 IDENTIFIERS \*Computer Assisted Career Guidance

ABSTRACT

This unannotated bibliography is intended to assist practitioners, researchers, policy makers, and system developers in identifying and locating sources of information on the design and use of computer-assisted career guidance (CACG) systems appropriate for persons with disabilities. The aim of this effort is to improve the availability and quality of career and educational services to children, adolescents, and adults. A wide variety of topics relating to CACG system design for persons with a disability and the use of CACG systems by persons with a disability are covered. Examples of topics covered are: physical disability, career indecision, and CACG use; examples of disability support in community colleges; counseling and CACGs; and computer use in vocational rehabilitation. Thirty-three references ranging from 1976-1994 represent professional journals, university produced publications, documents from the ERIC database, conference papers, and books. (JBJ)

This bibliography, along with other bibliographies developed by the Center for the Study of Technology in Counseling and Career Development, is intended to assist practitioners, researchers, policy makers, and system developers in identifying and locating sources of information on the design and use of computer-assisted career guidance (CACG) systems. The ultimate aim of this effort is to improve the availability and quality of career and educational services to children, adolescents, and adults. Bibliographies are available on General CACG Issues, CACG Ethical Issues, CACG Multicultural Issues, and CACG Disability Issues. Bibliographies are also available on specific collections of CACG systems, such as the Career Information System, Career Visions, Choices, C-LECT, COIN, DISCOVER, the Guidance Information System, and SIGI PLUS.

The Disability Issues Bibliography contains citations that address a variety of topics relating to the design of CACG systems for persons with a disability and the use of CACG systems by persons with a disability. Additional information on the design and use of computer applications in vocational rehabilitation may be obtained from the Rehabilitation Technology Association, West Virginia Rehabilitation Research and Training Center, 5088 Washington Street West, Suite 200, Cross Lanes, West Virginia 25313, (304) 759-0716. General information on computer-based career information delivery systems may be obtained from the Association of Computer-Based Systems for Career Information, 5999 Stevenson Avenue, Alexandria, VA 22304-3300, (703) 823-9800 - extension 309.

Funding for computer-assisted career guidance bibliographies produced by the Center for the Study of Technology in Counseling and Career Development is currently provided by the Florida State University Career Center, College of Education, and Division of Student Affairs. Specific funding for this bibliography was provided by the Office of Special Education and Rehabilitative Services of the United States Department of Education. Previous funding for the development of bibliographies was provided by the W. K. Kellogg Foundation, the Florida Department of Education Bureau for Career Development, and the Florida State University. Appreciation is expressed to Tammy Mae Chapman, Reginald Alston, Anthony Clark, E. Jane Burkhead, and Brian T. McMahon for their contributions to previous editions of this bibliography.
