 Student Financial Aid; Teacher Salaries
 IDENTIFIERS *United States (South)

ABSTRACT

The Southern Regional Education Board (SREB) Fact Book presents the latest available information on significant national, regional, and SREB-state trends affecting higher education. Trends are presented from SREB's extensive databases on demographics, elementary/secondary education, higher education institutions and their enrollments, degrees granted, finances, student costs, financial aid, and faculty salaries. Information is also provided for the SREB states on enrollments and degrees awarded by race. Six sections focus on the following: population, education, and economy; institutions and enrollment; degrees; institutional finances; student finances; and faculty. SREB state profiles present a selection of statistics from each of the six headings, providing a convenient, at-a-glance overview of the progress and position of higher education in the region and individual SREB states. Some of the findings are as follows: over the last 10 years, full-time faculty salaries have increased faster than inflation in two-thirds of the SREB states; over the last 20 years higher education appropriations in the SREB region have increased from about 10% of state tax revenues to 16%; in the mid 1980s the number of bachelor's degrees awarded in the SREB states grew about one-half percent; and the high school graduation rate has increased during the 1980s both nationally and in the SREB states. An appendix provides SREB-state data exchange definitions of institutional categories. A list of state postsecondary education agencies is included. Contains 67 tables. (SM)

HIGHLIGHTS

- From the 1980s until the year 2000, over one-half of the nation's population growth is projected to be in the SREB states. The population growth rate in the region is projected to be one-and-one-half times greater than the nationwide rate of 7.1 percent.
- In the last 10 years the number of black students attending college has increased about 3 percent nationwide; 11 percent in the SREB region. Because of these relatively small increases, black students make up a smaller proportion of college enrollment than in the late 1970s, falling from 9.3 percent to 8.4 percent nationally and from 15.1 percent to 13.2 percent in the SREB region. Over two-thirds of black students are enrolled in predominantly white institutions of higher education.
- The high school graduation rate has increased during the 1980s, both nationally and in the SREB states. But, the 1986 national graduation rate of 72 percent and the SREB states' rate of 67 percent are below the respective 1972 levels.
- The total number of college and university students steadily increased between the late 1970s and the late 1980s despite substantial declines in the number of high school graduates. In the late 1980s there has been a brief upturn in the number of students graduating from high school, but the latest projections show that in the early 1990s another steep decline will occur. It will be close to the turn of the century before there will be as many high school graduates as there are today.
- In the mid 1980s the number of bachelor's degrees awarded in the SREB states grew about one-half percent, about 1,500 degrees a year; this was greater than the national rate of increase. Degrees in science and technology grew the fastest in the SREB states (up 8.6 percent); health professions graduates also increased, compared to a nationwide decline; and business and management degrees increased 3 percent. There were declines in the social and behavioral sciences, education, and the humanities. Women earned over half of the baccalaureate degrees. Half of the black students who were awarded bachelor's degrees attended predominantly black colleges and universities.
- Over the last 20 years higher education appropriations in the SREB region have increased from about 10 percent of state tax revenues to 16 percent. There is recent evidence that this trend is reversing. In the 1980s the regional and national trend has been that the proportion of public college and university revenues from state appropriations has declined while the proportion from tuition and fees has increased.
- Tuition and fees for in-state undergraduate students in public colleges and universities in the SREB region continue to be less than national averages for comparable institutions. State financial aid programs now provide over \$335 million in funds to students in the SREB states; about 40 percent are awarded in need-based programs, compared to 80 percent nationally.
- Over the last 10 years full-time faculty salaries have increased faster than inflation in two-thirds of the SREB states.

SREB FACT BOOK ON HIGHER EDUCATION 1988

FOREWORD

It is appropriate that the fortieth anniversary year of the Southern Regional Education Board includes publication of the *SREB Fact Book on Higher Education*. The 40 years have witnessed dramatic progress for higher education in the Southern Regional Education Board states. This *SREB Fact Book* contains evidence that progress continues. The emphasis in this 1988 edition of the biennial reports is on significant national, regional, and SREB-state trends affecting higher education. Trends are presented from SREB's extensive databases on demographics, elementary/secondary education, higher education institutions and their enrollments, degrees granted, finances, student costs, financial aid, and faculty salaries.

In addition, national data tapes provide the very latest information available for the SREB states on enrollments and degrees awarded by race. The findings are that, in most SREB states, black student enrollment and degrees awarded have grown faster than the national rate. But the national growth rate, and the rate in several SREB states, has been small, and in all cases, with the exception of the first professional level, black students are accounting for a smaller percentage of college enrollments than ten years ago. Black graduates also account for a smaller proportion of the bachelor's and master's degrees awarded; a larger proportion of associate, doctoral, and first professional degrees.

The *SREB Fact Book* attempts in every case to present the latest available information. In cases where the information must be obtained from national sources, the latest information available is sometimes not as current as we would like. Where regional information is presented, the annual SREB-State Data Exchange with state higher education agencies provides information for the year immediately preceding. The Data Exchange has been operating nearly 20 years and is widely recognized as among the most accurate and timely sources of comparative data on state higher education.

The *Fact Book* illustrates SREB's ongoing work to provide comparative data and information to member states. This biennial series exemplifies SREB's approach to comparative data. That approach is to compile as many related measures as feasible and encourage the evaluation of them to see if they all support similar conclusions, and to encourage the questioning of dramatic findings to see if they represent real differences or statistical quirks. The value of comparative information often is found to be not so much in providing immediate answers, but in raising questions that may lead to better state policies and procedures.

SREB expresses appreciation to state higher education agencies in the SREB region for their assistance in compiling much of the *Fact Book* information and to several federal agencies as well, including the Atlanta Regional Office of the U.S. Bureau of the Census, the U.S. Bureau of Health Professions, the U.S. Bureau of Health Care Delivery and Assistance, and various offices of the Department of Education, including Student Financial Assistance, Postsecondary Education, and the National Center for Education Statistics.

Suggestions and comments concerning the *SREB Fact Book* are welcomed.

Winfred L. Godwin
President

SREB STATE PROFILES 1988

The *SREB Fact Book on Higher Education, 1988* contains 67 tables presenting the latest available statistics for the United States, the SREB region, and the 15 SREB states individually. Organized under six headings, the tables include trend data helpful to higher education planners and decision-makers.

The "SREB State Profiles," (pages 2 through 7) present a selection of statistics from each of the six headings: *population, education, and economy; institutions and enrollment; degrees; institutional finances; student finances; and faculty*. The numbers in parentheses refer to the particular tables elsewhere in the *SREB Fact Book* that contain more complete information and a full citation of sources.

These profiles provide a convenient "at-a-glance" overview of the progress and position of higher education in the region and individual SREB states. The reader should be careful to take into account the wide range of interstate differences that can affect the comparability and relative rankings of the data. While the degree of reliability and comparability of higher education data has improved successively over the years, such data should always be viewed carefully when comparisons are made among a number of states. SREB's approach to comparative data is to compile as many related measures as feasible and evaluate them to see if they all support similar conclusions, and to question dramatic findings to see if they represent real differences or statistical quirks. SREB staff assistance is available to states where the information contained in the report may lead to questions and discussion about education trends in the region.

* Clayton Junior Col. became Clayton State College, a four-year institution.

NOTE: See Appendix 10. SREB definitions of institutional categories.

SECTION 1 POPULATION, EDUCATION, AND ECONOMY

**PROJECTED POPULATION GROWTH, BY AGE GROUP
UNITED STATES AND SREB STATES, 1980 TO 2000**

SOURCES: U.S. Bureau of the Census, *Current Population Reports*, Series P-25, forthcoming (1988); Series P-25, No. 1010, "State Population and Household Estimates, With Age, Sex, and Components of Change: 1981-86," (1987) (Washington, D.C.: U.S. Government Printing Office).

POPULATION, EDUCATION, AND ECONOMY

Highlights

● In 1987 over one-third of the nation's population (nearly 83 million people) lived in the SREB region. Between 1980 and the year 2000 over one-half of the nation's growth in population is projected to be in the SREB states. The rate of growth in the SREB region between 1980 and 2000 is projected to be over one-and-one-half times greater than the national growth rate. Florida, Georgia, North Carolina, and Texas are expected to lead the region's growth, along with Maryland, South Carolina, and Virginia (see preceding graph and Table 1).

● Both nationally and in the SREB region, the "aging" of the population will be a larger societal factor by the year 2000. Between 1990 and the year 2000, the percentage of the population 45 years of age and older will increase while the percentage of 4 years of age and younger will decline. (see Table 3).

● In 1987 the number of public elementary and secondary school students in the SREB states approached 14.5 million, representing a slight percentage increase in the past 10 years in contrast to a national decrease of 8 percent. The growth in the number of public school students over the last 10 years was concentrated in three SREB states—Florida, Georgia, and Texas; there was slight growth in Mississippi and Oklahoma; the other 10 SREB states all experienced declines. In four SREB states (Maryland, North Carolina, Virginia, and West Virginia) the rate of decrease was greater than the national average (see Table 4).

● The high school graduation rate—the number of high school graduates related to the number of 9th-graders four years earlier—increased between 1982 and 1986, both nationally and in the SREB region. However, the 1986 national graduation rate of 72 percent and the SREB region's rate of 67 percent are below the 1972 levels (see Table 4).

● In 1986-87 nearly 800,000 students graduated from public high schools in the SREB region, less than were graduating in the early 1980s. As the year 2000 approaches, the number of high school graduates is expected to rise on average 11 percent nationally and 10 percent in the SREB region. The growth in the number of high school graduates in the SREB region is expected to be concentrated in Florida, Georgia, Louisiana, Oklahoma, Texas, and Virginia. Five SREB states (Alabama, Arkansas, Kentucky, North Carolina, and West Virginia) are expected to have declines in the number of high school graduates (see Table 5).

- The per capita personal income level in the SREB states in 1987 was \$13,789, almost \$1,700 below the United States average of \$15,481. Only in Florida, Maryland, and Virginia did per capita personal income exceed the national average. Based on the latest revised figures, the per capita income average in the SREB region moved closer to the national average in every decade from 1947 to 1987, rising from 73 percent of the national average to 89 percent (see Table 6).
- State and local government tax revenues rose faster than personal income between 1984 and 1986, both nationwide and in the SREB states. The SREB states' increase of 19.8 percent in tax revenues was above the national increase of 16.5 percent, but the personal income increase of 13.3 percent was slightly below the national increase of 13.6 percent. Tax revenues per \$1,000 of personal income stood at \$96 in 1986 in the SREB states, \$10 below the national average of \$106 (see Table 7).
- Per capita state and local government expenditures in the SREB states averaged \$2,518 in 1986, 84.5 percent of the United States average. Since 1970 the average for the SREB states has moved closer to the national average, although a considerable gap remains (see Table 9).

SECTION 2

INSTITUTIONS AND ENROLLMENT

SOURCES: SREB analysis of National Center for Education Statistics data tapes of fall enrollments in higher education, 1976 to 1987; *High School Graduates: Projections by State, 1986 to 2004* (1988) (Boulder, CO: Western Interstate Commission for Higher Education).

INSTITUTIONS AND ENROLLMENT

Highlights

The enrollment information presented here comes from two sources: the annual SREB-State Data Exchange and SREB's analysis of National Center for Education Statistics (NCES) data tapes containing fall headcount information from the Higher Education General Information Surveys (HEGIS) and Integrated Postsecondary Education Data Surveys (IPEDS). The SREB-State Data Exchange is the source of the most current, 1987-88, information for each of the SREB states. In this section, presented for the first time, are headcount enrollment data with breakdowns by race and sex for the SREB states. The information was compiled from the NCES data tapes for fall 1986.

- Approximately 12.7 million students are enrolled in colleges and universities nationwide (77 percent in public institutions) and 3.6 million in the SREB states (84 percent in public institutions). Total headcount enrollment in colleges and universities grew steadily between 1976 and 1986. This is remarkable, since the number of high school students graduating annually—traditionally the major recruiting pool for colleges and universities—fell 387,000 nationwide and 49,000 in the SREB region over this 10-year period; given the cumulative effect of the annual declines, this increase in college enrollment is especially significant. Between 1985 and 1988 there was an upturn in the number of high school graduates, but by 1993 there will be 200,000 fewer high school graduates nationally and 37,000 fewer in the SREB states than in 1988. The numbers of high school graduates will begin to increase after 1993, but it will be 1997 before the total number exceeds the 1988 level (see Tables 5 and 13).

- Nearly 9 of every 10 first-time college students attend college in their home state. And, nearly every SREB state has more out-of-state students enrolling in its colleges and universities than it has residents leaving to enroll in higher education institutions in other states (see Table 12).

- The SREB states differ considerably in the distribution of their college students across the various types of institutions of higher education. States with similar total higher education full-time-equivalent enrollments may have very different distributions. For example, in Louisiana, which has a full-time-equivalent enrollment of 131,000 students, over half are in doctoral-granting universities; in Georgia, with an enrollment of 141,000, less than 40 percent of the students are in doctoral-granting institutions. In Virginia, with a total enrollment of over 185,000 students, about one-third are in two-year colleges; in Florida with a total of nearly 226,000, well over one-half of the students are in two-year colleges. The different state systems and the enrollment patterns they create have significant cost and expenditure implications (see Table 10).

- Students enrolled in two-year colleges, about 95 percent of whom are in public institutions, now account for more than one-third of students in higher education nationwide and in the SREB states. Since 1976, two-year college enrollments have increased 20 percent nationwide while rising 43 percent in the SREB region (see Table 15).

- The number of students enrolled in undergraduate two-year and four-year programs nationwide, 86 percent of whom are in public institutions, grew nearly 15 percent between 1976 and 1986. In the SREB region undergraduate enrollment grew over 26 percent, most of which was concentrated in three states—Florida (38 percent increase), North Carolina (31 percent increase), and Virginia (26 percent increase) (see Table 18).
- The number of graduate students increased over 24 percent in the SREB states between 1976 and 1986 compared to a national increase of 8 percent. Florida, Oklahoma, Texas, and Virginia had increases in graduate enrollment above the regional average (see Table 19).
- First professional enrollment—enrollment in the fields of chiropractic, dentistry, law, medicine, optometry, osteopathic medicine, pharmacy, podiatry, professional theology, and veterinary medicine—increased by one-third in the SREB region between 1976 and 1986 while increasing just over 11 percent nationally. Six SREB states (Florida, Georgia, North Carolina, South Carolina, Texas, and Virginia) had increases above the regional average (see Table 20).
- Part-time students now comprise more than 4 of every 10 students nationwide and in the SREB region. The *part-time* enrollment increases of nearly 26 percent nationwide and of nearly 52 percent in the SREB region between 1976 and 1986 are about two times greater than the respective increases in *total* enrollment of 14 percent and 27 percent (see Table 21).
- Women represent 53.0 percent of all students in higher education nationally and slightly more, 53.5 percent, in the SREB states. The number of women enrolling in colleges and universities increased almost 28 percent nationwide between 1976 and 1986 and over 37 percent in the SREB states. Florida, North Carolina, and Texas showed the greatest increases in the number of women enrolled (see Table 22).
- The enrollment of black students increased 3.1 percent nationally between 1976 and 1986. Over the same period, the number of black students grew 10.8 percent in the SREB region. In four SREB states (Kentucky, Maryland, Mississippi, and West Virginia) fewer black students were enrolled in colleges and universities in 1986 than were enrolled in 1976. Both nationally and in the SREB region the representation of black students declined: from 9.3 percent of enrollment nationwide in 1976 to 8.4 percent in 1986; and from 15.1 percent of enrollment in the SREB region in 1976 to 13.2 percent in 1986. Only at the first professional level of study has the representation of black students increased—now 5.1 percent nationally and 6.7 percent in the SREB region (see Table 23).
- There were 46 percent more Hispanic students attending college nationwide in 1986 than in 1976. In the SREB states Hispanic enrollment increased 89 percent. Hispanic representation has risen from 4.3 percent in 1976 to 6.0 percent of enrollment nationwide in 1986 and from 3.5 percent in 1976 to 5.2 percent in 1986 in the SREB states. Hispanic representation is increasing at the undergraduate, graduate, and first professional levels of study (see Table 24).

West Virginia	50,290	14,314	8,701	2,551

"..." Indicates not applicable.

NOTES: See Appendix for SREB definitions of institutional categories. Full-time-equivalent enrollments (FTE) are calculated according to the following procedure: first, undergraduate credit-hour FTE equals undergraduate credit hours divided by 15; second, undergraduate contact-hour FTE equals undergraduate weekly contact hours divided by 30; third, undergraduate FTE equals the sum of undergraduate credit-hour and contact-hour FTE; fourth, graduate FTE (including law students) equals graduate credit hours divided by 12. Data for Two-Year IV institutions in Arkansas, Florida, and West Virginia were not reported.

SOURCE: SREB-State Data Exchange, 1987-88.

Virginia	18,082	4.6	17,367	0.5
West Virginia	6,976	21.6

"..." Indicates not applicable.

* Predominantly black institutions are those in which black students comprise more than 50 percent of total enrollment. Historically black institutions are those founded as institutions for black students. In some states (Louisiana, Mississippi, and Oklahoma) the predominantly black and historically black institutions are the same. In some other states (Kentucky and West Virginia) there are institutions that were founded as institutions for black students which are no longer predominantly black. In some states institutions which were not founded as colleges for black students currently have predominantly black enrollment.

"..." Complete data for 1984-85 was not available.

* Includes allopathic medicine only.

** The total number of residents in all accredited residency programs in the United States as of September 1, 1987 was 81,410—of that number, 53,894 were in residency programs supervised by faculty of United States medical schools. The number of residents shown for the SREB region and each SREB state represents only those under the supervision of United States medical school faculty.

SECTION 3 DEGREES

SOURCE: SREB analysis of National Center for Education Statistics data tapes of earned degrees and other awards, 1976-77 to 1984-85.

DEGREES

Highlights

The information presented here on degrees conferred comes from two sources: the annual SREB-State Data Exchange and SREB's analysis of National Center for Education Statistics (NCES) data tapes containing the earned degrees information from the Higher Education General Information Survey (HEGIS) and Integrated Postsecondary Education Data Survey (IPEDS). The SREB-State Data Exchange is the source of the most current, 1986-87, information. Published here, for the first time, are the SREB-state data for 1984-85 by race and sex; this information was compiled from the NCES data tapes. The trends in the numbers of degrees awarded to black students cover the period 1976-77 to 1984-85; the trends on degrees conferred to men and women cover the period 1982-83 to 1984-85.

- The number of associate degrees and other formal awards of less than four years has risen to over 162,000 in the SREB region. The increase in the SREB states (2.6 percent) was greater than that for the nation (see Table 28). Black students earned 14 percent of the associate degrees and other formal awards of less than four years in the SREB region. Over an eight-year period, the number of degrees at this level awarded to black students rose 41 percent compared to an overall (all races) growth rate of 28 percent (see Table 29).
- In recent years the number of bachelor's degrees awarded in SREB states has increased very slightly, only about 1,500 a year, to over 281,000. Even this rate of increase has been greater than the nationwide rate (see Table 30). At the baccalaureate level, science and technology degrees increased the fastest in the SREB states (8.6 percent compared to a national increase of 8.8 percent). Health professions degrees increased 3.4 percent in the SREB states; nationally there was a slight decline. Business and management was another growth area, with regional and national increases of 3 percent. Social and behavioral sciences, education, and the humanities had declining numbers of graduates (see Table 32).
- Black students received 28,664 bachelor's degrees in the SREB region. Half of these degrees were granted by predominantly black institutions of higher education. In the mid 1980s there was a nationwide decline of almost 2 percent in the number of black students earning bachelor's degrees, in contrast to the trend in the SREB states where the numbers increased over 2 percent. The rate of growth in the total (all races) number of bachelor's degrees has been greater than the growth rate of bachelor's degrees awarded to black students. In the SREB states black students earned just over 10 percent of the bachelor's degrees compared to over 11 percent in the late 1970s (see Table 31).

● Women accounted for nearly 57 percent of the graduates in the region earning associate degrees; up from 54 percent in 1983 (see Table 28). Almost 52 percent of the bachelor's degrees awarded in the SREB states were earned by women (see Table 30). Women accounted for 54 percent of the master's degrees in the region (see Table 33). Nearly 36 percent of doctoral degrees in the SREB region were earned by women; nationally 34 percent were earned by women (see Table 36). Women earned 31 percent of the first professional degrees (see Table 39).

● The number of master's degrees awarded in the SREB region has grown slightly, while nationally the number has declined over 1 percent (see Table 33). For master's degrees the fields of study with growing numbers were sciences and technology (11.3 percent increase), business and management (7.6 percent increase), and health professions (5.9 percent increase). Master's degrees in education fell 8.5 percent; social and behavioral science degrees fell 2.4 percent. Master's degrees in the humanities remained virtually unchanged in the SREB region but fell 5 percent nationally (see Table 35).

● The number of black students earning master's degrees has fallen by over one-third since the late 1970s when over 11 percent of master's degrees were earned by black students. By the mid 1980s black students earned less than 8 percent of the master's degrees awarded in the SREB states (see Table 34).

● Over 8,000 doctoral degrees were earned in the SREB region, up slightly in recent years (see Table 36). In the SREB region, the numbers of doctoral degrees in the fields of sciences and technology grew 7 percent; those in business and management increased 7.2 percent; and those in the humanities grew 7.1 percent. Doctoral degrees in education fell 7.4 percent and those in health professions were down 7.8 percent (see Table 38).

● Black students in the SREB region earned more doctoral degrees in the mid 1980s than in the late 1970s, almost 13 percent more. However, the numbers (1,154 nationally and 363 in the SREB states) are still relatively small and are concentrated in the field of education (56 percent). Black students comprised between 4 and 5 percent of all doctoral degrees awarded regionally (see Table 37).

● The number of "first professional" degrees (chiropractic, dentistry, law, medicine, optometry, osteopathic medicine, pharmacy, podiatry, professional theology, and veterinary medicine) increased 2.5 percent in the mid 1980s in the SREB region (see Table 39).

● The number of black students in the SREB region earning first professional degrees increased over 35 percent. In the mid 1980s over 1,000 black students earned first professional degrees—over 5 percent of the total (see Table 40).

"..." Oklahoma was not included in the SREB analysis prior to becoming an SREB member state in 1985-86.

* Predominantly black institutions are those in which black students comprise more than 50 percent of total enrollment. Historically black institutions are those founded as institutions for black students. In some states (Louisiana, Mississippi, and Oklahoma) the predominantly black and historically black institutions are the same. In some other states (Kentucky and West Virginia) there are institutions that were founded as institutions for black students which are no longer predominantly black. In some states institutions which were not founded as colleges for black students currently have predominantly black enrollment.

"..." Oklahoma was not included in the SREB analysis prior to becoming an SREB member state in 1985-86.

* Predominantly black institutions are those in which black students comprise more than 50 percent of total enrollment. Historically black institutions are those founded as institutions for black students. In some states (Louisiana, Mississippi, and Oklahoma) the predominantly black and historically black institutions are the same. In some other states (Kentucky and West Virginia) there are institutions that were founded as institutions for black students which are no longer predominantly black. In some states institutions which were not founded as colleges for black students currently have predominantly black enrollment.

NOTE: "First Professional" includes chiropractic, dentistry, law, medicine, optometry, osteopathic medicine, pharmacy, podiatry, professional theology, and veterinary medicine degrees.

INSTITUTIONAL FINANCES

STATE APPROPRIATIONS FOR HIGHER EDUCATION-RELATED OPERATING EXPENSES*

AVERAGE ANNUAL PERCENT INCREASE, 1980 TO 1988

United States 7.5%
SREB States 7.8%

AVERAGE ANNUAL PERCENT INCREASE, 1970 TO 1980

United States 11.9%
SREB States 13.8%

* See Table 44 for explanatory note.

SOURCE: M.M. Chambers and Edward R. Hines, *Appropriations of State Tax Funds for Operating Expenses of Higher Education 1969-70 (1969), and 1979-80 (1979), and 1987-88 (1987)* (Washington, D.C.: National Association of State Universities and Land-Grant Colleges)

INSTITUTIONAL FINANCES

Highlights

- For the SREB region, the states' appropriations for educational and general operating expenses of public higher education institutions in 1987-88 were \$8.4 billion. This averaged \$4,485 per full-time-equivalent student in doctoral-granting institutions; \$3,549 per full-time-equivalent student in master's and baccalaureate institutions; and \$3,371 for each full-time-equivalent student in two-year colleges including postsecondary vocational-technical schools (see Table 43).

- Total state appropriations for higher education-related operating expenses (including amounts for private higher education institutions and students, higher education coordinating and governing boards, state student aid, and health programs) topped the \$34 billion mark in the United States in 1987-88. In the SREB region, the amount was \$11.2 billion—\$135 for every man, woman, and child in the SREB states. The rate of growth between 1980 and 1988 of these state appropriations in the SREB region (7.8 percent) exceeded the nationwide growth rate of 7.5 percent. This reflects the pattern of the 1970s when the region's state appropriation growth (13.8 percent) exceeded the nation's (11.9 percent). The 1987-88 appropriation per person for the SREB region stood at 96.5 percent of the U.S. amount, down from 99.9 percent in 1980, but up from the 90.0 percent level of 1970 and the 92.1 percent level of 1960 (see Table 44).

- Over the 20 years between 1966 and 1986, state appropriations in the SREB region for higher education-related operating expenses moved from 9.9 percent of state tax revenues to 16.0 percent. Throughout this period the SREB region has appropriated a larger percent of state taxes to higher education than have states nationwide (see Table 45).

- Total "current funds" revenues and expenditures of public higher education nationwide in fiscal year 1986 were nearly \$66.9 billion. When revenues of private higher education institutions are added, the total was more than \$100 billion. In the SREB region "current funds" revenues exceeded \$21 billion for public higher education and were over \$6.9 billion for private higher education. Higher education institutions in 12 SREB states had expenditures of over \$1 billion; in 4 SREB states the amount exceeded \$2 billion (see Tables 46 and 48).

- State appropriations accounted for 42 percent of public higher education revenues nationwide in fiscal year 1986, compared to 47 percent in the SREB region. In the 1980s, both nationally and in the SREB region, the share of revenues from state appropriations has declined while the share from tuition and fees has increased. Tuition and fees, the next largest source of revenues, contributed over 14 percent nationally and over 12 percent regionally. "Educational and general support" accounts for over one-half of the expenditures (see Tables 47 and 49).

● In fiscal year 1986, the federal government pledged about \$3.3 billion dollars in grants and contracts to universities and colleges in the SREB region compared to \$2.9 billion in 1983-84. The Departments of Education and Health and Human Services pledged the largest amounts, \$1.2 billion and \$964 million, respectively. Universities and colleges in the SREB states were slated to receive approximately 43 percent of all Department of Defense contracts and grants (down about 5 percentage points from 1983-84) but only about 16 percent of National Science Foundation contracts and grants (see Table 51).

● In the 1980s, federal research and development funds to universities and colleges in the SREB states (public and private) have increased almost 69 percent, compared to a nationwide increase of 57 percent. In fiscal year 1986 over \$1.7 billion in research and development funds were pledged to colleges and universities in the SREB states (see Table 52).

West Virginia	169,160	4,635	4,635	3,038	3,470	2,671

"..." Not applicable or not available.

NOTES: See Appendix for SREB definitions of institutional categories. These figures represent appropriations of state and local tax funds for educational and general purposes, including staff benefits. Amounts for two-year institutions include state and local appropriations; amounts for doctoral, master's, and baccalaureate institutions are based on state appropriations only. Amounts exclude appropriations for capital improvements, debt service, public service, extension services, and special research centers. Appropriations per FTE are based on fall 1987 enrollment data (see Table 14). West Virginia amounts include indirect fringe benefits matching funds estimated at 16.5 percent of salary amounts. In West Virginia approximately one-third of regular student fees (\$22 million) are dedicated by law to debt retirement and capital improvements. In South Carolina also, a portion of tuition and fees revenues are dedicated to debt retirement. The inability to use these fees for operating expenses, as is the case in most states, results in higher levels of state appropriations and, to some extent, may overstate state support per student. Data for Two-Year IV Institutions in Arkansas, Florida, and West Virginia were not reported.

NOTES: "Auxiliary Enterprises" includes those essentially self-supporting operations which exist to furnish a service to students, faculty, or staff, and which charge a fee that is directly related to, although not necessarily equal to, the cost of the service. Examples are residence halls, food services, college stores, and intercollegiate athletics. Note that not all states support teaching hospitals through higher education budgets (North Carolina, for example). "All Other" includes federal appropriations (other than contracts and grants); private gifts, grants and contracts; endowment income; sales and services of educational activities; independent operations; and other sources.

NOTES: "Educational and General Support" includes academic support, student services, and institutional support. "Auxiliary Enterprises" includes those essentially self-supporting operations which exist to furnish a service to students, faculty, and staff, and which charge a fee that is directly related to, although not necessarily equal to, the cost of the service. Examples are residence halls, food services, college stores, and intercollegiate athletics. Note that not all states (North Carolina, for example) support teaching hospitals through higher education budgets. "All Other" includes scholarships and fellowships, education and general mandatory transfers, and independent operations.

West Virginia	11.6	12.0	15.7	53.4	47.8	52.9

NOTES: Many states now look at tuition policy questions by referring to tuition as a percent of "cost." "Cost" is defined in different ways as some portion of educational and general expenditures. Educational and general expenditures here include mandatory transfers - transfers of current funds made in order to fulfill a binding legal obligation, such as debt-service provisions relating to buildings and institutional matching funds for National Defense Student Loans.

SECTION 5 STUDENT FINANCES

CHANGES IN FEDERAL AND STATE-SPONSORED STUDENT AID

**STATE GRANTS
PERCENT CHANGE, 1984 TO 1988**

**FEDERAL AND STATE-SPONSORED STUDENT AID
PERCENT DISTRIBUTION, SREB STATES, 1980 AND 1988**

SOURCES: National Association of State Scholarship and Grant Programs, *Annual Survey Reports* (1984 and 1988); U.S. Department of Education, (1988) unpublished data; U.S. Bureau of Health Professions, (1988) unpublished data; and National Council of Higher Education Loan Programs, *Guarantee Agency Surveys* (1980 and 1988).

STUDENT FINANCES

Highlights

● Tuition and fees for in-state undergraduate students in public colleges and universities in the SREB states continue to be less than national averages for comparable institutions. In 1987-88, the median charge for tuition and fees for full-time in-state students attending doctoral-granting institutions was \$1,413—8.3 percent more than in 1986-87. In institutions awarding master's and baccalaureate degrees as the highest degree, full-time in-state students paid \$1,113—9.3 percent more than the previous year. In two-year colleges in the SREB region, the tuition and fee charges increased 5.3 percent to \$595 (see Table 55).

● Over \$335 million in state scholarships and grants were available in 1987-88 to students in the SREB states. About 40 percent of SREB-state grant funds were awarded in need-based programs compared to 80 percent nationally. Since 1984, funds for need-based grants increased 28 percent compared to a national increase of 35 percent and funds for non-need-based grants have increased 82 percent in the SREB region compared to a national increase of 46 percent (see Table 54).

● Nearly \$1.2 billion in federal Pell Grants were awarded to college and university students in the SREB states in 1987-88. Almost 865,000 students in the SREB states received aid through this program. Public college and university students received 56 percent of the funds; private college and university students received 14 percent; and students in proprietary (profit-seeking) postsecondary education institutions received 30 percent of the funds. In contrast, in 1980, public sector students received 67 percent; private sector students 25 percent; and proprietary sector students 8 percent of Pell Grant funds (see Table 56).

● Three other federal programs, College Work Study, Perkins Loans (formerly National Direct Student Loans) and Supplemental Educational Opportunity Grants, made \$460 million available to 536,000 students in the SREB region in 1987-88 (see Tables 58 and 59).

● Guaranteed Student Loan programs made \$1.4 billion available to over 581,000 students in the SREB states in 1986-87. Following dramatic increases in the early 1980s when some SREB states joined the program, funds through this program have increased 7.4 percent since 1984 and the number of recipients has fallen 3.3 percent (see Table 60).

"..." Indicates not applicable or data not available.

NOTES: See Appendix for SREB definitions of institutional categories. The U.S. averages are derived from Washington State Higher Education Coordinating Board data, which use different definitions of institutional categories. The amount shown for each state is the median of each state's institutions. The "Median of SREB States" refers to the medians of the state amounts for each respective category of institutions.

SOURCES: SREB-State Data Exchange, 1987-88; Washington State Higher Education Coordinating Board, 1987-88 *Tuition and Fee Rates—a National Comparison* (1988) (Olympia, Washington).

SECTION 6 FACULTY

CHANGES IN AVERAGE SALARIES FOR FULL-TIME FACULTY PUBLIC INSTITUTIONS, 1978 TO 1988

10-YEAR PERCENT INCREASE IN FACULTY SALARIES

SREB STATES (92.5%)
(CONSUMER PRICE INDEX INCREASE 86.9%)

ANNUAL PERCENTAGE INCREASES

SOURCES: SREB-State Data Exchange, 1977-78 to 1987-88; U.S. Department of Labor, unpublished data, 1988.

FACULTY

Highlights

● Over the 10-year period from 1977-78 to 1987-88, the average salary of full-time faculty members in public institutions of higher education in the SREB states increased 92.5 percent to \$33,274. In six SREB states (Florida, Georgia, North Carolina, South Carolina, Tennessee, and Virginia) salaries increased faster than this rate. The nation's overall inflation increase of almost 87 percent was about 6 percentage points less than that of the average faculty salary increase in the SREB region over the 1977-78 to 1987-88 period. Inflation increases were above salary increases in 4 years; faculty salary increases were above inflation increases in 6 years (see graphs previous page).

● The relative rankings of the average salary for full-time faculty in public four-year institutions in the SREB states do not generally fluctuate sharply from year to year, but annual changes can result in some significant changes over a decade. In the past 10 years Virginia's ranking rose from 4th to 1st, while Maryland's ranking fell from 1st to 4th, and Louisiana went from 12th place to 15th. Other states whose ranking rose were Arkansas (14th to 13th), Georgia (9th to 6th), North Carolina (5th to 3rd), and South Carolina (10th to 8th) (see Table 62).

● Salaries of faculty in land-grant universities in the fields of law, engineering, business, computer and information sciences, physical sciences, and life sciences were above the average salary for "all disciplines" in 1987-88; salaries of faculty in the fields of mathematics, psychology, social sciences, agriculture and natural resources, education, foreign languages, letters, home economics, and fine and applied arts were below the "all disciplines" average salary. Faculty in engineering, business and management, and computer and information sciences received average raises that topped the "all disciplines" increase over the past five years; faculty in all other fields did not (see Table 63).

● Full-time faculty at doctoral-granting institutions in the SREB states averaged salaries of \$37,794 in 1987-88—an increase of 5.9 percent over the previous year. In institutions awarding the master's degree as the highest award, the average faculty salary in 1987-88 was \$31,894—a 4.4 percent increase over the previous year. Faculty at institutions awarding the baccalaureate as the highest degree averaged \$29,167 a year in salary—up 5.0 percent in one year. Full-time faculty in two-year colleges averaged \$27,528 in annual salary—5.8 percent more than the previous year (see Tables 64, 65, 66, and 67).

* See Appendix for SREB definitions of institutional categories. 526 public two-year institutions are included in this analysis.

** In several states two-year college systems classify all faculty in a single rank.

† Clayton Junior College has become Clayton State College, a four-year institution.

NOTES: Salaries for SREB states are reported according to Integrated Postsecondary Education Data System (IPEDS, formerly HEGIS) definitions. Salaries reported as 11-12 month appointments have been converted to 9-10 month equivalence by reducing the reported amounts by 2/11. Salary data for Two-Year IV institutions in Arkansas, Florida, Tennessee, and West Virginia and for Two-Year III institutions in Texas were not reported.

SOURCE: SREB-State Data Exchange, 1986-87 and 1987-88.

APPENDIX

SREB-STATE DATA EXCHANGE DEFINITIONS OF INSTITUTIONAL CATEGORIES*

The purpose of this set of institutional categories is not to create a hierarchy of institutions or to rank institutions based on prestige. Rather, the categories group institutions based on factors believed to be the most relevant to determining resource requirements. Differences in institutional size (numbers of awards), role (type of awards), breadth of program offerings (number of 2-digit Classification of Instructional Programs [CIP] codes in which awards are granted), and comprehensiveness (percent of awards in 2-digit CIP categories), are the factors upon which this classification of institutions is based.

Category	Definition
Doctoral I	Institutions awarding at least 100 doctoral degrees which are distributed among at least 10 CIP categories (2-digit classification) with no more than 50 percent of the degrees in any one category.
Doctoral II	Institutions awarding at least 30 doctoral degrees, which are distributed among at least 5 CIP categories (2-digit classification).
Doctoral III	Institutions awarding at least 1 doctoral degree.
Master's I	Institutions awarding at least 100 master's, education specialist, or post-master's certificates or degrees distributed among at least 10 CIP categories (2-digit classification), excluding post-baccalaureate certificates.
Master's II	Institutions awarding at least 1 master's, education specialist, or post-master's certificate or degree, excluding post-baccalaureate certificates.
Baccalaureate	Institutions that award the baccalaureate degree as the highest degree.
Two-Year I	Institutions whose awards are exclusively, or almost exclusively, college-parallel associate degrees.
Two-Year II	Institutions whose awards are predominantly associate degrees in college-parallel or vocational-technical fields. (Some certificates or diplomas may also be awarded.)
Two-Year III	Institutions whose awards are predominantly certificates or diplomas, with some associate degrees.
Two-Year IV	Institutions whose awards are exclusively, or almost exclusively, certificates or diplomas.
Specialized	Special purpose institutions with specialized degree programs. These may include medical or health science centers and, in some instances, stand-alone law schools, fine arts schools, or engineering schools, etc.

* Used in SREB State Profiles and Tables 10, 43, 55, 62, 64, 65, 66, and 67.

STATE POSTSECONDARY EDUCATION AGENCIES

This list includes for each state, the state agency or agencies responsible for the statewide coordination of collegiate institutions, including those responsible for two-year college systems and two-year vocational-technical systems where this function is a separate or shared responsibility.

Alabama

Joseph T. Sutton, Executive Director
Commission on Higher Education
One Court Square, Suite 221
Montgomery, Alabama 36197-0001
(205) 269-2700

Fred J. Gainous, Chancellor
State Department of Postsecondary Education
4505 Executive Park Drive
Montgomery, Alabama 36116-1601
(205) 834-2200

Arkansas

Paul B. Marion, Jr., Director
Department of Higher Education
1220 W. Third Street
Little Rock, Arkansas 72201
(501) 371-1441

Lonnie McNatt, Acting Director
Division of Vocational and Technical
Education
Education Building, West
Little Rock, Arkansas 72201
(501) 682-4475

Florida

Charles B. Reed, Chancellor
Board of Regents
State University System of Florida
107 West Gaines Street, Suite 210
Tallahassee, Flo 32399-1950
(904) 488-4234

Clark Maxwell, Executive Director
State Board of Community Colleges
Collins Building
107 West Gaines Street
Tallahassee, Florida 32399-1950
(904) 488-1721

William Proctor, Executive Director
Postsecondary Education Planning
Commission
Knott Building, Room 304
Tallahassee, Florida 32399
(904) 488-7894

Betty Castor, Commissioner*
State Department of Education
Capitol Building, Room PL 116
Tallahassee, Florida 32301
(904) 487-1785

Georgia

H. Dean Propst, Chancellor
Board of Regents of the University
System of Georgia
241 Washington Street, S.W.
Atlanta, Georgia 30334
(404) 656-2200

Kenneth Breeden, Commissioner
Department of Technical and Adult Education
Suite 660, South Tower
One CNN Center
Atlanta, Georgia 30335
(404) 656-6714

Kentucky

Gary S. Cox, Jr., Executive Director
Council on Higher Education
West Frankfort Office Complex
1050 U.S. 127, South
Frankfort, Kentucky 40601
(502) 564-3553

John Brock, Superintendent of
Public Instruction*
Department of Education
Capitol Plaza Tower
Frankfort, Kentucky 40601
(502) 564-4770

Louisiana

Sally Clausen, Commissioner
Board of Regents
161 Riverside Mall
Baton Rouge, Louisiana 70801-1389
(504) 342-4253

Wilmer C. Cody, Superintendent*
Department of Education
P.O. Box 94064
Baton Rouge, Louisiana 70804-9064
(504) 342-3602

Maryland

Laslo Boyd, Acting Secretary of Education
Maryland Higher Education Commission
16 Francis Street
Annapolis, Maryland 21401
(301) 974-2971

James D. Tschechtelin, Executive Director
State Board for Community Colleges
Georgetown Plaza, Suite 210
914 Bay Ridge Road
Annapolis, Maryland 21403
(301) 269-2881

Mississippi

Ray W. Cleere, Commissioner
Board of Trustees of State Institutions of
Higher Learning
P.O. Box 2336
Jackson, Mississippi 39225-2336
(601) 982-6611

George V. Moody, Director
State Board for Community and
Junior Colleges
P.O. Box 771
Jackson, Mississippi 39205
(601) 359-3520

North Carolina

C.D. Spangler, Jr., President
University of North Carolina
General Administration
P.O. Box 2688
Chapel Hill, North Carolina 27514
(919) 962-6981

Robert Scott, State President
Department of Community Colleges
State Board of Education
Education Building
Raleigh, North Carolina 27611
(919) 733-7051

Oklahoma

Hans Brisch, Chancellor
State Regents for Higher Education
500 Education Building
State Capitol Complex
Oklahoma City, Oklahoma 73105
(405) 521-2444

South Carolina

Fred R. Sheheen, Commissioner
Commission on Higher Education
1333 Main Street, Suite 650
Columbia, South Carolina 29201
(803) 253-6260

James R. Morris, Executive Director
State Board for Technical and Comprehensive
Education
111 Executive Center Drive
Columbia, South Carolina 29210
(803) 758-6919

Tennessee

Arliss L. Roaden, Executive Director
Tennessee Higher Education Commission
Suite 1900, Parkway Towers
404 James Robertson Parkway
Nashville, Tennessee 37219
(655) 741-3605

Thomas Garland, Chancellor
State University and Community College
System of Tennessee
1415 Murfreesboro Road
Nashville, Tennessee 37217
(615) 366-4400

Texas

Kenneth H. Ashworth, Commissioner
Texas Higher Education Coordinating Board
P.O. Box 12788, Capitol Station
Austin, Texas 78711
(512) 462-6400

Virginia

Gordon K. Davies, Director
State Council of Higher Education
James Monroe Building
101 North Fourteenth Street
Richmond, Virginia 23219
(804) 225-2117

West Virginia

William K. Simmons, Chancellor
West Virginia Board of Regents
950 Kanawha Boulevard, East
Charleston, West Virginia 25301
(304) 348-2177

*These individuals are heads of agencies with responsibility for postsecondary vocational-technical institutions as well as for elementary and secondary education.
