

Eligibility Policies and Practices for Young Children Under Part B of IDEA

by Joan Danaher

The identification of young children in need of special education and related services has been an issue with advocates, service providers, parents, researchers, and policy makers for years. The enactment in 1975 of the Education for All Handicapped Children Act (P. L. 94-142) required states and jurisdictions to provide special education and related services to children identified by the disability categories enumerated in the law (hereinafter referred to as Part B categories). This hard-won legislation was deemed an important civil rights act for children with disabilities, and it was important to specify just who was protected by this law.

As implementation of this legislation continued throughout the late 1970s and into the 1980s, concerns were raised in some quarters about how applicable and appropriate some of the disability categories are for very young children. The research community was, and remains, concerned that in young children, some developmental domains are so interrelated — e.g., cognition and language — that the underlying disability may not be readily determined. The emphasis on assignment of a disability category in order to provide access to services may result in inappropriate diagnoses and services. Some advocates maintain that labeling children with some disabling conditions in their early years creates a self-fulfilling prophecy and unfairly stigmatizes children who, with early intervention, may not continue to need special education.

In response to these concerns and to support states that had begun using noncategorical eligibility criteria for preschoolers, Congress incorporated several revisions addressing eligibility for preschoolers in subsequent reauthorizations of the law. In 1986, P. L. 99-457 — which encouraged states to serve all eligible children with disabilities from age 3 — relieved states of reporting to the U. S. Department of Education the numbers of 3- through 5-year-olds served by disability category. In 1991, P. L. 102-119 amended the law, by then renamed the Individuals with Disabilities Education Act (IDEA), to allow states, at their option, to incorporate an additional disability category for children, ages 3 through 5 years, who are experiencing developmental delays.

Continued...

The National Early Childhood Technical Assistance Center

More recently, the IDEA Amendments of 1997, P. L. 105-17, expanded the options that state and local education agencies (LEAs) have to identify young children with disabilities. States and locals may now apply the term developmental delay, or a term defined by the state to include children experiencing developmental delay, to 3- through 9-year-olds or a subset of this age group. The regulations for P. L. 105-17 charge the states with defining developmental delay, the age range to which it applies, and the diagnostic instruments and procedures that will be used to determine delay in the developmental areas. If the state has such a definition, LEAs may choose to use it, applying it to the age range specified by the state, but they may not use a locally defined term. The Part B disability categories currently included in IDEA are presented in Table 1. Table 2 presents the Part B regulations for developmental delay. It should also be noted here that P.L. 105-17 reinstated a reporting re-

quirement that children ages three through five served under Part B of IDEA be counted by disability category.

In response to states' interest in whether or how other states are using developmental delay or other eligibility category specific to 3- through 9-year-olds, the author, at NECTAC, analyzed the current eligibility classifications and criteria as retrieved from states' web sites, the National State Policy Database (2003) and/or provided by the coordinators of the state Part B-Section 619 programs, including the District of Columbia.

Periodically data presented in this report are sent to the coordinators for their review. The corrections and clarifications provided by the coordinators have been incorporated into this report. The results of the analysis are discussed below and are summarized in Table 3. Table 4 details each state's chosen disability term(s) for early childhood, the age range to which it applies, criteria for eligibility under that term, use of other Part B disability categories, restrictions on use of the early childhood disability category, and other comments. These data are maintained by the author at <http://www.nectac.org/pubs/pdfs/nnotes13.pdf>

Table 1

Part B Disability Categories Under IDEA

§1401. Definitions

Except as otherwise provided, as used in this chapter:

(3) Child with a disability

(A) In general – The term “child with a disability” means a child—

(i) with mental retardation, hearing impairments (including deafness), speech or language impairments, visual impairments (including blindness), serious emotional disturbance (hereinafter referred to as “emotional disturbance”), orthopedic impairments, autism, traumatic brain injury, other health impairments, or specific learning disabilities; and

(ii) who, by reason thereof, needs special education and related services.

(B) Child aged 3 through 9 – The term “child with a disability” for a child aged 3 through 9 may, at the discretion of the State and the local educational agency, include a child—

(i) experiencing developmental delays, as defined by the State and as measured by appropriate diagnostic instruments and procedures, in one or more of the following areas: physical development, cognitive development, communication development, social or emotional development, or adaptive development; and

(ii) who, by reason thereof, needs special education and related services.

IDEA Amendments of 1997; 20 U.S.C. §1401 (3)

Findings

The analysis revealed variations among state policies in terminology, age range assigned to the category, eligibility criteria, and restrictions on its use:

Disability Terminology Used for Young Children

State eligibility policies for young children under Part B of IDEA have evolved to reflect best practice and to respond to changes in the federal law. Fifty of the fifty-one jurisdictions included in this analysis include a disability category unique to young children, including one state that offers LEAs the option of a non-categorical approach to identification of eligible children of all ages. Thirty-five (35) states have chosen to use “developmental delay” or a variant such as “significant developmental delay” as a disability category for eligible young children, ages three through 9, or a subset of that age range. For years pre-dating the addition of developmental delay as a disability category under Part B, some states chose to use more generic descriptors of disability for young children or may even have adopted non-categorical eligibility policies for all ages. Terms such as “preschool delay,” “preprimary impaired,” “preschool special needs,” among others were adopted by states to more appropriately address the unique

Table 2

IDEA Regulations Related to Developmental Delay for Children Ages 3 Through 9 Years

§300.7 Child with a disability.

(a) General. (1) As used in this part, the term child with a disability means a child evaluated in accordance with §§300.530-300.536 as having mental retardation, a hearing impairment including deafness, a speech or language impairment, a visual impairment including blindness, serious emotional disturbance (hereafter referred to as emotional disturbance), an orthopedic impairment, autism, traumatic brain injury, an other health impairment, a specific learning disability, deaf-blindness, or multiple disabilities, and who, by reason thereof, needs special education and related services.

(2)(i) Subject to paragraph (a)(2)(ii) of this section, if it is determined, through an appropriate evaluation under §§300.530-300.536, that a child has one of the disabilities identified in paragraph (a)(1) of this section, but only needs a related service and not special education, the child is not a child with a disability under this part.

(ii) If, consistent with §300.26(a)(2), the related service required by the child is considered special education rather than a related service under State standards, the child would be determined to be a child with a disability under paragraph (a)(1) of this section.

(b) Children aged 3 through 9 experiencing developmental delays. The term child with a disability for children aged 3 through 9 may, at the discretion of the State and LEA and in accordance with §300.313, include a child—

(1) Who is experiencing developmental delays, as defined by the State and as measured by appropriate diagnostic instruments and procedures, in one or more of the following areas: physical development, cognitive development, communication development, social or emotional development, or adaptive development; and

(2) Who, by reason thereof, needs special education and related services.

§ 300.313 Children experiencing developmental delays.

(a) Use of term developmental delay. (1) A State that adopts the term developmental delay under §300.7(b) determines whether it applies to children aged 3 through 9, or to a subset of that age range (e.g., ages 3 through 5).

(2) A State may not require an LEA to adopt and use the term developmental delay for any children within its jurisdiction

(3) If an LEA uses the term developmental delay for children described in §300.7(b), the LEA must conform to both the State's definition of that term and to the age range that has been adopted by the State.

(4) If a State does not adopt the term developmental delay, an LEA may not independently use that term as a basis for establishing a child's eligibility under this part.

(b) Use of individual disability categories. (1) Any State or LEA that elects to use the term developmental delay for children aged 3 through 9 may also use one or more of the disability categories described in §300.7 for any child within that age range if it is determined, through the evaluation conducted under §§300.530-300.536, that the child has an impairment described in §300.7, and because of that impairment needs special education and related services.

(2) The State or LEA shall ensure that all of the child's special education and related services needs that have been identified through the evaluation described in paragraph (b)(1) of this section are appropriately addressed.

(c) Common definition of developmental delay. A State may adopt a common definition of developmental delay for use in programs under Parts B and C of the Act. (Authority: 20 U.S.C. §1401(3)(A) and (B))

Assistance to States for the Education of Children with Disabilities Rule (2001).

Table 3
**Summary of State Eligibility Classifications and Criteria
 for Young Children Under Part B of IDEA**

Disability Terms Used

“Developmental delay” or a variant such as “Early Childhood Developmental Delay” is used by 35 states: AL, AK, CT, DE, FL, GA, HI, ID, IL, IN, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NV, NH, NM, NC, OK, OR, PA, RI, SD, TN, UT, VA, WA, and WI.

Other disability terms are designated by 18 states for some or all of the age range 3 through 9. DC uses the Part B categories only.

AZ	Preschool moderate delay, preschool severe delay, preschool speech/language delay
AR	Noncategorical
CA	Individual with exceptional needs
CO	Preschool child with a disability
DE	Preschool speech delay (in addition to DD)
ID, IA	Noncategorical approach permitted (for all ages)
KS	Early childhood disability (ages 3 through 5, use DD for ages 6 through 9)
MT	Child with disabilities (ages 3 through 5)
NJ	Preschool disabled
NY	Preschool student with a disability
ND	Noncategorical delay
OH	Preschool child with a disability
SC	Preschool child with a disability
TX	Noncategorical early childhood
VT	Eligible for essential early education – includes developmental delay, medical condition, extension of Part C eligibility
WV	Preschool special needs
WY	Developmental disability

Age Ranges for Developmental Delay and Other Early Childhood Disability Categories

Birth	through 5	(2)	MS and OR
	through 7	(1)	MI
Ages 2	through 8	(1)	VA
Age 3	only	(1)	DE (developmental delay)
Ages 3	through 4	(2)	DE (preschool speech delay) and NY
	through 5	(25)	AZ, AR, CA, CO, CT, FL, IL, IN, KS (early childhood disability), ME, MO, MT, NV, NJ, ND, OH, PA, RI, SC, SD, TX, VT, WV, WI, and WY
	through 6	(1)	MN
	through 7	(4)	GA, NC, OK, and UT
	through 8	(7)	AL, AK, HI, KY, LA, NE, and WA
	through 9	(6)	ID, MD, MA, NH, NM, and TN
Ages 6	through 9	(1)	KS (developmental delay)
All ages		(2)	ID, IA (permit LEAs to use noncategorical for all ages)

Application of Developmental Delay or Other Early Childhood Disability Categories

Eleven (11) states use developmental delay, or other disability term, for the age range to which it applies, *only after considering* other disability categories.

AK, AZ, CO, ID, MI, NM, ND, TN, UT, WI, and WY

Thirty-seven (37) states add developmental delay to the list of Part B disability categories.

AL, AK, CO, CT, FL, GA, HI, IL, IN, IA, KS (ages 6-9), KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NV, NH, NJ, NM, NC, ND, OR, PA, RI, SD, TN, TX, UT, VA, WI, and WY

Ten (10) states use developmental delay or other early childhood category to subsume all other Part B categories.

CA, IL, KS (ages 3-5), MO (permissible), MT, OH, SC, SD, WA, and WV

Eight (8) states use developmental delay or other early childhood category to subsume disabilities such as learning disability, mental disability, emotional disability, and/or autism.

AZ, AR, DE, ID, NY, OK, SC, and TX

Eligibility Criteria

Forty-one (41) states use quantitative criteria for determining developmental delay or state-designated early childhood disability category.

Thirty-three of the thirty-six (33 of 36) states that use standard deviations use 2.0 SD below the mean in one developmental area and/or 1.5 SD below the mean in 2 developmental areas. (Range 1.0 SD – 3.0 SD in one area).

Fifteen of the seventeen (15 of 17) states that use percent delay specify criteria within the range of 20 - 33% delay in one or two developmental areas. (Range 10-50% delay in one area)

A total of twenty-eight (28) states permit eligibility based on other than quantitative scores, including team consensus, diagnosed conditions, and/or locally determined criteria.

Thirteen (13) states specify quantitative criteria but expressly permit informed team consensus, professional judgment or informed clinical opinion in lieu of quantitative criteria.

CO, DE, FL, HI, ID, KY, MD, MN, MO, NE, NM, NC, and ND

Ten (10) states expressly permit early childhood eligibility based on the diagnosis of a condition associated with a disability. Note that eligibility criteria for other categories such as mental disability or other health impaired may include diagnosed conditions.

CA, CO, MD, MN, MS, NE, NJ, ND, RI, and VT

Ten (10) states do not specify quantitative criteria, but may provide guidance, and/or permit LEAs to set criteria.

CA, CT, IL, IA, KS, MA, NH, NJ, TX, and VA

One (1) state extends eligibility if a child received special instruction, developmental therapy services or speech services on an IFSP under Part C, for three years from initial Part C eligibility.

VT

developmental status of young children and to avoid premature and self-fulfilling labeling. Eighteen states use terms other than developmental delay for disability in young children. Please note that three states use *both* developmental delay and another term unique to preschool. Finally, only one jurisdiction reviewed for this paper does not use an eligibility category specific to early childhood. Each state's terminology, definition and criteria, and age range is shown in Table 4.

Age Ranges Used by States for Developmental Delay

IDEA '97 provided for the extension of developmental delay by allowing states to adopt the term for the age range 3 through 9, or any subset of that age range. To date, a total of twenty (20) states extend developmental delay beyond age five: one through age 6; five through age 7; eight through age 8; six through age 9; and, one uses developmental delay for ages 6 through 9. Two states permit LEAs to use a non-categorical approach for all ages.

Relationship Between Developmental Delay and Other Part B Categories

State policies also vary in the application of the developmental delay, or other disability category in the context of the other early childhood disability categories. Thirty-seven (37) states add developmental delay to the list of Part B disability categories used for eligibility. Some state policies are constructed such that developmental delay subsumes or is a substitute for all, or some of, the other disability categories. Ten (10) states define developmental delay as subsuming all of the other Part B disability categories. In eight (8) other states developmental delay subsumes some, but not all, of the other Part B categories. Thus a state might have as eligibility categories developmental delay and the other disability categories except for learning disability, mental disability, and emotional disability. There may be different reasons why states have constructed their policies in this manner. One may be to serve children for whom determination of a specific disabling condition is unclear. For example, speech delays may result from a number of causes. A second purpose may be to substitute developmental delay for some of the more stigmatizing disability terms such as emotional disturbance.

Eleven states limit the use of developmental delay to those children who do not qualify for one of the other disability categories. This "last resort" policy may serve the purpose of identifying children who "fall through the

cracks" in the early years only to be referred for special education services later. Each state's use of other Part B disability categories, and any restrictions on use of developmental delay, or other early childhood disability category, is shown in Table 4.

Eligibility Criteria for Developmental Delay

The criteria for developmental delay vary across states. Forty-one (41) states use quantitative criteria such as scores on developmental tests. Thirty-three (33) of the thirty-six (36) using norm referenced criteria use 2.0 standard deviations (SD) below the mean in one developmental area and/or 1.5 SD below the mean in two or more developmental areas. The range is 1.0 SD in one area to 3.0 SD in one area. Seventeen (17) states define delay in percentages. Fifteen (15) of them specify a delay in the range of 20 to 33 percent in one or two developmental areas. For example, a 36-month-old child functioning at a 27-month developmental level would be said to have a 25 percent delay.

States do not rely exclusively on quantitative criteria for developmental delay, however. Thirteen (13) states permit informed team consensus, professional judgment, or informed clinical opinion in lieu of test scores to determine eligibility. Ten (10) states allow eligibility based on a diagnosis of a condition associated with delay or deviation in development. Ten (10) states do not specify quantitative criteria, but may provide guidance, and/or permit LEAs to set the criteria. Finally, one state establishes eligibility for preschool special education based on a child's having received special instruction, developmental therapy services, or speech services through an IFSP under Part C, the Infant and Toddler Program. The child remains eligible for three years following initial eligibility for Part C services.

Conclusion

States have exhibited a strong interest in using the option of a developmental delay eligibility category for young children served by IDEA. Future changes in state eligibility policies may reflect several provisions related to eligibility policies and practices that are contained in the regulations. These provisions require that:

- ★ a variety of assessment tools and strategies, including information from parents, be used to gather relevant functional and developmental information to assist in determining eligibility (see 34 C.F.R. §300.532–Evaluation procedures);

- ★ a team of qualified professionals and the parent(s) of the child be involved in the eligibility decision (see 34 C.F.R. §300.534–Determination of eligibility); and
- ★ the IEP team for each eligible child include the parents of the child (see 34 C.F.R. §300.344–IEP team).

NECTAC will continue to monitor the evolution of states' special education eligibility policies for young children and will make this information available to states and other interested parties. Please address your updates, questions, or clarifications to the author at NECTAC.

Table 4
Summary Table of Early Childhood Special Education Eligibility Criteria
in the States, and District of Columbia, as of January 2004

How to Read This Table

Column 1 – State abbreviation

Column 2 – Developmental Delay or Early Childhood-Specific Category/Classification and Criteria

- Contains the state's term(s) in quotation marks for disability category used only for young children, typically in the age range 3 through 9 or a subset thereof
- Contains the eligibility criteria or said term(s)
- Criteria for early-childhood-specific eligibility categories typically reference a child's status in one or more developmental areas. The term "area" in this column refers to developmental area. Although states vary somewhat, most list five areas (or some variation thereof): cognitive, language, physical, psychosocial and self-help. SD refers to standard deviations below the mean on a norm-referenced standardized instrument.

Column 3 – Age Range for Developmental Delay or Early Childhood-Specific Category - the age range to which the category in column 2 applies

Column 4 – Use of Part B Disability Categories/Restriction on Developmental Delay or Early Childhood-Specific Category

- "Used" indicates which Part B disability categories are used for children in the early childhood age range designated by the state
- "Subsumed" indicates which Part B disability categories the state includes within its definition or criteria for DD or for its early childhood-specific category; developmental delay is used for categories such as learning disabilities which may be difficult to definitively diagnose in younger children
- "Restriction" indicates whether the state policy is to use developmental delay, or other disability term specific to early childhood, only if the child is not eligible under another category but meets the criteria for developmental delay, or other term

Column 5 – Source and Date. Sources include:

- Rules or regulations
- Guidance document such as Guidelines, Handbook
- State statute, code
- Departmental correspondence, bulletin, memo distributed within the state on implementing eligibility policy
- State's plan and procedures for implementing IDEA submitted to OSEP
- Subscript (pc) - personal communication from Section 619 Coordinator or other state official
- Date on the source document, date effective, or most recent date acknowledged. For example, some state documents on-line may show the most recent date that volume of regulations was updated. It may not mean that the regulations for special education changed on that date. NASDSE's FORUM project has provided leadership in the National State Policy Database and maintains a table of expected state regulations revisions. The database is found on the Web at <http://www.glarrc.org/Resources/NSPD.cfm>

State	Developmental Delay (DD) or Early Childhood-Specific Category/Classification and Criteria	Age Range for DD or Early Childhood-Specific Category	Use of other Part B Categories (those used, those subsumed in definition of DD) ----- Restriction on DD/EC Category	Source and Date
AL	<p>"Developmental delay": 2 SD in one area 1.5 SD in two areas</p> <p>Supporting evidence on criterion-referenced or other norm-referenced instrument and evidence delay adversely affects performance of age appropriate activities</p>	3 through 8	<i>Used:</i> All	Regulations 1/01
AK	<p>"Early childhood developmentally delayed": 2 SD or 25% delay in one area 1.7 SD or 20% delay in two areas</p>	3 through 8	<p><i>Used:</i> All <i>Restriction:</i> "Early childhood developmentally delayed" should not be used when child meets criteria for another disability category</p>	Guidelines 9/01
AZ	<p>"Preschool moderately delayed": 1.5 SD in two areas</p> <p>"Preschool severely delayed": More than 3 SD in one area</p> <p>"Preschool speech/language delayed": 1.5 SD and assessment indicates child not eligible under a different category <i>plus</i> Parent input, comprehensive developmental assessment and preponderance of information</p>	3 to "required age for kindergarten" (LEA may admit child within 90 days of third birthday but receives no state or federal funds until date of third birthday)	<p><i>Used:</i> Hearing, vision impairment <i>Subsumed:</i> All others <i>Restriction:</i> Preschool speech/language delayed used only if child is not eligible under a different category</p>	Statute 5/00
AR	<p>"Noncategorical": Means a condition of developmental delay which impairs a child's functioning 2 SD in one area 1.5 SD in two areas</p> <p>Delays in self-help and motor skills (gross and fine) can be expressed in months, %ile, or age equivalents using criterion-referenced tests: 3 years: 11 months, <3%ile, 2 yr 1 mo or less-one area 8 months, <7%ile, 2 yr 4 mo or less-two areas 4 years: 14 months, <3%ile, 2 yr 10 mo or less-one area 11 months, <7%ile, 3 yr 1 mo or less-two areas 5 years: 18 months, <3%ile, 3 yr 6 mo or less-one area 14 months, <7%ile, 3 yr 10 mo or less-two areas</p>	3 through 5	<p><i>Subsumed:</i> Mental retardation, emotional disturbance, learning disability <i>Used:</i> All others</p>	Regulations 6/00

State	Developmental Delay (DD) or Early Childhood-Specific Category/Classification and Criteria	Age Range for DD or Early Childhood-Specific Category	Use of other Part B Categories (those used, those subsumed in definition of DD) <u>Restriction on DD/EC Category</u>	Source and Date
CA	"Individual with exceptional needs" has one of the other disabling conditions, or an "established medical disability" – a disabling medical condition or congenital syndrome...high predictability of requiring special education and services	3 through 5	<i>Subsumed:</i> All	Statute 1/00
CO	"Preschool child with a disability": 1.5 SD in one area or 7%ile or standard score of 76 <i>or</i> Has identifiable condition known through empirical data to be associated with significant delays in development <i>or</i> Informed opinion of assessment team with written documentation	3 through 5	<i>Used:</i> Long-term physical impairment or illness, significant limited intellectual capacity, significant identifiable emotional disorder, identifiable perceptual or communicative disorder, or speech disorder Restriction: Child for whom appropriate category (above) can not be determined may qualify under criteria at left	Regulations 4/00
CT	"Developmental delay": Significant delay in one or more areas	3 through 5	<i>Used:</i> All	Statute 1998
DE	"Developmental delay" – 3-year-olds only (categorical for 4-year-olds): 2 SD in one area 1.5 SD in two areas <i>or</i> Professional judgment of IEP team based on multiple sources of information and written justification "Preschool speech delay"--Significant delay in one or more areas: articulation, conversational speech, oral motor involvement, speech fluency, voice quality	3 only 3 through 4	For 3-year-olds - <i>Used:</i> Autism, deaf-blindness, hearing impairment, severe and trainable mental disability, physical impairment, traumatic brain injury, visual impairment, preschool speech delay <i>Subsumed:</i> Learning disability, emotional disturbance, educational mental disability For 4 year olds- <i>Used:</i> Preschool speech delay, all others	Regulations 7/00
DC	Uses Part B categories only.	N/A	<i>Used:</i> All	
FL	"Developmentally delayed": 2 SD or 25% delay in one area 1.5 SD or 20% delay in two areas <i>or</i> Informed clinical opinion	3 through 5	<i>Used:</i> All	Regulations 5/00
