TITLE Who Took the GED? GED 2000 Statistical Report.  
 INSTITUTION American Council on Education, Washington, DC. General Educational Development Testing Service.  
 PUB DATE 2001-00-00  
 NOTE 48p.  
 AVAILABLE FROM GED Testing Fulfillment Service, PO Box 261, Annapolis Junction, MD 20701 (\$20). Tel: 301-604-9073; Fax: 301-604-0158. For full text: <http://www.acenet.edu/calec/ged/>.  
 PUB TYPE Numerical/Quantitative Data (110) -- Reports - Descriptive (141)  
 EDRS PRICE MF01/PC02 Plus Postage.  
 DESCRIPTORS Academic Accommodations (Disabilities); Academic Achievement; \*Achievement Tests; Adult Education; \*Adult Learning; \*Adult Students; Credentials; Definitions; Dropouts; Educational Attainment; Foreign Countries; \*High School Equivalency Programs; Out of School Youth; \*Outcomes of Education; Scores; Secondary Education; Special Needs Students; Standardized Tests; \*Student Characteristics; Student Educational Objectives; Tables (Data); Test Results; Trend Analysis  
 IDENTIFIERS Canada; \*General Educational Development Tests; United States

## ABSTRACT

In 2000, 860,684 adults worldwide took 1 or more of the General Educational Development (GED) Tests, which was more than in any previous year except 1996. The number of adults completing the GED Test battery increased by 10% or more in eight U.S. jurisdictions and four Canadian jurisdictions. The volume of international testing increased by 85.7%. Of those adults completing the GED Test battery in 2000, more than 519,000 met their jurisdiction's score requirements. In 2000, only 1.5% of adults in North America who did not graduate from high school attempted to earn a high school credential by passing the GED Tests. The average age of adults worldwide taking the GED Tests was 24.7 years. Nearly one of every three GED credentials awarded in the United States was earned by a student aged 18 or younger. Two of every three adults tested reported taking the tests for further training and education beyond the high school level. The 8,071 adults receiving testing accommodations in 2000 was up more than 110% from the number in 1993. (Thirty tables/figures are included. A definition of geographic regions is appended along with lists of GED administrators, American Council on Education governing bodies, GED testing service staff, and selected GED publications.) (MN)

# Foreword

by Joan Chikos Auchter, Executive Director, GEDTS

***Change is the law of life. And those who look only to the past or present are certain to miss the future.***

—President John F. Kennedy, address in Frankfurt, West Germany, June 25, 1963

As we publish this report, the GED Testing Program stands with one foot firmly planted in the past and present (the 1988 Series GED Tests) and the other foot ready to step into the future: the 2002 Series GED Tests. Successfully managing the requirements of both test domains until the transition in January 2002 will require sophisticated balancing skills by all who are administering the program.

## **Past and Present: 1988 Series GED Tests**

Many challenges face both the adults taking the GED Tests and the GED staff members administering the testing program before December 2001, the final date for the 1988 GED Tests. Based on past experience, we are predicting a significant increase in the number of adults taking the tests before December, similar to previous increases before announced changes either in the GED Tests or in the score requirements for passing the tests. It was no surprise that in 2000, more adults worldwide took one or more of the GED Tests (860,684) than in any previous year except 1996 (867,802), just before the GED Testing Service raised the minimum passing score on the GED Tests battery.

In addition to releasing the new GED Tests in January 2002, GEDTS has announced that scores on the 2002 Series GED Tests may not be combined with partial scores earned on any previous series of GED Tests. Therefore, jurisdictional

GED staff members are busy informing new GED candidates that they must pass all five tests in the 1988 GED Tests battery by December 2001, after which all partial battery test scores will be discarded. Previous candidates with passing scores on one or more of the five tests are being contacted as well, to inform them of the limited time remaining to earn a GED credential based on these 1988 GED Tests results.

In 2000, several jurisdictions initiated local marketing efforts regarding the December 2001 deadline for 1988 GED Tests battery completion. Joan Myers, Ohio GED Administrator, reports that her state began preparations for the 2002 Series GED Tests with an 18-month awareness campaign. Since July 2000, Ohio GED Examiners have actively promoted and advertised the availability of GED Test administration dates. Between July and December 2000, Ohio GED Examiners contacted all previous candidates with scores on one or more GED Tests and

encouraged them to complete the 1988 GED Test battery before the deadline. In response to these initiatives, Ohio realized a 13.5 percent increase in the number of adults completing the GED Tests battery in 2000 (25,076), compared to the number who did so in 1999 (22,099).

According to GED Administrator Lisa F. Schwendau, Kentucky also initiated an active campaign by strategically displaying "Complete Your GED by December 2001" posters at all learning centers. In addition, the state GED office sent postcards to more than 39,000 adults identified in state computer records as having incomplete scores for the GED Tests battery. As a result of this promotion, Kentucky reported a 13.1 percent increase in the number of adults completing the battery in 2000 (16,705), compared to the number reported in 1999 (14,773).

By the time the *GED 2001 Statistical Report* is released next year, many other jurisdictions will

continued from page 1

have initiated 2001 completion campaigns and are likely to report increases similar to those in Ohio and Kentucky. The number of adults completing the GED Tests battery should reach an all-time high. In addition, there should be a significant increase in the number of adults who are first time candidates in 2001. Each GED Administrator and Examiner has much to accomplish before the 1988 GED Tests are phased out. Scheduling adequate test administration dates for those adults who wish to take and complete the 1988 series of GED Tests prior to December 31, 2001, will be a challenge at each of the 3,400 Official GED Testing Centers worldwide.

#### **Future: 2002 Series GED Tests**

As societal needs continue to change, so do the GED Tests. Designed to move the GED Testing Program into the 21st century, the 2002 Series GED Tests are the fourth generation of tests to be developed during our 59-year history. The GED Tests are evolving to reflect systemic educational change, as reported in the 1999 publication, *Alignment of National and State Standards: A Report by the GED Testing Service* (pp. 8–9).

“It is important to keep in mind that these standards are three-tiered—requiring national, state, and local acceptance,” the report stated. “In the United States alone, there are 15,000 local school districts, 50 state boards of education (plus the District of Columbia), and the federal Department of Education. To these, we must also add the standard reform movements in Canada and the

territories. GEDTS is charged with mirroring the core content and performance standards reflected by these systems in the year 2001 and beyond.

“As an added challenge, by setting the standard on the performance of graduating seniors, the GED Testing Service establishes as a standard what graduating seniors know and can do, not what they should know and do,” the report concluded.

New standards lead to new assessments. We are convinced that the 2002 Series GED Tests will meet our ultimate goal of developing a valid and reliable assessment tool to measure whether adults can demonstrate the skills and knowledge associated with a four-year high school program of study in the core academic disciplines. We have evaluated the standards, built the assessment, and systematically informed the public of these changes.

One critical step in preparing test-takers for the 2002 Series GED Tests is to prepare the instructional system for the necessary pedagogical changes. Modifications of teacher training and classroom practices linked to these assessments must work in concert if we are to prepare adults to succeed. To achieve this goal, we have participated in a collaborative effort different in scope from anything attempted in the past.

In April and May 2001, the Office of Vocational and Adult Education of the U.S. Department of Education co-sponsored a GED “Train the Trainer” Institute with the GED Testing Service and the

National Adult Education Professional Development Consortium (NAEPDC). The training sought to prepare professional developers and instructional specialists from each of the 50 states, the District of Columbia, and U.S. Insular Areas and Freely Associated States to return home and implement jurisdictional training of teachers. The program consisted of two three-day national training institutes, designed specifically as train-the-trainer sessions, to enable all participants to conduct workshops for teachers, as well as new train-the-trainer workshops.

The Office of Vocational and Adult Education contracted with the staff of InterActive Training Solutions (ITS) of Orlando, Florida, to lead the teacher training. In addition, GEDTS developed and disseminated a one-hour training PowerPoint presentation on the 2002 Series GED Tests. More than 100 participants successfully completed the training. Another 30 individuals, representing publishers and other independent instructional organizations, attended a second GED train-the-trainer

session in May. Between the separate sessions in April and May, participants began to disseminate their new knowledge by conducting at least 116 training sessions. A clear commitment exists in the nation and the individual jurisdictions to pursue this reform, which augurs well for the success of adults taking the 2002 Series GED Tests.

**The only way to predict the future is to have power to shape the future.**

—Eric Hoffer

*The Passionate State of Mind*

The GED Testing Program holds a unique position in the education arena. The GED Tests were not developed for a particular slice of society defined by age, race, ethnicity, or gender. Our audience is a diverse one. For instance, a significant number of adults who take the GED Tests did not attend public school in the United States. Over the past decade, the number of individuals who have been home-schooled has increased from 250,000 in 1990 to an estimated 1 million (1999). Other adults may have attended nonchartered/non-tax-supported schools whose diplomas may not be recognized by individual states. Still others are immigrants to this country, for the United States continues to attract about two-thirds of the world's total immigration.

Regardless of the reason, individuals without a high school credential require a valid method to validate their skills and knowledge. The GED Tests have been developed for this express purpose: to

provide an opportunity to adults who lack a high school credential, for whatever reason. This credential must be earned by demonstrating the skills and knowledge of a four-year high school program of studies in the core academic disciplines.

For the vast majority of GED candidates, earning a GED high school credential is a choice, not a requirement. Each year for the past decade, approximately 800,000 adults have made that choice, with about half a million able to earn their GED diploma each year. In doing so, these GED graduates must meet or surpass the performance of two-thirds of traditional graduating high school seniors.

For successful candidates, passing the GED Tests and earning the GED credential has removed a barrier to future goals. This confirmation of achievement is important, for most test-takers worldwide (66.2 percent) intend to continue their education. For them, the GED Tests are not an educational end point, but the beginning of further education and lifelong learning—goals well in line with the need for continuous development created by the changing nature of work, emerging technologies, and global competition.

How successful these adults are in educational endeavors remains their personal responsibility. In any event, passing the GED Tests provides them with the opportunity to move their lives forward and achieve self-set goals. We take pride in dedicating this report to those who have passed the GED Tests, and we wish them success as they use their new powers to shape their futures.

In recognition of publishing *Who Took the GED? The GED 2000 Statistical Report*, we owe special thanks to those who used their talents to produce it. With dedication and experience, Debra Louallen-Cole has coordinated production and directed quality control activities. Sen Qi continued to refine and extend procedures for data analysis and verification and for producing tables and graphs. Special thanks to the talented staff of the American Council on Education's Division of External Affairs for designing, editing, and proofing this report. Once again, former GED Director Doug Whitney provided an insightful analysis of the tables, while Ben Justesen, Lyn Schaefer, Zenitta Jones, Fred Edwards, and Patricia Jones added their expertise to the review of the accuracy and presentation of the information. We offer our sincere appreciation to the GED Administrators (whose names appear on pages 38–41) and to the Chief Examiners who lead the program in the field—to serve the candidates and to collect and report the data that make this publication possible.

# Introduction

*The GED Tests certify the attainment of subject matter knowledge and skills associated with high school completion. The GED credential reflects the acquisition of academic skills and proficiencies widely viewed as necessary for social and economic advancement.*

## THE GED TESTING SERVICE

Joan Chikos Auchter, Executive Director

The Tests of General Educational Development (GED Tests) provide adults who did not complete high school with an opportunity to

earn a high school equivalency diploma. By taking and passing a series of five tests in Writing Skills, Social Studies, Science, Interpreting Literature and the Arts, and Mathematics, adults demonstrate that they have acquired a level of learning comparable to that of high school graduates.

The GED Tests were first developed in 1942 to provide returning World War II veterans who had not earned a high school diploma before entering military service with the opportunity to earn a high school credential. The purpose of the GED Tests, essentially unchanged for more than 59 years, is to measure the academic skills and knowledge developed in a four-year program of high school education in the core content areas of U.S. and Canadian high school curricula. Recognized nationwide in the United States

and Canada by employers and institutions of higher learning, the GED program has served as a bridge to education and employment opportunities for millions of adults since 1942. More than 14 million people have earned high school equivalency diplomas since the program began. Each year, approximately 800,000 adults complete the GED Tests battery, and more than half a million obtain high school credentials based on passing the tests. About one in seven high school diplomas issued in the United States each year is based on the successful completion of the GED Tests.

A program of the American Council on Education's Center for Adult Learning and Educational Credentials, the GED Testing Service (GEDTS) develops the GED Tests and collects, produces, and disseminates research information on those who take, as well as those who pass, the GED Tests. In addition, the GEDTS contracts with more than 3,400 Official GED Testing Centers in the United States, Canada, and overseas to provide test materials and to monitor services to examinees. The GED Testing Program is jointly administered by the GED Testing Service of the American Council on Education and each participating state, provincial, or territorial department or ministry of education.

But the real story of GEDTS stems from the people it serves—the individuals who take the tests to fulfill their goals and aspirations.

For these individuals, the GED Tests truly represent a second opportunity. As you read this report, you will find that those who take the GED Tests are a richly diverse group. Some have recently left school. Others have been out of school for several years. While most people take the tests to qualify for further education, others hope that passing the GED Tests will encourage their children or grandchildren to stay in school.

Many adults who take the GED Tests are preparing to enter a community college or four-year university. In fact, each year approximately one out of 20 first-year college students has earned a GED diploma. GED graduates have achieved ambitious career goals, securing successful positions such as business professionals, office workers, mechanics, college professors, military leaders, writers, and artists.

#### **THE CENTER FOR ADULT LEARNING AND EDUCATIONAL CREDENTIALS**

Susan Porter Robinson, Vice President and Director

Founded in 1942, the Center for Adult Learning and Educational Credentials pioneered the evaluation of education and

training attained outside the classroom. For 59 years, the Center has

championed the concept of lifelong learning through its three main program activities: high school credentialing, college credit recommendations, and educational recordkeeping.

#### **High School Credentialing**

Many adults who dropped out of high school have later acquired a comparable level of learning while on the job or at home. In an effort to help these adults earn a high school credential, the Center offers the Tests of General Educational Development (GED Tests). The GED Tests are a battery of examinations that measure the general academic skills and knowledge usually acquired in a four-year high school program of study. Passing scores on the tests are set so that examinees must perform as well as or better than 66 percent of the norm group of graduating high school seniors.

#### **College Credit Recommendations**

In step with its commitment to lifelong learning, the Center administers three programs that recommend credit for work-related education. The American Council on Education's College Credit Recommendation Service recommends college credit for workplace courses offered by business and industry, labor unions, associations, and government agencies, as well as for nationally recognized testing and certification programs. Its counterpart for the armed services, Military Programs, helps thousands of servicemembers and veterans earn credit for the college-level learning they've acquired while on active duty.

#### **Educational Recordkeeping**

To keep track of these college credit recommendations and other training, the Center offers three computerized recordkeeping services. The ACE Transcript Service

offers adults a computerized record of their credit recommendations, including those made by the ACE College Credit Recommendation Service and Credit by Examination Program. The CEU Training Service provides a transcript service for adults who are pursuing continuing education units (CEUs) for professional development, career advancement, or state licensing requirements. Lastly, the Military Programs Division offers educational transcribing services for Army, Navy, and Marine Corps military personnel. Taken together, all of these transcribing systems help college and other officials recognize workplace learning along with the responsibilities and skills that registry participants gained while on the job.

#### **THE AMERICAN COUNCIL ON EDUCATION**

Stanley O. Ikenberry, President

The American Council on Education (ACE), founded in 1918, is the nation's umbrella higher education association. ACE believes that equal educational

opportunity and a strong higher education system are essential cornerstones of a democratic society. Its approximately 1,800 members include accredited, degree-granting colleges and universities from all sectors of higher education and other education and education-related organizations. ACE advances the interests and goals of higher and adult education in a changing environment by providing leadership and advocacy on important issues, representing the views of the higher and adult education community to policy makers, and offering services to its members.

# Gathering the Data

The collection of data for the *GED Annual Statistical Report* is a joint responsibility of the General Educational Development Testing Service (GEDTS), GED Administrators, and GED Chief Examiners. This data collection is international in scope, requiring the cooperation of educators and testing professionals throughout North America and abroad.

Currently, more than 3,500 GED Testing Centers are in operation in the 50 states, the District of Columbia, nine U.S. Insular Areas and Freely Associated States, and 11 participating Canadian provinces and territories, as well as on military bases in the United States and overseas, in correctional institutions, in Veterans Administration hospitals, and in Sylvan Learning (now Prometric®) Centers outside the United States and Canada.

In the fall of 2000, GEDTS and ACE staff began producing *Who Took the GED? The GED 2000 Annual Statistical Report*, and GEDTS updated its computer programs to generate the statistical tables. In February 2001, GED Administrators at the state, provincial, and territorial levels sent their jurisdictional reports to GEDTS. We at GEDTS checked the data for accuracy and entered this information into our national database. In March, preliminary tables were prepared and returned to the GED Administrators, who then reviewed, revised, and approved the final figures. During March and April, GEDTS updated

all statistical databases to reflect the revisions. In April and May, we generated and edited all statistical tables, prepared graphs and text, and printed the final report.

The *GED 2000 Annual Statistical Report* presents tabulations of the numbers and percentages of all persons who took and passed the GED Tests in a calendar year within each participating jurisdiction. Procedures for collecting these data can differ greatly from one jurisdiction to another. For example, in a calendar year, Texas, California, and Michigan collect summary reports on thousands of examinees from hundreds of testing centers. In contrast, Guam, Newfoundland, and Prince Edward Island collect data on hundreds of examinees from a single center. Furthermore, some jurisdictions rely on computerized scoring and recordkeeping systems to generate these data, while others perform the tasks manually.

In reviewing the tables in *Who Took the GED? The GED 2000 Annual Statistical Report*, it is useful to bear in mind that local

***It is useful to bear in mind that local conditions—such as extreme weather—as well as a jurisdiction’s policies, procedures, and education funding levels can influence the number of persons in a given year who take the GED Tests, complete the test battery, meet score requirements, and receive credentials. We encourage readers to write to us to suggest ways we can improve this report.***

conditions—such as extreme weather—as well as a jurisdiction’s policies, procedures, and education funding levels can influence the number of persons in a given year who take the GED Tests, complete the test battery, meet score requirements, and receive credentials. As we work to improve the quality, clarity, and usefulness of the data we collect, we encourage readers to write to us to suggest ways we can improve this report.

# How to Use this Report

This report was developed with several audiences in mind. For those who rely on the statistical tables for program status and trend information, the tables and graphs provide comparisons across categories, jurisdictions, and years. This report provides photographs, expanded text, and informative captions to describe the program's purpose and the diversity of those who take the GED Tests.

We are all users of data and consumers of information. To make informed educational and policy decisions in this time of rapid social and economic change, we require accurate and up-to-date information about our programs. The General Educational Development Testing Service (GEDTS) has produced annual statistical reports profiling GED test-takers for every calendar year since 1958. In response to growing demands for more information about our program, we revised the *GED Annual Statistical Report* in 1993 to make it easier to read. The positive reactions of our readers to these revisions encouraged us to continue improving the usefulness and readability of this report. Plans and pilot projects are now under way to streamline and expand our data collection operations beginning with the new series of GED Tests, scheduled for release in January 2002.

Throughout this report, the term "GED test-taker" refers to people who have taken at least one of the five GED Tests. The term "GED completer" refers to people who have taken all five tests in the GED

battery. The term "GED graduate" refers to people who have earned high school credentials based on passing all five tests in the GED battery. Since 1994, the *GED Annual Statistical Report* has included the number of persons completing the entire battery of five GED Tests. It is useful to note that about 13 percent of those who take the tests each year do not complete the entire battery. Thus, they may be counted again in subsequent years. GED test-takers must take and pass all five tests in order to meet their jurisdiction's score requirements for a high school equivalency credential. The number of persons completing all five tests in the battery provides the basis for calculating the pass rate for the program.

For readers new to the *GED Annual Statistical Report*, the data presented in Tables 1 through 14 provide summary information about those who take the GED Tests and the jurisdictions that administer those tests. Most tables summarize information for the

United States, its Insular Areas and Freely Associated States, Canada, and GEDTS-administered programs, and also offer program totals. Readers can compare information across categories, jurisdictions, and years. Each table is arranged to provide data within the following umbrella topics: percent changes from 1999 to 2000 (Table 1); number tested, number completing tests, and number meeting score requirements (Table 2); people tested and credentials issued by age groups (Tables 3 and 4); special test editions and testing accommodations (Tables 5 and 6); formal education and future plans (Tables 7 and 8); trends in participation and credentialing (Tables 9 and 11); participation and credentialing rates (Table 10); and minimum score requirements and testing policies (Tables 12-14).

The names, addresses, phone numbers, and e-mail addresses of the GED Administrators for the participating jurisdictions are included on pages 38 through 41.

# 2000 Statistical Highlights

## TRENDS IN GED TEST-TAKING

More adults worldwide took one or more of the GED Tests in 2000 (860,684) than in any previous year except 1996 (867,802), just before GEDTS raised the minimum passing score on the GED Tests battery (Table 2). Of those adults taking the tests, 747,617 completed the GED Tests battery in 2000, a decrease of only one-half percent from the previous year (Table 1). Participation since 1994 remains at the highest levels in the program's 59-year history. In 1990, only about 663,000 adults completed the GED Tests battery (Table 1).

The number of adults completing the GED Tests battery increased by 10 percent or more in eight U.S. jurisdictions and Insular Areas and Freely Associated States (IAFAS): the Marshall Islands (36.3 percent), Virgin Islands (35.7 percent), North

Dakota (22.2 percent), Northern Mariana Islands (22.2 percent), Ohio (13.5 percent), Kentucky (13.1 percent), Iowa (10.6 percent), and Louisiana (10.2 percent) (Table 1).

Four Canadian jurisdictions reported GED Tests battery completion volume increases of 10 percent or more: Yukon Territory (65.8 percent), Prince Edward Island (27.1 percent), Ontario (17.1 percent), and Newfoundland (13.2 percent) (Table 1).

The volume of international testing nearly doubled, increasing by 85.7 percent over the number of adults abroad who completed the GED Tests battery in 1999 (Table 1).

For the second straight year, the U.S. military reported the greatest increases both of adults completing

the GED Tests battery and of adults meeting their jurisdictions' passing requirements. Continental U.S. (CONUS) Military sites reported a 94.7 percent increase in those completing the test battery and an 82.4 percent increase in those meeting the passing-score requirement (Table 1).

In six jurisdictions worldwide, GED Tests battery completion volume decreased by 10 percent or more: Canada's Northwest Territories (19.6 percent), Guam (19.5 percent), Puerto Rico (16.4 percent), Rhode Island (13.9 percent), Delaware (13.3 percent), and Arizona (10.7 percent) (Table 1).

Of those adults completing the GED Tests battery in 2000, more than 519,000 adults met the score requirements of their jurisdictions—1.5 percent fewer than the 527,339 reported in 1999 (Table 1). For more than 30 years, roughly 70 percent of those taking the GED Tests each year have earned passing scores. An estimated 14.7 million adults have earned GED credentials since 1949 (Table 1).

In 2000, only 1.5 percent of adults in North America who did not graduate from high school attempted to earn a high school credential by passing the GED

Tests. Program-wide, only about 1 percent of adults without high school diplomas earned a GED credential in 2000. These rates have not changed appreciably since 1990 (Table 10).

#### **Age, Formal Schooling, and Academic Goals**

▶ The average age of adults worldwide taking the GED Tests was 24.7 years (24.5 in the United States and Insular Areas and Freely Associated States, or IAFAS; 30.9 in Canada; and 29.8 in Federal Contracts programs) (Table 3).

▶ Among adults taking the tests worldwide in 2000, more than two of three (71 percent) were aged 19 years or older (Table 3).

▶ Almost one of every three GED credentials awarded in the United States (31.8 percent) was earned by adults aged 18 or younger—the age when their traditional high school classmates earn diplomas. Only 1.4 percent of Canadian adults earning a credential in 2000 were 18 or younger (Table 4).

▶ Almost half of the adults (48.2 percent) earning GED credentials in 2000 were between the ages of 19 and 29 (Table 4).

▶ One of every five GED credentials (20.1 percent) was earned by adults aged 30 or older (Table 4).

▶ As in previous years, two of every three adults (67.1 percent) tested worldwide reported completing the 10th grade or higher before leaving high school. More than one in three adults (37.4 percent) who took the tests in 2000 reported completing the 11th grade or higher before ending their schooling. The average of 9.9 years (or 9 years and 11 months) for highest grade completed is identical to the program mean each year since 1990 (Table 7).

▶ Two of every three adults tested (66.2 percent) reported that they took the tests for further training and education beyond the high school level. Among the three subgroups reported, the percentage varied significantly (United States and IAFAS, 66.1 percent; Canada, 59.5 percent; and Federal Contracts, 77.3 percent). The overall rate is 10 percent higher than the 1990 rate of 56.5 percent, and 27 percent higher than the rate of 39 percent in 1953, when this statistic was reported for the first time (Tables 8 and 11).

#### **Special Editions and Special Testing Accommodations**

▶ About 94 percent of adults worldwide who took the GED Tests battery in 2000 were administered an English-language print edition of the tests. Just under 46,000 adults took the Spanish-language

edition in 2000—a decrease of about 6,000 since 1999. About 38 percent of the Spanish-language edition tests administered in 2000 were administered in Puerto Rico (Table 5).

▶ The number of adults taking the audiocassette and Braille editions of the GED Tests declined by about one-third in 2000 from the previous year. Yet the number of special editions administered (including audiocassette, Braille, and large print) has increased by 15 percent since 1993 (Table 5 and Figure 5; also see *1993 Annual Statistical Report*).

▶ The number of adults (8,071) receiving testing accommodations (extra time, use of special reading or optical devices, alternative answer-recording methods, and other) in 2000 represented an increase of more than 110 percent over the number receiving accommodations in 1993 (Table 6 and Figure 6; also see *1993 Annual Statistical Report*).

▶ While the overall number of requests for specific learning disability (SLD) accommodations decreased by 19 percent in 2000 from the previous year, Alabama tripled, and Georgia and Virginia more than doubled the number of requests for SLD accommodations between 1999 and 2000 (Table 6).

**TABLE 1**  
**GED Test Battery Completion and Credentials Issued: Percent Change<sup>1</sup> from 1999 to 2000**

► Nearly 748,000 adults worldwide completed the GED Tests battery in 2000—about the same as in 1999 (752,000).

► More than 519,000 adults met the score requirements of their jurisdictions in 2000—1.5 percent fewer than the 527,339 reported in 1999.

<sup>1</sup> Percent change is calculated by subtracting the number reported for 1999 from the number reported for 2000, then dividing the difference by the number reported for 1999.

<sup>2</sup> During the 1999 calendar year, credentialing for GED graduates testing through Prometric (see 7 below) was transferred from Iowa to Maine.

<sup>3</sup> Numbers for Mississippi in 2000 are estimated based on previous reports.

<sup>4</sup> Utah's numbers in 1999 have been revised since the last report.

<sup>5</sup> N/A = not available at time of publication.

<sup>6</sup> Prior to 1998, data for the Federated States of Micronesia, the Republic of Palau, and the Republic of the Marshall Islands were reported under Micronesia. All three jurisdictions are self-governing and have free-association status with the United States.

<sup>7</sup> For all tables in this report, note that the Northern Mariana Islands is a self-governing commonwealth of the United States.

<sup>8</sup> IAFAS = Insular Areas and Freely Associated States.

<sup>9</sup> Federal contracts categories (Tables 1-3; 5-8): Successful candidates taking the GED Tests through these venues are awarded credentials by a jurisdiction based on their address of record, current residency status, or through a prior arrangement.

Jurisdiction	Completed GED Test Battery		Percent Change	Met Score Requirements		Percent Change	Credentials Issued		Percent Change

**TABLE 1**

*Continued*

► The rate of international testing nearly doubled, increasing by 85 percent over the number of adults who completed the GED Tests battery in 1999.

► Four Canadian jurisdictions reported GED Tests battery completion increases of 10 percent or more: Yukon Territory (65.8 percent), Prince Edward Island (27.1 percent), Ontario (17.1 percent), and Newfoundland (13.2 percent).

**FIGURE 1**

**Number of People Who Completed GED Test Batteries in 1999 and 2000, by Region**

**International**—Civilians of any nationality tested through Prometric, a division of Sylvan Learning, Thomson ITP. In previous years, testing overseas was available only to U.S. and, later, to Canadian civilians tested through specially established centers and/or U.S. Embassies. These data were reported in prior years as "U.S. Civilians Overseas" and later as "U.S. Embassies."

**Overseas: Non-Military**—Military family members and U.S. government personnel tested on U.S. military bases overseas.

**Overseas: Military**—U.S. military personnel tested on U.S. military bases overseas.

**CONUS Military**—U.S. military personnel tested on military bases within the continental United States This category may include some non-military personnel, such as dependent family members.

**NOTE:** Please refer to p. 37 for definition of geographic regions.

**SOURCE:** GEO Testing Service, American Council on Education.

<sup>1</sup> This number includes high school students who participated in special pilot GED programs for in-school youth.

<sup>2</sup> This percentage is based on the number of candidates who met their jurisdiction's score requirements divided by the number completing the entire battery, either for the first time or by retesting from previous years.

<sup>3</sup> N/A = not available at time of publication.

<sup>4</sup> IAFAS = Insular Areas and Freely Associated States.

**TABLE 2**

*Continued*

More than 860,000 adults participated in the GED Testing Program by taking at least one test in 2000—similar to the number in 1999, and a 4.7 percent increase over the number in 1998.

More than two of every three adults worldwide (69.5 percent) who completed the GED Tests met the passing score requirement of their jurisdictions.

In addition to those adults who completed all five tests in the GED Tests battery, a total of 113,067 candidates completed part of the five-test battery in 2000, and many are expected to complete the GED Tests battery and earn a credential in 2001.

**FIGURE 2**

<sup>1</sup> Age group percentages for each category are calculated by dividing the total number of persons in that category who fall in that age group by the total number of persons in the category reporting their age and multiplying the result by 100. This process is used for all similar tables in this report.

<sup>2</sup> Number is an estimate based on previous reports.

<sup>3</sup> N/A = not available at time of publication.

<sup>4</sup> IAFAS = Insular Areas and Freely Associated States.

**TABLE 3**

*Continued*

► The average age of adults taking the GED Tests worldwide was 24.7 years (24.5 in the United States and Insular Areas and Freely Associated States, or IAFAS; 30.9 in Canada; and 29.8 in Federal Contracts programs).

► Among adults taking the tests worldwide in 2000, more than two of three (71 percent) were aged 19 years or older.

► In 2000, a slight shift upward occurred in the average age of GED candidates. Almost 5,000 fewer adults aged 19 or younger participated, while over 10,000 more adults between the ages of 20 and 29 participated than in 1999.

**TABLE 4**

*Continued*

▶ A third of GED credentials awarded in the United States (31.8 percent) went to adults aged 18 or younger—the age when their traditional high school classmates earn diplomas.

▶ Only 1.4 percent of Canadian adults earning a credential in 2000 were aged 18 or younger.

▶ Almost half of the adults (48.5 percent) earning GED credentials in 2000 were between the ages of 19 and 39.

▶ One of every five GED credentials (20.1 percent) was earned by an adult aged 30 or older.

**FIGURE 4**

**TABLE 5**

**Number of People Tested, by Edition**

▶ About 94 percent of adults worldwide taking the GED Tests in 2000 were administered an English-language print edition of the tests.

▶ Just under 46,000 adults worldwide took the Spanish-language edition in 2000—a decrease of about 5,000 since 1999. About 38 percent of the Spanish-language edition tests administered in 2000 were administered in Puerto Rico.

**TABLE 5**

*Continued*

► The overall number of adults taking the Spanish-language edition of the GED Tests in Puerto Rico decreased—from 20,617 in 1999 to 17,159 in 2000. But in both years, more than 95 percent of all Puerto Rican adults taking the tests chose to take the Spanish-language edition.

► Among adults taking the GED Tests in Federal Corrections Institutions, the percentage taking the Spanish-language edition decreased to 16 percent in 2000, from 25 percent in 1999.

► Two jurisdictions accounted for almost the entire 20 percent increase in French-language editions administered in 2000: New York, with a 19 percent increase, and New Brunswick, with a 29 percent increase from 1999.

<sup>1</sup> Accommodations to standard testing conditions include extended testing time, use of special reading or optical devices, alternative answer-recording methods, and miscellaneous other adaptations to standard testing conditions. A candidate may be granted a combination of these adaptations as described in the *GED Examiner's Manual* and the *GED Testing Service brochure, "Accommodating Accommodations."*

<sup>2</sup> These numbers represent requests to jurisdictions for adaptations to standard testing conditions based on specific learning disabilities (SLD).

<sup>3</sup> N/A = not available at time of publication.

<sup>4</sup> IAFAS = Insular Areas and Freely Associated States.

NOTE: "Special Testing Accommodations" refers to the number of adaptations to standard testing conditions. "SLD Requests" refers to the number of persons requesting accommodations based on specific learning disabilities. Some candidates may require multiple accommodations to be tested fairly. An additional method of accommodation is the use of special editions of the GED Tests—Audiocassette, Braille, and Large Print (please refer to Table 5).

*Continued*

▶ The number of adults (8,071) receiving testing accommodations (i.e., extended time, alternate answer methods) in 2000 represented an increase of more than 110 percent over the number receiving accommodations in 1993.

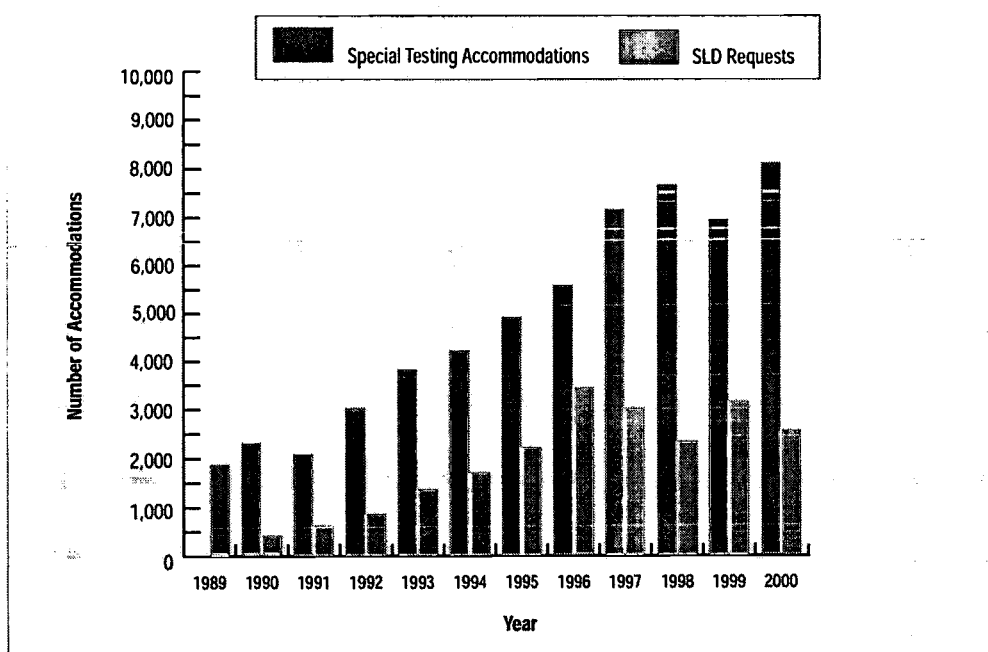

▶ The number of adults receiving other accommodations (i.e., private room, frequent breaks) in 2000 increased by 40 percent from 1999. The number of adults using a reading device decreased by 31 percent.

▶ While Alabama tripled, Georgia and Virginia almost doubled the number of requests for specific learning disabilities (SLD) accommodations between 1999 and 2000.

▶ The overall number of requests for SLD accommodations decreased by 19 percent in 2000.

<sup>1</sup> Grade completed percentages for each category are calculated by dividing the total number of persons in that category who completed the specified grade by the total number of persons in that category reporting their last grade completed and multiplying the result by 100. This process is used for all similar tables in this report.

<sup>2</sup> N/A = not available at time of publication.

<sup>3</sup> Secondary school placement systems in Europe, Asia, the Middle East, and elsewhere are not easily correlated to North American practices.

<sup>4</sup> IAFAS = Insular Areas and Freely Associated States.

**NOTE:** These numbers include both those candidates who did and did not meet the minimum score requirement in each jurisdiction.

**TABLE 7**

*Continued*

- ▶ More than one in three adults (37.4 percent) who took the tests in 2000 reported completing at least the 11th grade before leaving high school.
- ▶ Two of every three adults tested (67.1 percent) reported completing the 10th grade or higher before leaving high school.
- ▶ The averages of highest grade completed are identical (9.9 years, or 9 years and 11 months) for all three subgroups reported (United States + IAFAS, Canada, and Federal Contracts). The 9.9 mean value for highest grade completed has been 9.9 years each year since 1990.

**TABLE 8**

*Continued*

Two of every three adults worldwide (66.2 percent) tested in 2000 reported that they took the GED Tests for further training and education beyond the high school level. Among the three subgroups reported, the percentage varies significantly (United States and IAFAS, 66.1 percent; Canada, 59.5 percent; and Federal Contracts, 77.3 percent). The overall rate is 10 percent higher than the 1990 rate of 56.5 percent.

Almost one in three adults (30.4 percent) tested in 2000 cited employment as their motivation for earning a high school credential. Among the three subgroups reported, the percentage ranged from 30 to over 36 percent (United States and IAFAS, 30.2 percent; Canada, 36.4 percent; and Federal Contracts, 34.2 percent).

The number of active-duty military personnel who took the GED Tests in 2000 increased by 41 percent, compared to 1999.

**FIGURE 8**

**Number of GED Candidates Planning Further Study, Compared with Total Number Tested, 1961–2000**

SOURCE: GEO Testing Service, American Council on Education.

**TABLE 9**

**Credentials Issued, 1990 and 1996–2000; Percent Change, 1990–2000; and Cumulative Credentials Issued Since 1971**

More than half a million adults worldwide (512,203) earned GED high school credentials in 2000. This number represents a decrease of less than one percent from 1999, but a 16 percent increase over 1990.

More than 13 million adults worldwide have earned GED credentials since 1971.

<sup>1</sup> Changes over decade may reflect changes in jurisdiction policies.

<sup>2</sup> — = These data were not collected, not reported, or calculations were not possible due to missing data.

<sup>3</sup> Utah's number in 1999 has been revised since the last report.

<sup>4</sup> Prior to 1998, data for the Federated States of Micronesia, the Republic of Palau, and the Republic of the Marshall Islands were reported under the category of "Micronesia"; 1997 data for the combined jurisdictions have been reported under the category of "Fed. Micronesia." All three jurisdictions are self-governing and have free-association status with the United States of America.

<sup>5</sup> IAFAS = Insular Areas and Freely Associated States.

<sup>6</sup> Cumulative data for New Brunswick were revised in 1999.

<sup>7</sup> Ontario initiated GED testing in 1996.

**TABLE 9**

*Continued*

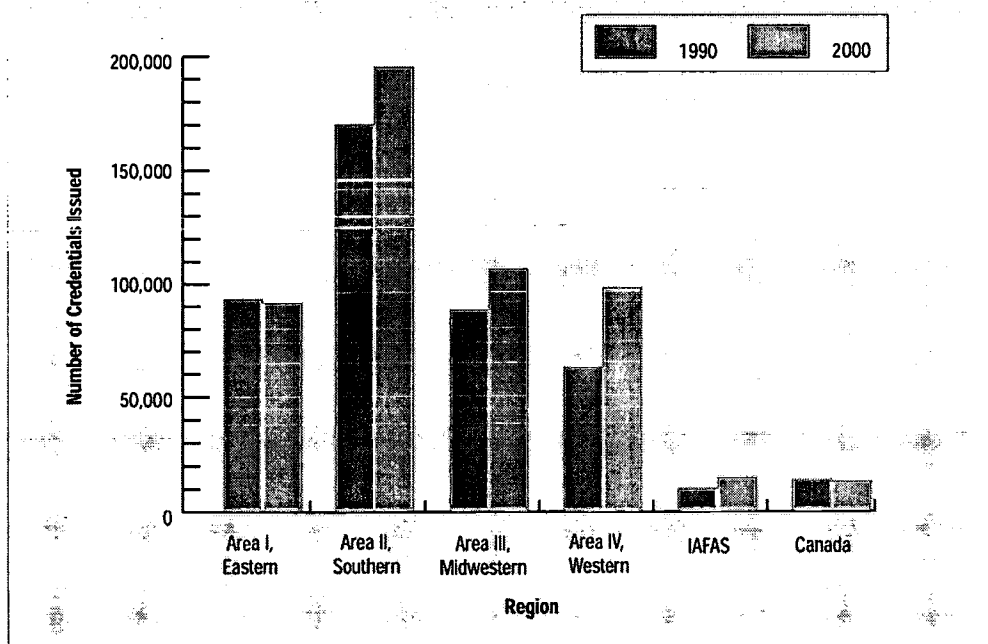

▶ The number of credentials awarded has remained steady at about half a million during the second half of this decade, with a one-time decrease of about 8 percent in 1997, when GEDTS introduced the higher passing standard.

▶ During the 1990s, the annual number of GED credentials awarded has increased by 49 percent or more in 11 jurisdictions: Utah (478 percent), Guam (183.3 percent), Wisconsin (173.9 percent), Prince Edward Island (154.5 percent), Virgin Islands (150 percent), California (104.6 percent), Nevada (68 percent), Maine (58.7 percent), Alaska (57.7 percent), Puerto Rico (51.5 percent), and Washington (49.5 percent).

▶ Four jurisdictions showed a decrease of 40 percent or more in the annual number of GED credentials awarded this decade: Newfoundland (77.2 percent), Northwest Territories (70.1 percent), Manitoba (60.3 percent), and Idaho (41 percent).

<sup>1</sup> Population totals for the United States and Insular Areas and Freely Associated States (IAFAS) are based on 1990 U.S. Census data for persons ages 16 and older, out of school, without high school diplomas (unpublished document tabulated for the U.S. Department of Education by the U.S. Bureau of the Census, 1993). The numbers are estimates from a 20 percent sample of the U.S. population and are derived from the Summary Tape File 3 (STF3), 1990 Census of Population and Housing. Population totals for Canadian jurisdictions are based on 1991 Canada Census data for persons ages 15 and older, out of school, without secondary-level credentials or further training (Statistics Canada, 1991 Canada Census; Cat. No. 93-328, Table 5).

<sup>2</sup> Participation rate is the number of persons completing the GED battery divided by the population of out-of-school adults without secondary-level (high school) credentials.

<sup>3</sup> Credentialing rate is the number of persons issued GED credentials divided by the population of out-of-school adults without secondary-level (high school) credentials.

<sup>4</sup> N/A = not available.

<sup>5</sup> — = Not reported, not possible to calculate, or not applicable.

<sup>6</sup> IAFAS = Insular Areas and Freely Associated States.

**TABLE 10**

*Continued*

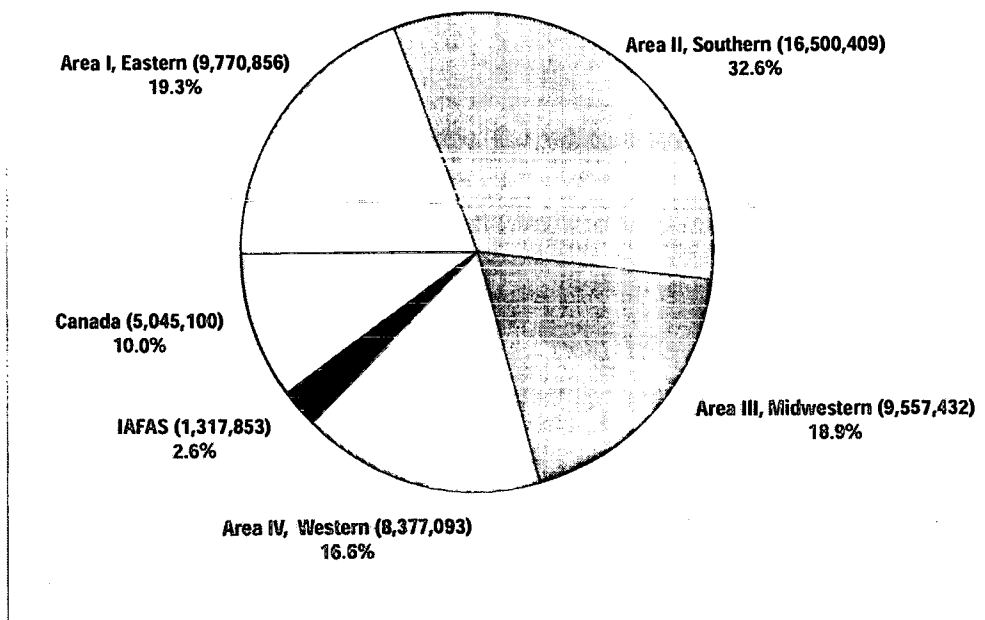

▯ In 1990, an estimated 50 million adults throughout North America lacked high school diplomas. Among the three sub-groups reported, there were more than 44 million in the United States, 1 million in the U.S. Insular Areas and Freely Associated States (IAFAS), and about 5 million in Canada.

▯ In 2000, only 1.5 percent of adults who did not graduate from high school attempted to earn a high school credential by passing the GED Tests. Program-wide, only about 1 percent of adults without high school diplomas earned a GED credential in 2000. These rates have not changed appreciably since 1990.

▯ Three states roughly tripled the 1 percent international credentialing rate: Alaska (4.2 percent), Utah (3.2 percent), and Maine (2.9 percent).

**FIGURE 10**

**Number and Percentage of Adults Without High School Diplomas, by Region<sup>1</sup> (U.S. 1990, Canada 1991)**

<sup>1</sup> Please refer to p. 37 for definition of geographic regions.

**TABLE 11**

**Trends in GED Testing, 1949-2000**

▷ An estimated 14.7 million adults worldwide have earned GED credentials since 1949.

▷ More adults worldwide (860,684) took the GED Tests in 2000 than in any previous year except 1996 (867,802) just before GEDTS raised the minimum passing score on the GED Tests battery.

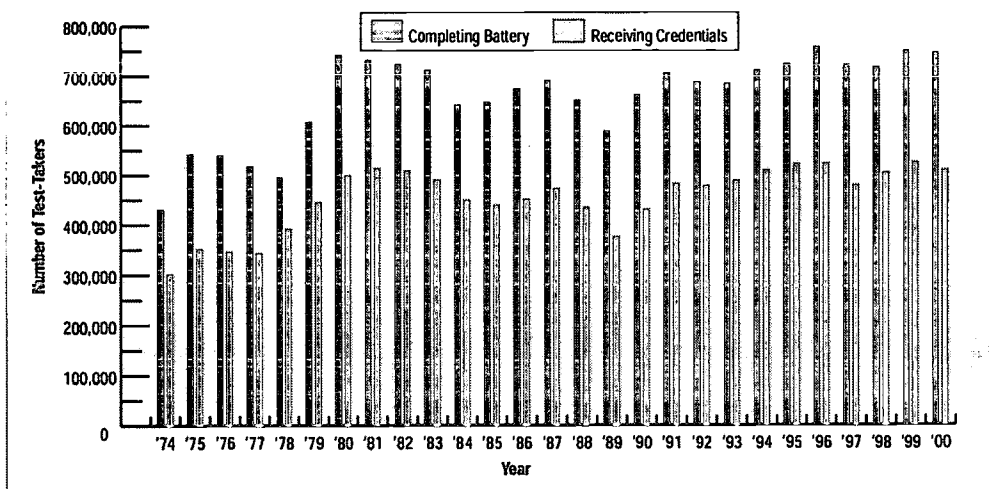

▷ More adults (747,617) completed the GED Tests battery in 2000 than in all but two previous years: 1996 (758,570), just before GEDTS raised the minimum passing score on the GED Tests battery, and 1999 (757,637).

▷ The percentage of adults who take the GED Tests and who are planning further studies has increased to 66.2 percent in 2000 from 34.8 percent before 1953.

**TABLE 12**

**GED Passing Score Requirements:<sup>1</sup> Percentage of High School Graduates Meeting GED Standard and Jurisdictions Requiring GED Standard in 2000**

*As a result of the increased passing score requirement in 1997, all GED graduates must now meet a standard that exceeds the performance of at least 33 percent of graduating high school seniors.*

<sup>1</sup> Jurisdictional requirements are described in the *GED Examiner's Manual*, Sections 3.8-3–3.8-5.

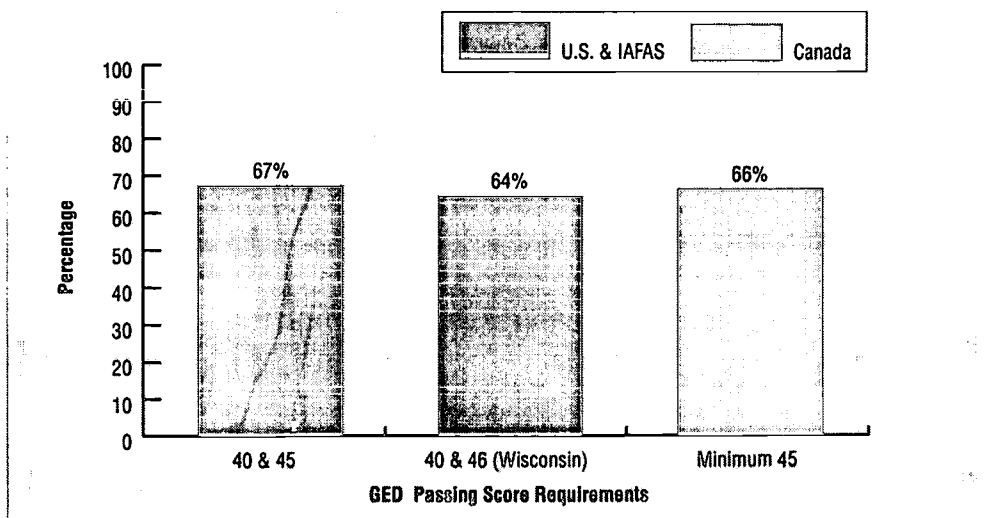

<sup>2</sup> Each jurisdiction that awards high school equivalency credentials based on the GED Tests establishes its own minimum score requirement. In January 1997, the GED Testing Service raised the minimum score requirement for passing the GED Tests to a minimum of 40 per test and a mean standard score of 45. In the United States, this minimum standard was met by 67 percent of graduating high school seniors. Jurisdictions may set passing score requirements that are more stringent than this established minimum, but may not set a lower standard.

<sup>3</sup> U.S. percentages are based on data from a national sample of graduating high school seniors who took all five sections of the GED Tests in the spring of 1996. The percentage reported for Canada is an estimate based on the performance of Canadian high school seniors who took individual GED Tests during the spring of 1996. This percentage was estimated using a conditional probability method.

**Percentage of High School Graduates Meeting GED Passing Score Requirements in the United States, Insular Areas and Freely Associated States, and Canada**

**TABLE 13A**

**Effects of Higher GED Score Requirements on Passing Rate—Jurisdictions Where Standard Was Raised in 1997**

▷ In 2000, the overall passing rate in those jurisdictions where the standard was raised in 1997 was 69 percent. This figure was 2.8 percent lower than the 1996 overall passing rate of 71.8 percent.

▷ Although raising the passing standard in 1997 tended to reduce the passing rate in most jurisdictions, about 40 percent of jurisdictions that increased score requirements in 1997 reported higher passing rates in 2000 than in 1996.

▷ Area II, the Southern Region, reported a passing rate in 2000 of 64.8 percent, or 5.6 percent lower than its 1996 passing rate of 70.4 percent. IAFAS showed a 2000 passing rate of 72 percent, which is 5.6 percent higher than their 1996 passing rate of 66.4 percent.

**TABLE 13B**  
Effects of Higher GED Score Requirements on Passing Rate—Jurisdictions Where Standard Was Not Raised in 1997

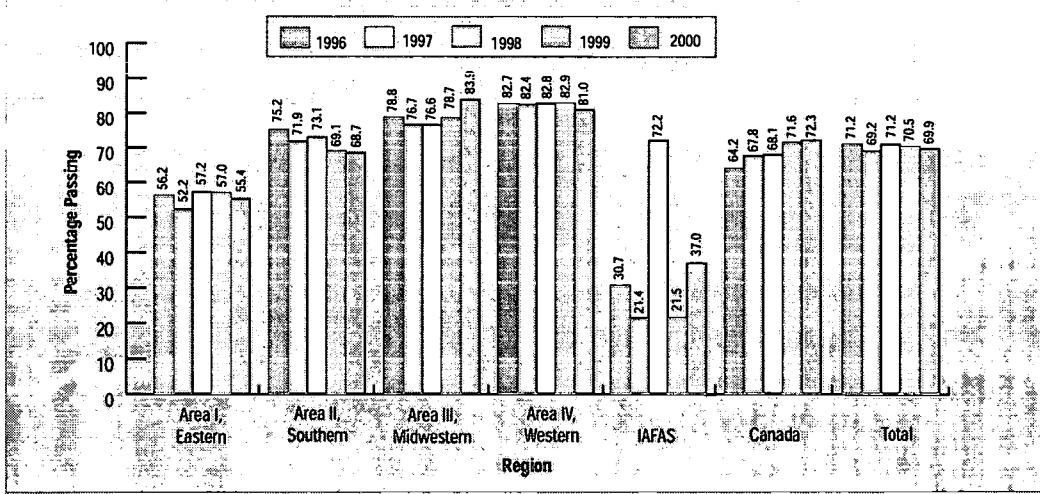

▷ In 2000, the overall passing rate (69.9 percent) of those jurisdictions where the standard was not raised in 1997 was 1.3 percent lower than their 1996 passing rate of 71.2 percent.

▷ In jurisdictions that did not raise their standards in 1997, passing rates in 2000 increased in half the jurisdictions over 1996 levels and decreased in the other half of the jurisdictions.

▷ Area II, the Southern Region, reported an overall decrease of 6.5 percent in the passing rate in states not raising their passing standard. In states raising their standard, the decrease was slightly smaller.

▷ Area III, the Midwestern Region, saw an overall increase of 5.1 percent in the passing rate since 1996. Canada reported an 8.1 percent increase in the passing rate since 1996.

South Carolina	40 min & 45 avg	resident or last attended school in state	\$40-\$80	17	17
South Dakota	40 min & 45 avg	resident or last attended school in state	\$50 max.	18	18
Tennessee	40 min & 45 avg	resident	\$35-\$45	18	18
Texas	40 min & 45 avg	resident	varies	18	18
Utah	40 min & 45 avg	verify residence	\$40	18	17
Vermont	40 min & 45 avg	in-state mailing address	\$35-\$40	18	16
Virginia	40 min & 45 avg	resident	\$35	18	18
Washington	40 min & 45 avg	bona fide resident	\$40 max.	19	19
West Virginia	40 min & 45 avg	30 days	\$33 max.	18	18
Wisconsin	40 min & 46 avg	voting resident or migrant worker	approx. \$40	18.5	18.5
Wyoming	40 min & 45 avg	must physically reside in state	varies	18	18

<sup>1</sup> See jurisdictional requirements in the *GED Examiner's Manual* for exceptions, limitations, and additional fees, or contact the jurisdictional GED Administrator (listing on pages 36-39).

<sup>2</sup> Minimum scores of "40 and 45" means that a person must achieve a standard score of at least 40 on each test and must achieve an average standard score of 45 or more on the entire battery.

<sup>3</sup> In most—but not all—jurisdictions, exceptions to the minimum age policy are granted on a case-by-case basis. For more information, contact the jurisdictional GED Administrator (listing on pages 36-39).

<sup>4</sup> Connecticut offers free GED testing for persons under age 21.

<sup>5</sup> Florida's minimum score requirement from July 1, 1999, until June 30, 2000, was a minimum of 44 on each test and an average standard score of 45. Effective July 1, 2000, through June 30, 2001, Florida's score requirement is a minimum of 45 on each test.

<sup>6</sup> New Jersey's requirements are 42 on Test 1, 40 on Tests 2-4, 45 on Test 5, and a total standard score of 225.

Jurisdiction	Minimum Scores <sup>a</sup>	Residency Requirements	Testing Fee Per Battery	Min. Age for Testing <sup>b</sup>	Min. Age for Credential <sup>c</sup>
<b>U.S. Insular Areas and Freely Associated States</b>					
American Samoa	40 min & 45 avg	bona fide resident	\$20	18	18
Guam	40 min & 45 avg	resident; see policy for exceptions	\$20	16	18
Marshall Islands	40 min & 45 avg	citizen or 30-day resident	\$7.50	17	17
Micronesia	40 min & 45 avg	citizen or current resident	\$7.50	17	17
N. Mariana Islands	40 min & 45 avg	none	\$25	18	18
Palau	40 min & 45 avg	resident	\$25	17	17
Puerto Rico	40 min & 45 avg	resident or U.S. citizen	none	18	18
Virgin Islands	40 min & 45 avg	see policy	\$25	16	16
<b>Canada</b>					
Alberta	45 minimum	must have Alberta address	\$65-\$120	18	18
British Columbia	45 minimum	resident, citizen or landed immigrant	\$45	19	19

Saskatchewan	45 minimum	resident	\$35	19	19
Yukon	45 minimum	resident	\$25	19	19

**TABLE 14**

*Continued*

▷ For most U.S. jurisdictions, the minimum age for issuing credentials is 18. In Canada, most jurisdictions set a minimum credentialing age of 19.

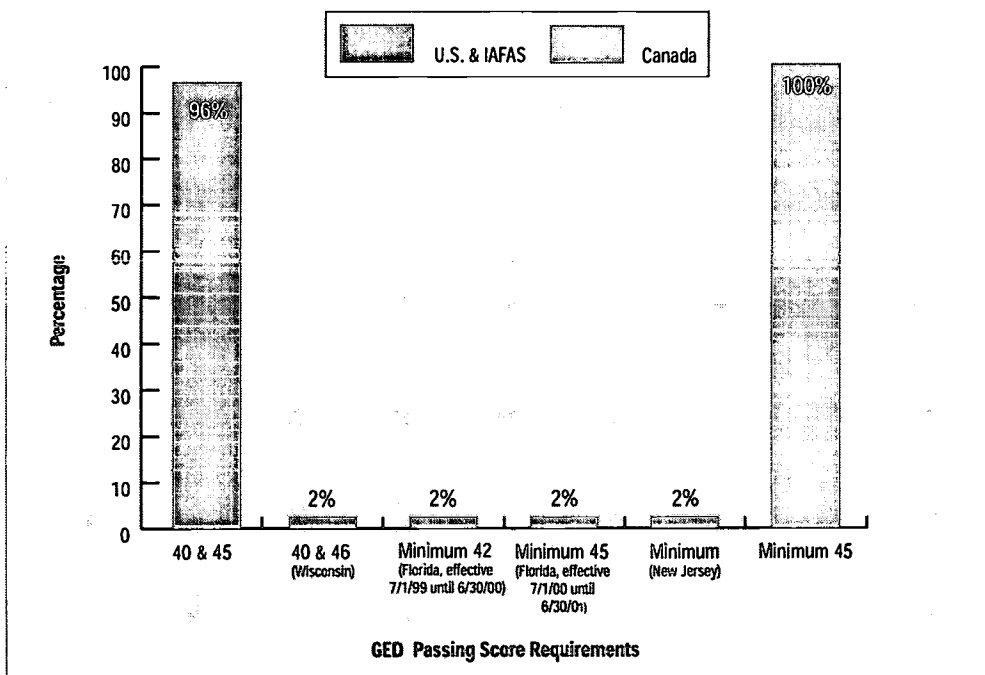

▷ Residency and testing fee requirements are established by each jurisdiction.

▷ Only three jurisdictions, all in the United States, regularly test and credential 16-year-olds: Maryland, New Jersey, and the Virgin Islands.

▷ Only three U.S. states and all the Canadian jurisdictions impose a stricter GED passing-score requirement than a 40 minimum and 45 average. Canada and Florida have established a minimum of 45 on each test; New Jersey, 42 on Test 1 and 45 on Test 5; and Wisconsin, 40 minimum on each test and mean battery score of 46.

# Selected GED Publications

*Who Took the GED? GED 1999 Annual Statistical Report (2000)* \$15.00; Item 250800.  
*Who Took the GED? GED 1998 Annual Statistical Report (1999)* \$10.00; Item 250798.  
*Who Took the GED? GED 1997 Annual Statistical Report (1998)* \$10.00; Item 250797.  
*Who Took the GED? GED 1996 Annual Statistical Report (1997)* \$5.00; Item 250796.  
*Who Took the GED? GED 1995 Annual Statistical Report (1996)* \$5.00; Item 250795.  
*Who Took the GED? GED 1994 Annual Statistical Report (1995)* \$5.00; Item 250794.  
*Who Took the GED? GED 1993 Annual Statistical Report (1994)* \$5.00; Item 250793.  
*GED 1992 Annual Statistical Report (1993)* \$5.00; Item 250792.  
*GED 1991 Annual Statistical Report (1992)* \$5.00; Item 250791.  
*GED 1990 Annual Statistical Report (1991)* \$5.00; Item 250790.  
*GED 1989 Annual Statistical Report (1990)* \$5.00; Item 250789.  
*GED Annual Statistical Report Set: 1980–1988* \$105.00; Item 250780–88.

*Alignment of National and State Standards: A Report by the GED Testing Service (1999)* \$22.99; K. Woodward, editor; Item 261418.

Compares national and state secondary school standards in the four core academic areas. This report informs educators and the public about the new GED Tests scheduled for release in January 2002 and synthesizes the standards in each discipline. Includes an Executive Summary, also available online at <http://www.gedtest.org>.

*Information Bulletin on the Tests of General Educational Development (GED) (1998)* free; Item 250605.

Includes sample test questions, information on how to prepare, and where to call for more information.

*The Literacy Proficiencies of GED Examinees: Results from the GED-NALS Study (1996)* \$20.00; Baldwin, J., Kirsch, I., Rock, D., and Yamamoto, K.; Item 250802.

Presents findings about the literacy proficiencies of adults who take the GED Tests as compared to others evaluated in the National Adult Literacy Survey. The report also explores the skills measured in common by the GED Tests and the National Adult Literacy Survey scale.

*The Tests of General Educational Development Technical Manual (1993)* \$20.00; Auchter, J., Sireci, S., and Skaggs, G.; Item 251203.

Used by those individuals who select or evaluate tests, interpret test scores, or use GED test results. Includes information on test content, norming, scaling, and equating as well as reliability and validity information.

*GED Profiles: Adults in Transition 1990–1994 (1990)* \$55.00; Item 250706.

Seven policy-relevant research reports, based on a 1989 survey of GED candidates, cover a range of findings related to educational background and goals; employment status; demographic, economic, and social factors; and performance of GED candidates.
