ABSTRACT

Based on the 1998 Arkansas State Language Arts Framework, this sample curriculum model for kindergarten language arts is divided into sections focusing on writing; listening, speaking, and viewing; and reading. Each section lists standards; benchmarks; assessments; and strategies/activities. The reading section itself is divided into print awareness; phonological awareness/ decoding/ vocabulary; comprehension; fluency; and literary response. Writing standards include moving from visual and spoken experiences to written language through positive modeling. An example of a writing benchmark has students using pictures, known letters, and phonetic writing to show an awareness of the relationship between spoken and written language. A suggested writing strategy has students recording an experience using modeled writing. A standard for listening, speaking, and viewing focuses on listening for a variety of purposes, such as enjoyment, information, and details. A corresponding benchmark has students state their purpose for listening. A suggested listening strategy encourages teachers to provide opportunities several times a day for students to listen for a variety of purposes. Reading standards include recognizing and associating letters and sounds. A benchmark for this standard is for students to demonstrate the ability to divide spoken sentences into individual words. An example of a reading strategy encourages teachers to read alliterative texts. Assessments for the three areas include teacher made tests and samples of student writing. (PM)

<p>SLE W. 1.1. Move from visual and spoken experiences to written language through positive modeling.</p>	<p>Students will use pictures, known letters and phonetic writing to show an awareness of the relationship between spoken and written language.</p> <p>Students will use the writing of adults, print in the environment and the language in books as models for writing.</p> <p>Students will print own name.</p>	<ul style="list-style-type: none"> • Samples of student writing • Analysis of journal entries • Observation • Portfolio • Checklist 	<ul style="list-style-type: none"> • Record an experience or event using modeled writing so students can see how spoken language can be recorded with letters and words. • Have students orally rehearse their sentences or stories in order to have the language structure well established in their heads before they write. • Compose "Daily News". Write one or two students' news items on a large sheet of paper. Read aloud each word as it is written. Reread and encourage the students to join in. Point to each word as it is read. Put in a center for students to read at self-selected reading time. • Write a question and ask a student to answer it. Write his/her answer and have the students reread the answer. • Provide opportunity for students to match and write their own names. • Use environmental print in modeled and interactive writing. • Write known nursery rhymes as students watch and encourage them to join in "reading". Put in reading center for rereading. • Take photographs of students engaged in a variety of school activities. Have students assist in writing patterned sentences to depict what is happening in the picture. Put the pictures in a book format for students to read during independent reading.

<p>SLE W.1.2 Understand the relationship between letters and words, words and sentences, sentences and paragraphs, and paragraphs and whole pieces.</p>	<p>Students will distinguish letters in words and words in sentences.</p> <p>Students will write independently at the phonetic stage (apply knowledge of beginning and ending letter-sound associations and use some high frequency words).</p>	<ul style="list-style-type: none"> • Samples of student writing • Analysis of journal entries • Statewide test • Teacher made tests 	<ul style="list-style-type: none"> • Use shared reading of big books to show how letters are put together to make words and words are put together to make sentences. • Provide opportunity for students to write daily. • Allow students to "read the room" -use a pointer to go around the room "reading" labels, signs, etc. • Write sentences under students' drawings letting them contribute what they know. • Have students work in small groups to reconstruct sentences from jumbled words. • Create "wall stories." <p>These are continuous accounts of a class project. Add pages as the project progresses. When completed, the pages can be collated and made into a big book. For example, if the class studies plants then a class wall can be created as the class goes through the process of planting and caring for the plant.</p>
