## ABSTRACT

This report provides information about the performance of 1998 graduating seniors nationwide who took the ACT Assessment as sophomores, juniors, or seniors. Caution in applying these results is advised because these ACT-tested seniors may not be representative of the total population of graduating seniors. Information is provided according to the level of high school coursework completed. Average scores are reported for students who reported completing a core high school program of recommended courses and for students who did not complete a core program. Core or more is defined as 4 years of English or more, 3 or more years of mathematics, 3 or more years of social studies, and 3 or more years of natural sciences. In general, students who complete a core curriculum tend to earn higher average scores (average Composite score of 22.1 ) than students who do not complete core coursework (average Composite score of 19.3). This association holds true across racial and ethnic groups. Tables present trends in ACT composite scores. African American and Asian American scores have remained relatively stable over the last 5 years, but American Indian/Alaskan Native scores have steadily increased, from 18.5 to 19.0 , and Caucasian American scores have increased from 21.4 to 21.7. Mexican American and Puerto Rican/Cuban/Other Hispanic scores have varied as the size of the tested group has increased or declined. (Contains seven tables.) (SLD)

## ACT ASSESSMENT RESULTS

## National

 1998This report provides information about the performance of 1998 graduating seniors nationwide who took the ACT Assessment as sophomores, juniors or seniors. As you review and interpret the information provided, please keep the following in mind:

- ACT-tested seniors may not be representative of the total population of graduating seniors.
- This report provides selected information about the nation's ACT-tested graduating seniors. For more details, please refer to the 1998 national High School Profile Report.

## Average ACT Scores

National
1998

To help policy-makers gain a better perspective on the association between coursework taken in high school and performance on the ACT Assessment, this report provides information about the graduating class according to level of high school coursework completed. Average scores are reported for 1998 graduating seniors who reported completing a core high school program (a core or more program is defined as a typical college preparatory program) and for those who reported not completing a high school core program. (Refer to following page).

The academic preparation a student receives in high school correlates with success in college. ACT research indicates that students who prepare academically by taking a core high school program consistently score higher on the ACT Assessment than those who do not. These same students also earn better grades in college. These facts underscore the value of a strong basic program of study in high school.

## Levels of High School Coursework

## Core or More

Core or more is defined as a typical college preparatory program including:

- English (four years or more)

One year credit each for English 9, English 10, English 11. English 12

## - Mathematics (three years or more)

One year credit each for Algebra 1, Algebra II, Geometry One-half year credit each for Trigonometry, Calculus (not Pre-Calculus), other Math courses beyond Algebra II, Computer Math/Computer Science

- Social Studies (three years or more)

One year credit each for American History, World History, American Government One-half year credit each for Economics, Geography, Psychology, other History (European, State, etc.)

- Natural Sciences (three years or more)

One year credit each for General/Physical/Earth Science, Biology, Chemistry, Physics

## Less Than Core

Less than core refers to any high school program consisting of fewer courses than those included in core or more.

Average ACT test scores in English, Mathematics, Reading, Science Reasoning, and Composite for 1998 seniors who completed a core curriculum and those who did not are shown in Tables 1 and 2. In general, students who complete core coursework tend to earn higher average scores than students who do not complete core coursework. As Table 2 indicates, this association holds true across racial-ethnic groups. Table 3 shows that regardless of ethnic background, the average Composite score for students who completed core coursework has been consistently higher over the past five years than the average Composite scores of those who did not.

Each year ACT collects freshman course grades from hundreds of colleges and universities. Research has shown ACT-tested graduates typically have at least a 50 percent chance of receiving at least a "B" in the courses listed if they obtain the identified ACT score value or higher. The columns in the right side of the table present the percentages of ACT-tested graduates that earned a score at or above the typical cutoff score. For example, of those students who had core or more coursework, $83 \%$ had an ACT English score at or above 17.

Table 5
Summary of Course Placement Cutoff Scores

| Course Type | ACT Assessment Test Variable | Typical Cutoff Score | Percent At or Above The Typical Cutoff Score |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Those with Core Coursework | Those With Less than Core Coursework |
| English |  |  |  |  |
| Standard Composition | English | 17 | 83 | 40 |
| Advanced Composition | English | 21 | 56 | 33 |
| Mathematics |  |  |  |  |
| Elementary Algebra | Mathematics | 19 | 70 | 43 |
| Intermediate Algebra | Mathematics | 22 | 49 | 24 |
| College Algebra | Mathematics | 23 | 43 | 20 |
| Calculus | Mathematics | 27 | 20 | 8 |
|  |  | 24 | 35 | 18 |
| Chemistry Physics | Science Reasoning | 20 | 69 | 47 |

Academic success at specific colleges/universities depends on many factors, including the selectivity of the institution and the institution's grading practices. Based on the information presented above, the percentage of ACT-tested students who would likely receive at least $a$ " $B$ " in the identified courses is higher for those who completed the recommended core coursework. Students who earn ACT scores below those listed may need additional academic preparation to be successful in these typical college entry level courses.

Table 6 compares percentages of students choosing selected academic majors in 1994, 1996, and 1998. Overall the interest in most majors has been consistent during this period.

Table 6
Percentages Choosing Selected Majors By Graduation Year and Gender

Table 7 presents the average ACT Composite scores for various racial-ethnic groups from 1994 to 1998. Trend information is provided for each reference group represented by 500 or more ACT-tested graduates each year. Over the five-year period, the national average composite score for all graduates has increased from 20.8 to 21.0 . African-American and Asian-American scores have remained relatively stable. American Indian/Alaskan Native scores have steadily increased from 18.5 to 19.0 and Caucasian-American from 21.4 to 21.7. Mexican-American and Puerto Rican/Cuban/Other Hispanic scores have varied as the size of the tested group has increased or decreased.
