It is the policy of the Iowa Department of Education not to discriminate on the basis of race, creed, color, sexual orientation, gender identity, national origin, sex, disability, religion, age, political party affiliation, or actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the Iowa Code sections 216.9 and 256.10(2), Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. § 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, et seq.), Title IX (Educational Amendments, 20 U.S.C. §§ 1681 – 1688), Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and the Americans with Disabilities Act (42 U.S.C. § 12101, et seq.). If you have questions or complaints related to compliance with this policy by the Iowa Department of Education, please contact the legal counsel for the Iowa Department of Education, Grimes State Office Building, 400 E. 14th Street, Des Moines, IA 50319-0146, telephone number: 515-281-5295, or the Director of the Office for Civil Rights, U.S. Department of Education, Citigroup Center, 500 W. Madison Street, Suite 1475, Chicago, IL 60661-4544, telephone number: 312-730-1560, FAX number: 312-730-1576, TDD number: 877-521-2172, email: OCR.Chicago@ed.gov.

Executive Summary

The Iowa Department of Education collects information on joint enrollment in Iowa's 15 community colleges. Jointly enrolled students are high school students enrolled in community college credit coursework. Most jointly enrolled students enroll through Senior Year Plus (SYP) programs such as Postsecondary Enrollment Options (PSEO) and concurrent enrollment. Other students enroll independently as tuition-paying students, or enroll in courses delivered through contractual agreements that do not meet the definition of concurrent enrollment. For more information about SYP programs, please refer to the department's [website](#).

This report consists of fiscal year and trend data on joint enrollment, including headcount enrollment, credit hours, student demographics, and enrollment by program type and offering arrangement. All data included in this report is taken from the Community College Management Information System (MIS) and confirmed by each college, unless otherwise noted.

Some of the highlights of this report include:

- Iowa ranks first among the fifty states in providing college-level coursework to high school students. Enrollment of students under the age of 18 at Iowa's community colleges far outpaces the average enrollment of similar students at community colleges and four-year public institutions nation-wide.
- Enrollment increased from 40,262 students last year to 42,996 this year, a 6.8 percent increase. Twelve community colleges experienced increased enrollments: three experienced declines.
- Average annual growth over the last five was 2.3 percent.
- High school students participating in joint enrollment programs accounted for approximately 30 percent of total community college enrollment. About half the participants were high school seniors; about one-third were juniors.
- Joint enrollment programs account for 17.3 percent of total credit hours.
- Among high school students, 88 percent participated in joint enrollment courses delivered through a contractual agreement between a community college and school district. PSEO courses accounted for about seven percent of total joint enrollment.
- Slightly more than 50 percent of participants in joint enrollment programs were male, compared to 45 percent for total credit student enrollment.
- Over 13 percent of participants in joint enrollment programs had a minority racial or ethnic background.
- The most common subject areas in which students jointly enrolled include social science and history, English, mathematics, science, and healthcare.

Joint Enrollment

Each year, tens of thousands of Iowa high school students enroll in community college credit coursework. The Department of Education refers to these students as “jointly enrolled.”

In Iowa, high school students enroll in community college credit courses in a variety of ways including through Postsecondary Enrollment Option (PSEO) courses, college courses offered through a contract between a local school district and a community college, and enrollment in a college course independently as a tuition-paying student. While sometimes still referred to as “dual credit,” joint enrollment does not necessarily entail credit being issued at both the secondary and postsecondary levels. Some programs, such as PSEO and concurrent enrollment, require that credit be issued at each level, while other joint enrollment opportunities have no such requirement.

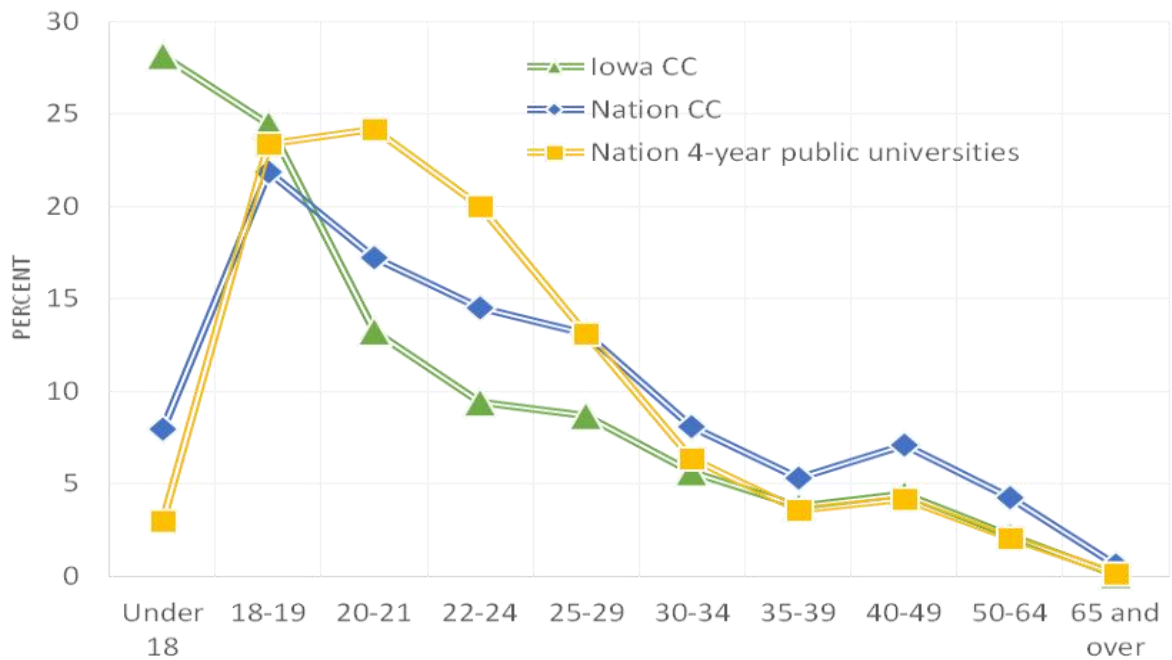

Most joint enrollment opportunities fall under the purview of Senior Year Plus. This legislation, passed in 2008, consolidated and standardized several existing programs involving college credit opportunities for high school students including PSEO, concurrent enrollment (which entails supplementary weighting for local school districts), career and regional academies, Advanced Placement®, and Project Lead the Way®.

- Joint enrollment grew to a record high of 42,996.
- Year-to-year growth was 6.8 percent.
- Participants in joint enrollment programs accounted for 30.4 percent of total enrollment.
- Joint enrollment accounted for 17.3 percent of total credit hours.
- Slightly more males were jointly enrolled than females.

Iowa ranks first among the fifty states in providing high school students access to college-credit coursework. Data on the number of students under the age of 18 enrolled in a postsecondary institution (proxy for jointly enrolled students) clearly indicates that Iowa’s community colleges enroll students of typical high school age at a significantly higher rate than community colleges and four-year postsecondary institutions nationally (Figure 1).

Joint enrollment in Iowa community colleges has risen to a record high of 42,996 unduplicated students in fiscal year

Total	302,364	300,078	303,656	310,415	336,921	8.5

(FY) 2014. In FY 2014, jointly enrolled students accounted for 30.4 percent of total enrollment - a 6.8 percent increase from the previous year. Enrollment increased at 12 community colleges and declined at three (Table 1, Figure 2). Over the past decade, joint enrollment has increased 104 percent.

Because high school students generally enroll part-time, they account for a smaller percentage of total credit hours than total enrollment (Figure 3). In FY 2014, joint enrollment accounted for 14.9 percent of total credit hours. The rate at which high school students enroll in community college coursework varies by local school district and community college region (Figure 10). The number of credit hours taken by each jointly enrolled student slightly increased, with each jointly enrolled student enrolling in an average of 7.8 credit hours (Figure 4). The number of credit hours taken

per jointly enrolled student has increased 0.4 credit hour since FY 2008.

Joint Enrollment Offering Arrangements

Contracted courses had the largest enrollment of the three types of joint enrollment offering arrangements accounting for 88.1 percent of jointly enrolled students in FY 2014. Enrollment in contracted courses rose 8.4 percent from the previous year to 39,884 students. PSEO, which accounts for 7.4 percent of joint enrollment, fell 4.5 percent from FY 2013 to a total of 3,335 students. Enrollment of tuition-paying students decreased 19.5 percent from the previous year (Figure 5, Table 4).

Joint Enrollment Student Demographics

The typical jointly enrolled student is male, a high school senior, and Caucasian. In FY 2014, approximately 50.3

Figure 3 – Joint Enrollment as a Percentage of All Credit Hours by College: 2014

percent of joint enrollees were male compared with 45 percent of the overall student body (Figure 6). In FY 2014, approximately 13.6 percent of joint enrollees reported having a minority racial or ethnic background. Tuition course enrollment had the largest proportion of minority students (14 percent) followed by contracted (13 percent) and PSEO (5 percent). Hispanics were the largest minority group with 46.2 percent of minority joint enrollment, followed by Asian and Black, students with 17.9 percent and 17.5 percent respectively (Figure 7). In comparison, 17.6 percent of all community college students reported having a minority racial or ethnic background, 37.3 percent of whom were Black and 32.9 percent Hispanic.

As expected, jointly enrolled students were younger than the overall community college student body, but very few were younger than age 17; more than 72.5 percent of jointly enrolled students were age 17 or 18.

Jointly enrolled students were almost exclusively residents of Iowa. In FY 2014, 99.4 percent of jointly enrolled students were from Iowa.

Grade Level of Joint Enrollment Students

Data on grade level is derived through a match between the state’s K-12 data repository and the Community College MIS. Figure 8 displays the distribution of high school students enrolled in Iowa community colleges during FY 2014. Jointly enrolled students tend to be high school juniors and seniors. Eighty-two percent (82%) of jointly enrolled students were in their last two years of high school. Approximately 12 percent of jointly enrolled students were sophomores in high school and six percent were freshmen. In total, 29.5 percent of public school students in grades 9-12 enrolled in a community college credit course including more than half of all seniors.

Concurrent Enrollment and PSEO by Subject Area

Unlike other sections of this report, which utilize Community College MIS data, this section is based on Student Reporting in Iowa data submitted by Iowa public school districts. The department analyzed data on the instances of concurrent enrollment and PSEO courses taken by subject area (Table 5). Courses taken by tuition-paying students enrolling independent of the district were not included.

Of instances of PSEO courses taken, 42.6 percent were in

the subject area of social sciences and history. English language and literature courses accounted for an additional 16.3 percent of courses taken. Of concurrent enrollment courses taken, the subject area with the greatest instances of courses taken was English language and literature (19.9 percent), followed by social sciences and history (14.0 percent), and mathematics courses (8.8 percent).

Table 6 presents the instances of community college career and technical education (CTE) and arts and sciences courses taken by Iowa high school students through contractual

Table 5 – Concurrent Enrollment and PSEO Courses Taken by Subject Area: 2014

Subject	PSEO		Concurrent Enrollment

agreements in FY 2014. Of courses taken through contractual agreements, 41.6 percent were classified as CTE, 58.4 percent arts and science.

Revenue from Concurrent Enrollment and PSEO

Concurrent enrollment offerings are one of several sharing opportunities incentivized by state policy. School districts may be eligible for additional funding in the form of extra weighting in the school foundation funding formula for student participation in certain programs, including concurrent enrollment. For concurrent enrollment, this supplementary weighting provides districts with funding to pay community colleges for delivery of concurrent enrollment courses.

In FY 2014, community colleges generated approximately \$21.4 million in revenue from concurrent enrollment

courses. In total, 370 high schools (duplicated) enrolled 42,996 students (unduplicated) in a concurrent enrollment course (Table 7).

Students may have an opportunity to enroll in college courses through PSEO provided the school district does not offer a comparable course (including concurrent enrollment offerings). The school district pays the eligible postsecondary institution the cost of the course or \$250, whichever is lower.

In FY 2014, community colleges generated just over \$2 million in revenue from PSEO enrollment. Over the past year, 265 high schools (duplicated) sent 3,335 students (unduplicated) to a community college for postsecondary coursework (Table 8) through PSEO.
