ABSTRACT
This is the sixth $i$ a series of Diennal surveys of Texas public school teachers. It is part of a study, begun in 1980 , to form a databasp of demographic information related to characteristics of Texas teachers. The results of the present survey are presented and analyzed. Information includes: (1) national data for teachers in 1976 and 1986; (2) characteristics of Texas public school teachers: 1980-1990; (3) teachers' reasons for leaving the profession; and (4) moonlighting jobs for teacheis: 1980-1990. A copy of the glestionnaire is appended as well as teacher cumments from the 1990 survey. (JD)

Fall 1990

## Texas Teachers, Moonlighting, and Morale in the 1990's

## INTRODUCTION

This is the sixth in a series of biannual surveys of Texas public school teachers. The study ${ }^{1}$ began in 1980 to form a database of demographic information related to characteristics of Texas teachers. A sample of Texas teachers was selected using a computerized systematic sample from a population of 100,000 members of the Texas State Teachers Association. The 1990 survey was conducted in February when questionnaires were mailed to 601 teachers. The study had a return rate of $68 \%$ ( 402 of 593) with eight bad addresses.

## SURVEY OF LITERATURE

In a recent textbonk by Omstein and Levine ${ }^{2}$, they listed the following nationwide teacher characteristics displayed in Table 1. These data can be compared to Table 2 for Texas teachers.

## Table 1

## National Data for Teachers in 1976 and 1986

| Ciaracteristic | $\mathbf{1 9 7 6}$ | $\mathbf{1 9 8 6}$ |
| :--- | :---: | :---: |
| Age | $\mathbf{3 6}$ | 41 |
| Years Experience | 8 | 12 |
| Sex: Male | $32.9 \%$ | $\mathbf{3 1 . 2 \%}$ |
| Female | $67.1 \%$ | $68.8 \%$ |
| Race: White | $90.8 \%$ | $89.6 \%$ |
| Black | $8.0 \%$ | $6.9 \%$ |
| Other | $1.2 \%$ | $3.4 \%$ |
| Master's Degree or Higher | $37.5 \%$ | $51.4 \%$ |
| Enter Teaching Again: | $63.6 \%$ | $49.0 \%$ |
| $\quad$ Certainly | $19.1 \%$ | $31.0 \%$ |
| Probably Not | $17.5 \%$ | $19.8 \%$ |
| Chances About Even |  |  |

A 1987 study by the American Association of Colleges for Teacher Education ${ }^{3}$ of future teachers from a national sample of 76 Colleges of Education gave reasons for selecting teaching profession:
$90 \%$ helping children grow and learn
$63 \%$ seems to be challenging field
$54 \%$ like working conditions
$53 \%$ inspired by favorite teacher
$52 \%$ sense of vocation and honor in teaching.
A recent survey ${ }^{4}$ indicates a jump in interest in teaching, which fell on hard times in the early 1980's after word got around that the ony thing tougher than finding a teaching job was living on the salary. Enrollment in the nation's teaching programs rose by $61 \%$ between 1985 and 1989 according to the unpublished report by the American Association of Colleges for Teacher Education. However most of the enrollment is still white, female students.

The Bureau of Labor Statistics ${ }^{5}$ in Dallas said that in 1970, $16 \%$ of Americans moonlighting were women. By 1989, the numbers had skyrocketed. Women made up $43 \%$ of the moonlighting population. The number of women holding multiple jnbs still is below that of men which is six percent of the male work force compared to six percent of the female work force. The reasons given by the womer for moonlight were 1) for economic necessity, 2) to save money, 3) to gain experience, and 4) to build up a business.

An exodus of young, talented but dissatisfied teachers from the nation's classrooms is becoming a catastrophe for education in the United States, a survey ${ }^{6}$ of former teachers said. In the national statistics, Texas teacher salaries fell from 2ist in 1984 to 32nd in 1990. The Metropolitan Life Insurance Company survey indicated skimpy pay, bad working conditions, and lack of respect and prestige are causing tearhers to switch to more satisfying and profitable careers. The majority switching were males leaving high school jobs. The report estimated that by 1992 the United States wi'l have $34 \%$ fewer new teacher graduates than needed to fill demand.
A report by the Rand Corporation ${ }^{7}$ states that:

1. Reform movements in education (and other fields as well) are notorious for their tendencies toward presentism-for painting the past in the darkest possible light in order to stress the urgent need for rapid and major transformation of the status quo.
2. Contrary to what many modern-day educators tend to assume, teacher shortages have been commonplace throughout the twentieth century.
3. No single subject is more central to the history of the teaching profession than the changing role of women in American society.

Ernest L. Boyer, President of the Camegie Foundation for the Advancement of Teaching ${ }^{8}$, said the survey of 22,000 teachers found a sense of frustration in the classroom.
$49 \%$ said their pay was worst than expected.
$90 \%$ said lack of parental support was a problem at their schools
$89 \%$ said that there were abused or neglected children at their schools
$69 \%$ said poor health was a problem for their student
$68 \%$ said some children were undemourished
$47 \%$ said they felt involved in setting standards for student conduct
$45 \%$ reported having influence in tracking students into special classes
$43 \%$ said they had a say in designing programs for staff development
$34 \%$ said they influenced policies goveming which students were promoted or held back
$20 \%$ said they influenced the school budget
$10 \%$ felt involved in evaluating teacher performance
$7 \%$ said they had a hand in selecting new teachers
$7 \%$ felt involved in picking administrators.
This may be a banner year for TRS retirements ${ }^{9}$. Requests for individual counseling at regional locations so far this year already exceed last years total by more than $34 \%$.

## ANALYSIS OF SURVEY

Table 2 shows the results of the questionnaires for the past decade. The teachers' salaries were up $\$ 677$ the past two years ( $2.6 \%$ ) There was a $\$ 12,725(90 \%)$ increase since 1980 . The average age increased 3.9 years ( $10 \%$ ) in the decade. There was a 4.7 percent net drop ( $24 \%$ total) in the number of male teachers since 1980. The teaching experience was up 3.1 years ( $26 \%$ ). Both the $20 \%$ of teachers moonlighting and the 10.4 hours worked per week were the lowest of the decade. Moonlighting eamings were up $55 \%$ for the decade to an average of $\$ 4329$ but down from 1988.

Teachers were more accepting of the No Pass-No Play rule. Acceptance increased from $55 \%$ in 1986 to $70 \%$ in 1988 to $79 \%$ in 1990 . A drastic change occurred in the outlook toward the career ladder. The unfavorable aritude improved from $14 \%$ in 1986 to $58 \%$ in 1988 down to $50 \%$ in 1990.

It should be noted that the 1986 data was gathered during March, the month o' .he TECAT exam for all Texas educators. Note also that $90 \%$ of the teachers are now on the career ladder.

Table 3 shows that about one-fourth of the teachers gave money as a reason for seriously considering leaving the profession. Working conditions were given by $53 \%$.
***Insert Table 3 about here ***

Table 4 indicates that $41 \%$ of moonlighting jobs were school related with tutoring being the most common. Sales jebs were down from $35 \%$ to $13 \%$. Bookkeeping was up $12 \%$ io $21 \%$ and music related jobs were down to four percent.
***Insert Table 4 about here ***

In a more detailed analysis, $44 \%$ of the males had summer jobs while only $29 \%$ of the females worked; $39 \%$ of the males moonlighted versus $17 \%$ of the females. The male teachers had 14.7 years of experience compared to 14.9 years for female teachers. The male teacher made $\$ 26,982$ compared to the $\$ 26,812$ for the female. Twenty-seven percent of the single teachers moonlighted. Fifty-six percent of males had the master's degree but only $46 \%$ of the female teachers. Sixty-nine percent of the males were breadwinners while $36 \%$ of the females were listed as such. There was only two percent difference in the males leaving ( $47 \%$ ) and the females leaving ( $45 \%$ ). There was a $10 \%$ jump in the number of male teachers at the elementary level to 13 percent. Females favored the Mo Pass-No Play rule by a $80 \%$ to $68 \%$ margin over the males. Males ( $56 \%$ ) wanted to retain the career ladder; females ( $49 \%$ ) wanted to do so.

## COMMENTS

The average teacner in Texas is a 43 year-old female, making a $\$ 26,838$ salary, married with a working spouse, has a bachelor's degree, is not the breadwinner, teaches elementary school in an urban district, has 14.9 years of experience, with $45 \%$ of her fellow teachers seniously considering leaving the profession. Thirty-two percent of the teachers work in the summer making $\$ 2087$, and $21 \%$ moonlight during the regular school year making $\$ 4329$ while working 11.6 hours per week. The average teacher ( $82 \%$ of them) pays health insurance in the amount of $\$ 108$ per month. The teacher believes that moonlighting is detrimental and would like to quit, believes in the No Pass-No Play rule, wants to retain the career ladder, believes the quality of teaching is better than two years ago, and is on Career Ladder Level II. The questionnaire is found in Appendix A. Note the list of exact comments from the teachers found in Appendix B.

## TEACHERS, MOONLIGHTING, and MORALE QUESTIONNAIRE

DIRECTIONS: Please circle or answer all items that apply to you. Add comments on the back if you wish.

| 2. What is your scx?................................................................................ Male | Ferrale |  |
| :---: | :---: | :---: |
| 3. What is your marital status?....................................................................... Marriod | Single | Other |
| 4. If married, does your spouse work?...............................................................Yes | No | NA |
| 5. What is your highest degree?.................................................................... Bactelor | Master | Doctorate |
| 6. Are you the major bread winner in your household?............................................Yes | No | Fipuad |
| 7. Should Texas retain the Cancer Ladder for teachers?............................................. Yes | No |  |
| 8. Are you seriously considering leaving the tesching profession? Yes <br> If yes, why are you considering leaving? | No |  |
| 9. In what type of district do you tcach?...........................................................Utren | Suburtan | Rural |
| 10. What grade level do you primarily teach? ...................................................... K-S | 68 | 9-12 |
| 11. How many years have you taught in the public schools?.................................... Years |  |  |
| 12. What is your current leaching salary per year ? ................................................... \$ |  |  |
| 13. Are you pleased with the current No Pass/No Play rulc?.......................................Yes | No |  |
| 14. What is your Carcer Ladder status for 1989-90? ...............................................I | II | 111 None |
| 15. Do you have health insurance with the school district?....................................... Yes | No |  |
| 16. How much do you pay per month ont of-pocket for the health insurance?................... \$ |  | NA |
| 17. What is the quality of teaching at my school compared to five years sgo? .................. Betcr | Hxsc | Same |
| 18. Do you have an extra job during the summer?.................................................. Yes | No |  |
| 19. How much exta do you carn during the summer?............................................. \$ |  | None |
| 20. Do you have an extra (moonlighting) job during the regular school year to supplement your twaching salary? $\qquad$ Yes | No |  |

If your answer to Question \#20 is YES, please answer the following questions.
21. Do you feel that the quality of your teaching would improve if you did bay have a second job during the regular satool year?......................................... Yes

No
22. How much extra money do you earn during the regular school year? ..... S
23. How many hours per week during the regular school yeardo you spend working at the moonlighting job?Hours
24. Werld you quit the second job if your teacting salary would enable you to give up moonlighting during the school year? ..... Yes ..... NO25. How large a raise in your teaching salary would you have to getto enable you to give up moonlighting during the regular sctrool year?S
26. What is your exira job during the school year? (Please give a job tille such as bookkeeper, sales clerk, cuach, bus driver, rancher, efs.)

## Appendix B

## Teacher Comments for 1990 Survey

1. Teachers' salaries are below all other salartes of professtonals. I am teanhing because 1 belleve in what I am dolngt I am not considering leaving the profession, but 1 do think about what it would be like to do something else. I teach cven in my sleepl I buy things out of my own pocket. A ralse (a real ralse) that I don't have to wonder about getting (career ladder) would solve so many things. A "bonus" for perfect attendance for ive years would be nice too': I get very little time to eat, never work on a teacher workday in my roum. put up with evaluations, ete. etc. Then. I have to listen to how "they" are going to cut programs. money. faculty. etc. etc. With me the child is the most mportant thing; he is the adult of tomorrow.
2. Neod better health insurance. I have considered an extra job as I have two in college. The teaching salary neods to be ralsed $\$ 10,000$.
3. Iloved teaching. but the Joy has been replaced by teaching to a TEST instead of teaching the child. Some rethinking needs to be done to keep competent and strong teachersl Lack of parental respect for teacher's opinions and ways of teaching: lack of basic teaching supplics due to low budgets; and generally not enough concern for the individual child
4. To achieve the goals of state and district, a teacher needs to hire her own secretary. housekecper, and cook. This is an 18 hour a day, including woekends. professionl I have no money except for the bare essentials. I drive an old car and assets/ savings are going backwards.
5. My real frustration is that the public and specifically parents and legislators are unaware of thetr responsiblitics as support mechanisms in the teaching environment. Children who assume no responsibility, no self-initiative or motivation, and who are lli-mannered. rude, and distespectful are frustraung to teach. We are a Nation-at-Risk because values are no longer taught at home. A bigger pay check will not solve everything. Students need to sit at computers, composing essays. critiqu.cs, using their imagination and creativ'ty, stimulating thoughts and ideas. 1 nerd more time to correlate manipulatives, calculators and problem solving activities with the curiculum. I highly resent a silly, subjoctive, and meaningless evaluation process that says I must perform an outrageous number of routhes to recelve credit. While I "play the game." my resentment grows. Was the state concerned with giving non-athletic coaches extra compensation? (UlL, etc.). 1 am on the highest k rel bocause I play the game. I am the solution, not the problem. Some of those same administrators couldn't teach: that's why they moved into administrative positionst
6. The career ladder causes tension (frtction) among teachers and between teachers and administrators.
7. The Carecr Ladder had put teachers in compettion. Instead of working together to help students. They compete for more moncy on the carcer ladder.
8. I teach spectal oducation and our paperwork is ridiculous. I want my class back.
9. The career ladder concept should be abolished. Everyone suspeets that the state doesnt have enough money to support it and it will only be a matter of the before most of the teachers will be found "Incligible" through evaluation.
10. Iteach because I love teaching. 1 am one of the lucky oncs whe teaches in a fantasuc school with great students and parents. My husband is the supporter of our family and my salary is used for extra things. I feel sorry for any teacher who has to support a famlly on a teacher's salary. Idon't tece how they do it. 1 apprectate your effort to help them.
11. I brought chadren with sertous problems to the attention of my princlpal. In both cases my professional optnion was not deemed worthy of consideration. Teachers are aware of the problems in educaton and how best te solve them, but no one listens to us.
12. I wish Texas would do away with the "Career Ladder" and pay Texas teachers what they are worthl lt's demoralizing (and I'm on Level III).
13. We are all "coeching (or teaching/reteaching) for the TEAMS test.
14. The TTAS has caused dissenston and been demoralizing for those who were put from level Ill to ll due to the way seloction was handled, money conoctns, ete.
15. If my husband did not make a very good salary i would be flling out the botiom hall of your surver. lim finding teaching less satislying die to the pressire of feaching toward minimurn skills rather than higher level thinking skills and creative problem solving. Also I'm tired of having the responsibility of a clilld's success being piaced totally in my hands rather than being sharod wite the parents and student.
16. What happened to less paperwork? The carcer iadder has caused many hard feelings among teachers.
17. The carier ladder has lowered teacher morale. and pitted teacher aga,nst teacher. They nced to ask the dedicated classroom teaches how to fix education.
18. 1 love to teach, I do not belke we should have to put up witi students who do not want to learn and are constant disc'pline problems.
19. What happened to salary shiedules? fll these dinerent degrees should mean difler salartes.
20. I know I do not want to be in this profession if they (TEA) continuc to tell us exactly how to teach. when, and for how many minutes.
21. I have suggested time and time agatn that having paraprofessionals to help with clerical works would relleve stress and tension in the classroom. It's hard to image a teaches having time to work during the schooi year. Thank you for your work, at least somerne is contacting teachers for their opinions.
2i. I don't like the carect ladder because it is too subjoctive and incy change the rules to fit the money.
22. I am fortunate enough to be married to a man who makes an cxcellent salary so that I can afford to be a teacherl
23. So much extra is dumped onto toacher, the joy of teaching fades quickly.
24. The quality of teaching has improved, the quality of student learning has decreased. We don't get credit, financially or other wise.
25. I'd rather have money go towards smaller, well-disciplined schools than toward teachers' salaries right now.
26. I have other income from investments made beforel started to teach school. Without his cxtra income I would not have been a teacher.
27. I am and interesting, intelligent, well-educated person. This job is primarily clerical job in a penal institution that drajns me of my energy and pleasure in life. I need time for other activities that I enjoy, but I have to break my nock to do anything else because working conditions are so miserable and, students are almost impossible to teach.-- hate this job.
28. I love teaching and coaching. Our administration acts like we owe them something for working here.
29. I have a gifted-talented-cnriched dass that is doing less than my basie classes were doing 5 10 years ago. I have no complatnts -ioun the salary and benefits I rocelve; 1 am very frustratex by the job conditions. I feel like a policeman rather than an educator.
30. The carect ladder is a great tdea, but let's not nake it tmpossible to get on it or stay on it.
31. The teacher evaluations are a huge source of stress for all teachers - having to prove yourself over and over - very morale lowering. Class stzes create the largest source of stress for me. Classes should have a maximum of 18 . There is not much oppritunty for advance meitt. Pay increases for ycars of service are extremely small. I could not support my famtly if llost my spouse's salary. My teaching improves every year, but not my salary. This is very discouraging.
32. Teaching is as dimeult a job as it is rewarding. People who have never bocin tin the profession have no idea how much time, planning, intelligence, diplomacy and skill it requires. I see my friends and relatives put down thetr work at $5: 00$ every day and go home to their famdies. At 5:00 1 load up a box of materlals to pit together ESL games.
33. I belleve the quality has dexlined due to the pressures of the carcer ladde. I will not attempt to place higher than Level Il because I refuse to "perform" like a monkey on a leasin. I weloome any observer at any time in my classroom, but not to perform the spocincs on the evalination at a specifle time. I enjoy my moonlighting job bocause our adult students have a different attitude towards learning. Most students complain about the administrators pressuring them out, not the teachers.
34. 1 know secretarles with no spockia skills who carn as much or more than I do. The curcer ladder is unfair in the way some school districts operate. This disiriet has a cettatn amount of money for the career ladder. They dole it out so the top 15 people get the mo'ey year after year.
35. Teachers are very capable. However, disclpline problems and laziness on the part of students prevent teaching from belng as rewarding as in the past years. It is unic for students and parents to be held accountable also.
36. Too much stress and structure destroy the creative teacher. The current no pass/no play is destroytng extracurticular activittes. It should not be for a complete grading period--only until grades are brought up or students get extra help.
37. If we are golng to year-round schools. are teaching salartes golng to tuctease by one-thtrd or more?
38. My low morale does not come from the poor pay. It comes from too many extra actulties at school which take away from quality teaching time. For example, this week alone. I will attend or be in charge of three incetings before school, two after school and one morning of outside duty. This month alone I have started a student drug program. worked on a departmental budget, had two field trips, and a history fair. My room looks like a tornado hit tt. I've lost my lessons plans twice, missed deadines numerously. ard taken work home cvery night and weekend.
39. Morale is lower due to lack of control optons in dealtng with disrupuve students. So much time and energy is apent in dealing with "Non-receptive" students, other studerits are being "short changed." Aisc causling low morale is constant pressure on us to lower our standards su that fallure rates are competitive with other schools. The law requiring automatic promotion to the next grade if a student has already been retained a year in the 6 th, 7 th, ir 8 th grade has created a core of studeats who are extremely deflant and disruptive in the classroom, affecting other students and their achlevement.
40. I quit teaching to get certifled in another field. I wasn't sure 1 would ever go back. But I decided 1 had too many years invested to leave it and start another career. 1 missod the students, too.
41. I can iove and teach children but i cant correct ait of soctetics ills by myseln I have not moonlighted bocause my son noeds a parcut-not because I donit need the money.
42. My principal made me quit my scrond job.
