 IDENTIFIERS *Educational Information

ABSTRACT

Fifteen educational human resource directories and files--compilations of information about individuals with certain areas of expertise who can provide assistance to educators--are described in this document. Five criteria were used to determine which directories would be included: (1) lists individuals, (2) searchable by index(es), (3) available nationally, (4) readily accessible, and (5) recent and valid. Each human resource directory is summarized in a one-page description, which includes title, description, index information, date of current issue, update frequency, cost, publisher, and a sample entry. All are available for national or multi-state use by educators. State directories which are accessible to users in other states or which can serve as models for developing a human resource directory are also noted. Information for interpreting human resource directory sheets is provided, and guidelines for developing a human resource directory are outlined. A supplemental list cites education-related human resource directories that did not meet all the stipulated criteria. (Author)

FUNDING INFORMATION

Project Title: Resource and Referral Service (RRS)

Grant Number: OB-NIE-G-78-0211

Project Number: P-6

Source of Grant: Department of Health, Education, and Welfare
National Institute of Education
Washington, D.C.

Grantee: The National Center for Research in Vocational Education
The Ohio State University
Columbus, Ohio

Project Director: John C. Peterson

Disclaimer: This publication was prepared pursuant to a grant with the National Institute of Education, U.S. Department of Health, Education, and Welfare. Grantees undertaking such projects under Government sponsorship are encouraged to freely express their judgment in professional and technical matters. Points of view or opinions do not, therefore, necessarily represent official National Institute of Education position or policy.

Discrimination Prohibited: Title VI of the Civil Rights Act of 1964 states: "No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." Title IX of the Education Amendments of 1972 states: "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance." The RRS Project, like every program or activity receiving financial assistance from the U.S. Department of Health, Education, and Welfare, must comply with these laws.

FOREWORD

The Resource and Referral Service (RRS) is a part of a nationwide dissemination system, the Research and Development Exchange (RDx). This publication on human resource directories should be of particular interest to educators, especially social science researchers and dissemination specialists.

The profession is indebted to James V. Bina and Ida Halasz-Salster, the National Center for Research in Vocational Education, The Ohio State University, for their scholarship in the preparation of this publication. Recognition is due the contact persons associated with each human resource directory for their verification and assistance in compiling this information. In addition, recognition is due John C. Peterson, Project Director, for his guidance and direction in the preparation of this publication.

Robert E. Taylor

in Vocational Education

ABSTRACT

Human resource directories and files useful to educators are described in this document. A human resource directory or file is a compilation of information about individuals with certain areas of expertise who can provide assistance to educators. Five criteria were used to determine which directories would be described: (1) lists individuals, (2) searchable by index(es), (3) available nationally, (4) readily accessible, and (5) recent and valid. Each human resource directory is summarized in a one-page description which includes title, description, index, date, update frequency, cost, publisher, and a sample entry. The fifteen human resource directories described are available for national or multi-state use by educators. State directories which are accessible to users in other states or which can serve as models for developing a human resource directory are also included. Information for interpreting human resource directory sheets is provided, and guidelines for developing a human resource directory are outlined. A supplemental list cites education-related human resource directories that did not meet all of the stipulated criteria.

INTRODUCTION

Information resources available to educators must be accurate, timely, and functionally organized. Numerous compilations of information resources are available. An example is the recently published series of documents which includes: (1) *Dissemination Networks: Information Resources for Education*; (2) *Private Organizations and Associations: Information Resources for Education*; and (3) *Databases and Clearinghouses: Information Resources for Education*. Human resources are a critical dimension of information resources in that they provide current information that may not be available through printed materials. Timeliness through printed information is often difficult to achieve. For example, newsletters take several weeks to publish and it takes almost two years to publish a hard cover book.

Human resources are defined as individuals who can provide information, expert advice, technical assistance, or service; or who can suggest other sources of information. Human resources are often known as *consultants, experts, or specialists*. Since individuals are constantly learning and changing, their information often reflects the latest practical and theoretical information available. For this document, a **human resource directory is defined as a compilation of information about individuals with certain areas of expertise who can provide assistance to people in education**. The compilation can be systematically searched by users. A directory may be available in various formats such as printed documents, files, and machine-readable databases.

Using individuals as human resources has many advantages. Individuals can often explain complex ideas in relation to the user's level of understanding or prior knowledge, and can immediately answer questions which are tailored to the user's specific needs. They also have access to other valuable resources such as unpublished or fugitive information and can recommend other human resources. Schools can take advantage of the expertise of a wide range of individuals from their communities. Through face-to-face communication with local citizens, individuals can help reduce the gap and promote closer relationships between the school and the community. Local citizens can provide relevant information about the community, its resources, and opportunities.

Purpose of This Document

Many educators, including teachers, administrators, planners, agency officials, writers, or researchers, need access to people who have specialized information or services. Although many educational organizations and associations have membership lists, these lists often do not provide sufficient information to select the most qualified or expert individual(s) for a specific resource need.

The primary purpose of this document is to identify and briefly describe directories that cite individuals as specialized educational human resources. These directories have been identified after a search of, or consultation with:

1. *Books in Print*

2. National clearinghouses, including those of the Educational Resources Information Center (ERIC) system
3. Educational organizations
4. Educational agencies
5. University and public library references
6. Government Printing Office publications lists
7. Educational research centers and laboratories
8. Independent researchers

Criteria for Inclusion

Five criteria were used to determine those directories of human resources described in this document. Directories meeting these criteria:

1. Include names, addresses and/or phone numbers of *individuals* who can provide information/assistance to educators at any level.
2. Are *searchable* by at least one *index* such as area of expertise or service provided.
3. Are available *nationally*. State and regional directories are included if they are accessible to users in other areas.
4. Are accessible in some format, either for free or for purchase, through libraries, educational and governmental organizations, clearinghouses, publishers, or developers.
5. Is the most recent edition or version available that is still valid and useful?

In addition, directories may be contained within other documents providing the above criteria are met. Directories selected for inclusion have various formats, e.g., printed document, card file, microform, machine-readable database, needle card sort, and looseleaf notebook.

A number of directories were not selected because they did not meet all five of the above criteria. The lack of an index was the one criteria that excluded most directories. For example, although many education-related associations have membership directories, they are not indexed according to members' expertise or interest areas. Generally, members are only listed alphabetically. Some directories are subdivided by state, but do not provide any means of searching for specialized individuals.

Many directories were considered potentially valuable references for people in education even though they did not meet all five of the criteria. The directories are listed on pages 27--29.

HOW TO INTERPRET HUMAN RESOURCE DIRECTORY ENTRIES

NUMBER OF DIRECTORY	TITLE OF HUMAN RESOURCE DIRECTORY
DESCRIPTION:	Information about the human resource directory or file, e.g., types of information contained in the directory, number of entries, number of pages, and format of the directory. When known, editors/writers are credited.
INDEX:	Categories by which the directory can be systematically searched.
DATE:	Date of current version of the directory.
UPDATE FREQUENCY:	How often new information is added to, or outdated information is eliminated from, the directory or how often a new edition is published.
COST:	Price of purchasing or using the directory. Includes postage, shipping, and prepayment if required.
AVAILABLE FROM:	Person and/or organization from which a user can obtain or purchase the directory.
DATE VERIFIED:	Date the accuracy of the information was checked with developer or editor.
SAMPLE ENTRY:	Typical example of a citation. In some cases the page number : section is indicated.
2	
NOTE: Additional explanations or pertinent information about the directory.	

HUMAN RESOURCE DIRECTORIES & FILES

This section contains one-page descriptions of fifteen human resource directories that meet the criteria previously cited. A page on "How To Interpret Human Resource Directory Entries" is given on page 3.

ALASKA TALENT BANK

DESCRIPTION: The Human Resource Talent Bank was developed in 1973 by Alaska's Department of Education. It includes information about education and community experts who can serve as consultants to educators. It is primarily designed for Alaska educators; however, it may be used by other educators. Now being converted from manual to computer, it will become part of the Alaska Knowledge Base, a statewide computerized system.

- Motivation

DIRECTORY OF ORGANIZATIONS AND PERSONNEL IN EDUCATIONAL MANAGEMENT (FIFTH EDITION)

- DESCRIPTION:** This 81-page directory has a section on organizations and one on personnel. Each section has its own index. The personnel section lists individuals who conduct pure or applied research on topics in educational management and individuals engaged in documentation efforts in this field. The 498 researchers cited are educational managers at the elementary and secondary school levels. Each entry includes: name, title, address for 1976 academic year, subject(s) of research, agency with which research efforts are affiliated and publication(s) available from researcher.
- INDEX:** Indexed by: (1) subject of research, (2) name of individual
- DATE:** 1976
- UPDATE FREQUENCY:** Every 2 to 3 years; sixth edition scheduled for Spring 1979
- COST:** \$4.95; sixth edition will cost \$5.50
- AVAILABLE FROM:** Philip K. Piele/Stuart C. Smith

HICKROD, G. ALAN

Professor of Educational Administration
Director, Center for the Study of Educational Finance
Illinois State University
Normal, Illinois 61761

SUBJECTS OF RESEARCH:

School finance and the economics of education—state grant-in-aid models, concept of equity or equalization, optimum size, politics of school finance, fiscal aspects of declining enrollments.

AGENCY WITH WHICH RESEARCH EFFORTS ARE AFFILIATED:

Federal research grant, state education department, university, university research bureau.

PUBLICATIONS AVAILABLE FROM RESEARCHER:

"Cost-Size Relationship among School Districts in Illinois, 1974" (with others), "Research Agenda for School Finance Reform in Illinois" (with Ben C. Hubbard).

DIRECTORY OF PEOPLE IN NON-TRADITIONAL JOBS (NEW JERSEY)

- DESCRIPTION:** This directory provides a list of women and men from New Jersey and nearby areas in nontraditional jobs who are willing to visit schools and participate in career days. The 17-page directory is organized by occupational clusters and includes an addendum of entries. Each entry includes name, address, and occupation. Telephone numbers are included unless the individual prefers only written requests.
- INDEX:** Indexed by occupation
- DATE:** 1978
- UPDATE FREQUENCY:** None currently planned
- COST:** Free

1978-79 DIRECTORY OF RESOURCES FOR THE EDUCATION OF ADULTS

DESCRIPTION: This 200-page directory identifies human, organizational, and material resources which can enhance the development or delivery of educational services to adult learners. Listings include: university faculty, members and staff of national advisory councils, state directors of adult education, and key contact persons for state and national information services. The directory also includes listings of organizations with names of the contact persons. Edited by J. Nevin Robbins and sponsored by the ERIC Clearinghouse on Adult, Career, and Vocational Education and the Adult Education Association of the U.S.A.

INDEX: Indexed by: (1) subject, (2) name

DATE: 1979

UPDATE FREQUENCY: Biennially

COST: Approximately \$12.00 (Also available on microfiche through ERIC for \$0.83 + \$0.15 postage.)

AVAILABLE FROM: National Center Publications

Acquires and assesses commercial and non-commercial curricular-instructional materials for adult basic, secondary, continuing, community education, and related areas. Prepares abstracts and develops bibliographies, circulates copies, publishes the *AEC Newsletter*, and provides technical assistance.

HUMAN RESOURCES FILE (ILLINOIS)

DESCRIPTION: The Human Resources File (HRF) cites consultant* who provide services to local education agencies in Illinois. It is one component of the Illinois Resource and Dissemination Network (IRDN). The automated file contains 650 entries and is stored on PLATO, the University of Illinois computer. It is primarily used by Illinois educators, but out-of-state educators may arrange for access to it through the IRDN manager. Each consultant entry provides address, area of expertise, availability, consulting fee (if any), and previous consulting experience.

READING RESOURCE EDUCATORS FROM INSTITUTIONS OF HIGHER EDUCATION IN THE PACIFIC NORTHWEST

DESCRIPTION: This directory identifies people who can provide assistance to local school districts as they develop their reading programs. Educators from the states of Alaska, Idaho, Oregon, and Washington are cited in this document. Each entry includes name of consultant, position, institution, address, telephone, type of assistance, program/process/system, and discussion of services. The types of assistance are: assessing reading problems, evaluating research, reviewing programs, solving reading problems, and staff development workshops.

INDEX: Indexed by: (1) state, (2) five types of assistance

NCTE: This is one of three entries for each individual. The others are by ASTD region and by subject.

1977 TECHNOLOGY TRANSFER DIRECTORY OF PEOPLE (SECOND EDITION)

- DESCRIPTION:** This directory lists persons interested in the process of technology transfer. Each entry in this 103-page document includes name, telephone, address, area of interest, area of expertise, and occupation. The area of interest is categorized into four areas: (1) where and how to find technology; (2) examples of new uses of technology; (3) research in technology utilization methods; and (4) research in technology movement. Areas of expertise and occupations are based on the *Dictionary of Occupational Titles* published by the U.S. Department of Labor.
- INDEX:** Indexed by: (1) area of interest
(2) area of expertise
(3) occupation

WASHINGTON INFORMATION DIRECTORY

- DESCRIPTION:** The entire directory contains over 5,000 citations of government agencies, congressional committees, and nongovernment agencies. Several appendices, pages 579-699, cite House and Senate members in alphabetical order along with party affiliation and states represented. Members' committee assignments and key aides are listed. Washington and district office addresses and phone numbers are listed. Separate appendices list representatives and senators by states and cite birth dates, occupations, religious affiliations, and seniority rank within the member's party.
- INDEX:** Entire directory indexed by: (1) subject
(2) agency/organization
- DATE:** 1978-79
- UPDATE FREQUENCY:** Annual
- COST:** \$19.50
- AVAILABLE FROM:** Congressional Quarterly Inc.
1414 22nd Street, N.W.
Washington, D.C. 20037
- DATE VERIFIED:** January 8, 1979
- SAMPLE ENTRY:** Appendix "Senator's Offices, Staff, Committee Assignments,"

DEVELOPING A HUMAN RESOURCE DIRECTORY

Another purpose of this document is to offer guidelines for compiling a directory of human resources. The fifteen directories described in this document meet all the criteria previously cited for selecting human resource directories and can serve as models for developing other human resource directories. Few, if any, guidelines are available to those wishing to produce directories. The following guidelines provide a systematic approach to producing a human resource directory.

Guidelines for Developing a Human Resource Directory

1. Define the purpose, the scope, and the intended users of the directory.
2. Identify, allocate, and budget resources needed to develop the directory. These resources include personnel, time, printing and distribution resources.
3. Establish a time line of deadlines and adhere to them. Develop a flow chart which graphically shows deadlines and interrelationships of tasks.
4. Define the areas of expertise, interests, or services of the people to be included. Specify that information which is absolutely essential for a useful directory.
5. Locate sources of potential human resources through:
 - key contact persons, e.g., authors, organizations, clearinghouses, agencies, and recent literature in the field(s)
 - membership lists, personnel directories, and other directories
 - announcements in relevant newsletters and periodicals
6. Design or select an appropriate data collection form. (See page 24 for example.)
7. Distribute data collection forms to potential individuals, appropriate organizations, and key contact people. Include a release statement especially if the directory will be used outside of the immediate organization. (See page for an example.)
8. Select an appropriate format (card file, needle card sort, printed directory, looseleaf notebook, microform, machine-readable database) to organize and store collected data. Build in an updating and purging capacity if the directory will be revised or updated.
9. Collect and classify returned data collection forms. Eliminate inappropriate ones and those without release forms, if required. Allow enough time to send at least one follow-up request if forms have not been returned.
10. Assign indexing terms in order to designate areas of expertise, etc. and develop an index.
11. Select an appropriate format to disseminate or publish the directory. This format may differ from the one used to organize and store the data. (See page 23 for further explanation.)
12. Proofread carefully.
13. Design a dissemination strategy which meets the needs of the directory's intended audiences.

Data Collection

Developing a human resource directory requires pertinent information about individuals who will be included.

A variety of forms used for gathering necessary information have been developed. Large associations generally use their membership forms to compile directories. Other organizations create specialized forms to solicit appropriate information regarding potential human resources' expertise, services, and interest areas.

One specialized form, "Human Resource Identification Survey," was developed by the Illinois Office of Education (Figure 1). It is used to collect data for their *Human Resources File*. While it is designed to compile computer-retrievable data, this form can be easily adapted for use with card files or printed directories.

Regardless of the form used, however, an important consideration is the individual's legal right to privacy. Generally, directories prepared for use solely by members of the sponsoring organization are exempt from legal constraints or liability. However, to avoid possible legal question, it is advisable to have contributors sign a release statement which gives permission to use personal information in a publication. A release statement can be added to the form requesting the data, and should be kept on file as long as the directory is considered valid.

Organization of Information

It is important to identify and index human resources not only by organizational affiliation but also by areas of expertise or services provided. Other indexes (e.g., geographic), increase the usefulness of the directory.

With small numbers of human resources, alphabetical listings are adequate. However, further classification such as tables of contents and subdivisions by state, institution, or agency, is helpful to the user.

Coding systems can help alleviate repetitious listings such as expertise, service, and location, while matrixes help organize the information for quick identification and selection.

Formats for a Directory

A variety of formats are appropriate for storing and disseminating human resource information. The format for dissemination (delivery of human resource information to users) may be different from the one used to store the information. A commonly used format for dissemination is a printed document containing data about the human resources and at least one index.

A printed document can be easily distributed to users and stored without special files or equipment. One disadvantage of printed documents is their bulk; another is that updating requires costly revisions. Periodic addendums are one way of updating published directories.

It is easiest to maintain an up-to-date directory with card files, looseleaf notebooks, newsletter inserts, and needle card sorts. These can be updated quickly, and can be purged efficiently as well. Machine-readable databases may require several months for revision, but have the advantage of speed in information retrieval.
