ABSTRACT

This guide was designed to assist sixth through eighth grade teachers and pupils in furthering their understanding of man in interaction with his environment. It assists the teacher in the effort to understand, organize, and implement the conceptual, interdisciplinary approach to the teaching of the social sciences: anthropology, economics, geography, history, and political science. The basic concepts or generalizations have been identified and listed in each of the disciplines. Variants or continuous threads of ideas bind the concepts together through selected content within these units: 1) the Development of Man's Cultural Heritage in grade 6; 2) the Development of American Culture in grade 7; and, 3) Contemporary American Culture in grade 8. Suggested analytical questions and learning activities serve as a flexible framework to facilitate the development of inquiry skills: observing, structuring hypotheses, examining, problem solving, comparing, reflecting, experiencing, deriving facts, and restructuring hypotheses until understandings are developed. In implementing this guide, the teacher should use a multimedia approach; audiovisual materials and readings are listed in each unit. Guidelines for student research and reporting are appended. The guide and units for kindergarten through fifth grades are available separately. (Author/SBE)

Pupil Guide for Report Making	Appendix

FOREWORD

This curriculum guide is the result of the cooperative efforts of many individuals in our school district. We are appreciative of the professional contributions and efforts of the many committee members who have participated in the formulation of the guide during the past three years. Special recognition should also be given to the members of the teaching staff and the administration who so capably assisted our efforts this year.

The cumulative efforts of all who participated have resulted in a guide that is geared to assist the classroom teacher formulate a logical and systematic approach to the teaching of social studies. Since no social studies program is ever complete, we will continue to rely on our professional staff for suggested additions that would further enhance the usefulness of the guide. The guide has been constructed to facilitate the addition and/or inclusion of future suggestions made by teachers as a result of classroom experiences. You will note that space has been provided for teacher notes for this purpose.

We are particularly indebted to all the members of the Social Studies Curriculum Action Committee who were extremely helpful in working as a liaison group between the various school faculties and the action committee.

Social Studies Action Committee, 1968-69

Mrs. Barbara Cross
Miss Eleanor Douglass
Miss Judith Gaines
Mrs. Angela Catenacci
Mrs. Lillian Larrabee

Mrs. Janet Wardell
Mr. Albert LaMorges
Mr. James Guinee
Mrs. Paula Eisen
Mr. Robert Black

Finally, we are sincerely appreciative of the support and encouragement of Mr. John O. Berwick, Superintendent of Schools.

Joseph Tamburo
Assistant Superintendent

GENERAL INTRODUCTION

This guide has been designed to assist teachers and pupils in furthering their understanding of man in interaction with his environment. It will also assist in the teacher's efforts in understanding, organizing, and implementing the conceptual, inter-disciplinary approach to the teaching of the social sciences;

Basic concepts have been identified and listed in each of the major social science disciplines. These concepts and their variants may be found in this introductory section. Selected variants have been identified at appropriate grade levels to assist in the teaching of the concepts which form the structure of our curriculum. It is expected that all teachers will use their professional judgment in utilizing any of the other variants, questions, activities within the existing structure of the units of the grade level.

The scope of the social science disciplines represent the foundation of a functional curriculum. Through the integration of the disciplines, students learn to derive simple generalizations and move on to a more complex and abstract level of understanding. An example of integration of the disciplines may be found in the sample units in each of the grade levels. Effective utilization of the guide requires that the teacher understand concepts and variants as utilized in our curriculum.

Concepts - the "big ideas" or generalizations listed in our structure of the social science disciplines.

Variants - the continuous thread of ideas or generalizations binding together the "big ideas" at appropriate levels of maturity through selected content.

Our program can best be taught if:

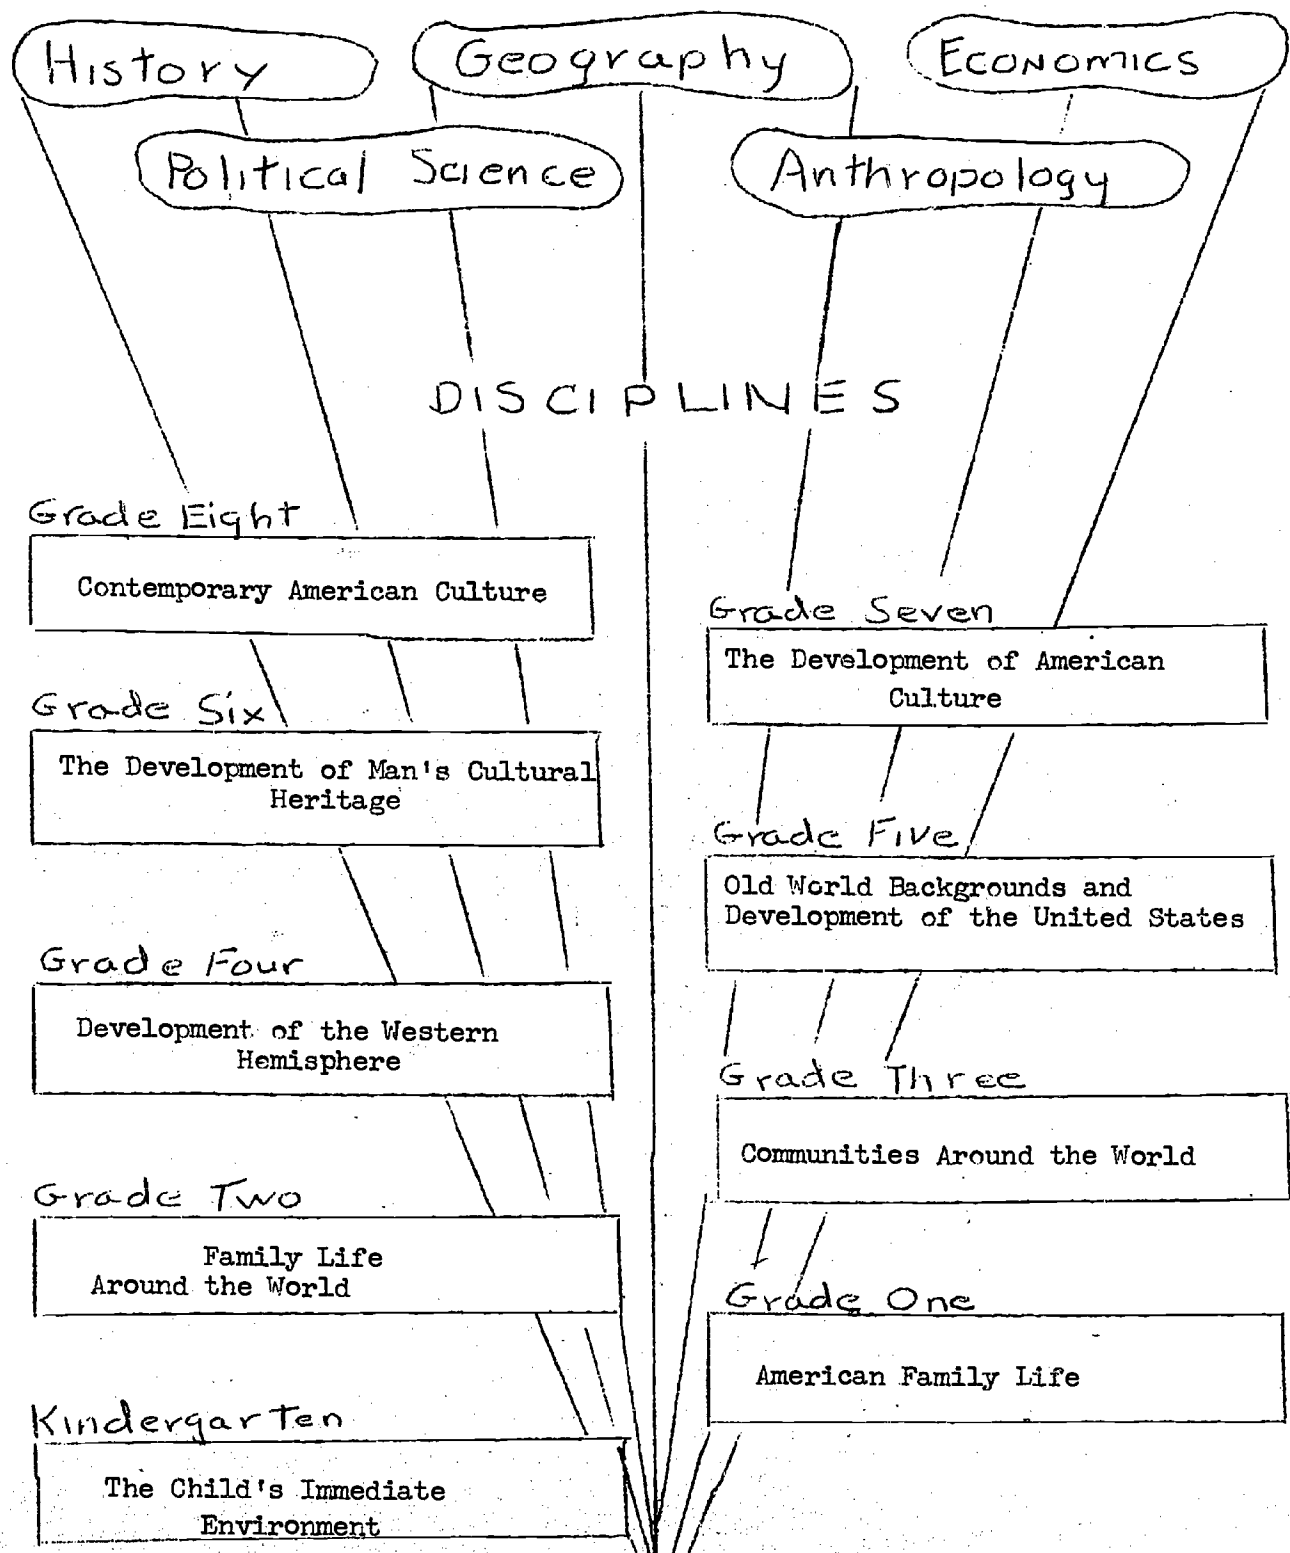

- I. The meanings of the concepts and variants are understood as basic generalizations which form the core and structure of our social studies program.
- II. It is understood that the subject matter's relationships to the concepts and variants are a vital part of the curriculum. Concepts and variants should not be taught in isolation at any particular level, but must be related to content so that the "basic ideas" have relevance and meaning.
- III. The structure and content of the guide is understood. The units in each grade level also include suggested analytical questions and activities which serve as a flexible framework to facilitate the interaction of teachers and pupils with the content and scope of the program.
- IV. It is understood that social science skills are basic tools of learning and are an essential part of our program. These intellectual processes make it possible for the student to obtain and apply knowledge.

The skills recommended in the guide represent an overview of all social science skills as prepared by the National Council for the Social Studies.

V. The inquiry approach to learning utilized. The study of the social sciences must be an active process in providing opportunities for children to think problems through. Conceptual learning involves observing, structuring hypotheses, examining, problem solving, comparing, reflecting, experiencing, deriving facts, and restructuring hypotheses until understandings are developed.

VI. A multi-media approach is used. In implementing this guide, the teacher should use a multi-media approach. Good teachers today find that using primary source materials, paperback books, short sets, 8 mm loops, filmstrips, transparencies, records, films, etc. provide a rich and diverse approach to teaching the social sciences. The Springfield Schools are continually adding to their collection of multi-media materials so that an increasing quantity is available to teachers and pupils.

THE SOCIAL STUDIES PROGRAM

PHILOSOPHY OF THE SOCIAL STUDIES

The role of social studies in the elementary school is the orientation of the child in his world which will serve as a foundation for further integration of learnings in his life in school and out of school. The program includes the acquisition of knowledge, the building of skills and the development of socially acceptable attitudes and behavior.

The social studies program has to do with people and the way people live and work together. It teaches the basic freedoms and their corresponding responsibilities. By learning certain subject matter, by observation, and by first hand experiences the child develops fundamental understandings about people's relationships to each other and to the natural world, about the effect of geographic location and the events of history upon his life, and an appreciation of his role as an individual member of society.

OBJECTIVES OF THE SOCIAL STUDIES

To have children:

Understand themselves as individuals and as members of a family

Understand the interdependence of the peoples of the world

Realize that all the people in the world have the same basic needs and that they try to realize these basic needs in different ways

Appreciate the cultural contributions of the peoples of the world

Respect the inherent dignity of man

Develop a knowledge of current affairs

Develop the abilities to become effective citizens

Know the role and value of education in all societies

Understand the need for conservation of natural resources

Understand the functioning of a democratic society

Understand the role of economy in society

Respect the dignity of all kinds of work well done

Develop skills that will enable them to function effectively as human beings

Explanation of Unit Teaching

A unit is "an organization of various activities, experiences, and types of learning around a central problem, or purpose, developed cooperatively by a group of pupils under teaching leadership: involves planning, execution of plans, and evaluation of results."¹

Every activity in unit planning, whether carried on by the individual or by the group, is an integral part of the whole. Ample time should be allotted for pupils to engage in learning experiences. Units, properly planned, afford opportunities for children not only to satisfy their drive to identify with problems but also opportunities to express solutions to questions that have been raised.

The process of problem solving is basic to unit teaching and the way social studies is taught in Springfield.

Considerations in Unit Planning²

STEP I. DETERMINE WHAT IS TO BE TAUGHT

Know major learnings which have been taught previously

Know the particular needs of this group of children

Know curriculum expectations for the grade

STEP II. DEFINE THE PROBLEM

Initiate discussions or activities which will encourage thinking in the area to be studied

Record children's ideas noting the questions which emerge

Help children formulate the problem to be solved. Solving this problem becomes the main goal for the unit

¹ Edited by Carter V. Good, Dictionary of Education, New York. McGraw Hill Book Company. 1959, P. 587.

² Suggested by Grand Rapids, Michigan.

STEP III. EVALUATE THE IDEAS GIVEN BY THE CHILDREN

The following questions should be considered:

Is this unit or body of information essential?

Does it contain enough material so that all children will be challenged?

Are definite curriculum and social goals included?

Can the children really work with this content?

STEP IV. PLAN WITH THE CHILDREN WAYS TO SOLVE THE PROBLEM

Sharpen the children's awareness to the question by considering possible solutions

Be selective of resources, materials, and activities in terms of time, needs, and the interests and abilities of children

STEP V. PLAN WITH THE CHILDREN THE PROBABLE SUMMARY ACTIVITIES

Plan with the children the method to be used to present learnings to others such as reports, puppet shows, and dramatizations

STEP VI. ORGANIZE THE CHILDREN'S IDEAS INTO AN OUTLINE OR PLAN FOR TEACHING

Make a concrete plan of work. The creative teacher will find in each unit of work a variety of ways in which plans may be developed

STEP VII. ORGANIZE THE GROUP FOR ACTIVE PARTICIPATION

Dependent upon the work to be done, decide upon effective group organization - total group, small study group, or individual. All three usually are used at different times during the development of a unit.

Total Group Organization

Small Group Organization

Following are suggested steps for working with small-group organizations:

STEP VII. ORGANIZE THE GROUP FOR ACTIVE PARTICIPATION (Con't.)

Small Group Organization (continued)

Define duties of committee members
Plan procedures for selecting a chairman
Define small committee responsibilities
Arrange classroom seating for group work
Plan materials for varied abilities
Begin work

(In the beginning, classes may organize one group only in the first period using this as a model. Other groups can begin work as the pattern is established. As groups become more experienced, they might all begin work at the same time.)

Evaluate daily at the end of each working period or at the beginning of the next class lesson

Evaluate progress in solving the problem
Evaluate abilities in working together

Individual Project Organization

STEP VIII. CONSIDER SPECIFIC WAYS IN WHICH THE CONTENT OF VARIOUS SUBJECTS TAUGHT (1) MIGHT CONTRIBUTE TOWARD THE SOLUTION OF THE PROBLEM AND (2) MIGHT EXTEND AND ENRICH SOCIAL STUDIES LEARNINGS

(Select only those subject areas which can relate sensibly to the problem.)

STEP IX. PRESENT SUMMARY ACTIVITIES

STEP X. EVALUATE BOTH DURING AND AT THE END OF THE UNIT

Determine if the content has validity and if information secured is pertinent and related to the problem and its solution

Evaluate group processes to determine if children have become more skilled in working together

Determine to what extent the problem was solved

Determine the social studies strands included

Determine the growth in ability to think critically

Determine the growth in listening skills

Determine the extent to which individual needs were met

Evaluate academic and social growth with the children

Problem Solving Process (1)

What are the key words in teaching-informing, inquiring, telling, and/or discovering? Confronted with such a question, most teachers can "get" the "right answer." Of course, teaching is encouraging pupils to inquire, to discover, and to think.

But, in practice, far too many teachers proceed upon the assumption that teaching is telling, informing or imparting. Even many of the teachers who would like to stimulate thinking fall back upon the methods they have observed and experienced, especially in college classrooms.

In a typical lesson of the traditional type, the teacher writes the aim on the chalkboard. If the lesson is on imperialism, the class opens with the question "Who can define imperialism?" Or if the lesson is on Canada, the pupils are asked, "Why are we interested in Canada?" In truth, their interest hasn't been aroused and probably never will be. They will learn the names of places, products, and a few famous people, but they will gain little or no understanding of Canada.

Using this approach, a teacher merely scratches the surface, then plants a few seeds. Some of these may take root, especially in the minds of the brighter or more verbal students. But when harvest time (known as exam time) comes, such teachers are appalled at how little knowledge has flourished.

Good teachers plow up the soil a great deal deeper. They plant fewer seeds, but most of these take root. The immediate harvest is much more likely to be bountiful, the power to think in later life much more possible.

Almost any lesson can be planned as a problem-solving exercise. Whole units can be organized around a series of questions that the pupils raise. Even courses can be based upon the discovery method or problem solving. A world history course can focus on the various concepts people have had of "the good society" in different times and in different places. In economics, pupils can wrestle with a variety of problems based upon the central concept of unlimited wants versus limited resources, or on ways to increase and preserve available and potential resources.

Your first step in approaching the discovery method, the problem solving approach, is to take tomorrow's lesson (or a whole unit) and work out ways in which pupils can be encouraged to think. The results may not show immediately if your pupils have been taught for years to memorize what is in the book and hand it back. But persist; try different methods; encourage your pupils; experiment. Then you will begin to teach.

(1) Kenworthy - Background Papers for Social Studies - Wadsworth Publishing Company, 1966, p. 7

Techniques of Problem - Solving Approach

1. Identify the problem
2. State the hypothesis
3. Decide where and how to gather data
4. Collect data
5. Analyze and organize data
6. Test the hypothesis in terms of the data
7. Arrive at a conclusion based upon the data collected

Guide to Report Writing

Research activities, such as report writing, enable students to develop the ability to plan, organize, and carry out independent study activities that are a vital factor in quality social science programs.

It is important for students to learn an orderly sequence of planning and actualizing their investigations so that their reporting skills will be developed step-by-step in a logical progression. Our guide for report writing has been designed to facilitate the accomplishment of this objective and may be found in the Appendix.

The model, which is pupil oriented, was designed for the intermediate level; however, all teachers should find the guide useful by adapting it to meet the individual needs of their pupils.

SOCIAL STUDIES SKILLS: A GUIDE TO ANALYSIS
AND GRADE PLACEMENT

Helping young people develop and use skills effectively is one of the central purposes of social studies instruction. Indeed, without an adequate command of skills, it is doubtful that students can gain the insights concerning their society or develop the habits of intellectual and social behavior that constitute the ultimate goals of the social studies program. Skills are tools for learning, both in and out of school. The student who develops a command of social studies skills during his school years and carries these skills into the adult years has laid a firm basis for continued learning throughout his life.

The chart which appears in the following pages has been developed as an aid to social studies teacher who desire to improve their teaching of social studies skills. It represents an illustrative analysis of major skills areas that should be developed in social studies programs. It is organized in two parts, as follows:

Part One. Skills which are a definite but shared responsibility
of the social studies

- I. Locating information
- II. Organizing information
- III. Evaluating information
- IV. Acquiring information through reading
- V. Acquiring information through listening and observing
- VI. Communicating orally and in writing
- VII. Interpreting pictures, charts, graphs, tables
- VIII. Working with others

Part Two. Skills which are a major responsibility of the
social studies

- I. Reading social studies materials
- II. Applying problem-solving and critical-thinking skills to social issues
- III. Interpreting maps and globes
- IV. Understanding time and chronology

The chart also suggests a tentative grade placement for three levels of emphasis on each sub-skill that is identified: (1) introducing the specific skill, through planned readiness experiences; (2) developing the skill systematically; and (3) reteaching, maintaining, and extending the skill as necessary.

Thus, the chart outlines a planned, sequential program for skill development, one that cuts across subject lines and bridges the gap between the elementary and the secondary school. It may serve as a reminder to every teacher that effective teaching of skills should be part of a cumulative program running from the early school years through high school. It may help the teacher plan so as to reinforce whatever command of skills his pupils have already attained at the same time that he leads them to a higher level of performance.

The chart may also be used by groups of social studies teachers and their colleagues in other fields as a point of departure in formulating their own analysis and plan for the social studies skills program in their own school system. When teachers thus clarify their own purposes for teaching skills, become sensitized to their pupils' needs for skill development, and identify ways of meeting those needs, major benefit to the instructional program will result that could never come from uncritical acceptance of an already formulated program.

Throughout this Yearbook the point has been made that pupils develop skills most effectively when there is systematic instruction and continuing application of the skills. The following principles of learning and teaching have been emphasized as a basis for the social studies skills program:

1. The skill should be taught functionally, in the context of a topic of study, rather than as a separate exercise.
2. The learner must understand the meaning and purpose of the skill, and have motivation for developing it.
3. The learner should be carefully supervised in his first attempts to apply the skill, so that he will form correct habits from the beginning.
4. The learner needs repeated opportunities to practice the skill, with immediate evaluation so that he knows where he has succeeded or failed in his performance.
5. The learner needs individual help, through diagnostic measures and follow-up exercises, since not all members of any group learn at exactly the same rate or retain equal amounts of what they have learned.
6. Skill instruction should be presented at increasing levels of difficulty, moving from the simple to the more complex; the resulting growth in skills should be cumulative as the learner moves through school, with each level of instruction building on and reinforcing what has been taught previously.

7. Students should be helped, at each stage, to generalize the skills, by applying them in many and varied situations; in this way, maximum transfer of learning can be achieved.

8. The program of instruction should be sufficiently flexible to allow skills to be taught as they are needed by the learner; many skills should be developed concurrently.

In applying these principles, teachers should keep two cautions in mind. First, although it is possible to make a general plan for continuity in skill development, it is impossible to set a particular place in the school program where it is always best to introduce a specific skill. Many factors enter into the final decision of the teacher, as he works with a specific class, and the general plan can serve only as a guide to what seems to be good practice.

True continuity in skill development is that which is developed within the learner, not that which can be blocked out in a general plan. Furthermore, it can never be assumed that a child has gained command of a particular skill merely because he has been exposed to it. Review and reteaching of skills that have been stressed at an earlier grade level are often necessary, even with the most capable students.

Second, the suggested grade placements indicated in the chart which follows are based on a combination of current practice and the subjective judgments of many teachers, including the authors. Both of these reflect what young people seem to be able to achieve within existing patterns of instruction. It is possible that pupils could achieve earlier and more effective command of many aspects of social studies skills if new patterns and approaches for instruction were employed. More systematic and intensive readiness experiences, for example, might enable children to profit from systematic instruction in skills at an earlier age. If so, they would gain an earlier command of tools that could enhance their learning through the rest of their school years. On the other hand, it is possible that present practice calls for instruction in some skills before the learner has developed the necessary related concepts. If so, he may not only fail for the moment but be handicapped in later efforts to gain control of the particular skill. Almost no research evidence exists to guide the proper grade placement of skill instruction. Evidence of this kind is urgently needed as a basis for improving the teaching of social studies skills. It is the hope of the authors that their efforts in preparing this guide to the analysis and grade placement of skill instruction will stimulate such research in the years immediately ahead.

SOCIAL STUDIES SKILLS: A GUIDE TO ANALYSIS AND GRADE PLACEMENT

Eunice Johns and Dorothy McClure Fraser

Helping young people develop and use skills effectively is one of the central purposes of social studies instruction. Indeed, without an adequate command of skills, it is doubtful that students can gain the insights concerning their society or develop the habits of intellectual and social behavior that constitute the ultimate goals of the social studies program. Skills are tools for learning, both in and out of school. The student who develops a command of social studies skills during his school years and carries these skills into the adult years has laid a firm basis for continued learning throughout his life.

The chart which appears in the following pages has been developed as an aid to social studies teachers who desire to improve their teaching of social studies skills.¹ It represents an illustrative analysis of major skills areas that should be developed in social studies programs. It is organized in two parts, as follows:

Part One. Skills which are a definite but shared responsibility of the social studies

- I. Locating information
- II. Organizing information
- III. Evaluating information
- IV. Acquiring information through reading
- V. Acquiring information through listening and observing
- VI. Communicating orally and in writing
- VII. Interpreting pictures, charts, graphs, tables
- VIII. Working with others.

¹ In preparing this chart, the authors have consulted a wide range of curriculum materials and professional literature, including: Baltimore (Md.) Public Schools, *Guide to Elementary Education, 1955*; Buffalo (N.Y.) Public Schools, *Curriculum Guide, Kindergarten-Grade Three, 1959*, and *Curriculum Guide, Grade Four-Six, 1959*; Minneapolis (Minn.) Public Schools, *Social Studies, 1957*; John U. Michaels, editor, *Social Studies in Elementary Schools, Thirty-Second Yearbook*, Washington, D.C.: National Council for the Social Studies, a department of the National Education Association, 1962, Chapter VI; and the body of the *Yearbook* in which this Appendix appears. They wish to acknowledge a particular debt to the social studies committees of the Washington County (Md.) Public Schools and of the Wilmington (Del.) Public Schools, whose draft formulations of similar charts are reflected in this chart.

APPENDIX

311

Part Two. Skills which are a major responsibility of the social studies

- I. Reading social studies materials
- II. Applying problem-solving and critical-thinking skills to social issues
- III. Interpreting maps and globes
- IV. Understanding time and chronology.

The chart also suggests a tentative grade placement for three levels of emphasis on each sub-skill that is identified: (1) introducing the specific skill, through planned readiness experiences; (2) developing the skill systematically; and (3) reteaching, maintaining, and extending the skill as necessary.

Thus, the chart outlines a planned, sequential program for skill development, one that cuts across subject lines and bridges the gap between the elementary and the secondary school. It may serve as a reminder to every teacher that effective teaching of skills should be part of a cumulative program running from the early school years through high school. It may help the teacher plan so as to reinforce whatever command of skills his pupils have already attained at the same time that he leads them to a higher level of performance.

The chart may also be used by groups of social studies teachers and their colleagues in other fields as a point of departure in formulating their own analysis and plan for the social studies skills program in their own school system.² When teachers thus clarify their own purposes for teaching skills, become sensitized to their pupils' needs for skill development, and identify ways of meeting those needs, major benefit to the instructional program will result that could never come from uncritical acceptance of an already formulated program.

Throughout this *Yearbook* the point has been made that pupils develop skills most effectively when there is systematic instruction and continuing application of the skills. The following principles of learning and teaching have been emphasized as a basis for the social studies skills program:

1. The skill should be taught functionally, in the context of a topic of study, rather than as a separate exercise.
2. The learner must understand the meaning and purpose of the skill, and have motivation for developing it.
3. The learner should be carefully supervised in his first attempts to apply the skill, so that he will form correct habits from the beginning.
4. The learner needs repeated opportunities to practice the skill, with immediate evaluation so that he knows where he has succeeded or failed in his performance.

² Teachers and curriculum committees who wish to reproduce the chart, or portions of it, are hereby granted permission to do so by the National Council for the Social Studies, holder of the copyright. It is requested, however, that in all cases the introductory pages (pp. 310-312) be included, since this explanatory material provides the necessary frame of reference for the proper use of the chart.

5. The learner needs individual help, through diagnostic measures and follow-up exercises, since not all members of any group learn at exactly the same rate or retain equal amounts of what they have learned.

6. Skill instruction should be presented at increasing levels of difficulty, moving from the simple to the more complex; the resulting growth in skills should be cumulative as the learner moves through school, with each level of instruction building on and reinforcing what has been taught previously.

7. Students should be helped, at each stage, to generalize the skills, by applying them in many and varied situations; in this way, maximum transfer of learning can be achieved.

8. The program of instruction should be sufficiently flexible to allow skills to be taught as they are needed by the learner; many skills should be developed concurrently.

In applying these principles, teachers should keep two cautions in mind. First, although it is possible to make a general plan for continuity in skill development, it is impossible to set a particular place in the school program where it is always best to introduce a specific skill. Many factors enter into the final decision of the teacher, as he works with a specific class, and the general plan can serve only as a guide to what seems to be good practice. True continuity in skill development is that which is developed within the learner, not that which can be blocked out in a general plan. Furthermore, it can never be assumed that a child has gained command of a particular skill merely because he has been exposed to it. Review and reteaching of skills that have been stressed at an earlier grade level are often necessary, even with the most capable students.

Second, the suggested grade placements indicated in the chart which follows are based on a combination of current practice and the subjective judgments of many teachers, including the authors. Both of these reflect what young people seem to be able to achieve within existing patterns of instruction. It is possible that pupils could achieve earlier and more effective command of many aspects of social studies skills if new patterns and approaches for instruction were employed. More systematic and intensive readiness experiences, for example, might enable children to profit from systematic instruction in skills at an earlier age. If so, they would gain an earlier command of tools that could enhance their learning through the rest of their school years. On the other hand, it is possible that present practice calls for instruction in some skills before the learner has developed the necessary related concepts. If so, he may not only fail for the moment but be handicapped in later efforts to gain control of the particular skill. Almost no research evidence exists to guide the proper grade placement of skill instruction. Evidence of this kind is urgently needed as a basis for improving the teaching of social studies skills. It is the hope of the authors that their efforts in preparing this guide to the analysis and grade placement of skill instruction will stimulate such research in the years immediately ahead.

The chart follows:

Social Studies Skills: A Guide to Analysis and Grade Placement
 (Code: EP, early primary; LP, late primary; EI, early intermediate;
 LI, late intermediate; J, junior high school; S, senior high school)

Part One: Skills which are a definite but shared responsibility of the social studies

Skill	Introduce, through planned readiness experiences	Develop systematically	Reteach, maintain, and extend
I. Locating information A. Work with books			
1. Use title of books as guide to contents.....	EP.....	LP-LI.....	J-S.....
2. Use table of contents.....	LP.....	EI-J.....	S.....
3. Alphabetize.....	LP.....	EI-J.....	S.....
4. Use index.....	EI.....	LI-J.....	S.....
5. Use title page and copyright date.....	EI.....	LI-J.....	S.....
6. Use glossary, appendix, map lists, illustration lists.....	EI.....	LI-J.....	S.....
7. Distinguish between storybooks and factual books.....	LP-EI.....	LI-J.....	S.....
8. Choose a book appropriate for the purpose.....	LP-EI.....	LI-J.....	S.....
B. Find information in encyclopedias and other reference books			
1. Locate information in an encyclopedia by using key words, letters on volume, index, and cross references.....	EI.....	LI-J.....	S.....
2. Use reference works, such as World Almanac, atlas , Who's Who, Statesman's Yearbook.....	EI.....	LI-J.....	S.....
C. Make efficient use of the dictionary			
1. Alphabetize a list of words according to the first letter; according to the second and third letters.....	LP.....	EI-J.....	S.....
2. Use guide words.....	EI.....	LI-J.....	S.....
3. Learn correct pronunciation of a word.....	EI.....	LI-J.....	S.....
4. Understand syllabication.....	EI.....	LI-J.....	S.....
5. Choose the appropriate meaning of the word for the context in which it is used.....	EI.....	LI-J.....	S.....

X

D. Read newspapers, magazines, and pamphlets with discrimination			
1. Recognize these materials as sources of information about many topics, especially current affairs.....	LP	EI-LI	J-S
2. Select important news items	EI	LI	J-S
3. Select from these sources material that is pertinent to class activities	EI	LI-J	S
4. Learn the organization of a newspaper and how to use the index	LI	J	S
5. Learn about the sections of the newspaper	EI	LI	V-S
6. Recognize the differences in purpose and coverage of different magazines, papers, and pamphlets	LI	J-S	S
E. Know how to find material in a library, both school & public			
1. Locate appropriate books	EI	LI-J	S
2. Use a book card	EI	LI
3. Use the card catalogue to learn that-			
a. A book is listed in three ways-by subject, by author, and by title	EI	LI-J	S
b. All cards are arranged alphabetically	EI	LI-J	S
c. Cards have call numbers in upper left-hand corner which indicate the location on the shelf	EI	LI-J	S
d. Some author cards give more information than the title or subject card	EI	LI-J	S
e. Information such as publisher, date of publication, number of pages and of illustrations, and usually some annotation are provided	EI	LI-J	S
f. The Dewey Decimal System is a key to finding books	J	S	S
4. Use the Readers' Guide to Periodical Literature and other indexes	J	S	S
F. Gather facts from field trips and interviews			
1. Identify the purpose of the field trip or interview	EP	LP-J	S
2. Plan procedures, rules of behavior, questions to be asked, things to look for	EP	LP-J	S
3. Take increasingly greater initiative in the actual conduct of the field trip or interview	EP	LP-J	S
4. Evaluate the planning and execution of the field trip or interview	EP	LP-J	S

F - Cont.

5. Find acceptable ways to open and close an interview	LP	EI-J	S
6. Express appreciation for courtesies extended during the field trip or interview	EP	LP-J	S
7. Record, summarize, and evaluate information gained	EP	LP-S	S
G. Be selective in using audiovisual materials	EP-LI	J	S
(See Acquiring information through listening and observing; and Interpreting pictures, charts, graphs, tables; Part one, Sections V, VII.)			
H. Use maps and globes in developing geographic skills	LP	EI-J	S
(See Interpreting maps and globes, Part Two, Section III)			
II. Organizing information			
A. Make an outline of topics to be investigated and seek material about each major point, using more than one source	EI	LI-S	S
B. Select the main idea and supporting facts	EI	LI-S	S
C. Compose a title for a story, picture, graph, map, or chart	EP	LP-LI	J-S
D. Select answers to questions from material heard, viewed, or read.	EP	LP-J	S
E. Take notes, making a record of the source by author, title, page.	LI	J-S	S
F. Classify pictures, facts, and events under main headings or in categories	LP	EI-J	S
G. Arrange events, facts, and ideas in sequence	EP	LP-J	S
H. Make simple outlines of material read, using correct outline form	LI	J-S	S
I. Write a summary of main points encountered in material	EI	LI-S	S
J. Make a simple table of contents	LP	EI-J	S
K. Make a bibliography	LI	J	S
III. Evaluating information			
A. Distinguish between fact and fiction	EP	LP-J	S
B. Distinguish between fact and opinion	LI	J-S	S
C. Compare information about a topic drawn from two or more sources to recognize agreement or contradiction	LP	EI-J	S
D. Consider which source of information is more acceptable, and why.	LP	EI-S	S
E. Examine reasons for contradictions, or seeming contradictions, in evidence	J	J-S	S

III-Cont.

F. Examine material for consistency, reasonableness, and freedom from bias	J	J-S	S
G. Recognize propaganda and its purposes in a given context	J	J-S	S
H. Draw inferences and make generalizations from evidence	EP	LP-S	J-S
I. Reach tentative conclusions	EP	LP-S	J-S

IV. Acquiring information through reading

A. Skim to find a particular word, get a general impression, or locate specific information	LI	J-S	S
B. Read to find answers to questions	EP	LP-J	S
C. Make use of headings, topic sentences, and summary sentences to select main ideas and differentiate between main and subordinate ideas	EI	LI-J	S
D. Select the statements that are pertinent to the topic being studied.	LP	EI-J	S
E. Make use of italics, marginal notes, and footnotes to discover emphasis by author	LI	J-S	S
F. Consciously evaluate what is read, using the approaches suggested in Section III above	LI	J-S	S

V. Acquiring information through listening and observing

A. Listen and observe with a purpose	EP	LP-J	S
B. Listen attentively when others are speaking	EP	LP-J	S
C. Identify a sequence of ideas and select those that are most important	LP	EI-J	S
D. Relate, compare, and evaluate information gained through listening and observing with that gained from other sources of information ...	LP-EI	LI-J	S
E. Adjust to a speaker's voice and delivery and to the physical conditions of the situation	LP	EI-J	S
F. Reserve judgment until the speaker's entire presentation has been heard	J	J-S	S
G. Take notes while continuing to listen and to observe	J	J-S	S
H. Analyze video and audio presentations, e.g., films, pictures, models, exhibits, and other graphic materials concerned with social studies topics	J	J-S	S

VI. Communicating orally and in writing

A. Speak with accuracy and poise			
1. Develop an adequate vocabulary	EP	LP-J	S
2. Choose the appropriate word	EP	LP-J	S
3. Pronounce words correctly and enunciate clearly	EP	LP-J	S
4. Talk in sentences	EP	LP-J	S
5. Prepare and use notes in presenting an oral report, giving credit when material is quoted	EI	LI-S	S
6. Keep to the point in all situations involving oral expression	EP	LP-J	S
7. Develop self-confidence	EP	LP-J	S
8. Exchange ideas through discussion, either as leader or participant	EP	LP-J	S
9. Respect limitations of time and the right of others to be heard	EP	LP-J	S

B. Write with clarity and exactness

1. Collect, evaluate, and organize information around a clearly defined topic (see Sections I-V above)	LI	J-S	S
2. Write independently, avoiding copying from references	EI-LI	J-S	S
3. Give credit for quoted material	LI	J-S	S
4. Use standard English	LI	J-S	S
5. Include a bibliography to show source of information	EI	LI-J	S
6. Include footnotes when necessary	J	J-S	S
7. Apply the skills being developed in printing, writing, spelling, punctuating, capitalizing, and arranging written work	LP	EI-J	S
8. Proofread and revise	LI	J-S	S

VII. Interpreting pictures, charts, graphs, tables

A. Interpret pictorial materials			
1. Recognize these materials as sources of information	EP	LP-J	S
2. Distinguish between types of pictorial material, recognize the advantages of each, and recognize the need for objectivity in interpretation	EI	LI-J	S
3. Note and describe the content of the material, both general and specific	EP	LP-LI	J-S

VII. A. (cont.)

4. Interpret by applying related information, and use the material as one basis for drawing conclusions	EP	LP-J	S
B. Interpret cartoons			
1. Recognize these materials as expressing a point of view and interpret the view expressed	LI	J-S	S
2. Note and interpret the common symbols used in cartoons	LI	J-S	S
C. Study charts			
1. Understand the steps in development indicated	LI	J-S	S
2. Trace the steps in the process shown	LI	J-S	S
3. Compare sizes and quantities	LI	J-S	S
4. Analyze the organization or structure	LI	J-S	S
5. Identify elements of change	LI	J-S	S
D. Study graphs and tables			
1. Understand the significance of the title	EI	LI-J	S
2. Determine the basis on which the graph or table is built and the units of measure involved	EI	LI-J	S
3. Interpret the relationships shown	EI	LI-J	S
4. Draw inferences based on the data	EI	LI-J	S
E. Construct simple graphs, charts, tables, and other pictorial materials (including cartoons)			
	EI	LI-J	S
F. Relate information derived from pictures, charts, graphs, and tables with that gained from other sources			
	LI	J	S
VIII. Working with others			
A. Respect the rights and opinions of others	EP	LP-S	S
B. Understand the need for rules and the necessity for observing them ..	EP	LP-S	S
C. Take part in making the rules needed by the group	EP	LP-S	S

VIII. (Cont.)

D. Accept the role of leader or follower, as the situation requires	EP	LP-S	S
E. Profit from criticism and suggestions	EP	LP-S	S
F. Distinguish between work that can be done most efficiently by individuals and that which calls for group effort	EP	LP-S	S
G. Use the rules of parliamentary procedure when needed	LI	J	S

PART TWO: Skills which are a major responsibility of the social studies

I. Reading social studies materials

A. Understand an increasing number of social studies terms	EP	LP-S	S
B. Learn abbreviations commonly used in social studies materials	EI	LI-J	S

II. Applying problem-solving and critical-thinking skills to social issues

A. Recognize that a problem exists	EP	LP-J	S
B. Define the problem for study	EP	LP-J	S
C. Review known information about the problem	EP	LP-J	S
D. Plan how to study the problem	EP	LP-J	S
E. Locate, gather, and organize information	EP	LP-J	S
F. Interpret and evaluate information	EP	LP-J	S
G. Summarize and draw tentative conclusions	EP	LP-J	S
H. Recognize the need to change conclusions when new information warrants	EP	LP-J	S
I. Recognize areas for further study	EP	LP-J	S
J. Use problem-solving techniques in meeting personal and societal problems	EP-LP	EI-J	S

III. Interpreting maps and globes

A. Orient the map and note directions

- | | | | |
|---|-------------|------------|---------|
| 1. Use cardinal directions in classroom and neighborhood | LP | EI-J | |
| 2. Use intermediate directions, as southeast, northwest | EI | LI-J | S |
| 3. Use cardinal directions and intermediate directions in working with maps | EI | LI-J | S |
| 4. Use relative terms of location and direction, as near, far, above, below, up, down | EP | LP-J | S |
| 5. Understand that north is toward the North Pole and south toward the South Pole on any map projection | LP-EI | LI-J | S |
| 6. Understand the use of the compass for direction | EI | LI-J | S |
| 7. Use the north arrow on the map | EI | LI-J | S |
| 8. Orient desk outline, textbook, and atlas maps correctly to the north | EI | LI-J | S |
| 9. Use parallels and meridians in determining direction | EI | LI-J | S |
| 10. Use different map projections to learn how the pattern of meridians and that of parallels differ | EI | LI-J | S |
| 11. Construct simple maps which are properly oriented as to direction. | EI | LI-J | S |

B. Locate places on maps and globes

- | | | | |
|---|----------|--------------|---------|
| 1. Recognize the home city and state on a map of the United States and on a globe | EI | LI-J | S |
| 2. Recognize land and water masses on a globe and on a variety of maps- physical-political, chalkboard, weather, etc. | LP | EI-J | S |
| 3. Identify on a globe and on a map of the world, the equator, tropics, circles, continents, oceans, large islands | EI | LI-J | S |
| 4. Use a highway map for locating places by number and key system; plan a trip using distance, direction, and locations | EI | LI-J | S |
| 5. Relate low latitudes to the equator and high latitudes to the polar areas | EI | LI-J , | S |

6. Interpret abbreviations commonly found on maps	EI	LI-J	S
7. Use map vocabulary and key accurately	EI	LI-J	S
8. Use longitude and latitude in locating places on wall maps	LI	J	S
9. Use an atlas to locate places	LI	J	S
10. Identify the time zones of the United States and relate them to longitude	EI	LI-J	S
11. Understand the reason for the International Date Line, and compute time problems of international travel	J	S	S
12. Consult two or more maps to gather information about the same area	EI	LI-J	S
13. Recognize location of major cities of the world with respect to their physical setting	EI	LI-J	S
14. Trace routes of travel by different means of transportation	EI	LI-J	S
15. Develop a visual image of major countries, land forms, and other map patterns studied	EI	LI-J	S
16. Read maps of various types which show elevations	EI	LI-J	S
17. Understand the significance of relative location as it has affected national policies	LI	J-S	S
18. Learn to make simple sketch maps to show location	LP	EI-J	S
C. Use Scale and compute distances			
1. Use small objects to represent large ones, as a photograph compared to actual size	EP	LP-J	S
2. Make simple large-scale maps of a familiar area, such as classroom, neighborhood	EP	LP-J	S
3. Compare actual length of a block or a mile with that shown on a large-scale map	EI	LI-J	S
4. Determine distance on a map by using a scale of miles	EI	LI-J	S
5. Compare maps of different size of the same area	EI	LI-J	S
6. Compare maps of different areas to note that a smaller scale must be used to map larger areas	EI	LI-J	S
7. Compute distance between two points on maps of different scale	EI	LI-J	S
8. Estimate distances on a globe, using latitude; estimate air distances by using a tape or a string to measure great circle routes	LI	J	S

III. C. (Cont.)

9. Understand and use map scale expressed as representative fraction, statement of scale, or bar scale	LI.....	J.....	S
10. Develop the habit of checking the scale on all maps used	EI	LI-J	S
D. Interpret map symbols and visualize what they represent			
1. Understand that real objects can be represented by pictures or symbols on a map	EP	LP-J	S
2. Learn to use legends on different kinds of maps	EI	LI-J	S
3. Identify the symbols used for water features to learn the source, mouth, direction of flow, depths, and ocean currents	EI	LI-J	S
4. Study color contour and visual relief maps and visualize the nature of the areas shown	LI	J	S
5. Interpret the elevation of the land from the flow of rivers	LI	J	S
6. Interpret dots, lines, colors, and other symbols used in addition to pictorial symbols	EI	LI-J	S
7. Use all parts of a world atlas	J	S	S
E. Compare maps and draw inferences			
1. Read into a map the relationships suggested by the data shown, as the factors which determine the location of cities.....	EI	LI-J	S
2. Compare two maps of the same area, combine the data shown on them, and draw conclusions based on the data	EI	LI-J	S
3. Recognize that there are many kinds of maps for many uses, and learn to choose the best map for the purpose at hand	EI	LI-J	S
4. Understand the differences in different map projections and recognize the distortions involved in any representation of the earth other than the globe	LI	J	S
5. Use maps and the globe to explain the geographic setting of historical and current events	LI	J	S
6. Read a variety of special-purpose maps and draw inferences on the basis of data obtained from them and from other sources	J	J	S

III. E. (Cont.)

7. Infer man's activities or way of living from physical detail and from latitude	EI	LI-J	S
IV. Understanding time and chronology			
A. Develop an understanding of the time system and the calendar			
1. Learn to tell time by the clock	EP	LP	LI
2. Use names of the days of the week in order	EP	LP	EI
3. Use names of the months in sequence	EP	LP	EI
4. Use calendar to find dates of special events and to determine length of time between important dates	EP	LP-LI	J
5. Associate seasons with particular months in both northern and southern hemispheres	EP	LP-LI	J-S
6. Understand the relation between rotation of the earth and day and night	LP	EI-J	S
7. Understand the system of time zones as related to the rotation of the earth	LP	EI-J	S
8. Understand the relation between the earth's revolution around the sun and calendar year	LP	EI-J	S
9. Accumulate some specific date-events as points of orientation in time	EI	LI-S	S
10. Comprehend the Christian system of chronology- B.C. and A.D.	EI	LI-J	S
11. Use the vocabulary of definite and indefinite time expressions.			
a. Use such definite time concepts as second, minute, yesterday, decade, century	EI	LI-J	S
b. Use such indefinite time concepts as past, future, long ago, before, after, meanwhile	EP	LP-J	S
12. Acquire a sense of prehistoric and geological time	J	J-S	S
13. Learn to translate dates into centuries	EI	LI-J	S
B. Develop an understanding of events as part of a chronological series of events and an understanding of the differences in duration of various periods of time			
1. Recognize sequence and chronology in personal experiences, as the school day, weekly schedule, etc.	LP	EI-LI
2. Learn to arrange personal experiences in order	EP	LP-LI
3. Comprehend sequence and order as expressed in first, second, third, etc.	EP	LP-LI

IV. B. (Cont.)

4. Learn to think of the separation of an event from the present in arithmetical terms	EI	LI-J	S
5. Learn to figure the length of time between two given dates	EI	LI-J	S
6. Understand differences in duration of various historical periods	J	J-S	S
7. Understand and make simple time lines	EI	LI-J	S
8. Use a few cluster date-events to establish time relationships among historic events	EI	LI-S	S
9. Learn to relate the past to the present in the study of change and continuity in human affairs	EI	LI-S	S
10. Learn to formulate generalizations and conclusions about time in studying the development of human affairs	J	J-S	S

¹ Carpenter, Helen McCracken, ed., Skill Development in Social Studies: 33rd Yearbook, Washington, D. C.: National Council for the Social Studies. 1963.

DEFINITIONS OF THE SOCIAL SCIENCES

1. Economics - analyzes information concerned with the production, consumption, and distribution of wealth and income.
2. Geography - defines the physical and cultural features found on earth, shows their distribution, and makes them understandable by examining the forces that are fundamental to their interrelationships.
3. History - is the record of the whole of human experiences within a chronological framework. It serves as a base to understand the present and to project into the future.
4. Anthropology - is the study of man's evolution and present biological form, his modes of organizing group life, and coping with his natural environment via cultural means.
5. Political Science - is the study of government organization and control of power needed to formulate public policy and administer public services. It helps individuals to understand their opportunities and obligations as citizens and participate in the affairs of the community, state, nation and world.

... conflict between unlimited
and limited resources.

... basic economic problem con-
sisting every individual and
society is the conflict which ex-
ists between unlimited wants and
limited human resources. At any
moment of time, man's desires
for goods and services outrun
resources (men, machines,
natural resources) necessary
for their production.

1. Individuals and families want more than they have.
2. All members of families are consumers.
3. Food, clothing, and shelter are basic wants.
4. People depend upon plants and animals for food; upon natural resources and skills for other goods.
5. Income is the source used by people to meet their needs.
6. Individuals have a responsibility to use limited resources wisely.
7. Some members of families produce goods and services.
8. The productivity of a community is dependent on its natural resources. Different communities have different natural resources.

1. Scientific development has helped society meet its needs.
2. The amount of goods and services produced depends on human resources.
3. Technology has taught the farmer to increase his yield per acre to better meet demands for food.

... families and individuals make
economic decisions.

... individuals and societies have
developed allocating methods
for the use of limited resources and
unlimited wants.

The kinds of goods to be
produced
Methods of production to
be used
Quantity of goods to be
produced
Level of production and em-
ployment to be maintained
Determination to whom goods
and services will be dis-
tributed

1. We must make a choice of what we get because we cannot get all we want.
2. Families must make choices.
3. All work to produce goods and services is important.
4. Workers produce goods and services for the family.
5. Tools and machines help people work.
6. People in different communities differ in ways of meeting their needs.
7. Families buy goods and services that they cannot produce.
8. Community production varies as natural resources differ.

1. Our choices for the things we want are our habits.
2. Man's effective use of machines has increased his standard of living.
3. Some areas of the world tend to be underdeveloped. They lack machines and money to produce the goods they want.

... influences upon economic decisions
and systems.

... economic decisions and systems
are influenced by values of
a society as well as factors that
include culture, geography, social
structure, political history,
technical skills, and literacy.

1. Families in the same neighborhood usually meet their needs in similar ways.
2. In a democracy, we choose the type of work we wish. We decide how to spend the money we earn.
3. Some governments provide more help than others to those having an inadequate share of community's income.

1. In a democratic society, a man's progress depends on his choices.
2. Individuals in our nation operate businesses for the purpose of making a profit.
- 3.

... command and market
economics are methods of solving
economic problems.

... economic resources can be used
in different ways. Societies have
developed three basic methods of
allocating resources to meet
their needs: command economies,
market economies, and tradition-
al economies.

1. We use part of our income to buy goods in our communities.
2. We save part of our income.
3. If people in our society want more goods, suppliers will increase their supplies (Manufacturers produce according to supply and demand.)
4. Prices on goods in our society will increase if people want them.

1. Goods that are scarce will be expensive if demand is high.
2. Availability generally determines cost.
3. Competition in sale of goods and services provides progress, provides opportunities to individuals.
4. The law of supply and demand has been an important part of economics. It is determined by the interaction of supply and demand.
5. Private enterprise has developed with the idea of profit to cover costs of producing plus a profit.
6. There are many ways for man in a society to produce goods: working alone, in a partnership, or as part of a corporation. The automobile has been produced in America.

<p>Individuals and societies have to develop allocating methods because of limited resources and unlimited wants.</p> <ol style="list-style-type: none"> 1. The kinds of goods to be produced 2. Methods of production to be used 3. Quantity of goods to be produced 4. Level of production and employment to be maintained 5. Determination to whom goods and services will be distributed 	<ol style="list-style-type: none"> 2. Families must make choices. 3. All work to produce goods and services is important. 4. Workers produce goods and services for the family. 5. Tools and machines help people work. 6. People in different communities differ in ways of meeting their needs. 7. Families buy goods and services that they cannot produce. 8. Community production varies as natural resources differ. 	<ol style="list-style-type: none"> 1. Increased his standard of living. 3. Some areas of the world tend to be underdeveloped because they lack machines and money to produce the goods and services. 	
<p>III. Influences upon economic decisions and systems.</p> <p>Economic decisions and systems are influenced by values of society as well as factors that shape culture, geography, social structure, political history, technical skills, and literacy.</p>	<ol style="list-style-type: none"> 1. Families in the same neighborhood usually meet their needs in similar ways. 2. In a democracy, we choose the type of work we wish. We decide how to spend the money we earn. 3. Some governments provide more help than others to those having an inadequate share of community's income. 	<ol style="list-style-type: none"> 1. In a democratic society, a man's progress is limited. 2. Individuals in our nation operate businesses for the purpose of making a profit. 	<ol style="list-style-type: none"> 3. Our country has a high standard of living and a high rate of technological progress.
<p>IV. Tradition, command and market economies are methods of solving economic problems.</p> <p>Economic resources can be used in many ways. Societies have involved three basic methods of allocating resources to meet wants: command economies, market economies, and traditional economies.</p>	<ol style="list-style-type: none"> 1. We use part of our income to buy goods in our communities. 2. We save part of our income. 3. If people in our society want more goods, suppliers will increase their supplies (Manufacturers produce according to supply and demand.) 4. Prices on goods in our society will increase if people want them. 	<ol style="list-style-type: none"> 1. Goods that are scarce will be expensive if demand is high. 2. Availability generally determines cost. 3. Competition in sale of goods and services promotes progress, provides opportunities to individuals. 4. The law of supply and demand has been an important principle in economics. It is determined by the interaction of supply and demand. 5. Private enterprise has developed with the idea of covering costs of producing plus a profit. 6. There are many ways for man in a society to produce goods and services: working alone, in a partnership, or as part of an organization. 	<ol style="list-style-type: none"> 7. The American way of life is based on individualism and competition.
<p>V. Division of labor increases efficiency.</p> <p>The efficiency of production can be improved and the gap between limited resources and unlimited wants lessened by the division of labor and job specialization.</p>	<ol style="list-style-type: none"> 1. People choose many different kinds of work in many different areas. 2. Division of labor (more people working together on the production of a goal) helps produce things better and faster. 3. People in our society are interdependent. (For ex., people depend on the farmer and in turn, the farmer depends on many people.) 4. Many types of inventions have contributed to job specialization. 5. Sharing of household tasks increases efficiency at home. 	<ol style="list-style-type: none"> 1. Some things we get from others because we cannot make or do certain things. 2. Some people are producers of goods; other of services. 3. Since people (human resources) are limited, we must use them on wise use and conservation of our human resources. 4. By using specialists, families and communities are able to get more efficient use of the goods and services produced. 	
<p>VI. Interdependence has made trade a necessity.</p> <p>Most societies, because of job specialization and limited resources, become dependent upon other societies to satisfy some of their wants.</p> <p>Systems of transportation to facilitate trade become a necessity.</p>	<ol style="list-style-type: none"> 1. An exchange of goods and services usually takes place among groups in society. (Factories and farms sell what they produce to families, communities, and nations all over the world.) 2. Means of transportation are necessary to distribute goods. 3. All goods used by a group (family, community) are not necessarily made by them. 	<ol style="list-style-type: none"> 1. Regions are interdependent because resources are limited. 	<ol style="list-style-type: none"> 2. Some countries cooperate. 3. Nations produce goods and services for other nations.

ped society expand its economy and better meet

man's progress in satisfying his wants is largely determined by his own efforts. Private businesses producing goods and services for profit.

3. Our democratic heritage has encouraged individual initiative and inventiveness in creating additional goods and services.

1. The level of living is the amount and different levels.
2. Incomes of various regions of the U.S. the population.
3. Earnings and spendings of these earnings.
4. The geography of a nation influences:

expensive if demanded.

costs. The system of free enterprise promotes the most efficient use of scarce resources, encourages economic growth to individuals for self-advancement in business and benefits the consumer. It has been an important principle in most economies. The price of most goods and services is determined by the interaction of supply and demand.

It is based on the idea that an individual has a right to sell goods and services for enough to make a profit.

In a free society to produce goods and services: work as part of an organization.

7. The system of free enterprise (production of goods and services to be carried out by private individuals) has been a characteristic of the American economy from its earliest beginning.

1. Capitalism, communism, and socialism are systems to solve the universal economic problem of scarcity.
2. Economic freedom, like political freedom, is essential for economic growth.

because we cannot produce them ourselves. Many people are trained and skilled in producing goods; other of services.

Our resources are limited, much of our well being depends on the efficient use of our human resources.

2. The manorial system was a method of allocating jobs during the Middle Ages.

1. Geographical, occupational, and technological differences have made some regions richer and faster.

Our resources are not divided equally throughout the world.

2. Some nations had slower economic growth because of their failure to cooperate economically with other nations.
3. Nations try to buy things from other nations which they cannot produce efficiently.

1. Exports, imports and international investment are important parts of major economies.
2. International trade develops a larger market and reduces dependence.

	Sixth The Development of Man's Cultural Heritage	Seventh The Development of American Culture	Eighth Contemporary American Culture
are re- dict. cultural and health of	<ol style="list-style-type: none"> 1. The growing need of nations throughout history for economic improvement has led them to seek colonies. Control of adjacent areas to their borders has also been practiced. (mercantilism, imperialism) 2. Each society develops an economic system to deal with problems of how to allocate resources among the alternative uses. Economic systems vary. 	<ol style="list-style-type: none"> 3. One way people can get more and better goods and services is through technological progress. This includes new ideas, invention of better machines to produce goods and services, discovery of new supplies and uses of natural resources. 4. Our economic activities are constantly changing because of technology. 	<ol style="list-style-type: none"> 5. Our government provides goods and services for the people that cannot be provided by private business (defense, highways, education).
during or	<ol style="list-style-type: none"> 1. Nations unable to satisfy their wants lack skills, capital, resources, and often a stable government. 2. All nations are striving for a rapid growth no matter what their economic development or type of economic system. 	<ol style="list-style-type: none"> 3. In our private system, consumer demand in the market is the main force that determines the allocation of productive resources among competing wants. 	
	<ol style="list-style-type: none"> 1. The level of living is the amount and kinds of goods and services the people possess. All societies have different levels. 2. Incomes of various regions of the U.S. and the world are determined in part by the location, size, and skill of the population. 3. Earnings and spendings of these earnings help to promote consumption throughout the world. 4. The geography of a nation influences its economic system. 	<ol style="list-style-type: none"> 5. The level of living affects the culture and life style of a society. All societies have differences and similarities. 	<ol style="list-style-type: none"> 6. omic services ought	<ol style="list-style-type: none"> 1. Capitalism, communism, and socialism are all different ways in which various economic systems have attempted to solve the universal economic problem of unlimited wants and limited resources. 2. Economic freedom, like political freedom, is not absolute. 	<ol style="list-style-type: none"> 3. Economic welfare is a goal in most modern societies. 4. All economic systems of the world have varying degrees of government intervention. 5. Our American method of making basic economic decisions with respect to use of resources through a system of markets and prices, provides us with a maximum amount of economic freedom. 6. Our government regulates some of our economic activity in order to benefit all people. The government's economic role has increased as our economy has become more complex. 7. A command economic system is one where government officials make most of the decisions concerning what will be produced and who will benefit from goods and services produced. 	
	Geographical, occupational, and technological specialization are results of man's desire to produce more, better and faster.		

wants.

1. The level of living is the amount and kinds of goods and services the people possess. All societies have different levels.
2. Incomes of various regions of the U.S. and the world are determined in part by the location, size, and skill of the population.
3. Earnings and spendings of these earnings help to promote consumption throughout the world.
4. The geography of a nation influences its economic system.
5. The level of living affects the culture and life style of a society. All societies have differences and similarities.
6. All nations want economic growth increasing their per capita output of goods.
7. All people of the world receive a varied income which will be reflected in their standard of living.

1. Capitalism, communism, and socialism are all different ways in which various economic systems have attempted to solve the universal economic problem of unlimited wants and limited resources.
2. Economic freedom, like political freedom, is not absolute.
3. Economic welfare is a goal in most modern societies.
4. All economic systems of the world have varying degrees of government intervention.
5. Our American method of making basic economic decisions with respect to use of resources through a system of markets and prices, provides us with a maximum amount of economic freedom.
6. Our government regulates some of our economic activity in order to benefit all people. The government's economic role has increased as our economy has become more complex.
7. A command economic system is one where government officials make most of the decisions concerning what will be produced and who will benefit from goods and services produced.

1. Geographical, occupational, and technological specialization are results of man's desire to produce more, better and faster.
2. Technological progress has caused increased specialization and therefore, productive resources are more efficiently used.
3. Most countries of the world have been developing specialized labor forces to fill the need for continued economic growth.
4. Increased specialization has led to many problems in labor relations.

1. Exports, imports and international investments are necessary for economic growth. International trade is a highly developed part of major economies.
2. International trade develops a larger market for each nation, leading to increased production and greater interdependence.
3. Technological progress leading to resources being used more efficiently, has made people more interdependent.
4. Most nations strive for a favorable balance of trade.
5. Since international trade is important to our economies, the functions and operations of international agencies for economic cooperation are vital to all nations.
6. Nations today must cooperate through world trade, conservation and aid to economically underdeveloped nations. (Common market, etc.)

History - Concepts	Kindergarten - First Immediate Environment - Family Life	Second Family Life Around the World	Third Communities
<p>I. History has shown us that although change takes place at various rates, all things are subject to change. These changes may or may not constitute progress as seen in relation to the whole spectrum of history.</p>	<ol style="list-style-type: none"> 1. Everything around us changes. 2. Some neighborhoods change more rapidly than others. 3. Neighborhood changes may be either good or bad. 4. Buildings and construction cause neighborhoods to change rapidly. 	<ol style="list-style-type: none"> 1. Our world is very different from what it was when our parents were children. 2. Families around the world are each at a different stage of development. 3. Many of the old ways of family and community life are disappearing. 4. Better communication and increased travel has changed around us. 	<ol style="list-style-type: none"> 1. The world around us is dynamic nature. 2. Many present-day communities are as primitive as communities of long ago. 3. Every culture depends on what constitutes its life.
<p>II. Since human experience is a complex, continuous, and inter-related activity, it is necessary that man be studied in relation to his past and present. Thus the study of man is the study of his past relationships with other men.</p>	<ol style="list-style-type: none"> 1. Every man is a product of his immediate environment. 2. In every neighborhood there is the necessity for people to work together. 3. The efforts of even just one individual can have far-reaching results in neighborhood upkeep. 	<ol style="list-style-type: none"> 1. Parents pass on family traditions and customs. 2. No neighborhood is self-sufficient. 3. Tradition has always affected family life. 	<ol style="list-style-type: none"> 1. Communities of today represent their cultural heritage. 2. No world community is sufficient. 3. The location of a community may have much to do with its growth and development.
<p>III. Throughout the ages, man has been able to give meaning to historical knowledge by placing events in an orderly pattern. Historical knowledge is not fixed but ever-changing. This knowledge, placed in chronological order, seems to provide us with the most useful means of organization.</p>	<ol style="list-style-type: none"> 1. Children are able to remember the past without writing it down. 2. We learn through discussion and reading. 3. School and community records record facts about our everyday lives. 4. Yesterday, today, and tomorrow denote a passage of time. 	<ol style="list-style-type: none"> 1. All peoples have their way of remembering the past even if they may not be able to write. 2. Sources other than a textbook may be used to find factual data. 3. Some families and communities possess a greater awareness of the need for accurate records. 4. School and community activity is developed around a sense of time and chronology. 	<ol style="list-style-type: none"> 2. Confirmed dates are more reliable than those from fiction. Historical knowledge is not fixed but ever-changing. 3. A comparison of our fathers can show us the relationships of the past.
<p>IV. History contributed much to man's preparation for his political, social, and economic life. It is possible to derive, from historical backgrounds of the various nations, basic principles and implications for thought and action in contemporary affairs. From a survey of the past, there seems to be evidence of a progressive historical cycle that could help in solving our contemporary dilemma.</p>	<ol style="list-style-type: none"> 1. We use the history of family and community life of long ago to help understand the present. 2. Families have always faced similar problems. 3. People react differently to the same experience. 	<ol style="list-style-type: none"> 2. Human motives and drives have remained the same in all periods of history. 3. Many of the ideas we have and the words that we use were needed or understood in foreign countries. 	<ol style="list-style-type: none"> 2. Universal problems have been met in numerous ways with varying degrees of success.

<p>The Development of Man's Cultural Heritage</p> <p>"Cultural lag" is dependent upon unequal development or cultural basis (or over-emphasis) on a particular segment of society.</p>	<p>The Development of American Culture</p> <ol style="list-style-type: none"> 1. Industrial and technological advances have brought about cultural changes, especially in the U.S. Many of these changes have been very rapid and have also resulted in "cultural lags". 2. Change does not imply progress and in many periods of history has been the result of conflict not cooperation. 	<p>Contemporary American Culture</p> <ol style="list-style-type: none"> 1. Changes in culture are not only evident in the elements of society (e.g. science vs. art) but they are also evident within social structures ("generation gap"). 2. Social problems between ethnic or age groups may result, and existing social structures will be modified or changed to meet new demands. Man must learn peaceful and reasonable methods to change his society.
<p>Culture is inherited. Culture is learned. Culture was more dependent upon and influenced by physical environment in ancient civilizations. Evolution is the process by which man has arrived at his present state, both physically and cultural-</p>	<ol style="list-style-type: none"> 1. Misconceptions of race occur through incorrect information, poor social interactions, or no knowledge at all. 2. Situations being equal, all races have the capacity to develop. 	<ol style="list-style-type: none"> 1. Cultural differences are often erroneously taken as racial or national superiority or inferiority.
<p>Man has been able to use his ability to communicate to great advantage in influencing other peoples and cultures. Man has need to record the events of his life and to express himself.</p>	<ol style="list-style-type: none"> 1. Man must use his stored knowledge and apply it in various situations to solve the problems in his life. 2. He must make a conscious effort to learn and understand other cultures as well as his own to avoid conflict. 	<ol style="list-style-type: none"> 1. Ability to communicate reduces conflict. 2. The growth of mass media has produced the power of propaganda. Man must learn to think critically and individually. 3. Mob psychology should be readily recognized.
<p>As civilization becomes more complex, group structure also becomes more complex. (political systems, codified laws, etc.) As political systems have arisen as outgrowth of culture developments and various ideologies, there have been periods of conflict among cultures.</p>	<ol style="list-style-type: none"> 1. Living together, people establish political ideals and ethical values that influence their social structure and make it a distinctive social group apart from others. 2. Man's cultural adaptation results in a great diversity in ways of living and allow him to be highly versatile in selecting where and how he will live. 	<ol style="list-style-type: none"> 1. Groups of people who have gathered to live together can be divided across several areas - political, religious, ethnic, etc. 2. Each sub-culture enriches the total and is capable of participating and contributing to it.
<p>Present day cultures have been influenced by people from other cultures. Old world foundations (Greece, Rome, England) have been the basis for modern society and the starting point for syncretic development. Different societies have different attitudes and values towards the rights of the individual as contrasted with the authority of an organized government.</p>	<ol style="list-style-type: none"> 1. Culture has continuity. It lives on beyond the life of the individual. 2. The U.S. emphasizes individual rights and offers more opportunities for self-development. 	<ol style="list-style-type: none"> 1. Man, as part of his cultural make-up, differs from another because of his own experience and interactions with other peoples. 2. Cultural differences may represent different stages of cultural development. 3. Culture is a social heritage passed from generation to generation and made up from all elements of social structure.

Political Science - Concepts	Kindergarten - First Immediate Environment - Family Life	Second Family Life Around the World	Third Communities
<p>I. Every society creates a system of law and provides forms of punishment for its offenders.</p>	<ol style="list-style-type: none"> 1. People make rules in the home, school, and community. 2. People make rules against those things they feel are wrong. 3. People change rules when it is necessary. 4. Rules are made to protect our safety. 	<ol style="list-style-type: none"> 1. Every family in the world makes rules. Many of the rules are similar. 2. Family rules are different because families have different ideas about right and wrong. 3. As families change, the need for rules change. 4. Families that show respect and feeling for one another, live together in harmony. 	<ol style="list-style-type: none"> 1. Communities establish laws to make and enforce. 2. The values of a community are based on its customs and traditions. 3. Governments must follow an orderly process for making the laws. 4. Communities may elect leaders to protect all of the people, not only special groups in the society.
<p>II. Governments are established by all societies to provide a framework under which people can live. Governments take many forms. They exercise and maintain power in many ways.</p>	<ol style="list-style-type: none"> 1. There are many ways to run a school or family. 2. Parents, teachers, and community leaders have authority and should be obeyed. 	<ol style="list-style-type: none"> 1. Families make rules in many ways. 	<ol style="list-style-type: none"> 1. All communities elect leaders to make and enforce laws. 2. The government has the power to make and enforce laws.
<p>III. Governments have common functions and tasks.</p>	<ol style="list-style-type: none"> 1. The school and the community have leaders. 2. There are many community helpers. Some protect us; others do jobs for the community. 	<ol style="list-style-type: none"> 1. Families have leaders. They may be different in other parts of the world. 2. Families make decisions in many ways. Sometimes we help to make decisions. 	<ol style="list-style-type: none"> 1. All communities elect leaders. There may be one leader or a group of people who share the leadership. 2. All communities face problems that must be solved. The methods for solving problems varies from community to community. 3. The cost of government is paid by the people of the community.
<p>IV. All levels of government are interrelated and interdependent.</p>	<ol style="list-style-type: none"> 1. Authority is divided between the home, school, and community. 2. The rules of all the people in authority should be the same. 	<ol style="list-style-type: none"> 1. All families have someone in authority. This is different from culture to culture. 2. Most families around the world make similar rules. 	<ol style="list-style-type: none"> 1. All communities elect leaders. One person or a group of people must have authority for all the people made in the community.
<p>V. In every society the citizen has a role in government.</p>	<ol style="list-style-type: none"> 1. We all have some duties and responsibilities at home, in school, and in the community. 	<ol style="list-style-type: none"> 1. The degree to which all members of the family participate in making decisions varies in families around the world. 	<ol style="list-style-type: none"> 1. The role of a citizen in government varies from person to person in the community.

Third Communities	Fourth Development of Western Hemisphere	Fifth Old World Backgrounds and Development of the United States	Sixth The Development of Cultural Heritage
<ol style="list-style-type: none"> 1. Communities establish governments to make and enforce laws. 2. The values of a community are based on its customs and traditions. 3. Governments must establish an orderly process for changing the laws. 4. Communities may establish laws to protect all of the people or only special groups within the society. 	<ol style="list-style-type: none"> 1. As societies become more complex and advanced in their technology, there is a corresponding need for (a) more laws (b) more institutions to enforce and administer the law. 2. As societies become larger, the values of the society may not be shared by all. 3. Governments must establish an orderly process for changing the laws. 	<ol style="list-style-type: none"> 1. The concept of a system of law to protect individual rights flourished in England and was brought to America. 2. The conflict of values between those in power and those seeking power is a constant one. 3. People frequently rebel against the law when there is process for changing the law. Rebellion may also occur if the process is too slow to satisfy their needs. 4. Systems of law may be altered by external or internal 	<ol style="list-style-type: none"> 1. Systems of law evolved over long periods of time. 2. As the values of the society change, the systems will change. 3. Rebellion may also occur if the process is too slow to satisfy their needs. 4. The conflict of interests under the law is a constant one.
<ol style="list-style-type: none"> 1. All communities establish some form of government. 2. The government has the power to make and enforce laws. 	<ol style="list-style-type: none"> 1. Governments may use their power in many ways. 2. Governments may or may not share power between several units within the governing structure. 3. There are many ways to transfer power from one government to the next. 	<ol style="list-style-type: none"> 1. The use of government power to serve all the people flourished in England and was brought to America. 2. The abuse of power for the good of special groups can lead to rebellion. 3. An orderly transfer of power insures internal stability for the society. 	<ol style="list-style-type: none"> 1. Extension of government authority outside of the national state part of the world. 2. The abuse of government power for the good of special groups has occurred in history.
<ol style="list-style-type: none"> 1. All communities have leaders. There may be one leader or a group of people who share the leadership. 2. All communities are faced with problems that must be solved. The methods for solving problems varies from community to community. 3. The cost of government must be paid by the people of the community. 	<ol style="list-style-type: none"> 1. Leaders may be chosen in a variety of ways. 	<ol style="list-style-type: none"> 1. Elected leaders are responsible to all the people—leaders who assume leadership in any other fashion are usually responsible only to a small segment of the society. 2. Historically decision-making has been in the hands of a segment of the society. 3. The cost of government may be shared equally by all the people or may favor one group above the other. 	<ol style="list-style-type: none"> 1. Historically, most governments have had non-democratic leadership. 2. Inequity in the distribution of payment for the government has been a problem in world history.
<ol style="list-style-type: none"> 1. All communities have many people in authority. 2. One person or a group of people must have the responsibility for all the decisions made in the community. 	<ol style="list-style-type: none"> 1. As cultures become more complex and technology more advanced, there is a need for more governmental units. 2. There must be a relationship between every unit of government within the society. 3. Whatever the relationship is between units of government within the society the ultimate authority must rest in the highest level of government. 	<ol style="list-style-type: none"> 1. A major problem in forming and maintaining a national state is integrating all levels of government with the greatest authority resting with the highest level. 	<ol style="list-style-type: none"> 1. Historically, nations had difficulty maintaining a proper balance between units of government.
<ol style="list-style-type: none"> 1. The role of a citizen in government varies from community to community. 	<ol style="list-style-type: none"> 1. As societies become more complex, individuals join groups in an attempt to influence the government. 2. Some groups have a greater role in government than others for a variety of reasons. 	<ol style="list-style-type: none"> 1. Active participation by its citizens is necessary to a democratic form of government. 2. The concept of broad involvement by the people in the affairs of government flourished in England and was brought to America. 	<ol style="list-style-type: none"> 1. Historically the broad involvement of people in the affairs of government or obedience to laws by the minority has not been resolved. 2. Historically, participation in government has been large segments of

Grade 6

Grade Six

Overview and Time Allotment Suggestion

The basis for the sixth grade curriculum is the development and integration of the social science disciplines. Through a hybridization of the social sciences, we will attempt to reveal and develop valuable interpretations, concepts, and learnings, that are related to the ancient civilizations. This then will effect a deeper and more meaningful understanding of the present and future. Social studies should be studied 300 minutes per week.

Child Development

Children at this grade level are beginning to develop the traits of transition which reveal the onset of adolescence. Artlessness, ardor, and sheer awkwardness appear in patterns which signify the vigorous processes of growing up. In general, they tend to exhibit the following characteristics:

- a. Incessant body activity
- b. Variable moods
- c. Proud and touchy defenses - extremely emotional

Learning Characteristics

- a. Constant probing
- b. Active and effervescent curiosities
- c. Interacting with people
 1. Seeking approval by adults
 2. Seeking acknowledgement by peer group
- d. Beginning to work individually

In summation, the child at this age is critical, demanding, sharp seeing, and talkative.

Implications for Social Studies Instruction

- a. Materials used should be directly related to the student's needs
- b. A variety of materials should be used
- c. Opportunities should be provided for children to participate as individuals and in group efforts
- d. Opportunities should be afforded each student to satiate the desire to probe into areas of his particular interest
- e. Information presented should continue to further motivate their active curiosities

ECONOMICS

Concepts

- I. Basic conflict between unlimited wants and limited resources.

The basic economic problem confronting every individual and nation is the conflict which exists between unlimited wants and limited human resources. At any moment of time, man's desires for goods and services outrun the resources (men, machines, and natural resources) necessary to their production.

- II. Societies and individuals make economic decisions.

Individuals and societies have to develop allocating methods because of limited resources and unlimited wants.

1. The kinds of goods to be produced.
2. Methods of production to be used
3. Quantity of goods to be produced
4. Level of production and employment to be maintained
5. Determination to whom goods and services will be distributed

Variants

1. The growing need of nations throughout history for economic improvement has led them to seek colonies. Control of adjacent areas to their borders has also been practiced, (Mercantilism, imperialism).
2. Each society develops an economic system to deal with problems of how to allocate resources among the alternative uses. Economic systems vary.
 1. Nations unable to satisfy their wants lack skills, capital, resources, and often a stable government.
 2. All nations are striving for a rapid growth no matter what their economic development or type of economic system

Concepts

III. Influences upon economic decisions and systems.

Economic decisions and systems are influenced by values of society as well as factors that shape culture, geography, social structure, political history, technical skills, and literacy.

IV. Tradition, command and market economies are methods of solving economic problems.

Economic resources can be used in many ways. Societies have involved three basic methods of allocating resources to meet wants: command economies, market economies, and traditional economies.

V. Division of labor increases efficiency.

The efficiency of production can be improved and the gap between limited resources and unlimited wants lessened by the division of labor and job specialization.

VI. Interdependence has made trade a necessity.

Most societies, because of job specialization and limited resources, become dependent upon other societies to satisfy some of their wants.

Systems of transportation to facilitate trade becomes a necessity.

Variants

1. The level of living is the amount and kinds of goods and services the people possess. All societies have different levels.
 2. Incomes of various regions of the U.S. and the world are determined in part by the location, size, and skill of the population.
 3. Earnings and spendings of these earnings help to promote consumption throughout the world.
 4. The geography of a nation influences its economic system.
-
1. Capitalism, communism, and socialism are all different ways in which various economic systems have attempted to solve the universal economic problem of unlimited wants and limited resources.
 2. Economic freedom, like political freedom, is not absolute.
-
1. Geographical, occupational, and technological specialization are results of man's desire to produce more, better and faster.
-
1. Exports, imports and international investments are necessary for economic growth. International trade is a highly developed part of major economies.
 2. International trade develops a larger market for each nation, leading to increased production and greater interdependence.

GEOGRAPHY

Concepts

- I. Maps are necessary to understand the inter-relationship among inhabitants of the earth to their cultural and physical phenomena.
- II. The distinctive character of each place and the difference from one place to another are completely inter-related.
- III. Settlements are composed of a series of separate sites. Each functions within the urban structure.
- IV. The basic unit for geographical study is the region. Understanding it involves the recognition of the GESTALT.
- V. Resources and their use are related to the cultural, technological, and physical development of man's surroundings.

Variants

1. A map tells you certain facts about the earth; physical features, climate, divisions, vegetative regions and cultural distributions.
2. There are many different types of map projections: polar projections, equal area projection, mercator projection, hemolographic projection, sinusoidal projection.
1. The geographer looks at the overall view of a particular part of the world. He sees inter-relationships of the various individual factors, and ties them together in an understanding of the reality of the place.
1. The significance of a place is due to its location in respect to other places.
2. A settlement is an economic unit.
1. Geographic patterns occur because of similarities in various places on the surface of the earth.
1. Man can choose to use his environment in certain ways because his intelligence enables him to change and modify his environment.

HISTORY

Concepts

- I. History has shown us that although change takes place at various rates, all things are subject to change. These changes may or may not constitute progress as seen in relation to the whole spectrum of history.

- II. Since human experience is a complex, continuous, and inter-related activity, it is necessary that man be studied in relation to his past and present. Thus the study of man is the study of his past relationships with other men.

- III. Throughout the ages, man has been able to give meaning to historical knowledge by placing events in an orderly pattern. Historical knowledge is not fixed but ever-changing. This knowledge, placed in chronological order, seems to provide us with the most useful means of organization.

Variants

1. A study of history reveals that no area, group, nation, or object remains the same as it originally was.
2. The four races of man developed at their own rate.
3. Civilizations seem to satisfy their own needs.
4. Through the ages, society has become more complex in nature as its needs increased.

1. Each civilization has social political, and economic institutions that are hold-overs from the past.
2. People have spread civilization by means of communication, migration, trade, and travel.
3. The cause of great historical upheavals are many and complex.

1. Non-verbal communication is a factor of early world civilizations. Testing, validity, and accuracy of primary and secondary sources of historical events is difficult but necessary.
3. Every civilization has its own determined history.
4. The growth of any civilization may be shown chronologically.

Concepts

IV. History contributed much to man's preparation for his political, social, and economic life. It is possible to derive, from historical backgrounds of the various nations, basic principles and implications for thought and action in contemporary affairs. From a survey of the past, there seems to be evidence of a progressive historical cycle that could aid in solving our contemporary dilemma.

Variants

1. One may "meet" new people, gain insight into age-old problems, and "experience" identification with an historical period.
2. Civilizations have analogous patterns of political, economic, and social growth and decline.
3. Different civilizations have developed since the earliest times with varying standards of ethical and spiritual values.

ANTHROPOLOGY

Concepts

- I. Change is a part of society. It is constant but the rate of change can vary from evolution to revolution.
- II. While man is categorized by "race", human beings through physical characteristics and basic human desires and needs are more alike than different.
- III. Man is an animal with the distinctive ability to communicate on a very highly sophisticated level.
- IV. Man as a social animal, structures his life in groups with others of a similar background. Together, they endeavor to form a system of social order and stability.
- V. Man is a product of his environment. His cultural group is influenced by both human and physical environment and each is dependent heavily upon previous cultures.

Variants

1. "Cultural lag" is dependent upon an unequal development or cultural emphasis (or over-emphasis) on a particular segment of society.
1. Race is inherited.
2. Culture is learned.
3. Culture was more dependent upon and influenced by physical environment in ancient civilizations.
4. Evolution is the process by which man has arrived at his present state, both physically and culturally.
1. Man has been able to use his ability to communicate to great advantage in influencing other peoples and cultures.
2. Man has need to record the events of his life and to express himself.
1. As civilization becomes more complex, group structure also becomes more complex. (political systems, codified laws, etc.)
2. Since political systems have arisen as outgrowths of culture developments and various ideologies, there have been periods of conflict among cultures.
1. Present day cultures have been influenced by people from other cultures.
2. Old world foundations (Greece, Rome, England) have been the basis for modern society and the starting point for syncretic development.
3. Different societies have different attitudes and values towards the rights of the individual as contrasted with the authority of an organized government.

POLITICAL SCIENCE

Concepts

I. Every society creates a system of law and provides forms of punishment for its offenders.

II. Governments are established by all societies to provide a framework under which people can live. Governments take many forms. They exercise and maintain power in many ways.

III. Governments have common functions and tasks.

IV. All levels of government are interrelated and interdependent.

Variants

1. Systems of law evolve over long periods of time.
2. As the values of the society change, the system of law will change.
3. People frequently rebel against the law when there is no orderly process for changing the law. Rebellion may also occur if they feel the process is too slow to satisfy their needs.
4. Systems of law may be altered by external or internal forces.
5. The conflict of individual rights under the law and rights of special groups under the law is a constant one.

1. Extension of governmental authority outside the limits of the national state is a part of the world history.
2. The abuse of governmental power for the good of special groups has occurred throughout history.

1. Historically, most governments have had non-democratic leadership.
2. Historically, decision-making has been in the hands of a small segment of the society.
3. Inequity in the distribution of payment for the cost of government has been a constant problem in world history.

1. Historically, nations have had difficulty maintaining a proper balance between units of government.

Concepts

V. In every society the citizen has a role in government.

Variants

1. Historically, the question of broad involvement by the people in the affairs of government or obedience to imposed laws by the minority has not been resolved.
2. Historically, participation in government has been denied to large segments of the society.

The Development of Man's Cultural Heritage

Content

Learning Experiences

I. Geography

A. Reading of maps

1. Legends
2. Political
3. Physical
4. Climate

1. Name and locate climate belts on a world map. How has each of these climate belts affected man?
2. Compare a population density map with a climate map. Which climates are sparsely populated? Which ones have the densest populations?
3. Research rain-making. How could it be used advantageously?
4. Discuss the possible psychological effect of the monsoon seasons. What is a tropical rain forest?

5. Temperature
6. Precipitation
7. Population
8. Vegetation

1. Compare the features of a soil map with a vegetation map of the same culture.
2. How has the physical geography of Africa south of the Sahara encouraged or hindered the level of transportation?
3. Research Assam in terms of its economic, social, and political position among Indian states.
4. Name and locate the major vegetation zones on a world map.
5. Name and locate the major soil zones. Relate the soil zones to climate and population.
6. Gather information on India's agricultural production, number of arable acres, and typical yield per acre. Compare these with the United States, and discuss their implications on the lives of the people.

B. Interpretation

1. Graphs
2. Charts
3. Scales

1. Locate the four river valleys in which man's earliest civilizations developed. Discuss why this was so.

Content

Learning Experiences

2. Name and locate the largest population centers of the earth's surface. How much of the earth's surface do the large population centers comprise? How many of the world's people live there?
 3. Compute the percentage distribution of population by continents. What changes, if any, have come since 1800?
 4. Select one of the world's main rivers. Look up what navigation improvements have been made on it.
 5. What effect has a long coastline lacking in good natural harbors had upon India? Why has such a nation never become a maritime power?
 6. Devise an imaginary country. Using the various types of maps, indicate the economy and population best suited to the areas.
- C. Types
1. Polar
 2. Equal area
 3. Mercator
 4. Homolographic
 5. Conic
 6. Sinusoidal
- D. Discriminative and Critical Thinking
- E. Listening
- II. Anthropology
- A. Method of inquiry into the past
1. Seed an area at school with artifacts. Demonstrate scientific techniques used in archeology and their importance.
 2. Create a classroom museum of fossils and artifacts that students have brought to class.

Content

Learning Experiences

B. Origins of Society

1. First Glacial Age
 - a. Java Man
 - b. Peking Man
2. Second Glacial Age
 - a. Hiedelberg Man
3. Third Glacial Age
4. Fourth Glacial Age
 - a. Neanderthal Man
 - b. Cro-Magnon Man
 - c. Grimaldi

C. Races of Man

1. Caucasian
 - a. Nordic
 - b. Alpine
 - c. Mediterranean
2. Mongolian
 - a. Calmuk
 - b. Chinese
 - c. American Indian
3. Negroid
 - a. African
4. Australoid

 a. Australian

 b. Melanesian

D. Comparisons

1. Differences between man and animal
2. Similarities between man and animal
3. Biblical and Darwinian origin of man
4. Uniqueness of man
 - a. Communication
 - b. Transmission of culture

3. Simulate a dig in 4,000 A.D. with a written description of findings.
4. Obtain a resource speaker to discuss the field of archeology.
5. Assign library reports to be shared with class on the various stone age men. Include their way of life, any new inventions, tools, areas of the world from which they came, physical characteristics, contemporary animal and vegetable life, and any new discoveries. (fire, wheel, etc.)

1. Visit the N.Y. Museum of Natural History.
2. Chart the four major races of man.
3. Compare and contrast similarities and differences of races. Discuss how they are basically the same.
4. Discuss environment and its role in determining progress and evolution.

III. Communication

A. Non-Verbal

1. Pictogram
 - a. Hieroglyphics

1. Construct a film strip showing the progress and evolution of language.
2. Demonstrate sign language.

Content

2. Ideogram
 - a. Cuneiform
 - b. Chinese and Japanese (calligraphy)
3. Phonogram
 - a. Phoenician
4. Development of Alphabet
 - a. Earliest
 1. Egyptian
 2. Phoenician
 - b. Aramaic
 1. Hebrew
 2. Arabic
 - c. Oriental (Chinese and Japanese)
 - d. Greek
 - e. Roman-English
 - f. Cyrillic (Russian)
5. Sign Language
6. Braille
- B. Verbal
 1. Language Families
 - a. Indo - European
 - b. Sino - Tibetan
 - c. Semitic - Hamitic
 - d. Uralic - Altaic
 - e. Japanese - Korean
 - f. Malayo - Polynesian
 - g. African Negro
- C. Effective Use of Language
 1. Importance of using words well
 2. Understanding what we hear
 - a. Mass communication
 - b. Propaganda
 - c. Public opinion

Learning Experiences

3. Prepare a ditto of various alphabets and words. Compare the alphabets and words of the different languages.
1. Compose common phrases in a variety of languages.
2. Draw individual maps showing origin of language families and spread of languages.
1. Visit a publishing plant.
2. Discuss and display parts of a newspaper.
3. Play the game "whisper" by giving a message to one student and listening to changes after the message is relayed to the last student.
4. Chart propaganda techniques including examples.
5. Collect examples of propaganda from past and current history from all sources of mass media. Present a propaganda speech that illustrates techniques.

Content

Learning Experiences

IV. History of Religion

- A. Primitive
- B. Buddhism
- C. Hinduism (Jainism)
- D. Confucianism
- E. Taoism
- F. Shintoism
- G. Zoroastrianism
- H. Judaism
- I. Christianity
- J. Mohammedism
- K. Protestantism

1. Conduct a panel discussion on "Monotheism and Polytheism." Contrast and compare differences and similarities.
2. Discuss religion as an ethical standard as compared to laws in a government.
3. Show how mythology influenced us by collecting examples of modern usage, (e.g. Ajax - "strong" cleanser, Mercury - "fast" car, etc.)

V. Origins of Government

A. Development of Community Life

1. Prehistoric
2. Family
3. Clan
4. Village
5. City
6. City - State
7. Nation
8. Empire

B. Political Structures

1. Autonomy
2. Absolutism
3. Aristocracy
4. Autocracy
5. Oligarchy
6. Bureaucracy
7. Monarchy
8. Theocracy
9. Democracy
10. Republic
11. Socialism
12. Communism

1. Discuss the role and responsibilities of the individual as a member of society.

1. Write individual reports on selected political structures through the ages. (e.g. Theocracy of Egypt vs. Oligarchy of Sparta)
2. Pictorially depict rights and limitations of citizens under various political structures.

VI. Arts

- A. Sculpture
- B. Painting
- C. Music
- D. Architecture
- E. Literature

1. Visit the N.Y. Metropolitan Museum of Art.
2. Utilize audio-visual aids available in F.M.G. library for small group research.
3. Discuss various aspects of arts. (church music, portrait painting, hieroglyphic art, rain dance, etc.)
4. Conduct small group presentations on the arts, (modern art and music; Renaissance; Impressionist art and music; poetry; etc.)

Content

Learning Experiences

VII. Origins of Economy

A. Early Agricultural
Production Methods

1. Gatherer-Collector
2. Hunting-Fishing
3. Farming

B. Early Methods of Exchange

1. Trade
2. Early forms of money
3. Barter

1. Study and discuss what is economy and what constitutes an economic system.
2. Role play an early man, living on an island. What would be immediate and future needs and goals?
3. Consider where you would prefer to live if you were restricted to a limited economy of this era, and why.
4. Establish an imaginary trade company that would depict supply and demand.

SAMPLE UNIT - GREECE AND ATHENS

CONCEPTS

Anthropology

- C IV Man as a social animal, structures his life in groups with others of a similar background. Together, they endeavor to form a system of social order and stability.
- C V Man is a product of his environment. His cultural group is influenced by both human and physical environment and each is dependent heavily upon previous cultures.

Economics

- C I Basic conflict between unlimited wants and limited resources.
The basic economic problem confronting every individual and nation is the conflict which exists between unlimited wants and limited human resources. At any moment of time, man's desires for goods and services outrun the resources (men, machines, and natural resources) necessary to their production.
- C III Influences upon economic decisions and systems.
Economic decisions and systems are influenced by values of society as well as factors that shape culture, geography, social structure, political history, technical skills, and literacy.
- C VI Interdependence has made trade a necessity.
Most societies, because of job specialization and limited resources, become dependent upon other societies to satisfy some of their wants.
Systems of transportation to facilitate trade becomes a necessity.

History

- C II Since human experience is a complex, continuous, and inter-related activity, it is necessary that man be studied in relation to his past and present. Thus the study of man is the study of his past relationships with other men.
- C III Throughout the ages, man has been able to give meaning to historical knowledge by placing events in an orderly pattern. Historical knowledge is not fixed but ever-changing. This knowledge, placed in chronological order, seems to provide us with the most useful means of organization.
- C IV History contributed much to man's preparation for his political, social, and economic life. It is possible to derive, from historical backgrounds of the various nations, basic principles and implications for thought and action in contemporary affairs. From a survey of the past, there seems to be evidence of a progressive

historical cycle that could aid in solving our contemporary dilemma.

Geography

C II

The distinctive character of each place and the difference from one place to another are completely inter-related.

C V

Resources and their use are related to the cultural, technological, and physical development of man's surrounding

Political Science

C I

Every society creates a system of law and provides forms of punishment for its offenders.

C II

Governments are established by all societies to provide a framework under which people can live. Governments take many forms. They exercise and maintain power in many ways.

C IV

All levels of government are inter-related and inter-dependent.

C V

In every society the citizen has a role in government.

Selected and Suggested Activities

1. Role play Athenian branches of government. Enact laws, hold court hearings, and make policy decisions according to customs of Greek democracy.
2. Make an historical tape of Battle at Thermopylae.
3. Tape sections of the play by Sophocles, "Philoctetes".
4. Conduct a panel discussion on why Athenian citizens defended democracy against Spartans.
5. Draw and present a panorama of Greek art.
6. Select a project of interest to be researched in library.
7. Report on mythology and its relationship to society today.

Resources for Students

1. Films and filmstrips
 - A. NBC special "Glory of Greece"
 - B. Imperial F.S. "Ancient Athens"
 - C. Pathescope F.S. (6) "Ancient Greece"
2. Books and Readings
 - A. Greek Gods and Heroes
 - B. Siege and Fall of Troy
 - C. Everyday Life in Ancient Times
 - D. Life Magazine - Selected Readings on Greece
 1. Birth of Reason
 2. Glory that was Greece
 - E. Reading based on "The Athenian Citizen" prepared by American School of Classical Studies
3. Tape and Records
 - A. "Athenian Values" - tape
 - B. "Spartan Values" - tape
 - C. Persian Wars - Thermopylae - tape
 - D. Alexander the Great - record

Nonbook and Audio-Visual Bibliography

The following lists of audio-visual materials have been correlated to our social studies curriculum. Materials not cataloged before May, 1969 do not appear here. For additional materials, consult the card catalog in your school library or your building librarian.

Grade level designations are tentative suggestions. You are urged to preview materials to determine suitability for your use.

Explanations:

1. All materials listed are located in the five Springfield school libraries and/or the Curriculum Materials Center.
2. Requests for materials may be placed with your school librarian, who has the materials requisition form. Class numbers and titles are necessary for requesting material. Class numbers are given at the left of this list, and titles are capitalized. An asterisk after a title indicates that a teaching guide is available.
3. All materials are listed by Grade Level, with two exceptions; Map and Globe Study, and Holidays, which are placed at the end of the listing.
4. Within each grade level all types of materials, except records, are listed by Dewey Decimal Number.
5. All materials in the list also appear in each school library card catalog in a more expanded form. There you will find more information, such as, listings of individual titles of sets, etc.

Grade 7

Grade Seven

Overview and Time Allotment Suggestion

The seventh grade course of study offers an in-depth study of the political, economic and social institutions of the United States from the development of Colonial America to the Civil War. The program develops the five major disciplines of political science, economics, anthropology, history, and geography. The program allows students to continue to study conceptual problems as reoccurring patterns of history.

Social Studies should be studied 300 minutes per week.

Child Development

Children at this grade level may be generally characterized as pre-adolescent. Because of the varying patterns of growth and development, the children range from pre-pubescence to maturity as a young adult. They tend to exhibit the following characteristics:

- a. Need for group approval
- b. Rebellion against dogmatic authority
- c. Need for independence

Learning Characteristics

- a. Ability to work in groups
- b. Ability to work individually
- c. Ability to plan their activities
- d. Ability to do long range projects
- e. Ability to grasp conceptual problems

Implications for Social Studies Instruction

- a. Materials should be related to the pupils' personal background, when possible
- b. Visual materials should be used
- c. Use of multi-texts
- d. Research should be the cornerstone of the program
- e. Opportunities must be given to the student to select, analyze, and interpret historical material

ECONOMICS

Concepts

- I. Basic conflict between unlimited wants and limited resources.

The basic economic problem confronting every individual and nation is the conflict which exists between unlimited wants and limited human resources. At any moment of time, man's desires for goods and services outrun the resources (men, machines, and natural resources) necessary to their production.

- II. Societies and individuals make economic decisions.

Individuals and societies have to develop allocating methods because of limited resources and unlimited wants.

1. The kinds of goods to be produced
2. Methods of production to be used
3. Quantity of goods to be produced
4. Level of production and employment to be maintained
5. Determination to whom goods and services will be distributed

Variants

1. The growing need of nations throughout history for economic improvement has led them to seek colonies. Control of adjacent areas to their borders has also been practiced, (mercantilism, imperialism).
2. Each society develops an economic system to deal with problems of how to allocate resources among the alternative uses. Economic systems vary.
3. One way people can get more and better goods and services is through technological progress. This includes new ideas, invention of better machines to produce goods and services, discovery of new supplies and uses of natural resources.
4. Our economic activities are constantly changing because of technology.
1. Nations unable to satisfy their wants lack skills, capital, resources, and often a stable government.
2. All nations are striving for a rapid growth no matter what their economic development or type of economic system.
3. In our private system, consumer demand in the market is the main force that determines the allocation of productive resources among competing wants.

Concepts

III. Influences upon economic decisions and systems.

Economic decisions and systems are influenced by values of society as well as factors that shape culture, geography, social structures, political history, technical skills, and literacy.

IV. Tradition, command and market economies are methods of solving economic problems.

Economic resources can be used in many ways. Societies have involved three basic methods of allocating resources to meet wants: command economies, market economies, and traditional economies.

Variants

1. The level of living is the amount and kinds of goods and services the people possess. All societies have different levels.
2. Incomes of various regions of the U.S. and the world are determined in part by the location, size, and skill of the population.
3. Earnings and spendings of these ~~earnings~~ help to promote consumption throughout the world.
4. The geography of a nation influences its economic system.
5. The level of living affects the culture and life style of a ~~society~~. All societies have differences and similarities.

1. Capitalism, communism, and socialism are all different ways in which various economic systems have attempted to solve the universal economic problems of unlimited wants and limited resources.
2. Economic freedom, like political freedom is not absolute.
3. Economic welfare is a goal in most modern societies.
4. All economic systems of the world have varying degrees of government intervention.
5. Our American method of making basic economic decisions with respect to use of resources through a system of markets and prices, provides us with a maximum amount of economic freedom.
6. Our government regulates some of our economic activity in order to benefit all people. The government's economic role has increased as our economy has become more complex.
7. A command economic system is one where government officials make most of the decisions concerning what will be produced and who will benefit from goods and services produced.

Concepts

- V. Division of labor increases efficiency.

The efficiency of production can be improved and the gap between limited resources and unlimited wants lessened by the division of labor and job specialization.

- VI. Interdependence has made trade a necessity.

Most societies, because of job specialization and limited resources, become dependent upon other societies to satisfy some of their wants.

Systems of transportation to facilitate trade becomes a necessity.

Variants

1. Geographical, occupational, and technological specialization are results of man's desire to produce more, better and faster.
2. Technological progress has caused increased specialization and therefore, productive resources are more efficiently used.
1. Exports, imports and international investments are necessary for economic growth. International trade is a highly developed part of major economies.
2. International trade develops a larger market for each nation, leading to increased production and greater interdependence.
3. Technological progress leading to resources being used more efficiently, has made people more interdependent.
4. Most nations strive for a favorable balance of trade.

GEOGRAPHY

Concepts

- I. Maps are necessary to understand the inter-relationship among inhabitants of the earth to their cultural and physical phenomena.
- II. The distinctive character of each place and the difference from one place to another are completely inter-related.
- III. Settlements are composed of a series of separate sites. Each functions within the urban structure.
- IV. The basic unit for geographical study is the region. Understanding it involves the recognition of the GESTALT.
- V. Resources and their use are related to the cultural, technological, and physical development of man's surroundings.

Variants

1. Maps may be used in making judgments about man's life.
 2. Maps reflect particular culture areas which develop to satisfy particular needs.
-
1. Areal differentiation and integration require interaction.
 2. Territorial specialization demands connections with other areas for the exchange of goods and services.
-
1. Differences exist among people of the world because environments and cultures differ.
-
1. Geography takes a composite view of all elements of societal structure and so cuts across all disciplines.
-
1. There is a relationship between physical and cultural phenomena.
 2. Resources are culturally determined.

HISTORY

Concepts

I. History has shown us that although change takes place at various rates, all things are subject to change. These changes may or may not constitute progress as seen in relation to the whole spectrum of history.

II. Since human experience is a complex, continuous, and interrelated activity, it is necessary that man be studied in relation to his past and present. Thus the study of man is the study of his past relationships with other men.

Variants

1. From its inception, the U.S. has developed a characteristic of change which most Americans have accepted.
 2. Economic and political changes have dominated our cultural growth.
 3. Our country's total growth has produced both assets and liabilities to which the American public must adjust.
 4. Environment has played both a positive and negative role in the development of our American culture.
-
1. Our American culture is the result of modification and extension of our past.
 2. Understanding of how events of the past have influenced every aspect of the way we live and think.
 3. Our American culture is the product of the interaction between various racial, religious and culturally heterogeneous groups.
 4. Our colonial experience helped to shape our national government and constitution.

HISTORY

Concepts

III. Throughout the ages, man has been able to give meaning to his-
torical knowledge by placing events in an orderly pattern. His-
torical knowledge is not fixed but ever-
changing. This know-
ledge, placed in chronological order, seems to provide us with the most useful means of organization.

IV. History contributed much to man's prepara-
tion for his political, social, and economic life. It is possible to derive, from his-
torical backgrounds of the various nations, basic principles and implications for thought and action in contemporary affairs. From a survey of the past, there seems to be evidence of a pro-
gressive historical cycle that could aid in solving our contem-
porary dilemma.

Variants

1. Written records are subject to various interpretations depending upon our frame of reference.
2. Testing, validity, and accuracy of primary and secondary sources of historical events is difficult but necessary.
3. Facts may be interpreted in more than one way; each impression of an event is influenced by the ex-
perience and culture of the observer.
4. Many social phenomenon can be most easily under-
stood as they developed through an historical period; e.g. transforma-
tion from agricultural to an industrial society.

1. One may "meet" new people, gain insight into age-old problems, and "experience" identification with an historical period.
2. Revolution, dissent, and war have been characteristic throughout America's past.
3. The "melting pot" concept of American society gives it a certain characteristic of its own.

ANTHROPOLOGY

Concepts

- I. Change is a part of society. It is constant but the rate of change can vary from evolution to revolution.

- II. While man is categorized by "race", human beings through physical characteristics and basic human desires and needs are more alike than different.

- III. Man is an animal with the distinctive ability to communicate on a very highly sophisticated level.

- IV. Man as a social animal, structures his life in groups with others of a similar background. Together, they endeavor to form a system of social order and stability.

- V. Man is a product of his environment. His cultural group is influenced by both human and physical environment and each is dependent heavily upon previous cultures.

Variants

1. Industrial and technological advances have brought about cultural changes, especially in the U.S. Many of these changes have been very rapid and have also resulted in "cultural lags".
2. Change does not imply progress and in many periods of history has been the result of conflict not cooperation.

1. Misconceptions of race occur through incorrect information, poor social interactions, or no knowledge at all.
2. Situations being equal, all races have the capacity to develop.

1. Man must use his stored knowledge and apply it in various situations to solve the problems in his life.
2. He must make a conscious effort to learn and understand other cultures as well as his own to avoid conflict.

1. Living together, people establish political ideals and ethical values that influence their social structure and make it a distinctive social group apart from others.
2. Man's cultural adaptation results in a great diversity in ways of living and allow him to be highly versatile in selecting where and how he will live.

1. Culture has continuity. It lives on beyond the life of the individual.
2. The U.S. emphasizes individual rights and offers more opportunities for self-development.

POLITICAL SCIENCE

Concepts

I. Every society creates a system of law and provides forms of punishment for its offenders.

II. Governments are established by all societies to provide a framework under which people can live. Governments take many forms. They exercise and maintain power in many ways.

III. Governments have common functions and tasks.

IV. All levels of government are interrelated and interdependent.

V. In every society the citizen has a role in government.

Variants

1. Individual rights under the law are guaranteed by the government of the U.S.

2. The values of our society extended the concept of individual rights beyond that ever attempted.

3. Violent dissent against the existing law is a part of our history although most members of the society prefer orderly change.

1. Democratic societies distribute the power of government. The opportunity for abuse of power is lessened.

2. Orderly change of governmental power is an important facet of our history.

1. Democratic societies have leaders who are elected by and are responsible to the people.

2. Decision-making is shared in a democratic society.

3. The concept of equal distribution of payment for the cost of government has evolved in our nation's history.

4. Leaders in all societies share common characteristics.

1. The U.S. has achieved internal stability and has maintained a strong national government to a large degree.

2. Nations with strong national governments offer greater prosperity and security to their people.

1. Political parties offer citizens a strong voice in the affairs of government.

The Development of American Culture

Content

- I. Study in Colonial Culture
 - A. Political
 1. Growth of civil liberties
 2. Colonial government system
 3. Foundations of American Constitutionalism
 - a. Mayflower Compact
 - b. Fundamental orders of Connecticut
 - c. Toleration Act of Maryland
 - d. Massachusetts civil bodies of liberties
 - B. Social
 1. Life in early Virginia
 2. Life in Plymouth Colony
 3. The Massachusetts Bay Colony
 - a. Class structure
 - b. Culture dominated by religion
 - c. Urban living
 - d. Education
 - e. Importance of the family
 - f. Social control
 4. The Virginia Colony
 - a. Class structure
 - b. Plantation life
 - c. Aping of English Squire
 - d. Education
 - e. Family life

Learning Experiences

1. View filmstrips dealing with colonization of the new world and the development of colonial government.
 2. Use tape recordings and actual documents of the period to gain an idea of the foundations of government.
 3. Role play and express views of the major political philosophers.
 4. Produce a newspaper or magazine of the period including the social, political, and economic daily happenings of the colony or colonies.
 5. Prepare a series of cartoons dealing with the major topics covered in the unit. Write a paragraph about each cartoon to indicate understanding by the students.
1. Use filmstrips to depict the various aspects of cultural life in the New England, Middle and Southern Colonies.
 2. Discuss and compare reports on aspects of colonial life.
 3. Role play the daily lives and positions during the 18th, 19th, and 20th centuries of:
 - a. A farmer and/or landowner in Great Britain.
 - b. A farmer in New England
 - c. A plantation owner in Virginia
 - d. A farmer in France
 - e. A country of own choice
 1. Read a description of the voyage of an indentured servant to the New World. (K.F. Geiser, Indentured Servants of Pennsylvania.) List the conditions which would have forced men and women to risk such a voyage. Finally, group

Content

Learning Experiences

- the reasons under economic, political, personal, and social. Check reasons for logic and importance.
2. Utilize devices for the comparison and contrast of ideas, trends, and events such as a time line.
 3. "Of 256 signers of the Cumberland Compact, scarcely a dozen were alive a decade later; yet but one died a natural death!" Present this statement to the class and assign them to research the following:
 - a. Factors which drew settlers to different regions
 - b. Types of settlements
 - c. Leaders of settlements
 - d. Rivers and mountain valleys continued to direct lines of settlement
 4. Locate the principal routes and settlements on a physiographic map. Use time and place in history when engaging in this activity.
- C. Economics
1. The New England Colonies
 - a. Development of trade
 - b. Development of crafts
 - c. Development of small farms
 - d. Interdependence and the division of labor
 2. The Southern Colonies
 - a. The plantation system
 - 1) Growth of slave labor
 - 2) Development of a few wealthy landowners
 - 3) Independence of plantation
 - 4) Dependence on English goods
1. Conduct a class discussion utilizing information gained from previous use of paperbacks and filmstrips
 2. Read about the historical background of the period from appropriate paperbacks
 3. Use filmstrips to illustrate differences in life styles

Content

3. The emergence of economic conflict
 - a. North
 - 1) Growth of strong middle class
 - 2) Need for tariff to protect American goods
 - b. South
 - 1) Growth of rigid class system
 - 2) Desire to eliminate tariff
- D. Religion
 1. The Puritan Ethic
 - a. Influence on American culture
 - b. Development of sectionalism between north and south
- E. Primary Source Material
 1. Definition
 2. Examples
 3. Library workshop
 4. Use of source material
 - a. Williamsburg
 - b. Study
 - 1) Political developments
 - 2) Social developments
 - 3) Religious developments
- II. Political Science - Study of American Constitution
 - A. Ideology
 1. Democratic ideology
 - a. Development as a way of life
 - b. Development as a political system
 - 1) Theories of John Locke
 - 2) Theories of selected American political scientists

Learning Experiences

1. Conduct a panel discussion on the importance of religion in colonial times compared with religion today.
1. Read original documents and formulate conclusions about the social structure of the area.
2. Read diaries to gain insight into personal life of this period.
3. Use various paperback collections for individual and group reading.
1. Role play the various political philosophers and present their viewpoints for a form of government.
2. Report on the various philosophical views of government.
3. Use quotations of Locke, etc. and have students comment on them.
4. Use tapes, filmstrips, and records which depict the views expressed by the federalists and anti-federalists.

Content

- a) Thomas Jefferson
 - b) Samuel Adams
 - c) James Madison
 - d) Alexander Hamilton
2. The United States Constitution
- a. Leadership
 - 1) The role of the president
 - 2) The role of congress
 - 3) The role of supreme court
 - b. Decision making
 - 1) Role of the president
 - 2) Role of the congress
 - 3) Role of the supreme court
 - c. Role of the citizen
 - 1) Development and growth of the voting franchise
 - 2) Development of political parties
 - d. Political institutions
 - 1) Development and changing patterns of:
 - a) President and his power
 - b) Congress and its power
 - c) Judicial review
- III. Economics - Study of American Industrial Growth and the Struggle of Economic Sectionalism
- A. The Industrial Revolution Europe
 - 1. Causes
 - a. Colonialism
 - b. Mercantilism
 - c. Protestant ethic

Learning Experiences

- 5. Hold a constitutional convention with students expressing their own views on historical attitudes.
-
- 1. Enact the development and passage of a bill through the various branches of government.
 - 2. Discuss Supreme Court rulings.
 - 3. Construct organizational charts illustrating the powers of the various branches of government.
 - 4. View filmstrips and movies depicting the roles of the branches of government.
-
- 1. Compile a list of words with their meanings and usage that apply to the study of economics in general and the Industrial Revolution in particular.

Content

Learning Experiences

2. Write an expository essay and/or an argumentative theme on one of these problems.
 - a. How a Revolution can become an Evolution
 - b. How a Revolution can be Scientific
 - c. How a Revolution can be Philosophical
 - d. How a Revolution can be Political
3. Bring in clippings from newspapers and magazines to illustrate kinds of revolutions. Discuss these and try to draw tentative conclusions relative to cause, places, effects, and significance for people in today's world.
4. Prepare time lines and/or chronological charts showing the following items:
 - a. Inventions in spinning and weaving with the name of the inventor, brief descriptions of the invention, and significance
 - b. Inventions in transportation with the same items
 - c. Inventions in communications with the same items
 - d. Inventions in mining with the same items
5. Draw on the chalkboard and explain the basic principles involved in one or more of the following, and show how each contributed to revolutionizing life: steam engine, diesel engine, Bessemer process, and others which are indicative of the era.
6. Prepare pictorial histories with the use of pictures, filmstrips, and/or films for displays, lectures, and discussions on "The Industrial Revolution." Film is available from the Dal-Ches Film Library. Formulate a student preparation of questions after a preview of the film. Give the class the questions a day or more ahead of the showing to the class. Listen for interpretations of the Industrial Revolution.

Content

2. Immediate causes
 - a. Inventions
 - b. Development of transportation
 - c. Expansion of banking and credit facilities
 - d. More efficient production and use of power sources

Learning Experiences

7. Prepare debates, panels, and/or round table discussions on such questions as the following:
 - a. "Necessity is the Mother of invention"
 - b. The Industrial Revolution could not have taken place without one or more of these: The Renaissance, The Decline of Feudalism, Growth of the Nation State, The Commercial Revolution, The Scientific Revolution.
8. The immediate outcomes of the Industrial Revolution determined the course of later Industrial Revolutions. Prove this statement by fact, example, and illustration.
 1. Construct maps showing the colonial possessions of nations in the 17th and 18th centuries. Discuss the question, "What is the relationship of the Industrial Revolution to Colonial Expansion?" This can also be applied to the present or to emerging nations. Draw tentative conclusions. Keep for future reference.
 2. On a map of the world, indicate the following:
 - a. Cities that grew as the Industrial Revolution progressed
 - b. Cities that declined as a result of the Industrial Revolution
 - c. Raw materials
 - d. Markets used
 3. Prepare graphs to show the expansion of various industries and the growth of trade in different nations.
 4. Consult Mark Van Doren's An Anthology of World Prose and An Anthology of World Poetry. Select portrayals describing the Agricultural and Industrial Revolutions. Read and interpret some of the selections. English teachers will be happy to assist in these endeavors. Encourage students to consult other writers including Daniel De Foe, George Eliot, Elizabeth Barrett Browning, Oliver Goldsmith, Charles Kingsley, and Henry Thoreau.

Content

- B. The Industrial Revolution
 - United States
 - 1. New England
 - a. Factors of production favoring northeast
 - b. Slater's Mill
 - c. Inventions
 - d. Impetus of War of 1812
 - 2. The South
 - a. King Cotton
 - 1) Plantation system
 - 2) One-crop economy
 - 3. Tariff Issue

Learning Experiences

5. Read and report on some of the personal narratives and descriptions of the evils of Industrial Revolution and urban working and living in the early days of Industrial Revolution. Other countries may be examined in the same manner.
 6. Compare and contrast mercantilism with laissez-faire. Entitle one column main ideas embodied in mercantilism and head the second column main ideas embodied in laissez-faire. Discuss findings in regard to such points as role of the government, role of the people, and effects of each system.
 7. Write a brief expository paragraph on the following:
 - a. Corporation
 - b. Law of supply and demand
 - c. Means of production
 - d. Free enterprise
 - e. Socialism
 8. Find differences in how people lived before 1750 and after 1850, 1900, 1925, 1950 and 1965. Draw conclusions about the differences and influences of the Industrial Revolution and scientific and technological changes.
 9. How did the development of improved transportation and communication hasten industrial and social development? Students should develop a topical outline to use as a guide in solving the problem.
1. View filmstrips which illustrate the differences between North and South.
 2. Present the following views on the tariff: (a) a Connecticut watch manufacturer, (b) a Texas cotton farmer, (c) a worker in a synthetic rubber factory, (d) a director of a steel company, and (e) a longshoreman on the New York docks. Show how the viewpoint of each person reflects his economic interest.

Content

- C. Rise of Modern Industry
 - 1. Transportation
 - a. Railroads
 - b. Canals
 - 2. Communications and Technology
 - a. Telegraph
 - b. Use of:
 - 1) Oil
 - 2) Electricity
 - 3) Steel
 - 3. Development of New Business Methods
 - a. Mass Production
 - b. Division of labor
 - c. Assembly lines
 - d. Business forms
 - 1) Proprietorship
 - a) Advantages
 - b) Disadvantages
 - 2) Partnership
 - a) Advantages
 - b) Disadvantages
 - 3) Corporations
 - a) Advantages
 - b) Disadvantages
- D. Economic Theory
 - 1. Production
 - a. Factors
 - 1) Land
 - 2) Labor
 - 3) Capital
 - 4) Natural resources
 - 5) Management
- E. Consumption
 - 1. Definition
 - 2. Goods
 - a. Free
 - b. Economic
 - c. Durable
 - d. Perishable
 - 3. Wants
 - a. Primary
 - b. Secondary
 - 4. Utility
 - a. Natural
 - b. Form
 - c. Possession
 - d. Time
 - e. Place

Learning Experiences

- 1. Research new inventions and their importance.
- 2. View filmstrips and listen to records explaining the various systems.
- 1. View filmstrip series on Economics and listen to records.
- 2. Assess the implications of new business methods on life styles.
- 1. Discuss various economic theories.
- 2. Report on economists and their philosophies.
- 1. View filmstrips on economics.

Content

5. Factors that influence consumption
 - a. Advertising
 - b. Custom and tradition
 - c. Education
 - d. Income
 - e. Standard of Living
- F. Exchange
 1. Barter system
 2. Money system
 3. Credit system
 4. Marketing
 5. Value and price
 - a. Supply and demand
 - 1) Influences on supplying and demand
 6. Business Cycles
 - a. Definition
 - 1) Prosperity
 - 2) Crisis
 - 3) Depression
 - 4) Recovery
 7. Inflation and Deflation
- G. Distribution of Profits
 1. Labor
 2. Management
 3. Labor versus management
 4. Legislation
 - a. Affecting labor
 - b. Affecting management
- IV. Minorities and Our Cultural Heritage - A Study of Immigration
 - A. Immigration to 1850
 1. Composition
 2. Geographical placement
 3. Cultural adjustment
 4. Status in community
 5. Influence on American life
 - a. Political
 - b. Economic
 - c. Social

Learning Experiences

1. Collect examples of advertising and discuss various advertising techniques.
2. Conduct advertising campaigns to assess depth of understanding.
1. Discuss the concepts of the game, Monopoly, produced by Parker Bros.
2. Research other economically oriented games.
3. Use simulated games for economics. Encourage pupils to devise original situations demanding an understanding of economics.
1. Utilize visual aids and other reference materials to determine similarities and differences in business cycles.
1. Discuss current events in the labor field.
2. Examine and analyze case studies in labor management relations.
1. Review old world motives which brought immigrants to this country in the period preceding the Civil War. From a knowledge of world history or from readings, determine whether the same motives dominate the post-Civil War era.
2. Determine why the United States was so eager to have immigrants come to this country during this period.
3. Discuss and analyze the inscription on the Statue of Liberty. Research the story of the Statue of Liberty. What is the implication of the inscription on the statue?

Content

- B. Immigration 1850-1900
1. Reasons for immigration
 2. Composition
 3. Geographical placement
 - a. Urban
 - b. Farm
 4. Cultural adjustment
 5. Status in community
 6. Influence on American life
 - a. Political
 - b. Economic
 - c. Social

Learning Experiences

4. Prepare maps to indicate the European sources of immigration and settlement in the United States.
 5. After wide reading on the subject of immigration, discuss the following topics:
 - a. Methods used to encourage immigration
 - b. Types of immigration
 - c. Reasons for encouraging or discouraging Oriental peoples.
 6. Discuss how students' relatives came to the U.S. and why?
 7. View filmstrips on minorities.
1. Construct graphs for the following:
 - a. Immigration statistics 1790-1860; 1860-1890.
 - 1) Rate of entry
 - 2) Countries represented
 - 3) Place of settlement in U.S.
 - b. Growth of cities
 - c. Cost of public land
 - d. Westward movement of the frontier
 - e. Growth of population
 2. Topics for cartoons
 - a. Learning the language
 - b. Finding a job
 - c. Becoming accustomed to typical American customs
 3. Study the immigrants who came to our country, trace their principal settlements in the United States, and list the essential contributions of the groups. The vast contributions of our immigrants should be made known to the students.
 4. Prepare special reports on such men as Carl Schurz, Jacob Rus, Peter Altgeld, Albert Gallatin, Samuel Compers, Andrew Carnegie, Louis Agassiz, and others. If it is desired, these reports may be worked into panel discussions around such topics as: Contributions in industry, contributions in labor, Art, Politics, etc.
 5. Make a study of various immigrant groups that settled in New Jersey. Consult the librarian for aid.
 6. Prepare a written personality sketch of some noted immigrants.

Content

- W. Geographical concepts concerning the relationship between man and his location
 - A. Environmental determinism
 - 1. Topography
 - 2. Access to water
 - 3. Transportation routes
 - B. Case studies of:
 - 1. New York City
 - 2. Denver
 - 3. Moscow
 - 4. Berlin
 - C. Population density of the world
 - D. Concepts concerning the climatic differences in the world
 - 1. Latitude
 - 2. Altitude
 - 3. Angle of sun's rays
 - 4. Seasons
 - 5. Amount of sunlight
 - E. Map Study
 - 1. Topographic
 - 2. Hydrographic
 - 3. Locations in the world

Learning Experiences

- 1. Determine how geographical factors affect the development of populated areas. Explain the theory of environmental determinism.
 - 2. Improvise countries based on climate.
 - 3. Use 8 mm movies to illustrate similarities and differences of these areas.
 - 4. Research population data for various areas and display this information through the use of maps, charts, graphs or bulletin boards.
-
- 1. View filmstrips on the causes of climatic differences.
 - 2. Discuss how climatic differences affect life styles.
-
- 1. Use map kit to illustrate topographic maps.
 - 2. Bring in topographic maps and point out cultural features, high and low points, direction, physical features, mountains, etc.
 - 3. Conduct a competition (boys vs. girls) in world locations.

SAMPLE UNIT - THE DEVELOPMENT OF AMERICAN DEMOCRACY

CONCEPTS

Political Science

- C I Every society creates a system of law and provides forms of punishment for its offenders.
- C II Governments are established by all societies to provide a framework under which people can live. Governments take many forms. They exercise and maintain power in many ways.
- C III Governments have common functions and tasks.

Anthropology

- C IV Man as a social animal, structures his life in groups with others of a similar background. Together, they endeavor to form a system of social order and stability.

Geography

- C III Settlements are composed of a series of separate sites. Each functions within the urban structure.
- C V Resources and their use are related to the cultural, technological, and physical development of man's surroundings.

History

- C II Since human experience is a complex, continuous, and inter-related activity, it is necessary that man be studied in relation to his past and present. Thus the study of man is the study of his past relationships with other men.
- C III Throughout the ages, man has been able to give meaning to historical knowledge by placing events in an orderly pattern. Historical knowledge is not fixed but ever-changing. This knowledge, placed in chronological order, seems to provide us with the most useful means of organization.
- C IV History contributed much to man's preparation for his political, social, and economic life. It is possible to derive, from historical backgrounds of the various nations, basic principles and implications for thought and action in contemporary affairs. From a survey of the past, there seems to be evidence of a progressive historical cycle that could aid in solving our contemporary dilemma.

Economics

- C I Basic conflict between unlimited wants and limited resources.
The basic economic problem confronting every individual and nation is the conflict which exists between unlimited wants and limited human resources. At any moment of time, man's desires for goods and services outrun the resources (men, machines, and natural resources) necessary to their production.
- C II Societies and individuals make economic decisions. Individuals and societies have to develop allocating methods because of limited resources and unlimited wants.
1. The kinds of goods to be produced
 2. Methods of production to be used
 3. Quantity of goods to be produced
 4. Level of production and employment to be maintained
 5. Determination to whom goods and services will be distributed
- C VI Interdependence has made trade a necessity. Most societies, because of job specialization and limited resources, become dependent upon other societies to satisfy some of their wants. Systems of transportation to facilitate trade becomes a necessity.

D. Freedom of press and speech
1. Trial of Peter Zenger
2. Development of public opinion

E. Right of resistance to arbitrary power
1. Revolt against arbitrary government
2. Revolt against writs of assistance
3. Revolt against arbitrary tax
a. Navigation Acts
b. Stamp Acts
c. Townshend Acts
d. Intolerable Acts

4. Revolt against British laws
a. Smuggling
b. Writing - pamphlets
c. Demonstrations
d. Riots
e. Stamp Act Congress
f. Committees of Correspondance
5. Petition to king for redress of
grievances
6. Declaration of Independence

F. Co-operation
1. Against Indians
a. New England Confederation
b. French and Indian War
c. Albany Plan of Union
2. Against British domination
a. Stamp Act Congress
b. Sons of Liberty
c. First Continental Congress
d. Second Continental Congress
e. Armed Revolt: Revolutionary War

Selected and Suggested Activities

1. Analyze the actions and interactions of men as they tried to resolve their affairs.
2. Role play the following:
 - A. Meeting at Gwim Crossing
 - B. Meeting at Runnymede
 - C. The Trial of John P. Zenger
3. Report on the importance of the Magna Carta to the declaration of rights of individuals.
4. Utilize primary source materials to interpret the impact of the Stamp Act, etc. on the civil rights of the colonists.
5. Role play the meetings at the Virginia House of Burgess where the growing storm of the American Revolution took place.
6. Debate the rights and duties of the Patriots vs. Loyalists.
7. Debate the freedom of speech vs. censorship and inherent implication in the development of our society.
8. Conduct a panel to discuss why the colonists were justified in writing the Declaration of Independence.
9. Write a report on how the Revolutionary War could have been avoided.

Resources for Students

 1. Colonial charters
 2. English government documents
 - * 3. Case studies in American history pertaining to:
 - a. Civil rights
 - b. Freedom of speech
 - c. Freedom of religion
 - C. Illustrations
 1. Causes of Revolutionary War
 2. The rights of citizens
 3. The securing of freedoms
 - D. Tape Recordings
 1. Stamp Act
 2. A Flogging at Sea(from Two Years Before the Mast)
 3. Stoerpenberg Camp - decision making
 4. The Stamp Act (dialogue)
 5. A Democracy takes Shape
 6. Growing Storm of the American Revolution

* Representative sample included

* Historical Incident - Printing Ideas Without Permission
in England

In England, about 1600, there were laws that said that all people had to believe in the same religion and that they must obey the demands and laws of their government. Very few of the people themselves had any power over the government, which was ruled by a king, a wealthy noble class, and the Church of England. There were then, as there usually are, some people who did not want to be told what they could and could not believe. They did not like the way the country was being run and they wanted to be able to talk about their ideas and write them in papers, books, and magazines.

The people who ran the government were afraid of these people. They were afraid that if too many people heard these ideas they might try to change some of the laws of the country, or even to take over the government and run it themselves. Those in charge decided that one way to stop these people from spreading their ideas would be to limit their rights to print them.

The government passed laws to limit freedom of the press. They said that all printing in the country had to be done in one of three cities: London, Oxford, or Cambridge. There could be only a certain number of printing presses in the country and all books must first be read by the Archbishop of Canterbury or the Bishop of London. If these men gave their permission, the books could be printed.

What do you think?

1. What dangers did the English government see in letting people print whatever ideas they wanted to?
2. Was the government right?
3. Does this sound like a democratic country?
4. Are people in the United States today allowed to print anything they want to? Should they be able to?

* Historical Incident - The Trial of Thomas Paine (1792)

The Revolutionary War was fought by our forefathers to free the North American colonies from English rule and to make a country where the people could rule themselves instead of being ruled by a king or group of nobles whom they could not control.

Soon after the Revolutionary War, some of the people in France decided that they, too, would like to rule their own country. They revolted against their king and ruling nobles and formed their own government. Their war was bloody. The king and most of the nobles were killed by the people. Once they had taken

power, some of the leaders of the revolution said they would help the people in any other country to overthrow their king and set up their own government.

This made the rulers of other countries very much afraid that their citizens would try to overthrow them and run the governments as the Americans and French had done.

One of the men who had been very important in helping the people in our country get together to fight against the English king was Thomas Paine. He was an Englishman who had moved to America before the Revolutionary War. He believed that all people should have certain rights and that the government of any country should be by the people. He wrote his ideas in a little book called Common Sense. When people in America read his book many of them agreed with him and decided to help fight against the English king to win their rights.

Thomas Paine said, "My country is the world." After the Americans had won freedom, Paine went to England and to France to help the people of those countries gain their rights. While he was in England he wrote another book called The Rights of Man. In this book he said that the English government was unfair to the citizens, that the people should have the right to make their own government, and that the leaders of the English government were dictators. He also suggested making laws that would help the people. Soon after he had written this book he went to France.

While Thomas Paine was in France, the English rulers accused him of saying bad things about their government and brought his case to court, even though Paine was not there. The jury was a special one, chosen from the upper classes who were afraid that a revolution might start in England.

Paine's lawyer said that all citizens should have the right to say what they think about their government. He said that the people who run a country always think they are perfect, but that many times they are wrong. If people are free to talk and write about their government, they may be able to find the truth and change things for the better.

The jury found Thomas Paine guilty and he and his books were outlawed in England.

What do you think?

1. Were Thomas Paine's ideas dangerous to the rulers of England? Why?
2. Do you think the people who run a government should have the right to outlaw books and people whose ideas they feel are dangerous to their government? Why?
3. Who should decide what ideas, books, or people are dangerous to our government?
4. What is the danger of passing laws against books?
5. Was there anything wrong with the jury chosen to try Thomas Paine? What?

Nonbook and Audio-Visual Bibliography

The following lists of audio-visual materials have been correlated to our social studies curriculum. Materials not cataloged before May, 1969 do not appear here. For additional materials, consult the card catalog in your school library or your building librarian.

Grade level designations are tentative suggestions. You are urged to preview materials to determine suitability for your use.

Explanations:

1. All materials listed are located in the five Springfield school libraries and/or the Curriculum Materials Center.
2. Requests for materials may be placed with your school librarian, who has the materials requisition form. Class numbers and titles are necessary for requesting material. Class numbers are given at the left of this list, and titles are capitalized. An asterisk after a title indicates that a teaching guide is available.
3. All materials are listed by Grade Level, with two exceptions; Map and Globe Study, and Holidays, which are placed at the end of the listing.
4. Within each grade level all types of materials, except records, are listed by Dewey Decimal Number.
5. All materials in the list also appear in each school library card catalog in a more expanded form. There you will find more information, such as, listings of individual titles of sets, etc.

Grade 8

Grade Eight

Overview and Time Allotment Suggestion

The major objective of the Grade 8 course of study is to continue the development of the major social science concepts in terms of helping the student understand current man and his problems in contemporary society. Appropriate time should be allotted for the various social studies disciplines, however, 300 minutes should be allotted per week.

Child Development

The following factors must be considered in development of adolescent at this stage: Maturity may be divided into two separate facets of physical and mental growth. Generally girls mature in both areas before boys causing them, in many cases, to be "better" students. Physically, the adolescent is rather awkward and prone to accidents. Less mature students find that they have much more coordination than their older and larger counterparts. This will change, however, when they too experience their "spurts" of growth.

Learning Characteristics

Adolescence is an age of new horizons which open up daily. Courses with which the student can either relate or can use will be most profitable and require the least amount of outside motivation. Philosophical or intangible subjects will cut down the already limited attention span. Practical and useful thoughts, teaching, and training are mandatory. The adolescent is demanding, perceptive, and sensitive.

Implications for Social Studies Instruction

Social studies instruction in eighth grade based on contemporary problems will enable the students to relate and apply their knowledge on a daily basis. Instruction should involve the use of student involvement in development of units.

ECONOMICS

Concepts

- I. Basic conflict between unlimited wants and limited resources.

The basic economic problem confronting every individual and nation is the conflict which exists between unlimited wants and limited human resources. At any moment of time, man's desires for goods and services outrun the resources (men, machines, and natural resources) necessary to their production.

- II. Societies and individuals make economic decisions.

Individuals and societies have to develop allocating methods because of limited resources and unlimited wants.

1. The kinds of goods to be produced
2. Methods of production to be used
3. Quantity of goods to be produced
4. Level of production and employment to be maintained
5. Determination to whom goods and services will be distributed

Variants

1. The growing need of nations throughout history for economic improvement has led them to seek colonies. Control of adjacent areas to their borders has also been practiced, (mercantilism, imperialism).
 2. Each society develops an economic system to deal with problems of how to allocate resources among the alternative uses. Economic systems vary.
 3. One way people can get more and better goods and services is through technological progress. This includes new ideas, invention of better machines to produce goods and services, discovery of new supplies and uses of natural resources.
 4. Our economic activities are constantly changing because of technology.
 5. Our government provides goods and services for the people that cannot be provided by private business (defense, highways, education).
1. Nations unable to satisfy their wants lack skills, capital, resources, and often a stable government.
 2. All nations are striving for a rapid growth no matter what their economic development or type of economic system.
 3. In our private system, consumer demand in the market is the main force that determines the allocation of productive resources among competing wants.

Concepts

III. Influences upon economic decisions and systems.

Economic decisions and systems are influenced by values of society as well as factors that shape culture, geography, social structure, political history, technical skills, and literacy.

IV. Tradition, command and market economies are methods of solving economic problems.

Economic resources can be used in many ways. Societies have involved three basic methods of allocating resources to meet wants: command economies, market economies, and traditional economies.

Variants

1. The level of living is the amount and kinds of goods and services the people possess. All societies have different levels.
2. Incomes of various regions of the U.S. and the world are determined in part by the location, size, and skill of the population.
3. Earnings and spendings of these earnings help to promote consumption throughout the world.
4. The geography of a nation influences its economic system.
5. The level of living affects the culture and life style of a society. All societies have differences and similarities.
6. All nations want economic growth increasing their per capita output of goods.
7. All people of the world receive a varied income which will be reflected in their standard of living.
1. Capitalism, communism, and socialism are all different ways in which various economic systems have attempted to solve the universal economic problem of unlimited wants and limited resources.
2. Economic freedom, like political freedom, is not absolute.
3. Economic welfare is a goal in most modern societies.
4. All economic systems of the world have varying degrees of government intervention.
5. Our American method of making basic economic decisions with respect to use of resources through a system of markets and prices, provides us with a maximum amount of economic freedom.
6. Our government regulates some of our economic activity in order to benefit all people. The government's economic role has increased as our economy has become more complex.

Concepts

V. Division of labor increases efficiency.

The efficiency of production can be improved and the gap between limited resources and unlimited wants lessened by the division of labor and job specialization.

VI. Interdependence has made trade a necessity.

Most societies, because of job specialization and limited resources, become dependent upon other societies to satisfy some of their wants.

Systems of transportation to facilitate trade becomes a necessity.

Variants

7. A command economic system is one where government officials make most of the decisions concerning what will be produced and who will benefit from goods and services produced.
1. Geographical, occupational, and technological specialization are results of man's desire to produce more, better and faster.
2. Technological progress has caused increased specialization and therefore, productive resources are more efficiently used.
3. Most countries of the world have been developing specialized labor forces to fill the need for continued economic growth.
4. Increased specialization has led to many problems in labor relations.
1. Exports, imports and international investments are necessary for economic growth. International trade is a highly developed part of major economies.
2. International trade develops a larger market for each nation, leading to increased production and greater interdependence.
3. Technological progress leading to resources being used more efficiently, has made people more interdependent.
4. Most nations strive for a favorable balance of trade.
5. Since international trade is important to our economies, the functions and operations of international agencies for economic cooperation are vital to all nations.
6. Nations today must cooperate through world trade, conservation and aid to economically underdeveloped nations. (Common market, etc.)

GEOGRAPHY

Concepts

- I. Maps are necessary to understand the inter-relationship among inhabitants of the earth to their cultural and physical phenomena.
- II. The distinctive character of each place and the difference from one place to another are completely inter-related.
- III. Settlements are composed of a series of separate sites. Each functions within the urban structure.
- IV. The basic unit for geographical study is the region. Understanding it involves the recognition of the GESTALT.
- V. Resources and their use are related to the cultural, technological, and physical development of man's surroundings.

Variants

1. Map and globe analysis aid in discovering cause and effect relationships and differing interactions among geographic elements.
1. The physical environment is not a rigid mold to which all people at all times must conform.
2. Man's exploration in space is changing the geographic concept of the world.
1. There is a relationship among location, growth, and area arrangement of a settlement.
1. Man can choose to improve his environment through the extensive utilization of present technology.
2. People differ from one another as do environments and each is in equilibrium with the other.

HISTORY

Concepts

I. History has shown us that although change takes place at various rates, all things are subject to change. These changes may or may not constitute progress as seen in relation to the whole spectrum of history.

II. Since human experience is a complex, continuous, and inter-related activity, it is necessary that man be studied in relation to his past and present. Thus the study of man is the study of his past relationships with other men.

III. Throughout the ages, man has been able to give meaning to his historical knowledge by placing events in an orderly pattern. Historical knowledge is not fixed but ever-changing. This knowledge, placed in chronological order, seems to provide us with the most useful means of organization.

Variants

1. Urbanization, industrialization, and immigration are bringing about changes and creating new problems.
2. Rapid technological growth has produced a "cultural lag" in our religious, social, economic, and political lives.
3. The need for achieving a balance between change and stability is required in our modern society.
4. Man has created new problems in his successful attempt to modify his environment.

1. Citizens of tomorrow may exercise more wisdom in planning for the future as a result of events of the past.
2. Understanding of how events of the past have influenced every aspect of the way we live and think.
3. In the modern world, one nation's problems become the problems of all.
4. The roots of our most basic problems are to be found in past activities.

1. Man must gain experience in the historical method of inquiry to develop valid facts and conclusions.
2. Testing, validity, and accuracy of primary and secondary sources of historical events is difficult but necessary.
3. Facts may be interpreted in more than one way; each impression of an event is influenced by the experience and culture of the observer.
4. Time provides us with a way of organizing and relating the problems of all the disciplines.

Concepts

IV. History contributed much to man's preparation for his political, social, and economic life. It is possible to derive, from historical backgrounds of the various nations, basic principles and implications for thought and action in contemporary affairs. From a survey of the past, there seems to be evidence of a progressive historical cycle that could aid in solving our contemporary dilemma.

Variants

1. History provides us with the opportunity to examine qualities of man which men revere or abhor.
2. Those who cannot profit by the past may be condemned to repeat it.
3. Each culture and individual group must be understood in relation to its own unique heritage.

ANTHROPOLOGY

Concepts

- I. Change is a part of society. It is constant but the rate of change can vary from evolution to revolution.

- II. While man is categorized by "race", human beings through physical characteristics and basic human desires and needs are more alike than different.

- III. Man is an animal with the distinctive ability to communicate on a very highly sophisticated level.

- IV. Man as a social animal, structures his life in groups with others of a similar background. Together, they endeavor to form a system of social order and stability.

Variants

1. Changes in culture are not only evident in the elements of society (e.g. science vs. art) but they are also evident within social structures ("generation gap").
2. Social problems between ethnic or age groups may result, and existing social structures will be modified or changed to meet new demands. Man must learn peaceful and reasonable methods to change his society.

1. Cultural differences are often erroneously taken as racial or national superiority or inferiority.

1. Ability to communicate reduces conflict.
2. The growth of mass media has produced the power of propaganda. Man must learn to think critically and individually.
3. Mob psychology should be readily recognized.

1. Groups of people who have gathered to live together can be divided across several areas - political, religious, ethnic, etc.
2. Each sub-culture enriches the total and is capable of participating and contributing to it.

Concepts

- V. Man is a product of his environment. His cultural group is influenced by both human and physical environment and each is dependent heavily upon previous cultures.

Variants

1. Man, as part of his cultural make-up, differs from another because of his own experience and interactions with other peoples.
2. Cultural differences may represent different stages of cultural development.
3. Culture is a social heritage passed from generation to generation and made up from all elements of social structure.

POLITICAL SCIENCE

Concepts

- I. Every society creates a system of law and provides forms of punishment for its offenders.
- II. Governments are established by all societies to provide a framework under which people can live. Governments take many forms. They exercise and maintain power in many ways.
- III. Governments have common functions and tasks.
- IV. All levels of government are interrelated and interdependent.
- V. In every society the citizen has a role in government.

Variants

1. Although individual rights under the law have been guaranteed to all people in our society, the goal has not been achieved.
2. Professed values do not imply that all will benefit equally under the law.
1. Political domination of another national state is not part of a democratic society's foreign policy.
2. The balance of distribution of political power within the governmental units of our society undergoes change.
1. The role of leadership in some government positions has undergone dramatic change in our history.
2. Societies make decisions in the light of their self-interest.
3. The conflict between services demanded and reluctance to support the cost of government is an unresolved problem.
1. Although internal stability has been achieved, historically there has been a conflict over authority between levels of government in our country.
2. Nations with strong national governments function more effectively in foreign affairs.
1. People working in groups through various government and private agencies have influenced government action in the U. S.
2. The degree of participation by citizens in a democratic form of government is influenced by internal and external events.

Contemporary American Culture

Content

- I. Anthropology
 - A. Current Social Problems
 1. Civil rights struggle
 - a. Legislation
 - b. Recent agitation and causes
 - c. Groups in struggle
 - d. Role of white backlash
 - e. Civil rights as a political issue
 2. Minority group problems
 - a. Causes of prejudice
 - b. Survey of groups which have encountered prejudice
 - c. Puerto Ricans
 - 1) Reasons for migrations
 - 2) Problems in assimilation
 - 3) Attempts of government agencies to find solutions
 3. Housing
 - a. Survey of areas with severe housing problems
 - b. Urban renewal
 - 1) Case study - Newark
 - c. Other programs of slum clearance

Learning Experiences

1. Research various civil rights leaders, laws, Supreme court cases, groups.
2. Review and compile from the news media (TV, press, radio, ETV kinoscopes) recent statements by political candidates. Conduct panel discussions on current trends.
3. Discuss the rights and responsibilities of the individual. Discuss the use of demonstration techniques.
4. Read platforms of political parties concerning civil rights.
5. Invite outside speakers or members of minority groups to state their views.
1. Read all, or part of, "West Side Story" to gain insight into the problems of minority groups.
2. Begin a class by giving directions in a foreign language, then discuss the problems minorities have had with language barriers.
1. Visit a large city and view housing conditions. Discuss the program with civic leaders and tenants.

Content

4. Population
 - a. Stages of population growth
 - b. Problems created by each stage
 - c. Areas most affected by changes in population

5. Crime
 - a. Causes of crime
 - b. Causes of delinquency
 - c. Types of punishment
 - d. Change in philosophy from punishment to rehabilitation
 - e. Reasons for crime increase
 - f. Proposed solutions for handling national problem of crime

6. Revolution of Rising Expectations of underdeveloped nations
 - a. Technological problems
 - b. Educational problems
 - c. Type of economy

II. Geography

A. Map study

1. Major geographic areas of the world
 - a. Water bodies
 - b. Mountain chains
 - c. Plains
 - d. Plateaus

2. Major urban areas of the United States

Learning Experiences

1. Construct graphs, charts, and maps illustrating population growth and distribution.
2. The population of the U.S. is expected to exceed predicted figures for 1975. Where will the food come from to feed the additional people? What alternate plans can students offer to provide for the needs of these extra people?
1. Invite a local police official to discuss crime and delinquency among teen-agers.
2. Visit local county or state penal institutions.
3. Arrange to hear a jury trial.

1. Define and discuss the term "underdeveloped nation."
2. Cite examples of "underdeveloped nations."
3. List the factors that have inhibited development.
4. Role play solutions to problems (i.e. foreign aid, self help, etc.)

1. Draw a map of the world illustrating major land and water bodies; then compare with a world map.
2. Play a competitive game of oral questioning on location to instill a mental image of space and relationships.
3. Use a geography crossword puzzle to further understanding of terms.

1. Compare the old home area of students who have recently moved to their new location.
2. Use 8 mm single concept movies showing various urban areas of the world.

Content

- B. Factors of location for urban centers
 - 1. Transportation
 - a. Highways
 - b. Waterways
 - c. Jetports
 - 2. Communication
 - 3. Industry
 - a. Market
 - b. Government projects
 - c. Education centers
- III. Political Science
 - A. Comparative government
 - 1. Parliamentary system
 - a. Organization of governments
 - b. Strengths and weaknesses
 - c. Role of political parties in parliamentary system
 - d. Powers of legislative and executive branch
 - 2. Presidential system
 - a. Electoral system
 - b. Powers of executive and legislative branch
 - c. U.S. system of check and balances
 - d. Strong presidential system, France
 - 3. U.S.S.R.
 - a. Government of written constitution
 - 1) Supreme Soviet
 - 2) Council of Ministers
 - b. Invisible government
 - 1) Organization of Communist party
 - 2) Role of First Secretary
 - 3) Relationship of Communist Party to official government

Learning Experiences

- 1. Visit: N. J. Turnpike Authority
Garden State Parkway
Commission
N. Y. Port Authority
Newark Airport
- 1. Role play the part of the Prime Minister and members of Parliament in a coalition government.
- 2. Construct charts comparing political systems.
- 3. Depict evolution of different forms of government.
 - 1. Simulate the roles of the various branches of government.
 - 2. Chart the powers of the system and compare with the Parliamentary system.
- 1. Chart organization of the Soviet government and compare it to previous systems.
- 2. Utilizing the gaming technique, form governmental systems, combination of systems, or new system deemed appropriate and necessary.

Content

4. Nationalism and newly emerging nations
 - a. Problems of political stability in new nations
 - b. Authoritarian rule
 - 1) Reasons
 - 2) Role of the dictator
- B. Political parties in United States today
 1. Structure
 2. Functions
 3. Role of primaries
 4. Role of minority parties
- C. International Relations
 1. U.S. Foreign Policy
 - a. Development since 1900
 - 1) Roosevelt corollary and United States role in Latin America
 - 2) Isolationism
 - 3) U.S. role in World War I
 - 4) U.S. role in World War II
 - b. After World War II
 - 1) Internationalism and United Nations
 - 2) Policy of containment
 - 3) Changes in Cold War
 - c. Sino-Soviet split
 - 1) Background of problem
 - 2) Reasons for split
 - 3) Effect on balance of power
 - d. Viet Nam
 - 1) Background of problem

Learning Experiences

1. Provide opportunity for group rule, including procedures of election, class rules, etc. Discuss political stability.
2. Use sections of the "Ugly American" either book or movie to illustrate nationalism, neutralism, and authoritarian rule.
1. Read "The Last Hurrah" to illustrate the role of political parties in the major cities.
2. Role play platforms of the various local political parties.
3. Compare the platforms of the political parties citing similarities and differences.
4. Invite a professional politician to class. You may want to contact your state legislature for assistance in obtaining the resource speaker.
1. Use phonograph records which have speeches and statements concerning foreign policy to ascertain trends.
2. American view points concerning foreign affairs can be found in various segments of "The Good Years".
3. Conduct student debates and panel discussions on the policies the U.S. has followed.
4. Visit the U.N. or foreign delegations to get their view on our policies.
5. Invite a member of the United Nations to our school and community.
6. Contact the U.S. State Department for movies dealing with our foreign affairs and selected pamphlets on foreign policy.

Content

- 2) Reasons for U.S. involvement
- 3) Evaluation of U.S. policy
- e. Other current affairs

IV. Economic System

A. Development of U.S. capitalism 1900 to present

- 1. Types of business organization
- 2. Role of corporation
 - a. Comprehensive study of publicly owned corporations
 - b. Understanding of role of stock market in economy
- 3. Government role in our economy
 - a. Adam Smith and laissez faire
 - b. Theodore Roosevelt and trusts
 - c. Wilson and trust
 - d. Great depression
 - 1) Causes
 - 2) New Deal
 - 3) Keynesian economics
 - 4) Evaluation of New Deal policies
- 4. Current economic problems (optional)
 - a. Labor and management
 - b. Farm problems
 - c. Taxation

B. Communism and Socialism as economic systems

- 1. Role of government in economy
- 2. Variations in degree of government ownership of business

Learning Experiences

- 1. Simulate the formation of corporations.
- 2. Make a folder of stock investments and chart them by following the newspaper.
- 3. Visit the American Stock Exchange (solicit a movie and/or talk by a member of the Stock Exchange explaining its operation and function).
- 4. Invite a local stock broker to talk about investment practices.
- 5. View filmstrip describing types of business organization and role of government in various economies.
- 6. "The Good Years" has descriptions of economic problems of the early 1900's.
- 7. Use phonograph records to describe the Depression and New Deal.
- 8. View movie on automation.
- 9. Simulate the legislature of an under-developed nation with a rapidly growing population. (Choose an actual nation as an example and obtain information about its economic conditions.) Work out a program of development, conservation, and trade that would raise the living standards of the people.
- 10. Conduct a panel discussion on the question: "Should the United States give aid to underdeveloped countries?"
- 11. Prepare a debate or panel on the topic: "The European Common Market- Threat or Challenge to America?"
- 12. Debate: Resolved, That the Federal Government should control the resources of the U.S.

Content

- C. Technological problems of new nations
 - 1. Lack of capital
 - 2. Lack of skill and education
 - 3. Lack of political stability
 - 4. Programs of improvement

Learning Experiences

- 13. Formulate a panel to discuss: "How much aid, economic or technical, should the U.S. make available to underdeveloped nations?"
- 14. Organize a debate on the subject: Resolved, That there should be an international agency which would control and supervise the use of necessary strategic minerals.
- 15. Organize a debate on the subject: Resolved, That a system of tariffs is necessary to the prosperity of American business.
- 16. Discuss how the power and leadership of nations today are related to the resources they possess or have access to.
- 17. Discuss what would be some of the probable consequences if the U.S. reduced trade drastically or eliminated trade with other nations.
 - 1. Report on the "Chicken War" of 1963 between the Common Market and the U.S. (Use of periodicals is most important).
 - 2. Use an economic almanac or the yearbook of an encyclopedia to find the average per capita income of the nations of the world. Using comparable information from ten years ago, calculate which countries have most improved their standards of living.
 - 3. Consult the World Almanac to find the nations which exported the most goods in dollar value during a recent year. Draw a bar graph showing the amount each country purchased.
 - 4. Research (individually) on other highly, semi, and underdeveloped nations not noted in the unit. The following list would be most helpful in allocating areas of study:
 - a. Highly developed: Australia, Belgium, Canada, East Germany, France, Great Britain, Luxembourg, Netherlands, Norway, Sweden, Switzerland, West Germany.

Content

Learning Experiences

- b. Semi-developed: Argentina, Austria, Czechoslovakia, Finland, Hungary, Iceland, Israel, Italy, Poland, Union of South Africa, Uruguay.
- c. Underdeveloped: All of the remaining nations of the world.
5. Report on America's leading exports and imports. Which nations are our best customers? What are our best suppliers?
6. Write to the United States Bureau of Mines and the Geological Survey for any available information on resources and estimates of how long they will last. Prepare a chart on the information secured.
7. Make a list, limited to six each, of the natural resources for which the U.S. is dependent upon other countries.
8. Read William Vogt's book, "The Road to Survival" and give oral report on what information was discovered.
9. Role play a manufacturer of agricultural machinery interested in overseas trade. Pick an agriculturally dominated country and try to find out what are some of the difficulties he or she would encounter in trying to market their products.
10. Color a world map showing the highly developed, semi-developed, and underdeveloped nations.
11. Prepare a list of ten countries that have a level of living close to that of the U.S. List ten other countries with a lower level of living. In an oral report, identify some of the reasons for the differences.
12. Research each of the agencies listed under content area. After preliminary research, report on each agency.
13. Refer to the New York Times Sunday edition as a useful reference on the problem of world trade.

Content

Learning Experiences

V. Skills in critical thinking

- A. Formation of public opinion
 - 1. Role of pressure groups
 - 2. Role of political parties
 - 3. Role of mass media
- B. Importance of public opinion in
 - 1. Democracy
 - 2. Freedom of speech and thought
 - 3. Right of dissent

VI. Research skills

VII. Stokes

14. Discuss the importance of opinion. Cite examples where one person's opinion has brought great changes to lives and nations (use U.S. here). Try to discover how we form our opinions. Bring out the importance of being able to re-inforce opinion with facts. Bring out the difference between opinion and prejudice.

1. Simulate examples of pressure groups.
2. View movie on public opinion.
3. Discuss mass media and its effect on people.
4. Use "A Nation of Sheep" to illustrate public opinion formation.

1. To make research skills more enjoyable, use the FIND A FACT METHOD. Review use of research sources and then place on separate sheets of paper some question: Example, Population of Jersey City? Pick a question and provide a short time to find the information.
2. Use Library and give individual help to students working on problems.
3. Ample time should be set aside for supervised study during which time students are directed to basic references of varying degrees of difficulty. Students should be encouraged to formulate their ideas for projects and activities on the basis of their interests and readings during such study periods.

Sources of Materials on Countries

Afghanistan	Royal Afghanistan Embassy Room 1114 1875 Connecticut Avenue, N.W. Washington, D.C. 20009
Algeria	Embassy of Algeria 2200 R Street, N.W. Washington, D.C. 20008
Argentina	Argentine Cultural Office 1600 New Hampshire Avenue, N.W. Washington, D.C. 20009
Australia	News and Information Bureau Australian Consulate General 636 Fifth Avenue New York, N. Y. 10020
Austria	Austrian Information Service 31 E. 69th Street New York, N. Y. 10021
Belgium	Belgian Government Information Center 50 Rockefeller Plaza New York, N. Y. 10020
Bolivia	Consulate General of Bolivia 10 Rockefeller Plaza New York, N. Y. 10020
Brazil	Brazilian Government Trade Bureau 551 Fifth Avenue New York, N. Y. 100
Bulgaria	Office of the Legation, 2100 - 16th Street N.W. Washington, D.C. 20009
Burma	Consulate General of Burma 10 East 77th Street New York, N. Y.
Burundi	Embassy of the Kingdom of Burundi 2018 R Street, N.W. Washington, D. C.
Cameroon	Embassy of the Federal Republic of Cameroon 1705 New Hampshire Avenue, N.W. Washington, D. C. 20008

Canada	Embassy of Canada 1746 Massachusetts Avenue, N.W. Washington, D.C. 20036

United Nations	Department of Public Information United Nations, N.Y.

SAMPLE UNIT - MINORITY GROUP PROBLEMS

CONCEPTS AND VARIANTS

Political Science

- C I Every society creates a system of law and provides forms of punishment for its offenders.
- V 1 Although individual rights under the law have (Grade 8) been guaranteed to all people in our society, the goal has not been achieved.
- V 2 Professed values do not imply that all will (Grade 8) benefit equally under the law.
- C II Governments are established by all societies to provide a framework under which people can live. Governments take many forms. They exercise and maintain power in many ways.
- V 2 The abuse of governmental power for the good (Grade 6) of special groups has occurred throughout history.
- C IV All levels of government are interrelated and interdependent.
- V 1 Although internal stability has been achieved, (Grade 8) historically there has been a conflict over authority between levels of government in our country.
- C V In every society the citizen has a role in government.
- V 2 Historically, participation in government has (Grade 6) been denied to large segments of the society.

Anthropology

- C I Change is a part of society. It is constant but the rate of change can vary from evolution to revolution.
- V 2 Social problems between ethnic or age groups (Grade 8) may result, and existing social structures will be modified or changed to meet new demands. Man must learn peaceful and reasonable methods to change his society.
- C II While man is categorized by "race", human beings through physical characteristics and basic human desires and needs are more alike than different.
- V 1 Cultural differences are often erroneously taken (Grade 8) as racial or national superiority or inferiority.
- V 1 Misconceptions of race occur through incorrect (Grade 7) information, poor social interactions, or no knowledge at all.
- C V Man is a product of his environment. His cultural group is influenced by both human and physical environment and each is dependent heavily upon previous cultures.
- V 1 Man, as part of his cultural make-up, differs (Grade 8) from another because of his own experience and interactions with other peoples.

V 3 Culture is a social heritage passed from generation (Grade 8) to generation and made up from all elements of social structure.

C IV Man as a social animal, structures his life in groups with others of a similar background. Together, they endeavor to form a system of social order and stability.

V 2 Each sub-culture enriches the total and is capable (Grade 8) of participating and contributing to it.

History

C I History has shown us that although change takes place at various rates, all things are subject to change. These changes may or may not constitute progress as seen in relation to the whole spectrum of history.

V 1 Urbanization, industrialization, and immigration (Grade 8) are bringing about changes and creating new problems.

C IV History contributed much to man's preparation for his political, social, and economic life. It is possible to derive, from historical backgrounds of the various nations, basic principles and implications for thought and action in contemporary affairs. From a survey of the past, there seems to be evidence of a progressive historical cycle that could aid in solving our contemporary dilemma.

V 1 History provides us with the opportunity to (Grade 8) examine qualities of man which men revere or abhor.

V 3 Each culture and individual group must be understood (Grade 8) in relation to its own unique heritage.

CONTENT AND KEY QUESTIONS

I. The Racial Myth

Anthro.
C II - V 1
(Gr.8)
V 1
(Gr.7)

- A. Race
 - 1. Definition
- B. Genetic traits
 - 1. Physical characteristics
 - 2. Intelligence
- C. Prejudice
 - 1. Causes
 - 2. Effects

- 1. Is one race superior to another?
- 2. If the racial myth is scientifically untrue, why does it persist?

 - 4. 1900-1960
 - a. Political
 - b. Social
 - c. Economical
- C. Comparison of European and Black Migration
 - 1. Political history
 - 2. Social history
 - 3. Economic history

- 1. How has the history of the American Black differed from that of other minority groups in America?
- 2. What might be some of the effects of Black history on the Black today?

III. Contributions of Minority Groups

Anthro.
C IV - V 2
(Gr.8)

Hist.
C IV - V 2
(Gr.8)

- A. European Groups
 - 1. Political
 - 2. Economical
 - 3. Cultural
- B. American Black
 - 1. Political
 - 2. Economical
 - 3. Cultural

- 1. What has been the cultural contribution of other ethnic groups? (Formulate groups by ethnic composition of class.)

- ↓
- C. Evidence of Cultural Contributions
1. European Groups
 2. American Black

2. What has been the cultural contribution of the American Black?
3. What evidences of cultural contributions of minority groups can be found in our culture today?

Selected and Suggested Activities

1. Compose a list of traits that stereotype different ethnic and religious groups.
2. Invite a science teacher to discuss the biological theories of race.
3. Biographically describe a day from 7:00 A.M.--10:00 P.M. How have contributions from minority groups influenced your life?
4. Report orally on the immigration of various European groups.
5. Role play "Prejudice Laboratory" published by B'Nai Brith.
6. Read excerpts from the play, Raisin in the Sun.
7. Read excerpts from Black Boy.
8. Debate: Resolved - Race is never an appropriate basis for making private and public decisions.
9. Debate: Resolved - Government must provide the goods and services to disadvantaged peoples until they can learn to survive in our society.
10. Determine through a student survey attitudes regarding racial integration.
11. Compose a theme: Report on "My Prejudices and Where They Came From."

IV. The Black Today

Anthro.
C V - V 1
(Gr.8)
V 3
(Gr.8)

Nonbook and Audio-Visual Bibliography

The following lists of audio-visual materials have been correlated to our social studies curriculum. Materials not cataloged before May, 1969 do not appear here. For additional materials, consult the card catalog in your school library or your building librarian.

Grade level designations are tentative suggestions. You are urged to preview materials to determine suitability for your use.

Explanations:

1. All materials listed are located in the five Springfield school libraries and/or the Curriculum Materials Center.
2. Requests for materials may be placed with your school librarian, who has the materials requisition form. Class numbers and titles are necessary for requesting material. Class numbers are given at the left of this list, and titles are capitalized. An asterisk after a title indicates that a teaching guide is available.
3. All materials are listed by Grade Level, with two exceptions; Map and Globe Study, and Holidays, which are placed at the end of the listing.
4. Within each grade level all types of materials, except records, are listed by Dewey Decimal Number.
5. All materials in the list also appear in each school library card catalog in a more expanded form. There you will find more information, such as, listings of individual titles of sets, etc.

- X. Things to Check for Your Display

GENERAL DIRECTIONS

This guide book is designed to help you to prepare well done and interesting reports, written and oral. You, of course, will have to follow the directions within the guide book very carefully and do exactly as the booklet instructs you.

You will want your materials to be varied and as complete as possible. You cannot, therefore, depend upon the use of just one textbook, but should use different types of materials such as textbooks, encyclopedias, almanacs, magazines, filmstrips, filmloops, pictures, etc. Be sure then that at a very early date you can find at least three good sources from which you can gather materials.

Get help from whom ever has help to offer. If your friends, parents, librarians, or teachers can be of help do not hesitate to call on them.

Although you have a due date that seems quite far away, get to work right now.

I will always be available as your teacher to help you in any way that I can.

Understanding My Subject

Subject Title:

Here is a brief explanation of what my subject is about:

Here are some of the questions I can now think of that I want to find the answers to:

NUMBER YOUR QUESTIONS

WHERE TO LOOK FOR MATERIALS

Some of the items in the following list have been checked for you, showing some of the books and sources where you will find information on your subject. After you have looked up a checked item, place a check mark of your own beside it.

PEOPLE WHO CAN HELP

<input type="checkbox"/>	<input type="checkbox"/>	Resource People
<input type="checkbox"/>	<input type="checkbox"/>	Town Officials
<input type="checkbox"/>	<input type="checkbox"/>	Teachers
<input type="checkbox"/>	<input type="checkbox"/>	Librarians
<input type="checkbox"/>	<input type="checkbox"/>	Manufacturers
<input type="checkbox"/>	<input type="checkbox"/>	Clergy
<input type="checkbox"/>	<input type="checkbox"/>	State & National Officials

BOOKS TO LOOK INTO

<input type="checkbox"/>	<input type="checkbox"/>	Almanacs
<input type="checkbox"/>	<input type="checkbox"/>	Encyclopedias
<input type="checkbox"/>	<input type="checkbox"/>	Dictionaries
<input type="checkbox"/>	<input type="checkbox"/>	Textbooks
<input type="checkbox"/>	<input type="checkbox"/>	Library Card Catalogue
<input type="checkbox"/>	<input type="checkbox"/>	Indexes to Free Materials
<input type="checkbox"/>	<input type="checkbox"/>	Newspaper Files
<input type="checkbox"/>	<input type="checkbox"/>	Biographies
<input type="checkbox"/>	<input type="checkbox"/>	Adventure Stories
<input type="checkbox"/>	<input type="checkbox"/>	Historical Stories
<input type="checkbox"/>	<input type="checkbox"/>	Atlases
<input type="checkbox"/>	<input type="checkbox"/>	National Geog. Magazines
<input type="checkbox"/>	<input type="checkbox"/>	Periodic Indexes

LOOK IN BOOKS FOR

<input type="checkbox"/>	<input type="checkbox"/>	Text
<input type="checkbox"/>	<input type="checkbox"/>	Pictures
<input type="checkbox"/>	<input type="checkbox"/>	Charts
<input type="checkbox"/>	<input type="checkbox"/>	Maps
<input type="checkbox"/>	<input type="checkbox"/>	Graphs

WHERE TO GO FOR MATERIALS

<input type="checkbox"/>	<input type="checkbox"/>	Library
<input type="checkbox"/>	<input type="checkbox"/>	Town Hall
<input type="checkbox"/>	<input type="checkbox"/>	Historical Societies
<input type="checkbox"/>	<input type="checkbox"/>	Museums

WHERE TO GO FOR MATERIALS

<input type="checkbox"/>	<input type="checkbox"/>	State Agencies
<input type="checkbox"/>	<input type="checkbox"/>	Churches
<input type="checkbox"/>	<input type="checkbox"/>	Businesses
<input type="checkbox"/>	<input type="checkbox"/>	Historical Villages

AUDIO-VISUAL MATERIALS

<input type="checkbox"/>	<input type="checkbox"/>	Filmstrips
<input type="checkbox"/>	<input type="checkbox"/>	Filmloops
<input type="checkbox"/>	<input type="checkbox"/>	Pictures
<input type="checkbox"/>	<input type="checkbox"/>	Sound Filmstrips
<input type="checkbox"/>	<input type="checkbox"/>	Transparencies
<input type="checkbox"/>	<input type="checkbox"/>	Pre-recorded tapes
<input type="checkbox"/>	<input type="checkbox"/>	Others

ORGANIZING YOUR RESEARCH

For Your Written Report

1. You have made and numbered a list of questions you want your report to answer. If more questions come to you as you learn more about your subject include them on your list.
2. As you find and read information in different books and sources make notes about the things you will want to include in your report.
3. You have numbered your questions. Number your notes the same way. For example if, "How did man reach the Western Hemisphere?", was question number one then every note that told about how man reached the Western Hemisphere would also be numbered number one.
4. After you have exhausted all possible sources, books, audio-visual material, people, and places, you are ready to put all your notes together in the form of a written report.
5. Follow the following rules in writing your report:
 - a. Tell enough
 - b. Include in your report only those things you think are important.
 - c. Say exactly what you mean
 - d. Use a separate paragraph for each topic in your report.
 - e. Tell things in the order in which they appear or happen.
6. Go ahead now and write your report. Do a rough draft. Before you go further check the next section of this guide.

THINGS TO CHECK FOR YOUR WRITTEN REPORT

After you have put together your first draft, and before you begin your finished copy, check the following list. If your answer to each question is yes, complete your written report on white paper. If your answer to any of the questions is no, correct whatever is wrong or left out before you go ahead.

_____ Have I written what I want to write?

_____ Is the report in my own words?

_____ Have I checked my report to make sure that I have not included things that I don't quite understand or words I don't quite know the meaning of.

_____ Have I organized my report into topic paragraphs?

_____ Is my report well written following the rules of good English?

- a. Indenting all paragraphs
- b. Remembering to capitalize all words that should be capitalized
- c. Spelling all words correctly
- d. Placing all punctuation marks in their proper places

_____ Is what I have written interesting?

_____ Does my report show I know my subject well?

_____ Is my report accurate?

_____ Have I had a fellow classmate or friend read over my first copy?

WHEN ALL QUESTIONS ARE ANSWERED YES, BEGIN YOUR FINAL DRAFT

HOW TO ORGANIZE YOUR RESEARCH MATERIAL

FOR YOUR ORAL REPORT

After you have completed your written report you will want to prepare an oral report on your findings. Plan your report to last not more than ten minutes. There are several ways of preparing your oral report. Choose one of the following methods:

1. Make an outline from your research notes or your written report.
2. On small cards write down the things you want to talk about.
3. From your research notes, put all the information and material for one item together. Keep your items in the order in which you are going to speak about them.

IMPORTANT: Do not use your written report as your oral report.

IDEAS FOR PRESENTING YOUR ADDITIONAL MATERIALS

As you know, you are limited to ten minutes for giving your oral report. Yet, in addition to your written report, you will have materials which you could talk about for a much longer period than that. If you can't talk about everything you want to, perhaps you could show and display materials which the other boys and girls could see after your report. Making your report interesting is very important. Everyone wants to hear you talk, but they also want to see what you have done. There are many, many ways to do this. Check the items that you think will make you report one of the best.

| <input type="checkbox"/> Models of People, Places, Things | | | <input type="checkbox"/> Overhead Projector |

THINGS TO CHECK FOR YOUR DISPLAY

When you have gathered your display materials and are ready to put them up around the room, ask yourself the following questions. All the answers should be yes.

- Do all my materials have labels?
- Do the labels explain the materials?
- Is the bulletin board arrangement neat and attractive?
- Do my materials stick to my subject?
- Is it easy to understand what I have written?
- Is my display table neat and attractive?
- Did I choose interesting and different ways of presenting my materials?
- Have I picked someone to help me put up and show my materials?
- Do I have a surprise poster for the advance publicity?

THINGS TO REMEMBER WHEN REPORTING

The following rules will help remind you of some of the things you should remember in making an oral report. Include any other rules that you think are important.

1. Speak in complete sentences.
2. Use new and varied vocabulary words.
3. Speak slowly and distinctly, so that everyone can hear.
4. Look at your audience, and speak to them.
5. Stand aside when you are pointing out pictures, maps or places. Use a pointer if one is available.

THINGS TO CHECK FOR YOUR ORAL REPORT

After you have chosen the things you want to do for your oral report, ask yourself the following questions. If the answer is yes, put a check mark before the item. If the answer is no, be sure you get it done before your oral report.

- | | |
