Title II funds. Several of the institutions were not eligible because they were not operating before 1968, and several did not meet the maintenance of effort requirement.

The question was asked in the survey whether or not the person responsible for the library program felt that the budget adequately supported the school program. The response indicated:

Inadequate	13.5%
Below average	15.5%
Average	35.5%
Well	15.5%
Very well	20.0%

## CONCLUSIONS AND RECOMMENDATIONS

Increased financial support on a continuing basis is required to enable junior college libraries to overcome deficiencies in their resources and staff. The question arises as to whether individual institutions have adequate resources available to support the library program at the required level. It would appear on the surface that increased support across the board must be considered.

Consideration should be given to increased state and federal aid for junior college libraries. Federal funds for library materials, although helpful, are very inadequate.

It should be pointed out that some of the newer junior colleges have had difficulty meeting the maintenance of effort for H.E.A. Title II funds. The reason for this is obvious. Many of these schools made large initial investments during the first year or two of operation, and cut the budget once a basic collection was achieved. Institutions should not be penalized for having to make large initial investments to establish a basic collection of materials. Any institution that is less than three years old should be excluded from any type of maintenance of effort requirement.

It is interesting to note that seventy one percent of the librarians reported that they felt their budget was average or above. In looking at these budgets, it would appear that there should be some re-thinking on their part, as to what is adequate in terms of financial support.

Illinois junior college libraries face the challenge of finding increased financial support at a time when inflation threatens to eliminate any increases that might be allocated. Book costs have been rising at a rate of 10% per year and the cost of periodical subscriptions has been greater. Library salaries, which as already indicated may require two-thirds of the total budget, are also rising steadily. It is no longer unreasonable to assume that an increase of 25 to 30 percent in the total budget is necessary to maintain a given level of support for the library program.

After reviewing the budgets of the various junior colleges in Illinois, it became apparent that the 5% minimum standard prescribed by ALA is not adequate in terms of financial support. It is recommended that, once a minimum collection is established, 8% of the institution's total budget be allocated for library purposes.

## COLLECTION

It is essential for any junior college to have adequate library resources to support its educational programs. Adequate library resources would include books, periodicals, pamphlets, maps, micro-publications and audiovisual materials.

### BOOKS

One of the methods used to measure the adequacy of the book collection is to use professionally recognized quantitative standards. According to the ALA Standards for Junior College Libraries adopted by the College and Research Division of the American Library Association, a two-year institution of up to 1,000 students (F.T.E.) cannot discharge its mission without a carefully selected book collection of 20,000 volumes, exclusive of duplicates and textbooks. The standards also recommend that the book collection should be increased by 5,000 volumes for every 500 students (F.T.E.) beyond 1,000. The Standards also say that junior colleges with broad curriculum offerings may need a collection of two or three times the basic figure of 20,000 volumes.

Using the minimum standards of 20,000 volumes plus 5,000 volumes for every 500 F.T.E. above 1,000, it appears that only one public junior college and three private junior colleges meet the ALA Standards. The following is a comparison of the reporting Illinois Junior Colleges with the ALA Standards:

### PUBLIC JUNIOR COLLEGES

<u>College</u>	<u>Opening Date</u>	<u>Volumes Held-1968</u>	<u>F.T.E.-1968(1) Enrollment</u>	<u>ALA Standards</u>	<u>Difference</u>
Belleville Area College	(1946)	12,978	1,995	30,000	-17,022

PUBLIC JUNIOR COLLEGES---Continued

<u>College</u>	<u>Opening Date</u>	<u>Volumes Held-1968</u>	<u>F.T.E.-1968(1) Enrollment</u>	<u>ALA Standards</u>	<u>Difference</u>
Spoon River College	(1960)	7,846	892	20,000	-12,154
Thornton Junior College	(1927)	18,818	2,769	35,000	-16,182
Triton College	(1965)	13,000	2,946	40,000	-27,000
Waubensee Comm. College	(1967)	5,200	953	20,000	-14,800
Wabash Valley College	(1961)	7,031	755	20,000	-12,969

PRIVATE JUNIOR COLLEGES

Central YMCA Jr. College	(1961)	8,300	2,498	35,000	-26,700
Felician College	(-----)	25,310	64	20,000	+ 5,310
Lincoln College	(-----)	16,365	720	20,000	- 3,635
Monticello College	(1839)	28,776	351	20,000	+ 8,776
Robert Morris Jr. College	(1965)	7,926	692	20,000	-12,074
Springfield Jr. College	(1929)	20,962	690	20,000	+ 952

Of the public junior colleges reporting, there is a range of 3,000 to 82,784 volumes in their book collections. If this were combined into an "average public junior college in Illinois" there would be 15,500 volumes in the collection serving an average F.T.E. of 1,836 students. This represents an average of 8.4 books per student enrolled in a public junior college in Illinois.

The private junior colleges reported a book collection range from 7,926 volumes to 28,776 volumes. However, three out of the six private junior colleges reporting met the ALA Standards. The three that did not meet the minimum standards were quite deficient.

It should be noted that eighteen junior colleges were founded before 1963 and do not have the minimum standard of 20,000 volumes in their book collection. Of the eleven institutions that opened after 1964, none of them had the minimum standard of 20,000 volumes.

Another criterion related to the book collection is the rate of growth. There are no minimum standards relating to annual growth. However, various factors in addition to finances may determine the rate of growth; e.g., the number of students and faculty members to be served, whether the collection is new or well established, the breadth of the curriculum, the methods of instruction employed, the availability of other library resources, and the type of student being served.

Realizing that any basic requirement has doubtful validity, a reasonable standard, in most situations, is the addition of five volumes per student per year. Using this standard we find that the average annual rate of growth in public junior colleges is 2.4 volumes per student and 3.7 volumes per student in the private junior colleges.

Of all the junior colleges, it was found that over seventy-five percent of their collection was in the social sciences and humanities areas with the remainder divided between mathematics and physical sciences, biomedical sciences and technology. A summary of the collection distribution for public and private colleges is as follows:

(1) 1968 F.T.E. taken from Enrollment in Institutions of Higher Learning in Illinois: 1969, by G. J. Froehlich, and A. R. Lewandowski. University Bureau of Institutional Research. University of Illinois, November, 1969.

<u>Subject Field</u>	<u>Public Percentage</u>	<u>Private Percentage</u>
Humanities and General Works	39.4	45.8
Social Sciences	37.1	31.6
Physical Sciences and Mathematics	9.1	6.1
Biomedical Sciences	7.8	6.1
Technology	5.2	6.4

### PERIODICALS AND MICROFILM

Periodicals and newspapers constitute an invaluable source of reference material on many subjects. Again there is no basic requirement for the number of current journals and retrospective files of periodicals a junior college library should have in their collection.

The junior colleges reported current subscriptions ranging from sixty-two to five hundred twenty-five titles. Realizing the value of such material in the library it would seem that a minimum of two hundred fifty current periodical titles would be a desirable goal to achieve. However, as enrollments grow and additional programs are added, additional periodicals must be added.

Many junior colleges in Illinois are relatively new and are operating in temporary facilities. This situation makes it extremely difficult to have extensive retrospective files of periodicals. However, thirty of the junior colleges reported microfilm holdings of periodical titles and, therefore, these microfilm holdings have become an important element in building a library collection.

### AUDIOVISUAL MATERIALS

Audiovisual materials are a very important part of modern instruction. These materials should be cataloged and organized into the library collection.

Of the junior colleges reporting in Illinois, thirty-seven of them reported having some audiovisual materials in their collection. The following is a survey of the materials incorporated into the library collection and the number of junior colleges incorporating these materials.

<u>Type of Material</u>	<u>Number of Schools</u>
16mm motion pictures	21
8mm motion pictures	1
Filmstrips	28
Tape recordings	17
Phonorecords	33
Video tapes	9
Slides	11
Overhead transparencies	9
Study prints	3
Maps	2
Models	2
Realia	2

The only standards for audiovisual materials are the Quantitative Standards for Audiovisual Personnel, Equipment and Materials adopted by the Department of Audiovisual Instruction of the National Education Association. These standards recommend a minimum collection of 500 film titles, 2,000 filmstrip titles and 1,000 tape and disc recordings including laboratory materials. In comparing these standards to the junior colleges in Illinois, just one institution met the standards for films and none of them met the standards for filmstrips and recordings.

There are no other quantitative standards for other types of audiovisual materials (i.e., video tapes, slides, 8mm loops, etc.) but it would appear that most junior colleges would have difficulty in meeting any kind of standard if one did exist.

### **CONCLUSION AND RECOMMENDATIONS**

In terms of quantitative standards, it would appear that most junior colleges in Illinois have not made a commitment to meet the needs of their educational programs. Both book and audiovisual collections are of insufficient quantity to meet any of the recognized minimum standards.

The emphasis of this report has been on quantitative criteria because they are most specific and easiest to apply. Library collections should also be judged by qualitative criteria but such an approach would demand in depth study of each institution. However, in looking at the subject distribution of the book collection, it is reasonable to assume that a greater effort should be made to strengthen the vocational-technical fields; their needs must be met.

It appears that many junior colleges opened with less than ten thousand volumes and that they have twenty thousand at the end of the second year. A well developed library collection should also include audiovisual materials that meet the curricular needs of the institution.

## PHYSICAL FACILITIES (Student)

The total number of colleges responding to this section of the questionnaire was forty-five. Among the respondents, twenty-seven (60%) had incomplete information on their permanent buildings, fourteen (31.1%) had complete information, and four (8.9%) were already housed in their permanent facilities.

The total seating capacity for colleges still in temporary quarters was reported as an average seating capacity of 108.5 stations. The range between the forty-two respondents varied from 37 stations to 328 stations.

Total seating capacity projected for new permanent facilities was reported by fourteen respondents (30.4%). The average projected capacity provided seating for 377.5 students while the responses ranged from 200 stations to 1,200 stations.

Total seating capacity in permanently occupied quarters represented an average of 154.2 student stations for the four colleges responding with ranges from 55 stations to 256 stations. The one public community college in permanent quarters had planned for only 130 student stations representing 8.4% of seating capacity for total F.T.E. (see The Standards).<sup>1</sup>

In temporary quarters, thirty-six respondents reported an average of 13.2 percent of the F.T.E. could be seated at the present.

The ranges varied from less than 1 percent to 75 percent of the student body. One college revised the average by reporting they could seat 75% of their F.T.E.

Thirteen respondents (28.2%) reported their projected seating capacity for permanent facilities. The average percentage of F.T.E. seating capacity planned for permanent buildings was 21 percent, and the range was 12 percent to 33.3 percent.

Among the four colleges already in permanent quarters, the average seating capacity was 32.6 percent of the current F.T.E. ranging from 8.4 percent to 82 percent. The private college representing the highest seating percentage provided only 55 stations. With a day enrollment of sixty-five and an evening enrollment of seventy-one, the total seating capacity averages 82 percent. If this college were removed from the calculations, the average seating capacity was 16.1 percent, close to the projected statistics for the proposed permanent buildings (20.8%).

Thirty-five respondents (76%) reported an average of 2,705 square feet for the seating areas within the center (see standards).<sup>2</sup> Few colleges are currently meeting this standard; the ranges varied from a low of 506 square feet to 7,106 square feet.

Thirty-nine respondents (84.8%) reported an average of 71.5 seats were provided at tables in temporary quarters. For the permanent facilities, ten colleges (21.7%) reported an average of 129 tables per college.

Thirty-eight respondents (82.6%) reported that seats were provided in leisure reading areas. Of this number, twenty (52.6%) were able to state that seating for leisure reading had been provided in their temporary quarters; the remaining eighteen respondents indicated they did not have such seating arrangements. Among the twenty reporting seating for leisure reading, the average number of seats was 8.3 with a range from 3 to 30.

Only nine respondents (19.6%) were able to estimate the number of seats for leisure reading that would be provided in their permanent quarters; however, the increase of seats provided in temporary quarters was quite marked. The average number of seats to be provided was 78. But due to the wide range in the projections (24 - 300), and the small size of the sample, this average probably does not accurately indicate the number of seats for leisure reading actually to be provided in permanent buildings.

Among respondents already in their permanent buildings, one had made no provision for leisure reading space. However, this is the same small college that had the lowest total capacity (55) and the highest percentage of accommodation for total F.T.E. (82%). Thus, it may be conjectured that space for leisure reading is not a critical factor at this particular college. The remaining three colleges in permanent buildings provided, respectively, 4, 40 and 44 seats for leisure reading, or an average of approximately twenty-nine. The college providing the fewest seats for this activity is a public junior college, with a total F.T.E. (students) in 1968 of 1,500 and a total faculty F.T.E. of 106. This college has a total seating capacity in its center of only one hundred thirty, and seating at tables for sixty-eight persons. Since it is now permanently located, it would appear that small con-

<sup>1</sup>ALA Standards for Junior College Libraries suggest that seats in the library be provided for at least 25 percent of the student body, equated to full time.

<sup>2</sup>ALA Standards for Junior College Libraries recommends twenty-five square feet per reader as an acceptable standard.

sideration was given the growth factor, or that its realistic growth potential is very limited.

Of the forty-five respondents (97.8%) reporting on number of dry and wet carrels provided in their temporary and permanent quarters, more data concerning the temporary than the permanent buildings was forthcoming. For example, twenty-three respondents (52.3%) reported the number of dry carrels in their temporary buildings as against a mere seven (15.5%) who stated the number planned for their permanent buildings. On the other hand, few colleges, including those in permanent buildings, had wet carrels. Only ten (22.2%) admitted to having wet carrels in their temporary quarters. Average number of dry carrels in temporary buildings was twenty-six, while those contemplated for (or already installed in) new buildings averaged eighty-four. Since this is nearly a fourfold increase, it would appear that seating in dry carrels has been examined and has value for many community colleges in Illinois.

Wet carrels are not so widespread either in temporary or permanent quarters. Ten (22.2%) of the reporting colleges had wet carrels in their temporary quarters, and only seven (15.5%) could state that wet carrels were planned for their new buildings. However, among those reporting on both kinds of installations in temporary and permanent buildings, two colleges were planning to abandon dry carrels in their permanent buildings and go entirely to wet carrels.

Few colleges provided typing facilities for students, either free or rental, in their temporary quarters, only eight (17.9%) of the forty-five colleges so indicating. A large number of colleges reported that typing facilities were desirable, and they were planning to install them in their permanent facility. Of the twenty-two (47.8%) reporting in the affirmative, half were undecided as to whether the service should be supplied free or on a rental basis. Of the remainder, only two colleges had decided upon rental typewriters for students.

A similar response pattern developed with respect to the provision of a room for using microfilm. Whereas twenty-one colleges (45.7%) made no such provision in their temporary quarters, twenty-three either had provided or were planning to provide a room for using microfilm. That the respondents considered a microfilm room important is further indicated by the fact that twelve of the twenty-three colleges planning such a room in their permanent facilities also have them in their temporary quarters, where opportunity presumably has existed for evaluating their utilization.

Conference rooms for small study groups were virtually absent in temporary quarters; only eight colleges (17.8%) reported their existence. On the other hand, of the twenty-six respondents having information on plans for permanent buildings, twenty-three (88.5%) indicated that conference rooms for this purpose were being planned or provided.

With respect to a classroom in the center for instructional purposes, only two of the reporting forty-five colleges had such a room in their temporary quarters, while seventeen (65.4%) of the twenty-six having knowledge of plans for the permanent structures reported that a classroom had been included for the center.

The desirability of providing areas in which teachers can produce their own audiovisual materials was apparently subscribed to by a majority of the reporting colleges, although slightly over half (53.6%) of the respondents did not have such areas in their temporary quarters. Of those providing data on permanent buildings, all but four (16.4%) reported that teachers would have such areas available to them.

Providing similar facilities for students was apparently also regarded, although only eleven (24.4%) of the forty-five reporting colleges made such provision in their temporary quarters. All but eight of the twenty-six colleges reporting on permanent facilities were making plans for such areas.

### Summary

In summary, only four institutions at the time of this study met the accepted standard of providing seating for twenty-five percent of the student body. At the present, twenty-three colleges provide seating for only less than 10% of their total Full-Time-Equivalent and twelve colleges were extremely inadequate in providing seating for only less than 5% of their F.T.E. It is virtually impossible to have effective library utilization when seating is not provided for the users. The great majority of community colleges participating in this survey do not provide adequate seating for their students.

Eleven colleges now designing facilities are not planning to meet the ALA Standards for Junior College Libraries in terms of number of seating capacity, and one was only going to provide seating for twelve percent,

approximately one half of the recommended figures.

The responses to the questions on the availability of wet and dry carrels in both permanent and temporary facilities indicated interest in carrel seating; however, there tended to be a lack of information upon the numbers of carrels and their purposes. Perhaps the lack of information occurs because many colleges at the time of this study were only in very elementary stages of planning for their permanent facilities.

A majority of institutions which were designing new facilities were planning facilities for students to type, read microfilm, study in small groups, produce graphic audiovisual materials and produce tape recordings. A majority of the institutions also indicated that students would be allowed to check out audiovisual equipment for home use, and that there would be areas for teachers to produce their own audiovisual materials and for faculty to preview materials.

However, only 65.4 percent of the colleges planning new facilities were planning a classroom within the center. If the college is going to place great emphasis upon the library for instruction, it would seem necessary to place a classroom within the new library and audiovisual complex.

At the present, the community college library and audiovisual facility is inadequate in over three-fourths of the colleges in Illinois in providing facilities and services for their students and faculty in that . forty-one (91.6%) out of forty-five colleges did not provide adequate seating for their present enrollment according to ALA Standards.

### Recommendations

Institutions which are established in permanent facilities and those in temporary facilities should give additional attention in planning for expanded growth within the community college. They should work in order to improve the existing condition of the library and audiovisual services within their colleges. The facilities should not simply exist, they should serve the students and faculty.

Institutions planning new facilities should attempt to meet the Standards for seating. If the Standards are not met at the planning stages, it will be virtually impossible to meet them in the future.

The explosion of knowledge and various formats of future materials will increase the scope of the media center. The facilities of the center must be carefully planned in order to accommodate the educational objectives and programs of the institution and yet be adaptable for a changing environment within the institution.

## PHYSICAL FACILITIES (Work Areas and Staff Areas)

Thirty-one of the forty-five libraries are in temporary quarters and twenty-five deem these quarters to be inadequate. Eighteen campuses are involved with planning or construction of new buildings. Four librarians reported at least one portion of the permanent facilities inadequate in space. While thirty-nine colleges have space provided for facilities such as storage, processing, receiving, mailing and staff offices, only four reported specifically assigned space for student assistants, two for binding, seven for staff conference and six for staff lounge areas.

Although the range of philosophy held by librarians in the state indicates a wide range of services in the learning resource center, the question can be raised as to whether or not the services are really available when only six librarians have an area for duplication services, six a graphic arts area, six a photography laboratory and five an audio studio. A video production studio was provided in five colleges with transmission facilities in six. Seven colleges have preview rooms as part of the learning resource center facilities. In judging efficiency of arrangement of work areas, twenty-six reported the arrangement as inadequate, thirteen as adequate and two as superior.

There was such a wide range of number of square feet reported for the areas in the various colleges that any kind of average would present a warped picture. It is obvious in looking at the data in Table 7 that temporary facilities are completely inadequate for the staff and work areas in the learning resource center. The data on the permanent facilities is quite sparse but indicates that the learning resource center will have greater work and staff areas.

The table below contains response from librarians in regard to their participation in writing specifications for library planning and construction.

### LIBRARY PLANNING

34	Yes	Yes	Yes

## LIBRARY PLANNING---Continued

<u>College</u>	<u>Preliminary Draft</u>	<u>Working Stage</u>	<u>Final Plans</u>
35	No	No	No
36	Yes	No	Yes
37	Yes	Yes	Yes
41	Yes	Yes	Unfinished
42	Yes*	Yes*	Yes*
46	Yes	Yes	Yes
48	Yes	Yes	Yes

\*Librarian only consulted in matter of space and arrangement of work and staff areas.

In the preliminary draft of permanent facilities, twenty-six were consulted, while six were not. In the working drawing stage, twenty-seven were consulted, while five were not. In the final stages of planning, twenty-four were consulted, while four were not. Four institutions have not progressed to this stage of planning. Thirty-three librarians, or 73.33%, responded to this part of the questionnaire. Of these, 66.6% participated in all three planning stages. One librarian was not consulted at any planning stage; one participated only in the preliminary draft; and one in only the working stage. With only a few exceptions, librarians are being allowed to use their skills and specialized knowledge to take responsibility for planning learning resource center facilities.

## SUMMARY AND RECOMMENDATION

Philosophies held by the librarians are definitely being thwarted through lack of adequate facilities. Lack of facilities is also limiting the building of adequate collections, curtailing services to faculties and students stifling the addition of needed staff because of lack of quarters for them.

Since all building programs are being delayed because matching funds from the state are not readily forthcoming, it is apparent that community colleges must remain in temporary quarters beyond planned dates for moving to permanent facilities. In this situation, quantitative requirements for space allocation for temporary facilities should be developed, and used, by the Illinois Junior College Board.

## AUTOMATION

The area of automation is strikingly negative. Of the thirty-three libraries responding to the questionnaire, only thirteen indicated answers to the questions posed in the section of automation. These show an overall average of 11% working with or planning to introduce automation in any phase of library service.

It is a commonplace that library automation is of the future. Allen B. Veaner in an article in College and Research Libraries, January, 1970, introduces his remarks with this statement: "A 1967 White House report, Computers in Higher Education, begins with an arresting statement: 'After growing wildly for years, the field of computing now appears to be approaching its infancy.' Library automation has passed through similar throes, and we may be at the beginning of a period of new and significant development."

The conclusion would appear to be that automation is almost with us, and librarians must decide what is to be done about it.

The librarian must first of all be aware of the uses as well as the impact. Librarians now recognize that much of the jobber's billing is done by computer, certainly a library involvement if only an indirect one. But the most pressing questions are these: When are we going to begin automating the various processes of the library? How much automation do we want? How can automation be accomplished?

As librarians contemplate automation, they must be warned of the hazards in wholesale adoption of a system of automation. The individuality of the library is the primary consideration; perhaps all departments will give better service if automated; perhaps several will be more efficient. It could well be that one or none will be the final answer.

But it is important to recognize that automation will grow and spread, and in order for librarians to make a valid judgment they must know something about the capabilities of the machines.

The College and Research Libraries article quoted above continues: "Once in the grasp of an automated system, there is no turning back. Entering upon an automated system in any enterprise is practically an irreversible step. This is why reliability in automated systems is a factor of overwhelming importance for library operation. The thing about library operations is simply that they must be operational. Our users and our management demand facilities that work during all normal service hours, and sometimes beyond that."

When are we going to introduce automation to one or more phases of the libraries? Six libraries responded: two plan to have some automation in 1970 and two in 1971, one in 1969 and one in 1972. It is clear that automation should not be taken on lightly or merely for the sake of the computer as indicated from the data stated.

The questionnaire shows conclusively that the librarians responding are not opposed to either a systems analyst or to training one of the professional librarians to undertake the duty of analyst for the library. Sixty-six percent believe that library automation should be handled by a systems analyst, and fifty-five percent would prefer to train one of the professional librarians. See the summary table below for an analysis of those answering this section of the questionnaire.

## AUTOMATION

Libraries planning any automation	18%
Libraries with machine capability	71%
Libraries using IBM 360	30%
Libraries using IBM 1401	28%
Libraries planning conduits, etc., in new constructions	30%
Libraries planning conduits, etc., to be installed in present construction	20%

Libraries operating on campuses where systems analysts have been hired	17%
Libraries operating on campuses for which the hiring of a systems analyst has been planned	12%
Librarians favoring the hiring of a systems analyst	66%
Librarians favoring the training of a staff member	55%
Librarians planning on participating in MARC conferences	2%
Libraries subscribing to LARC reports	2%

#### SUMMARY

After careful study of these data on automation, the committee makes the following recommendations:

1. That a study be undertaken among the Illinois junior colleges to determine the feasibility of cooperative venture for automation of cataloging, processing, interlibrary loans, specialized collections, exchange of specialized functions and services and the study of cooperative projects.
2. That librarians set themselves the task of becoming familiar with the machines on their own campuses. This could be accomplished by assignment of a professional staff member to the task.
3. It is our recommendation the IBM 360, format, be the standard for any cooperative venture.

## AUDIOVISUAL EQUIPMENT

The purposes of this section were threefold: (1) to determine the equipment which is currently owned by each college, (2) to determine equipment which will be purchased in the near future and (3) to relate the findings to Standards in the audiovisual field. Unfortunately, after evaluating existing published standards applicable to the audiovisual field, the committee felt that such a relationship could only be made by the individual institution on the basis of its curricular needs. This does not preclude that there is a need for basic minimal equipment necessary to implement the instructional programs of the institution.

For an individual analysis of each school, one should consult the appendix. At the end of the appendix, the total for all colleges, the number of colleges reporting, the average of the colleges reporting and the range will be tabulated. Instead of presenting each and every unit of equipment separately in a discussion, only certain types of equipment will be reported.

Colleges 8, 12 and 32, as listed in Table 9 of the appendix, did not respond in a numerical count indicating the number of items on the equipment presently owned, and therefore were excluded from those questions requiring a numerical figure.

### AUDIOVISUAL EQUIPMENT PRESENTLY OWNED

Of all equipment reported, the 16mm motion picture projector was found in more colleges than any other item except the accompanying screens. All colleges reported they had this item of equipment. Twelve colleges reported they had 8mm film projectors with one college reporting ten projectors. These projectors were perhaps used in an audio-tutorial facility.

The loop projectors (8mm) were found in twenty-nine colleges while the filmstrip projector was found in thirty-seven colleges. Thus only two colleges did not have filmstrip projectors either silent or sound. (See Table 9)

Thirty-six colleges reported owning 2 x 2 slide projectors while only one institution owned a 3-1/4 x 4 slide projector. Only three colleges did not have a slide projector and only one of these previously reported not having a filmstrip projector.

Less than half of the colleges had television sets while a smaller percentage had radios. Thirty-one colleges reported monaural record players while the same number listed stereo record players. Only one college did not list a record player of either nature, monaural or stereo.

Concerning the reel to reel monaural tape recorders, the cassette recorders and the stereo tape recorders, three institutions listed no recorders available for student or faculty use. One college had relied heavily upon the cassette recorder listing 150 units while another listed that out of 33 recorders, 21 were stereo recorders. More colleges had reel to reel recorders than cassette recorders; however, the cassette recorder is relatively new to the audiovisual field and perhaps is more suitable to use in carrels because of its size.

Eleven colleges indicated they were without opaque projectors while ten colleges reported that no overhead projectors of the classroom type existed in their facility or were under their direction.

## AUDIOVISUAL EQUIPMENT OWNED BY ILLINOIS COMMUNITY COLLEGES

	<u>NUMBER OF COLLEGES OWNING ITEMS</u>	<u>AVERAGE OF ITEMS PER COLLEGE</u>	<u>RANGE</u>
16mm motion picture projector	39	5.9	0-25
8mm projector	12	1.9	0-10
8mm loop projector	29	3.6	0-15
filmstrip	37	5.3	0-18
sound filmstrip	17	1.8	0-6
2 x 2 slide	36	5.4	0-24
3 1/4 x 4 slide projector	4	1	0-4
radios	14	1.6	0-4
TV sets	17	2.6	0-15
monaural record players	31	6.6	0-48
stereo record players	31	4.6	0-50
reel to reel tape recorders	38	11.1	0-44
cassette tape recorders	26	12.4	0-150
stereo tape recorders	25	2.1	0-21
opaque projectors	34	2.2	0-6
overheads 10 x 10 (classroom)	38	10.8	0-50
overheads 10 x 10 (auditorium)	10	1.9	0-8
microprojector	8	1.5	0-3
filmstrip viewer	28	2.8	0-10
slide viewers	23	4.0	0-25
projection carts	37	14.1	0-47
video tape recorders	11	2.3	0-5
projection screens (permanent)	32	13.7	0-50
projection screens (portable)	37	5.4	0-24
teaching machines	5	5.4	0-20
public address (portable)	30	1.6	0-5
controlled readers	13	3.5	0-10
tachistoscope	8	1.4	0-2
calculators	5	1.2	0-2
drawing boards	6	1.7	0-4
loop antenna systems	6	1.2	0-2

Only ten schools reported that they had overheads for auditorium use.

Eight colleges reported the availability of microprojectors. One might expect a correlation between those colleges using auditorium type overheads and microprojectors; however, little existed.

Eleven colleges reported they had purchased video recorders. This would indicate that only 25 percent of the colleges had television equipment for production capabilities.

Five colleges listed that they had purchased teaching machines. No attempts were made to measure the level of sophistication of the units; however, one college owned twenty such units.

Thirteen colleges purchased control readers while only five had purchased tachistoscopes. Perhaps the equipment housed in reading laboratories was not under the direction of the person reporting on the questionnaire or there was an absence of reading laboratories in the colleges reported.

Six colleges reported they had loop antenna facilities available on their campus.

The equipment for the production of software was not as abundant as the hardware used in the classroom which was previously reported. For instance, only eighteen (less than half) colleges reported they had dry mounting presses and only twenty-seven had paper cutters. Less than one half of the colleges had equipment for the production of transparencies by the diazo process.

Five colleges reported 16mm cameras while eight colleges reported 8mm cameras; however, it was not revealed if the cameras were only purchased for and utilized by the athletic departments.

Eight colleges responded that they had process cameras while ten had equipped dark rooms. Twelve colleges had spirit duplicators while fourteen listed primary typewriters and seventeen copy stands. Approximately one half of the colleges had 35mm still cameras, film rewind, film splicers, tape splicers and thermo copiers.

Only three colleges had offset presses for printing activities.

Twenty colleges reported Xerox or similar duplicating devices. This figure would indicate that approximately one half of the colleges can make instant reproductions from print materials for faculty or student use.

Twelve colleges indicated they had some device for lettering.

An analysis of the remaining equipment would indicate fewer than one fourth of the colleges participating have the following items: 8mm sound projector, composer justifier, mimeograph, laminator, super 8 camera, 4 x 5 camera, photo headlining device, poster press, photo processor, photo modifier, embossograph, animation stand, electronic mimeo stencil, transparency scanner, slide duplicator and 2 1/4 x 2 1/4 camera.

Seven of the colleges reported they presently have a studio for audio recording.

At least four of the colleges are providing courses in the curriculum that have an emphasis upon the audio-tutorial approach. One would expect facilities for the production of master tapes.

Only five colleges have rapid reel to reel audio tape duplicators while five colleges have cassette duplicators. Three colleges report both types of duplicators in their institutions.

Silk screen equipment is available in five existing facilities.

#### AUDIOVISUAL EQUIPMENT OWNED BY ILLINOIS COMMUNITY COLLEGE BUT NOT FOR INDIVIDUAL CLASSROOM UTILIZATION

	Total Number of Colleges Reporting Items
Xerox	20
8mm projector (sound)	8
35mm camera	2
composer justifier	3
mimeograph	9
laminator	10
super 8 camera	7
4 x 5 camera	5
photo headlining	6
poster press	2
photo processor	1
photo modifier	2

**AUDIOVISUAL EQUIPMENT OWNED BY ILLINOIS COMMUNITY COLLEGE  
BUT FOR INDIVIDUAL CLASSROOM UTILIZATION----Continued**

	Total number of Colleges Reporting Items
lettering device	12
embossograph	7
animation stand	0
mimeo.stencil	2
slide duplicator	8
2¼ x 2¼ camera	7

**AUDIOVISUAL EQUIPMENT  
(Plan to Purchase)**

The structure of this section of the questionnaire was designed to measure only those items that a college did not have but was planning to purchase in the near future. However, many colleges reported they will purchase additional equipment of which they already own several items. Therefore, the actual responses of the institutions will be reported in the appendix.

These tables will not be discussed due to the inaccuracy of reporting numbers of items to purchase; however, results in a subsection will be reported as dealing with equipment necessary in establishing a graphics center.

Eleven colleges reported they were planning to purchase a dry mount press, a paper cutter, transparency equipment (diaz), and a 16mm camera.

Twelve colleges were planning on equipping a darkroom and purchasing 8mm cameras. Eight colleges reported they expected to purchase spirit duplicators, primary typewriters, film splicers and tape splicers. Twelve colleges were going to purchase a 35mm still camera, while ten were purchasing polaroid cameras, five purchasing process cameras, and nine purchasing copy stands. Ten institutions reported they were going to purchase film rewind units. To aid in the production of transparencies, seven colleges were purchasing thermo copy units.

Only four colleges were going to purchase offset presses. Eight colleges were planning to add an Xerox or other copy devices to their center.

Fourteen colleges were planning 8mm sound projectors while eleven were planning to add super 8 cameras.

Other items to be purchased by the colleges are the following: seven colleges were planning to purchase laminators; eight colleges, 4 x 5 cameras; six colleges, photo headlining devices; six colleges, photo processors; eight colleges, lettering devices; four colleges, embossographs; four colleges, animation stands; four colleges, mimeograph electronic stencils; six colleges, slide duplicators; and seven colleges, 2¼ x 2¼ cameras.

In addition, nine colleges were planning to add audio recording studios; thirteen colleges, tape duplicators; and five colleges, silk screen equipment.

**Summary**

At present, few colleges are placing importance upon utilizing media for effective support of the instructional program. The availability of equipment for instructors is quite limited. Some community colleges do not even possess tape recorders or slide projectors and the ranges in equipment usually vary considerably. For instance, ten colleges report that overhead projectors of the classroom variety are not available in their facility while another college reported they had fifty overheads.

The equipment used for the production of supportive software was not as abundant as the hardware for classroom use. Approximately one-half of the centers did not have access to copying devices. Less than one-half of the colleges had equipment for the production of transparencies by the diazo process while only twelve colleges indicated they had some device for lettering.

When analyzing facilities, one must realize the following: (1) that many colleges have offered classes one year prior to the survey and their financial resources are limited, (2) that the availability of equipment does not necessarily promote effective utilization, and (3) that space is not available in certain temporary facilities for audiovisual production.

In summary, a small number, under 20 percent, of the community colleges seem to be making attempts to meet the Standards in their present situation.

### Recommendations

Those institutions which are planning new library and audiovisual facilities should become more student and faculty oriented toward a media approach for the improvement of the instructional program.

The centers should establish facilities for the production of graphic materials to complement the existing equipment.

Increased attention should be given in developing a comprehensive unified approach to developing effective utilization of the present equipment and future acquisitions of audiovisual equipment.

## DIAL ACCESS INFORMATION RETRIEVAL SYSTEM

### INTRODUCTION

The following report consists of two parts: (1) a tabulation of data accumulated from questionnaires returned from forty-four (44) out of the forty-five (45) which were sent to private and public junior colleges in Illinois; (2) a summary and conclusion drawn from the analysis of the data as supplied by the participating colleges.

### TABULATION OF DATA RECEIVED

The following data are submitted to relate the responses to their corresponding questions in the same order and format in which the questions were directed in the questionnaire:

1. Part A. Do you have or plan to have on your campus a Dial Access Information Retrieval System?

Number responding 44                      Percentage responding 97.35%

Number not responding 1                      Percentage not responding 2.10%

Twenty-one (21) or 47.32% indicated they have or plan a system.

Twenty-three (23) or 52.12% indicated they do not have nor plan to install a system.

Part B. Do you plan to install on a temporary or permanent campus?

Number responding 23.

**Note:** Although only twenty-one (21) stated in Part A that they plan to be involved in dial access, twenty-three (23) chose to answer this question.

Temporary campus 4

Permanent campus 19

Part C. Do you plan to install audio or video or both?

Number responding 22

Audio 5 or 22.16%

Video 1 or 4.12%

Both 16 or 72.16%

Part D. If you plan audio, will you install one, two, four, sixteen, or thirty-two track decks?

Number responding 20

One track 2

Two " 5

Four " 10

Sixteen " 2

Thirty-two " 1

Combinations: one and two tracks 1

two and four tracks 2

Part E. If you install video, will you install black and white, color, or both?

Number responding 16

Black and white 9 or 56.4%

Color 1 or 6.4%

Both 6 or 37.8%

2. Part A. Do you plan to have the system connected to a computer?

Number responding 20

Yes 11

No 9

Part B. If the answer is yes, is it to be a switching, response, evaluation and records, or some other system?

Number responding 11

Switching 6 or 42.12%

Response 5 or 35.10%

Evaluation and records 3 or 21.6%

Other 0

3. How many student stations do you plan?

Number responding 10

**Note:** An accurate tabulation is impossible to draw from the responses received. The data were in various forms of number and symbols which made no definite correlation.

However, the responses would indicate that approximately 1,108 stations would be established. This number would average about twenty-five (25) stations, audio and video, for each of the forty-four (44) participants.

4. How many student stations will be audio active allowing for student recording and playback?

Number responding 9

**Note:** Of the nine (9) responding, only four (4) actually indicated that they would have audio active stations.

Total number of stations 305

Average number of stations per positive response 76

5. Part A. How many stations will allow for student control, i.e., stop, pause, rewind, fast forward, etc.?

Number responding 10

**Note:** Of the ten (10) responding, only five (5) indicated that they would have student controlled carrels.

Total number of stations 440

Average number of stations per positive response 88

**Note:** The responses to this question and the preceding one are inconsistent. More responses and stations were reported for question five (5) than were reported for question four (4).

- Part B. List the areas in which you plan student stations.

Number responding 10

College by questionnaire number	Areas designated
2	Library Language lab.
3e	Audiovisual center
9	Library reading room Learning laboratory
10	Learning resource center Sub libraries All classrooms-one speaker only

College by questionnaire number	Areas designated ---- Continued
11	General Campus
23	Reading areas Faculty-student modular
28	Science Language Learning Center
32	Lower level reading room Vocational-technical areas Classroom areas Hallway
36	Learning center Library Two classrooms-group listening
46	Learning resource center Dormitories Classroom buildings

6. Part A. What uses do you plan for the system?

Number responding 18

Note: The following responses are inconsistent to previous questions:

Programmed basis or independent instruction 6

Supplemental to classroom instruction 7

Recreational use and leisure time 4

Combination of items above 17

Part B. In what curricular areas do you plan to use a system?

Number responding 0

7. Will the supervision of equipment and production of materials be under the direction of one or more than one?

Number responding 28

Director of Learning Resources 8

Director of Instructional Materials 2

Director of Audiovisual Services 8

Director of Library Services 5

Director of Curriculum 2

Others (specify) 3 (no specifications given)

8. Part A. How do you plan to obtain materials (software) for your system?

Number responding 17

Purchase 2

Production 2

Combination of both 17

Part B. What percent do you plan to purchase, to produce?

Number responding 13

Purchase 39% -- average

Production 61% -- average

9. Do you plan released time for teachers from their teaching load for the preparation of materials?

Number responding 17

Yes 15

No 2

10. Check all persons who will be responsible for planning space allocations, number of student stations and selecting equipment.

Number responding 17

President 13

Dean of Instruction 15

Architect 12

Special Consultant 11

Director of Learning Resources 8

Director of Instructional Materials 2

Director of Audiovisual Services 10

Faculty Committee 6

Other (specify) 2 (no specifications given)

Note: Many of the participants indicated a combination of the above.

11. If you do not plan to install a system, do you have or plan to have any other type of audio or video retrieval system?

Number responding 0

### Summary

Since the subject of Dial Access Systems has been so widely discussed in the library field, it was felt that this subject should be included as one of the topics for investigation. The committee had three points in mind when constructing this part of the survey:

1. The Dial Access System is a medium of learning which should have its central control function in the learning resource center.
2. The Dial Access Systems are available in different forms and a preference for one type might be ascertained by considering answers given on the survey.
3. The function of the Dial Access System in the learning resource center can be active or passive in the dispensing of information through the use of wet carrels or the use of recorders.

Unfortunately, the results of the survey show an inconsistency and inconclusiveness which do not justify any firm recommendations or opinions. There may be a general lack of understanding regarding Dial Access Systems, or perhaps there is a feeling that the average F.T.E. of Illinois junior colleges does not require such systems.

The best recommendation, on the basis of data received, would seem to be that the needs of the individual learning resource center and the individual junior college should be analyzed most carefully.

New developments in tape recorders, high speed duplication of tapes and improved methods in recordings and transcriptions would warrant careful consideration of the types and kinds of equipment for installation in permanent buildings. Dial access information retrieval, loop antenna, cassettes and other systems or combination of systems should be considered in evaluating the needs of the institution.

## TELEVISION

### INTRODUCTION

Forty-five (45) public and private junior colleges participated in the entire survey, but only twenty-one (21) or 46.66% responded to the television questionnaire. For the purpose of this analysis it must be assumed that twenty-four (24) or 53.33% do not plan a television system.

The following report consists of two parts: (1) a tabulation of data received from the twenty-one (21) respondents; and (2) a summary, conclusion and recommendations drawn from the analysis of the data supplied.

### TABULATION OF DATA RECEIVED

The following data are submitted in the same order in which the questions were directed in the questionnaire:

1. If you now have a system installed (not a portable) on your campus, please indicate that you have an installation and answer the questions that are applicable.

Number responding 20

Number not responding 1

Yes 2

No 18

2. Part A. Do you plan to install a campus-wide closed circuit television system operated from a central studio?

Number responding 20

Number not responding 1

Yes 19

No 1

- Part B. If answer is yes, do you plan to install in temporary buildings or in permanent buildings when completed?

Number responding 19

Number not responding 1

Temporary buildings (exclusively) 0

Permanent buildings (exclusively) 17

Combination of both 2

3. If you plan to have a closed circuit television system, check the type(s) of areas you plan to have:

Number responding 18

Number not responding 3

Master distribution control for broadcasting prepared programs, i.e.,  
16mm films, video tapes, slides 17

Large studio for live broadcasting and for production of video tapes 17

Remote telecasting studios located throughout the building 10

Note: The majority of respondents are involved in some combination  
of the above.

4. Part A. Do you now offer or plan to offer in the future television courses transmitted on open circuit from telecasting studios located off campus?

Number responding 18

Number not responding 3

Yes 12

No 6

- Part B. If you are now offering course(s), list the course(s) and source(s).

Number responding 0

5. If you plan to have a system, is it or will it be black and white, color or both?

Number responding 17

Number not responding 4

Black and white 6

Color 2

Both 9

6. Will the supervision of equipment be under the direction of one or more than one of the following:

Number responding 17

Number not responding 4

Director of Communication Services	<u>0</u>
Director of Television Services	<u>4</u>
Director of Library Services	<u>4</u>
Director of Instructional Materials	<u>3</u>
Director of Learning Resources	<u>8</u>
Director of Curriculum	<u>2</u>
Director of Audiovisual Services	<u>8</u>
Others (specify)	<u>3</u> (did not specify)

Note: The majority of participants will be involved in various combinations of the above.

7. Will the supervision of production of materials be under the direction of one or more than one of the following:

Number responding 16

Number not responding 5

Director of Television Services	<u>2</u>
Director of Library Services	<u>3</u>
Director of Instructional Materials	<u>6</u>
Director of Learning Resources	<u>2</u>
Director of Curriculum	<u>3</u>
Director of Audiovisual Services	<u>3</u>
Others (specify)	<u>7</u> (did not specify)

Note: Four (4) of the respondents are involved in various combinations of the above.

8. Part A. Do you plan to have monitors in all of your classrooms?

Number responding 15

Number not responding 6

Yes 10

No 5

Part B. If answer is no, in what percent of classrooms do you plan to have monitors?

Number responding 5

Note: Five reported no to monitors in all classrooms, but only three of the five reported the percent of classrooms in which they plan to have monitors. The percent averages for the three reporting are 25%, 50%, and 10%. The cumulative average of the three is 28%.

9. Do you plan to use your system for the showing of 16mm films, slides, etc. in classrooms through classroom monitors?

Number responding 16

Number not responding 5

Yes 15

No 1

10. Part A. Do you plan to have two-way communications between studio and classrooms?

Number responding 17

Number not responding 4

Yes 14

No 3

Part B. If the answer is yes, will it be by interphone or any other system?

Number responding 0

11. Do you plan to provide faculty with released time from teaching load for the preparation and production of programs?

Number responding 17

Number not responding 4

Yes 14

No 3

12. Part A. Do you plan to have portable closed circuit systems that could be used separately from a campus wide system?

Number responding 17

Number not responding 4

Yes 13

No 4

Part B. If answer is yes, specify type of equipment and how it will be used.

Number responding 0

13. What source of programs?

Number responding 8

Number not responding 12

Leased and rented 29.7% (average of those responding)

Locally produced 70.3% (average of those responding)

Note: One reported that all its programs will be locally produced, and the remaining seven indicated that they plan to employ a combination of lease and rental and locally produced programs.

14. Do you belong or plan to belong to a group of colleges (consortia) for sharing of programs?

Number responding 18

Number not responding 3

Yes 12

No 6

15. Will students be taught programs such as television production or television technology using the studios and equipment?

Number responding 16

Number not responding 5

Yes 13

No 3

#### Summary and Recommendations

The purpose of the television section of the survey was to ascertain whether or not the learning resource center was responsible for this medium of communication at the various community colleges; to investigate whether a trend exists toward the one inch or the half inch formats in order to begin cooperative interchanges; to estimate what percentage of software will be rented, leased, or exchanged as opposed to the percentage of future local production.

Only 42.22 percent of the respondents accept the responsibility of the distribution of television as a natural function of the learning resource center. However, no trend toward a specific format could be determined.

A more definite answer was obtained in regard to the sources of software to be used in the individual community colleges. Thirty percent, approximately, would lease while seventy percent would produce their software

locally. The facilities, equipment, staff and supportive services needed for extensive local production of software would be extremely costly to the individual institution, however, and the committee feels that individuals should be urged to consider carefully this aspect of television production. It is suggested that perhaps more careful consideration be given to the establishment of consortia and other means of cooperating in the production and use of television software.

The tallies of the 46.66 percent reporting indicate that careful consideration has been given to the planning of space and programming of materials for instructional television. The responses in some of the replies are not definite about the persons involved in the supervision of equipment and the production of materials. This uncertainty is understandable because only two respondents at present have television in operation.

Institutions planning the installation of instructional television should define carefully the objectives they wish to obtain. In the early stages of planning, designation of the person or division who will be responsible for the selection of hardware, software and programming should be made. If qualified personnel are not presently on the staff, a consultant should be employed until a competent person or persons can be employed.

The collected information is interesting and valuable in the comparison of what is being done or being planned at the junior college level of education throughout the state.

## LIBRARY ORIENTATION

Informal library orientation is the most frequently offered type of orientation according to questionnaire responses. Tours of the library were conducted by 57.78%; lectures were given by 64.45%; conferences were held by 17.78%. Not so frequent were the testing programs (13.25%) and programmed instruction (6.67%).

Formal instruction is given by 11.11% of the colleges through required non-credit courses and by 2.22% through required credit courses. For the non-credit courses, 8.44% of the respondents have students meet fewer than two weeks and 2.22% have them meet from two to nine weeks. In the credit courses, the students meet two to nine weeks. Credit earned is two semester hours.

A library handbook is used by 57.78% of the libraries, and the same percent also have a section devoted to library in the faculty handbook.

No library orientation of any kind is provided by 2.22%; however, 31.11% have orientation for library given through a department of instruction other than the library.

While tours, handbooks, and lectures are the most frequent methods of library orientation employed, they afford students only a brief learning experience. With only 6.67% of the libraries using more than five means of library orientation, the program is only a token one at present. If the community college is the place for the student to be recognized as an individual, he must receive the necessary attention to make him knowledgeable about learning resources. Also, the professional staff will find working with faculty in development of instructional materials an easier task if new instructors know about learning resources and library services that are available. Evidence in the survey shows that only a small percent of new instructors are given any information at all.

Formal library orientation should be planned to accommodate the needs of students in each area of curriculum. The library should have the responsibility for providing orientation of students and faculty.

## LIBRARY TECHNICIAN INSTRUCTION PROGRAM

Only six of the colleges have a Library Technician Instruction Program, and ten indicate plans to initiate such a program. Of the ten, three planned to start in 1969, three plan to start in 1970, three in 1971 and one in 1973. Two colleges have advisory committees already formed.

One of the colleges reporting a technician program did not yet have students enrolled in the courses. In five schools, the Librarian is responsible for the program, and in one the Dean of Instruction coordinates the program. Two programs began in September, 1967, two in September, 1968, and one in September, 1969. Names for the programs are similar, with three being called a Library Technician Program, one a Library Technician Assistant's Program, and the remaining one a Media Technician Program. All five of the programs were preceded by community surveys establishing need for the program, with four advisory committees involved. Size of the committees ranged from six to twelve members, and in each case the committee acted in an advisory capacity. A high school diploma is the usual admission requirement for the technician program, although one school will admit a student who has reached twenty-one years of age. The total number of students enrolled in all the programs is one hundred seventy-one.

The number of semester hours required in library technician courses are 12 to 33, and required semester hours to complete a program are from 60 to 66. Electives are outlined in all of the programs except one, and guidance is given in choosing the electives. Content of the courses varies; however, all media are included. (The tabulation gives the detailed analysis.) Library staff does the teaching in three colleges and faculty instructors teach in the two remaining programs. Sixty percent of the teaching is by teachers who have a Master of Science in Library Science.

Only two colleges currently employ technicians; however, ten say they will employ them in the future. There is a conflict with philosophy since sixty percent indicated they would employ technicians. Only four report no possibility for employment of technicians. While salaries in general were not given for technicians, one college named the salary of \$6,000 yearly and another is paying \$350 to \$577 per month.

Although Illinois Community Colleges have the responsibility for specific vocational training beyond the twelfth grade, care must be exercised in assuring the graduate of a specialized two-year program a forthcoming job. It is quite possible to outline a course of study that will enable a student to serve as a technician in more than a library position -- for example, a teacher aide position which would call for some of the same skills as those of library technician. Smaller colleges especially should investigate the possibility of creating courses to satisfy the requirements of either type job and allow the student enough electives to permit him to have a choice between technician in a library or a similar technician's role.

## SUMMARY

Since 60% of the community colleges responding to this survey have fewer than 1,500 F.T.E. enrollment, the projected enrollment figures given in the Master Plan for Higher Education in Illinois have yet to be met for complete implementation of the plan. For the successful implementation of the Master Plan, all facets of community college programs - philosophy, curricula, student and community services, for example - must be examined and developed. It is the purpose of this survey to examine existing and planned library services. The committee analyzed from data received, each aspect of community college libraries - philosophy, staff, budget, collection, facilities, systems and services. Realizing that each aspect affects every other, the committee has formulated specific recommendations that, if implemented would further develop the total library program of community colleges of the state.

The most positive aspect of the survey was the lack of divergence of philosophy held by those responsible for existing library programs. Of significance is the more than 80% who subscribe to the philosophy of having total responsibility for circulation and distribution of the library, or learning resource center, collection. Also of importance is the fact that a three-fourths majority believe in the single service administrative organization. Librarians in the community colleges of Illinois are now ready to have the library become a true learning resource center. Given adequate financial support to implement philosophy, those now responsible for library programs could develop effective learning resource centers that would support the institutional programs.

The person responsible for the learning resource center must have a clear understanding of his responsibilities and must also know the organizational structure of the college. Since one-fourth of those completing the survey did not report to whom they are responsible, it is quite possible that they were confused in this respect.

Ratio of professional library staff to students enrolled in the community colleges indicates that the critical understaffing of libraries is one area that must be examined. The ration of the supportive staff compounds the seriousness of the problem.

Since the philosophy is for the generic use of the term library to indicate the total multimedia concept, a realistic approach to budgeting must be taken to give the financial support for implementing this philosophy. As indicated in the statistical data, severe understaffing exists and inadequate collections are evident, yet an average of only 5.9% of the total general and educational funds of the college are now obligated for learning resource centers. Certainly a higher percentage of the budget is needed to alleviate existing conditions. State and federal funds allocated on a much more generous and direct basis are necessary to assist in correcting the situation. Existing state and federal levels of support are now entirely inadequate.

Tabulation of the numbers of volumes in the broad subject areas shows that nearly all collections are supporting a liberal arts program. Since the Master Plan calls for a higher percentage of vocational-technical courses, greater effort must be made to develop collections to respond to the institutional needs. As noted in the analysis under collection, they are inadequate to serve the needs of students in Illinois community colleges.

Philosophies held by the librarians are definitely being thwarted through lack of adequate facilities. Lack of facilities is limiting the building of adequate collections, curtailing service to faculties and students and stifling the addition of needed staff.

Since all building programs are being delayed because matching funds from the state are not readily forthcoming, it is apparent that community colleges must remain in temporary quarters beyond planned dates for moving to permanent facilities. As a result of this situation, quantitative requirements for space allocation for temporary facilities should be developed, and used, by the Illinois Junior College Board.

Since two-thirds of the librarians favored hiring a systems analyst to evaluate the needs for learning resource center automation, the question is raised as to whether or not the librarians themselves feel a lack of knowledge and training in this area. Library schools are urged to provide the basic education for professional personnel to acquire knowledge and skill for automating functions of the learning resource center. Before making the decision for automating the learning resource center, the director should consider carefully the cost with relation to total budget or determine whether or not cost per function is within a practical level.

The committee holds the view that the community college learning resource centers are in the beginning stages of acquiring equipment to meet the needs of the instructional programs. As each college is encouraged to develop curricula individually, it is felt that the acquisition of equipment will follow along with acquisition of materials in the learning resource centers.

This survey is a first attempt to ascertain the existing and planned roles of the community college learning resource centers in meeting the total educational communication and service needs of the community college. This is the first step in a plan to help clarify the steps for achieving the total implementation of the learning resource center philosophy. It is strongly urged that a second survey funded by our state organizations be conducted during the 1972-1973 school year in order to help establish our advances, shortcomings and impediments in the achievement of total learning resource center philosophy.

APPENDIX I

1. Letter (Accompanying Questionnaire)
2. Questionnaire

Illinois Junior College District 515  
Chicago Heights, Illinois 60411  
312 756 3110

**Prairie State College**

Dear Sir:

A committee of the Illinois Library Association is making a survey of Community College Libraries and Library Services in Illinois. The purpose is to determine the present status of public and private junior college libraries and their services. Information gathered should indicate needs in budgeting, staffings, facilities, and services; and should result in the development of guidelines for establishment of more effective library services to junior college students in the state.

The information gathered in the survey should reflect the results of the research done in planning new library facilities which will enable an instructional program to benefit from modern, practical technological advances. In addition, the survey should be the means of pointing the way to cooperation between college, junior college, school and public libraries.

To gather information for the survey, a questionnaire is being sent to you and to the president of your college. To ensure uniformity of reporting, a member of the survey committee will make an appointment with you to discuss the various aspects of the questionnaire. Any questions you may have concerning the information desired will be answered during this interview.

The results of the survey will be collated and summarized and will be reported to the Legislative-Library Development Committee of the Illinois Library Association for positive action in initiating the use of the guidelines.

Sincerely yours,

George A. Fox  
Chairman, Illinois Junior College  
Library Survey Committee

Committee Members: Loren H. Allen  
(Mrs.) Imogene Book  
Carl Cottingham  
Kenneth Allen  
Richard L. Taylor  
(Miss) Elizabeth Cummings  
David Johnson

## RANGE OF PHILOSOPHY OF LIBRARY SERVICES

Check all items that express the philosophy of your institution.

### I. Collection.

- Books and other printed materials. \_\_\_\_\_
- Audiovisual materials. \_\_\_\_\_
- Create original materials for instructional program. \_\_\_\_\_
- Total responsibility for circulating and distribution. \_\_\_\_\_

### II. Equipment.

- Basic audiovisual equipment such as 16mm, tape recorders, etc. \_\_\_\_\_
- Programmed Instruction, Video Tape Recorder, Computer Assisted Instruction. \_\_\_\_\_
- Audio System. \_\_\_\_\_
- Video System. \_\_\_\_\_

### III. Facilities.

- Stack area, reading room, work area. \_\_\_\_\_
- Media production area, photo-lab, audio studio for recording. \_\_\_\_\_
- Electronic Lecture Hall with response system. \_\_\_\_\_
- Closed Circuit T.V., T.V. Studio, F.M. Radio. \_\_\_\_\_

### IV. Staff.

- Librarian(s), Clerk(s), Students. \_\_\_\_\_
- Technician(s). \_\_\_\_\_
- Professionals in media and communications. \_\_\_\_\_
- Professional consultants. \_\_\_\_\_

### V. Community Service.

- Use of facilities. \_\_\_\_\_
- Use of collection. \_\_\_\_\_
- Consultant services. \_\_\_\_\_

If the philosophy for library services at your institution differ from the above check list, please indicate differences.

i. inventory

j. budget analysis

k. cost analysis

l. budget accounting

6. Are conduits, outlets, etc., in sufficient number installed in your present building? Yes \_\_\_\_\_ No \_\_\_\_\_

7. If your answer is "no," -- is provision being made for installation in your present building? Yes \_\_\_\_\_ No \_\_\_\_\_

8. If you are presently engaged in a building program do your plans include not only sufficient conduits, outlets, raceway space, terminal space for present electronic needs, but also sufficient space for future equipment such as CAI terminals, slow scan, video, micro wave transmissions, facsimile transmissions.

What percentage of this space will be used upon the opening of your building?

\_\_\_\_\_ %

9. Has your college district hired an information retrieval consultant or a systems consultant? Yes \_\_\_\_\_ No \_\_\_\_\_

If "no," are provisions planned for a consultancy?

Yes \_\_\_\_\_ No \_\_\_\_\_

10. Do you believe that library automation should be handled by a systems analyst? Yes \_\_\_\_\_ No \_\_\_\_\_

11. Instead of hiring a systems analyst, would you prefer to train one of your professional librarians? Yes \_\_\_\_\_ No \_\_\_\_\_

12. Does your college have a computer? Yes \_\_\_\_\_ No \_\_\_\_\_  
Please indicate the make and model number.

\_\_\_\_\_

Will your library be allowed suitable prime time on the computer?

Yes \_\_\_\_\_ No \_\_\_\_\_

If your answer is "yes," approximately how much time?

Hours per day \_\_\_\_\_

Hours per week \_\_\_\_\_

13. Do you intend to participate in the MARC (the Library of Congress Machine Readable Cataloging) program? Yes \_\_\_\_\_ No \_\_\_\_\_
- If your answer is "yes," how will you participate?
1. Through subscription to magnetic tapes \_\_\_\_\_
  2. Through attendance at one of the ISAD/MARC (Information Science and Automatic Division of ALA and Machine Readable Cataloging) Special Institutes \_\_\_\_\_
  3. Both \_\_\_\_\_
14. Is your library currently subscribing to the LARC Reports? (Library Automation Research and Consulting Service, Newport Beach, Calif.) Yes \_\_\_\_\_ No \_\_\_\_\_
- Is your library receiving the LARC Newsletter? Yes \_\_\_\_\_ No \_\_\_\_\_
- Is any member of your staff planning to attend a LARC (one week) training program? Yes \_\_\_\_\_ No \_\_\_\_\_

### AUDIOVISUAL EQUIPMENT

Please indicate the number of items owned or distributed by your center. If you do not own the equipment and are planning to purchase it at a later date, please place a check (X) in the appropriate column.

<u>OWN</u>	<u>PLAN TO PURCHASE</u>	
_____	_____	16mm Motion Picture Projectors

_____	_____	8mm or Super 8 Sound Projector
_____	_____	Half Frame 35mm Camera

c. If you plan audio, will you install:

Mono Track Decks

\_\_\_\_\_

Dual Track Decks

\_\_\_\_\_

Four Track Decks

\_\_\_\_\_

16 Track Decks

\_\_\_\_\_

32 Track Decks

\_\_\_\_\_

d. If you install video, will you install:

Black and White

\_\_\_\_\_

Color

\_\_\_\_\_

Both

\_\_\_\_\_

2. Do you plan to have the system connected to a computer?

Yes \_\_\_\_\_ No \_\_\_\_\_

If answer is "yes," is it to be a :

Switching System

\_\_\_\_\_

Response System

\_\_\_\_\_

Evaluation and Records System

\_\_\_\_\_

Other

\_\_\_\_\_

3. How many student stations do you plan?

Audio

\_\_\_\_\_

Video

\_\_\_\_\_

Both

\_\_\_\_\_

4. How many student stations will be audio active allowing for student recording and playback?

\_\_\_\_\_

5. How many stations will allow for student control, i.e., stop, pause, rewind, fast forward, etc.

\_\_\_\_\_

List the areas in which you plan student stations.

Areas

Number of Student Stations

1. \_\_\_\_\_

1. \_\_\_\_\_

2. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

3. \_\_\_\_\_

4. \_\_\_\_\_

4. \_\_\_\_\_

5. \_\_\_\_\_

5. \_\_\_\_\_

OWN

PLAN TO PURCHASE

_____	_____	Cold Type Composer--Justifier
_____	_____	Mimeograph
_____	_____	Laminator
_____	_____	Super 8 Camera
_____	_____	4 x 5 Camera
_____	_____	Photo Headlining Device
_____	_____	Poster or Proof Press
_____	_____	Photo Stabilization Processor
_____	_____	Photo Modifier or Lacy-Lacy
_____	_____	Mechanic or Lettering Devices

_____	_____	Tape Duplicator
_____	_____	Cassette Duplicator
_____	_____	Process Camera
_____	_____	Silk Screen Equipment

**DIAL ACCESS INFORMATION RETRIEVAL SYSTEM**

This survey is for audio tapes and video tapes only.

If you now have a system installed, please indicate that you have a system and answer questions that are applicable.

Yes \_\_\_\_\_ No \_\_\_\_\_

1. Do you plan to install a system?

Yes \_\_\_\_\_ No \_\_\_\_\_

If answer is "yes," do you plan to install on:

a. Temporary Campus \_\_\_\_\_

Permanent Campus \_\_\_\_\_

b. Do you plan to install:

Audio \_\_\_\_\_

Video \_\_\_\_\_

Both \_\_\_\_\_

6. What uses do you plan for the system?

- 1. Programmed basic or independent instruction \_\_\_\_\_
- 2. Supplemental to classroom instruction \_\_\_\_\_
- 3. Recreational use and leisure time \_\_\_\_\_
- 4. Combination of items above \_\_\_\_\_

In what curricular areas do you plan to use the system?

- 1. \_\_\_\_\_
- 2. \_\_\_\_\_
- 3. \_\_\_\_\_
- 4. \_\_\_\_\_
- 5. \_\_\_\_\_

7. Will the supervision of equipment and production of materials be under the direction of one or more than one? Check the ones applicable.

- 1. Director of Learning Resources \_\_\_\_\_
- 2. Director of Instructional Materials \_\_\_\_\_
- 3. Director of Audiovisual Services \_\_\_\_\_
- 4. Director of Library Services \_\_\_\_\_
- 5. Director of Curriculum \_\_\_\_\_
- 6. Others (Specify) \_\_\_\_\_

8. How do you plan to obtain materials (software) for your system?

- 1. Do you plan to purchase materials? \_\_\_\_\_
- 2. Do you plan to produce materials? \_\_\_\_\_
- 3. Combination of 1 and 2 \_\_\_\_\_
- a. What percent do you plan to purchase? \_\_\_\_\_ %
- b. What percent do you plan to produce? \_\_\_\_\_ %

9. Do you plan released time for teachers from teaching load for the preparation of materials?

Yes \_\_\_\_\_ No \_\_\_\_\_

10. Check all persons who will be responsible for planning space allocations, number of student stations, and selecting equipment.

- 1. President \_\_\_\_\_
- 2. Dean of Instruction \_\_\_\_\_
- 3. Architect \_\_\_\_\_
- 4. Special Consultant \_\_\_\_\_
- 5. Director of Learning Resources \_\_\_\_\_

- 6. Director of Instructional Materials \_\_\_\_\_
- 7. Director of Audiovisual Services \_\_\_\_\_
- 8. Director of Library Services \_\_\_\_\_
- 9. Faculty Committee \_\_\_\_\_
- 10. Others (Specify) \_\_\_\_\_

11. If you do not plan to install a system, do you have, or plan to have, any other type of audio or video retrieval system? (Individual audio and video recorder and playbacks are not to be considered in this question.)

Yes \_\_\_\_\_ No \_\_\_\_\_

If answer is "yes," please give a brief description of your plan and equipment. Attach separate sheet if needed.

**TELEVISION**

1. If you now have a system installed (not a portable) on your campus please indicate that you have an installation and answer the questions that are applicable.

Yes \_\_\_\_\_ No \_\_\_\_\_

2. Do you plan to install a campus-wide closed circuit television system operated from a Central Studio?

Yes \_\_\_\_\_ No \_\_\_\_\_

If answer is "yes," do you plan to install in:

- Temporary buildings \_\_\_\_\_
- When new campus is completed \_\_\_\_\_

3. If you plan to have a closed circuit television system, check the type(s) of areas you plan to have:

- Master distribution control for broadcasting prepared programs: i.e., 16mm films, video tapes, slides. \_\_\_\_\_
- Large studio for live broadcasting and for production of video tapes. \_\_\_\_\_
- Remote telecasting studios located throughout the building. \_\_\_\_\_

4. Do you now offer or plan to offer in the future television courses transmitted on open circuit from telecasting studios located off campus?

Yes \_\_\_\_\_ No \_\_\_\_\_

If you are now offering course(s) list the course(s) and source(s):

- Course \_\_\_\_\_ Source \_\_\_\_\_
- Course \_\_\_\_\_ Source \_\_\_\_\_

5. If you plan to have, a system is it, or will it be:

- Black and White \_\_\_\_\_
- Color \_\_\_\_\_
- Both \_\_\_\_\_

6. Will the supervision of equipment be under the direction of one, or more than one, of the following:

Check the ones that are applicable.

- Director of Communication Services \_\_\_\_\_
- Director of Television Services \_\_\_\_\_
- Director of Library Services \_\_\_\_\_
- Director of Institutional Materials \_\_\_\_\_
- Director of Learning Resources \_\_\_\_\_
- Director of Curriculum \_\_\_\_\_
- Director of Audiovisual Services \_\_\_\_\_
- Others (Specify) \_\_\_\_\_

7. Will the supervision of production of materials be under the direction of one, or more than one, of the following:

Check the ones that are applicable.

- Director of Television Services \_\_\_\_\_
- Director of Library Services \_\_\_\_\_
- Director of Instructional Materials \_\_\_\_\_
- Director of Learning Resources \_\_\_\_\_
- Director of Curriculum \_\_\_\_\_
- Director of Audiovisual Services \_\_\_\_\_
- Others (Specify) \_\_\_\_\_

8. Do you plan to have monitors in all of your classrooms?

Yes \_\_\_\_\_ No \_\_\_\_\_

If answer is "no," in what percent of classrooms do you plan to have monitors?

\_\_\_\_\_ %

9. Do you plan to use your system for the showing of 16mm films, slides, etc., in classrooms through classroom monitors?

Yes \_\_\_\_\_ No \_\_\_\_\_

10. Do you plan to have two-way communication between studio and classrooms?

Yes \_\_\_\_\_ No \_\_\_\_\_

If answer is "yes," will it be by interphone?

\_\_\_\_\_

Other system (specify) \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

11. Do you plan to provide faculty with released time from teaching load for the preparation and production of programs? Yes \_\_\_\_\_ No \_\_\_\_\_

12. Do you plan to have portable closed circuit systems that could be used separately from campus wide system? Yes \_\_\_\_\_ No \_\_\_\_\_

If answer is "yes," specify type of equipment and how it will be used.

Attach sheet of paper if needed.

13. What source of programs? Leased and rented \_\_\_\_\_% Locally produced \_\_\_\_\_%

14. Do you belong or plan to belong to a group of colleges (consortia) for sharing of programs? Yes \_\_\_\_\_ No \_\_\_\_\_

15. Will students be taught programs such as T.V. production or T.V. technology using the studios and equipment? Yes \_\_\_\_\_ No \_\_\_\_\_

LECTURE HALLS

1. In your school's new facilities there will be \_\_\_\_\_ lecture halls.

2. The seating capacity for each is:

\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_
\_\_\_\_\_

3. The projection facilities for the lecture halls are:

- a. Rear Screen projection \_\_\_\_\_
b. Front Screen projection from portable cart \_\_\_\_\_
c. Front Screen projection from projection booth \_\_\_\_\_

4. The lectern will allow the teacher remote control functions for:
- 16mm \_\_\_\_\_
  - Slides \_\_\_\_\_
  - Random Access Slides \_\_\_\_\_
  - Television \_\_\_\_\_
  - Public Address System \_\_\_\_\_
  - Lights \_\_\_\_\_
5. The type of equipment for programming media in the lecture hall will be:
- Paper Tape Programmer \_\_\_\_\_
  - Magnetic Tape Programmer \_\_\_\_\_
  - Mechanical Electronic Programmer \_\_\_\_\_
6. The seating in the lecture hall will be:
- Auditorium type seats \_\_\_\_\_
  - Auditorium type with folding writing tablets \_\_\_\_\_
  - Stationary tables and chairs \_\_\_\_\_
  - Tables and chairs \_\_\_\_\_
7. The lecture hall(s) with response system will have a student station pannel containing:
- 4 button responder \_\_\_\_\_
  - 5 button responder \_\_\_\_\_
  - Individual light feedback \_\_\_\_\_
  - Vibrating feedback \_\_\_\_\_
  - Computer interface \_\_\_\_\_
8. The response system is adequate for immediate response from:
- 0 - 25 students \_\_\_\_\_
  - 25 - 50 students \_\_\_\_\_
  - 50 - 75 students \_\_\_\_\_
  - 75 - 100 students \_\_\_\_\_
  - 100 or more students \_\_\_\_\_
9. The production and maintenance of media for the lecture hall is the responsibility of:
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

## LIBRARY ORIENTATION

74

Please check each item that describes your library orientation program:

- |   |           |
|---|-----------|
| We have no library orientation of any kind.   | 1. _____  |
| We have a required, non-credit course.  | 2. _____  |
| The required, non-credit course is offered for:   |           |
| fewer than two weeks  | 3. _____  |
| two to nine weeks   | 4. _____  |
| a semester  | 5. _____  |
| We have a required, credit course offered for:  |           |
| fewer than two weeks  | 6. _____  |
| two to nine weeks   | 7. _____  |
| a semester  | 8. _____  |
| Credit earned for this library orientation course is:                                       |           |
| one semester hour   | 9. _____  |
| two semester hours  | 10. _____ |
| three semester hours  | 11. _____ |
| We have an informal library orientation which includes:                                     |           |
| tour of the library   | 12. _____ |
| lecture(s)  | 13. _____ |
| testing   | 14. _____ |
| conferences   | 15. _____ |
| programmed instruction  | 16. _____ |
| We have a library orientation given through a department of instruction other than library. | 17. _____ |
| We have a library handbook.   | 18. _____ |
| We have a program of orientation for new faculty.   | 19. _____ |
| We have a section of a faculty handbook devoted to library.                                 | 20. _____ |

**LIBRARY TECHNICIAN INSTRUCTION PROGRAM**

1. Do you have a Library Technician Instruction Program? Yes \_\_\_\_\_ No \_\_\_\_\_

IF "YES," CONTINUE ANSWERING QUESTIONNAIRE.

IF "NO," GO TO SECTION 3.

A. The coordinator of the Library Technician Instruction Program is:

Librarian \_\_\_\_\_

Dean of Instruction \_\_\_\_\_

Both \_\_\_\_\_

B. The program was started \_\_\_\_\_

C. The title of your program is: \_\_\_\_\_

D. A survey was made of the community and/or region to establish the need for such a program. Yes \_\_\_\_\_ No \_\_\_\_\_

E. An advisory committee was involved. Yes \_\_\_\_\_ No \_\_\_\_\_

If a committee was involved:

1. There were \_\_\_\_\_ members on the committee.

2. Its function has been \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_

F. The requirements for being admitted to the program are:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

G. There are \_\_\_\_\_ students currently enrolled in the program.

H. Are Library Technician Instruction Program courses currently being taught? Yes \_\_\_\_\_ No \_\_\_\_\_

I. Additional courses contemplated are: \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

J. The number of semester hours of Library Technician Instruction Program courses that are required to complete the program are:

\_\_\_\_\_

K. The number of semester hours credit needed to complete the Library Technician Instruction Program are:

\_\_\_\_\_

L. Electives are included in the outline of the program.

Yes \_\_\_\_\_ No \_\_\_\_\_

Do you suggest which electives should be taken?

Yes \_\_\_\_\_ No \_\_\_\_\_

M. All media are covered in the course of the study

\_\_\_\_\_ ,

or by separate courses \_\_\_\_\_ ,

or by integrated course content \_\_\_\_\_ .

N. Are Library Technician Instruction Program courses offered in day or evening schedules?

Day \_\_\_\_\_

Evening \_\_\_\_\_

Both \_\_\_\_\_

O. The courses are taught by the:

Library Staff \_\_\_\_\_

Separate Department \_\_\_\_\_

The instructor's special qualifications are:

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

2. At the present time, does your library employ any Library Technicians?

Yes \_\_\_\_\_ No \_\_\_\_\_

A. The scale of pay is:

\_\_\_\_\_

\_\_\_\_\_

B. If you do not now employ any Library Technicians are you planning to in the future?

Yes \_\_\_\_\_ No \_\_\_\_\_

IF YOU DO NOT HAVE A LIBRARY TECHNICIAN INSTRUCTION PROGRAM, ANSWER QUESTIONS IN SECTION 3.

3. Plans are being made to offer a Library Technician Instruction Program.

A. Probable starting date is: \_\_\_\_\_

B. Has an advisory committee been formed or involved. Yes \_\_\_\_\_ No \_\_\_\_\_

COMMENTS:

- 3a - Loop Campus is downtown and without a community.
- 3f - All departments own and operate AV equipment.
- 9 - A dual system where the functions are not designated between AV and Library.
- 11 - A dual system.
