only

Web Development Course

More Projects:

- Form Validation
- Todo List
- Random Color Generator
- Design a Game
- Calling an API

JavaScript Curriculum:

- JS Introduction
 - What is Javascript and why we need it?
 - Adding JS to HTML code
 - JS Hello World! Program
 - JS comments
 - Showing Output for JS
- JS Datatype, Variables, and Operators
 - Understanding datatypes
 - Number
 - String
 - Boolean
 - Null
 - Undefined
 - Symbol
 - Object
 - Understanding Variables
 - var Keyword
 - let Keyword
 - const Keyword
 - Rules for naming
 - typeof Operator
 - Understanding Operators
 - Arithmetic operators
 - Assignment operators
 - Comparison operators
 - Logical operators
 - Conditional operators
 - Bitwise operators
 - Other operators
- JS Conditional and Loops
 - Using if, if-else and if-else if-else
 - Switch statement
 - for loop
 - for...in loop
 - while loop
 - do...while loop
 - break statement
 - continue statement
- JS Pop-up Box
 - Alert Box
 - Confirm Box
 - Prompt Box
- JS Functions
 - What are Functions?
 - Function Declaration and Calling
 - Function Parameters and Arguments
 - Default Parameters
 - Function Return
 - Function Expression
 - Scope of Variables
 - Function Constructor
 - Arrow Function
 - Helper Function
- JS String and Arrays
 - Introduction to Arrays
 - Create an Array
 - Access Array element
 - Length of array and iterating over array
 - Multidimensional array
 - Creating JS Strings
 - String length and concatenation
 - String methods
- JS OOPS
 - Intro to Class and Objects (OOP)
 - Defining JS Class
 - Create Class Object
 - Accessing Object properties
- JS Events
 - What are Events and Event Handling
 - Understanding various Event Types
 - Using JS Events
- Using JS in real-world App
 - Understanding DOM/BOM
 - DOM Objects
 - BOM Objects
 - Dynamic Content Creation
 - Cookies and Localstorage
 - Javascript Callback
 - Javascript Promise
 - Javascript HTTP methods
 - JSON Handling
 - Using 3rd party Javascript

Web Development Course

Become a Job ready Web Developer. All you need is a Laptop.

Instructor:

Abhishek Ahlawat

(With about 8+ years of experience in Web development, Abhishek has developed many websites, including the Studytonight website. He comes with the right industry insights, to help students understand, not only web development but how they go from 0 to 1 with their career.)

Live (in-browser) Guided Projects and Exercises:

As part of this course, you get access to our live interactive coding application, in which you can revise and practice whatever you learn in class in the browser itself. You cannot learn coding without doing.

Multiple Web Layout Design:

During the course you will be designing multiple webpage layout to practice and learn better.

Live Doubt resolving:

In the live classes, time will be dedicated to take on doubts from users.

Small Batch size:

Only 10 students per batch.

Learn Website Hosting:

At the end of the course, we will also teach you the basics of website hosting, what web servers are, how to set up a hosting and publish your website live on the Internet.
