IDENTIFIERS *New York

AESTRACT

Data were gathered and analyzed in Fall 1993 on the use of residence hall facilities at all New York state operated colleges with residence halls and these data were also analyzed for trends by comparison with data since 1984. Twenty-six institutions were surveyed. Findings include the following: (1) in Fall 1993 the total utilization of residence hall facilities (headcount) was reported to be 58,857, the smallest utilization in the past 10 years; (2) net revenue producing adjusted design capacity also decreased slightly from 1992 to 61,340 (bedcount); (3) occupancy level (96 percent) was only marginally higher than 1992 (95.7 percent) and was therefore the second lowest in the past 10 years; (4) trend data indicated that for 6 of the last 10 years revenue producing utilization of residence halls for purposes other than resident student occupancy generally increased; (5) the average number of students per resident assistant for the system as a whole remained relatively constant over the past 10 years; (6) University Centers all showed increases in percent utilization of net revenue producing adjusted design capacity from Fall 1992, and (7) Fall 1993 data showed that percent utilization of net revenue producing adjusted design capacity for the University Colleges decreased for the third consecutive year from the Fall 1990 peak of 100.8 percent. Twelve tables present the data in detail. (JB)

PREFACE

This report on Utilization of Residence Hall Facilities consists of detailed data collected in the twentieth annual survey during the Fall of 1993. The report also contains summary data for Fall 1984 through Fall 1993. Detailed tables for Fall 1974 through Fall 1992 inclusive, are available in earlier reports published by this office (see the Publications List in the appendix). Details regarding the residence hall program are important in the planning and budgetary functions of each institution. While the survey was specifically designed to meet the data requirements of the State University System Administration Offices of Institutional Research and Planning, Finance and Business, and Student Affairs and Special Programs, requests for these data have subsequently come from many sectors both inside and outside of the State University.

The study includes all State-operated institutions which have residence hall facilities. A listing of these institutions, organized by institution type, can be found on page vi; reference to institution type in this publication, therefore, includes only those institutions listed. Residence hall facilities available at locally sponsored Community Colleges under the program of the State University of New York are financed in a different manner and are not included in the study.

Graphic displays of percent utilization of residence hall facilities are again included in this publication. Trend data as well as Fall 1993 utilization are displayed for each institution within institution type.

A study of this complexity could not have been completed without the full cooperation of the institutional respondents and of other System Administration Offices. We also thank our secretarial staff Vikki Mazzone, and Kathy Bartoszewicz, who prepared the final transcript and distributed all copies of the publication.

INTRODUCTION

The methodology and definitions used in this study have been developed to be consistent with the State University of New York Policies and Procedures Manual. Definitions of the basic concepts used in this report are provided beginning on page xiii.

A general policy change occurred in University management of residence halls between 1985 and 1986. One manifestation of the change is the restructuring of dormitory fiscal operations into a Dormitory Income Fund Reimbursable (DIFR) structure. Accompanying this new structure is a series of alterations in rate setting and revenue generation:

1. The concept of a single University-wide standard double room rate has been replaced by the acceptance of institution-specific standard double room rates, which must fall within a specified range of the average of standard double room rates for all of the State-operated institutions of the State University of New York.
2. The ratio of superior and reduced rates to the standard double rate is now at the discretion of each institution, pending approval from Central Administration.
3. The algorithm to calculate the number of allowable Resident Assistant waivers has been greatly simplified. The RA factor concept has been discontinued, and an acceptable range of RA waivers from 4% to 6% of resident student occupancy (headcount) is now in effect.
4. It is now permissible to place lodgings into an inactive status under certain conditions.

For information about the policy, refer to the *Dormitory Income Fund Reimbursable (DIFR) Guidelines* published in November 1987 by the State University of New York Office of Finance and Business.

Three tables have been designed to provide supporting information to evaluate the effect of these policy initiatives on the utilization of residence halls. Table 5, *Utilization of Net Revenue Producing Adjusted Design Capacity by Rate*, shows the schedule of rates developed by each institution as of Fall 1993, as well as the occupancy of facilities at each rate. Tables 6 and 7, which deal with Resident Assistant Bed Rental Waivers, show the accepted range of bed rental waivers. Increased variability in amount of Resident Assistant Waivers (i.e. .67, .4, .74) has resulted in the necessity to report the more unusual waivers in terms of ranges rather than by actual waiver portion.

The report contains seven tables of data for Fall 1993:

Table 1 presents aggregated data which describe the original design capacity of the residence hall facilities, the permanent and temporary adjustments to this original capacity, net available space and percent of actual utilization.

Table 2 provides more detailed data concerning the types of utilization of net available space depicted in Table 1. Resident student utilization and other types of utilization are arrayed in categories as described in the column headings.

Table 3 focuses on resident student utilization summarized in Table 2. Data are arrayed by institution, type of accommodation and rate paid by the students.

Table 4 describes revenue-producing utilization of residence halls for other than student occupancy. Net utilization of each campus is arrayed with "other uses" data to clarify the relationship between amount of space available and "other" revenue-generating effort. "Other uses" data are arrayed within each category by bedcount, headcount, and percent of revenue generated.

Table 5 arrays the utilization of net revenue producing adjusted design capacity by rate. For each institution, revenue-producing utilization is shown in total, then detailed--along with the associated rates charged in Fall 1993--by utilization of non-married enrolled students; that of students accommodated as married; and other revenue-producing utilization. Also, the bedcount of unoccupied facilities is shown for non-married enrolled students and married students.

Table 6 displays, by institution, the distribution of Resident Assistant Bed Rental Waivers, total student occupancy, and the ratios of resident students to resident assistants. Because of an increase in unusual RA/Student ratios, they are now grouped into the following units/ranges: two to one; 1.01 - 1.99 to one; one to one; .60 - .99 to one; and .59 or less to one. The two most common ratios are two to one and one to one.

Table 7 augments Table 6 and displays total resident student occupancy, the authorized range of bed rental waivers--from 4% to 6% of the total resident student occupancy--and the actual bed rental waivers used, in terms of bedcount and headcount (number of RA's). Finally, resident student-to-resident assistant ratios are shown for each institution and overall.

Tables 8 through 12 depict trends concerning utilization of residence hall facilities from Fall 1984 through Fall 1993:

Table 8, total utilization (headcount); **Table 9**, percent utilization; **Table 10**, non-revenue assignments; **Table 11**, revenue producing utilization for purposes other than resident student occupancy (bedcount); and **Table 12**, the ratio of students to resident assistants. The definitions over the ten-year period are consistent with those described beginning on page xiii.

SUMMARY OF DATA

In the Fall of 1993, the total current utilization of residence hall facilities (headcount) was reported to be 58,857. This level of occupancy represents the smallest utilization (headcount) in last ten years. The net revenue producing adjusted design capacity has also decreased slightly from last year to 61,340 (bedcount). The occupancy level (96.0%) is only marginally higher than last year's utilization (95.7%) and is therefore the second lowest level recorded in the past ten years.

Summary of Utilization of Original Design Capacity of Residence Hall Facilities, State-Operated Institutions, State University of New York, Fall 1984 Through Fall 1993

Year	Original Design Capacity (Bedcount)	Net Revenue Producing Adjusted Design Capacity (Bedcount)	Total Utilization (Headcount)	Percent Utilization of Net Revenue Producing Adjusted Design Capacity
Fall 1984	68,431	62,746	61,554	98.1
Fall 1985	68,432	62,737	61,701	98.3
Fall 1986	68,432	62,488	61,506	98.4
Fall 1987	68,427	62,313	62,703	100.6
Fall 1988	68,837	63,141	63,957	100.3
Fall 1989	68,837	62,668	62,039	99.0
Fall 1990	68,951	62,438	62,324	99.8
Fall 1991	70,015	62,713	60,672	96.7
Fall 1992	70,015	61,869	59,211	95.7
Fall 1993	70,003	61,340	58,857	96.0

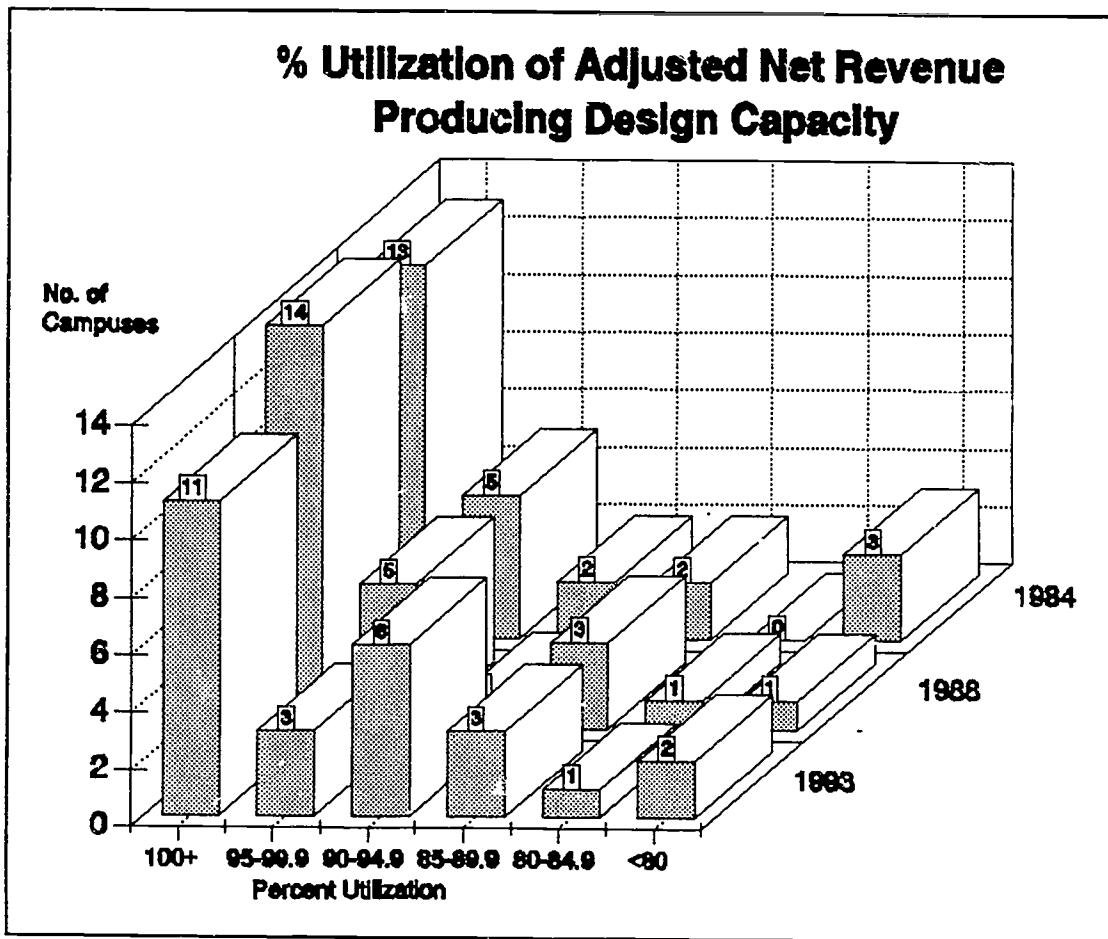

The trend data indicate that for six of the last ten years revenue producing utilization of residence halls for purposes other than resident student occupancy has generally increased (see Table 11). Fall 1986, Fall 1989 and Fall 1992 each showed a decrease from the immediately prior year. Fall 1993 again shows a slight decrease from Fall 1992. This is the first time during the ten-year period that decreases have occurred in two consecutive years. The Fall 1993 level of revenue producing utilization for purposes other than resident student occupancy is similar to that of Fall 1988.

While there were some increases and decreases in the number of students per resident assistant for individual institutions, the average number of students per resident assistant for the system as a whole has remained relatively constant for the past ten years (see Tables 7 and 12). In Fall 1993 the average number of students per resident assistant for the system as a whole (26.0) represents a slight increase from the Fall 1992 level of 24.6. The average level is similar to that of 25.6 in Fall 1987 and Fall 1988.

The overall stability, however, results from countervailing sector increases and decreases. In the Fall of 1993 the average students per resident assistant at University Centers increased to 32.5 from the Fall 1992 level of 27.8. This is the largest single year increase for the sector during the ten-year period. Meanwhile, the average number of students per resident assistant declined in the Health Sciences and Specialized Colleges sectors.

The percent utilization of net revenue producing adjusted design capacity was reported as 96.0 percent in the Fall of 1993 (see Tables 1 and 9 and Figure 2). This percent utilization is only marginally higher than the Fall 1992 utilization of 95.7 percent. Both the net revenue producing adjusted design capacity and the total utilization (headcount) have decreased since Fall 1992, but their relationship is relatively constant. The illustration on page xi shows how the distribution of percent utilization by number of campuses has varied for selected years within the past ten.

The University Centers all show increases in percent utilization of net revenue producing adjusted design capacity from Fall 1992 (see Table 9). At the Albany Center the increased percent utilization was the result of a headcount decrease (see Table 8) combined with offline accommodations. The Binghamton, Buffalo, and Stony Brook Centers underwent headcount increases as well as percent utilization increases. Percent utilization at both the Stony Brook and Buffalo Centers surpassed 100 percent, with Buffalo at 101.9 percent.

The Fall 1993 data reveal that the percent utilization of net revenue producing adjusted design capacity for the University Colleges decreased for the third consecutive year from the Fall 1990 peak of 100.8 percent. The decrease from Fall 1992 to Fall 1993, however, was less than one percentage point. In actual headcount, seven University Colleges increased in total utilization while five decreased.

The Fall 1993 data indicate that percent utilization at the six Colleges of Technology/Agriculture has slipped from 103.2 percent to 96.0 percent (see Table 9). The actual utilization headcount decreased by almost 600 (Table 8). Decreases were found at all six of the Colleges of Technology/Agriculture, although that at Delhi was insignificant in magnitude.

Of the 26 institutions surveyed, facilities at nine were over-utilized or crowded (utilizing more than 100% of capacity). These consisted of two University Centers (Buffalo and Stony Brook), three University Colleges (Cortland, Geneseo, and Oswego), and four Colleges of Technology/Agriculture (Canton, Cobleskill, Delhi and Morrisville). Two institutions (Old Westbury and the Institute of Technology at Utica/Rome) were exactly at capacity.

Facilities at the remaining fifteen institutions were under-utilized (showed a negative net utilization). Nine of these fifteen were able to generate revenue through utilization other than student occupancy. Based on projected revenues assigned to the Dormitory IFR for this year, one institution (Brockport), reported no estimated revenue generation for their "other utilization" facility. Percent of revenue generated for all "other utilizations", including the facility at Brockport, averaged 36.0 percent of the total possible student revenue generation, with a high of 100 percent and a low of zero (see Table 4).

DEFINITIONS

[Note: Terms in capital letters within the definitions are defined elsewhere in the section.]

Residential Capacity Descriptors

BEDCOUNT -- a unit of measure used to describe the capacity of the facility for residential purposes.

ORIGINAL DESIGN CAPACITY -- the original residential capacity of the facility (expressed as BEDCOUNT) as determined by architectural plans.

PERMANENT ADJUSTMENTS TO ORIGINAL DESIGN CAPACITY -- permanent conversions of on-campus facilities which increase or decrease their residential capacity (expressed as BEDCOUNT).

NON-REVENUE ASSIGNMENTS -- residential capacity (expressed as BEDCOUNT) exempted from revenue production for special uses such as for **RESIDENT ASSISTANTS**. These assignments are subject to annual review by System Administration.

NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY -- the capacity of the facility (expressed as BEDCOUNT) available for revenue producing uses. (ORIGINAL DESIGN CAPACITY, less NON-REVENUE ASSIGNMENTS, plus ADDITIONS OR DELETIONS TO ORIGINAL DESIGN.)

"SINGLE", "DOUBLE", "TRIPLE", ETC. -- refers to the DESIGN CAPACITY of the facility, NOT its level of occupancy. For example, a "TRIPLE" is NOT a crowded double, but a facility DESIGNED for three occupants.

Actual Occupancy/Use Descriptors

HEADCOUNT -- a measure of use which is the number of students or other persons occupying the facilities usually for residential purposes. Non-residential use of a facility, (e.g. office space) measured in terms of HEADCOUNT, is the number of students displaced by the use of the facility for other purposes.

RESIDENT STUDENT OCCUPANCY -- the HEADCOUNT of enrolled students and their spouses who reside in residence hall facilities. (This excludes RESIDENT ASSISTANTS.)

RESIDENT ASSISTANTS -- students assigned to and residing in residence hall facilities for the purpose of peer counseling and the betterment of the quality of life within the residence hall complex. The BEDCOUNT of facilities dedicated for RESIDENT ASSISTANT occupancy is exempted wholly or in part from revenue production.

OTHER USES -- uses of residence hall facilities for non-residential purposes such as office space or classrooms, or for residential use by students from other colleges or special non-student residential occupancy.

LEVEL OF OCCUPANCY -- **SUPERIOR** occupancy refers to a unit occupied at the election of the student(s) by fewer people than its design capacity; **STANDARD** describes occupancy at the exact level of a unit's design capacity; and **REDUCED** occupancy refers to a room occupied by more people, not at the election of the student(s), than its design capacity.

Utilization Indices

PERCENT OF REVENUE GENERATED -- FOR REVENUE-PRODUCING OTHER USES -- the estimated percent of revenue which this use will yield compared to what it would yield for regular student use at the given rate.

CURRENT UTILIZATION -- the total actual utilization (expressed as **HEADCOUNT**) of an occupied facility's available revenue producing capacity. This is the sum of total **RESIDENT STUDENT OCCUPANCY** and total **OTHER USES**.

NET UTILIZATION -- the **CURRENT UTILIZATION** less **NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY**. This figure is negative (-) if the facility is under-utilized and positive (+) if the facility is over-utilized.

TABLE 1
UTILIZATION OF ORIGINAL DESIGN CAPACITY OF RESIDENCE HALL FACILITIES
STATE-OPERATED INSTITUTIONS, ① STATE UNIVERSITY OF NEW YORK, FALL 1983

Footnotes

- ① Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges
- ② As reported by each institution and including assignments pending review by Central Administration, which is responsible for the approval of such assignments.
- ③ Net utilization equals current utilization less net revenue producing adjusted design capacity.
- ④ This figure represents a correction of the original design capacity for Stony Brook. Twelve design singles were previously listed as doubles.

TABLE 2
UTILIZATION OF NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY
STATE-OPERATED INSTITUTIONS. ① STATE UNIVERSITY OF NEW YORK, FALL 1993

Footnotes

- ① Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.
- ② Headcount is the same as net revenue producing adjusted design capacity because there are no under- or overutilization measures for these cases. The number of adjusted design capacity beds used for such purposes as Guest Rooms, Conference Centers, Administrative Office Space, Classrooms, Educational Programs, State Agencies, etc., is the same as the total possible number of persons (students) who are displaced by these "Other Utilization" arrangements.

TABLE 3
STUDENT OCCUPANCY OF NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY
STATE-OPERATED INSTITUTIONS, ① STATE UNIVERSITY OF NEW YORK, FALL 1993

Footnotes

- ① Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.
- ② If headcount exceeds bedcount, the accommodation is over-utilized or "crowded." If bedcount exceeds headcount, the accommodation is under-utilized.
- ③ Beds in completely unoccupied rooms, suites, or apartments.
- ④ Includes rooms, suites, and apartments.
- ⑤ Other types of accommodations including, but not limited to, space used as sleeping quarters not originally designed for that purpose. This includes lounges and study areas where the adjusted design capacity bedcount is zero and septuples and octuples with the appropriate adjusted design capacity bedcount.
- ⑥ Consists of converted lounge space where adjusted capacity bedcount is zero.
- ⑦ Consists of septuples and/or octuples with the appropriate adjusted design capacity bedcount.
- ⑧ Consists of large room(s) designed to house six students.
- ⑨ Consists of two - bedroom apartments which were designed to accommodate four students.
- a Consists of three - bedroom apartments which were designed to accommodate six students.
- b Consists of studio, one - bedroom, and four - bedroom apartments. One - bedroom and studio apartments are classified as "other," since these types of apartments were not specifically designed for student occupancy. They were originally designed as studios or one - bedroom apartments, and the design capacity varies based on the particulars of the facility.
- c Consists of smaller rooms which, together, were designed as suites or apartments to accommodate six students.
- d Consists of double rooms designed to accommodate two students, but also contain kitchen facilities.
- e Consists of space used for sleeping quarters not originally designed for that purpose, where the adjusted design capacity bedcount is zero.
- f Consists of converted study space where the adjusted design capacity bedcount is zero and of octuples consisting of smaller rooms which together were designed as suites to accommodate eight students.

ALL FOOTNOTES APPEAR ON THE FOLLOWING PAGE

TABLE 4
REVENUE--PRODUCING 'OTHER' UTILIZATION AND PERCENT OF REVENUE GENERATED ①
STATE--OPERATED INSTITUTIONS, ② STATE UNIVERSITY OF NEW YORK, FALL 1993

Footnotes

- ① See the DEFINITIONS section for a description of "percent of revenue generated."
- ② Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges
- ③ Net Utilization, derived in Table 1, is displayed here to facilitate comparison between under--utilization and amount of revenue-- generating "other" utilization.
- ④ Total and subtotal percent columns are weighted averages.
- ⑤ Due to the current estimation of revenue generated for the Thompson Conference Center at Brockport (0%), this percent of revenue generated is substantially lower than it was several years ago.
- ⑥ While there are 201 beds assigned to Thompson Conference Center, the semester occupation varies substantially. Based on Fall 1993 estimates, there will not be any revenues assigned to the Dormitory IFR for 1993--94.

TABLE 5
UTILIZATION OF NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY BY RATE ①
STATE-OPERATED INSTITUTIONS, ② STATE UNIVERSITY OF NEW YORK, FALL 1993

Footnotes

- ① Unless otherwise indicated, rate shown is per occupant, not per dwelling, for one semester time period. Rates are those current as of Fall 1993.
- ② Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory colleges
- ③ This is a superior rate charged students whenever a room or suite is occupied by fewer persons than the designed capacity, with such occupancy being at the request of the occupants and not resulting from room assignments by the college over which the student has no control.
- ④ This "other revenue" use represents an estimated revenue generation of 100% of the total possible standard revenue at this rate.
- ⑤ An approved bed rental rate for a single room type is charged to students occupying designed single rooms as well as to students occupying rooms and suites converted from lounge space.
- ⑥ This is a reduced semester rate offered to students when dormitory facilities are occupied by more persons than the design capacity, including situations of occupancy by students in facilities such as converted lounges, study rooms, etc.
- ⑦ Family apartments (numbering 22 in Fall 1993) are billed at a semester rate of \$2,900 regardless of the number of persons in residence.
- ⑧ This "other revenue" use represents a revenue generation of approximately 33% of the total possible standard revenue that could be generated from resident student occupancy.
- ⑨ This "other revenue" use represents an estimated revenue generation of 99% of the total possible standard revenue at this rate.
 - a These figures represent the rate per person per month.
 - b This "other revenue" use represents an estimated revenue generation of 87% of the total possible standard revenue at this rate.
 - c This "other revenue" use represents an estimated revenue generation of 75% of the total possible standard revenue at this rate.
 - d This "other revenue" use represents an estimated revenue generation of 91% of the total possible standard revenue at this rate.
 - e This "other revenue" rate represents a potential semester rate of \$1,290 per person, generated from student occupancy of the Thompson Conference Center. However, there are currently no revenues that are anticipated to be assigned to the Dormitory IFR for that occupancy. Thus, the projected revenue generation is 0% of the total possible standard revenue at the \$1,290 rate.
 - f This is a rate charged students occupying a double room with a kitchen.
 - g This "other revenue" use represents an estimated annual revenue generation of 14% of the total possible standard revenue at the \$1,326 rate during the academic year. The 14% is based on annualized revenue projections of approximately \$68,000 for this alternate use facility as compared to the total possible student revenue of approximately \$493,272 generated during an academic year.
 - h An approved bed rental rate for a double room type is charged to students occupying designed double rooms and also to students occupying medical singles and converted lounges.
 - i This is a bed rental rate charged to one person if the apartment is fully occupied (4 students/apt.) However, if only one person occupies an apartment, then the student is charged the full occupancy rate of \$2,700.
 - j This "other revenue" use represents a revenue generation of approximately 25% of a \$1,375 semester rate.

TABLE 5
UTILIZATION OF NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY BY RATE ①
STATE-OPERATED INSTITUTIONS, ② STATE UNIVERSITY OF NEW YORK, FALL 1993

Footnotes, continued...

- k Married students are billed in this case for entire apartments at this semester rate regardless of the number of individuals occupying the apartments.
- l These figures were equated to a semester basis. The Fall rates (shown here) are less than the Spring rates because charges are actually on a monthly basis. There are fewer months (4 months payable) in the Fall semester.
- m This "other revenue" use represents an estimated annual revenue generation of 41% of the total possible standard revenue.
- n This "other revenue" use represents an estimated annual revenue generation of 26% of the total possible standard revenue.
- o This is a situation where an approved bed rental rate for designed single rooms is being charged students who are occupying converted study rooms.

TABLE 6
DISTRIBUTION OF RESIDENT ASSISTANT BED RENTAL WAIVERS IN RESIDENCE HALL FACILITIES
STATE-OPERATED INSTITUTIONS, ① STATE UNIVERSITY OF NEW YORK, FALL, 1993

Footnotes

- ① Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges
- ② The students shown here as Resident Assistants have received whole or partial bed rental waivers as indicated by the distribution of such waivers. These Resident Assistants perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.
- ③ The actual bed rental waived is 1.36.
- ④ The actual bed rental waived is .67.

TABLE 7
RESIDENT ASSISTANT BED RENTAL WAIVERS IN RESIDENCE HALL FACILITIES,
STATE - OPERATED INSTITUTIONS, ① STATE UNIVERSITY OF NEW YORK, FALL 1993

Footnotes

- ① Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges
- ② The setting of guidelines for authorized bed rental waivers has been changed by the Central Administration Office of Student Affairs and Special Programs to a concept of an authorized range rather than an algorithm based on a Resident Assistant factor. The range extends from 4% (low) to 6% (high) of the resident student occupancy (headcount). The resulting figures in these columns are thus measures of headcount.
- ③ The students shown here as Resident Assistants have received whole or partial bed rental waivers as indicated by distribution of such waivers. These Resident Assistants perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.

FOOTNOTES

^aOriginal constituent of the State University of New York at its establishment in 1948.

^bDate of establishment as a state college or institution.

^cDate of incorporation into State University of New York.

^dAs of July 1, 1975, New York City Community College and the other community colleges (not shown here) sponsored the New York City Board of Higher Education were no longer a part of the State University of New York.

NOTE: Date preceding date indicated for establishment as a state college or institution refer to institution antecedents of the present college or university. These may have been private institutions or controlled by a governmental entity other than the state. Intermediate institutional developments such as other college affiliation or date of first baccalaureate program offering have been omitted for the sake of brevity.

^eThe Health Sciences Centers at Buffalo and Stony Brook are shown separately here from their respective core campuses.
