ABSTRACT
        To reaffirm its accreditation with the Accrediting
Association for Bible Colleges, Philadelphia College of Bible
(Pennsylvania) studied programs and recommended improvements
throughout the college. This study evaluates the operations of the
library committee to determine if it functions according to its job
description in the college's management manual. A survey of college
faculty was conducted to determine opinions about the functions and
role of the library committee. The survey achieved a 55% return rate
(n=28). Some library committee objectives were not being met. The
library committee made recommendations regarding library policy for
faculty and students, and worked with the faculty to build the
library collection, but did not help the college meet its objectives
as a Christian center for information in the community. Library
committee objectives did not provide guidelines necessary for the
most effective use of the library committee. A fully supported and
functioning library committee will enhance communication between the
faculty and library staff, improve the quality of purchases of new
library materials, and promote greater use of the library by the
student body. Recommendations include: revision of the purpose and
function of the library committee, development of a library committee
handbook and operations manual, and committee progress evaluations.
Appendices include the survey and survey results. (Contains 10
references.) (SWC)

AN EVALUATION OF THE LIBRARY COMMITTEE

AN EVALUATION OF THE LIBRARY COMMITTEE

AT PHILADELPHIA COLLEGE OF BIBLE

by

Lyn Stephen Brown

March, 1995

Philadelphia College of Bible has been
participating in a self-study process this past year
for reaffirmation of its accreditation with the Middle
States Association of Colleges and Schools and the
Accrediting Association for Bible Colleges. One of the
self-study committees was appointed to examine the
operations of the Learning Resource Center. One of its
recommendations was that the purpose and function of
the library committee needed to be reevaluated.

The purpose of this evaluation study was to
determine if the library committee was functioning
according to its job description given in the

management manual of the college. The three research
questions for this study were: "Are the objectives for
the library committee being met?", "Do these objectives
provide the guidelines necessary for the most effective
use of the library committee?", and "Should the
objectives of the library committee be modified to
allow for the most effective use of the library
committee?"

Four procedures were used to complete this
evaluation practicum. First, a review of the
literature was conducted. Second, a survey instrument
was designed, approved by the academic dean, and
administered to the faculty at a faculty meeting.
Third, the results were collected and analyzed.
Fourth, recommendations are given pertaining to the
existing objectives for the library committee and the
need to modify these objectives to meet the future
needs of the Learning Resource Center. An examination
of accreditation documents, a review of related
literature, and an analysis of the faculty survey led
to specific recommendations for changes in purpose and
function.

LIST OF FIGURES

Chapter 1

INTRODUCTION

Philadelphia College of Bible is a private non-denominational college offering traditional and non-traditional programs of study. The college began in 1913 to provide an opportunity for men and women to learn more about the Bible and to train them to more effectively minister in local churches. By 1970, the college had expanded to include professional programs in music, teacher education, and social work. Within the past two years, a graduate school and a degree completion program were begun.

Nature of the Problem

Philadelphia College of Bible began a self-study process this past year for reaffirmation of its accreditation with the Middle States Association of Colleges and Schools and the American Association of Bible Colleges (now known as the Accrediting Association for Bible Colleges). Committees were appointed to study various programs and recommend improvements throughout the college. One of the committees was directed to study the operations of the Learning Resource Center (or library) and to make

recommendations where it was thought necessary. One of
its major recommendations was that the purpose and
function of the library committee needed to be
reevaluated.

Purpose of the Study

The purpose of this evaluation study was to
determine if the library committee was functioning
according to its job description given in the faculty
handbook of Philadelphia College of Bible. The
objectives of the library committee were examined to
see if they were being met and if these objectives
provided the guidelines necessary for the most
effective use of this committee.

Significance to the Institution

The exponential growth in information resources
and the high costs associated with the information age
have put increasing demands upon library
administrations to purchase the most information for
the least amount of money. Faculty members question
the reluctance of library directors in immediately
purchasing their recommendations, especially if the
cost is quite high. It is vital to the college that
the library director work well with the faculty to

purchase the best materials possible. This evaluation study addresses the issues of function and utilization of the library committee that were raised by the self-study committee. This examination of the role of the library committee should build a stronger relationship between library staff, faculty, and students that will reinforce the college's commitment to excellence in its Learning Resource Center.

Relationship to the Seminar

This evaluation practicum is related to the Governance and Management seminar in that the library committee was evaluated as a part of a collective activity or process used to carry out the missions, goals, and objectives of Philadelphia College of Bible. Principles of assessment and evaluation are also appropriate ingredients in this practicum.

Research Questions

There were three research questions for this study. First, "Are the objectives for the library committee being met?" Second, "Do these objectives provide the guidelines necessary for the most effective use of the library committee?" Third, "Should the objectives of the library committee be modified to

allow for the most effective use of the library

committee?"

Chapter 2

REVIEW OF RELATED LITERATURE

Committee Descriptions

The college faculty handbook (1994) states on page
32 that the library subcommittee "... recommends LRC
policy in all matters relating to faculty and students.
Its responsibilities include working with the faculty
in building the LRC collection and helping the College
meet its objectives as a Christian center for
information in the community." At the beginning of the
section on subcommittees, faculty are told that "...
faculty subcommittee work is vital for the efficient
operation of an academic institution" (p. 29).

The American Association of Bible Colleges (1993)
states in its most recent manual under criteria that a
college should have a standing committee composed of
the director of the library, faculty, administration,
and students. Their primary function is defined as the
active promotion of library use and development.

Committee Function

The Commission on Higher Education for the Middle
States Association of Colleges and Schools (1992) makes
it very clear in its standards for accreditation that

faculty and library staff must work closely together to plan for collection development and utilization. This relationship is repeated in the Commission's handbook for institutional self-study (1991).

Catawba Valley Community College has produced both an advisory committee handbook (1992) and an advisory committee operations manual (1990). Both the manual and the handbook state that the advisory committee serves as a valuable resource for the college in providing counsel and guidance regarding the improvement of its educational programs. Some of its functions include assessment, policy proposals, feedback, public relations, and evaluation.

A survey of recent library periodical literature produced very few references to library committees. Most of these references were guidelines to follow in the selection of a library director and the role of the library committee in the selection process. An exception to this is an article written by Sheble and Hill (1994). A survey was conducted among a random sample of academic libraries in the United States. It was discovered that most academic libraries did not use their committees well, although most participants felt

positive about their participation. It was interesting
to note that smaller libraries were much more likely
than larger libraries to involve their committees in
significant decision-making roles. Although the
article focused upon librarian participation, their
conclusions included the importance of committees in
communication, interaction, and influence within an
institution.

Stueart and Eastlick (1981) devote ten pages to
the definition, levels, and implementation of
objectives for libraries in their book on library
management. Library committees are not specifically
mentioned, but an application can be readily made from
the examples of library goals and objectives found in
the appendix.

A Rutgers University Task Force (Wu et al., 1994,
p. 303) recommended that the faculty be involved as
committee members or liaisons in the purchase of new
materials and the assessment of current collections.
Open lines of communication were to be encouraged
through formal and informal channels. This could
include meetings of committees, standardized forms, and
questionnaires.

Relationship to the Practicum

In an evaluation of the library committee, it is clear from the literature that the committee ought not only to exist, but it also should function as a catalyst for change. The library staff and the faculty can work together for the improvement of educational resources in the library by fully utilizing the library committee. It can serve as a means of communication, recommend changes in policies and resources that will promote growth in service, resources, and public relations.

Chapter 3

METHODOLOGY AND PROCEDURES

Evaluation Design

Four procedures were used to complete this
evaluation practicum. First, a review of the
literature was conducted. The review focused primarily
upon academic library committees and their function at
other institutions of higher learning.

Second, a survey instrument was designed
(Appendix). This survey was an adaptation of the one
used by Sheble and Hill (1994). It was administered to
the faculty of the college to determine if the library
committee was meeting their expectations. This survey
included questions on what role the library committee
should play in the future.

Third, the results of this survey were collected
and analyzed using SPSS for Windows. Responses were
examined and recorded by category (Appendix).

Fourth, recommendations are given that address the
present role of the library committee and the future
changes that will impact the nature of the library
committee. The conclusion includes a synopsis of the
survey results, the review of the literature, and an

evaluation of the role of the library committee.

Assumptions

A number of assumptions were included in this study. First, it was assumed that the director of the Learning Resource Center had the experience and knowledge to evaluate an academic library committee. Second, it was assumed that the administration of the college would support the conclusions, even if it meant that the library committee would need to be modified. Third, it was assumed that the administration, faculty, and the director of the library would cooperate with each other in making the necessary changes recommended by this evaluation that would improve the role of the library committee at Philadelphia College of Bible.

Limitations

There are at least two limitations to this study. First, the responses to the survey instrument may not contain enough data to accurately evaluate the role of the library committee. Second, the recommendations are specific to the library committee at Philadelphia College of Bible and may not be applicable to other colleges.

Definitions

A library committee is defined for this study as an advisory committee chaired by the director of the library. Faculty members of the committee are appointed by the two academic deans of the college and the student representatives are appointed by the student government. Appointments are made for one year, but some members of the committee continue to serve for many years.

The Learning Resource Center at Philadelphia College of Bible is defined as a library in this study. The terms "library" and "learning resource center" are used interchangeably throughout the literature.

Chapter 4

RESULTS

The purpose of this evaluation study was to
determine if the library committee was functioning
according to its job description given in the college
management manual. As a result of the faculty surveys
returned, the following information was given.

Demographics

The returns from the surveys show that 55% (or 28
out of 51) of the faculty responded to the survey.
Only one survey participant was an adjunct faculty
member, while the remaining 97% consisted of 75% full-
time teaching faculty and 22% administrative faculty.
With regards to divisional affiliation, 3% were from
the degree-completion program, 6% were from the
graduate school, 14% were from the biblical division,
43% were from the professional division, and the
remaining 34% were from the general education division.
Thirty-two percent of the faculty responding to the
survey had worked at the college one to five years,
while 25% had taught at the college over twenty years.
The remaining 41% had worked at the college between 6
and 19 years.

Faculty Evaluation

Faculty members were asked to give their opinions
regarding the function and role of the library
committee in a survey (Appendix). In this section, bar
graphs are used in order to compare responses. In each
of the bar graphs, the following abbreviations are used
to indicate the faculty responses to the survey item:
SA = Strongly Agree, A = Agree, N = No Opinion, D =
Disagree, and SD = Strongly Disagree.

Statement 1: The committee ought to have members
from all divisions. There was a significantly high
level of agreement (82.1%) with this statement (Figure
1).
Figure 1. Faculty response to the following statement:
The committee ought to have members from all divisions.

Statement 2: The committee ought to have members
from all departments. There was a variety of responses
for this statement, but the highest group had no
opinion (Figure 2).

Percent
Figure 2. Faculty response to the following statement:
The committee ought to have members from all
departments.

Statement 3: The committee ought to have student representation. There was a high level of strong agreement (35.7%) and agreement (46.4%) with this statement (Figure 3).
Figure 3. Faculty response to the following statement: The committee ought to have student representation.

Statement 4: The committee should meet at least three times per semester. A majority of faculty agreed with this statement but a significant number had no opinion (Figure 4).

Responses

Figure 13. Faculty response to the following statement: The committee should be involved in solving problems in the library.

Statement 14: Faculty do not have enough time to serve adequately on the library committee. There was only a combined level (39.3%) of agreement with this statement, but there was a slightly larger combined level (46.5%) of disagreement with this statement (Figure 14).
Figure 14. Faculty response to the following statement: Faculty do not have enough time to adequately serve on the library committee.

Additional Comments

At the bottom of the survey form, faculty members were given the opportunity to respond to two questions:

1. Do you have any suggestions that would improve the function and role of our new library committee?

2. Other comments or suggestions?

The responses included suggestions on the improvement of communication between the library and faculty, additional input on the purchase of new materials, and requests for more information on the library in faculty meetings.

Chapter 5

DISCUSSION, CONCLUSIONS, IMPLICATIONS,

AND RECOMMENDATIONS

Discussion

It was expected that the evaluation of the library committee would prove useful in two ways. First, the relationship between the library staff and the faculty would be strengthened. Second, the members of the library committee would more clearly understand their function and role in the administration of the college.

The evaluation of the library committee provided a higher degree of cooperation between the administration of the college, faculty, library staff, and students. Communication was improved and new library programs are now being supported. The library committee now feels more involved in the college's efforts towards excellence in education. Participation in library committee business is now seen as vital rather than routine.

This study also resulted in the improvement of the educational process at Philadelphia College of Bible. The library is not only designed to maintain a collection of information resources needed by the

college community, but it also must provide information

services that meet the many and varied needs of

students and faculty. This evaluation study not only

addressed the function of the library committee, but it

may also be looked upon as a vehicle for changes that

may need to come in other committees at the college.

Faculty, administration, library staff, and students

realize that they need to work together to provide

those resources and services that will enable students

to deal with the rapid changes and challenges of our

world for many years to come.

Conclusions

It was discovered that not all of the objectives

for the library committee were being met. The library

committee was making recommendations regarding LRC

policy in matters pertaining to faculty and students.

It was also working with the faculty in building the

LRC collection, but it was not helping the college meet

its objectives as a Christian center for information in

the community.

The literature review supported the involvement of

the committee in matters related to faculty and

students, especially in working together as library

staff and faculty in building the LRC collection.
Sheble and Hill (1994) concluded that the effective use
of library committees would impact faculty cooperation
and support, provide an avenue for communication by the
students, and influence financial decision-making
within the administration of the institution.

The survey and the literature review also revealed
that the objectives for the current library committee
did not provide the guidelines necessary for the most
effective use of the library committee. The faculty
survey revealed some confusion in this area.

It is clear that the objectives of the library
committee need to be modified to allow for the most
effective use of the library committee.
Recommendations will follow that deal with this area.

Implications

The faculty and administration would do well to
support the library committee. A fully functioning
library committee will enhance communication between
the faculty and the library staff, improve the quality
of purchases of new library materials, and promote a
greater use of the library by the student body. The
administration will be prompted by both the faculty and

the library director to increase funding for the library and to plan for future growth and expansion.

Recommendations

It is recommended that the administration and faculty of the college work with the director of the library in revising the purpose and function of the library committee. The current library committee could be assigned this task after studying the results of the survey and examining the literature on this subject. A draft proposal could be given to the academic dean for review and approval by the end of the school year.

It is recommended that a library committee handbook and a library committee operations manual be written by both the director of the library and the library committee. These two documents could be given to the academic dean for review and approval by the end of the school year.

It is recommended that the director of the library, members of the library committee, and the academic dean evaluate the progress of the library committee at the end of the following academic year. Suggestions and recommendations could be collected for review and implementation.

It is recommended that a copy of this practicum
report be distributed to all faculty members at
Philadelphia College of Bible. Faculty members should
be encouraged to not only read the document, but be
given the opportunity to discuss its findings,
conclusions, and recommendations.

It is also recommended that further study be done
on the function and role of the library committee,
especially as it pertains to long-range planning.
Further study could include submitting a report for
publication in library periodicals.
