ABSTRACT

An outline of the knowledge and skills to be taught at grade six in order to meet the Department of Defense Dependents Schools (DoDDS) social studies objectives is provided. Material is divided into four parts. Following an introduction, a one page description overviews the curriculum topic for grade six, world cultures and geography, and specifies the major subject areas to be covered within the topic, time allotment, and other classroom specifics. A list of acknowledgments contains names and addresses of all educators contributing to the curriculum guide. A list of holidays and special days appropriate for classroom coverage are also outlined. The bulk of the document consists of a detailed outline of content and objectives to be covered. The information, provided in matrix form, is divided by marking period and includes suggested time frame and a list of areas of study, each tagged to learning objectives, suggested activities, and page correlations with several widely used social studies textbooks. For grade six, the areas of study covered are: overview of social studies, geography, history, culture, economics, political science, and modern world problems. (LP)

DEPARTMENT OF DE

INTRODUCTION

The Department of Defense Dependents Schools (DoDDS) Social Studies Guides have been developed for the purpose of providing the classroom teacher with an outline of knowledge and skills which are to be taught at each grade level in order to meet the DoDDS social studies objectives.

As these guides are being used, it is requested that suggestions and recommendations for changes to the guides be submitted to the regional social studies coordinators. These guides will be reviewed and revised in accordance with the DoDDS Curriculum Development Plan.

Steve Motta
Deputy Director

GRADE SIX (World Cultures and Geography)

Sixth grade social studies places particular emphasis on world cultures, history, geography, and political science. Social studies instruction for the sixth grade should be 210 minutes per week.

The study of history includes the most ancient civilizations, the development of the Mediterranean cultures, and the ancient civilizations of Asia and Africa. Colonialism will be studied in preparation for the seventh grade regional studies. Cultural studies will include language, art, religion, values, and how cultures change and borrow from each other. The effects of technology on culture will be studied. Special emphasis should be placed on comparisons with the host nation culture.

The course work in geography will cover map and globe skills; chart and graph skills; understanding of the land forms and climatic areas of the earth; natural environments and natural resources; and, the causes of various population distributions. In addition, the interaction of humans and their environment will be studied. The need for government and the different forms of government in the past and present will be examined, as will the rights, roles, and responsibilities of citizens in different forms of government. Some of the basic concepts of economics, sociology, and anthropology will be introduced.

This guide is designed to assist the teacher in addressing those subjects established by DoDDS to efficiently instruct students. The suggested activities and listed objectives are coordinated with the content.

Textbook references are also coordinated with the content. A teacher must be cautious when using the text references. The texts do not in all cases, adequately cover the content areas given. The teacher may need to supplement the basic text series with library and other resources. No single series will adequately accomplish total coverage of grade level.

The time frames, as given, are flexible. Student/teacher interest and the varying abilities of the students will determine, the actual amount of time devoted to each unit. The elementary literature guide, Literature: A Quest for Life, has been designed so that the literary themes "Coordinate with the approximate social studies focus at each grade level.

A Social Studies Fair

Define and discuss the five disciplines (geography, history, culture, economics, political science) to be covered in the sixth grade social studies program.

Discuss and plans a Social Studies Fair as a culminating project to be held at the end of this semester or year. Anticipating the fair to be held, the classroom may become a laboratory for creatively exploring people and places. All projects will be carefully done and stored for the Fair.

Invite parents, students, and school officials to attend the Fair. Exhibits, murals, maps, diagrams, models, cultural crafts, projects, etc. would be included in the Fair.

As the projects and activities are carried out, there will be many opportunities to promote and increase positive self-concepts in students. Also, behavior problems and modification techniques may well become correlated objectives in the projects and activities.
