HOW TO READ THE TABLES: AN EXAMPLE

It should also be noted that summary totals for each row and each column are included on the table. These include the same items that are found in each individual cell. In addition, the mean, standard deviation and range have been calculated for the rows and columns.

Summary information for the entire table is presented in the upper right-hand corner. This includes the total number of responses to the item, the number that did not respond, the total for the item being counted in the table (in the example above, the child participants), the mean, standard deviation and range for the totals.

## GRADE SPANS FOR EVALUATION REPORTS

To give a more detailed indication of the grades involved in Title I projects the grade spans reported have been grouped into six groups. While many projects reported enrollment by individual grade, some projects reported their enrollments only in grade spans - some as large as K - 12. Any project reporting five or less grades together was included in the span which covered the most grades being reported. An enrollment which was equally split between two spans (3-4 or 8-11) was assigned to the lower span.

- Span 1: Primarily Pre-Kindergarten and Kindergarten
- Span 2: Primarily Grades 1-3
- Span 3: Primarily Grades 4-6
- Span 4: Primarily Grades 7-9
- Span 5: Primarily Grades 10-12
- Span 6: Any project reporting six or more grades in a span
