ABSTRACT

The Department of Foreign Languages at Tarrant County (Texas) Junior College (TCJC) places primary instructional emphasis in elementary and intermediate language courses on the development of students' oral communication competence. Noting the differences in the oral proficiency of TCJC students and that of area high school graduates seeking advanced placement into intermediate-level language courses at TCJC, the department decided to initiate a program to encourage high school foreign language faculty to increase their oral emphasis in the classroom. The program began in fall 1983, as a series of advanced-level conversation classes in French and Spanish designed to improve the teachers' own speaking ability. By 1986, the program had been expanded to include six 16-hour workshops focusing on such topics as "Linguistics," "Videotaping," "Conversation Methods and Materials," and "Materials Development." During 1986, 34 teachers of French, German, Latin, Spanish and English for Speakers of Other Languages (ESOL) participated in the workshop program, with most enrolling in several of the courses. The participants gave the program excellent evaluations and requested additional in-service training opportunities. As a result, a series of 10 16-hour workshops is planned for summer, 1987. The 1987 workshops will be supported financially by a grant from Title II of the Education for Economic Security Act, which will fund tuition stipends for 250 workshop enrollees. The bulk of the program description consists of course outlines corresponding to the 1986 workshop series; pre- and post-tests and self-evaluation instruments for workshop participants corresponding to the 10 workshops in the 1987 summer program. WORKSHOPS FOR TEACHERS ON DEVELOPING ORAL PROFICIENCY

The Department of Foreign Languages at Tarrant County Junior College Northeast Campus has long recognized the value of teaching languages with a primary instructional emphasis on the development of oral communication competence in students. The curriculum in elementary and intermediate language courses as well as in other speciality courses in the department, such as listening comprehension and conversation, emphasizes oral communication. This heavy emphasis on oral skills creates a rather dramatic difference between the skills of TCJC students and those of the students from the area high schools who seek advanced placement into our intermediate-level courses. Noting these differences over a period of years, the language faculty at TCJC decided to initiate a program to encourage the faculty of the "feeder" schools to increase their oral emphasis in the classroom.

Simultaneously, at the state level, the "essential elements" in foreign language teaching and learning in the Texas public schools were rewritten to emphasize heavily the development of oral proficiency in students.

The research of numerous psycholinguists indicates that if students are to become proficient in a new language, they must hear the language extensively before trying to speak it, the input they receive must be both accurate and comprehensible, and they must feel secure enough to risk trying to produce language. Many teachers, however, are not proficient enough themselves to provide the quality of instruction needed. Many have never possessed good speaking skills; some have lost much of their oral facility while teaching beginners during several years without travel or study time for themselves; others cannot provide a secure environment because of their own insecurity in speaking the language.

Furthermore, with the increasing language enrollments in secondary schools, some teachers who have specialized in other disciplines but who took foreign language courses in college, perhaps many years ago, are being assigned classes in foreign languages. In addition, many teachers are lacking in techniques and materials for teaching and testing oral proficiency in students. Teachers in all these categories need assistance in the area of language for oral communication.

The simultaneous recognition of need by state educational leaders, by the TCJC faculty, and by the area language teachers for professional development in the area of oral proficiency

created an opportunity for TCJC to assume a leadership role with the area teachers. Beginning in the fall of 1983, Northeast Campus has offered conversation classes each semester to teachers of French and of Spanish in order to provide time, organization, motivation, and an environment where teachers could use their language with other speakers who were not beginning students.

During the summer of 1985, the department offered one workshop for teachers of foreign languages. The Color Connection was taught by Pam Kaatz, originator of the method and author of the materials, to eleven teachers from the area schools.

During the summer of 1986, the program was expanded to include six 16-hour workshops, all related to the theme of Languages for Oral Communication. Thirty-four teachers participated for a total of 104 workshop enrollments, most of them taking several of the courses offered. Each session enrolled from 12 to 24 participants. The 1986 offerings included the Color Connection, a Best Practices Seminar, Linguistics, Videotaping, Conversation Methods and Materials, and Materials Development. Course outlines for these workshops are in Appendix A.

A flexible schedule allowed teachers to take from one to six workshops; to be in class mornings only, afternoons only, or all day; and to come to campus one, two, or three weeks. Thus, they could arrange their professional development workshops around their other summer commitments. (See Table I for enrollment details by course and Table II for enrollments by language taught.)

The teachers enrolled in the workshops gave the program excellent evaluations and requested additional opportunities to continue their in-service training at TCJC. During the fall, 1986, the enrollment for the conversation classes for teachers increased dramatically. In addition, many of the teachers of French stayed after their conversation class each Monday evening for the course in French films which followed.

In response to the requests of the 1986 participants, a series of ten 16-hour workshops has been planned for the summer of 1987 for teachers of French, German, Spanish, and English for Speakers of Other Languages. The workshops are again designed to relate to the theme of Languages for Oral Communication.

Oral Proficiency Testing will be taught by Dr. Marion Webb of Houston Baptist University, Houston, Texas.

Curriculum for Oral Proficiency will be taught by Dr. Joan Manley of the University of Texas at El Paso.

Conversation Methods and Materials will be taught by Dr. James Hendrickson of Lansing Community College, Michigan.

Shared Practices Seminar will provide participants the opportunity to share their most effective instructional strategies, games, and materials.

Materials Design and Development will be a practicum in development of instructional materials for classroom use.

Color Connection includes color-coded teaching techniques and preparation of a personal set of materials.

Films in French and Films in Spanish offer the viewing of a series of current movies available on videocassette.

Conversation in French and Conversation in Spanish will be based on the films viewed each day.

(Pre- and post-assessment instruments for each of these workshops are in Appendix B of this document.)

The 1987 workshops will be supported by a grant from Title II of the Education for Economic Security Act. With this grant TCJC is able to offer tuition stipends to 250 workshop enrollees. In addition, \$50 for the cost of materials development will be made available to the first 90 registrants

in Color Connection, Materials Design and Development, and the Shared Practices Seminar.

In addition to the summer workshops, TCJC Northeast Campus is continuing its program of conversation classes for teachers in French and in Spanish each fall and spring semester. Additionally, during the fall semesters the course in French films is scheduled immediately following the French conversation for the convenience of the area teachers; during the spring semester the same schedule is provided for the teachers of Spanish.

The participation of the language teachers from the area elementary, junior high, and senior high schools has benefitted the TCJC foreign language faculty as well as the participating local teachers. Mutual respect among the instructors from the various academic levels has been developed. Creative ideas for activities and materials have been shared. Common goals and objectives have been discovered and/or verbalized. New vitality and energy have been sparked along with the new friendships. The Department of Foreign Languages at TCJC Northeast Campus believes that its efforts to develop and sustain this program have been worthwhile.
