ABSTRACT

Project FOLLOW-UP was conducted to develop, test, and validate a statewide management information system for follow-up of Texas public junior and community college students. This activities manual provides an overview of the resultant student information system (TEX-SIS) and its characteristics. Seven subsystems comprise SIS, each with its own data collection instruments and method of processing: (1) Student's Educational Intent, (2) Nonreturning Student Follow-up, (3) Withdraval Follov-up, (4) Graduate Follow-up, (5) Employer Follow-up, (6) Adult and Continuing Education Follow-up, and (7) State Follow-up Reporting. The bulk of this canual is comprised of sections for each subsystem of SIS, describing in detail the scope and purpose of the subsystem, appropriate population, instrument development rationale, and a sample instrument. Copies of survey instruments intended as masters for reproduction are appended, but EDRS hard copy reproductions of the instruments may not successfully serve this purpose. This manual is intended for use in conjunction with the TEX-SIS FOLLOW-UP Procedures Manual (JC 760 475) and Data Processing Manual (JC 760 476), (JDS)

Documents acquired by ERIC include many informal unpublished * * * materials not available from other sources. ERIC makes every effort * * to obtain the best copy available. Nevertheless, items of marginal 柞 * reproducibility are often encountered and this affects the quality * 來 * of the microfiche and hardcopy reproductions BRIC makes available * via the ERIC Document Reproduction Service (EDRS). EDRS is not 聿 responsible for the quality of the original document. Reproductions * supplied by BDRS are the best that can be made from the original. * × ******

Project FOLLOW-UP

MEMORANDUM

August 1976

TO:

Interested Personnel

FROM: *JR* Dr. Jim F. Reed, Director of Project FOLLOW-UP SUBJECT: TEX-SIS Activities Manual (AM)

This Manual is the second in a series of publications designed to document the follow-up system developed by Project FOLLOW-UP. The general documentation philosophy presents SIS at three different levels. The first level (the brochure) gives a general overview of SIS with appropriate information included for the college administrator and/or State personnel to make decisions regarding the depth of follow-up involvement desired. The second level (this Activities Manual) presents the actual questionnaires utilized by SIS (and rationale for development) for college level staff personnel to make decisions regarding the usefulness of the questionnaires to a particular institutional environment. The third level (the Procedures Manual, Data Processing Manual, and Subcontractors' Manuals) presents SIS in a more comprehensive manner and can be used as a guide to actually performing the different types of follow-up studies included.

Of course, it is understood that the collection of the various types of student follow-up information is an endless task. The possibilities for the expansion and/or alteration of SIS are tremendous. SIS will not provide <u>all</u> of the student follow-up information to satisfy <u>everyone</u>. However, SIS is a fairly comprehensive "beginning" from which future local and/or State follow-up systems can benefit.

Because of the above, SIS is continually searching for ways to improve. New ideas, notation of problem area: suggestions for additions and/or improvement, etc., are welcomed from the users of SIS.

JFR:mg

3 i PREFACE

As a result of legislation which stated that funds "shall be expended for the purpose of developing data directly related to programs conducted by public junior colleges and shall be for the purpose of developing systems for use by the junior college," the Texas Education Agency (in cooperation with an Advisory Committee of two-year college educators) invited proposals and ultimately selected Tarrant County Junior College, Fort Worth, Texas, as the prime contractor for the development of the follow-up system.

The resulting system (SIS) was developed over an approximate 27-month period through the cooperative efforts of Texas public two-year college personnel and State personnel in response to the need for systematic methods of collecting, processing and reporting student follow-up information for use in enhancing the educational delivery system provided by the Texas community/junior colleges. The primary function of SIS is to provide a system which will gather information for local utilization as well as planning and coordination at the State level. SIS was created primarily by research and development activities organized through the below input mechanisms:

- 1. Results of a statewide SCOS-DELPHI Study whose purpose was to develop a consensus of opinion regarding the desirable characteristics of the follow-up system.
- 2. The awarding of seven subcontracts for the development of certain follow-up system components.
- 3. Interviews and discussions with public two-year college personnel concerning needed follow-up activities.
- Field testing and evaluation of various SIS questionnaires by more than half of the Texas community/junior colleges on a "volunteer" basis.
- 5. Consultative assistance by the Project Follow-up Advisory Committee.
- 6. Research of follow-up activities/systems both inside and outside the State of Texas.
- 7. Input by Project Follow-up liaison personnel appointed by each public two-year college in Texas.
- 8. Project Follow up staff efforts and experience.

ii

As noted previously, seven subcontractor institutions played an integral role in the development of SIS. A listing of these institutions and their participation effort follows:

Institution	Subcontract	Director
Alvin Community College Alvin, Texas	Exit Interviews	Dr. Jerry Carrier Counselor, Assis- tant Professor of Psychology
Amarillo College Amarillo, Texas	Employer Follow-up	Mr. Larry Patterson Director of Financial Aid and Placement
College of the Mainland Texas City, Texas	Representative Sampling	Mr. Larry Wilkinson Director of Research
Del Mar College Corpus Christi, Texas	Follow-up Method- ology	Mr. Ron Fite Director of Placement
Navarro College Corsicana, Texas	Follow-up Costs	Mr. Ron Baugh Director of Adminis- trative Services
San Anconio College San Antonio, Texas	Graduate Follow-up	Mr. Ray Lewis Director of Placement
Western Texas College Snyder, Texas	Educational Goals and Student Flow	Dr. Duane Hood Dean of Student Services

The Project Follow-up Advisory Committee, which met on a quarterly basis, provided general system philosophical direction and leadership for obtaining statewide support for Project Followup activities. For this reason, a listing of these committee members and their affiliation follows:

Name	Position	<u>Affiliation</u>
Mr. George Barnett	Counselor	Brazosport College
Mr. Ted Boaz	Dean, Technical- Vocational and Special Programs	Del Mar College

Dr. Paul Culwell	Retired	(Formerly Dean, San Antonio Junior College District)	
Mr. Tom Deliganis	Dean, Occupational and Continuing Education	Laredo Junior College	
Dr. Howard Duhon	Assistant Dean	Lee College	
Mr. Frank Hunt	Dean of Technical- Vocational Education	South Plains College	
*Dr. Robert J. Leo	Director, Special Services and Govt. Relations	Dallas County Community College District	
Dr. Stewart McLaurin	Vice-President	Kilgore College	
Mr. Eugene Speller	President	Olive-Harvey College, Chicago, Ill. (formerly Dean, Student Development, Austin Community College)	
Dr. Don Wright	Dean of Instruction	Alvin Community College	
Dr. Rod Wright	Dean of Technical- Vocational Education	Ranger Junior College	
Ex Officio Committee Members:			
Mr. Ray Barber	Director, Division of Occupational Research and Developm <i>e</i> nt	Texas Education Agency	
Mr. Roland A. H. Benson	Chief Consultant, Division of Post- Secondary Occupa- tional Education	Texas Education Agency	
*Note: Project Follow-	up Advisory Committee C	hairperson	

iv

Mr. Joseph D. Godsey	Retired	(Formerly Director, Division of Post- Secondary Occupa- tional Education and Technology, Texas Education Agency)
Dr. Stanton C. Calvert	Director, Community College Programs (formerly Dean of Student Personnel Services, College of the Mainland)	Coordinating Board Texas College and University Systems
Mr. James W. Haynie	Director of Educa- tional Programs, Division of Post Secondary Occupa- tional Education	Texas Education Agency
Mr. Harry K. Thornton	Consultant, Division of Oc- cupational Research and Development	Texas Education Agency

In addition to the above individuals, much input was gained through the 194 individuals who participated in the SCOS-DELPHI Study, the liaison personnel who provided the leadership necessary to field test and evaluate data collection devices at approximately 28 colleges across the state, and the more than 100 individuals who provided their time for Project interviews and discussions.

ACKNOWLEDGMENTS

Aside from those individuals and institutions mentioned in other locations, appreciation should be extended to the below Project FOLLOW-UP staff members:

Ms. Jeannene Cox, Associate Director of Project FOLLOW-UP
Mr. Richard Iwan, Systems Analyst
Mr. Mike Floyd, Programmer Analyst
Ms. Merle Ganier, Senior Secretary
Ms. Trudy Graves, Secretary

The valuable contribution of many individuals has enabled the Project to accomplish what success has been experienced. Sincere gratitude should be offered to those individuals v_{-0} have made the SIS documentation available to college and State administrators.

Special thanks must also go to Dr. Joe B. Rushing, Chancellor, Mr. Jimmie C. Styles, Vice Chancellor for Research and Development, and Dr. Horace Griffitts, Director of Research, Tarrant County Junior College, for their leadership, encouragement, and support for Project FOLLOW-UP.

Tarrant County Junior College and the Project Follow-up subcontractors reserve the right to make alterations and/or additions to the TEX-SIS Follow-up documentation on a need basis. Periodic updates and/or revisions may be necessary to assure that the system provides the most current information available. The TEX-SIS Follow-up documentation may not be commercialized without the written permission of the system developers.

SIS OVERVIEW

SIS OVERVIEW

SIS is an information system developed by Texas community/ junior colleges for primary utilization by Texas community/ junior colleges. SIS is composed of a series of 14 data collection devices developed and tested in a multitude of different environments in various colleges across the State of Texas. SIS, built upon the concept of an educational management information system, is divided into the below seven subsystems, each with its own instrument(s) and method of processing.

Subsystem I - Student's Educational Intent Subsystem II - Withdrawal Follow-up Subsystem III - Nonreturning Student Follow-up Subsystem IV - Graduate Follow-up Subsystem V - Employer Follow-up Subsystem VI - Adult and Continuing Education Follow-up Subsystem VII - State Follow-up Reporting

SIS Characteristics

One of the primary philosophical considerations of SIS is, that in order for a follow-up system to be functional in an educational environment, it must be flexible enough to allow the institution the option of choosing its degree of implementation (if any) and deciding upon the nature of the follow-up study to be conducted. Conversely, the system operation should be consistent enough to provide for valid reporting of statewide information and the potential for institutions to "compare" survey activities if the desire is to develop some degree of a "standard" for good, poor, or indifferent data results.

SIS exhibits a number of interesting characteristics, many of which were derived from input previously mentioned. A listing of some of these characteristics follow.

1. <u>Provides data for both local and State utilization</u> -This concept is demonstrated by the fact that the same questions utilized on the "State" instrument (which only responds to the State follow-up report) are utilized in four other questionnaires. This enables the institution to decide upon the amount of information to be collected at the same time the survey is conducted for State follow-up reporting purposes. Of course, because of the "local data needs" emphasis of SIS, the majority of the questionnaires collect data for

local use only and are not to be considered as information sources for State reporting purposes.

- 2. <u>Provides mechanisms for manual or computer processing</u> of data - Each questionnaire can be processed by computer with a processor which has been designed to analyze data in a variety of different manners. However, because of a wide variation of college computer size and capability, data tabulations sheets have been designed which provide a mechanism for processing the data manually. Each questionnaire has its own data tabulation sheet(s) for the purpose of error reduction.
- 3. <u>Interfaces with State student reporting systems</u> Data from follow-up studies can be combined with student data which is collected for the purpose of conforming to Texas' "Uniform Reporting System" for higher education. SIS can derive much of its data from the Student Report (CBM-001) by use of the student's Social Security number. Also, as previously mentioned, the data collection devices provide information for the completion of State required follow-up report forms.
- 4. <u>Identifies diverse educational goals of students and</u> <u>the extent to which these students perceive their</u> <u>goals to have been satisfied</u> - Student "goal" information is collected via the SEI card (Subsystem I) for analyses. Furthermore, student goal information is also collected at the time of follow-up, thereby making available analyses of "goals achieved." Also, it may be possible to accurately monitor "drop-out" and "stop-out" rates by analyzing student responses to questions concerned with student goals.
- 5. <u>Provides pre-tested procedures and instruments</u> As mentioned previously, the SIS instruments and procedures have been tested and evaluated in a variety of different educational environments. Although not perfect, the instruments and procedures do conform to a large number of institutional conditions. Furthermore, SIS promotes the concept of an institution designing its own instrument(s), thereby conforming to an institution's needs in a more exacting manner.
- 6. <u>Provides a decentralized capability, both in responsi-</u> <u>bility and implementation</u> - SIS projects a "local" emphasis, with the concept being demonstrated by the

fact that the colleges collect their own data while re porting required follow-up information to the State.

- 7. <u>Collects data from a variety of occupational/technical</u> <u>and university transfer/academic populations</u> - SIS treats several different populations of potential respondents including:
 - a. Entering and returning students.
 - b. Students who withdraw from individual courses.
 - c. Students who withdraw from college.
 - d. Students who "walk-off" without adhering to the formal withdrawal process.
 - e. Students who enroll for a specific period and do not return.
 - f. Occupational/technical "completers."
 - g. Program graduates.
 - h. Employers of program graduates.
 - i. Adult and continuing education students.
- 8. <u>Provides a mechanism for evaluation of the follow-up</u> <u>system</u> - After the follow-up study is completed, SIS recommends that feedback be obtained from individuals who may be utilizing the resulting data. For this reason, evaluation forms have been designed for each questionnaire which may assist the user of SIS in assuring that the data being collected satisfies unique institutional needs.
- 9. Built around the concept of an educational management information system - The concept of a management information system displays the philosophy that its sole duty is to supply information to certain individuals who need that information to make effective decisions. SIS displays this same philosophy, and recognizes that follow-up study results should not be considered as being synonymous with program evaluation.

xi

- 10. <u>Provides a mechanism for securing employer input into</u> <u>program planning</u> - Aside from gathering data from former community/junior college students, SIS exhibits the ability to collect information from employers of occupational/technical program graduates regarding their "opinion of the training received by the program graduate."
- 11. <u>Recommends procedures for "cycling" follow-up studies</u> -SIS recommends that an institution develop time frames for conducting certain follow-up studies. It is not feasible to implement all of the subsystems every semester; therefore, a schedule can be developed in such a manner that certain studies will "re-occur" over a period of several semesters or years.
- 12. <u>Provides questionnaires for standardized use</u> Although there are advantages inherent with all colleges utilizing the same questionnaire for specific populations of students, there are many disadvantages. However, realizing the advantages, SIS provides the capability for statewide, regional, or other institutional cooperation in utilizing the same questionnaire for "comparison" type studies.
- 13. Provides guidelines for utilization of representative sampling techniques and measurement of non-response bias - Conducting tests for non-response bias and utilization of representative sampling techniques is discussed in a subcontractor report titled <u>Representative</u> <u>Sampling</u> by College of the Mainland.
- 14. <u>Provides follow-up cost data and guidelines for com-</u> <u>puting further cost data on an individual college basis</u> A large amount of follow-up cost data has been analyzed by Navarro College in its subcontractor report entitled <u>Follow-up Costs</u>. In addition to this, forms are provided for an institution's use in computing its own follow-up costs.

Also, periodic references are made throughout this Activitie Manual to the results of the statewide SCOS-DELPHI Study. The SCOS (System Characteristic Opinion Study) DELPHI, conducted early in the life of Project Follow-up, formulated certain philosophical guidelines which were utilized throughout the research and development effort. Since the 194 selected respondents participated 100% on the last two rounds of the DELPHI, it is

ERIC FUILTEXE PROVIDENT BY FRIC xii

na kalan wantu tutu na kuan kalan na **15** kutu na kutu na kalan kalan kalan kutu na kutu na kutu kalan kalan ka

felt that the results of this study indicated a true consensus of the respondents' opinion regarding the desired characteristics of a statewide follow-up system. Aside from those SCOS-DELPHI statements documented later in this Activities Manual, the below statements were utilized to a great extent:

Statement	*Level of <u>Consensus</u>
"More community college funding will be necessary for the purpose of implementing a comprehensive follow-up system."	1.7
"One designated office within a local in stitution should be assigned the respon- sibility of conducting follow-up studies."	1.5
"The 'conditioning' of students to follow-up studies is important to a follow-up system."	1.5
"A follow-up system should include methods for continual evaluation and updating of its own procedures."	1.2
"Local administrative endorsement and support is necessary for the successful implementa- tion of a follow-up system."	1.1

As stated previously, additional SCOS-DELPHI statements are utilized throughout this Activities Manual as rationale for development of the various subsystems and questionnaires.

Although the degree of implementation and impact of SIS cannot be appropriately evaluated for a number of years, it should be realized that the success of any effort is directly proportional to the eventual outcome of that effort. In terms of a statewide coordinated follow-up system, the true success can be measured in terms of how much impact the resulting information has on enhancing the educational delivery capability of the Texas community/junior colleges.

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

STUDENT'S EDUCATIONAL INTENT

17

AN DY

5.57 Sec. 1

TEX-SIS Subsystem I Activities Manual (AM)

SUBSYSTEM I STUDENT'S EDUCATIONAL INTENT

Population: May include new, re-entry, and returning students enrolled in one or more college credit courses. Suggested Instrumentation: (SEI) Student's Educational Intent (F01-1-J) Salmon

Subsystem I is concerned with the collection of information relative to the student's educational intent (or goal). As stated in other publications, many students attend public community/junior colleges for reasons other than pursuing formal degree programs. This fact, of course, impacts the analyses of follow-up data, thereby giving significant meanings to such terms as "stop-out" and "completer." For a detailed discussion of the operation of this subsystem, SIS's "Procedures Manual" should be consulted.

Instrument Development Rationale

Since many institutions desire to implement the SEI questionnaire during registration, it was felt that the printing should be performed on a small card which would facilitate ease in completion and the least amount of hindrance in being interfaced with any college's registration process. The need for the SEI card was actually derived from the previously mentioned SCOS-DELPHI study and the subsystem guidelines were produced to a large extent, from the below SCOS-DELPHI statements:

State	ment	<u>Consensus</u>
•	"Identification of a student's 'educational goal' should provide the basis for follow- up."	2.4
, 	"The documentation of a student's initial ed- ucational goal should be maintained and update at the beginning of each enrollment period."	d 2.0

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

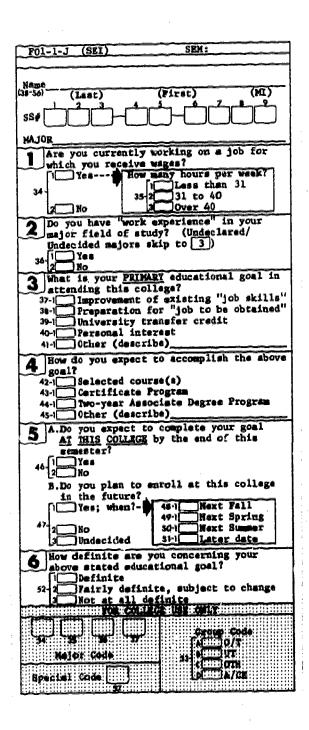

I-1

"Information pertaining to the student's edu- cational goal should be obtained during the time of the registration process."	2.6
"A 'stop-out' is defined as a student who tem- porarily terminates his formal educational pursuits with full intentions of continuing at a later date."	1.7
"The documentation of a student's educational goal should be the responsibility of counsel- ing personnel."	2.9
"A 'drop-out' is a student who leaves college prior to achieving his or her stated objective, with no intention of returning."	1.6
"A 'completer' is defined as a student whose educational objective is completed culminat- ing in a degree, certificate, selected courses, or portions of selected courses."	1,5

Of course, as reflected on the questionnaire, other student information can be collected at the same time "educational intent data is collected. For a more detailed description of areas related to this subsystem, the subcontractor report titled <u>Educational Goals and Student Flow</u> by Western Texas College and SIS's "Procedures Manual" should be consulted.

WITHDRAWAL FOLLOW-UP

.

TEX-SIS Subsystem II Activities Manual (AM)

SUBSYSTEM II

Population: May include the withdraw or "walk-off" from	ose students who formally one or more college credit
courses in which they initia	ally enrolled.
Suggested Instrumentation:	
(COS/W) Course Withdrawal	(F02-1-E) White
(COL/W) College Withdrawal	(F02-2-E) Blue
(WO) Walk-off	(F02-3-D) Gray

Subsystem II is concerned with the collection of information from students who depart from courses and/or college before completing a specified enrollment period. This situation provides a circumstance to collect a large amount of student data at a reasonable cost in terms of time and effort required on the part of college personnel. For a detailed discussion of the operation of this subsystem, SIS's "Procedures Manual" should be consulted.

Instrument Development Rationale

The three instruments in this subsystem were designed on a small card form for ease in implementation. The card size enables the questionnaire to be easily mailed if desired or placed at a point in the college's withdrawal process for completion. These three questionnaires actually collect data at the first point of student attrition after he or she starts attending class. As were other components of the system, the need for this subsystem was actually derived from the below SCOS-DELPHI statements:

Statement	*Level of <u>Consensus</u>
"An immediate follow-up should be initiated on students who do not complete the period for which they enroll."	1.6
"The 'exit interview' is an acceptable method of collecting follow-up information."	2.8

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

"Follow.up studies should be applied to all students who have attended the institution." 2.8

"Students who withdraw from college prior to completion of the semester should be followedup regarding their reasons for college withdrawal." 1.8

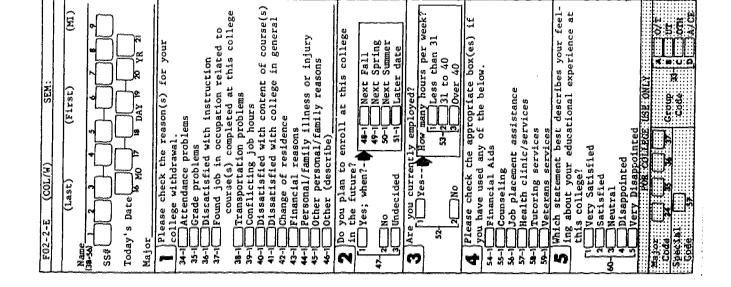

Of course, as reflected on the three questionnaires on the following page, a large amount of student data can be gathered at the same time that "reasons for withdrawal" is collected. The additional information may be helpful in course planning and scheduling. The questionnaires represent an effort to collect information at the following three points of student attrition (1) when the student withdraws from a course--white card, (2) when the student withdraws from college--blue card, and (3) when the student "walks-off" without following the withdrawal process--gray card. A walk-off survey, of course, necessitates a mail-out survey, while other withdrawal data can be collected by implementing the first two questionnaires within the college. Procedures to utilize when conducting the "walkoff" mail out survey are specified in the Procedures Manual and selected subcontractor reports.

TEX-SIS Subsystem III Activities Manual (AM)

SUBSYSTEM III NONRETURNING STUDENT FOLLOW-UP

<u>Population:</u> May include students with both university transfer/academic and occupational/technical intentions who, having completed a previous enrollment period, do not return for a subsequent enrollment period.

<u>Suggested Instrumentation:</u> (NRS) Nonreturning Student (F03-1-E) Pink (OCC/TECH) Occupational/Technical Nonreturning Student (F03-2-C) Blue

Subsystem III is concerned with the collection of information from students who chose not to continue their enrollment periods at an individual college. The questionnaires facilitate the identification of "drop-outs" and "stop-outs" as well as identifying students who complete a short term goal in one or more enrollment periods without graduating from a college program. This identification capability has the potential of giving a more significant meaning to the term "completer." For a detailed discussion of the operation of this subsystem, SIS's "Procedures Manual" should be consulted.

Instrument Development Rationale

Since the follow-up of nonreturning students provides the institution with the opportunity for short-term feedback from a cross-section of students, it was felt the questionnaires should be lengthy enough to collect a significant amount of data while being short enough to provide meaningful response rates. Of course, because of the population, the questionnaires had to be designed for a mail-out type survey. The SCOS-DELPHI study provided guidelines for the development of this subsystem as noted on the following page.

Statement	*Level of <u>Consensus</u>
"A 'completer' is defined as a student whose educational objective is completed culminat- ing in a degree, certificate, selected courses, or portions of selected courses."	1.5
"A student follow-up system should provide for methods of recognizing the need for specific curriculum revisions."	1.2
"A follow-up system should <u>emphasize</u> the col- lection of data which will reflect needed institutional changes."	1.8
"A student follow-up system should emphasize the collection of data which reflects the student's <u>opinion</u> of the local institution."	2.3
"The student's opinion of whether the college fulfilled his or her educational needs is one of the most important types of follow-up information to be obtained."	2.0
"An immediate follow-up should be initiated on students who complete a semester but do not enroll the following <u>long</u> enrollment period."	2.0
"A 'stop-out' is defined as a student who temporarily terminates his formal educa- tional pursuits with full intentions of continuing at a later date."	1.7
"A 'drop-out' is any student who leaves col- lege prior to achieving his or her stated objective, with no intention of returning."	1.6
The two questionnaires on the following pages r	enregent on

The two questionnaires on the following pages represent an effort to collect information from a cross-section of students who have university transfer and/or occupational/technical educational intentions. The first questionnaire (pink) is designed for both groups of students and has common questions to the

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

III-2

second questionnaire (blue) which is designed only for students with occupational/technical intentions. Also, the blue questionnaire facilitates the follow-up of occupational/technical nonreturning students who have completed enough of the training program to be considered as having the potential for functioning (in an effective manner) in one of the jobs for which the program was intended to train and/or educate individuals. As stated previously, both questionnaires have been designed to facilitate a mail-out survey. For a more detailed description of areas related to this subsystem, SIS's "Procedures Manual" and the following subcontractor reports should be consulted:

<u>Exit Interviews</u> by Alvin Community College <u>Representative Sampling</u> by College of the Mainland <u>Follow-up Methodology</u> by Del Mar College <u>Educational Goals and Student Flow</u> by Western Texas College

Also, additional questionnaires for the follow-up of nonreturning students can be found in the Del Mar College, College of the Mainland, and Alvin Community College subcontractor reports.

TEX-SIS Subsystem IV Activities Manual (AM)

SUBSYSTEM IV GRADUATE FOLLOW-UP

<u>Population:</u> May include those students who complete degree or certificate/diploma programs (both univer- sity transfer/academic and occupational/technical) documented in the college catalog.							
Suggested Questionnaires:							
(GRAD-1) 1st Year Graduate (F04-1-G) Green							
(GRAD-3) 3rd Year Graduate (F04-3-B) Gray							
(GRAD-5) 5th Year Graduate (F04-5-C) Gold							

Subsystem IV is concerned with the collection of information from program graduates (both university transfer/academic and occupational/technical). The three questionnaires facilitate first, third, and fifth year follow-up studies while satisfying the collection of information from occupational/technical program graduates (first year) for State follow-up reporting. For a detailed discussion of the operation of this subsystem, SIS's "Procedures Manual" and the subcontractor report titled <u>Graduate Follow-up</u> by San Antonio College should be consulted.

Instrument Development Rationale

Since the graduate study is the most frequent type of follow-up study conducted by community/junior colleges, it was felt that a significant amount of data should be collected from this population. The importance of a graduate follow-up study is further emphasized by the realization of the length of time the program graduate has been involved with an institution. The three questionnaires are, by necessity, designed for a mailout survey and are the result of conclusions drawn from the SCOS-DELPHI study. As can be seen, the SCOS-DELPHI study provided guidelines for the development of this subsystem by noting:

<u>Statement</u>

*Level of <u>Consensus</u>

"Occupational/technical students should be followed-up the same length of time as academic students."

2.1

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

IV-1

"Both information received from the student and from his employer should be analyzed in determining whether job skill requirements have been met."	1.2
"A student follow-up system should provide for methods of recognizing the need for specific curriculum revisions."	1.2
"Program graduates should be followed up at the end of the first, third, and fifth year."	2.9
"A follow-up system should <u>emphasize</u> the collection of data which will reflect needed institutional changes."	1.8
"A student follow-up system should emplasize the collection of data which reflects the student's opinion of the local institution."	2.3
"Information regarding a student's salary should be retrieved."	2.7

The three questionnaires on the following pages represent an effort to collect information from first year graduates (green instrument), third year graduates (gray instrument), and fifth year graduates (gold instrument). All questionnaires facilitate the implementation of a mail-out survey of both university transfer/academic and occupational/technical graduates by utilizing the same questionnaire. Also, the first year graduate questionnaire contains questions which reply specifically to State follow-up reporting. For a more detailed description of areas related to this subsystem, the following subcontractor reports should be consulted:

<u>Follow-up Methodology</u> by Del Mar College <u>Graduate Follow-up</u> by San Antonio College <u>Employer Follow-up</u> by Amarillo College

Also, additional questionnaires for the follow-up of graduates can be found in the Del Mar College and San Antonio College subcontractor reports.

EMPLOYER FOLLOW-UP

n an tha an t

TEX-SIS Subsystem V Activities Manual (AM)

SUBSYSTEM V EMPLOYER FOLLOW-UP

<u>Population:</u> May include those employers of occupational/technical program graduates who have responded to a graduate follow-up survey.

Suggested Instrumentation: (EMP) Employer (F05-1-E) Tan

Subsystem V is concerned with the collection of information from employers of students who have graduated from an occupational/ technical program offered by the college. The list of employer addresses can be obtained from a graduate survey in which this information is solicited. For a detailed discussion of the operation of this subsystem, SIS's "Procedures Manual" and the subcontractor report titled <u>Employer Follow-up</u> by Amarillo College should be consulted.

Instrument Development Rationale

The employer subsystem is the only SIS subsystem which is concerned with a population other than former college students. Realizing this and the potential impact of an employer followup on the operation of the college's programs, a questionnaire was designed which seemed lengthy enough to gather a significant amount of data and short enough to yield meaningful response rates. Of course, because of the population, the questionnaire had to be designed for a mail-out type survey although some success has been experienced with personal interviews of employers. The SCOS-DELPHI study provided guidelines for the development of this subsystem as noted below:

Statement

*Level of <u>Consensus</u>

"Occupational-technical advisory committees should be involved in the student follow-up process."

2.5

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

"Both information received from the student and from his employer should be analyzed in determining whether job skill requirements have been met." 1.2 "A student follow-up system should provide for methods of recognizing the need for specific curriculum revisions." 1.2 "A follow-up system should <u>emphasize</u> the collection of data which will reflect needed institutional changes. 1.8

The questionnaire on the following page represents an effort to collect information from employers of program graduates. Of course, the employer survey can only be initiated after some type of survey is conducted to find out the names and addresses of the firms or businesses which are employing program graduates. After this information is obtained, the appropriate documentation can be entered on the employer questionnaire for program identification purposes. As stated previously, a detailed description of areas related to this subsystem is contained in Amarillo College's <u>Employer Follow-up</u> and SIS's "Procedures Manual."

ADULT AND CONTINUING ED. FOLLOW-UP

,

TEX-SIS Subsystem VI Activities Manual (AM)

SUBSYSTEM VI ADULT AND CONTINUING EDUCATION FOLLOW-UP

Population: May include students who complete preparatory, supplemental, and/or other adult and continuing education courses. Suggested Instrumentation:

(A/CE-PREP) A/CE Preparatory (F06-1-B) Natural (A/CE-SUPP) A/CE Supplemental (F06-2-B) Yellow

(A/CE-OTH) A/CE Other (F06-3-C) Red

Subsystem VI is concerned with the collection of information from students who complete certain adult and continuing education courses. The need for this subsystem, which is perhaps the most controversial SIS subsystem, has been discussed at length several times. However, it was felt that SIS should include the A/CE documentation for those individuals who feel that the follow-up of adult and continuing education students is appropriate. For a detailed discussion of the operation of this subsystem, SIS's "Procedures Manual" should be consulted.

Instrument Development Rationale

For reasons previously discussed, it was felt that the questionnaires should be kept as short as possible, allowing the flexibility to follow-up different A/CE populations. This concept is demonstrated on the following pages with three short form questionnaires. As can be seen by the below SCOS-DELPHI statements, there was no definitive consensus developed regarding the follow-up of adult and continuing education students.

> *Level of <u>Consensus</u>

> > 4.4

Statement

"A comprehensive adult and continuing education follow-up subsystem would not be a practical component in a total college follow-up system."

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

VI-1

"It is not practical to follow-up adult and continuing education students in cultural/ recreational and personal type classes." 3.6

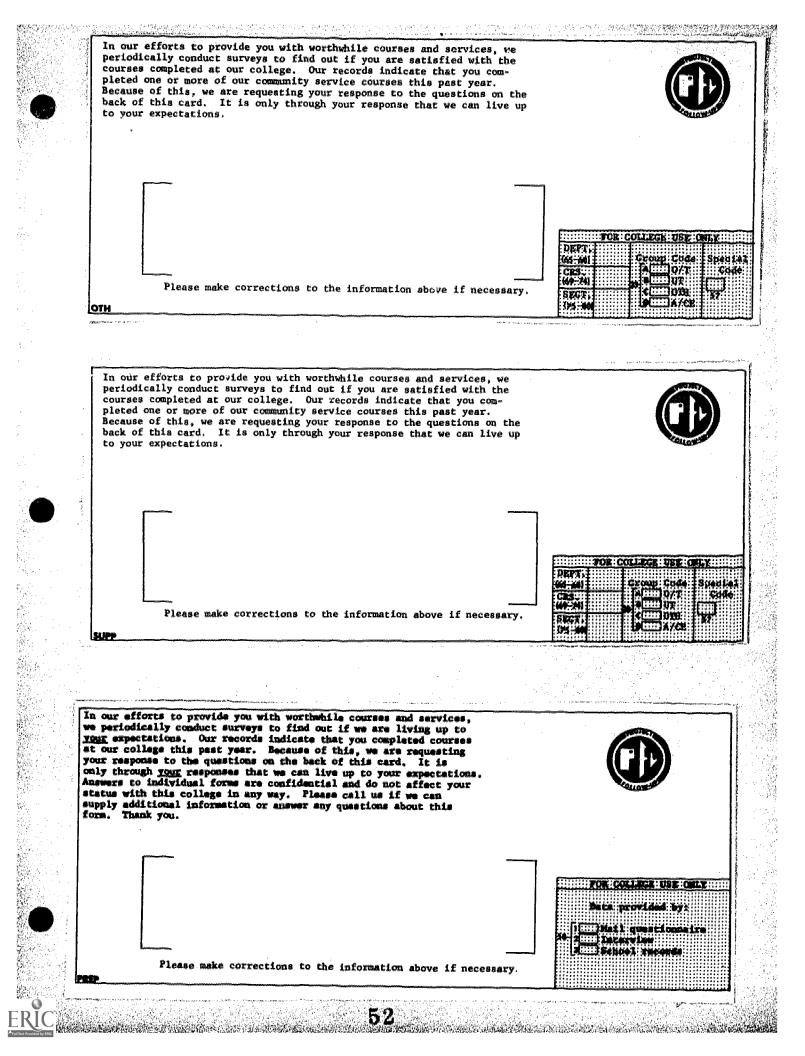

"Adult and continuing education follow-up should be given a lower priority than regular credit students in a follow-up system." 3.6

"Students enrolled in classes with a Continuing Education Unit (CEU) designation should be the only adult and continuing education students to be followed-up." 5.0

The three questionnaires on the following pages represent an effort to collect information from students who complete certain adult and continuing education courses. The first questionnaire (natural color) is designed for the follow-up of A/CE preparatory course completers and is similar to the questionnaire designed for State follow-up reporting. The second questionnaire (yellow) is designed for supplemental course completers while the third questionnaire (red) is designed for completers of other A/CE courses. The questionnaires facilitate a mail-out type survey although many colleges choose to implement this type of survey on the last class day of the course. Of course, if an institution desires to conduct an adult preparatory student follow-up survey for State reporting purposes, a mail-out survey must be conducted. As stated previously, more details regarding the operation of this subsystem can be found in SIS's "Procedures Manual."

STATE FOLLOW-UP REPORTING

.

TEX-SIS Subsystem VII Activities Manual (AM)

SUBSYSTEM VII STATE FOLLOW-UP REPORTING

<u>Population:</u> May include students who can be identified as occupational/technical program "completers" as defined by the Department of Health, Education and Welfare's follow-up report form.

 Suggested Instrumentation:

 (SFR) State Follow-up Reporting (F07-1-C) Green or

 (GRAD-1) 1st Year Graduate (F04-1-G)

 (OCC/TECH) Occupational/Technical Nonreturning Student (F03-2-C) or (NRS) Nonreturning Student (F03-1-E)

 (A/CE-PREP) A/CE Preparatory (F06-1-B)

Subsystem VII is concerned with the follow-up of students who can be identified as occupational/technical program "completers" as defined below by the Department of Health, Education, and Welfare. Follow-up data is specifically requested on students who:

- (1) "Successfully completed the required sequence of vocational instruction in their programs of study and graduated."
- (2) "Completed the vocational program requirements and left school at the end of the year, without graduating."
- (3) "Terminated their training in a program prior to normal completion time but who have gained marketable skills and have been employed full time in the field for which they have been trained."

The concept displayed in this subsystem is one based on the fact that an institution may desire to collect information for local use beyond what is required for State reporting purposes. For this reason, colleges have the option of selecting a single "State" questionnaire or various other SIS questionnaires for securing follow-up data. For a detailed discussion of this subsystem, SIS's "Procedures Manual" should be consulted.

VII-1

Instrument Development Rationale

From a detailed review of the follow-up information requested at the State and Federal level, several data elements can be delineated. The exact wording of the questions found on the questionnaire on the following page represents an effort to respond to State and Federal follow-up information needs in a valid and forthright manner. The mechanism for the operation of this subsystem has been derived from the below SCOS-DELPHI statements:

Statement	*Level of <u>Consensus</u>
"Each individual institution should develop its own methods for local collection, analy- sis and reporting of follow-up information based on uniform (statewide) procedural guidelines."	2.4
"The State should develop a plan to promul- gate significant follow-up studies to inter- ested institutions."	2.2
"A student follow-up system should <u>emphasize</u> the collection of data which will be bene- ficial for statewide planning and coordina- tion."	2.6
"Standardized, statewide follow-up question- naires should be designed for local insti- tutional use."	2.9
The questions on the following pages collect on	lv that in-

The questions on the following pages collect only that information for State follow-up reporting purposes. Of course, as previously stated, a college may choose to collect both State <u>and</u> local data at the same time the State data is collected. By a review of the questionnaires previously mentioned, one can see that the "State" questions are consistent from one questionnaire to the next. Specifically, the questionnaire response items which, when answered, facilitate the completion of State and Federal follow-up report forms are shown on the following pages.

*Note: Level of consensus is determined by a scale of 1 through 7 with the lower number indicating complete agreement.

n de Second

- <u>coding</u>: The specification of the different types of student populations, courses, programs, and other categories for use in processing data.
- <u>completion code</u>: Follow-up code designation used to designate a college degree program by alphabetical character according to the below table:
 - A Associate in Arts
 - B Associate in Applied Arts
 - C Associate in Arts and Sciences
 - D Associate in Applied Arts and Sciences
 - E Associate in Business
 - F Associate in Applied Engineering
 - G Associate in Engineering Science
 - H Associate in General Education
 - I Associate in Science
 - J Associate of Science in Technology
 - K Associate in Applied Science
 - L Diploma
 - M Certificate
 - N Associate in Fine Arts
- <u>completer</u>: A student whose educational objective is completed culminating in a degree, certificate, selected courses, or portions of selected courses.
- 4. <u>course type code:</u> TEA occupational/technical follow-up code used to specify (1) Coop type instructional programs (in which college credit is given for on-the-job training),
 (2) <u>Non-Coop</u> type instructional programs, and (3) <u>Preparatory</u> instruction (used to designate adult preparatory courses).
- 5. <u>drop-out:</u> Any student who leaves college prior to achieving his or her stated objective, with no intentions of returning.
- 6. <u>educational intent:</u> That objective which a student expects to attain during the course of his or her time spent at the respective educational institution.

VIII-1

- 7. <u>exit interview</u>: The procedure whereby institutional contact is made with a student leaving the college (graduate or withdrawal) for the purpose of collecting follow-up information.
- 8. <u>follow-up cycling</u>: That procedure concerning the periodic recurrence and/or alternating of specific types of followup activity.
- 9. <u>follow-up instrument:</u> A data input device whose function is to record student follow-up information.
- <u>follow-up orientation</u>: That procedure which makes the student aware of follow-up activity which may be occurring at a later date.
- 11. graduate: A student who completes a formal program documented in the college catalog.
- 12. group code: Follow-up code designation used to specify different categories of majors or instructional offerings such as occupational/technical (0/T), university transfer/ academic (UT), other majors such as undecideds (OTH), and adult and continuing education (A/CE).
- 13. <u>level code</u>: TEA occupational/technical code used to specify regular postsecondary college credit programs or adult programs.
- 14. <u>major field code</u>: Follow-up code designation used to specify the student's major field of study or area of concentration.
- 15. <u>no-show:</u> A student who completes the registration process but never "shows up" for class(es).
- 16. <u>nonreturning student</u>: A nongraduate who, having completed an enrollment period, does not return for a subsequent enrollment period of the type previously completed.
- 17. <u>occupational-technical program enrollee</u>: A student with an occupational/technical major whose stated educational intent is "improvement of existing job skills," or "preparation for job to be obtained."
- 18. <u>partial completer</u>: A student who has partially completed his or her educational objective.

- 19. <u>special code:</u> Follow-up code designation which can be used to distinguish between different campuses, extension centers, special student groupings, etc. Code used can be letters (A,B,C, etc.) or numbers (1,2,3, etc.). This code designation cannot exceed one digit.
- 20. <u>stop-out:</u> A student who temporarily terminates his formal educational pursuits with full indications of continuing at a later date.
- 21. <u>student follow-up</u>: That procedure which collects and documents status and/or opinion information from former students as well as students who do not complete the course(s) for which they enroll.
- 22. <u>target population code:</u> TEA occupational/technical followup code used to specify (1) regular (REG) college credit postsecondary programs, (2) programs specifically supported by vocational funds for educationally disadvantaged (DAVT) students, and (3) programs specifically supported by vocational funds for handicapped (HNCP) students.
- 23. <u>term date:</u> The specification of the last month and year of a student's enrollment for data analysis. The Mo (month) designation should be entered as appropriate (01, 02,.... 12) with the Yr (year) designation entered as 76, 77, etc.
- 23. <u>walk-off:</u> The student who stops attending class(es) or college and does not follow the college's standard with-drawal procedure.

PRINTING SIS QUESTIONNAIRES

As can be seen in the back pocket of this Manual, questionnaire "printing masters" are provided for a college to print its own questionnaires. The name of the college should be added in the space provided (see questionnaires included in this Manual for space with the "TEX-SIS Follow-up" designation). The appropriate semester in which the study is concentrated should also be added after the SEM (semester) designation. In addition to the above, the course withdrawal card requires the completion of "Example A" according to how the college specifies its department, course, and section numbers. For aesthetic purposes, it is advisable to use "rub-on" letters or varitype to add the name of the college and semester designation to the question-SIS also recommends that the college continue the connaires. cept of color-coding the questionnaires by printing on paper stock which matches the colors of the questionnaires in this The paper stock should be heavy enough to prevent both Manual. printed sides from "showing through" to the other side.
