RATIONALE

The success of America has been dependent upon our ability to show initiative, work hard, and our willingness to take risks. Small businesses have grown to large businesses through the principles of entrepreneurship. Students have learned in other marketing units many of the skills useful in business. This unit will be useful in pulling together the skills already learned. The activities suggested will provide realistic opportunities for students to get involved with the process necessary to begin a new enterprise. Marketing teachers may use this unit for an indepth unit in preparing a business plan.

INTRODUCTION

An entrepreneur is someone who devises a plan to accomplish a business objective. That person then becomes a risk taker in the private enterprise system. The right to own property and profit from that property is the motivating factor over the thousands of new businesses being formed annually. Perseverance, experience, and optimism are just some of the ingredients necessary for success in an entrepreneurial endeavor.

The broad purpose of this curriculum guide is to present the student with a solid foundation about what entrepreneurship is, how it operates, and how it is managed.

APPENDIX A

As you study this unit, you should ask yourself, "How would this information apply to me if I decide to become an entrepreneur?"

Assume that you wish to go into business for yourself. Select the field or type of business you would like to enter. Then state the reasons why you selected this field or type. Write your answer in the space below. If more space is needed, use extra paper.

My choice for a type of business: _____

Reasons for my choice:

My choice for product/service involved:

Description of my choice:

APPENDIX B

Answer the following questions in order to complete the first self-analysis

1. Are you the kind of person who can get a business started and make it go? Answers to the questions below should help you decide. Under each question, check the answer that says what you feel or comes closest to it. Be honest with yourself.

Are you a self starter?

I do things on my own. Nobody has to tell me to get going.

If someone gets me started, I keep going all right.

Easy does it; I don't put myself out until I have to.

How do you feel about other people?

I like people. I can get along with just about anybody.

I have plenty of friends--I don't need anyone else.

Most people bug me.

Can you lead others?

I can get most people to go along when I start something.

I can give the orders if someone tells me what we should do.

I let someone else get things moving. Then I go along if I feel like it.

Can you take responsibility?

I like to take charge of things and see them through.

I'll take over if I have to, but I'd rather let someone else be responsible.

There's always some eager person around wanting to show how smart he/she is. I say let him/her.

How good an organizer are you?

I like to have a plan before I start. I'm usually the one to get things lined up when the gang wants to do something.

I do all right unless things get too goofed up. Then I cop out.

You get all set and then something comes along and blows the whole bag. So I just take things as they come.

APPENDIX B (cont.)

How good a worker are you?

___ I can keep going as long as I need to. I don't mind working hard for something I want.

___ I'll work hard for a while, but when I've had enough, that's it!

___ I can't see that hard work gets you anywhere.

Can you make decisions?

___ I can make up my mind in a hurry if I have to. It usually turns out O.K., too.

___ I can if I have plenty of time. If I have to make up my mind fast, I think later I should have decided the other way.

___ I don't like to be the one who has to decide things. I'd probably blow it.

Can people trust what you say?

___ You bet they can. I don't say things I don't mean.

___ I try to be on the level most of the time, but sometimes I just say what's easiest.

___ What's the sweat if the other person doesn't know the difference?

Can you stick with it?

___ If I make up my mind to do something, I don't let anything stop me.

___ I usually finish what I start--if it doesn't get fouled up.

___ I run out of energy sooner than most of my friends seem to.

Now count the checks you made.

How many checks are there beside the first answer to each question? _____

How many checks are there beside the second answer to each question? _____

How many checks are there beside the third answer to each question? _____

Adapted from U.S. Small Business Administration, Checklist for Going into Business, Small Marketers Aid No. 71 (Rev. ed.: Washington: US Government Printing Office, 1970), pp. 4-5.

APPENDIX C

Write an essay which includes your personal business experience, training/education in proposed field, personal business strengths and weaknesses, demonstrated willingness to take risks, and a brief plan for your personal development in proposed field. You may need to use more than one or two sheets of paper to adequately cover the information needed.

APPENDIX D

Comparison of major forms of business ownership.

<i>Characteristic</i>	<i>Sole proprietorship</i>	<i>Partnership</i>	<i>Small corporation</i>	<i>Large corporation</i>
Main features of ownership	One owner; no legal formalities required; unlimited liability of owner.	Usually two to four owners; formal partnership agreement; unlimited liability of general partners.	Small, closely held; any number of owners; formal charter and by-laws; limited liability of owners.	Large, with publicly traded stock; any number of owners; formal charter and by-laws; limited liability of owners.
Taxes	Personal income tax; in case of proprietor's demise, inheritance taxes must be paid by heirs, often forcing the sale of the business.	Personal income tax; inheritance tax problems similar to sole proprietorship.	Personal income taxes (some small and professional corporations can escape corporate income taxes); inheritance tax problems similar to sole proprietorship.	Corporate profit tax on earnings; personal income tax on dividends; inheritance taxes do not jeopardize business, since there are usually few large owners.
Management	Owners receive profits, have maximum incentive; employees can be motivated by bonuses related to profits; specialization of management possible only in large-sized proprietorships.	Partners have incentive in proportion to the extent of their ownership share; employees may be motivated by prospect of becoming a partner; specialization of management depends on skills and number of partners.	Owners motivated in proportion to their ownership share; employees may be motivated by partial compensation in the form of company stock; limited specialization of management.	Top management has limited personal monetary incentive; highly specialized management.

APPENDIX D (cont.)

<i>Characteristic</i>	<i>Sole proprietorship</i>	<i>Partnership</i>	<i>Small corporation</i>	<i>Large corporation</i>
Cost of formation and continued operation	None	Small; partnership agreement usually drawn up by attorneys; may be a minor expense to amend partnership agreement to add or eliminate partners.	Fairly small (\$1000 or less for uncomplicated corporation); must pay license fees in each state in which business is transacted.	Large (tens of thousands of dollars for complex company); must pay incorporation and license fees; must provide accounting reports and other information periodically to stockholders.
Ability to secure capital from owners	Limited by personal wealth of owner and owner's ability to borrow.	Limited by total wealth of general partners, investments of limited partners, and borrowing; capital must be retained in the partnership until it is dissolved, unless the partnership agreement provides otherwise.	Limited to owners' investments and corporate borrowing; devices like transfers of wealth into the corporation and promissory notes payable to the company may enable owners to become personally liable.	Limited to owners' investments; attractive to investors because of limited liability and transferability of stock; can assimilate a large quantity of capital from many small investors.
Life of organization	Limited to life or inclinations of sole proprietor; business may be inherited or sold.	Limited to length of time partnership agreement is in force.	Similar to sole proprietorship, but there is more flexibility in sale of business because stock exists.	Can continue for generations, if the corporation remains successful; when a market for the corporation's stock exists, ownership can be transferred easily.
Flexibility	Complete	Limited by partnership agreement and desires of partners.	Limited by corporate charter and bylaws, which are usually broadly drawn or amendable; may be prevented by charter from responding to a sudden business opportunity.	Limited by corporate charter and bylaws, which are usually broadly drawn or amendable; may be prevented by charter from responding to a sudden business opportunity.
Secrecy	Complete	Limited to partners.	Generally little information is available to the public, especially if the stock is not publicly traded.	Limited; corporation must provide stockholders with various accounting data and must submit to audits.

APPENDIX E

The Neather Company was operated as a partnership for several years by three partners. In order to gain more capital for expansion, they converted to a corporation. Only friends were allowed to invest in order to make it a closed corporation. The corporation has been very successful in its operation. Profits are such that double taxation is a burden to the owners. The stockholders are thinking about reorganizing it to a partnership. Questions for discussion:

1. Why is it called a closed corporation and how did that affect the sale of stock?
2. What is meant by double taxation?
3. What advantages will they have to give up if they form a partnership?
4. What are the advantages of the business remaining a corporation?

APPENDIX F

Have each student list ten (10) sole proprietorships, partnerships, and corporations in the business community.

APPENDIX G

To discover the target market, interview the owners of similar businesses and complete the target market sheet for each. Analyze the responses and with the information collected make a target market sheet for a selected business. Incorporate any new desirable markets.
