**TITLE** Rocky Mountain School Division No.15 Evaluation Model.

**INSTITUTION** HSP Humanite Services Planning Ltd. (Alberta).; Rocky Mountain School Div. No. 15, Rocky Mountain House (Alberta).

**SPONS AGENCY** Alberta Dept. of Education, Edmonton.

**PUB DATE** Dec 86

**NOTE** 135p.

**PUB TYPE** Reports - Research/Technical (143)

**EDRS PRICE** MF01/PC06 Plus Postage.

**DESCRIPTORS** Academic Achievement; \*Attitudes; Decision Making; Elementary Secondary Education; \*Evaluation Utilization; Foreign Countries; Governing Boards; Government School Relationship; Models; \*Outcomes of Education; \*Public Support; \*Resource Allocation; School Community Relationship; School Districts; \*School Effectiveness; School Personnel; School Surveys; State Surveys; Trend Analysis

**IDENTIFIERS** \*Alberta

**ABSTRACT**

This summary report presents methodologies, results, and conclusions of a two-year evaluation model implemented by an Alberta, Canada, rural school district to provide information for administrative and public decision making. An introductory chapter enumerates district goals for students and the model's objectives. Chapter 2 outlines how survey instruments were developed to measure objectives of student achievement, objectives of school leavers, student attitudes, stakeholder satisfaction, and resource utilization. Chapter 3 displays results in 21 tables and 64 charts. Observations, discussion, and conclusions are offered in chapter 4. Students are achieving at a higher level in English than in other courses, based on overall measurement. Students' migration and education trends reveal changes in educational continuation plans, point to job availability as the greatest problem in implementing plans, and reveal that 42 percent are attending postsecondary schools. A comparison of the 1985 and 1986 surveys indicates the following shifts of attitude among various groups of respondents: (1) among principals, fewer report having confidence in the board of trustees and fewer regard staff promotion procedures as fair; (2) the public perceives there to be fewer problems with vandalism and attendance; and (3) supporters see the availability of funds for education as a greater problem. Inconsistent application of achievement data to the model results because this area lacked depth; records for resource allocation were also insufficient. The attitude survey, however, provides administrators an annual snapshot of operations and raises respondents' awareness of issues. Five appendices include: (1) the school leaver survey form and follow-up; (2) attitude survey forms for students, parents, supporters, and school staffmembers; and (3) a model implementation handbook. (CJH)

# ROCKY MOUNTAIN SCHOOL DIVISION NO. 15

## EVALUATION MODEL

A study conducted by  
HSP Humanité Services Planning Ltd.  
under contract to Rocky Mountain School Division No. 15  
Funded by Alberta Education, Edmonton, Alberta  
December 1986

“A teacher affects eternity;  
he can never tell where his influence stops.”

*The Education of Henry Adams*

## Foreword

The use of evaluation techniques as part of managing publically funded programs is becoming increasingly common. As we move into the information age, a demand exists not only for accountability but also for "plain information", and this is especially true when a public program is being governed by an elected lay body.

This movement towards the use of evaluation has spurred increasing interest in evaluation techniques and practices as well as formal organizations of evaluation professionals. Such thrusts are sure to bring about not only increased use of evaluation as an integral part of the management process but should also reward us with more effective and efficient use of public dollars.

We sincerely hope that this project contributes in some small way to that wise use of public resources.

## Acknowledgements

We would like to thank Barrie Findlater for his support in developing and applying the evaluation model to the Rocky Mountain School Division. As with all new approaches, one must have a starting point to demonstrate a model. Barrie fostered that demonstration for his School Division.

Our thanks also go to the Steering Committee who so capably assisted in the implementation of the model, and in particular Dr. Warren Hathaway of Alberta Education who provided leadership in the early stages of the project's development.

In developing the model for the attitude survey, we would like to acknowledge and thank Edmonton Public Schools who developed the survey protocols and process, and in particular Dr. Harry Mosychuk who helped us with the implementation process.

The school follow-up survey was developed in conjunction with Kerry Paine. We thank her for dedication to this project, especially in the pre-testing phase.

Finally, we would like to thank Chris Holden, who acted as data manager of all of the paper produced in this study. Over the two years, we have handled millions of pieces of information, all of which have been organized and processed in a calm and diligent manner.

School Leaver Survey: Part 1

School Leaver Follow-Up

## CHAPTER ONE: INTRODUCTION

Recent initiatives by Alberta Education's Management and Finance Plan have fostered the need for evaluation processes which can provide information about the effectiveness and efficiency of a school district's operations. Such information enables a district to make more informed decisions on the management and resourcing of their operations, be more accountable for the programs for which a district is responsible and provide feedback to the district's many publics including parents, tax payers and Alberta Education representatives.

To this end, the Rocky Mountain School Division No. 15 contracted HSP Hum. nité Services Planning Ltd. to develop an evaluation model over a two year period. Funding for the project was provided by Alberta Education. The intent of the evaluation model was to identify results - based benchmarks which could be used over a number of years to examine trends and to determine operational objectives.

Policy was developed as an underpinning of the school system evaluation and is quoted in full here from Section AFI Education Policies Manual.

*The Rocky Mountain School Division No. 15 supports instructional, maintenance, and operation programs which will provide for the maximum educational growth in students in accordance with the "Goals of Schooling" advocated by Alberta Education, the needs of our students, and the financial limitations of the Division. The Board expects the best education for students at the lowest possible cost.*

*In developing the evaluation model the Board and administration identified that they would operate on the basis of several beliefs and assumptions, and while it was recognized that some may be intuitive, it was believed that such beliefs and assumptions can be used to generate system objectives which can be measured. The beliefs and assumptions were:*

1. *Students should be allowed and encouraged to perform at a level consistent with their ability.*
2. *Student performance in the Division should be approximately equivalent to provincial norms and standards.*
3. *The educational system operated by the Division should prepare students for further education or for entry into some productive occupation.*
4. *The potential and the self-image of students should be developed by the educational program. A positive self-image will be reflected in students' attitudes towards self, others, the school and education.*
5. *A satisfactory educational program will be reflected in the attitudes of parents, students, teachers, Division staff and ratepayers.*
6. *Good stewardship, on the part of the Division staff, will be reflected in care and attention to capital resources and financial management.*

In developing the evaluation model, the following objectives and indicators were adopted:

- a. *Students will achieve a level of knowledge and skills consistent with their ability.*  
Measures - student achievement scores  
- student aptitude scores
- b. *The achievement of students in the Division will equal or exceed provincial norms and standards.*  
Measures - student achievement scores
- c. *Upon completion of their studies in the Division, students will be adequately prepared for further study or for entry into a productive occupation.*  
Measures - student achievement scores  
- patterns of student migration and occupation
- d. *Students will develop positive self-images which will be characterized by positive attitudes toward self, others, school, and education.*  
Measures - attitude measures  
- vandalism  
- school dropout rates  
- attendance rates
- e. *The educational system will be operated to the satisfaction of the major stakeholders: parents, teachers, students, and ratepayers.*  
Measures - attitude measures  
- criticisms or plaudits received by phone or mail  
- staff retention/turnover rates
- f. *The Division will use its available resource to advantage.*  
Measures - expenditures (\$/pupil, etc.) in relation to other comparable jurisdictions  
- general state of facilities and equipment  
- minimum downtime because of equipment or facility malfunction or lack of repair

Measurement of some of these objectives required the development of new instruments or the modification of existing, while other objectives could be measured by examining existing information in a new way. Since Alberta Education was (and still is) developing evaluation models in other school jurisdictions, an atmosphere of learning, growing and sharing was facilitated by the Project Director in Alberta Education with those other jurisdictions. The overall expectation of Alberta Education was to pilot evaluation models in a number of school jurisdictions which, if proven efficacious, could be transported to other jurisdictions. Such portability was a major underlying objective of the evaluation process.

Rocky Mountain School Division No. 15 is a rural division which has its Division office in Rocky Mountain House in west-central Alberta. The Division operates nine schools ranging in size from a very small school with 15 students in Nordëgg to a large junior/senior high school in Rocky Mountain House. The Division has over 170 professional staff and just under 3,000 students.

The schools, their approximate enrollments and their grade levels are as follows:

School	Grade Levels	Number of Students (Sept/86)
Caroline	1-12	412
Condor	1-7	114
David Thompson	8-12	259
Leslieville	1-7	192
Locheam	1-6	295
Nordëgg	1-6	15
Pioneer	6-8	418
Rocky Elementary	1-5	412
Will Sinclair High	9-12	697

The project was conducted as an implementation model: Year one (school year 1984/85) was the start-up year when data sources were identified and the first data were collected. In Year two (school year 1985/86), the collection processes were refined and some comparison data were available. Due to the unique reports developed during the two years of the model's development, the data became an integral part of the school system's management process. Thus, some of the products of this model have already been put to use.

The major thrust of the Rocky Mountain School Division No. 15 Evaluation Model was to implement an Attitude Survey of students, parents, staff, and supporters. This was done for 1985 and 1986.

One final objective of the evaluation methodology was to ensure that the information that the researchers generated was capable of interpretation by its audience: namely the Board, the school Principals and the Superintendent. It has been noted that "it is more important to improve audience understanding than to provide a 'reductionist' summary". The users' understanding of information is paramount in evaluation processes. Such understanding was facilitated by the use of graphic data wherever possible and by always allowing easy comparison of data variables. Such simplifications should only foster understanding, not make the information simplistic.

This report is a summary report reflecting the methodologies, results and conclusions of the entire model. By far the largest portion of the model was the Rocky Mountain School Division No. 15 Attitude Survey 1985 and 1986 which exists as a separate document.

## CHAPTER TWO: METHODOLOGY

To measure the objectives as established for the evaluation model, two major instruments were identified. The first was the Attitude Survey that had been developed by Edmonton Public Schools (EPS). The Steering Committee agreed that adoption of the instruments used by EPS would be acceptable for inclusion in the model.

A second instrument was required to measure patterns of migration and occupation for school leavers. A purpose designed instrument for measuring this objective was developed.

Measuring the balance of the objectives identified in the model allowed the use of existing information readily available at the schools or the Division. This data required refinement or utilization in a different format.

The methodology section will describe each of these components relative to the objective being measured.

### 2.1 Student Achievement Objective 1 and 2

*Students will achieve a level of knowledge and skill consistent with their ability.*

*The achievement of students in the Division will equal or exceed provincial norms and standards.*

The measurement of these objectives was to be by student achievement scores and student aptitude scores. Early in the project (October 23, 1985), the researchers were advised that another jurisdiction was examining the correlation of the aptitude and achievement scores and that further work in this area for the Rocky Mountain School Division Evaluation Model should not be undertaken.

The results of the Departmental Diploma Examinations written in January and June of each year were used as the achievement scores. A student's final mark for each core subject is calculated by blending the school awarded mark with the Departmental Diploma Examination mark on a 50-50 basis. Credit is awarded to those students who receive a final mark of 50% or more.

The examination results were reviewed for the average scores of students in Rocky Mountain School Division (RMSD) and the average score for the Province; then for the subject areas and numbers of students in which RMSD students scored above the Provincial average. These data are provided for Division totals.

Examination scores were further analyzed for an achievement score, by school, where the number of students who wrote the examination was compared to the number of students who received a score over 50% and therefore received a credit. The marks were analyzed in this manner for the 1985/86 school year.

A further indicator of achievement was the number of Rutherford Scholarship awarded to RMSD. These scholarships are awarded in Alberta to those students who have an 80% average in five subjects in Grade 10 and 11, including English, two matriculation subjects and two other subjects. Also, they must have the 80% average in Grade 12 in English and four other matriculation subjects, which can include Math 31 or a foreign language.

All of these data were readily available at the Division level and only required interpretation in a new format to provide the information in Chapter Three: Results.

## 2.2 School Leaver Survey Objective 3

*Upon completion of their studies in the Division, students will be adequately prepared for further study or for entry into a productive occupation.*

Measurement of objective #3 required that patterns of student migration and occupation be determined. After reviewing the literature and examining graduate surveys from Grant MacEwan Community College, Lake Washington School District #414, N.A.I.T., W.P. Wagner High School and the Report of Early School Leavers in Northern Alberta , items were selected for a survey protocol.

In the course of reviewing the literature, it became apparent that the most effective follow-up method was to survey students just prior to their leaving school to determine, among other items, locational information for the following year<sup>2,3</sup> and also to determine their occupational and educational goals *prior to leaving school*. Two survey instruments were developed from the survey items that had been selected. They were called School Leaver Survey: Part 1 and School Leaver Follow-up.

A first draft of Part 1 was formulated in April 1985. On May 21st, 1985, a pilot test of the instrument was conducted with 24 Grade 12 students at Sturgeon Composite High School, N. Ma., Alberta. Comments expressed by the students and statistical analysis using Chi-square helped refine the questionnaire and minimized ambiguities.

In June, 1985, the School Leaver Survey Part 1 was administered to 112 Grade 12 students representing 49% of the enrolled Grade 12 population as the first step in the implementation process.

Part 1 was developed to be administered to all Grade 12 students about one month prior to their leaving school. At that time students know fairly well what they plan for the coming year and usually know addresses or telephone numbers where they could be contacted in the forthcoming year.

Appendix One provides the finalized survey instrument.

The second survey instrument to be developed was the School Leaver Follow-up which was pilot tested on two groups of students. On September 13, 1985, 10 students from the School of Nursing at the University of Alberta completed the survey and assisted in refining its content. Since that number of students was so small, a second pilot with 22 Grant MacEwan students was conducted in late September 1985. The finalized survey instrument is shown in Appendix Two.

Three days prior to the Easter holiday in 1986, the School Leaver Follow-up was mailed, with a return stamped envelope, to those students of RMSD who had completed the Part 1 Survey. The Follow-up was mailed to the addresses provided in Part 1. The researchers anticipated that most students would have contact with their home at holiday time. Since contact with ex-students is difficult yet critical to the validity of a follow-up survey, students had been asked to provide the addresses and telephone numbers of two people who would know how to get in touch with them.

A telephone follow-up was initiated over the Easter holiday period and continued for four weeks following the mail-out to elicit a high response rate.

## 2.3 Student Attitudes

### Objective 4

*Students will develop positive self-images which will be characterized by positive attitudes towards self, others, the school and education.*

Measurement of objective #4 was based primarily on a Division wide Attitude Survey. In addition, measures of vandalism and absences were examined using data that was collected by the schools and the Division office over the period of the study.

#### 2.3.1 Attitude Survey

An Attitude Survey of the students, parents, staff and supporters of RMSD was implemented twice during the period of study: the first on April 26, 1985, and the second on April 10, 1986. Student responses to the questionnaires were reported in four categories:

Grades 1-3  
Grades 4-6  
Grades 7-9  
Grades 10-12

For ease of administration and to ensure an adequate sample, all students in the School Division were surveyed on the same day. A random sample of each category of students, by school, was then selected by the researchers.

The sample sizes were calculated using EPS's guidelines for sampling.

Special education students were surveyed using the category of survey contingent on their capability, as determined by the classroom teacher. These surveys were then incorporated into the appropriate category, by school.

In instances where fewer than five students occurred in one category, those data were included in the Division total only to ensure anonymity.

Parents of all students attending RMSD schools were potential candidates for the survey. A random sample of each category of parent was selected by school:

Elementary  
Junior  
Senior

The survey instruments were mailed to the selected parents with a stamped return envelope addressed to the office of the researcher. A telephone follow-up was initiated 10 days following the mail-out and was conducted for 4 weeks.

All staff of RMSD were surveyed by school and staffing category namely:

Principals  
Certified School Staff  
Secretary/Teacher Aide  
Central Administration  
Caretakers

The data for staff were tabulated for a Division wide total where the number of respondents was five or fewer.

School division supporters were also surveyed. The Division provides education to students in the following three municipal districts:

Village of Caroline  
Town of Rocky Mountain House  
Municipal District of Clearwater

The questionnaires were mailed to a random selection of supporters from each municipality and in 1985 were followed-up by telephone. In 1986 a larger number of surveys were mailed out and no telephone follow-up was used. All questionnaires had a stamped return envelope addressed to the office of the researcher.

The Municipal District of Clearwater and the Town of Rocky Mountain House provided the researchers with the names and addresses of public school supporters. From these lists a random sample was drawn. For the Village of Caroline, all supporters who were listed on the town register were mailed a questionnaire.

All the questionnaires were collected, checked for appropriate completion and then the raw data were entered into the computer and tabulated. The sum of each category of data was calculated into percentages (not weighted) and presented in a graphic form for the Division total and in tabular form for each school.

Individual school responses were displayed below each graph by percent. Less than 100% response to a particular question accounts for totals of less than 100.

The individual questionnaires were developed using Edmonton Public School's Attitude Survey. The questions had been tested by EPS for their significance and response rate on a random sample of individuals before their implementation.

Each school received a Survey Box, which had been prepared at the researcher's office, two days prior to survey day. Each box contained survey instruments for all students and an envelope for each class, survey instruments for all staff and a survey for the principal which also had a stamped envelope addressed to the office of the researcher (to ensure the principal's confidentiality). A Survey Implementation Handbook, which described the Survey procedure for the Principal and staff, was also included in the Survey Box.

Appendix Four provides the questionnaires for each category of respondent. Appendix Five provides the Survey Implementation Handbook.

### 2.3.2 Vandalism

Data on vandalism in the RMSD schools were reported by each principal as incidents occurred. Copies of these reports were provided to the researchers for analysis.

The public's perception of vandalism was drawn from questions on the supporters' attitude survey. Other questions considered to be related to vandalism, such as student attendance and drug and alcohol usage problems, were also drawn from the survey to be examined more closely relative to the vandalism question.

### 2.3.3 Student Attendance and Absence

One school provided a report of student absence, over 15 school months for grades one to nine. These were analyzed according to absence rates by month for comparison between grades.

## 2.4 Stakeholder Satisfaction Objective 5

*The educational system will be operated to the satisfaction of the major stakeholders: parents, teachers, students and ratepayers.*

The primary measurement of this objective was accomplished by the Attitude Survey as reported in Section 2.3 Student Attitudes. The results in summary form are reported in Section 3.3.

### 2.4.1 Staff Retention and Turnover

The other measurement of this objective was the staff retention and turnover for the Division during the course of the study. Data to determine these rates were available from the Division Office as part of routine record keeping.

## **2.5 Resource Utilization Objective 6**

*The Division will use its available resources to advantage.*

Calculation of the cost per student for each school year was the measurement of this objective. Financial statements for the two years of operation were analyzed. Essentially the figures used for this calculation were total operating budget and September 30 enrolments from the previous year. Since the full budget for 1986 is still not known, budget figures for the last four months (Sept.-Dec.) were pro-rated from the previous eight months.

# CHAPTER THREE: RESULTS

## 3.1 Student Achievement

### Objectives 1 and 2

*Students will achieve a level of knowledge and skill consistent with their ability.*

*The achievement of students in the Division will equal or exceed provincial norms and standards.*

### 3.1.1 Department Diploma Examinations

The number of students who attended RMSD who achieved as high as or higher than the provincial average for the final blended mark in the Departmental Diploma Examination by subject (January and June 1985/86 combined) were as follows:

---

**Table 3-1**  
**Student Achievement and Provincial Averages Benchmark**

<u>Subject</u>	<u>English 30</u>	<u>Soc. Std. 30</u>	<u>Math 30</u>	<u>Biology 30</u>	<u>Chem 30</u>	<u>Physics 30</u>	<u>English 33</u>
School Year	85/86	85/86	85/86	85/86	85/86	85/86	85/86
Achieved ≥ Provincial Average	65	52	45	50	41	21	45

---

The Achievement Rate of students who received a score of 50 or more on the blended mark, for the 1985/86 School Year was calculated and is presented as:

**Table 3-2**  
**Achievement Rate Benchmark**

		<u>Eng. 30</u>	<u>S.S. 30</u>	<u>Math 30</u>	<u>Bio. 30</u>	<u>Chem. 30</u>	<u>Phys. 30</u>	<u>Eng. 33</u>
Number of Students Who Wrote Exam	Jan.	57	85	86	70	52	17	52
	June	<u>92</u>	<u>49</u>	<u>16</u>	<u>57</u>	<u>41</u>	<u>26</u>	<u>25</u>
	Total	149	134	102	127	93	43	77
		52%	56%	43%	53%	39%	18%	32%
Number of Students Who Gained Credit	Jan.	55	83	75	65	51	14	51
	June	<u>85</u>	<u>40</u>	<u>14</u>	<u>53</u>	<u>44</u>	<u>24</u>	<u>25</u>
	Total	140	123	89	118	85	38	76
		58%	51%	37%	49%	35%	16%	32%
Achievement Rate Jan./June Combined		94%	91%	87%	93%	91%	88%	99%

The percentage of the total students is based on the 240 Grade 12 students, September 30, 1985.

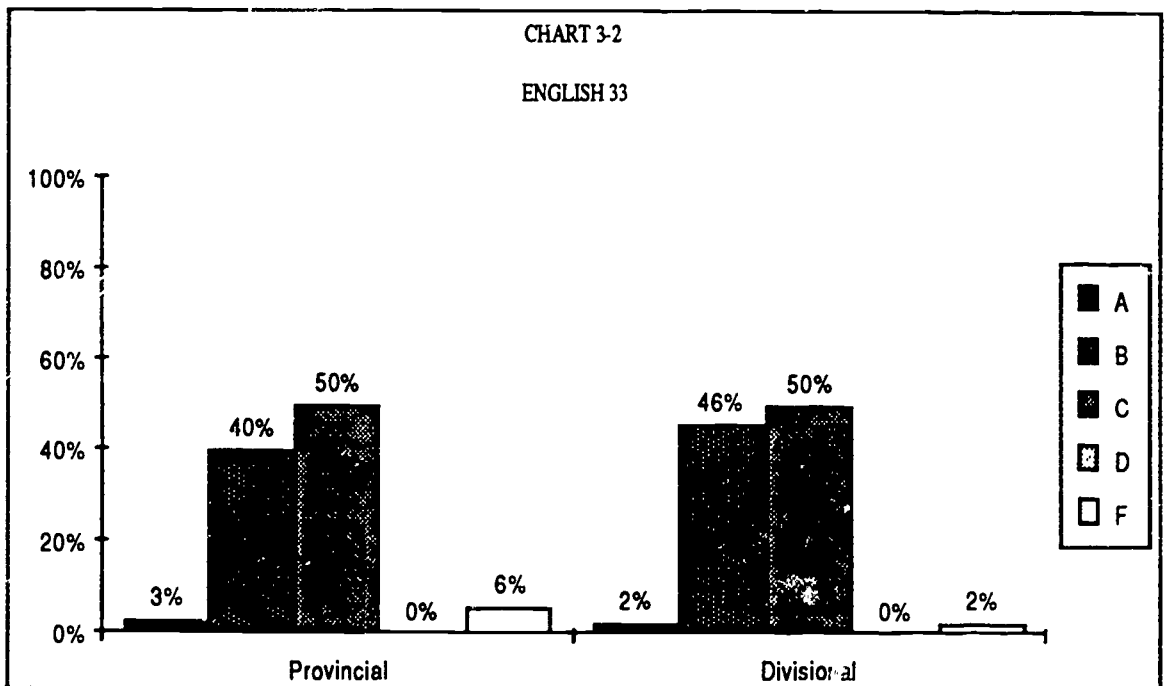

The number of students who *wrote* the Departmental Examinations (that is those who tried) was compared between the Province and the Division.

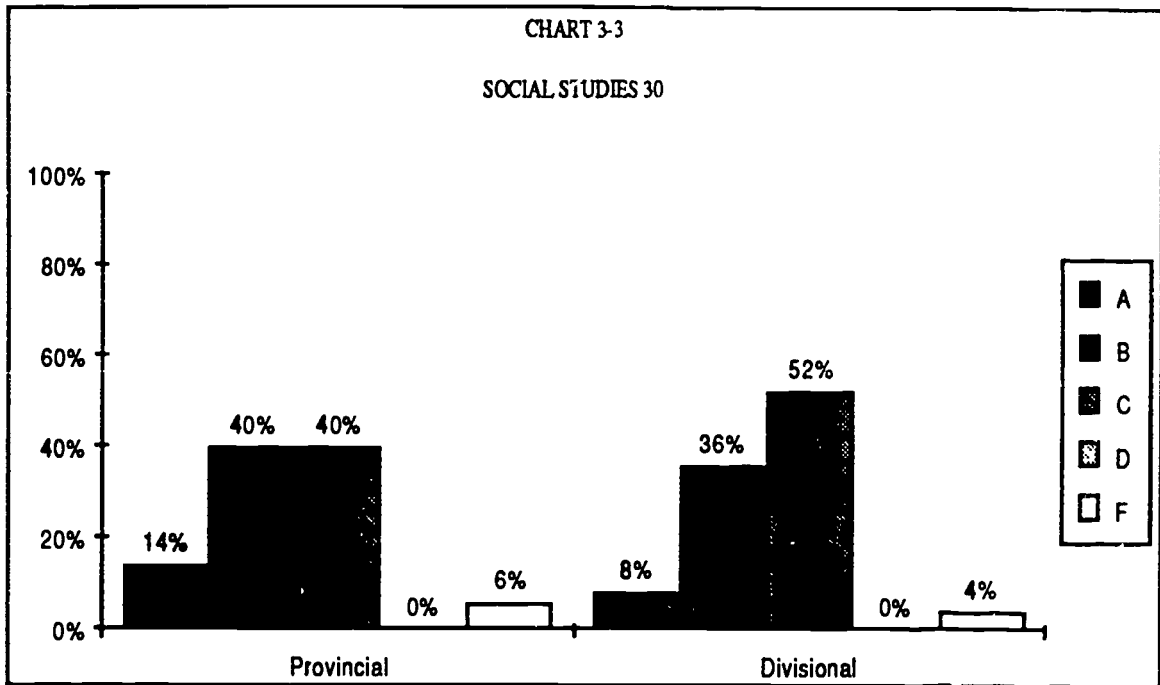

**Table 3-2A**  
**Students Who Wrote Benchmark**

	<u>Eng.30</u>	<u>S.S. 30</u>	<u>Math 30</u>	<u>Bio.30</u>	<u>Chem.30</u>	<u>Phys. 30</u>	<u>Eng.33</u>
# Students who Wrote (Prov)	13112	11148	9386	9736	8518	5141	5542
% of Enrolled Gr. 12 (Prov)***	37%	31%	26%	27%	24%	14%	16%
% of Enrolled Gr. 12 (Division)	62%	56%	43%	53%	39%	18%	32%

\*\*\*Calculated from the Grade 12 enrolled population for the Province of 35,545.

### Provincial and Divisional Comparison by Letter Grade, by Subject January 1986 Final Mark

### 3.1.2 Rutherford Scholarships

The scholarships awarded to students in RMSD for the 1985/86 school year (not including those students who have a delayed University Registration) were:

---

Male	Female	Total	Value
6	21	27	\$29,900.00

---

It is significant to note that 78% of the scholarships were awarded to females. This is consistent with the provincial figures.

A scholarship achievement rate was calculated using the September 1985 enrollment of 240 Grade 12 students; the rate was 11.25%.

### 3.2 School Leaver Survey

*Upon completion of their studies in the Division, students will be adequately prepared for further study or for entry into a productive occupation.*

#### 3.2.1 School Leaver Survey: Part 1

The School Leaver Survey Part 1 was administered to Grade 12 students in all three high schools in RMSD in June 1985 and June 1986. The following represents the findings from those two years.

Questionnaires were completed by 112 students in 1985 and 121 in 1986, representing 49% and 51% of the registered Grade 12 population, respectively. This represents a school breakdown, by year, as follows:

**Table 3-3  
Number of Respondents: Part 1**

	1985	(%)	1986	(%)
Will Sinclair High School	62	(55%)	63	(52%)
David Thompson	26	(23%)	27	(22%)
Caroline	16	(14%)	31	(26%)
Late questionnaires	8	(7%)	-	-
<b>Total</b>	<b>112</b>	<b>(100%)</b>	<b>121</b>	<b>(100%)</b>

**Table 3-4  
Program and Sex of Respondents**

Program	1985			1986		
	Male	Female	Total	Male	Female	Total
General	44%	48%	46%	48%	61%	43%
Advanced	56%	52%	54%	52%	38%	57%
<b>Total</b>	<b>45%</b>	<b>56%</b>		<b>50%</b>	<b>50%</b>	

**Table 3-5  
Parents' Education**

	1985		1986	
	Fathers	Mothers	Fathers	Mothers
Less than High School	46%	33%	49%	33%
High School Diploma	16%	33%	33%	41%
College, Tech. School	20%	13%	20%	23%
University Degree	9%	13%	8%	9%
Post-Grad. University	3%	1%	1%	0%
Don't Know/Missing	6%	7%	7%	10%

Half of the fathers and one third of the mothers did not finish high school.

**Table 3-6  
Future Plans**

Students' Plans for Next Year:	1985	1986
Attend School	60 - 54%	65 - 54%
Work	65 - 58%	44 - 37%
Homemaker	4 - 4%	0 - 0
Undecided	8 - 7%	6 - 5%
Other	2 - 2%	5 - 4%

(Note that plans need not be mutually exclusive.)

Of the 122 students who responded in 1986, six students responded to two or more options for this question. All six felt that their current plans for next year would include attending school full or part-time *and* working full or part-time.

In the 1985 survey, 7 (5%) students reported that they would work in the family business. In 1986, also, 7 (6%) students reported the same intent. Students who did report said that farming was the type of business. Other plans for next year reported by six students included travelling, the rodeo and joining the armed forces.

**Table 3-7  
School Plans**

	1985	1986
University	13 - 18%	19 - 16%
Junior College	28 - 41%	36 - 29%
Agricultural College	4 - 6%	3 - 2%
Technical School	9 - 13%	12 - 10%
Secretarial School	4 - 6%	1 - 1%
High School Upgrade	8 - 12%	7 - 6%
Other	3 - 4%	7 - 6%
No Response	42 not incl.	36 - 30%

---

---

**Table 3-8  
Sureness of Plans**

	1985	1986
Very Sure	53 - 51%	56 - 46%
Somewhat Sure	34 - 32%	44 - 36%
Unsure	18 - 17%	12 - 10%
No response		9 - 7%
	105 - 100%	121 - 100%

---

**Table 3-9  
Potential Problems**

	1985	1986
<b>School Grades</b>		
Definitely Not a Problem	40%	38%
Might Be a Problem	57%	58%
Likely To Be a Problem	3%	3%
<b>Financial Assistance</b>		
Definitely Not a Problem	33%	20%
Might Be a Problem	55%	61%
Likely To Be a Problem	13%	17%
<b>Admission to Desired Program</b>		
Definitely Not a Problem	42%	41%
Might Be a Problem	52%	46%
Likely To Be a Problem	6%	7%
<b>Family Support/Permission</b>		
Definitely Not a Problem	88%	88%
Might Be a Problem	10%	8%
Likely To Be a Problem	2%	1%
<b>Availability of Jobs</b>		
Definitely Not a Problem	18%	23%
Might Be a Problem	71%	55%
Likely To Be a Problem	12%	1%

In both years the availability of jobs persists as the greatest concern for students.

**Table 3-10  
Where Students Would Like to Live**

	1985	1986
Rural Area	28 - 27%	35 - 29%
Small Town	30 - 29%	18 - 15%
Bigger Town, City	47 - 45%	66 - 55%

Prefer to live in the Rocky Mountain House Area:

	1985	1986
Yes	20 - 18%	14 - 12%
Maybe	66 - 59%	64 - 53%
No	26 - 23%	41 - 34%

### Occupational Goals:

Of the 1986 survey respondents, 83 (69%) students stated an ultimate occupational goal. A full list of these is provided, by school, in Appendix Three. Twenty nine (24%) had not made a choice, and 9 students did not respond. Of the students who had stated an ultimate goal, the goals range from the professions (M.D. or Veterinarian) to construction. The largest group emphasized sports and technologist positions. No students considered homemaking a goal, nor did they consider homemaking a current plan.

### 3.2.2 School Leaver Follow-up

#### Students Responding to the Questionnaire

In September, 1984, 227 students were enrolled in Grade 12 in the Rocky Mountain School Division. In June, 1985, the School Leaver Survey: Part 1 was administered to 112 students, thus supplying the researchers with a 49% representation of 1984's enrolment. During Easter of 1986, all 112 students previously surveyed were mailed a School Leaver Follow-up to the address they had provided in the previous June. Of the 112 students, 71 returned the survey, thus providing a 63% return on the sample. The questionnaires were distributed by mail, with a return stamped and addressed envelope. A telephone follow-up was initiated and continued for 4 weeks following the mail out. Questionnaires were returned to the researchers as much as six months after mailing. The student response to the School Leaver Follow-up, in total and by school, was:

**Table 3-11**  
**Number of Respondents: Follow-up**

	Mailed Out	%	Returned	%
Will Sinclair	62	55	39	55
David Thompson	26	23	18	25
Caroline	<u>24</u>	<u>22</u>	<u>14</u>	<u>20</u>
<b>Totals</b>	<b>112</b>	<b>100</b>	<b>71</b>	<b>100</b>

Pharmacy	1

---

For those respondents who are now working full-time or part-time or looking for a job, the following best describes their present situation:

**Chart 3-11  
Present Work Situation**

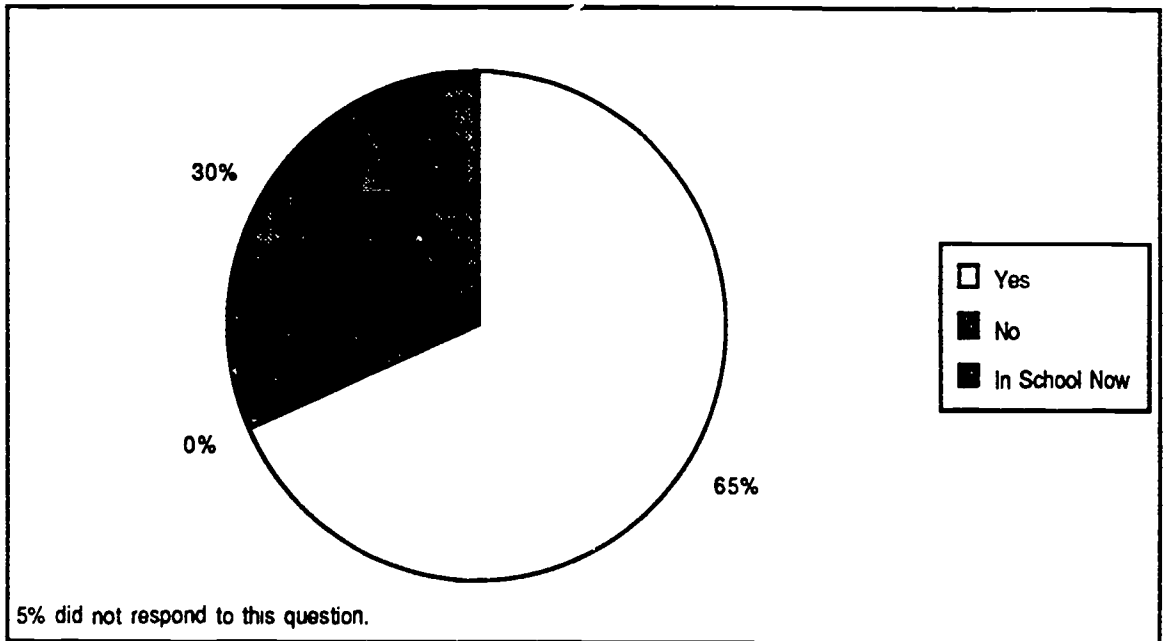

It is significant to note that the third largest response group define themselves as unemployed.

For those respondents who were working, the following describes the type of business or industry they were in or their title/job description:

- Gas Station Attendant/Bookkeeper
- Nail Technician, Part-time Clerk 7-11
- Alberta Wheat Pool
- Assembly Line
- Rough Neck
- Greenhouse
- Bartender
- Waitress
- Dishwasher
- Casual Labor
- Farming
- Cashier
- Child Care Worker
- Grocery Store
- Teachers Aide
- Janitor
- Riding & training horses
- Carpenter's Helper
- Office Clerk

Respondents were asked if they would like to continue their education in the future; their response was:

**Chart 3-12**  
**Continuing Education**

The following lists the occupational goals of the respondents:

**Will Sinclair**

- Teachers Aide
- Administration
- Secretary
- Corporate Lawyer
- Jockey
- Electrical Engineer
- Mechanical Engineer
- Instrumentation Engineer
- RCMP

**Optometrist**

- Special Education Teacher
- Elementary School Teacher
- Animal Trainer
- Computer Software Development
- To advance in anything
- Pharmacist
- Mechanical Autobody

**David Thompson**

- Own my own business
- Heavy Duty Mechanic
- Teacher
- Medical Secretary
- Hair Dresser
- Elementary Teacher
- Legal Assistant

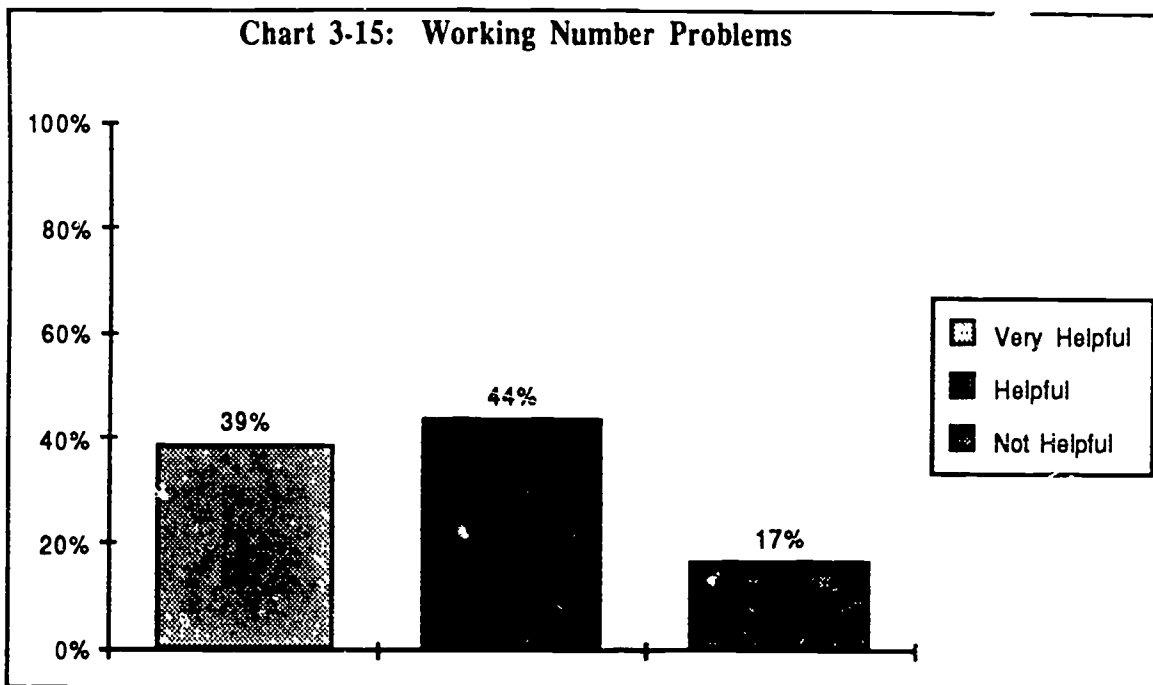

**Caroline**

- Nurse
- Chartered Accountant
- Chef
- Pharmacy Technician
- Commercial Artist

Respondents indicated the degree of help that high school provided by answering the following questions:

**How helpful was high school in learning or improving skills?**

Respondents were asked about the courses that were available to them while in High School. They were asked the following specific questions:

---

**Table 3-14**

**Which courses have been of the greatest value to you in your present activity?**

	<b>Number of Respondents</b>	<b>%</b>
English	53	75

Drama	2	3

### 3.2.3 School Leaver Survey: Comparison Between Part 1 and Follow-Up

Students were asked about their current plans for next year in June, 1985, (expected) and again in March, 1986, (actual) to determine what they were doing at the present time.

**Table 3-17  
Students' Plans**

	<b>Expected</b>	<b>Actual</b>	<b>Variance</b>
Attend School	54%	43%	-11%
Work	58%	38%	-20%
Homemaker	4%	10%	+6%
Undecided	7%	-	
Not working, looking for a job	-	7%	
Other	2%	1%	

Students were asked about their plans for attending school (expected) and the schools which they were attending (actual).

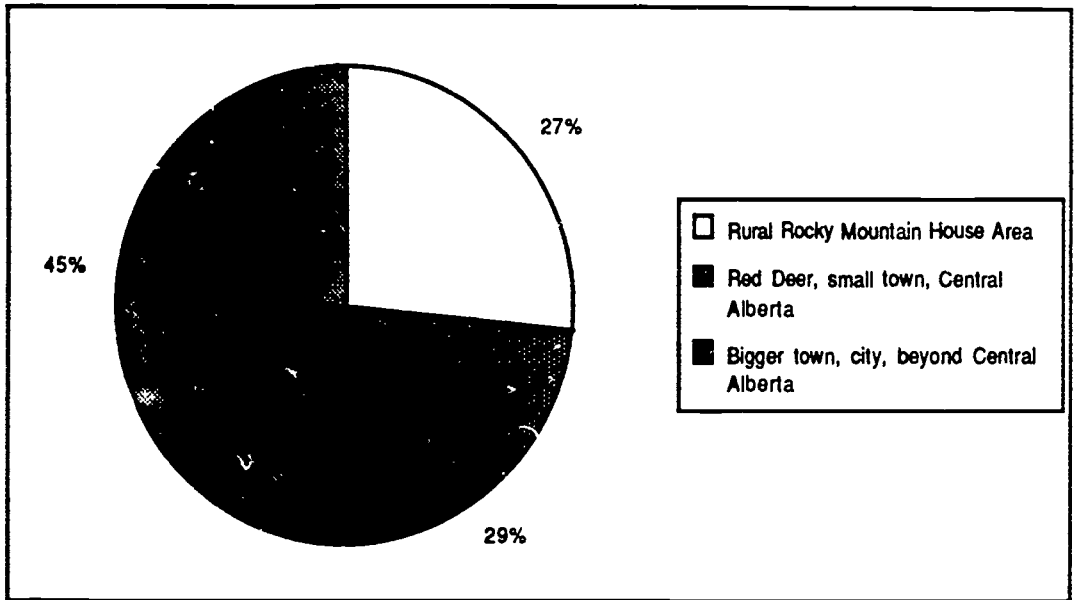

---

**Table 3-18**  
**Attending School: Expected and Actual**

	<b>Expected</b>	<b>Actual</b>	<b>Variance</b>
University	18%	11%	-7%
Junior (Community) College	41%	24%	-17%

Apprenticeship	-	1%	+1%
No Schooling	37%	46%	+9%

---

**Chart 3-24**  
**Where Students Live: Expected**

**Chart 3-25**  
**Where Students Live: Actual**

### 3.3 Student Attitudes

*Students will develop positive self-images which will be characterized by positive attitudes towards self, others, the school and education.*

#### 3.3.1 Attitude Survey

The final report of the Attitude Survey conducted in RMSD for the years 1985 and 1986 exists as a separate report. The report presented the data by respondent category, i.e. student 1-3 or parent elementary, with a Division total graph and tabular data by school. Exhibit One shows the Final Report page layout.

**EXHIBIT ONE**

School	1985			1986		
	Yes	No	Not Sure	Yes	No	Not Sure
Caroline	92	2	6	90	0	10
Rocky	89	2	9	91	1	8
Locheam	84	1	15	90	1	9
Pioneer	86	0	14			
Leslieville	89	4	7	90	2	8
Condor	90	5	5	97	0	3
Nordeg	75	12	12	86	0	14

Distribution and response rates for each year of the survey are provided in Table 3-19 for the Division total.

Table 3-20 provides the distribution and response rates for supporters; and since the researchers used different approaches each year to increase supporter response, there are indeed differences in the actual number of responses received.

To determine shifts in response to individual questions between 1985, the benchmark year, and 1986, the researchers have prepared a summary of responses which identifies the most positive and least positive responses as well as areas of greatest growth and decline for each respondent category. It should be noted that these "differences" are arbitrary and not statistical. In some categories shifts are very slight, say 3%. If these are the largest, they are noted, while in other categories shifts as high as 46% are noted. All summary results are based on Division totals only. A summary of this nature has not been provided for the Supporters due to the many different categories and sub-categories of questions with rating scales of differing forced choice categories.

It is important that the Report of Rocky Mountain School Division #15 Attitude Survey 1985 and 1986 be referred to for a full examination of results.

### 3.3.2 Vandalism

#### The Public's Perception of Vandalism

There were two indicators of vandalism which were examined as part of the system evaluation. The first is the public's perception of vandalism in the Division's schools, be it perceived or real, as reported by those tax payers who dedicated their support to District #15. Supporter response to one question pertaining to vandalism is as follows:

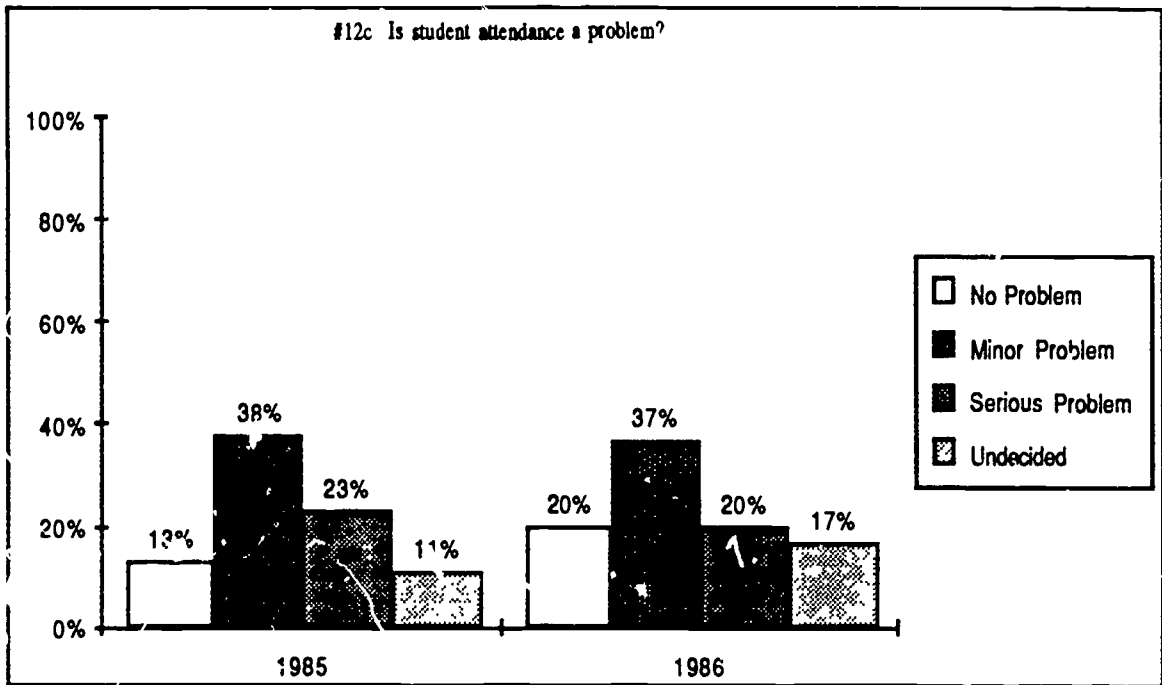

**Chart 3-26  
Student Vandalism**

As one can see the number of respondents who believed that vandalism is not a problem has gone from 11% in 1985 to 16% in 1986. Those who consider it a minor problem have caused that response to rise by 3%, while the perception of vandalism as a serious problem has fallen by 4%. Overall, 26% of respondents were undecided in the 1986 survey, which in itself indicates that vandalism was not perceived as a major problem.

Other problems which could be linked to vandalism are student attendance and alcohol usage. Supporter response to these questions for two years is as follows:

**Chart 3-27**  
**Student Attendance**

Again we can see that the perception of attendance being a serious problem was falling and again there was a higher undecided response from 1985 to 1986.

**Chart 28**  
**Drug and Alcohol Usage**

Regarding drug and alcohol usage, again the serious problem category dropped by 8%, while the undecided rose by 8%. The fact that 34% consider this a minor problem and 64% a minor or serious problem may indicate that there was some cause for concern.

### **Vandalism Costs**

At least \$3,978.45 of vandalism costs were incurred during the period under review [Jan 1985 through Sept. 1986]. This is far from the real total, since in many instances of vandalism, theft or damage a cost estimate was not included on the official Report of Theft, Damage or Vandalism. Only one school consistently provided an estimate of value, replacement or repair.

A further consideration of cost is the manpower that is required to correct the damage. Since no estimate of the manpower cost, materials or transportation was included, the true costs are obviously considerably higher.

A final consideration related to the vandalism costs is that some costs are borne by the person causing the damage or by a third party. Thus, a credit to the actual out-of-pocket expenses should be calculated.

### 3.3.3 Student Attendance and Absence

Supporters were asked their perception of attendance in the School Division. Their response was:

**Chart 3-27  
Student Attendance**

For both years, the supporters' perception of attendance as a problem is average concern. In 1986 the "no problem" response rose by 7%, while the "minor problem" dropped by 1%. When the number of respondents is examined for the two years, (1985 had 87 respondents and 1986 had 153 respondents), the perception of a problem decreased with more respondent information.

Prior to the evaluation the Division Office did not collect attendance data for each school. Since the Steering Committee believed that absence experiences of at least one school could prove useful to the evaluation model, the data for one school was collected. The following charts provide absence rates for that school, grades one to nine, on a month by month basis.

### 3.4 Stakeholder Satisfaction

*The educational system will be operated to the satisfaction of the major stakeholders: parents, teachers, students and rate payers.*

#### 3.4.1 Staff Retention and Turnover Rates

---

	1984/85	1985/86
RESIGNATIONS	17	13
LEAVES OF ABSENCE	9	12
APPOINTMENTS	20	41

---

The School Division has a staff complement as follows:

---

	1984/85	1985/86
Principals	10	9
Certified School Staff	161	160
Caretakers	36	29
Secretarial/Teacher Aides	35	42
Central Administration	15	13
TOTAL	<u>257</u>	<u>253</u>

---

#### Staff Turnover Rate

In the 1984/85 school year there were 171 Certified Staff (Principals and School Staff) and 17 resignations as of June, 1985, giving a turnover rate of 9.9%. In the 1985/86 school year there were 169 Certified Staff (Principals and School Staff) and 13 resignations as of June, 1986, giving a turnover rate of 7.6% representing a 2.3% drop.

- 3.4.2 The Rocky Mountain School Division Attitude Survey 1985 and 1986 also provides information about stakeholder satisfaction, and should therefore be examined in light of this one objective.

### 3.5 Resource Utilization

*The Division will use its available resources to advantage.*

The student population for 1985, based on September 30, 1984 enrollments, was 2,930. The total operating cost for RMSD for 1985 was \$11,620,457.00, resulting in a \$3,966 cost per student year.

Calculation for the 1986 school year is less accurate since figures for the last four months (Sept.-Dec.) are still not available. We have pro-rated the actual budget to August, 1986, which was \$7,805,513.39 to the whole year, resulting in an expected total operating cost of \$11,808,622. When September 1985 enrollment figures are applied to this cost, we find the cost per student year for 1986 is likely to be close to \$4,159.00.

---

Year	Enrollments	Operating Budget	Cost per Student/Year
1985	Sept/84 2,930	\$11,620,457.00	\$3,966.00
1986	Sept/85 2,839	\$11,808,622.00*	\$4,159.00

---

\*pro-rated

Also relevant to resource utilization are a number of questions to Supporters as part of the Attitude Survey. It should be noted that the sample of Supporters was very small due to very low response rates for both 1985 and 1986. This is the best information that we have about the attitudes of Supporters relative to financial options, and is therefore useful. Caution should be taken in generalizing these responses to the entire population of tax paying school Supporters. All of those questions are reported here.

## CHAPTER FOUR: OBSERVATIONS, DISCUSSION AND CONCLUSION

Within the realm of student achievement, a number of observations can be made about RMSD and its accomplishments. There is a higher degree of success in the achievement of English both in the receipt of credits and in the number of students who achieve equal to or above the provincial average.

Sixty-five students in the 85/86 year received above the provincial average in English 30. Fully 99% of students who wrote the English 33 exam received credit for the course (Table 3-1).

The lowest achievement was in Physics 30 where only 21 students received as high as or higher than the provincial average; the next lowest was Chemistry 30 with 41 students.

The Physics 30 and Math 30 achievement rate for credits was 88% and 87%, respectively. On the Provincial and Divisional comparison by letter grade for 1986, English 33 (Chart 3-2) was 6% higher for the B grade and only 1% lower for the A grade for RMSD compared to the Province. In Chemistry 30 (Chart 3-6) the Division had 29% of students with an A grade compared to 18% for the Province.

The Division has demonstrated strength in English and has some ground to make up in Physics. It is interesting to note that, in the School Leaver Follow-Up (Section 3.2.2), when students were asked to comment on which courses helped them during their high school experience, 75% (53) of respondents said that English had the greatest value, with 56% (40) maintaining that Math 30 had the greatest value (Table 3-14). Physics was claimed by 11% (8) of respondents. This would indicate that English is not only a high achievement course but is perceived as valuable *after leaving school*. The inverse of this is true for physics.

This observation is further borne out by the School Leaver Follow-Up in that Reading and Writing had 93% and 91% respondents, respectively, believing those subjects to be helpful or very helpful (Chart 3-13 and 3-14). In contrast, 51% of respondents felt that high school was not helpful for managing finances (Chart 3-16).

One final view of the Language Arts/English program is provided by the Junior Parents response to question 1(ai) in the Attitude Survey. There was an increase in satisfaction of 9% (from 66% to 75%) between 1985 and 1986.

Overall, this would indicate that the English courses are achieving at a higher level than other courses based on a number of measures.

When examining the desire of a School Division to encourage their students to write the Departmental Diploma Examinations, RMSD has a higher percentage of students who try the exam as compared to the Province. See Table 3-2A.

Student migration and education patterns as identified by the School Leaver Survey show some consistent trends. In the plans for the next school year, 54% of students for both 1985 and 1986 planned to further their education when they left high school. Between 37% (1986) and 58% (1985) planned to work. These figures become very interesting when the 1985 students were asked what they *actually* did. The 54% who planned further education had shrunk to 43% in actuality, remembering that number of respondents had dropped from 112 to 71 between the 1985 and 1986 survey.

All of these rates will provide excellent Benchmarks for future comparison within the Division and prove very interesting inter-jurisdictional comparison.

When examining the educational preparation of the respondents' parents in both years, a higher percentage of fathers had less than high school education as compared to mothers. Since responding students were themselves just finishing high school, this is an indication that this generation of students are likely to be better educated than their parents (Table 3-5).

School types most frequently chosen were (in order of frequency): Junior College, University, Technical School and High School Upgrading. The order of frequency was the same each year (Table 3-7).

Students saw availability of jobs as the greatest problem in carrying out plans, with financial assistance second. The likelihood of not finding a job dropped from 12% to 1% between 1985 and 1986. This may have been an indicator that the economy was more promising between the two years (Table 3-9).

Eventually, students generally wanted to live in a large town or city. Few were committed to remaining in the Rocky Mountain House area, although only about a quarter would definitely not like to remain. Those who planned to continue their education were more likely to want to move away from Rocky Mountain House than those not planning to continue.

Career aspirations were stated by only 43% of the respondents in 1985 and 69% in 1986. This factor, combined with the difficulties of coding often ambiguous job titles, means that one must be cautious in interpreting information derived from these titles.

When students who had been surveyed in June, 1985, were followed-up at Easter, 1986, there was a low response and therefore low sample of that initial school leaver group. When calculations were made on the degree of representation this sample can account for, there is a Confidence Level of 90% and a Confidence Interval of  $\pm 8\%$  when the sample is 71 of the 227 students enrolled in September, 1984.

Should this survey be conducted again, an attempt should be made to survey *all* students in Grade 12 with the Part 1 questionnaire to increase the potential for a higher sample when the Follow-up is implemented and returned.

It should also be noted that further researchers should allow at least 6 months for receipt of the Follow-Up questionnaires. We kept the data base open for 5 months and have since received one further questionnaire 6 months after mail-out.

When examining what students are doing after leaving school, we found 42% are in school full- or part-time. Such figures do indicate a continued high demand for education opportunities following high school and do point out possible trends for Further Education Councils (see Chart 3-9). This is particularly important when Table 3-17 is examined in light of the 54% of students who expected to go to school and the 43% who actually did.

When students were asked if they would like to continue their education, 30% were in school and 65% responded, yes, they would like to continue their education in the future.

Red Deer College is the most popular College for RMSD, with 20% of the respondents attending that institution.

The Attitude Survey of parents, students, staff and supporters provides a myriad of information on the School Division's operations, allowing the reader not only to glimpse feelings and beliefs about the education system, but also to gauge shifts in perception since that first year. It would be impossible to point out significant areas, since all responses are significant of themselves. Of particular note are those questions where significant (not statistical) shifts have occurred, for example question 13d Principals: *Do you have respect and confidence in the Board of Trustees?* dropped by 44% over the two years. Also question 14, *Are promotion procedures for staff fair and reasonable?*, dropped by 46%. In contrast Caretakers responded to the promotion procedures question (#14) with a

22% positive increase over the same period. Also, there was a 24% positive increase for Caretakers maintaining that RMSD is a good place to work.

Clearly the Attitude Survey must be used as one tool within the overall management of a school division and provides for a clear perception check on many subject areas from many stakeholders.

The public's perception of vandalism and related problems of attendance and alcohol usage indicates that there are few perceived problems in this area (Chart 3-26, 3-27, 3-28). When these are combined with the actual number of vandalism acts as provided in Table 3-21, this data provides adequate benchmark information but requires data from other jurisdictions for future years for it to be meaningful. This is also the case for student attendance and absence (Chart 3-27, 3-29 and 3-30).

Staff turnover and retention does allow some comparison between years, with staff turnover dropping from 9.9% in 1984/85 school year to 7.6% in 1985/86 school year. Should this trend continue, some thought should be given to how stagnation of staff can be overcome. High turnover rates are related to flux; low rates to stagnation. Stability between the two is most desirable.

In the area of resource utilization there is a drop between the two years of study of \$282.00 per year. This could be due to inadequate proration, but the reason is as yet unclear.

The most interesting items relative to resource utilization are responses from Supporters in the Attitude Survey relative to the economic factor of RMSD's operation. The first question asks, "is the amount of money available for education a problem?" (Chart 3-40). In 1985, 28% felt it was no problem. This trend was continued in 1986 when 25% answered the same. When the minor and serious problem categories are combined, we see that in 1985 32% and in 1986 41% felt there was some problem. This trend may continue and be indicating a growing concern in the community about the availability of funds for educational purposes.

Chart 3-41 indicates Supporters' knowledge of the cost of education. In 1985, only 23% of respondents were within the correct range when the actual cost was \$3,966.00 per student year. This rose in 1986 to 29% who were in the correct ranges. It is very interesting to note that over 30% of respondents each year were undecided about the cost of education, which could indicate the need for general financial information about the Division's operation.

When Supporters were asked about paying more taxes to improve education (Chart 3-42), between 38% (1985) and 44% (1986) responded in the affirmative. When information from questions #14 and #15 (Chart 3-41 and 3-42) are combined, we can assume that although most Supporters do not *know* the price of education, they would be willing to contribute more money to it via taxes. This reinforces the myth which surrounds the education system as viewed by the general public.

A series of questions in the Supporter Survey inquired into the reduction of expenditures and the appropriate reduction in services (Charts 3-43 through 3-52). By far the most undesirable action would be in reducing the number of teachers, followed very closely by increasing the number of pupils in each class. Some Supporters believed that expenditures could be reduced by providing fewer programs for gifted students, reducing on-the-job training for staff and reducing optional programs and the number of subjects that are offered to students. Overall, the Supporters responses did not help clarify how reductions might be achieved, but they did not state clearly where reductions should *not* occur.

The spending of funds to increase the Division's operation was clearly spelled out, with 47% of respondents in 1986 and 34% in 1985 claiming that decreasing the number of pupils in each class was very desirable (Chart 3-54 through 3-64).

In conclusion, the project's strength was in developing and implementing a Division wide Attitude Survey for two years and in designing and implementing the School Leaver Follow-Up. Instruments and processes for each of these surveys have provided a great deal of valuable information for the evaluation of the Division and both can be easily implemented in other jurisdictions, thus indicating their portability.

When applying the achievement data identified in the project to the overall model, a consistent pattern of information is not identifiable, mainly because the achievement part of the project lacked depth.

Overall, it is important to examine a school jurisdiction at many levels and determine that things do indeed look adequate and that its stakeholders are satisfied.

Some parts of the model, for example staff turnover, vandalism and student absenteeism, are not recorded by the Division in a very orderly fashion, indicating their low priority in the Division. Based on the data that have been presented, the relegation in priority by the Division is probably wise since those areas do not seem problematic.

The most inadequate area for RMSD's operation from the evaluation model's standpoint is the resource utilization. Financial activities are not recorded by program or on an individual student base. This will continue to prevent true cost comparisons on a per student base until actual costs per student can be identified.

The most powerful tool is the Attitude Survey. It provides a Superintendent and his Principals with an annual snapshot of their operation. It has been stated that the very act of questioning people will raise their awareness level of a number of issues. This in itself is an important and valuable part of the evaluation model for the Rocky Mountain School Division.

## SCHOOL LEAVER SURVEY PART 1

Name .....

Address .....

Telephone No. ....

Student ID. No. ....

Please give the names, addresses and telephone numbers of two people who will know where to get in touch with you, should you move from the above address (At least one should not be a parent)

Name ..... Name .....

Address ..... Address .....

Telephone No. .... Telephone No. ....

Please answer all questions that apply to you. Follow the directions carefully.

1. Date of birth: day ..... month ..... year .....

2. Male

Female

3. School Program: General High School Diploma

Advanced Diploma

Leave school before graduation  
(specify date and grade level.)

.....

4. Father's Education:

- Less than High School
- High School
- College, Technical School
- University Degree
- Post Graduate University Degree (including Medicine and Law)
- Don't know
- Other .....

5. Mother's Education:

- Less than High School
- High School
- College, Technical School
- University Degree
- Post-Graduate University Degree (including Medicine and Law)
- Don't know
- Other .....

6. What are your current plans for next year? (After the summer)

Please check all that apply

- Attend school, full-time or part-time.
- Working in the family business (please describe) .....
- Work (full-time or part-time)
- Homemaker
- Undecided
- Other (please describe) .....

7. If you are planning to attend school next year, please check the type of school:

- University
- Junior College
- Transfer from Junior College to University
- Agricultural College
- Technical School
- Secretarial/Business School
- High School Upgrading
- Other School (please describe) .....

8. How sure are you of these plans?

- Very sure       Somewhat sure       Unsure

9. Many factors can affect future plans. Which of the following things do you see as being problems in pursuing your goals?

PLEASE BE REALISTIC!	Definitely Not a Problem	Might Be a Problem	Likely To Be a Problem
School grades	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Financial assistance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Admission to desired program	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Family support/permission	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Availability of jobs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Other factors (please describe)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

The following questions concern your life goals, once you have completed your education.

10. Ideally, where would you like to live?

A rural area   
  A small town  
 eg. Rocky Mountain House   
  A bigger town or city  
 eg. Red Deer, Edmonton

11. Would you like to live in the Rocky Mountain House area?

Yes   
  Maybe   
  No

12. What is your ultimate occupational goal?

Have not made a choice

**THANK YOU FOR GIVING US THIS INFORMATION. IT WILL HELP TO IMPROVE THE ROCKY MOUNTAIN SCHOOL DIVISION HIGH SCHOOL PROGRAM FOR OTHERS**

Please use the back of the page for any comments or concerns you may have on these issues.

ROCKY MOUNTAIN SCHOOL DIVISION NO. 15  
School Leaver Follow-Up

Dear Teacher:

Trustees of the Rocky Mountain School Division are interested in finding out what school leavers think of their educational experience, the kinds of careers they chose, and how the educational system could be improved to help students in the future.

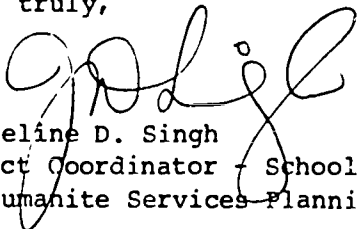

WE NEED YOUR HELP WITH THIS PROJECT!!

Please ask the students who are school leavers to complete the questionnaire. Please remind them that only they, as students leaving high school, can provide the information that we need to help Divisional schools provide a good education for the students.

All of the answers will be confidential. Once the students have finished the questionnaire please have one student collect them all, put them in an envelope, seal it and bring it to the school office.

Thank you for helping us with this project!!

Yours truly,

Jacqueline D. Singh  
Project Coordinator - School Division Evaluation  
HSP Humanite Services Planning Ltd.

JDS/cmg

1.5 mm

2.0 mm

A5

3. What is the name of the educational institution you are attending?

4. What program are you in?

Answer the questions in this box if you are now working either full-time or part-time, or if you are looking for a job.

5. Which of the following best describes your present job situation?

Not working, but looking for a job

In an apprenticeship program

Receiving on-the-job training

Family Business/Self-Employed

In a job for which I am fully qualified

In a job for which I am over-qualified

6. What is your job description/title and what type of business or industry are you employed in?

7. Would you like to continue your education in the future?

Yes

No

In School now

Please answer all of the following questions.

8. Is your place of employment or study:

- within the Rocky Mountain House area?
- in the Red Deer area (Central Alberta)?
- beyond Central Alberta?

9. What is your occupational goal? (please be specific) .....

- Have not made a choice

10. How helpful was high school in learning or improving skills?

	Very Helpful	Helpful	Not Helpful
Reading	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Writing	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Working number problems	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

We are interested in the courses that were available to you, which you took while in High School. In the following questions please specify the courses by name, including options.

12. Which courses have been of the greatest value to you in your present activity?

(please list)

a) .....

b) .....

c) .....

d) .....

13. Are there courses, including optional courses, which you now wish you had taken in High School?

a) .....

b) .....

c) .....

d) .....

14. Are there courses which you would like to have taken, which are not offered in the Division's high school programs? (please describe)

a) .....

b) .....

c) .....

d) .....

THANK YOU FOR GIVING US THIS INFORMATION. IT WILL HELP TO IMPROVE THE ROCKY MOUNTAIN SCHOOL DIVISION HIGH SCHOOL PROGRAM FOR OTHERS.

Please feel free to use the bottom of this page for any comments or concerns.

March 24, 1986

Dear Cindy:

In an effort to determine the effectiveness of the Rocky Mountain School Division, and also to know what happens to students when they leave, we are conducting a School Leaver Survey.

As you may remember, you completed a questionnaire last June about your plans when you left school. We also indicated that a follow-up survey would be conducted in spring 1986. Well here it is!

The information that you share with us will be held in confidence, and will only be used for statistical purposes. We guarantee your anonymity, since we are outside consultants. We will follow-up with a phone call should you not return the survey in a few days.

Thank you for your cooperation. Please return your completed survey to us using the stamped, addressed envelope.

Yours sincerely,

Jacqueline D. Singh  
Humanité Services Planning Ltd.

## APPENDIX THREE

**Appendix 3**  
**List of "ultimate occupational goals", by School**

**Will Sinclair High School**

Pharmacy Technologist  
Bio-Science Technologist  
Nurse (2)  
Business Management  
Dentist  
Law Enforcement  
Research Chemist  
Dietitian  
Embassy Worker  
Vet or Doctor (2)  
Legal Secretary  
Secretary

## APPENDIX FOUR

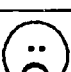

# ROCKY MOUNTAIN SCHOOL DIVISION NO. 15

## GRADES 1-3

### WE LIKE TO KNOW HOW YOU FEEL ABOUT YOUR SCHOOL...

After each question are some faces. Color the happy face if your answer is YES. Color the sad face if your answer is NO. Color the puzzled face if you are not sure.

		yes	no	not sure
1	Do you like your school work?			
2	Are you learning a lot?			
3	Do you like your teacher?			
4	Are the people in the office nice?			
5	Do you like your principal?			
6	Do you feel the school rules are fair?			
7	Are the other children at school nice?			
8	Do you have fun at recess?			
9	Do you like your school playground?			
10	Does homework help you learn more?			
11	Does your teacher give you help when you need it?			
12	Do you like to use the library or learning resources center in your school?			
13	Is your school kept clean?			
14	Do you like going to school?			

IS THERE MORE YOU WANT TO TELL US?

IF THERE IS, USE THE BACK OF THIS PAGE.

**ROCKY MOUNTAIN SCHOOL DIVISION NO. 15**  
**GRADES 4-6**

**WE LIKE TO KNOW HOW YOU FEEL ABOUT YOUR SCHOOL...**

We would like to know how you feel about your school. If your answer to a question on this sheet is YES, make a check in the square under the word YES. Make a check under the word NO if your answer is NO. If you are not sure, make a check in the square under NOT SURE.

	yes	no	not sure
<b>1</b> Do you like your school work?			
<b>2</b> Do you feel good about how much you are learning?			
<b>3</b> Do you like your teacher(s)?			
<b>4</b> Are the people in the office helpful and friendly?			
<b>5</b> Do you like the Principal?			
<b>6</b> Do you feel the school rules are fair?			
<b>7</b> Are the children made to follow the rules?

# ROCKY MOUNTAIN SCHOOL DIVISION WOULD LIKE YOUR VIEWS

This questionnaire asks your feelings and opinions about your child's school. It will be sent to a random sample of parents. To get reliable results we will need responses from all of the samples. Each questionnaire has been numbered so that we can determine who has not returned the completed questionnaire. The parents who have not responded will be followed up by telephone, to obtain a response from everyone. Returning your questionnaire promptly by mail will reduce the number of telephone follow-up calls needed.

In order to assure confidentiality an independent consultant will conduct the data analysis. The report will contain only statistical summaries and anonymous comments, without identification of individual respondents. A prepaid envelope is enclosed for your convenience -- just drop it in a mailbox -- it does not need a stamp.

THANK YOU -- your participation is very much appreciated

4 Do you feel the school division is using its money in a reasonable manner?				
5 In general, are you satisfied with:				
a) your child's teacher(s)?				
b) The school Principal?				
c) Deputy Superintendent?				
d) Superintendent?				
e) The Board of Trustees?				

	YES	NO	UNDECIDED	INSUFFICIENT INFORMATION
6 Do you feel welcome at the school?				
7 Do you feel you have an adequate voice in school decisions that affect your child?				
8 Do you feel you are being satisfactorily informed about your child's learning progress?				
9 Are you satisfied with the guidance and counselling services at the school?				
10 Are you satisfied with the extra-curricular programs at the school (sports, school plays, concerts, clubs, etc.)?				
11 Are you satisfied with the way attendance is handled at the school?				
12 Do you feel the non-teaching employees at the school such as secretaries, aides, and caretakers are helpful and friendly?				
13 Do you feel that the number of pupils in your child's classes is appropriate?				
14 Do you feel that your child's school experiences are consistent with the values taught in your home?				
15 Are you satisfied with the library services at your child's school?				
16 Are you satisfied with the cleanliness of your child's school?				
17 Generally, are you satisfied with your child's school?				
18 Are you satisfied with the assistance provided by the school to you and your child in planning for high school and career?				
19 Are you satisfied with the number of course choices open to your child?				
20 Do you feel the school provides appropriate programs for students intending to continue their schooling beyond high school?				
21 Do you feel that the length of your child's class periods is appropriate?				
22 Second Language Programs - Should the division introduce (or maintain) French as a mandatory second language program at the Grade 4 level rather than the optional program at the Grade 7 level?				
23 Do you feel that drug & alcohol usage is a problem in your child's school?				

Is there anything else you would like to communicate to the Board or Administration:

# ROCKY MOUNTAIN SCHOOL DIVISION WOULD LIKE YOUR VIEWS STAFF SURVEY

The Board of Trustees and Superintendent would like to know your feelings about the Rocky Mountain School Division as a place to work. Will you please help us by completing this questionnaire, sealing it in the accompanying envelope, and return it to Sherry McRae. Questionnaires will be sent to us without any individual identification. The reports produced will contain ONLY group statistical summaries and anonymous comments, with no identification of individual respondent. Thank you for your help.

## SCHOOL SUPPORTER ATTITUDE SURVEY

The following questions are designed to ask your attitudes and opinions about Rocky Mountain School Division's Schools. There are no right or wrong answers. In order to assure confidentiality, an independent consultant will conduct the data analysis.

The Report will contain only statistical summaries and anonymous comments, without identification of individual respondents. A prepaid envelope is enclosed for your convenience -- just drop it in a mailbox -- it does not need a stamp. THANK YOU -- your participation is very much appreciated.

B. Findlater, Superintendent of Schools  
 Rocky Mountain School Division No. 15  
 Telephone 845-3377

### SUPPORTER

Do you have any children attending a school in Rocky Mountain School Division at present?

YES \_\_\_\_\_ NO \_\_\_\_\_

FOR QUESTIONS 1 TO 6 BELOW INDICATE HOW SATISFIED YOU ARE WITH THE FOLLOWING AREAS OF SCHOOLING IN ROCKY MOUNTAIN SCHOOL DIVISION

	VERY SATISFIED	SOMEWHAT SATISFIED	SOMEWHAT DIS-SATISFIED	VERY DIS-SATISFIED	UNDECIDED/DON'T KNOW
1 The overall education offered by Rocky Mountain School Division.					
2 The education offered at the:					
a) Elementary School level					
b) Junior High School level					
c) Senior High School level					
3 The general performance of the:					
a) Teachers					
b) Principals					
c) Secretary Treasurer					
d) Superintendent of Schools					
e) Deputy Superintendent					
f) Board of Trustees					
4 The preparation that Rocky Mountain School Division Students receive for:					
a) Further training or education					
b) Everyday living					
c) The world of work (entering a job)					
5 The standards for student achievement and performance during their school years					
6 The value that the public is receiving for tax money spent in the Rocky Mountain School Division					

	TOO LITTLE EMPHASIS	ABOUT RIGHT EMPHASIS	TOO MUCH EMPHASIS	UNDECIDED/DON'T KNOW
7 Do you feel that the schools are placing enough emphasis to help students:				
a) Acquire basic skills in language arts (reading, writing, speaking, listening and viewing)				
b) Acquire basic skills in math, science, social studies, practical and fine arts				
c) Acquire basic facts about language arts, math, science, social studies, practical and fine arts				
d) Acquire good attitudes towards schools and the community				
e) Acquire good moral and ethical values				
f) Acquire the ability to think for themselves				
g) Become good citizens				

18 If it were necessary to reduce expenditures in the Division, how desirable do you think each of the following actions would be in helping keep costs down?

	VERY DESIRABLE	SOMEWHAT DESIRABLE	SOMEWHAT UNDESIRABLE	VERY UNDESIRABLE	UNDECIDED/ DON'T KNOW
a) Reduce the number of teaching staff					
b) Reduce the number of non-teaching staff					
c) Increase the number of pupils per class					
d) Hire new teachers who have the minimum (4 years) training and no experience					
e) Reduce the amount of on-the-job training for staff					
f) Reduce optional programs and/or the number of subjects offered					
g) Provide fewer programs for gifted students					
h) Provide fewer programs for slower and handicapped students					
i) Reduce the amount of teaching supplies and materials					
j) Reduce maintenance of facilities					
k) Decrease the Rocky Mountain School Division's contribution to student busing					
l) Other (specify)					

19 If there were more money available in the District, how desirable do you think each of the following actions would be for spending the additional money to improve education?

	VERY DESIRABLE	SOMEWHAT DESIRABLE	SOMEWHAT UNDESIRABLE	VERY UNDESIRABLE	UNDECIDED/ DON'T KNOW
a) Increase the number of teaching staff					
b) Increase the number of non-teaching staff					
c) Decrease the number of pupils per class					
d) Hire new teachers who have more than the minimum training and some experience					
e) Increase the amount of on-the-job training for staff					
f) Increase optional programs and/or the number of subjects offered					
g) Provide more programs for gifted students					
h) Provide more programs for slower and handicapped students					
i) Have more teaching supplies and materials					
j) Increase maintenance of facilities					
k) Increase the Rocky Mountain School Division's contribution to student busing					
l) Other (specify)					

20 During the last year have any of the schools in your community invited you to become involved in any way with or at the school?

\_\_\_\_\_ Yes

\_\_\_\_\_ No

21 If during the last year you participated in any of the school's activities, committees, etc., please indicate how you were involved.

\_\_\_\_\_

\_\_\_\_\_

Did not participate \_\_\_\_\_

## APPENDIX FIVE

**IMPLEMENTATION HANDBOOK**  
**ROCKY MOUNTAIN SCHOOL DIVISION**

**1986**

## 1.0 INTRODUCTION

Following the success of the 1985 Attitude Survey, and in keeping with the evaluation goals of the Rocky Mountain School Division, a second Attitude Survey will be implemented during April, 1986.

The objectives of the 1986 Attitude Survey are:

1. To measure student, parent, staff and supporter opinions for 1986.
2. To compare the shift in opinion of student, parent, staff and supporter between 1985 and 1986.

The opinions and attitudes being sought are:

1. Student attitudes towards self, others, school and education.
2. Parents opinion as to the School Division's performance.
3. Staff opinion as to the Division as a place to work.
4. Community supporters opinion as to the operation of an effective and efficient education system.

In order to obtain this information questionnaires will be distributed to all of the students and staff in your school, and to a random sample (or in very small schools, the total) of parents.

The School Division has designated April 10, 1986 as "Survey Day". Please can you implement the survey following the guidelines as described in this booklet, to ensure an effective and reliable implementation.

### 1.1 Responsibility of the Principal

The Principal should provide a brief orientation to the survey and its rationale for the staff, and reinforce the need to encourage students to be honest about their feelings. Staff should be reminded not to impose personal bias on the students as they complete their questionnaires. The Principal should indicate to the staff the guarantee of anonymity. In schools which are very small, and anonymity may be questioned, data will not be reported for less than five members in the particular category. They will only be counted in the Division total.

**2.0 SURVEY BOXES**

Each school will have a Survey Box. Please ensure that the school name is on the box and all envelopes are returned to the box.

When all student and staff questionnaires have been returned, seal the box with tape and return to Central Administration Office by the Division mail. Please return any unused questionnaires in the survey box.

**PLEASE RETURN THE SURVEY BOX TO CENTRAL ADMINISTRATION NO LATER THAN APRIL 15th, 1986.**

**3.0 STUDENTS**

The student questionnaires are provided in four categories:

Grade 1 - 3  
Grade 4 - 6  
Grade 7 - 9  
Grade 10 - 12

In your Survey Box will be enough questionnaires for your staff to provide to every student on the basis of their grade category.

One day before the Survey Day, please assemble the appropriate number of questionnaires in a given category for each class, along with one large envelope. These can then be given to the teacher on Survey Day. A specific time may be allotted in the day, say 20 minutes, so that the whole school is engaged in the activity at one time.

**3.1 Special Education Students**

For those teachers who are responsible for students in a special education program, the teacher will be required to make a value judgement as to which category of questionnaire is most suitable.

Those schools with special education students will have extra questionnaires, of each category, to allow for this contingency.

**3.2 On Survey Day**

1. Classroom teacher selects one class member as a student assistant to distribute and collect the questionnaires for the class.
2. For Grades 1 - 3 the classroom teacher reads the questions to the students.
3. For Grades 4 - 6, 7 - 9 and 10 - 12 the students read their own questionnaire.
4. The teacher says "When you have completed the questionnaire, please hand it to the student assistant who will put it into the big envelope and seal it."
5. The student assistant collects the completed questionnaires and places them into the large envelope, seals the envelope in the class room and takes it to the office.
6. The office staff place all the envelopes in the Survey Box.  
**PLEASE ENSURE THAT THE NAME OF THE SCHOOL IS ON THE ENVELOPE.**

**4.0 STAFF****4.1 Principal**

Principals' questionnaires should be completed and returned in the stamped addressed envelope as provided, to the office of the evaluator. These questionnaires have no identification and will only be reported as part of the Division total.

**4.2 Certified School Staff  
Secretarial/Teacher Aid  
Caretaker**

At the orientation meeting, staff should select a "peer" to distribute and collect completed questionnaires.

If staff members are absent for the Survey Day, the peer staff member should attempt to have them complete the questionnaire within the next two school days following Survey Day.

After all the possible completed questionnaires have been received, staff members will collect the questionnaires, preferably on Survey Day, and place into the envelope, seal and place in the Survey Box. Please ensure that the school name is on the envelope.

#### 4.3 Central Office

This should follow the same protocol as the school staff. A Central Office Survey Box will be sent to the office.

#### 5.0 PARENTS and SUPPORTERS

A random sample of parents from each school, and supporters in the Division will be mailed a questionnaire. They have been asked to return it to the office of the evaluator. Should questions arise from this aspect of the survey that you are unable to clarify, please have the person call or write to:

Jacqueline Singh  
Humanite Services Planning Ltd.  
8640 McKenney Avenue  
St. Albert, Alberta  
T8N 2T7

Telephone: 459-3941

For those parents who do not return their questionnaire within two weeks, a telephone follow-up will be implemented, independent of the School Division. The school may be contacted to advise on phone numbers for this follow-up. You will be advised of the person's name prior to the follow-up campaign.

The evaluators will not be conducting a telephone follow-up for supporters.
