WOMEN IN ANCIENT TIMES

PROBLEM. The 'feminine mystique' had to start somewhere, sometime! Have women always held the position of "sex object" that we hear them complain about today? In some societies the basis for wealth and power has been women. All land and titles have been handed down on the female side of families. Women held positions of great power in civilizations of ancient times. Remember Cleopatra?

What were women like in ancient times? Did they wear make-up? What fashions were popular? How did women's role compare in different societies? Were they expected to take an active part in society, or stay at home and cook?

II. Specific Objectives. When you complete this unit, you will be able to:

1. Explain in writing specific aspects of the role of women in various ancient societies (life at home, occupations, the family, etc.) and compare them with each other.
2. Compare in writing the role of women in ancient times with their role in our society today.
3. Describe the fashion popular among women in ancient times.

III. Required reading material.

1. Read The Human Adventure, Vol. I, pp. 16-18, 20.
2. Read The Human Side of World History, pp. 1, 3, 5, 21, 31-32.
3. Read the assignment in the Study Guide.
4. Read 2 of the following assignments.

Everyday Life in Ancient Greece, C.E. Robinson, pp. 81-87.

Everyday Life in Ancient Rome, F.R. Cowell, pp. 63-66, 71-73.

Everyday Life in Ancient Egypt, J.M. White, pp. 90-99.

A Day in Old Athens, Davis, pp. 35-42, 46-47.

Ancient China, Time-Life, pp. 89-99.

Ancient Egypt, J.E. White, pp. 120-122, 117-118.
The First 3000 Years, C.B. Falls, pp. 97-89.

Count as one

IV. Extra Reading Material. For a wider understanding of the role of women in ancient societies read any references to them found in the indexes of the books in the room or in the library which pertain to ancient times.

V. Required Activities. Complete each of the following activities:

1. Answer each of the following questions in your own words in writing using the reading material in the Study Guide.

1. What occupations were open to women in ancient Egypt?
2. What rights did women have in ancient Egypt? What happened when a woman was accused of infidelity?
3. What did women wear in ancient Egypt? What cosmetics were used?

2. In a short (1-2 page) essay, compare the role of a woman in one ancient society with the role of women today. Use specific examples from the reading and from magazine articles or books in the library on the woman's role today to support your ideas. (Use the Reader's Guide to Periodical Literature to find any magazine articles you need.)

3. Choose 2 of the following activities.

1. Prepare an attractive brochure presenting the fashion trends in clothing, cosmetics, etc., in one ancient society. You may cut out pictures from magazines at home or make your own sketches and drawings.

2. Present a fashion show to the class (limit of 3 people) in which you demonstrate fashion trends in one or more ancient societies. This should be a well-organized, interesting presentation.

3. Write an editorial on woman's rights in one ancient society for a newspaper. Use your imagination and make your article as realistic as possible.

4. Read Antony and Cleopatra by Wm. Shakespeare. Report to the class on the power of this important woman.

5. Read a biography on Cleopatra. Fill out a critique form.

VI. Extra activities. If you would like to do an extra activity on this unit, please see the teacher.

"Cleopatra", M. Grant, Mankind Magazine, VI, 3, number 6 pp. 50.

"The Astarte Phenomenon", K. Cavander, Horizon Magazine, Spring, 1971, p. 15.

PACKAGE TITLE: POLITICS AND LAW
1900-1930

JUDY HOFFMAN

I. PROBLEM

The period between 1900-1930 was one in which political activity and legal activity (or illegal activity) were often at odds with each other. It would be almost impossible to separate the two what with all the scandals that involved the illegal activities of prominent political figures. This period included the worldwide depression and the era of prohibition in the United States.

With the development of new political ideas such as progressivism, communism and fascism, those out to "make the world safe for democracy" often got carried away with their own special brand of values and found it impossible to tolerate the ideas and actions of those who believed differently from them. Thus the Red Scare of 1919. Prohibition, the growth of the Ku Klux Klan and the execution of two anarchists for a murder for which they may have never been guilty, were all events which tied politics and law together in the United States.

In the rest of the world Mahatma Ghandi used civil disobedience to protest British rule, Mussolini began his rule with an iron hand over his people, and Communism became firmly entrenched in Russia.

How did political ideas affect what people considered legal or illegal? Did people change laws to fit their own morals? Did everyone agree with the changes or were the ideas and morals of many ignored and set aside? Did the changes really benefit society or were those ideas which were attacked in reality harmless to the welfare of society? What should be legislated against? How do we decide what should be the law? Are mistakes ever made? Can you make a comparison between Prohibition and the present in respect to the ban of a widely used substance?

II. SPECIFIC OBJECTIVES

When you finish this unit you will be able to:

1. Identify in writing major political figures from 1900-1930.
2. Identify in writing the practices, legal and illegal, of those major political figures. (Including major scandals.)
3. Describe in writing examples of how political ideas affected law and the legality of various activities which occurred during this period.
4. Describe in writing injustices which occurred during this period as a result of political ideas.
5. Compare in writing laws in effect during this period

with ones in effect now.

6. Explain in writing the major political philosophies which existed during this period: i.e. Communism, fascism and democracy.

TRADE AND CRAFTS IN ANCIENT TIMES

I. PROBLEM

Ancient civilizations often had elaborate economic systems in order to support the trade and crafts in their societies. Forms of money were even devised to simplify trade. Egypt, Phoenicia and Sumer traded with their neighbors as did the later civilizations of Greece and Rome. What conditions were necessary to support trade and manufacturing in ancient civilizations? Are these same conditions necessary today? What types of crafts were manufactured in ancient times? What raw materials were used? Was agriculture an important source of trade items? How was trade carried on? With whom did the ancient civilizations trade? What effects did trade have on each civilization? What occupations relating to trade and manufacturing were developed?

II. SPECIFIC OBJECTIVES

When you finish this unit you will be able to:

1. Explain in writing which ancient civilizations (up to the fall of the Roman Empire) developed manufacturing and trading with other societies and give examples of societies with whom they traded.
2. Describe in writing what types of goods were manufactured and traded by each major ancient civilization.
3. Explain in writing the effects of trade on the ancient civilizations.
4. Describe in writing the various occupations which developed in connection with trade and manufacturing in ancient societies.

III. REQUIRED READING MATERIAL

Read each of the following references:

1. Men and Nations pp. 29-31, 40, 41, 42, 50-52, 53, 62, 66, 70, 73, 83-84, 109-110, 119, 128, 131-133, 141, 159, 171, 180-182.

V. REQUIRED ACTIVITIES

Complete each of the following activities using the reading material.

1. Questions: Answer each of the following questions in your own words in writing
 1. Describe the trade carried on by each of the following civilizations: Egypt, Sumer, Phoenicia, Greece and Rome. Include items traded and trade contacts.
 2. Explain with examples what is meant by the "civilizing influence of commerce."
 3. What were the principal occupations of Shang China? What were the chief products?
 4. Why did the Greeks have to be traders to live?
 5. By 133 B.C. Rome ruled a large territory. What changes followed in (a) manufacturing and (b) commerce?
2. Choose at least 2 of the following activities:
 1. Draw a map of the ancient near East, showing in color the Egyptian Empire at its greatest extent and the routes of Egyptian trade both by land and by sea.
 2. Draw a map showing Phoenician trade routes.
 3. Prepare an attractive travel brochure advertising the business and trade opportunities in any one of the major ancient civilizations.
 4. Prepare a series of at least 10 classified advertisements relating to business (buying and selling) or occupations which might have appeared in an ancient newspaper (if they had had them). Make your ads as authentic sounding and looking as possible.
3. Choose at least one of the following activities.
 1. Form a group of no more than 3 people. Discuss the following questions. Have one person take notes to be handed in.
 1. Explain the reasons for the importance of a scribe in ancient Egyptian society.

2. Phoenician traders were responsible for the spread of culture in the Mediterranean world. Does international trade in the contemporary world aid the spread of culture? Explain.
 3. What part did economic decline have in the fall of the Roman Empire?
 4. Compare occupations available in ancient civilizations with ones available today. How are some alike? Different? Give specific examples.
2. Prepare an attractive bulletin board display on trade and crafts in ancient times. Show examples and effects of trade.
 3. Prepare and give an oral report on the business activity in any one ancient civilization (trade, occupations, crafts, etc.)
 4. Make up a crossword puzzle with a theme of Trade and Crafts in Ancient Civilizations. A complete key should be prepared also. Transfer the puzzle and key to a ditto master.
4. Take the Post Test.

JUDY HOFFMAN

EARLY COMMUNICATION: LANGUAGES AND WRITING

I. PROBLEM. Turn to your neighbor and without talking or writing, try to ask him what he is doing after school. Difficult, isn't it! One of our most useful tools is the ability to communicate through language and writing. How well you make use of your language and how well you can express yourself in writing influence the opinion others have about you. Everyday we are called upon to talk about ideas, and whether they concern a movie we have seen or a political opinion, it would be practically impossible to make someone else understand how we feel without language or writing.

There was, however, a time when there was no language and there was no writing. As a matter of fact a written language did not develop until spoken language had been around for a long, long time. Picture writing was around long before writing with symbols. Many civilizations never developed a form of symbolic writing. The American Indian is such an example.

Just how did men communicate before language? What does sign language mean? How did different languages develop? What is picture writing and why did it develop? Why did symbolic writing develop and what different kinds exist? And, finally, of what importance to ancient civilizations were language and writing?

II Specific Objectives After finishing this unit you will be able to:

1. Explain (orally and in writing) the importance of writing and language in communication both in ancient and in present societies.
2. Compare in writing picture writing with symbolic writing and tell which ancient cultures used each type of communication.
3. Explain (orally and in writing) the origin of our own alphabetical and numerical systems.
4. Explain orally and in writing how man communicated before the development of language.

III Required Reading Material

IV. Required activities. Complete each of the following activities.

1. Answer the following questions in your own words in writing in complete sentences and hand them in to be checked by the teacher.

1. Giving examples from the reading material explain the importance of writing to ancient cultures. Why would symbolic writing be more advanced than picture writing?
2. What was the writing of the Egyptians called? The Sumerians? What did they write on?
3. What ancient culture originated the alphabet?

2. Pretend you are a prehistoric caveman. "Write", using picture writing, a letter to a friend telling him what your daily activities are. Use your imagination, but be as realistic as possible.

3. Watch any 2 of the following filmstrips. Take notes only on the part that has to do with communication and hand your notes in to be checked by the teacher.

- FS Ancient Egypt
- FS 330 The Coming of Civilization
- FB 263 Egypt's Eras of Splendor
- FS 98 The Great Age of Warrior Homeric Greece
- FS 34 The Greek City-State
- FS 21 Rome's Beginnings
- FS 27 An End and A Beginning
- FS 372 Life in Ancient Egypt
- FS 255 The Incas
- FS 308 Heritage of the Maya

4. Choose 2 of the following activities:

1. Present the play on page 103 of Indian Sign Language to the class with 2 other people working on this unit.

2. Using Egyptian Hieroglyphs for Everyone, pretend you are a teenager in ancient Egypt and write an entry to a diary in hieroglyphics. Below your entry write the entry in English. Your entry should be 1/2 page long at least (in English).

3. Read in library sources about the first translation of the Rosetta Stone of Egyptian hieroglyphs (one good source is Gods, Graves and Scholars). Present an oral report to the class about what you have learned.

4. Using examples from the reading write an essay on the importance of writing and communication, both in ancient and in present societies

LAW AND ORDER IN ANCIENT TIMES

I. **PROBLEM.** Why do we have laws? For protection and order, many people would answer. When did this desire for order begin? We know that formal record of laws in a society was made as early as Babylonia and Assyria. Much can be learned about the development of societies by man through the study of their laws. Even such facts as class structure and the way people made their living can be discovered.

How do laws of ancient societies compare with those of our own? Are they more harsh or more lenient? We hear much today about the abolition of capital punishment. Did the death penalty exist in ancient times? What penalties were prescribed for various crimes? What actions were considered crimes? Is our conception of crime the same today as it was then?

II. **Specific Objectives.** When you complete this unit, you will be able to:

1. Describe in writing laws of ancient societies.
2. Compare in writing and orally the laws of at least 2 ancient societies.
3. Describe the concept of crime in ancient societies and compare it with that of today.
4. Describe in writing aspects of the lives (occupations, class structure, etc.) of people of ancient societies which can be determined from their laws.

III. **Required Reading Material.**

1. 32 Problems in World History, pp. 22-26, 40-45
World History: The Clash of Ideas, pp. 8-13.
2. The Human Side of World History, pp. 1-2.
3. The Human Adventure, vol. I pp. 24-26, 42-45, 58-61.
4. Men and Nations, pp. 41, 54-55
5. Read 2 selections listed below, each about a different society.
 - a. Everyday Life in Ancient Greece, C E Robinson, pp. 56-60.
A Day in Old Athens, Davis, pp. 138-146.

- b. Land of the Two Rivers L. Cottrell pp 74-75 77

IV. Required Activities Complete each of the following activities

1. Answer the following questions in writing in your own words using the reading you have done
 1. How is it what the Babylonians could live according to the relatively short code of Hammurabi while nations today have much more complicated legal systems?
 2. Explain the laws which you think were severe in ancient times and compare them with laws for the same offenses today
 3. What do the ancient laws show about occupations in ancient societies? What kinds of occupations existed in ancient societies?
2. Write a well-organized paper comparing the Babylonian and Hebrew laws Use specific examples from the reading and discuss the major emphasis of the laws of each society (1-1 1/2 pp)
3. Choose 2 of the following activities
 1. With no more than 3 other people enact a scene which might have taken place in an ancient courtroom. Write up your dialogue to be turned in and duplicated so each person has a copy. Your scene should be as realistic as possible as well as imaginative. It should include enough educational facts to be of "redeeming social value" Costumes and props will be welcomed
 2. Read one of the following and write a paper discussing the Greek attitude toward law using examples from what you read.

Electra Euripedes

The Orestean Trilogy Aeschylus

Medea J Anouilh

Antigone J Anouilh

Hecuba Euripedes

The Trojan Women Euripedes

Orestes Euripedes

EARLY TRANSPORTATION

1. PROBLEM. "Hey, can you get some wheels Saturday night?" is a common question among teenagers now. Transportation has always been of interest to people, but have people always had "wheels" or even a wheel? Can you say for certain when the wheel was invented? What did people do to move themselves and their belongings from one place to another before the wheel? Just how much does the ease or accessibility of transportation affect our lives? How did these factors affect ancient cultures? Just how easy was it to move if you didn't like where you lived? How easy was it to contact other cultures or trade with them? Transportation affected these as well as many other aspects of lives in ancient cultures.

II. Specific Objectives. After completing this unit:

1. You will be able to compare the method of transportation before and after the invention of the wheel in writing or orally.
2. You will be able to explain in writing and orally why different types of transportation were useful and important to at least 2 ancient cultures.
3. You will be able to explain in writing and orally the similarities and differences between transportation in ancient cultures and your own.
4. You will be able to explain in writing what occupations existed as a result of early transportation methods.

III. Required reading material.

1. Read the following pages in Men and Nations.

Prehistoric times -- pp. 9-11, 13
Egypt -- pp. 20, 29
Mesopotamia -- p. 40, 43, 50-52

IV. Required activities. Complete each of the following activities.

1. Participate in class discussions.
2. Answer the following questions and hand them in to the teacher to be checked.
 1. Before the invention of the wheel, what alternatives to walking did man have?
 2. How was the domestication of animals important in the development of transportation?
 3. What was the fastest method of transportation to -- what was then considered -- distant places?
 4. What jobs were created as new methods of transportation were developed?
3. Choose two of the following activities.
 1. Make a neat, easily read chart on construction paper showing 4 different ancient cultures and the methods of transportation used by them. Include a column indicating the importance of transportation in the cultures.
 2. Look at at least 2 of the following filmstrips and take notes to be handed in and checked by the teacher. The notes should only be on the parts of the filmstrip which have to do with transportation.
 - FS 16 Oldest Nation Egypt
 - FS 310 Athens
 - FS 98 The Growth of Warrior Homer
 - FS 54 The Greek City-State
 - FS 28 The Augustan Age
 - FS 372 Life in Ancient Egypt
 - FS 255 The Incas
 3. Write a newspaper article for the Sumer Herald Tribune about the invention of the wheel. Your article should discuss the importance of the invention and explain how the invention will change everyday life in Sumer. Use your imagination!
 4. Write a proposal as if you were a Roman engineer about the importance of a vast network of roads to the unity of the Empire. Remember the phrase "all roads lead to Rome" used to be true!
4. Choose one of the following activities.
 1. Write a short paper (1 1/2-2 pp) in which you discuss one ancient method of transportation and its importance to societies in which it was used. Include a list of sources (bibliography). Do not use encyclopedias except as background reading.

2. Write a short paper (1 1/2 - 2 pp) about the various types of occupations involved in early methods of transportation. Include a list of sources (bibliography).

3. Pick any one ancient civilization. Explain what methods were used, which ones were most important and why. Include a list of sources (bibliography). Do not use encyclopedias except as background reading.

4. Read two magazine articles dealing with transportation. Pick one about an ancient method of transportation and one about a modern method of transportation. Write a short paper (1 1/2-2 pp) comparing the ancient method with the modern one. Include points about convenience, importance to the society in which they are used and occupations created as a result of the use of that particular method of transportation. Use the Reader's Guide to Periodical Literature to find your articles. Articles about primitive transportation may especially be found in National Geographic. Turn in a bibliography.

V. Extra activities. If you would like to do extra activities to increase your understanding about the history of transportation in ancient cultures please see the teacher for suggestions.

EXPLORERS AND COLONISTS

I. PROBLEM

From the time Marco Polo traveled to China, Europeans began to desire the riches and luxuries offered by the Far East. It was expensive to obtain these goods, however, for voyage east over land and sea were long. Only the very rich could purchase the spices and silks available from the Indies. In the 15th century when the Moslems captured Constantinople all trade with the Far East ceased.

Men began to look for other routes to the luxuries they desired. A new era began in which brave men began exploring routes unfamiliar to them. Some men had known since classical times that the world was not flat. However, they believed that there were only a few scattered islands between Europe and the East Indies.

What kind of man did it take to embark on a voyage into unknown waters? What motives were behind the exploration of strange parts of the world? What scientific achievements were necessary before man could sail uncharted waters? Who were the most important people in the Exploration Period? What did these explorers find? Were they the first men to travel west to reach the Indies or had men sailed west centuries before? What kind of people did the explorers encounter in their travels? How were these people treated?

II. SPECIFIC OBJECTIVES

When you finish this unit, you will be able to:

1. Explain in writing and orally the motives for exploration and colonization from 1400-1750.
2. List in writing the new scientific achievements of the 1400's necessary for exploration of uncharted waters at that time.
3. Describe in writing the treatment of conquered peoples by the Europeans.

WOMEN IN THE MIDDLE AGES AND RENAISSANCE

I. PROBLEM.

Women in the Middle Ages and Renaissance were considered the property of men. He was free to do whatever he wished with her. Women were often the victims of marriages meant to benefit their families. They were taught all the proper manners if they were part of the nobility, but were still very coarse at times. Peasant women worked as hard as their menfolk.

During the Renaissance even women were able to benefit from the renewed interest in learning. They formed educational societies and even practiced some medicine. Some women began to learn a trade to support themselves. They traveled more and influenced improvements in social behavior.

What were specific laws which pertained to women during this period? What types of occupations or professions could they participate in? What relationship did men and women have? How were the roles of women in the noble and peasant classes different? What were women's fashions like during the Middle Ages and Renaissance? Was make-up used then? What happened to women who were too independent?

II. SPECIFIC OBJECTIVES. When you finish this unit, you will be able to:

1. Describe in writing the role of women in the Middle Ages and Renaissance.
2. Explain in writing any changes in the role of women which occurred during the Renaissance.
3. Compare in writing the role of women in the Middle Ages and Renaissance with that of today.
4. Describe in writing any occupations held by women during the Middle Ages and Renaissance.

The Rise of a Middle Class

I. PROBLEM.

After centuries of trading all around the Mediterranean Sea, the barbarian invasions and the fall of the Roman Empire brought a stop to all contact through trade between Europe and the Near East. Europe fell into chaos and government was practically non-existent. Strong Germanic tribes were able to control some areas, for a time, but for the most part there was no strong central government and in the absence of such a unifying force, feudalism became the way of life for everyone.

In this system each manor was practically self-sufficient. Everything that people who lived on the manor needed was produced right there, so there was little need to trade with other peoples. What were the factors which made this independence of each manor necessary? What were the occupations of those people who lived on the manor? What was the economic structure of the manor?

In 1095, though, came a cry for a crusade to free the Holy Land from the Arabs. Nobles quit fighting each other and united against a common enemy. Other motives contributed to the numbers who traveled to the Mid-East and among these was the chance for business gain by European merchants. Items which were rare and could not be produced in Europe could be found in the Holy Land. Over the centuries during which the Crusades lasted many new products were introduced into Europe and trade increased. Italy became important in trade with the Near and Far East. Towns began to grow again and organizations called guilds were formed to protect the interests of laborers and merchants. How did these organizations compare with labor unions of today? What effect did all of these developments have on the class structure and feudalism? What new occupations developed? What businesses were profitable at this time?

What people were influential in the growth of trade and business during the Middle Ages and Renaissance? There were families who were important in the economy of the newly developed nations of the Renaissance. Some of these included the Medici of Italy and the Fuggers of Germany. Business had developed from a small operation by individuals to a large operation requiring the raising of huge amounts of money. What new organizations were created to meet this demand? What business opportunities were created by the discovery and exploration of the Western Hemisphere? What was mercantilism, a new theory of trade developed during the 1500's? What new items were obtained from the Western Hemisphere for sale in Europe? What effect did colonies have on trade? What countries were most active in the revived trade of this period?

What factors were responsible for the change between business of the Middle Ages and that of the Renaissance and Exploration period? How much had business changed from the beginning to the end of this period? What effect had these

changes had on other parts of society such as class structure?

II. SPECIFIC OBJECTIVES. When you finish this unit, you will be able to:

1. Describe in writing business opportunities including such factors as occupations, trade and manufacturing as well as the extent of the influence of trade in medieval times.
2. Explain in writing the importance of the Crusades in the revival of trade in Europe.
3. Describe in writing the business opportunities which existed during the period of the Renaissance and Exploration.
4. Compare in writing types of business ventures and their effect on society in the Middle Ages and in the Renaissance with each other and with the present time.
5. Express an appreciation for the ability of people to adapt to new situations, influences and business opportunities and for the ability of people to invent ways to take advantages and make the most of these opportunities.

ART AND LITERATURE IN ANCIENT TIMES

I. PROBLEM. Art and literature developed in the ancient civilizations have remained very important even in present times. Not only have they influenced art and literature of later times, but they are valued for their inherent beauty and importance. The refinement in art can be seen in Greek sculpture and architecture. The thoughts of Greek philosophers remain with us even today. Greek drama is still performed and enjoyed by everyone. The creative themes in their plays have been utilized again and again by other playwrights.

The Romans were important in the preservation of Greek culture in addition to having their own artists such as the great poet Vergil who wrote the Aeneid. The Egyptian and Indian cultures also made important contributions to art, architecture and literature. Even earlier cultures such as the Cradeans developed beautiful architecture.

What early civilizations made contributions in art, architecture and literature? What contributions did they make? How did civilizations influence each other in the arts? How are we influenced today by contributions made in ancient times? Were artists of all kinds (painters, sculptors, dramatists, philosophers, architects, etc.) supported by the government, or were they forced to compete with other occupations to make a living? How does their situation with regard to support compare with artists today? Who were the greatest artists of ancient times?

II. SPECIFIC OBJECTIVES

When you finish this unit you will be able to:

1. Explain in writing which ancient civilizations made important contributions in art, architecture, drama and literature (including philosophy).
2. Describe in writing what the major contributions were in each major ancient civilization.
3. Identify examples of painting, sculpture and architecture developed in ancient civilizations.
4. Identify and match with their major contributions the principal figures in philosophy, drama and literature.
5. Explain in writing how the contributions in the arts in ancient civilizations influenced each other and how they influence us today.

III. REQUIRED READING MATERIAL.

Read each of the following references carefully and/or study the illustration (whichever is applicable).

1. Men and Nations pp. 29-33, 40, 46, 49, 55, 58, 62-63, 73, 75-76, 86-88, 90-91, 93, 100, 108, 111-118, 119-120, 123, 126, 133, 139, 142, 144-145, 152, 155, 162-164, 169, 171-173, 179-182.

2. Choose 2 of the following activities.

1. Draw a sketch of a Greek temple - for example, the Parthenon.

2. Watch at least 3 of the following filmstrips. Hand/in notes on the material pertaining to this unit.

Egypt's Eras of Splendor
Ancient Egypt
Athens
The Great Age of Warrior Homeric Greece
The Glory of Athens
The Greek City-State
Rome the Eternal City, part I - Kings & Consuls
Rome the Eternal City, part II - The Emperors

3. Write a short (1 page) defense of Socrates, to be used at his trial.
4. Write a short (1-1 1/2 pp.) essay on how we are influenced today by the art and literature of ancient times. Use specific examples of observations from your own everyday surroundings to support your ideas.
5. Prepare an attractive chart illustrating the major contributions in art and literature from at least 4 ancient civilizations.

3. Choose at least one of the following activities:

1. Read any Greek play. Write an essay (2-3 pages) on its relevance to modern times - note the themes and ideas which are important regardless of when the play was written.
2. Prepare a well-organized presentation of ancient art to be given to the class (15 minutes). You may show examples from several civilizations or from just one. You should develop a theme to tie your presentation together.
3. Study photographs of Egyptian gods and pharaohs and of murals depicting daily life in Egypt. Draw similar pictures for the bulletin board.
4. Form a group of no more than 3 people. Discuss the following questions carefully. Have one person take notes to be handed in.
 1. Socrates taught that a person is wise if he knows that he does not know everything. Do you agree or disagree with this definition of wisdom.
 2. Who was to control Plato's ideal government? Do you think such a government is possible, and if so, would you like to live

under it?

3. Hellenistic Greeks valued knowledge for its own sake and had little interest in its application. Do you think knowledge in the United States is pursued for its own sake or only for its practical application?
4. What were the teachings of the Stoic and Epicurean philosophers? Which one of these philosophies do you prefer? Justify your choice.

4. Take the Post Test.

ART, MUSIC AND LITERATURE - MIDDLE AGES AND RENAISSANCE

PROBLEM. Throughout the past, art, music and literature have expressed the values and interests of mankind. During the Middle Ages and Renaissance this was especially true. The Middle Ages was a period in which man was more interested in life after death and in his religion than he was in his life while on earth. The art and literature of the times expresses these interests. Also, he was prone to fantasy rather than reality. Perhaps the harsh reality of life was too much to bear. The legends of King Arthur illustrate the interest in fantastic feats of bravery. The art of the time is primarily religious and unconcerned with accurate portrayal of the human figure.

In the Renaissance, however, the renewed interest in learning and in man's life on earth brought about art and literature which reflected these interests. The works of classical times (Greece and Rome) were studied again. The interests of the artists and writers of this time were wide and varied, just as long as they pertained to man on earth. The art of the Renaissance was some of the best the world has seen. Painters and sculptors created beauty all over Europe.

Why were interests in the Middle Ages so limited? What caused men of the Renaissance to be so creative? Who were the great artists of the Middle Ages and Renaissance? What were the major areas of interest for Renaissance writers? What did Renaissance artists paint and sculpt? How did the artists and writers of the Renaissance support themselves? Did they ever have to abandon their principal interests in order to support themselves?

I. Specific Objectives. When you finish this unit, you will be able to:

1. Compare and contrast in writing the motivating forces for art and literature in the Middle Ages and Renaissance.
2. Identify great works of art from the Middle Ages and Renaissance.
3. Explain in writing the varied interests of Renaissance artists and writers.
4. Give in writing examples of how Renaissance artists and writers supported themselves.
5. Explain in writing the important ideas expressed by at least 1 Renaissance writer and one writer in the Middle Ages.
6. Identify important pieces of music from this period of time.

III. Required Reading Material. Read each of the following references:

1. Men and Nations. pp. 201-202, 206, 221, 226, 229-234, 240, 248-9, 252, 254, 292-299, 301, 317, 332.
2. The Human Adventure, volume I. pp. 155-163, 167-172
3. The Human Side of World History. pp. 54, 55, 76, 81, 82.

IV. Required Looking. Look at and study workd of art from the Middle Ages and Renaissance as listed below. Where a particular work is named, be sure you could recognize and identify it by name and artist. Turn in a 1-2 page discussion of your reactions to the works of the Middle Ages and Renaissance. It would be helpful to read the text in the books which pertain to the works.

The Middle Ages:

Early Medieval Art

Romanesque Art -- Tournai Cathedral; Portrait of a Physician.

Gothic Art -- Notre Dame, Paris; The Road to Calvary, Martini; Madonna Enthroned, Giotto.

The Renaissance:

Late Gothic

The Early Renaissance in Italy -- Donatello, David
Botticelli
Masaccio
Ghirlandaio, An Old Man and His Grandson

The High Renaissance -- Leonardo da Vinci, Mona Lisa
The Last Supper
Michelangelo, Moses
David

VI. Required Activities: Using the reading material, complete each of the following activities.

1. Answer the following questions in writing in your own words.
 1. How did medieval universities originate? Why do you think the Church might have preferred the writings of St. Thomas Aquinas to those of Peter Abelard?
 2. What were some characteristics of Gothic Churches?
 3. How were motivating forces for art and literature different in the Renaissance and Middle Ages?
 4. Explain how Humanism moved northward. How did Erasmus, Rabelais and More reflect its spirit?
 5. Give 2 examples illustrating the varied interests of Renaissance artists and writers.
 6. Did artists of the Middle Ages and Renaissance depend on their talent to support themselves? Explain.
2. Choose at least one of the following activities.
 1. Read either The Agony and the Ecstasy or I, Michelangelo, Sculptor, by Irving Stone. Fill out a critique form. Include a discussion of how Michelangelo supported himself.
 2. Read 32 Problems in World History, pp. 56-61 or pp. 93-98 and discuss the questions which precede the article with the teacher.
 3. Read any 2 of the following magazine articles and turn in abstracts with bibliographical information.

ART AND LITERATURE IN ANCIENT TIMES

I. PROBLEM. Art and literature developed in the ancient civilizations have remained very important even in present times. Not only have they influenced art and literature of later times, but they are valued for their inherent beauty and importance. The refinement in art can be seen in Greek sculpture and architecture. The thoughts of Greek philosophers remain with us even today. Greek drama is still performed and enjoyed by everyone. The creative themes in their plays have been utilized again and again by other playwrights.

The Romans were important in the preservation of Greek culture in addition to having their own artists such as the great poet Vergil who wrote the Aeneid. The Egyptian and Indian cultures also made important contributions to art, architecture and literature. Even earlier cultures such as the Cradeans developed beautiful architecture.

What early civilizations made contributions in art, architecture and literature? What contributions did they make? How did civilizations influence each other in the arts? How are we influenced today by contributions made in ancient times? Were artists of all kinds (painters, sculptors, dramatists, philosophers, architects, etc.) supported by the government, or were they forced to compete with other occupations to make a living? How does their situation with regard to support compare with artists today? Who were the greatest artists of ancient times?

II. SPECIFIC OBJECTIVES

When you finish this unit you will be able to:

1. Explain in writing which ancient civilizations made important contributions in art, architecture, drama and literature (including philosophy).
2. Describe in writing what the major contributions were in each major ancient civilization.
3. Identify examples of painting, sculpture and architecture developed in ancient civilizations.
4. Identify and match with their major contributions the principal figures in philosophy, drama and literature.
5. Explain in writing how the contributions in the arts in ancient civilizations influenced each other and how they influence us today.

III. REQUIRED READING MATERIAL.

Read each of the following references carefully and/or study the illustration (whichever is applicable).

1. Men and Nations pp. 29-33, 40, 46, 49, 55, 58, 62-63, 73, 75-76, 86-88, 90-91, 93, 100, 108, 111-118, 119-120, 123, 126, 133, 139, 142, 144-145, 152, 155, 162-164, 169, 171-173, 179-182.

WOMEN'S LIBERATION MOVEMENT

I. PROBLEM. In the last few years, women have decided that their place in society is not what it should be. What with the emphasis on zero population growth, it is not so much the role of women to stay at home, bear children and raise them anymore. Rather, women are demanding a role in society equal to that of men. They want to be eligible for all jobs is qualified and paid on an equal basis with men doing comparable work. Many women are rebelling against the traditional role of homemaker by demanding that their husbands share house-keeping responsibilities, especially if the wives have a career. In effect, women want to be able to choose their place in society rather than having their role thrust upon them.

What effects has this new attitude had on the rest of society? Fashions, politics, laws, morals, marriages as well as the careers of men and women have all been affected. Even advertising ("You've come a long way, baby") has changed in response to the new awareness of women.

What started the woman's lib movement? What people have been instrumental in setting the sparks? What conditions in our society made the movement catch on? Where has it been most successful? Just how has the women's lib movement affected other areas of life besides at work or in the home? What percentage of women are militant in their devotion to the movement and how many just sympathize quietly with its ideals? How do you feel about the trend? How far should woman's lib go? Should women serve in combat positions in the armed forces as they do in Israel?

II. Specific Objectives. When you finish this unit you will be able to:

1. List in writing the goals of the woman's liberation movement?
2. Explain in writing what areas of life have been affected and how. (occupations, advertising, fashions, etc.)
3. Compare in writing the role of women in the U.S. today with the role of women in other parts of the world.
4. Express your stand on the role of women in modern society.

III. Required Reading Material. Read each of the following assignments.

1. Read at least one magazine article on each of the following topics:
 - woman-equal rights
 - woman-legal status
 - woman-occupations (job discrimination-or pick an occupation)

woman's liberation movement
women's fashion (look under clothing)

2. Read two magazine articles on women in any other country.
Look up "Women - (Country name)"

IV. Extra Reading Material. For a deeper understanding of the material in this unit read any of the following books.

Everyone was Brave. W. O'Neill.
The Female Eunuch. Germaine Greer
Century of Struggle. E. Flexner
The Feminine Mystique. B. Friedan
Women in Espionage. J. B. Hutton
Sisterhood is Powerful. R. Morgan

V. Required Activities. Using the reading material complete each of the following activities.

1. Questions.

1. List 3 goals of the woman's liberation movement.

2. Have a media (TV, radio, newspapers, magazines) influenced the woman's lib movement? Explain.

2. Choose 2 of the following activities.

1. Make a scrapbook of current newspaper and magazine articles about the changing role of women in society.

2. Draw a political cartoon about the changing role of women in society.

3. Write an editorial for the woman's liberation movement. Explain the goals and reasons as a part of your editorial.

4. Prepare and present to the class an oral report on one of the following topics:

Fashion trends since 1966.

Women's legal rights in Arizona and other states.

Occupations of women.

The changing role of the woman in the home.

3. Choose 1 of the following activities.

1. Write a paper comparing the role of women in two different countries. Use current periodicals for your sources. Include a bibliography.

2. Write a paper on women in politics. Don't forget Golda Meir, Shirley Chisholm, Bella Abzug, Clare Booth Luce, Indira Gandhi, etc. Include a bibliography.
3. Read a novel about a woman and write a paper comparing her role with that of women in the U.S. today.
4. Write a paper on the part Gloria Steinem has played in the Woman's Liberation Movement.
5. Write an essay on the role of women as you see it. Support your ideas with facts and sound reasoning.

MUSIC, ART, AND LITERATURE 1950-Present

I. PROBLEM. Trends in music, art and literature in the past 20 years have largely been in response to social conditions and pressures in the world. An increasing awareness by people all over the world of social conditions made young people aware that the romanticism that had been the mark of the previous generation was no longer valid. Rather, the music, and literature of the past 20 years has been increasingly realistic. Much of the art has remained abstract, but there is even a trend toward realism in painting after a long period of abstract and surrealist paintings.

Which forms of art, painting, sculpture, music, or literature are most responsive to historical events or social conditions? What changes have occurred in music, art and literature since 1950? How have the different forms of music blended in recent years? What great works of literature have been produced since 1950? How has racial awareness affected art, music and literature? How has music from other parts of the world affected American music.

II. Specific Objectives. When you finish this unit you will be able to:

1. Trace in writing the development of American music from 1950 - present.
2. Explain in writing how social conditions have affected the development of art, music, and literature from 1950-present.
3. Explain in writing how influences from other parts of the world have affected American art, music and literature and vice versa.
4. List in writing examples of important works of literature from 1950-present.
5. List areas into which art has expanded besides painting, sculpture and architecture.

III. Required Reading Material. Read each of the following references:

1. Man and Nations. p. 826, 824.
2. Read any one of the following articles; Turn in an abstract with bibliographical information.

Military and Wars - Middle Ages - 1800

I. Problem

The military aspect of life saw many changes between the beginning of the Middle Ages and the end of the 18th century (1750's). Nonetheless many of the reasons for wars and methods of warfare were surprisingly the same. People still fought for power or for religious causes. The military was an important part of everyone's life throughout this entire period. In the Middle Ages, the feudal system, though it contained other aspects, was largely a system of military protection. The Crusades were religious wars as was the Thirty Years War. The Saxon invasions were to gain territory and power as were the campaigns of Louis XIV.

What were the major wars during this period, and what were their specific causes and results? Who were the great military leaders? What were their motives? What weapons and strategies predominated during this time? How did they change from about 1000 to about 1800?

Your text states that "war was the usual rather than the unusual state of the feudal world." Was there any difference in the world of the 1700's? Now?

II. Specific Objectives

When you finish this unit you will be able to:

1. Explain in writing the importance of the military and wars from the Middle Ages to 1800.
2. List the major wars from 700-1800 and identify in writing the causes and results of each.
3. Describe in writing the methods and weapons of warfare from the Middle Ages through the 1700's, explaining any changes which occurred.
4. For the period covered in this study guide, identify the major military heroes and explain in writing their importance.
5. Explain in writing what place the soldier held in society from 1000-1800 and compare your conclusions with the place soldiers hold in today's society.

III. Required Reading Material

Read each of the following references:

Men and Nations Middle Ages: pp. 189-200, 203, 208-211, 217-222, 234-239, 246-7, 253-4, 260-263, 267-269, 271-272, 275-275, 279-281, 283-286. Modern Europe: 324-325, 337-346, 348-350, 352-353, 355-360

The Human Adventure, vol. I. pp. 94-95, 100-107, 127-131, 149-152, 180-183, 191-193, 197-199

The Human Side of World History - pp. 47-49, 51, 88-89

V. Required Activities

Complete each of the following activities using the reading material:

1. Questions. Answer each of the following questions in your own words in writing.

1. What 3 waves of invasion did England undergo between 400 and 1066?
2. Describe feudal warfare and the code of chivalry.
3. The Crusades are sometimes called successful failures. Explain this phrase.
4. What were the chief causes and results of each of the following?

The Thirty Years War?
The Hundred Years War?
The War of Roses?

2. Choose at least 2 of the following activities:

1. Form a group of 3-4 people and discuss the following questions. Have one person take brief notes to hand in for the group. Be sure to include everyone's name who participated.
 1. Why do you think the Church has failed to abolish war, in both medieval and modern times?
 2. Why did the Crusades not begin in the 600's, when the Moslems first conquered Palestine?
 3. What did Jesus teach about war, and what did Mohammed teach about it? How is it that, although Jesus and Mohammed differed in their views, their followers in the Christian Crusades and in the Islamic wars of expansion engaged in essentially the same methods to spread their faith?

4. It has been said that Louis XIV's control of a large and fine army gave him the desire to use it. Does the existence of great armies today lead to the same result? Explain.
2. Prepare an attractive brochure of drawings and/or pictures which illustrate different aspects of a soldier's life in either the Middle Ages or the 1600's - 1700's. You might include information about equipment, rules, responsibilities, activities, training, etc.
 3. Write a newspaper article describing the feats of any military hero of your choice covered in this study guide. Make it as authentic-sounding as possible.
 4. List invasions by central Asian nomads into surrounding regions that have influenced history. Explain.
3. Choose at least 1 of the following activities.
 1. Interview someone who is in the military today or has been in the military in the recent past. Find out information about a soldier's duties, equipment, training, attitude toward his responsibility, examples of activities, promotions, etc. Write up your interview as a comparison between what you found out about soldiers today and what you have read about as a part of this unit. Include any reactions you have. (1-2 pp.)
 2. Read one of the following books and fill out a critique form on it.
 - The Crystal Cave, M. Stewart
 - Richard III, P.M. Kendall
 - The Helmet of Navarre, B. Wilkinson
 - Fleanor of Aquitaine, R. Pernoud
 - Camelot, Lerner and Lowe
 - El Cid
 - Elizabeth I, J. Levine
 - The Life and Times of Elizabeth Curtis

 - Catherine the Great Z. Oldenbourg
 - Charlemagne Horizon
 - Charlemagne Komroff

Cromwell M. Ashley
Oliver Cromwell Levine
A Connecticut Yankee in King Arthur's Court,
Mark Twain

or any other novel pertaining to military and wars during this period.

3. Do enough research to write an authentic diary of a soldier during any specific campaign of any war of your choice covered by this study guide. Write an imaginative, informative entry to a diary, using the research you have done. (2-3 pp.) Include a bibliography.

4. Take the Post Test.

I. **PROBLEM.** What is a political revolutionary? What does it mean to be revolutionary? Would we think that ideas were revolutionary which were considered revolutionary in 1700? Do our values change so that what is unacceptable by the establishment in one age actually becomes part of the establishment today?

The rise of interest among men for the achievement of a good life on earth was a desire which appeared during the Renaissance. In addition, the revival and expansion of trade made the middle class larger and more powerful. Both of these developments clashed directly with the idea of reigning European monarchs that their power should be absolute. People began to want a part in the establishment of governmental policy.

Reasons for this change in attitude varied with the situations in different countries. Methods also varied. England's political revolutionaries were able to peacefully effect change first with the Magna Carta in 1215. The power of the king was made subordinate to the law of the land. The "Glorious Revolution" in 1688 was also peaceful and bloodless, guaranteeing a constitutional monarchy in which the Parliament was made supreme over the monarch or ruler.

What events inspired men to revolutionary ideas? Who were the major revolutionary figures from 100-1750? How are the ideas of these men considered today? - revolutionary or part of the establishment? What ideas developed before 1750 became crucial in changes made in parts of the world such as America and France later on?

II. **SPECIFIC OBJECTIVES.** When you finish this unit you will be able to:

1. Identify in writing major revolutionary figures from 1000-1750.
2. Identify in writing the conditions and events which inspired the major revolutionary figures from 1000-1750.
3. Explain in writing the changes these revolutionary figures proposed and what they were able to accomplish.
4. Compare in writing the ideas and motives of revolutionaries during the period 1000-1750 with those of today.
5. Describe in writing the personalities and backgrounds (including occupations) of major revolutionary figures of the period 1000-1750.

III. REQUIRED READING MATERIAL. Read each of the following references.

1. Men and Nations pp. 208-211, 227-229, 293-295, 367-382.
2. The Human Side of World History, vol. I. pp. 131-135, 188-193, 197-207.
3. The Human Side of World History pp. 95-97.
4. The Clash of Ideas. pp. 22-31.
5. 32 Problems in World History pp. 88-92.

IV. EXTRA READING MATERIAL. For a deeper understanding of the material in this unit, read any of the following references:

The English Revolution. M. Gruber.

Oliver Cromwell and the Puritain Revolution. M. Ashley

Cromwell M. Ashley

The Magna Charta. Daugherty.

Death to the King. C.L. Alderman.

V. REQUIRED ACTIVITIES. Complete each of the following activities using the reading material.

1. Answer the following questions in your own words in writing.
 1. What were some of the main provisions of the Magna Carta. What was its basic importance?
 2. Why was it significant that the English king, in accepting the Magna Carta, agreed not to be above the law?
 3. How did townsmen in the Middle Ages gain rights of self-government? What were their most important liberties?
 4. List 3 philosophers during the Enlightenment who proposed somewhat revolutionary ideas? What were their ideas?
2. Choose at least 2 of the following activities:
 1. Pretend you are a reporter for the London Times

in 1215. Write an authentic sounding newspaper article on the signing of the Magna Carta. Be sure to include information about its significance.

2. Answer any 4 of the questions for discussion at the end of "The Divine Right of Kings v. the Natural Rights of The People."
3. Write a short essay (1 page) on the important ideas which were revolutionary in politics which came out of the Enlightenment.
4. Write a short essay explaining how the following were "revolutionary" and discussing whether or not they would be considered so now: The Petition of Right, the Habeus Corpus Act, the Bill of Rights, and the Act of Toleration.

3. Choose at least 1 of the following activities:

1. Form a group of no more than 3 people. Discuss the following questions carefully. Have one person take notes for the entire group.
 1. England underwent a fundamental change between 1603 and 1760 - change that is often described as evolutionary rather than revolutionary. What is meant by this distinction? Which kind of change do you think is better? Justify your choice.
 2. The British Monarch no longer holds any real power. Would you advise the British to abolish the monarchy completely? Explain.
 3. What political ideas of the Enlightenment are still very much alive in the United States today? Do you disagree with any of these ideas that have been adapted by Americans? Explain.
2. Write an entry to a diary as if you lived around 1750. Reflect on the ideas of political thinkers during the Enlightenment. Consider the personalities and backgrounds of those thinkers and their motives for their ideas. (1 1/2 - 2 pp.)
3. Write a short research paper (2-3 pp) comparing the ideas of men like Locke, Hobbes, and Voltaire with those revolutionary political thinkers of our

day (Che Guevara, Mao Tse-Tung, Angela Davis are examples).

4. Make a list of the powers Parliament gained at the expense of the king between 1603 and 1714.

MILITARY AFFAIRS AND WARS IN ANCIENT TIMES

I. PROBLEM

Because of the Vietnam War, everything having to do with the military is part of our everyday conversation. Few of us, however, really know what the army or war is like. We may have a relative who has been a part of the military and who has experienced war, but we don't have firsthand knowledge of what these experiences are like.

There are many questions which can be raised about the military and war. How did war start? What conditions made it necessary for men to fight other men? How many of these same conditions are still present to give men reasons to fight each other? What kinds of weapons did men use in ancient wars? How similar were armies of ancient times to those of the present day? How did war among different peoples affect individuals in ancient times, that is, did everyone take part in wars? What made battles important ones? What made them decisive? Which ancient cultures were totally oriented toward the waging of wars? Were there any real heroes in wars of ancient times? What military strategies were successful?

What were the main wars in ancient times? What were their causes? What effect did they have then? Do we still feel any effect now?

II. SPECIFIC OBJECTIVES

When you finish this unit you will be able to:

1. Explain in writing what conditions made men fight each other in prehistoric and ancient times.
2. Explain in writing what types of weapons and equipment were used by armies in ancient times.
3. Compare in writing and orally armies of ancient times and those of today. Include aspects of training, strategies, equipment, uniforms, recruitment, and experience.
4. Describe in writing major wars in ancient times including such aspects as why they were fought, decisive battles, major heroes, and any unusual strategies used.
5. Describe the importance wars and the military held in ancient societies and compare their importance then with their importance now, as you see it.

III. Required Reading Material

Read each of the following references:

1. Read the following references from Men and Nations.

V. Required Activities

Complete each of the following activities:

1. Using the material you read, find the answers to the following questions and write them down in your own words.
 1. List 3 especially warlike cultures of ancient times. For each one you list, give an example of their enemies.
 2. Give examples of weapons and equipment used by armies of ancient times.
 3. What was the Peloponnesian War? Who fought? Why? Describe how the victors achieved their victory. Who won?
 4. Give the same information as in #3 for the Punic Wars.

2. Choose 2 of the following activities.
 1. Two people should prepare a debate on the following subject to present to the class. In Sparta, military training was of supreme importance. Do you think it helps a man's character development today for him to serve in the armed forces? Justify your answer. Turn in any sources you use.
 2. Draw a map of Greece and Asia Minor during the Persian Wars showing the routes of the Persians.
 3. Two people could prepare a debate over the following topic for presentation to the class. This topic has been a much discussed one even today. The Roman Republic had a citizen army instead of a professional one. What are the advantages of a citizen army vs. a professional one?
 4. Write a well-organized essay on the following topic: The United States Constitution designates the President as Commander in Chief of the Armed Forces. In the light of Roman history, why is it important that the President preserve this power? Use examples from your reading to support your ideas.
 5. For a time the Hittites ruled part of the Fertile Crescent through their monopoly of iron weapons. Discuss in writing whether you think power in the world is still based on superior weapons. Your finished paper should include examples to support your opinions and should be well-organized. (1-1 1/2 pages).

3. Choose two of the following activities.

1. Draw a map showing the routes of the barbarian invasions into the Roman Empire.
2. In a well-organized, well-written essay discuss the importance wars and the military held in ancient societies. Also, compare their importance then with their importance now as you see it.
3. Read in library sources about any major military hero such as Alexander the Great or Hannibal. Write a short paper (1 page) on why you think the person was such a great leader. Use examples from your reading. Turn in your sources and pages read.
4. Look at any 2 of the following filmstrips. Take notes only on that part which has to do with the military of wars.

MILITARY AND WARF -- WORLD WAR I AND ITS BACKGROUND.

I. PROBLEM Near the opening of the 20th century western powers renewed their efforts to spread their influence through underdeveloped areas of the world. Interest in acquisition of more, power through the spread of their influence and even adding territory under their rule was known as imperialism. Imperialism became such a driving force in the latter part of the 1800's and the early part of the 1900's that when opposition to it from native peoples became apparent or when conflicts between major powers arose over influence in a certain part of the world, violence and even war erupted. Thus such conflicts as the Spanish-American War, the Boer War, the Sepoy Rebellion, the Sino-Japanese War, the Russo-Japanese War and, last and most important, World War I were evidence of the effect of man's greed and desire to acquire influence and supremacy over people in other parts of the world.

What were the causes of imperialism? How did imperialism lead to other actions which hurled man into a world-wide conflict? How did the native peoples of the lands affected by imperialism feel about foreign domination and what did they do about it? What new methods of warfare were developed during this period --especially in World War I? What were the results of the wars fought during this period? How did the peace treaty agreed upon at Versailles sow seeds which led mankind into yet another world conflict?

II. Specific Objectives. When you finish this unit, you will be able to;

1. Explain in writing what imperialism is and what effect it had on the world during the late 1800's and early 1900's.
2. Explain in writing the effects of the major conflicts on the participants, especially the consequences of the Versailles Peace Treaty.
3. Explain in writing what the cause of World War I were.
4. Explain in writing the effect of World War I on occupations.

III. Required Reading. Read each of the following assignments. You will be quizzed orally on the reading.

1. Men and Nations. pp. 583-606
2. The Human Adventure vol. 2 pp. 114-123
3. The Human Side of World History. pp. 42, 144-147

MILITARY AND WARS -- WORLD WAR I AND ITS BACKGROUND.

I. **PROBLEM.** Near the opening of the 20th century western powers renewed their efforts to spread their influence through underdeveloped areas of the world. Interest in acquisition of more, power through the spread of their influence and even adding territory under their rule was known as imperialism. Imperialism became such a driving force in the latter part of the 1800's and the early part of the 1900's that when opposition to it from native peoples became apparent or when conflicts between major powers arose over influence in a certain part of the world, violence and even war erupted. Thus such conflicts as the Spanish-American War, the Boer War, the Sepoy Rebellion, the Sino-Japanese War, the Russo-Japanese War and, last and most important, World War I were evidence of the effect of man's greed and desire to acquire influence and supremacy over people in other parts of the world.

What were the causes of imperialism? How did imperialism lead to other actions which hurled man into a world-wide conflict? How did the native peoples of the lands affected by imperialism feel about foreign domination and what did they do about it? What new methods of warfare were developed during this period --especially in World War I? What were the results of the wars fought during this period? How did the peace treaty agreed upon at Versailles sow seeds which led mankind into yet another world conflict?

II. **Special Objectives.** When you finish this unit, you will be able to:

1. Explain in writing what imperialism is and what effect it had on the world during the late 1800's and early 1900's.
2. Identify in writing the major wars and conflicts between nations and match the causes of the conflicts and their participants with the wars.
3. Explain in writing about new methods and equipment developed for war which were used during this period.
4. Explain in writing the effects of the major conflicts on the participants, especially the consequences of the Versailles Peace Treaty.
5. Explain in writing what the causes of World War I were.
6. Explain in writing the effect of World War I on occupations.

III. Required Reading. Read each of the following assignments. You will be quizzed orally on the reading.

1. Men and Nations. pp. 528-606
2. The Human Adventure. vol. 2. pp. 84-87, 98-123.
3. The Human Side of World History. pp. 134, 138-139, 142, 144-147

V. Required Activities. Complete each of the following activities using the reading material.

1. Questions.

1. Name and explain 3 motives behind imperialism that were related to the Industrial Revolution. What were 3 other motives for seeking colonies?
2. What groups came into conflict in South Africa? How was the conflict settled? What adjustments followed?
3. What were the causes of the Sepoy Rebellion? The results?
4. What was the Taiping Rebellion? the Boxer Rebellion?
5. What were the causes of the Spanish-American War? the results?

2. Choose 2 of the following activities.

1. Write a short essay in which you either defend or criticize United States imperialism (1-2pp).
2. Prepare a paper on the causes of World War I. The following questions should serve as a guide for your report: What conflicts were caused by imperialistic rivalries? Where in Europe was nationalism causing trouble? How did militarism aggravate conditions in Europe? How did the system of alliances among European nations create tensions?
3. Write a dialogue that takes place in the 1800's between a British officer and a patriotic Indian on the topic of imperialism?
4. Write a letter to a British newspaper condemning the opium trade carried on by British merchants in southern China.
5. Tell the story of the outbreak of World War I as it might have been told by a contrumporary Frenchman, German, Englishman, and American.
6. World War I was a new kind of war, fought with new kinds of weapons. Report to the class on trench warfare and the weapons used in the war.

3. Choose 1 of the following activities.

1. Form a group of no more than 3 students. Discuss the following questions. Hand in 1 set of answers for the group.

1. International alliances were a prominent feature of the years before World War I. Do you think the following statements about such alliances are true or false?

If you can, give specific historical examples for each situation: a. With nations of roughly equal power, an increase in the power of one will result in alliance among the others. b. With nations have no choice but to ally themselves with more powerful ones. c. Effective international alliances are rarely founded on friendship, understanding or respect. The important reason for their existence is the threat of a common enemy.

2. "As long as nations are intent upon adding to their own power, are ready to go to war for what they assume to be their own rights, and are unwilling to recognize any authority as higher than themselves -- just as long as this condition exists will the danger of war hand over the peoples of the world." Do you agree or disagree with this statement? Why?

3. For many years after World War I, Americans debated whether they had made a mistake in entering the war. In the 1930's, the opinion was overwhelmingly that America should have stayed out. What do you think? Consider also these questions: Did the United States, in fact, have a choice, or were we forced to take part whether we wanted to or not? If you think this country should have joined the Allies or could not have avoided doing so, would it have been better to have entered the war earlier. Should we have delayed longer? What might have been gained in either case?

4. Was the principle of the "self-determination of nations" a sound reason for changing the map of Europe after World War I? Since self-determination encourages nationalism, and nationalism often leads to war, did President Wilson's support of this idea make World War II more likely? Do you think that self-determination is a right that all peoples should have?

2. Read the selection on the "Causes of World War I". Form a group (3 people) to answer the questions in the selection. Hand in 1 set of answers for the group.

3. Write an essay on one of the following aspects of the Spanish-American War: 1) the Origins of the war, 2) the public opinion at the outset of the conflict, 3) a major battle of the war. Suggested sources: American Heritage, "The Needless War with Spain," February 1957, "The Enemies of Empire," June 1960, "The Shan Battle of Manila," December 1960, "How We Got Guantanamo," February, 1962.

4. Prepare an oral report on the opening of Japan to the West by Commodore Perry. Explain the reasons for Japan's isolation, Perry's motives for the journey, and the reception Perry's party received upon its arrival in Japan. Read in Eisen and Filler, The Human Adventure, Vol. 2, "The Closing of Japan," and "The Opening of Japan," Also consult two pertinent articles in American Heritage, "When Perry Unlocked the 'Gate of the Sun'" April 1958, and "Meeting with the West," August 1963.

4. Choose 1 of the following activities.

1. Draw a political cartoon on the theme of the "white man's burden".

2. Draw a cartoon showing the sinking of the Maine, attempting to heighten the desire for war in the United States.

3. Draw a poster for either Britain or Germany, to be used as propaganda in the United States before it entered World War I.

4. Draw a political map of Europe after the peace settlements ending World War I.

5. Draw a map of Europe including (1) the route of the German attack on France in 1914, (2) the main fighting fronts of the war, and (3) the location of the North Sea blockade.

6. Draw a political cartoon depicting the balance of power between the Triple Alliance and the Triple Entente.

VI. Extra Activities.

1. Present the play, Appointment at Sarajevo to the class. Props and costumes will be welcomed.

2. Read only magazine article on World War I.

COURSE TITLE: 1930 TO PRESENT

PACKAGE TITLE: WORLD WAR II

BY

JUDY HOFFMAN

I. PROBLEM. In 1932 the most widespread and terrible war the world has even known began. Japan sent troops to Manchuria and began a series of aggressive measures designed to bring Manchuria under Japanese domination. The League of Nations, formed after World War I was too weak and thus powerless in this and future international disputes. The machinery had started to crank for World War II.

What were the causes of World War II? Some historians have listed only one cause: Adolf Hitler. There were more complicated reasons, however, including all of the mixtapes made at the Versailles Peace Conference, the Great Depression and its effect on the German people and the failure of the League of Nations.

Once aggression was started by Japan, Italy and Germany were quick to follow. The Spanish Civil War occurred during this period of aggression and became a battle ground over the opposing ideas of fascism and communism. Many Americans including Ernest Hemingway fought on the Loyalist side, in the International Brigade, believing they were rightfully struggling against the evils of fascism, but not considering the realities of the evils of Stalin's communism, either. They saw the struggle as one for democracy.

Mussolini, meanwhile, had used tanks to overrun the natives armed only with spears in Ethiopia. Hitler was proceeding with his policy of aggression in Austria and Czechoslovakia. When it became apparent that the policy of appeasement was not going to satisfy Hitler's desire for power and land, the British and French began to prepare for war. Finally when Germany attacked Poland, war was declared. (1939)

The United States did not enter the war until 1941 when Japanese planes attacked Pearl Harbor. Russia entered when, after a non-aggression pact between Germany and Russia, Germany attacked Russia.

What kind of war was World War II? How was it different from World War I? What new methods of warfare were developed? What new weapons were developed? What was Hitler's "Final Solution"? How did Hitler's theories on racial superiority affect his plans? What were the major battles and campaigns of the war? Who were the important heroes? How were the Axis Powers finally stopped? What were the costs of the war?

II. Specific Objectives. When you finish this unit you will be able to:

1. Explain in writing the causes of World War II.
2. Explain in writing the background and outcome of the Spanish Civil War.

3. Identify in writing major battles, campaigns and participants of World War II.
4. Explain in writing new advances in weapons and methods of waging war developed during World War II.
5. Explain in writing how Hitler's racial policies affected his conduct of the war.
6. List the major costs of World War II.

III. Required Reading. Read each of the following selections. You may be quizzed orally on the assignments.

IV. Required Activities. Using the reading material complete each of the following activities.

1. Questions. Answer each of the following questions in writing.

1. List 3 causes of World War II?
2. What part did the Spanish Civil War play in European affairs in the 1930's?
3. What were 3 aggressive steps taken by Hitler between 1913 and 1936?
4. What was the Hitler-Stalin Pact? What may have been Hitler's and Stalin's reason for signing it?
5. What was Hitler's "Final Solution" and why? How did it affect his conduct of the wars?
6. Identify: D-Day, V-E Day, V-J Day

2. Choose 2 of the following activities.

1. Write a short essay explaining why it was necessary to defect Hitler.
2. As a reporter for an American newspaper, write a news article describing the bombing of Rotterdam by the Germans during World War II.
3. Draw a cartoon depicting the similar fate that Napoleon's and Hitler's armies met in Russia.
4. On a map of Europe, show the advance of Hitler's armies during 1939 and 1940.
5. Write a short essay pointing out why the policy of appeasement toward Hitler failed.
6. Draw an attractive chart comparing weapons developed and used in World War II with ones used on the Revolutionary War.

3. Choose 1 of the following:

1. Interview some one who participated in World War II, asking the following questions: What was your role in the war? Where were you located during the war? Did you know why you were fighting?--did you have reasons? What were some unusual experiences you had during the war? How do you feel about the war?

2. The attack on Pearl Harbor by Japan brought the United States into World War II as a belligerent. Prepare a special news broadcast originating in Hawaii a day after the Bombing on the American Fleet in Pearl Harbor. Record the newscast and read it to the class. Consult the following sources for information: Eisen and Fuller. The Human Adventure, vol. 2., "The Japanese Attack Pearl Harbor" American Heritage, "Pearl Harbor: who Blundered?" February, 1962 and The Sounds of History - 1933-1945 Side 1, #12.

3. With one other person, organize a debate and present it to the class on the following topic: The United States was wise to drop the first atomic bomb.

4. Read any of the historical novels in the library which pertain to World War II. O.K. your choice with the teacher. Fill out a critique form on your book.

5. Form a group. Discuss the following questions. Turn in one set of answers for the group.

1. How did the German Blitzkrieg differ from warfare in World War I? How do you envision a early-scale war fought with today's modern weapons?

2. Why must World War II be considered a total war? Do you think the bombing of non-strategic targets, such as residential areas in cities, was justified? Explain.

3. Do you think the atomic bombings of Hiroshima and Nagasaki were justified? Defend your position.

4. How did the underlying causes of World War I differ from those of World War II?

5. Name 3 points at which aggressive dictator nations might have been stopped during the 1930's. Explain why other nations, including the United States and the Soviet Union, followed a policy of appeasement.

6. Write an essay in which you discuss the costs of the war as opposed to the costs had we not gone to war.

V. Extra Activities. For extra activities please see the teacher.

1. 32 Problems in World History. pp. 211-224.

2. Only magazine articles on World War II.

COURSE TITLE: HISTORY OF MILITARY AND WARS

PACKAGE TITLE: WAR SINCE 1945

by

JUDY HOFFMAN

Package Title: War Since 1945

I. PROBLEM. After the large scale war between 1939 and 1945, the world hoped for a long peace. Fear of what another world-wide war would do to mankind was very prevalent. Weapons such as the atomic bomb could virtually annihilate the entire population of the world.

Russia seemed determined to spread communism throughout the world. The Western World's conflict against this covert aggression was known as the Cold War. There were a few hot wars after 1945, too. One was the Korean War, fought by U.N. forces against the invading North Koreans. Other wars included the Hungarian Revolution, the struggle for freedom by Czechoslovakia, the continuing struggle of Israel against the Arabs in the Middle East, and the Viet Nam War. The wars for freedom of African countries which also filled this period were the Algerian War, the struggle in the Congo, Biafra, and Rhodesia. Most recently was the fight for the freedom of Bangladesh from Pakistan.

What has made these wars different from all previous wars and why? What has been the prevailing reasons for violent flare-ups? Why haven't atomic weapons been used? For what reasons have major powers backed various sides in the smaller wars? What is the arms race? What hope of peace do we all have in the future?

II. Specific Objectives. When you finish this unit you will be able to:

1. Identify in writing the major wars since 1945 and their causes.
2. Explain in writing the methods of warfare used since 1945.
3. Explain in writing the development of the arms race and its affect on world peace.
4. Explain in writing what role the U.N. has played in keeping world peace.
5. Identify in writing the major occupations associated with the armed services which are available today.

III. Required Reading Materials. Read each of the following references. You may be quizzed orally on the assignments.

1. Men and Nations. pp. 754-755, 762-766, 773-774, 779-781, 782-789, 799-801, 806-811, 816-818.

V. Required Activities. Using the reading material, complete each of the following activities.

Questions:

1. What kinds of forces has the U.N. used for peace-keeping operations?
2. Summarize briefly the events in Czechoslovakia in the late 1940's.
3. Why was the Berlin airlift necessary? How was it carried out?
4. Why did the Hungarians revolt in 1956? How did Great Britain, France, and the U.S. react?
5. What led to the Suez crisis and how was it resolved?
6. Why was it difficult to reach a peaceful settlement of the Algerian problem in the 1950's?
7. How did Israel become a state? What has been the result?
8. What was the Korean War? Why was it important?
9. How did America become involved in Vietnam? What were the chief provisions of the Geneva Agreements? Why did South Vietnam and the U.S. refuse to sign them?

Choose two of the following activities:

1. Winston Churchill said the arms race led to a "balance of terror". Draw a cartoon using Churchill's statement as a theme.
2. On a map of the world show where the United Nations has undertaken peace-keeping operations, indicating with what strength these missions were carried out.
3. Draw two political cartoons of the Berlin Wall, one from a Western point of view, the other from a Communist point of view.
4. Write an imaginary editorial for a pro-Arab newspaper, denouncing Israel as a trouble-maker in the Middle East.
5. Write an editorial on American intervention in the Vietnam War. Use current periodicals for sources.

6. Write a letter to a friend in which you defend the sale of planes by the U.S. to Israel. Use current periodicals for your sources.

Choose 1 of the following:

1. Read 2 magazine articles on the struggle for freedom by Bangladesh. Turn in abstracts with bibliographical information.
2. Read 2 magazine articles about the struggle for freedom by Biafra. Turn in abstracts with bibliographical information.
3. Read 2 magazine articles about the Israeli-Arab 7 day war. Turn in abstracts with bibliographical information.
4. Form a group to discuss the following questions (3 - 4 students). Hand in 1 set of notes for the group.
 1. The United States spends much more on its defense budget than on the United Nations. Which do you think is a better guarantee for peace, the U.N. or an up-to-date defense system? Explain your choice.
 2. The United States has been criticized for not forcefully preventing the building of the Berlin Wall. Explain your attitude on this matter.
 3. What do you think would help lessen tensions between Arabs and Israelis? Do you see any hope for such an easing of tensions?
 4. Why do you think some people in the world favor Russia's policy of peaceful coexistence, while others support China's policy of national wars of liberation?
 5. What is your position on the United States government's policy in Vietnam?
5. Interview a recruiter for the armed forces about jobs available for enlisted men or officers. The list may be very long so you may want to limit it to fields such as medicine, combat, clerical, military police, etc. Write up your interview with your reactions.
6. Interview someone who has served in Vietnam about our purpose, how he felt about serving there, how he feels about the peace movement, etc. Write up your interview with your reactions.
7. Write a research paper (2-3 pages) on methods of warfare used since 1945. Include footnotes and a bibliography.

8. Read 2 articles, on political terrorism in the past year.
Turn in abstracts and bibliographical information.

Science and Medicine 1650-1900

I. Problem. Man was barely out of the dark ages in 1600. The Renaissance had put a new emphasis on learning and on worldly matters as opposed to heavenly matters. Man had "discovered" a new world and was busy colonizing it. Science had taken broad steps forward during the Renaissance, but the best was yet to come. Man was still pretty much in the dark ages in the fields of Science and Medicine. But great advances were made from 1600-1900. Investigation replaced speculation as a method of finding out facts in science and medicine. Theories began to be developed about atoms, evolution, and the complex nature of human behavior.

What were the most important discoveries during this period? What changes made these discoveries possible? What effect did these discoveries have on man? Were they immediately accepted or rejected by most people? What controversies arose out of these discoveries? What new occupations developed in the fields of science and medicine?

II. Specific objectives. When you finish this unit you will be able to:

1. Identify in writing major scientific and medical achievements made from 1600-1900.
2. Match in writing the people responsible for these achievements with the achievements.
3. Explain in writing the importance of these scientific and medical achievements to mankind.
4. Explain in writing what new occupations appeared in the scientific and medical fields from 1600-1900.

III. Required reading material. Read each of the following references.

1. Men and Nations. pp. 378-80, 612-624, 642-644.
2. The Human Adventure. Vol. II. p. 47-49.
3. The Human Side of World History. pp. 116, 126.
4. The material in this study guide.

IV. Extra Reading Material. For a deeper understanding of the material in this unit read any of the following references.

Disordered Minds (N. Dain Beck
Medicine in the American Colonies. Beck

2. Choose 2 of the following activities.

1. Prepare an attractive brochure designed to recruit people to attend either a medical school or a college specializing in scientific experimentation. Your brochure should include a course of study outlines, advantages of such a course of study (opportunities which will be open to a graduate, etc.) and examples of past achievements in either field that the new student will be able to study. You might even include information about faculty, the surrounding area (town, extra-curricular entertainment, etc.)
2. Write a short essay analyzing the potential promise and peril of man's use of nuclear energy. Use specific examples. 2 pages of more.
3. Make a list of the great contributors in the field of health. Place at the top the name of the individual you think made the greatest contribution. Tell why you rate him first.
4. Watch the following filmstrips and hand in brief notes on each.
Darwin part IA Darwin Discovers Nature's Plan
Darwin part IX Evolution today
The Atom
5. Do the worksheet "Scientists Explored the Nature of Matter and Man"

3. Choose 1 of the following activities.

1. Form a group no larger than 3 students. Discuss the following questions. Have one person take notes for the group.
 1. Advances in medical science have enabled more people to live longer. What are some of the problems that have resulted?
 2. When Pasteur's theories were first announced they met with great opposition. Most new ideas of scientists today meet with less opposition. Can you account for this change? Explain.
 3. Should government - local, state or national - give assistance to medical researchers? Explain.
 4. Why was scientific investigation such a large part of the Enlightenment?
2. Read 3 magazine articles on scientific areas - or scientists - covered in the reading. Turn in abstracts and bibliographical information.

3. Write and present to the class a "You Are There" episode on one of the following topics.
 1. The publishing of Darwin's On the Origin of Species.
 2. The discovery of a cure for rabies by Pasteur.
 3. The work of Sigmund Freud.
 4. The development of antiseptic surgery by Lister.

No more than 5 people may work on the presentation. You should include several scenes so the class understands not only the importance of the discovery, but also its reception by others.

4. Read a biography of a scientist from this period and present an oral report to the class about him.

VI. Extra Activities. For any extra activities for this unit, please see the teacher. Any of the filmstrips on evaluation not listed in the study guide.

THE CHURCH IN THE MIDDLE AGES AND THE REFORMATION.

I. **PROBLEM.** During the chaos of the Middle Ages the sole source of continuing order was the Catholic Church. It functioned as a government when there was none. The Church had laws and enforced them. It also taxed people. When governments did exist the Church was very influential in the political and economic spheres. Knowledge was preserved by the monks throughout the Middle Ages.

However, there were many practices for which the Church began to be criticized once the questioning spirit of the Renaissance had begun. Some of the areas which were criticized included the Church's great wealth, its system of taxation and the activities of some of the members of the clergy. There were some attempts at reform of the Church, but these ended in failure. Some people who aimed at reform of the Church through criticism of her practices were excommunicated or even burned at the stake.

Finally people could stand the unjust practices of the Church no longer and when the sale of indulgences began in Germany, many people opposed this practice. Martin Luther took action and the fire of the Reformation was sparked. He actually broke with the Church and many people followed him. With the Reformation came the Counter Reformation which amounted to a long awaited reform within the Catholic Church.

Why was the Church so powerful during the Middle Ages? What facets of people's lives did it affect? What were the bases of the power of the Church during the Middle Ages? What was the Church criticized for? What did it do about these criticisms? What other influences than criticisms of the Church were responsible for the break with the Church? What effect did the Reformation have on the people of Europe? Did the Reformation occur in a short period of time or was it a gradual change? What effect did the Counter Reformation have on the Catholic Church and on the people of Europe?

II. Specific Objectives. When you finish this unit you will be able to:

1. Explain in writing the importance of the Catholic Church in the Middle Ages.
2. Identify in writing the causes and effects of the Protestant Reformation.
3. Explain in writing the extent of influence of the power of the Catholic Church and of the Protestant Reformation on the People of Europe.
4. Express an appreciation for the ability of people to demand and obtain changes in practices of sources of power, either church or state, which they view as unjust.

WOMEN'S RIGHTS

I PROBLEM With the Industrial Revolution came the increased acceptance of women. The role a female could play in the world began to change. Gradually opportunities began to open up and as they did, women expected to be treated as equals. It was during this period that women fought for and gained political equality.

Fashion for women changed drastically during the early part of the 20th century. Hemlines rose from the floor to above the knee. Bathing suits became popular also.

When did the first woman speak up for her rights? What events helped bring about the rapid changes in the lives of women? How did opportunities change in possible occupations? How would Woman's Liberation today compare with the Suffragette Movement of the early 1900s? What specific forms of opposition did women run across in their struggle for equality? What was the flapper and why was she important part of our history? How did woman's rights fare in other parts of the world than the United States and Europe?

II Specific Objectives When you finish this unit you will be able to

- 1 Identify in writing major changes in the role of women in recent history
- 2 Explain in writing why rapid changes occurred in the lives of women.
- 3 Compare in writing the Woman's Liberation Movement in the present with the Suffragette Movements in the past

III Required Reading Read each of the following assignments. You will be quizzed orally on the reading assignments.

- 1 Men and Nations pp 646-647 449
- 2 "Is Woman's Place in the Home?" 32 Problems in World History pp 78-95

IV Extra Reading Material For a deeper understanding of the material in this unit, read any of the following references

- Reaching for Empire Life pp 38-40 44-5 51-7
- Babbitts and Bohemians E Stevenson pp 138-143

The American Woman, Who Was She? A. Scott, ed.

V. Required Activities. Using the reading material complete each of the following activities.

1. Group discussion. Form a group no larger than 3 students and discuss the questions at the end of the article "Is Woman's Place in the Home?" Have one person take brief notes to be handed in for credit. In addition to the questions listed, explain why such rapid changes in the role of women were occurring.

2. Choose 2 of the following activities.

1. Pretend you are a reporter for the New York Times. Write an editorial for the political emancipation of women. Be sure to include facts from the reading as well as your opinions.

2. Write an essay on the following topic: What factors enabled the role of women to change rapidly during the period 1850-1930?

3. Write an entry to a diary of a Suffragette.

4. Write an essay comparing the suffragette Movement with the Woman's Liberation Movement.

5. Read a magazine article about a woman in recent history (1650-1930). Turn in an abstract of the article with bibliographical information.

3. Choose 1 of the following.

1. Interview any woman over 30 (if you can get them to admit it) about woman's rights. You might ask questions about equal job opportunities; equal pay for equal work, political freedoms, the role of women in the home, etc. Write up your findings in a well-organized paper (1 1/2-2 pages).

2. Read a novel or biography about a woman who lived between 1650-1930. Fill out a critique form.
3. Do an oral report on job opportunities for women between 1900-1930 as compared with today. Facts should be obtained from periodicals and books in the library.
4. Prepare an attractive brochure showing changes in fashion from the 1800's to the 1900's.
5. Present a fashion show to the class for some particular style during this period (1900-1930) --no more than 4 people may participate.

Music, Art, and Literature 1750-1900

I. Problem. The period between 1750 and 1900 was one of vast changes for the world. While revolutionary figures were busy tearing old orders down and replacing them with new ones, other men were creating new worlds of a different kind. Methods of expression in the arts reached greater and greater heights. Art had been revived during the Renaissance and painters and sculptors continued to refine and develop methods of expression. Composers experimented with new techniques and instruments as music became a popular and beautiful form of entertainment. Literature was also a field in which vast artistic talents were expressed.

How were these different kinds of artists (painters, writers and composers) affected by the events in the world around them? How did they express their feelings about the revolutions political or industrial? How were these men regarded by people who lived during their time? Were they appreciated for their talents? Were they able to affect the world around them through their works of art (art, music and literature) from this period? What is it that makes them "works of art"?

II. Specific objectives. When you finish this unit you will be able to:

1. Identify in writing great artists in the fields of painting, sculpture, music and literature between 1750 and 1900.
2. Recognize a selection from the work of artists specified in the activities below.
3. Explain in writing the effect that the events of the world (politics, religion, etc) had on the works of these artists and visa versa.
4. Explain in writing whether or not these artists were able to support themselves through their work alone. (Was their art their only occupation?)

III. Required Reading. Read each of the following references.

1. Men and Nations. pp. 650-653, 654-658
2. Read any 1 of the following articles. Turn in an abstract with the bibliographical information.

JUDY HOFFMAN

The Enlightenment - 1600 - 1700

I. PROBLEM.

The Enlightenment refers to a period in European history when philosophers and scientists were aware of (or enlightened about) the problems confronting people of their day. This period was a natural outgrowth of the Renaissance in that man had already become concerned with the improvement of his life on earth. The development of political power was very different in England than in France in that the tradition of a legislative body to limit the king's power existed. In England, ideas about just what kind of government the people wanted began to grow and as they were formulated, they affected not only their tiny nation, but the world!

What events in England started ideas which crystallized in the Enlightenment? How did the ruling monarchs in England feel about these ideas? What type of government did they want? What is the "Divine Right to Rule"? What was the Glorious Revolution? What was enlightened despotism? What was a "social contract"?

Who were the men instrumental in developing ideas which affected the growth of democracy in England - and the world? Did the Enlightenment only refer to politics?

II. SPECIFIC OBJECTIVES

When you finish this unit you will be able to:

1. Explain in writing what events occurred in England in the 1600's which helped crystallize ideas about government and each man's relationship to his country's ruler.
2. Explain in writing what the Enlightenment was.
3. Identify in writing the major political and scientific figures during the 1600's and 1700's and explain their importance.
4. Explain in writing how the ideas of the Enlightenment affected the world.

III. REQUIRED READING MATERIAL

Read each of the following references carefully:

Men and Nations pp. 366-382, 351-355, 358-360.

The Human Adventure, Vol. I. pp. 202-217

(continued on next page)

32 Problems in World History. pp. 115-128.

World History: The Clash of Ideas. pp. 22-31.

IV. REQUIRED ACTIVITIES

Complete each of the following activities using the reading material:

1. Questions: Answer the following questions in writing in your own words.

1. What important rights did the English Parliament have when James I became king? Why did trouble arise between the king and Parliament?
2. What actions of the Long Parliament helped end absolute monarchy in England? How did the Civil War begin?
3. Oliver Cromwell is said to have been a reluctant dictator. Explain.
4. Why did the Cabinet gain importance during the reigns of William III, George I and George II?
5. Briefly state the ideas about government expressed in Leviathan; Two Treatises of Government; The Spirit of the Laws; The Social Contract.

2. Choose at least 2 of the following activities.

1. Write a short essay explaining why the Enlightenment was a truly great period in history. Use specific examples to back up your ideas.
2. Make a list of powers Parliament gained at the expense of the king between 1603 and 1714.
3. List the important rights of individual citizens that were protected by the Petition of Right, the Habeas Corpus Act, the Bill of Rights, and the Act of Toleration.
4. Pretend that you are a newspaper reporter during the English Civil War. Write an article about any specific event concerning the war or its aftermath up to the Glorious Revolution. Make your article as authentic sounding as possible. If necessary do extra research on your chosen topic.

3. Choose at least 1 of the following.

1. Make an attractive chart which shows the major political and scientific figures for the 1600's and 1700's. Include information about their accomplishments and their importance in addition to anything else you wish to add.
2. Form a group (no more than 3) and discuss the questions at the end of "The Divine Rights of Kings v. The Natural Rights of the People". Have one person take brief notes to be handed in.
3. Form a group (no more than 3) and discuss the questions at the beginning of "Peter the Great and the Limits of Absolutism" and "Locke and Rousseau on the Social Contract". Have one person take brief notes to be handed in.
4. Form a group (no more than 3) and consider the "Questions for Discussion" on page 383 of Men and Nations. Have one person take notes to be handed in.

4. Take the Post Test.

I. Problem. The Industrial Revolution which transformed the lives of men by changing the way goods were produced, was brought about largely through the efforts of people who experimented with new ideas and sources of power to create machines and processes that affected everyone.

Before this time goods were produced by hand in people's homes. After the Industrial Revolution factories enabled the production of goods in mass quantities. Machinery was expensive, so instead of having it in the homes, factories were built and people began to go to work instead of having their work brought to them.

Other areas of life were affected by the inventors also. Trade, transportation, and communication developed by leaps and bounds. People moved from the country to the cities both because not as much labor was needed to produce the same amount of agricultural products (due to machines) and also because more money could be made in the city factories. Terrible conditions and practices were developed with the factory system which are outside the scope of this unit, but the fact remains that these technological improvements had a vast effect on man.

What kind of men were responsible for these inventions? Were they brilliant scientists searching for an answer to a problem or just everyday people like you and me who just stumbled on an answer to a question?--or some of each? Why did they try to find answers to problems? What kinds of machines and processes do we use today that we owe to the creativity of these men?

II. Specific Objectives. When you finish this unit you will be able to:

1. Identify in writing major inventors and their inventions from 1700-1900.
2. Explain in writing the backgrounds (including occupations) of these inventors.
3. Explain in writing the effects these inventors have had on mankind.

III. Required Reading Material.

1. Men and Nations. pp. 439-446, 626-633.
2. Human Side of American History. pp. 30-32, 64-65, 216-218.
2. Human Adventure. vol. II. pp. 50-51.

IV. Extra Reading Material For a deeper understanding of the material in this unit read any of the following references. Take notes to be handed in for extra credit.

Fathers of Industries L. Fanning

Charles Babbage: Father of the Computer D. Halacy

Men of Science and Invention American Heritage

Invention, Discovery, and Creativity A. D. Moore

Industrial Revolution and Nationalism W. Lindquist pp. 954-976

The Age of Progress Time-Life pp. 8-71

The Confident Years Am. Heritage pp. 134-976

V. Required Activities. Complete each of the following activities using the reading material.

1. Answer each of the following questions in writing in your own words.
 1. What were four important steps in the improvement of transportation during the Industrial Revolution?
 2. Describe the various backgrounds represented by inventors during the 1700-1800's.
2. Make an attractive chart of early inventors listing their names, the names of their inventions, and the purpose of the inventions.
3. Choose 1 of the following activities:

1. Form a group of not more than 3 people. Discuss the following questions and have 1 person take notes to be handed in.
 1. How did the enclosure movement lead to changes in agriculture? What were the principal effects of the agricultural revolution?
 2. Explain and illustrate the statement: "Science played only a small role in the invention of textile machinery, the steam engine, the locomotive, and the steamship. It was in communications that scientific and technical developments began to be linked."
 3. Why was the United States able to make such rapid progress in the development of its industry?
2. Watch the filmstrip Science and Technology. Take notes to be handed in.
3. Watch the filmstrip The Cradle of American Industry. Take notes to be handed in.
4. Write an editorial for the London Times on the influx of people from the country to the city. Include an opinion and explanation backed by facts.
4. Choose 2 of the following activities.
 1. Read a magazine article on any inventor or invention covered in the reading. Turn in an abstract and bibliographical information.
 2. Read the article "Exploring some Myths about the Industrial Revolution". Problems in World History pp. 146-154. Answer the 3 discussion questions at the beginning of the article.
 3. Read a magazine article about any invention in the past 30 years. Explain in a well-organized paper the difference between recent and 19th century inventions and inventors. Turn in a bibliography, too.
 4. Present the play Sounds Across the Sea to the class. (There are 6 parts). Costumes and props would be welcomed!

POLITICIANS 1000-1750

I. PROBLEM: During the Middle Ages the form of government was feudalism. There were no large nations with strong central governments. There were certain "rules" which made feudalism work so that each nobleman knew his place in the structure of government. The relationships between kings, lords and lesser noblemen was one based on loyalty and obligation. Warfare was common during the Middle Ages, but it was more of a personal fight than a method of politics.

By the eleventh century kings began to increase their power by adding to their lands and the beginnings of a central government appeared. Kings became more powerful much to the chagrin of nobles and in 1215, nobles in England forced King John to sign the Magna Carta intended to protect their rights. Kings also clashed with and opposed the power of the Church. People began to owe loyalty to their national governments as a separate entity from the Church.

In the 1500's strong national governments had been established in Europe (excluding Germany). War became a political maneuver to strengthen the country rather than a means of personal revenge. Some were fought over religion also, an indication of the new beliefs and people's refusal to accept the beliefs of others peacefully.

What new philosophies developed during the Renaissance which altered forms of government? What drove men to seek power as politicians and advisors to kings? What is the theory of the "divine right to rule" used by kings during this period? What wars were fought and how did they affect the world? How effective were women as rulers? What means of enhancing political prestige were used? What opportunities were available for commoners in the government? How did colonial possessions react to absolute rule from the Mother Country?

II. Specific Objectives. When you finish this unit, you will be able to:

1. Describe in writing the concepts of feudalism including the relationships between various levels of noblemen and the method of "politics" used to increase the power of individuals.
2. Explain in writing the emergence of nations with strong central government and give examples of methods used to increase national prestige.
3. Explain in writing the importance of the theory of the "divine right to rule."
4. Describe in writing the important wars used as political maneuvers and their effect on the countries involved.

5. List occupational opportunities available in government from 1000-1750 and explain how these opportunities changed and developed.

V. Required Activities. Complete each of the following activities using the reading material.

1. Answer the following questions in writing in your own words.

1. Define feudalism and describe the necessary relationships involved.
2. Define nationalism and explain its importance in the emergence of modern Europe.

2. Choose 2 of the following activities.

1. Draw pictures to illustrate the differences in the daily activities of medieval clergy, nobles, and serfs.

2. As a feudal lord, write a letter to another lord criticizing the king's attempt to establish a strong central government.

3. Make a list of the following rulers, identifying them with their realm and summarizing their major accomplishments: Charlemagne, Philip II, Henry IV, Richelieu, Louis XIV, Peter the Great, Maria Theresa, Frederick William I, Frederick the Great.

4. Draw a map of Europe showing the "natural frontiers" Louis XIV wanted and the actual territorial results of his wars.

3. Choose one of the following activities.

1. Form a group no larger than 3 and discuss the following questions. Have one person take notes to hand in for credits. Be sure to include the names of the people in your group.

Why do you think the President of the United States could not say, as Louis XIV in France, "I am the state"?

2. Under Louis XIV, talented artists, writers, and musicians were given government support. Would you advocate such a policy in the United States?

3. Why was it significant that the English king, in accepting Magna Carta, agreed not to be above the law?

4. It has been said that the Holy Roman Empire was neither holy, nor Roman, nor empire. Would you agree? Explain.

4. 2. Present the play, "Prelude to Freedom" to the class (1 major or 3 minor parts).

3. Prepare and give to the class an oral report on the defeat of the Spanish Armada. Give details on how the Spanish fleet was defeated and discuss the significance of the British victory. You might draw a diagram on the blackboard to illustrate Spain's defeat.

4. Report to the class on absolutism as it was practised in France. Read Ersen and Filler, *The Human Adventure*, Vol. 1, "A Day at the Court of Louis XIV," and any other sources you can find.

5. Read "The Divine Right of Kings V. the Natural Rights of the people," *World History The Clash of Ideas*, pp. 22-31. Using the questions as a means to guide your thoughts write an essay on the subject.

SCIENCE AND MEDICINE IN ANCIENT TIMES

I. PROBLEM

The quantity and quality of knowledge in science and medicine during ancient times would surprise you. If you have studied geometry then you are acquainted with the Pythagorean theorem which states that the square of the hypotenuse of a right triangle is equal to the sum of the squares of the other two sides. Ever hear the saying "That's Greek to me!"? Greeks were not only adept in the study of mathematics; they also were very familiar with principles which form the basis of zoology, anatomy, and botany. One Greek philosopher even formulated an atomic theory! The father of medicine, Hippocrates, was a Greek and doctors still take the Hippocratic oath.

Egyptians and other ancient peoples also explored the sciences. Egyptians practiced surgery and studied astronomy. Much of what the Greeks knew came from Egypt.

Just how advanced was the knowledge of these ancient peoples? Was the advanced knowledge limited to the area surrounding the Mediterranean or did other peoples know a great deal about science and medicine? How much of what we know today can we thank these ancient people for?

What types of diseases were people most concerned about in ancient times? How were they treated? What were the important theories in other areas of science?

II. SPECIFIC OBJECTIVES

When you finish this unit you will be able to:

1. Describe in writing the 2 major scientific and/or medical advances each for at least 3 ancient civilizations: Egypt, Greece and any other of your choice.
2. Explain in writing the significance of the findings of ancient scientists for us today.
3. List 3 specific examples of findings or theories from ancient times which are in use in some form today.

III. REQUIRED READING MATERIAL

Read each of the following references:

Men and Nations pp. 13-14, 29, 32, 40, 73-74, 115-117, 121, 144, 173-174

The Human Side of World History, p. 2,7,15,22-23

32 Problems in World History, pp. 24

IV. Required Activities

Complete each of the following activities using the reading material:

1. Questions: Answer each of the following questions in writing in your own words.
 1. What were the most important discoveries in science in Egypt, Greece and Rome? Explain.
 2. What important mathematical or scientific theories were formulated during ancient times and are still in use in some form today?
2. Choose at least 2 of the following activities:
 1. Draw a mural in miniature illustrating the scientific activities of the Egyptians. Your mural should look authentic but need not be very large.
 2. Read "Prehistoric Disease and Primitive Medicine" which you can obtain from the teacher. Either report to the class on the types of diseases and cures used in ancient times or write a short summary (3/4 page) of the article to turn in.
 3. Read a magazine article about present-day treatment of a disease which existed in ancient times. Write a paragraph describing the differences in treatment. Turn in bibliographical information on the article you read.
 4. Draw a political cartoon illustrating any aspect of science and/or medicine in ancient times. Pick up a sheet on political cartoons from the teacher before you begin.
3. Choose at least 1 of the following activities:
 1. Interview a doctor or nurse about a disease which existed in ancient times. You might find out what current treatment for the disease is, what preventive measures are taken to avoid the disease, etc. Write up your interview in a 1 page paper in which you include your reactions to the information you obtain.

2. Write a research paper on the scientific and/or medical advancements made by any one ancient culture. Include a bibliography. (2-3 pp.)
3. Give an oral report to the class on any aspect of ancient science and medicine that has particularly interested you.

4. Take Post Test.

HISTORY OF SCIENCE AND MEDICINE - 1000-1700

I. PROBLEM

Ancient cultures had a surprising knowledge of science and medicine. Egyptians even practiced a form of brain surgery. But what happened to scientific knowledge once the Barbarians pillaged Rome? What happened to scientific knowledge when there were no civilizations capable of carrying on research into and preservation of medical secrets?

Actually, not all was lost during the Middle Ages. And after the reawakening of interest in classical learning during the Renaissance and the contact with civilizations of the Near East during the Crusades, there were many discoveries made which were important to medicine. What were these discoveries? What effect did they have on the practice of medicine?

What diseases were prevalent during this period of time? What cures were part of accepted medical practice? What was the life expectancy? What were the major killers of people during this time? Are there any diseases from this period which are still major problems today? What medical practices used during the Middle Ages and Renaissance are still in use today?

What were the major theories in science and mathematics? How were they influenced by other ideas popular during this period?

II. SPECIFIC OBJECTIVES

When you finish this unit, you will be able to:

1. Identify in writing the major medical practices and cures of the Middle Ages and Renaissance.
2. Describe in writing the major diseases of the Middle Ages and Renaissance.
3. Describe in writing the preservation of medical knowledge during the Middle Ages and discoveries in science which occurred during the Renaissance.
4. Identify in writing which occupations during the Middle Ages and Renaissance were related to science and medicine.
5. Express an appreciation for the efforts of science to save lives and make medical advancements during the Middle Ages and Renaissance.

III. REQUIRED READING MATERIAL

1. The Human Adventure. vol. I. pp. 147-148, 163-166, 193-196.

2. The Human Side of World History. pp. 50, 57-58, 64-66, 82-83.
3. The material in the Study Guide.
4. Men and Nations p. 233, 272, 300-304
5. Mankind. pp. 80-92.

V. REQUIRED ACTIVITIES

Complete each of the following activities, using the reading material:

1. Answer the following questions in writing.
 1. Describe medical practices and diseases during the Middle Ages.
 2. List 3 occupations related to medical science during the Middle Ages and Renaissance.
 3. What was the plague? How did it affect Europe?
 4. What major scientific theories were developed between 1000 and 1700?
2. Choose 2 of the following activities:
 1. Prepare an oral report on one of the following topics to present to the class.
 - a. Diseases of the Middle Ages and Renaissance and their cures.
 - b. The discovery of the circulation of the blood.
 - c. William Harvey
 - d. The role of the Church in the preservation of scientific knowledge during the Middle Ages.
 - e. Copernicus
 - f. Galileo
 2. Prepare an attractive brochure of medical instruments and drugs as if you were advertising them for sale during the Middle Ages and/or Renaissance. Warning: information on this topic is hard to find!
 3. Write a well-organized, well-written paper on the medical research of Leonardo da Vinci. Include a bibliography in the correct form (See the teacher if you do not know what the form is for a bibliography.) 3-4 pages

4. Read The Journal of the Plague Year by Daniel Defoe or The Day of St. Anthony's Fire by Fuller and fill out a critique form.
 5. Write a newspaper article covering the reaction to Galileo's work. Research the topic first.
3. Choose one of the following activities.
1. Read a current magazine article on one disease common in the Middle Ages and Renaissance (i.e. what its status is today) -- Check the Reader's Guide to Periodical Literature for suggestions. Write a paper comparing what you read in the article with what you read about the disease from the reading material required in this unit.
 2. Draw a political cartoon concerning the role of the Church in the preservation of medical knowledge during the Middle Ages.
 3. Put on the play "The Little Beasties" with 3 other people in the class. Props and costumes are welcome. Present the play to your class.
 4. Write an essay on the importance of the work of Copernicus and Galileo. Use specific examples (1-2 pages).
4. Take the Post-Test.

BUSINESS AND INDUSTRY--1750-1900

I. **PROBLEM** The invention of machines and the development of the factory system paved the way for full scale development of business and industry. Demand for goods steadily increased and new methods of producing desired goods were developed. The Industrial Revolution changed people's lives almost immeasurably. People began to go to work rather than have their work brought to them as in the domestic system. Cities grew too fast and problems developed as the gap widened between the managerial class and the working class. Slums appeared and working conditions were terrible, though when compared to the worker's former homes, they were not that bad. The capitalists were interested in large profits and low costs so it was a long time before the conditions were improved very much. Many writers attacked the unhealthy practices such as child labor (many children were tied to their posts and beaten if they fell asleep). Finally some laws were passed but it wasn't until the development of labor unions that much was accomplished in reforming factory and working conditions.

Businessmen were able to amass large fortunes through industries and the related trade. Monopolies became commonplace until finally government began taking a more active part in the regulation of business.

What industries developed after 1750? What were working and living conditions like in the fast growing cities? What laws were passed in an attempt at reform? What forms of business organization were developed as a result of industrial growth? What effect did monopolies have on the small businessman? What areas of life were affected by industrial and business growth? Which countries took the lead in industrial and business expansion? What role did the government of various countries play in the development of business and industry? What philosophical ideas were developed about the relationship of man and society as a result of the Industrial Revolution? What effect did the development of industry and business have on the economy of various countries?

II. **Specific Objectives.** When you finish this unit, you will be able to:

1. Explain in writing the areas in which industry and business developed from 1750-1900.
2. Explain in writing the effects both good and bad which the developments in industry and business have had on man (including economy, standard of living, working conditions, etc.)
3. Explain in writing the forms of business which developed as a result of the industrial growth and what part government played in their regulation.

4. Explain in writing the reform movements of the 1800's in relation to working conditions.

1. **PROBLEM.** The ideas which grew during the 1600's and 1700's in England and France were to have a vast effect on the world. Although they caused a peaceful change in the government in England, France was not that lucky. The revolution which occurred in France in 1789 was so bloody that thousand of people were executed. The American Revolution in the previous decade had been a violent one also. In France it took more than a century to establish a stable government.

Who were the men who actively challenged the establishment? Which ideas, previously developed, influenced them most? What methods did they use to achieve their goals? What walks of life did they come from? What actions did they take once they became the establishment? Did revolutionaries of one country inspire or otherwise affect revolutionaries in other countries? How are the desires and goals of today's political revolutionaries different from those of the 18th and 19th centuries? How did the goals of revolutionaries change within this period of time?

II. Specific objectives. When you complete this unit you will be able to:

1. Identify in writing major revolutionary figures of the 18th and 19th centuries.

2. Identify in writing the conditions which drove these major revolutionary figures during the 18th and 19th centuries to action.

3. Explain in writing the changes these revolutionary figures wanted to make and what they were able to accomplish.

4. Explain in writing how the ideas and motives of revolutionaries changed over the 3 centuries in question (17th, 18th and 19th) and how these ideas and motives are similar to or different from those of revolutionaries today.

5. Describe in writing the personalities and backgrounds (including occupations) of major revolutionaries figures of the 18th and 19th centuries and compare them with the personalities and backgrounds of revolutionary figures today.

III. Required Reading Material.

1. Men and Nations. pp. 391-397, 399, 401-413, 421, 433-437, 453-456, 462-466, 476, 483, 505-506.
2. Human Side of American History. pp. 37-38, 39-41, 42-43, 47-48.
3. Human Adventure, Vol. I. pp. 208-210, 217-229, Vol. II. pp. 8-17,
4. Human Side of World History. pp. 110, 114-115

V. Required Activities. Complete each of the following activities using the reading material.

1. Questions. Using the reading material answer each of the following questions in writing in your own words.

1. List 3 revolutionary figures for each of the following: The French Revolution, the American Revolution and revolutions in Latin America.
2. Who was Karl Marx and why would he be considered a revolutionary figure?
3. For each of the following list 2 causes which prompted men to resort to revolutionary ideas and/or actions.

The French Revolution
The American Revolution
Revolutions in Latin America
The Industrial Revolution

2. Choose 2 of the following activities.

1. Read "A Comparison of the American and French Revolutions". In 32 Problems in World History, p. 129. Using the information in the article write an essay on the differences and similarities between the French and American Revolutions.
2. Write an essay on the following topic: The American Patriots constituted only about a third of the population in the colonies, yet their revolution succeeded. In other countries, even smaller groups have staged successful revolutions. How do you account for such success by small minorities?
3. Form a group no larger than 3 and discuss the following questions. One person should take notes to hand in:
 1. During the early days of the French Revolution parish preasts generally supported the common people while the higherclergy generally supported the nobles. How do you explain this fact?
 2. The French Revolution came suddenly and violently. By what means could Louis XVI have fore-stalled it?
 3. Why did Spain try to keep the ideas of the Enlightenment, the American Revolution, and the French Revolution from spreading the Latin America? Are there countries in the

contemporary world that try to prevent the free flow of ideas? Do you think they can succeed? Why?

4. Do you think that the reasons for colonial resentment and eventual revolution were mainly economic rather than political? Can you give examples of present day situations where economic factors influence the course of events?
5. Karl Marx predicted that capitalist societies would be faced with inevitable revolutions. For what reasons has this not happened in the United States?

4. Draw a political cartoon showing an issue in the French Revolution. Get a sheet on political cartoons from the teacher before you begin.
5. Draw a political cartoon showing an issue in the American Revolution. Get a sheet on political cartoons from the teacher before you begin.
6. Do a time line of the period between 1760 and 1815. Before you begin get a sheet on time lines from the teacher.

3. Choose one of the following activities.

1. Write an editorial for American Colonial newspaper stating either a loyalist or Patriot position.
2. As a citizen of the United States, write a letter to a pro-revolutionary friend in Latin American at the time of the revolts there, giving him encouragement.
3. Write a short play showing a scene that might have taken place in the French Revolution. 250 pts.
4. Diary of a person during the Reign of Terror. Write an account such as that which might have been found in a diary of someone living during the Reign of Terror in France.--1-2 pages.
5. Watch the filmstrip on Eighteen Century France. Make up 10 questions which bring out the important points in the filmstrip.
6. Read a magazine article on any revolutionary figure covered, in the reading. Write an abstract. Hand in bibliographical information too.
7. Read 2 magazine articles or another approved source about any revolutionary figure in the past 20 years such as Fidel Castro, Che Guevara, Angela Davis, Cesar Chavez, Eldridge Cleaver, Abby Hoffman or any Black Panther, etc. and write an essay comparing the backgrounds and ideas of the present revolutionary figures with those of ones covered in this unit. In your paper cover the questions: Do the ideas of past revolutionary figures seem radical to you now?

POLITICAL REVOLUTIONS: 1900-1930

I. PROBLEM. The period between 1900 and 1930 was an important one for political revolutions. It was during this time that Russia threw off the rule of the czar and a man succeeded in applying the ideas of an earlier political revolutionary, Karl Marx, to a situation entirely different from the one Marx believed would cause a revolution. Instead, N. Lenin modified Marxism and successfully carried out a revolution by the elite (that is, by a very few number of people). It was this adaptation of Marx's ideas which eventually became Communism as we know it today.

What conditions existed in Russia which promoted the use of revolutionary tactics? Why had a previous revolution in 1905 failed? What kind of a man was Lenin? Who were his followers? In what ways did he alter Marx's ideas? Who were the Bolsheviks? After the power was taken by the Communists, what kind of life did they preach for the people of Russia and the world? Was their intent to follow the ideas of Karl Marx or did they continue to alter his proposals? And finally, did the Communists practice what they preached? -- and do they today follow their own ideals in practice?

A revolution was also carried out in China between 1900 and 1930. The Manchu dynasty was too slow in making reforms and revolutionary leaders succeeded in forcing them to give up their rule. Important in this movement was Dr. Sun Yat-Sen.

What conditions were the people struggling against in China? What type of government did they want? Was this revolution one by the masses or an elite as in Russia? What effect did the success of the revolution have on China?

Mexico also underwent a revolution between 1910 and 1920. What were its causes? Results? Heroes? How did it affect the United States?

II. Specific Objectives. When you finish this unit, you will be able to:

1. Explain in writing the conditions in Russia which encouraged revolutionaries to act.
2. Explain in writing what the causes and effects of the Russian Revolution of 1905 were.
3. Explain in writing who N. Lenin was and why he was important.
4. Explain in writing how Lenin altered the ideas of Marx and why.
5. Explain in writing the successes of the Russian Revolution and the effect it has had on Russia and the world.
6. Explain in writing the causes and effects of the revolution in China.
7. Explain in writing the causes and effects of the revolution in Mexico.

III. Required Reading. Read each of the following references. You may be quizzed orally on your reading assignments.

1. Men and Nations. pp. 505-506, 682-691, 564-565.
2. The Human Adventure, vol. 2. pp. 123-188, 88-89.

V. Required Activities. Using the reading material complete each of the following activities.

1. Questions. Answer each of the following questions in writing in your own words.

1. Why did the Russian revolutionary movement of 1905 fail?
2. How did conditions in Russia in 1921 contradict Marxist theory?
3. How did Lenin modify Marxism?
4. Who was Sun Yat-Sen and why was he important?
5. Who was Pancho Villa and why was he important?

2. Choose 2 of the following activities.

1. Write a letter to Czar Nicholas II explaining why you think it is a mistake to return to oppressive measures after issuing the October Manifesto.
2. Write an essay on the following topic: Lenin won the support of the Russian masses with his slogan, "Land, Peace, and Bread." What does this say about the conditions in Russia in 1917? Do you think Lenin would have gained more supporters if he had promised political freedom to the Russian people?
3. Read 2 magazine articles relating to the Russian Revolution. Turn in abstracts and bibliographical information on each.
4. Draw a series of political cartoons on the Russian Revolution covering aspects such as causes, effects, leaders, world sentiment, etc.
5. Draw a political cartoon illustrating the difference between Pancho Villa and E. Zapata.

3. Choose 1 of the following activities.

1. Read a biography of Lenin and give an oral report to your group.
2. Read The God That Failed and write a paper explaining how the changes in communism by Lenin and Stalin played a part in the disillusionment of the contributors who wrote this book with communism.
3. Read Animal Farm by G. Orwell and write a paper explaining the satire on revolution and communism. Use specific examples from the book and from your required reading.
4. Present the play Seeds of Revolution to the class. Props and costumes are welcome.
5. Organize a debate (3 people) on the subject of the benefits versus the disadvantages of Lenin's success in Russia. Research your topic well so your debate will be factual and informative.
6. Write and present to the class (4 people) a You Are There segment on the Bolshevik Revolution on November 17, 1917.
7. Read a book on the Mexican Revolution. Fill out a critique form.

JUDY HOFFMAN

A HISTORY OF WITCHCRAFT

I. PROBLEM. "Witchcraft" is a word that inspires feelings of awe or ridicule or fear in people. In recent years much interest has been revived in witchcraft. It has even been practiced as a religion in the past and present. Just what is witchcraft? What historical importance has witchcraft held? What references appear in the Middle Ages and Renaissance especially? Joan of Arc was burned at the stake as a witch and heretic. Why did people fear witchcraft so much that innocent people were accused of it? The Salem Witch Trials are a black moment in our own colonial history!

What other influence has witchcraft had on our heritage? Halloween is a celebration associated with witchcraft. Alchemy, a medieval science, was also tied to the occult powers. And it wasn't until this century that the last laws concerning witchcraft were wiped from the books.

II. Specific Objectives. When you finish this unit, you will be able to:

1. Explain in writing the place witchcraft has held in the history of man with and emphasis in the period from 1000-1700.
2. Explain in writing reactions against witchcraft throughout history.

III. Required Reading Material. Read the material provided in this study guide.

Human Side of World History. p. 52

SCIENCE AND MEDICINE (1900 Present)

1. PROBLEM: It has been said that scientific knowledge has increased more since 1900 than it did in all the history of mankind before 1900. Hard to believe? but true.

What great discoveries have been made since 1900? the polio vaccine, penicillin, insulin and Einstein's theory of relativity are just a few. What factors have made such great advances possible? In what fields have these advances been made? Have any new scientific fields been developed? Which of these scientific discoveries directly affect your life? What problem does necessary specialization in science present?

II. Specific Objectives. When you finish this unit, you will be able to:

1. Identify in writing major scientists from 1900 to the present and match them with their discoveries.
2. Explain in writing the importance of major scientific discoveries since 1900.
3. Express an appreciation for the wealth of scientific knowledge which has been developed since 1900.

III. Required Reading Material. Read each of the following references. You may be quizzed orally on the assignment.

1. Men and Nations, pp. 617-618, 620, 624, 628-632, 825-830.
2. The Human Side of World History, p. 176-177.
3. The Human Side of American History, pp. 279-299, 302-304

IV. Extra Reading Materials. For a deeper understanding of the material in this unit, read any of the following references.

Breakthroughs in Science. I. Asimov, pp. 163-171, 190, 193

Famous Men of Science. St. Balton, pp. 151-314

Twentieth Century Discovery. I. Asimov

The Development of Modern Science. Schwartz, pp. 913-933, 966-986.

Michelson and the Speed of Light. B. Jaffe

Future Shock. A. Toffler

V. Required Activities: Using the reading material, complete each of the following activities.

1. Questions. Answer each of the following in writing.
 1. When did the Atomic Age begin? What nations developed nuclear weapons?
 2. What event launched the Space Age? What were some of the scientific program of American satellites?
 3. Identify the following: Alexander Fleming, Jonas Salk, Aerodynamics.
2. Choose 2 of the following activities.
 1. Make a scrapbook of current newspaper articles while you are doing this unit which pertain to science and medicine. Include an introduction in which you discuss the types of advances being made in science today.
 2. Write an editorial in which you discuss the need for communication among scientists about their discoveries.
 3. Draw a political cartoon showing the importance of the discovery of the polio vaccine to mankind.
 4. Write an essay in which you discuss the problems created by the wealth of advances in medical science. Consider the questions of overpopulation and the possibility of keeping someone alive as a vegetable through the aid of machines and drugs.
3. Choose 1 of the following activities.
 1. Read 2 magazines articles about scientific investigation going on today such as cancer research or space exploration. Write abstracts and also turn in bibliography information.
 2. Prepare debate on euthanasia with one other persons and present it to the class.
 3. Read a work of science fiction by Jules Verne or I. Asimov and write a paper explaining why science fiction may not remain fiction for long. Use specific examples from the book you read.
 4. Pick any topic dealing with scientific research since 1900 which interests you and write a research paper on it. Include footnotes and a bibliography. Check your topic with the teacher.

VI. Extr. Activities. For suggestions for extra activities, please see the teacher.

PACKAGE TITLE. EARLY AGRICULTURE

BY

EARLY AGRICULTURE

I. Problem

Agriculture is an aspect of our times which we all take for granted. Even if we ourselves don't have any immediate contact with agriculture, we are still acutely aware of its presence everytime we visit a grocery store or take a drive through the country. But has agriculture always existed? How was agriculture started? Has agriculture always played the same role in society as it does today or has its role been more important in the past?

For most of the history of the world, crops have been planted and harvested by manual labor. Only in recent history have machines been available to decrease labor and increase production. What were the methods of farming and ranching in ancient times? Have they changed or been improved?

II. Specific objectives

1. You will be able to explain in writing and orally, the theory of the origin of agriculture.
2. You will be able to list in writing three methods of primitive agriculture.
3. You will be able to explain in writing and orally the importance of agriculture to at least two ancient cultures.
4. You will be able to explain in writing and orally why farming declined in Italy during the Roman Empire.
5. You will be able to compare agriculture as you know it with agriculture in ancient times, including information about methods and the importance of agriculture.

III. Required Reading Material

1. Read the following reference in Men and Nations:
The Discovery of Agriculture 5, 9-13.
2. Read the references on at least three of the following ancient cultures:
 - a. Egypt -- 18-20, 28-29
 - b. Mesopotamia -- 37, 40, 41, 50, 53
 - c. India -- 61-2, 64, 65-6, 170-71, 174, 265-6
 - d. China -- 70, 72, 73, 180-2
 - e. Greece -- 85, 92, 94, 109, 119
 - f. Rome -- 125, 131-3, 141, 143, 144, 153, 159
 - g. America -- 282-6

3. Read at least 20 pages of information on agriculture selected from the following references.

- Man: His First Two Million Years - A Montagu pp 137-43
Everyday Life in Prehistoric Times - M & CHB Quennell,
pp 115-17, 133-34, 135-36.

4. Read the mimeographed material included in this study guide.

IV. Required Activities

1. Participate in group discussions supervised by the teacher

2. Answer the following questions in writing in complete sentences in your own words

1. How did environment determine life in the four great river valleys? Is man still influenced by environment in earning his living?

2. What were four important agricultural products in ancient Egypt?

3. Who did the manual labor on farms in ancient Greece and Rome?

4. Why did the number of small farmers in Italy decline during the Roman Empire?

3. Choose at least two of the following activities and have the teacher O k your choice

1. Using the material you read. write an original paragraph explaining the beginning of agriculture

2. Watch any two of the following filmstrips and take notes on the parts which deal with agriculture only.

- FS 16 The Oldest Nation - Egypt
- FS318 Forebears of the West - The Celts
- FS 98 The Great Age of Warrior Homeric Greece
- FS 34 The Greek City-State
- FS 35 Greece and Persia
- FS309 Ancient Egypt
- FS263 Egypt's Eras of Splendor
- FS 21 Rome's Beginnings
- FS 22 Rome and Italy
- FS 17 The Growth of Society
- FS372 Life in Ancient Egypt
- FS255 The Incas
- FS308 Heritage of the Maya
- FS261 Discovery of Agriculture

3. Make a chart with drawings showing three methods of primitive agriculture

4. Write an editorial for the Memphis (Egypt) Times about the importance of agriculture in the economy of Egypt.

4. Choose at least one of the following activities.

1. Interview someone who works on a farm or for FICO. Ask him or her questions about methods of agriculture and/or crops grown in Arizona. Write up your interview in a short paper in which you compare what you found out in the interview with what you have read about early methods of agriculture.

2. Write an entry to a diary of a farmer in an ancient civilization. Make your diary as realistic as possible by researching the topic from books listed in the Required Reading section (1-2 pp). Include facts about methods, crops, daily activities, etc.

3. Read two magazine articles on farming or ranching. One should be on modern farming and ranching and one should be on farming and ranching in ancient times. Write a short paper (1 1/2 - 2 pp) comparing farming and ranching in ancient and modern times using the information in the magazine articles. Turn in a bibliography. Use the Reader's Guide to Periodical Literature to find your articles. There should be some articles on primitive methods of agriculture in National Geographic

BACK OF HISTORY (MAN IN THE BEGINNING) / by W Howells

With the end of the Ice Age the hunting peoples were pressing into every part of the habitable world, except the outer islands of the Pacific and perhaps such poor places as Greenland and Baffin Land. For a time they even roamed the plain between Britain and Denmark discovered every kind of available food, including those which have to be specially treated to be edible, like acorns. And in different places they give themselves the benefit of many fairly intricate inventions, whether weapons or hunting tricks, even though typically they could carry their entire cultures around as they traveled, in their heads or on top of them.

Then, about 6000 B.C. and somewhere in the Near East (as far as we know), the Neolithic way of life began. It is still called "Neolithic" (New Stone Age as Mesolithic means Middle and Paleolithic means Old Stone Age), because the older anthropologists saw everything in the light of stonework, and thought of this "period" as the age of polished stone axes. But it means, rather, a state of culture in which food is planted and bred, not hunted and gathered -- in which food is domesticated, not wild. If we had to choose the greatest single change in human history right up to the present, this would be it. I mean, of course, a change by cultural evolution, as distinct from a biological change like standing erect, or gradually becoming able to use culture and language in the first place. And I do not mean that the change was sudden, or dramatic to those who were changing as though a light were being switched on. It was dramatic, but long after, in its consequences, because everything else we have achieved flowed out of this as a beginning.

By about 4000 B.C. there were farming villages spread widely in the Near East, all the way from the Faiyum Basin in Egypt (just up the Nile from Cairo and the Pyramids), through Palestine and Syria, over to Iraq and Iran. They were not all the same, by any means, but a summary picture of their culture was something like this. The people lived in houses, of mud brick or mud and brush walls. They grew wheat and barley; they cut the grain with straight sickles made by setting flint blades in a row in a piece of wood or bone; they stored it (in some places) in granaries or pits lined with basketry, and they ground it for bread on rotary hand mills of stone or in some other kind of grindstone or mortar. They raised cattle, sheep, goats and pigs (and dogs, although remember that a dog is a Mesolithic contraption used for hunting, and not a barnyard animal). But they also hunted wild animals and took birds and fish, especially in the Faiyum, to fill out their diets. They made bowls and jars of pottery. And they wove linen cloth out of flax.

This is a culture which, emphatically, you would not try to carry around on your head, even forgetting the houses and granaries. Its origins have not been pinpointed, but they must

have been in this same part of the world. the Near East. There seem to have been Neolithic hunters in the area down to nearly 6000 B.C., according to radiocarbon dates. And one of the earliest villages of farmers yet discovered must have been founded by 5000 B.C. or earlier. this was already a full fledged village. so that the formative period must have been some time prior to this. In fact. during such a formative period. it is easy to suppose that farmers might leave their village which we recognize as "Neolithic." and go off on a hunting expedition during which they left remains in a cave which we would dig up and label "Mesolithic."

This early village. called Jarmo. is in the hill country of Iraq above the Tigris-Euphrates Valley. It was made up of simple houses of packed mud walls. and lasted long enough so that eight levels could be made out by the excavators. Grains of wheat and barley were found. along with the household tools for making flour. especially hand mills. And there were bones of cattle. sheep. pigs and dogs.

Now it might be hard to prove just what was the state of domestication of these animals. but here at any rate was the basic domestic livestock in a group. and all wild animal bones -- ie. , those which were clearly products of the hunt -- amounted to only five per cent of the total. One feature of the houses was burning basins of clay (hearths?) but aside from the remains of these there were no signs of pottery until the highest levels. at the end of the settlement. when some fragments of poor-grade stuff appeared. And there were no signs of weaving at all. So here was a group of very early farmers. lacking even the two typical arts of "Neolithic" peoples. pottery and weaving. but with the domesticated grains and animals well in hand.

None of this tells us how the business of domestication came about. and here we have to fall back on a little imagination. But let it be the right kind of imagination. and not one that sees a Mesolithic genius waking up in a hut. exclaiming. "Why didn't I think of that before?" and smartly laying out a garden and planting it full of good things. On the contrary. rapidly though it happened by Paleolithic standards. the deliberate sowing of grain must have come about by accidental steps. at the hands of gatherers.

There is impressive proof that the Mesolithic hunters had come to know and eat every possible kind of natural food. and in this part of the world they surely made use of edible seeds as in all other parts. Many such people must have anticipated the ripening of wild crops. and perhaps come early to places where they grew. possibly even to pull up weeds or chase birds away. Here in the Near East. in fact. the Natufian people of Palestine seem to have had a very late Mesolithic culture. Yet they had sickles. which is thought to show that they harvested wild grasses and grains on an important scale. Realize also that these cereals. wheat. barley. the millets (grasslike grains including sorghum. very ancient in use). will keep well if they are stored in a proper cache. and you have something which emphasizes the importance of that crop and exerts a steady

pull back to the place where it grows well, or where an other-wise wandering group keeps its stores of the grain. And suppose that little by little the people find other ways of helping the crop, and camp near it, or carry ripe grain home to one of their main camps, and accidentally spill it around so that it grows there. Then the final purposeful growing of this kind of food is probably inevitable. Now the whole process might be very slow, or too difficult entirely, for many wild vegetable types, and it is probable that the particular qualities of these grains, like their yearly growth (as opposed to a treeborne fruit), their high food value, and above all their storability, would have helped the incipient farmers along in their unconscious process of domestication.

You might think that it would be possible to find the home of all this by finding the natural home of the grains themselves. Unfortunately, the grains grow wild in too many parts of the Near East and northern or eastern Africa to make this possible. And the same thing applies to the animals. This last is especially true, because, once the idea of domesticating them had been clearly established and heads had been introduced into new territories, then some of the local wild forms in these new territories may have brought under domestication forms in these new territories may have been brought under domestication, as a way of enlarging the flocks. This seems to have happened with cattle and pigs in Europe, for example. That would tend to make it look as though the original domestication had taken place all over creation, instead of in one principal place. The chances are strong, however, that cattle domestication, like that of wheat and barley and other early plants like flax, happened in the Near East.

It is actually surprising that the main animals - cattle, sheep, goats and pigs - all show up together in the lowest archaeological levels of the oldest village, Jarmo. This is the kind of thing that suggests Neolithic beginnings must have gone back well before Jarmo's founding in about 5000 B.C., and perhaps before 6000 B.C. But in any event it is likely they the grains were domesticated before the animals.

For the essence of village farming life is building a village and farming; that is, staying in one place. And it is plants that stay in one place, and so ask the people to do the same, while the animals may wander. If the people are wandering, and living by hunting, they cannot afford the time to care for livestock. Sometimes hunters bring live animals to camp as a way of having the next day's food at hand. But these animals never survive more than a day or so. And a hunter's real reaction to a food animal is to shoot it; this was the Bushman's approach to Hottentot or Dutch cattle, and the Sioux Indians did the same thing when the Great White Father was trying to make them settle down and gave them some cows.

But domesticating cattle is not simply stockading them or even taming them: it means rather causing them to breed successfully while they are dependent and human beings. And this means living on something else while waiting for the animals to reproduce and grow and give milk. Now if you are a hunter, not a

farmer, it would seem preposterous to be hunting rabbits or gorillas if you have oxen and sheep at hand, all ready to be killed. Of course we do not know what actually happened in 6000 B.C., and there may have been special circumstances. And also there are the reindeer nomads of Siberia, who give the impression that they are in the very act of bringing the reindeer to heel; but the circumstances are peculiar. On the face of it, it would seem that the domestication of wild cattle would be slow enough and hard enough to suggest strongly that it was done by homesteaders; not hunters.

This brings us to the meaning of the so-called Neolithic revolution. If you generalize, and take the typical effects on culture of hanging life on the one hand and of farming life on the other, you can see that something stupendous took place: it was a breaking of one of nature's bonds, the freeing of man from the limits of the natural supply of food.

...simple hunter-gathers have few crude ideas about conservation and some, like the Australians and the Magdalenians, exerted themselves in pious rites to make the game more plentiful. But that is wishful thinking; nature is in control, not they. Nature goads them about from spot to spot like howling monkeys, and there is nothing they can do about it. They cannot stockpile their food: when they have eaten, it is high time to start thinking about the next meal. Around any camp there are only so many wild animals and so many edible plants, because of the balance of nature. When these have been hunted or picked beyond a given point, the supply becomes too short and cannot recover, perhaps, for that season. What do the people in the camp do? They pick up and move on, to a place where the game is untouched. So this band must have enough territory to keep rebuilding the supply, it must preserve the supply against poachers, and it must move, move, move.

What about the numbers of people? Since they are actually part of the balance of nature themselves, they will be limited to a number which their territory can support in its worst (not its best) years. So the whole human population must be relatively sparse and spread out.

And the size of the band? Actually the simplest family can carry on this kind of a life, the man to hunt and the woman to collect vegetables, insects, water and firewood and to tend to odd jobs. But this leaves them with no help if they have need of it, while larger groups may not only protect themselves better but hunt more effectively, whether by co-operation in a rabbit drive or by multiplying the chances of finding and killing a large animal on which all can feed. However, the size of the band soon reaches a point at which it presses within their radius of action around the camp, or the band itself will not be able to move fast enough and far enough to tap the resources it needs. Only once in a while can bands come together in tribal meetings, and then perhaps when a natural crop -- a cactus pear or a kind of grub -- comes into season, and for a while creates plenty for everybody. The rest of the time the bands must keep their distance, and the number of each will be something like fifty souls, more or less.

These laws of nature have teeth in them: many peoples accept the necessity of killing some of their infants at birth because the mother already has all the young children she can cope with on the march; and most of them ruthlessly abandon the sick or the helplessly old to freeze or starve. If, rarely, they put forth efforts on the aged one's behalf, these efforts are visibly strenuous. Such action is not subhuman callousness. Even though they may appear to take it calmly, the people have no choice at all in what they do, or even the face they put upon it.

We see, in fact, human beings like ourselves trapped, without knowing it, a life which prevents them from having higher material inventions and social combinations. Small nomadic bands can hardly become civilized if they cannot even set up substantial households. They must find some escape from nomadism first and from isolation and the limits of small numbers. They must find some escape from the tread-mill of food-getting, which has them almost always either hunting or getting ready to hunt, and so keeps them from having any specialization of their energies, and makes the only division of labor that between the animal-hunting man and the plant-hunting woman. This escape was found with domestication, when the ordinary balance of nature was broken and food was made to grow not by nature but by man. Camps changed to villages, and dozens of people to hundreds.

But the millennium did not arrive with a rush. This was the basic change, ideally, but it was gradual, and there had always been a lot of overlapping. The Siriono Indians, nomadic hunters of eastern Bolivia, are normally so hungry that their conversation is largely about food, or squabbling over food, or begging one another for food (they are perhaps the least honorable of the hunters, and will eat in the middle of the night to avoid sharing). And yet they plant small plots of corn and other vegetables around the house or at some place near which they expect to be hunting; still the corn patch fails to rescue them from their hard lot. Many Neolithic peoples hunt and fish avidly and, as we shall soon see, the more primitive ones cannot even remain long in one place because of the inefficiency of their methods of farming. Even in archaeology we can see the gradual nature of the development.

COURSE TITLE: WORLD HISTORY, 1930-PRESENT

PACKAGE TITLE: WAR SINCE 1945

by

JUDY HOFFMAN

Package Title: War Since 1945

I. PROBLEM. After the large scale war between 1939 and 1945, the world hoped for a long peace. Fear of what another world-wide war would do to mankind was very prevalent. Weapons such as the atomic bomb could virtually annihilate the entire population of the world.

Russia seemed determined to spread communism throughout the world. The Western World's conflict against this covert aggression was known as the Cold War. There were a few hot wars after 1945, too. One was the Korean War, fought by U.N. forces against the invading North Koreans. Other wars included the Hungarian Revolution, the struggle for freedom by Czechoslovakia, the continuing struggle of Israel against the Arabs in the Middle East, and the Viet Nam War. The wars for freedom of African countries which also filled this period were the Algerian War, the struggle in the Congo, Biafra, and Rhodesia. Most recently was the fight for the freedom of Bangladesh from Pakistan.

What has made these wars different from all previous wars and why? What has been the prevailing reasons for violent flare-ups? Why haven't atomic weapons been used? For what reasons have major powers backed various sides in the smaller wars? What is the arms race? What hope of peace do we all have in the future?

II. Specific Objectives. When you finish this unit you will be able to:

1. Identify in writing the major wars since 1945 and their causes.
2. Explain in writing the methods of warfare used since 1945.
3. Explain in writing the development of the arms race and its affect on world peace.
4. Explain in writing what role the U.N. has played in keeping world peace.
5. Identify in writing the major occupations associated with the armed services which are available today.

III. Required Reading Materials. Read each of the following references. You may be quizzed orally on the assignments.

1. Men and Nations. pp. 754-755, 762-766, 773-774, 779-781, 782-789, 799-801, 806-811, 816-818.

2. The Human Adventure, vol. 2. pp. 215-220, 247-269.
3. The Human Side of American History. pp. 291-293, 300-302, 308.
4. The Human Side of World History. pp. 167, 172-175, 178-179.

V. Required Activities. Using the reading material, complete each of the following activities.

Questions:

1. What kinds of forces has the U.N. used for peace-keeping operations?
2. Summarize briefly the events in Czechoslovakia in the late 1940's.
3. Why was the Berlin airlift necessary? How was it carried out?
4. Why did the Hungarians revolt in 1956? How did Great Britain, France, and the U.S. react?
5. What led to the Suez crisis and how was it resolved?
6. Why was it difficult to reach a peaceful settlement of the Algerian problem in the 1950's?
7. How did Israel become a state? What has been the result?
8. What was the Korean War? Why was it important?
9. How did America become involved in Vietnam? What were the chief provisions of the Geneva Agreements? Why did South Vietnam and the U.S. refuse to sign them?

Choose two of the following activities:

1. Winston Churchill said the arms race led to a "balance of terror". Draw a cartoon using Churchill's statement as a theme.
2. On a map of the world show where the United Nations has undertaken peace-keeping operations, indicating with what strength these missions were carried out.
3. Draw two political cartoons of the Berlin Wall, one from a Western point of view, the other from a Communist point of view.
4. Write an imaginary editorial for a pro-Arab newspaper, denouncing Israel as a trouble-maker in the Middle East.
5. Write an editorial on American intervention in the Vietnam War. Use current periodicals for sources.

6. Write a letter to a friend in which you defend the sale of planes by the U.S. to Israel. Use current periodicals for your sources.

Choose 1 of the following:

1. Read 2 magazine articles on the struggle for freedom by Bangladesh. Turn in abstracts with bibliographical information.
2. Read 2 magazine articles about the struggle for freedom by Biafra. Turn in abstracts with bibliographical information.
3. Read 2 magazine articles about the Israeli-Arab 7 day war. Turn in abstracts with bibliographical information.
4. Form a group to discuss the following questions (3 - 4 students). Hand in 1 set of notes for the group.
 1. The United States spends much more on its defense budget than on the United Nations. Which do you think is a better guarantee for peace, the U.N. or an up-to-date defense system? Explain your choice.
 2. The United States has been criticized for not forcefully preventing the building of the Berlin Wall. Explain your attitude on this matter.
 3. What do you think would help lessen tensions between Arabs and Israelis? Do you see any hope for such an easing of tensions?
 4. Why do you think some people in the world favor Russia's policy of peaceful coexistence, while others support China's policy of national wars of liberation?
 5. What is your position on the United States government's policy in Vietnam?
5. Interview a recruiter for the armed forces about jobs available for enlisted men or officers. The list may be very long so you may want to limit it to fields such as medicine, combat, clerical, military police, etc. Write up your interview with your reactions.

POLITICAL REVOLUTIONS: 1900-1930

I. PROBLEM: The period between 1900 and 1930 was an important one for political revolutions. It was during this time that Russia threw off the rule of the czar and a man succeeded in applying the ideas of an earlier political revolutionary, Karl Marx, to a situation entirely different from the one Marx believed would cause a revolution. Instead, N. Lenin modified Marxism and successfully carried out a revolution by the elite (that is, by a very few number of people). It was this adaptation of Marx's ideas which eventually became Communism as we know it today.

What conditions existed in Russia which promoted the use of revolutionary tactics? Why had a previous revolution in 1905 failed? What kind of a man was Lenin? Who were his followers? In what ways did he alter Marx's ideas? Who were the Bolsheviks? After the power was taken by the Communists, what kind of life did they preach for the people of Russia and the world? Was their intent to follow the ideas of Karl Marx or did they continue to alter his proposals? And finally, did the Communists practice what they preached? -- and do they today follow their own ideals in practice?

A revolution was also carried out in China between 1900 and 1930. The Manchu dynasty was too slow in making reforms and revolutionary leaders succeeded in forcing them to give up their rule. Important in this movement was Dr. Sun Yat-Sen.

What conditions were the people struggling against in China? What type of government did they want? Was this revolution one by the masses or an elite as in Russia? What effect did the success of the revolution have on China?

Mexico also underwent a revolution between 1910 and 1920. What were its causes? Results? Heroes? How did it affect the United States?

II. Specific Objectives. When you finish this unit, you will be able to:

1. Explain in writing the conditions in Russia which encouraged revolutionaries to act.
2. Explain in writing what the causes and effects of the Russian Revolution of 1905 were.
3. Explain in writing who N. Lenin was and why he was important.
4. Explain in writing how Lenin altered the ideas of Marx and why.
5. Explain in writing the successes of the Russian Revolution and the effect it has had on Russia and the world.
6. Explain in writing the causes and effects of the revolution in China.
7. Explain in writing the causes and effects of the revolution in Mexico.

V. Required Activities Using the reading material complete each of the following activities.

1. Questions. Answer each of the following questions in writing in your own words.

1. Why did the Russian revolutionary movement of 1905 fail?
2. How did conditions in Russia in 1921 contradict Marxist theory?
3. How did Lenin modify Marxism?
4. Who was Sun Yat-Sen and why was he important?
5. Who was Pancho Villa and why was he important?

2. Choose 2 of the following activities.

1. Write a letter to Czar Nicholas II explaining why you think it is a mistake to return to oppressive measures after issuing the October Manifesto.
2. Write an essay on the following topic: Lenin won the support of the Russian masses with his slogan, "Land, Peace, and Bread." What does this say about the conditions in Russia in 1917? Do you think Lenin would have gained more supporters if he had promised political freedom to the Russian people?
3. Read 2 magazine articles relating to the Russian Revolution. Turn in abstracts and bibliographical information on each.
4. Draw a series of political cartoons on the Russian Revolution covering aspects such as causes, effects, leaders, world sentiment, etc.
5. Draw a political cartoon illustrating the difference between Pancho Villa and E. Zapata.

3. Choose 1 of the following activities.

1. Read a biography of Lenin and give an oral report to your group.
2. Read The God That Failed and write a paper explaining how the changes in communism by Lenin and Stalin played a part in the disillusionment of the contributors who wrote this book with communism.
3. Read Animal Farm by G. Orwell and write a paper explaining the satire on revolution and communism. Use specific examples from the book and from your required reading.
4. Present the play Seeds of Revolution to the class. Props and costumes are welcome.
5. Organize a debate (3 people) on the subject of the benefits versus the disadvantages of Lenin's success in Russia. Research your topic well so your debate will be factual and informative.
6. Write and present to the class (4 people) a You Are There segment on the Bolshevik Revolution on November 17, 1917.
7. Read a book on the Mexican Revolution. Fill out a critique form.
