ABSTRACT

A broad range of education-related topics are addressed in this 181-document bibliography, which presents citations and abstracts for publications produced by the 16 ERIC Clearinghouses. An introduction explains the ERIC system, clearinghouse publications, the organization of this bibliography, and the availability of clearinghouse publications. A statistical summary by year (1968-1982) shows the number of documents included for each clearinghouse in the series of which this bibliography is the most recent. Document resumes are provided from the following clearinghouses: (1) Adult, Career, and Vocational Education; (2) Counseling and Personnel Services; (3) Reading and Communication Skills; (4) Educational Management; (5) Handicapped and Gifted Children; (6) Languages and Linguistics; (7) Higher Education; (8) Information Resources; (9) Junior Colleges; (10) Elementary and Early Childhood Education; (11) Rural Education and Small Schools; (12) Science, Mathematics and Environmental Education; (13) Social Studies/Social Science Education; (14) Teacher Education; (15) Tests, Measurement, and Evaluation; and (16) Urban Education. A complete listing of names, addresses, telephone numbers, and scope notes is provided for ERIC Clearinghouses and other network components. Information on how to obtain publications and how to order ERIC abstract journals is also included. (LMM)

Introduction

The ERIC System

ERIC, an acronym for Educational Resources Information Center, is a nationwide information system sponsored and supported by the National Institute of Education (NIE). ERIC is dedicated to the progress of education through the dissemination of education research results, practitioner-related materials, and other resource information that can be used in developing more effective educational programs. ERIC is a network that consists of a coordinating staff in Washington, D.C. and a number of clearinghouses (located at universities or with professional organizations) across the country. (For a complete list of ERIC components see the back of this publication.)

Through this network of specialized centers or clearinghouses, each of which focuses on a specific field in education, information is acquired, evaluated, cataloged, indexed, abstracted, and announced in ERIC abstract journals. These abstract journals—*Resources in Education* (RIE) and *Current Index to Journals in Education* (CIJE)—provide access to reports of innovative programs, research results, and other significant efforts in education, both current and historical, which might otherwise not be readily available.

RIE is a monthly abstract journal devoted to the report literature. Each issue announces approximately 1,200 documents. RIE is published by the U.S. Government Printing Office (GPO) and is available on subscription from GPO.

CIJE is a monthly index journal which cites articles from over 750 education periodicals. The core journal literature in the field of education is covered, as well as numerous other education-related articles appearing in journals only peripheral to the field. Each issue announces approximately 1,400 journal articles. CIJE is available on subscription from Oryx Press.

Clearinghouse Publications

In addition to collecting the literature of education for announcement in RIE and CIJE, the ERIC Clearinghouses analyze and synthesize the literature into research reviews, bibliographies, state-of-the-art studies, interpretive studies on topics of high current interest, and many similar documents designed to meet the information needs of ERIC users. These publications are announced in RIE and are available in the ERIC microfiche collections provided by the ERIC Document Reproduction Service (EDRS).

Bibliographies of ERIC Clearinghouse Publications

Periodically, ERIC prepares bibliographies of its clearinghouse publications. Only substantive publications are selected for these bibliographies. Routine brochures, accession lists, computer searches, newsletters, etc., are not normally included. This is the thirteenth bibliography in this series. All items in the series to date are listed below:

ACCESSION NUMBER OF BIBLIOGRAPHY	PAGES	PERIOD COVERED	NUMBER OF ITEMS
ED-029 161	24 p.	FY 1968	149
ED-034 089	34 p.	FY 1969	240
ED-041 598	47 p.	FY 1970	366
ED-054 827	54 p.	FY 1971	416
ED-077 512	55 p.	FY 1972	415
ED-087 411	74 p.	FY 1973	396
ED-126 856	144 p.	FY 1974-1975	534
ED-168 608	168 p.	FY 1976-1977-1978 (thru Dec 1977)	600
ED-180 499	74 p.	Jan-Dec 1978	211
ED-191 502	58 p.	Jan-Dec 1979	159
ED-208 882	64 p.	Jan-Dec 1980	176
ED-224 505	72 p.	Jan-Dec 1981	173
ED-	p.	Jan-Dec 1982	181
TOTAL IAP'S (1968-1982)			4016

This bibliography covers the calendar year period from January through December 1982. It lists a total of 181 documents. Publications that have been produced through the cooperative endeavors of two or more clearinghouses have been listed under the clearinghouse processing the item for announcement in the ERIC abstract journal *Resources in Education* (RIE).

Organization of This Bibliography

The format and arrangement of citations in this bibliography conform to that in the original announcement in RIE. Citations are arranged by clearinghouse. Within each clearinghouse section, documents are listed in accession number order. The content of the citations is the same as that in RIE. A sample citation is provided immediately preceding the citation section.

Three indexes are provided: Subject, Personal Author, and Institution. Index entries lead the user to an accession number. The clearinghouse section in which the item is listed is indicated by a two-character alphabetic code in parentheses following the accession number, e.g., ED 123 456 (TM).

Availability of ERIC Clearinghouse Publications

ERIC clearinghouse publications are published by the individual ERIC clearinghouse responsible for producing them. As long as stocks last, original copies are usually available directly from the responsible clearinghouse. In addition, however, they are announced in RIE. They are then contained in all ERIC microfiche collections and may be ordered in microfiche or hardcopy from the ERIC Document Reproduction Service (EDRS).

For instructions on how to order materials see the back of this publication.

Identifiers—additional identifying terms not found in the *Thesaurus of ERIC Descriptors*. Only the major terms, preceded by an asterisk, are printed in the subject index.

ERIC Document Reproduction Service (EDRS) Availability—"MF" means microfiche; "PC" means reproduced paper copy. When described as "Document Not Available from EDRS," alternate sources are cited above. Prices are subject to change; for latest price code schedule see section on "How to Order ERIC Documents," in the most recent issue of RIE.

Women's opportunities for employment will be directly related to their level of skill and experience and also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1980 and 1990, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. (SB)

Informative Abstract.

Publication Type—broad categories indicating the form or organization of the document, as contrasted to its subject matter. The category name is followed by the category code.

Abstractor's Initials.

Document Resumes

The document resumes in this section are arranged by ERIC clearinghouse, with a secondary sort by accession number (ED number) within each clearinghouse group. The following is a list of the ERIC clearinghouses, the two-letter prefixes used to identify them, and the page on which each clearinghouse's entries begin.

Descriptors—Accessibility (for Disabled), Access to Education, *Adult Education, Adult Programs, Ancillary School Services, *Blindness, Community Education, *Deafness, Disabilities, Educational Needs, Educational Resources, Individual Needs, Legislation, *Mental Retardation, *Physical Disabilities, Program Development, Social Attitudes, Special Education, *Special Programs
 Intended as a general guide for adult educators interested in developing community educational programs for handicapped adults, this monograph gives an overview of facts, problems, and programs peculiar to each of four handicapped populations: the physically handicapped, blind, deaf, and mentally retarded. Following an introduction that defines terms and discusses general legal aspects and problems, each of the population groups is considered in a section of its own. The first section, "Adult Education for the Physically Handicapped," discusses mobility barriers, attitudinal barriers, and some information sources of ideas for specialized programming. The next section, "Adult Education for the Blind," covers special services required in providing education for this population; also described are some existing types of programming for the blind that can be incorporated into an educational program. "Adult Education for the Deaf" discusses the deaf population, social aspects of deafness, educational problems relating to this population, and exemplary programs currently serving its educational needs. The final section, "Adult Education for the Mentally Retarded," presents a definition and categories of mental retardation, discusses educational characteristics and problems of this group, and cites some program techniques that

have been successful and some information resources helpful in this area. The document concludes with an appendix of agencies that provide information and services to the handicapped, and a reference section for gathering more information. (DTT)

Descriptors—*Adult Learning, Definitions, *Educational Research, *Independent Study, *Lifelong Learning, *Models, *Nonformal Education, State of the Art Reviews
Identifiers—Conceptual Analysis, *Informal Education

A model is presented to help clarify the concept of lifelong learning. Constructed on the idea that an operational definition of lifelong learning should be based on the locus of control for making decisions about the goals and means of learning, the model is a two-by-two matrix of learner and institution that represents four-identified situations of learning: formal (learners have little control over the objectives or means of learning); nonformal (learners control the objectives but not the means of learning); informal (learners control the means but not the objectives of learning); and self-directed (learners control both the objectives and means of learning). The model is interpreted as demonstrating how all planned or deliberate learning is located along a continuum; the concept of control provides the basis for classifying the various types of lifelong learning. From the model the authors also suggest that lifelong learning is neither the domain of a particular age group nor a single program or piece of legislation; it is a composite of many programs, pieces of legislation, and learner-initiated activities. To further clarify the model, expansions (based on research) of formal, nonformal, and informal learning are provided. Then, using the established model, an in-depth examination is made of the ultimate state of learner autonomy: self-directed learning. In-

cluded in the discussion is a review of previous research and a look at current research and trends. A list of references concludes the paper. (CT)

Descriptors—Adult Education, Career Choice, Educational Planning, Employment Practices, *Federal Legislation, Labor Force, Labor Problems, *Labor Supply, Occupational Mobility, *Older Adults, Preretirement Education, Program Design, *Public Policy, *Retirement, *Retirement Benefits, Vocational Education, Vocational Education Teachers
 This compilation of four papers examines past and current retirement policies for the elderly and the implications of these policies for labor supply job choice, and educational planning for the elderly. The first paper, by Jennifer Warlick, presents a review of past federal policies on retirement and a discussion of proposed policy changes. Richard Burkhauser, in the second paper, focuses on the effect of retirement policies on labor force participation and labor supply behavior; recommendations of three presidential commissions on work-related issues are discussed. The third paper, by Tabitha Coescher and John Turner, analyzes job choice and the effect of pension policies on occupational mobility. In the last paper Alan Sheppard discusses the need for vocational educators to design effective programs to support and retrain the elderly during this period of transition. Finally, conclusions drawn from the four papers are presented: (1) federal policies affecting the elderly have never been coordinated and program goals never specified; (2) business and government policies penalize older people who want to work; and (3) policies have generally overlooked vocational education as an important support for the elderly. An extensive bibliography concludes the document. (CT)

Harsman, Carl L.

Quality Circles: Implications for Training. Information Series No. 243.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio

Spons Agency: National Inst. of Education (ED), Washington, DC

Pub Date: 82

Contract: 400-81-0025

Note: 73p.

Available from: National Center Publications, National Center for Research in Vocational Education, 1960 Kenny Road, Columbus, OH 43210 (IN243, \$6.50)

Pub Type: Information Analyses - ERIC Information Analysis Products (071) Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors: Delivery Systems, *Job Training, Management Development, *Program Content, *Program Design, Program Evaluation, *Program Implementation, *Quality Control, *Training Methods

Identifiers: Japan, *Quality Circles, United States

This paper explores the background to and process of quality circles as well as the implications of circles for training. In the first section, the emergence and growth of quality circles in Japan and the United States are traced. Next, the theoretical and conceptual bases of quality circles are examined, while section 3 looks at implementation in detail. Discussed are the goals of circles, steps in implementation, the principles of operation, organization, and staffing; the operation of quality circles, and the evaluation of benefits of quality circles. The fourth section describes the extent and types of quality circle training that can be delivered. It is followed by a discussion of quality circles and implications for training, giving an overview of who is trained, what kind of training is received, what kinds of considerations are made in designing and conducting training, and the outcomes or end results of the training process. A final section considers some unresolved issues relative to the concept and practice of quality circle training. Essentially, basic problems and needs are named in the areas of management/supervision, research, and education. Appended materials include abstracts of circle activities in various companies around the country, a case study, and results of a survey of several companies' involvement with quality circles. (CT)

Communications Technologies: Their Effect on Adult, Career, and Vocational Education. Information Series No. 244.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio

Spons Agency: National Inst. of Education (ED), Washington, DC

Pub Date: 82

Contract: 400-81-0025

Note: 50p.

Available from: National Center Publications, National Center for Research in Vocational Education, 1960 Kenny Road, Columbus, OH 43210 (IN244, \$4.25).

Pub Type: Information Analyses - ERIC Information Analysis Products (071) Opinion Papers (120) - Collected Works - General (020)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors: Computer Assisted Instruction, *Computers, Computer Science, Educational Change, *Educational Philosophy, *Educational Technology, Education Work Relationship, *Future (of Society), Social Change, *Technological Advancement, *Telecommunications

This compilation of four papers provides an overview of recent developments in communications technologies and suggests how these developments will affect adult, career, and vocational education. Following an introduction by Juliet V. Miller, that both summarizes each of the papers and synthesizes the information presented, the first paper, by Christopher J. Dele, considers the reshaping of adult, career, and vocational education by the emerging communications technologies. Discussed are the way changes are affecting the world of work and, subsequently, educational content and delivery. The second paper, "Recent Developments in Telecommunications Technology," by Frank W. Nutwood, reviews developments that will lead to the home becoming a telecommunication center with the capability of delivering a wide variety of knowledge

and instruction. Next, Joy Ann Harris-Bowlsbey, in "Educational Applications of Communications Technology," addresses three questions: (1) How can educators be trained to use communications technologies? (2) How can computers assist individuals in career decision making? and (3) How can computers be used to support instruction? The final paper, by Katy Brown Greenwood, focuses on the need for and process of developing a philosophy to guide the use of communications technology in vocational education. The author emphasizes studying alternative futures and past and current values in order to broaden vocational education for the preferred future. A list of references concludes the document. (DTT)

Leisure: Integrating a Neglected Component in Life Planning. Information Series No. 245.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio

Spons Agency: National Inst. of Education (ED), Washington, DC

Pub Date: 82

Contract: 400-81-0025

Note: 59p.

Available from: National Center Publications, National Center for Research in Vocational Education, 1960 Kenny Road, Columbus, OH 43210 (IN245, \$4.95)

Pub Type: Information Analyses - ERIC Information Analysis Products (071) Opinion Papers (120)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors: Definitions, Educational Needs, Educational Planning, *Educational Responsibility, *Individual Development, Individual Needs, *Leisure Time, *School Role

Identifiers: *Life Cycles, *Life Planning

Aimed principally at educational professionals, teachers, counselors, administrators, and vocational, career, and adult educators, this monograph provides a framework for considering leisure as an integral part of life planning. The introduction, based largely on a literature review, presents historical perspectives on leisure, discusses its relationship to human development, and provides some theoretical perceptions and definitions; the chapter concludes with "A Proposal for Leisure and Life Planning," which provides a rationale for discussing leisure in six life stages. Each of these stages is discussed in a chapter of its own, which indicates the most positive features of leisure at that stage and how various institutions can assist a person in taking advantage of the opportunities of that stage. The stages considered are (1) childhood, the awareness stage; (2) adolescence, the exploration stage; (3) young adulthood, the preparation stage; (4) adulthood, the implementation stage; (5) midlife, the involvement and reassessment stage; and (6) retirement, the reawareness and re-exploration stage. Following the six life-stage chapters, a summary presents 10 needs having educational implications for integrating leisure with life planning. Provided in two appendixes are, respectively, examples demonstrating innovative approaches to leisure and a charter of leisure. A list of references concludes the document. (DTT)

This paper reviews three aspects of career education-private sector collaboration: (1) the general and specific approaches that have been utilized during the past 10 years by the career education movement and the private sector in developing career education collaboration in the private sector; (2) the major results of these activities, focusing on the advantages of as well as the problems with collaboration; and (3) the suggested guidelines under which future positive collaboration might occur. Following the introduction, which provides definitions of career education and collaboration, the first section examines several career education-collaboration surveys, along with a development strategy for collaborative councils. In the second section, benefits from and barriers to collaboration in the past are explored, both from the academic and from the business and industry viewpoints. In the third section, recommendations and guidelines are presented. These guidelines come from the Education Commission of the States, from the business community, and from the U.S. Office of Career Education; some refer to collaborative councils. A review section and a list of observations and suggestions follow. Appended material includes examples of implementation strategies for career education collaboration. References and additional readings complete the paper. (CT)

Descriptors: *Career Development, Career Planning, Employer Attitudes, Employee-Employee Relationship, Individual Needs, Industry, *Leadership Responsibility, Needs Assessment, Organizational Development, *Program Administration, *Program Development, Program Evaluation, *Program Implementation, Resources, *Staff Development

This guide presents nine tasks to be performed in planning organizational career development programs. Following an introduction that briefly discusses the guidebook's purposes, the state of career development programs in the work place, and uses of the guide, the nine tasks are discussed in two main sections. Part I, Leadership Tasks, covers three initial objectives: determining organizational readiness and commitment and presenting a program proposal effectively; building a team to assist in planning and work once organizational approval has been granted; and staffing the program with qualified personnel in carefully defined positions. Part 2 focuses on six program development tasks: assessing internal and external resources; assessing the career development needs of both the organization and the employees; defining program goals based on the needs assessment; designing the program from successful models and derived strategies; implementing the program by way of listing resources, personnel, and deadlines for each program goal; and evaluating the program and using the assessment data. Each task section includes a brief list of suggested readings and, where appropriate, example worksheets helpful for completing the task. The guide concludes with a list of general resources (monographs, periodicals, and organizations) on career development and references used in this publication's development. (D11)

Descriptors: *Counseling Effectiveness; Counselor Role; *Counselor Selection; Counselor Training; *Helping Relationship; Literature Reviews; *Paraprofessional Personnel; *Peer Counseling Program Evaluation; *Program Implementation.

This document contains a computer search of the ERIC database on the topic of peer counseling along with a narrative that highlights documents, identifies issues and trends, and suggests implications for guidance professionals. The concept of peer counseling is introduced and examined in terms of its history and rationale. Roles of peer counseling are reviewed and functions of peer counseling are enumerated in both direct and indirect helping relationships. A description of the selection of paraprofessional positions and individuals to fill those positions is followed by a discussion of peer counseling training objectives and procedures. Peer counseling programs are described at various educational levels, with special populations, and in non-academic environments. Literature on evaluations of peer counseling programs is reviewed in which client and counselor perceptions of program effectiveness are considered. Program advantages and disadvantages are discussed. Finally, implications for counselors are suggested. The Reference section contains the complete computer search of ERIC journals and documents (NRB).

Descriptors: *Counseling; *Counselors; *Guidance Legislation; Literature Reviews; *Nontraditional Education; *Nontraditional Occupations; *Sex Bias; *Sex Fairness; *Sex Stereotypes; *Self Development; *State of the Art Reviews.

This document contains a computer search of ERIC database on the topic of sex equity in guidance and counseling and a narrative which highlights documents, identifies issues and trends, and suggests implications for guidance professionals. The impact of sex stereotyping, double standards of health, the increased social awareness of sex bias and discrimination, changes in education and counseling toward sex equity, and the exploration of nontraditional skills and career choices are discussed. Legislation for sex equity is presented which focuses on legal responsibilities and guidelines along with staff development and training resources. Sex equity in vocational education and guidance is considered in the development of sex fair programs and resources. The reevaluation of vocational testing instruments for sex stereotyping is reviewed. References focusing on the special educational and counseling needs of girls and women are discussed. The importance of staff development is considered, in-service training programs and workshops are described. Instruments for assessing counseling vocational guidance, and educational programs in terms of sex bias and sex fairness are reviewed and implications for counseling and guidance are suggested. The Reference section contains the complete computer search of ERIC journals and documents (NRB).

Pub Type: Information Analyses; ERIC Information Analysis Products (071); Reports (080); (114); Guides; Nonclassroom (055)

EDRS Price - MF01-PC02 Plus Postage

Descriptors: *Counseling Techniques; *Counselor Client Relationship; Counselor Performance; *Cultural Differences; Family Life; Individual Power; *Minority Groups; Perspective Taking; Psychotherapy; *Self Esteem; *Therapeutic Environment; Values.

This monograph suggests various counseling techniques for enhancing the self-esteem of minorities. A frame of references is presented for counseling minority group self-esteem. Themes related to minority group perceptions and their existence in the writings of psychotherapists are reviewed. A section on cultural diversity discusses the family, religion, and value orientation as important factors in the counseling process. The social orientations regarding love and choice, as sources of power or human beings are described, and the client's and counselor's humanness are emphasized, with implications for the counselor's behavior. Because counseling is perceived as an unfamiliar activity requiring a "bond of friendship," the interview and techniques are considered within this context. The initial interview is discussed and issues such as seating arrangements, structuring an ending, and follow-

up are discussed. Suggestions for counseling implementation and guidelines for counselor behavior are offered (Author/NRB).

Descriptors: Attitude Change; Career Choice; *Career Counseling; Coping; Counseling; Employee Women; Employment Patterns; *Females; *Job Search Methods; Minority Groups; *Nontraditional Occupations; *Self Actualization; *Skill Development.

This monograph is a revision of *Counseling Women for Nontraditional Careers* (Smith, Smith, and Lissop, 1977). This update reflects changes in societal attitudes toward combined work and family roles for women and toward women entering non-traditional occupations. After reviewing the current employment situation for women, five hypotheses are offered as to why women may be underrepresented in some career areas and suggestions of specific strategies counselors might use to help women seek for each of the five problem situations are made. The strategies presented concentrate on: (1) skill development, (2) career awareness, (3) self awareness, (4) job seeking skills, and (5) coping skills. An extensive resources section is provided to help counselors implement the strategies, including background information on the socialization of women, women in the labor force, and minority women and work. One section contains materials, generally theoretically or research oriented, about counseling women, while another section on career programs describes programs for implementing strategies to assist women. Career information materials include books, films, posters, and other resources for use in counseling, along with a list of several resource organizations that can help counselors keep abreast of new materials (Author/NRB).

Descriptors: Abstracts; Biculturalism; *Bilingual Education; *Bilingual Students; *Counselor Role; Elementary Secondary Education; Guidance Personnel; Higher Education; Literature Reviews; *Minority Groups; Resource Materials; *School Counseling; *Student Needs.

This information analysis paper, based on a computer search of the ERIC database from November 1966 through December 1980 examines the topic of counseling the bilingual student. An introductory narrative highlights issues and trends, and suggests possible implications for the future of guidance, focusing on: (1) the concept of bilingual education from a trans-cultural perspective, (2) typical problems facing bilingual students and families, (3) useful counseling strategies, (4) effective programs for bilingual students in the areas of counseling, bilingual and vocational education, and auxiliary services, and (5) the practical implications of bilingualism for guidance counselors and for the United States. The significance of the guidance

counselor's role is discussed and an expansion of that role is suggested. Cultural conflict, ethnic identity, and racism are explored in a discussion of an educational needs survey of Latinos. The complete computer search, including annotations of 13 journal articles and abstracts of over 100 documents, is also provided. (NRB)

Descriptors—Adjustment (to Environment), *Adult Counseling, *Adult Development, *Career Change, *Coping, *Counseling Techniques, *Counselors, *Divorce, *Helping Relationship, *Leisure Time, *Midlife Transitions, *Retirement

This document is one of three monographs resulting from a three-year study of adult counseling programs and practices in the United States. The first section of this monograph describes issues and potential problems associated with four frequently-experienced adult life transitions, i.e., divorce, midlife career change, preretirement planning, and leisure. For each area, three field-tested activities that counselors can adopt or adapt for use in their work settings are included. The second section provides an overview of adult development and adult counseling. Generalizations are presented regarding both the adult experience and appropriate adult counseling behaviors. For each concept, implications for the adult counseling profession are included. A brief summation of adult counseling is followed by extensive resource lists for the four selected life transitions and for the adult experience in general to offer more in-depth reading and practical counseling materials. Descriptors—*Administrator Evaluation, *Business, *Career Change, *Career Counseling, *Career Development, *Career Ladders, *Evaluation Methods, *Human Resources, *Industry, *Job Performance, *Models, *Organizational Development, *Program Descriptions, *Staff Development

Identifiers—*Performance Appraisal

This monograph is designed to enrich the database for persons seeking to learn more about viable approaches for facilitating career development in organizations. Suggestions are given for assisting individuals to chart their careers in the company and helping organizations to develop and utilize human resources more effectively. Several topics are dealt with in depth, such as career development strategies, career change, and executive assessment. The Career Development Diamond is introduced with its four component parts: career catalyzing, career exploration, career management, and career pathing. In another chapter, the significance of data gathering in the self-exploration process is stressed. A new perspective on the use of assessment centers for organizational or individual development is also presented. (JAC)

This review of the literature related to counseling women, based on a computer search of the ERIC database, emphasizes the need for decision-making skills to cope with social change and the women's movement. The influence of locus of control on decision-making is reviewed along with theories about motivational factors for women and students. Role perception, role conflicts, multiple roles, life satisfaction, midlife career changes, and reentry problems are discussed, and programs designed to cope with these changes are described. Implications for counselors are also suggested. The document concludes with the actual annotated computer search used for the literature review. (JAC)

Identifiers—*Mainstreaming (Non English Speaking)

As part of a series of sharply focused booklets based on concrete educational needs, this booklet is designed to provide teachers with the best educational theory and research on mainstreaming non-English speaking children in regular classrooms and to present descriptions of classroom activities that are related to the described theory. Section one of the booklet develops a rationale, based on current theory and research, by which classroom teachers can prepare themselves to mainstream students with limited English speaking abilities. Section two of the booklet contains selected methods and materials for teaching English as a second language to some students in a regular classroom, particularly those that depend on peer tutoring. Appendixes contain 17 learning activities, an outline of self-directing sources for individualized instruction in English as a second language (ESL), an approach for developing methods and materials for starting ESL programs, a sample plan for an open language experience (shopping at the supermarket), and a discussion of procedures for testing ESL students (observations, oral interviews, cloze tests, and dictation). A selected bibliography is attached for teachers of ESL students. (RL)

As an annotated list of recommended English language arts curriculum guides, this booklet is designed to facilitate sound curriculum planning and provide models for schools that are reviewing their programs and need a variety of sample frameworks, units, and lesson plans. The first section presents the guides, arranged by the year in which they were recommended (1979, 1980, and 1981). Each annotation provides the following information: the grade levels involved; a description of the content, aims, and objectives; and information on obtaining the guide. The second section of the booklet offers criteria for planning and evaluating English language arts curriculum guides. Designed to apply to many different content emphases within the field of Eng-

lish language arts, the criteria are organized under the headings of philosophy, policies and procedures, objectives, organization, process as content, language, composition, media, reading and literature, evaluation, and design. (HTH)

Identifiers—*Theory Practice Relationship

As one of a series of sharply focused booklets based on concrete educational needs, this booklet provides teachers with educational theory and research on evaluating classroom speaking and presents suggestions for the application of the theory in regular classroom situations. The section on theory and research begins by describing a model of the evaluation process, then discusses various rating errors in the evaluation process. With the theoretical basis for rating and speech evaluation in mind, the section on practice examines several teaching issues that emerge when actually rating speeches in the classroom setting. These issues include when and how to evaluate speaking performances, the modes of evaluation, who should make the evaluations, and suggestions for constructing an evaluation instrument. The concluding section contains sample copies of 13 evaluation forms and descriptions of their intended uses. A list of references is provided. (RL)

Identifiers—*National High School Debate Resolutions

The purpose of this booklet is to provide a brief overview of some of the issues involved in the 1982-83 high school debate resolutions, which focus on the defense commitments of the United States. The first of the booklet's four chapters provides a review of information sources for use in researching the topic of defense commitments. The remaining three chapters discuss the debate topics: (1) that the United States should significantly alter its nuclear weapons policy, (2) that the United States should significantly reduce its commitment to NATO, and (3) that the United States should significantly curtail its arms sales to other countries. The booklet also provides a section of notes for each topic, as well as selected bibliographies on each topic. (FL)

Identifiers—*Theory Practice Relationship

Drawing upon research into the nature of the English writing system and about the development of spelling ability, this booklet presents an approach to improving spelling and vocabulary at the secondary school level based on a knowledge of the fabric of the language itself. The first section of the booklet reviews theory and research concerning the structure of English orthography, how people learn to spell, and orthographic implications for instruction. The second section explores word forms and letter constraints and the relationships between and among words, and discusses how new words enter the language and the importance of using a dictionary while proofreading to ensure correct spelling and consequently correct meaning. The booklet concludes with a selected bibliography for teachers and students. (HTH)

Intended to help writing teachers better understand how to help students effectively revise their written work, this book contains essays that, as a group, focus on the problem of the definition of revision. The first half of the book discusses the background of revision, while the second half discusses contexts and techniques for application. The 16 essays cover the following topics: (1) revision as discovery and the reduction of entropy, (2) intentions and conventions of revising, (3) revision theory versus practice, (4) H. G. Wells' "The Outline of History," (5) composing without revision, (6) the pragmatics of self-assessment, (7) a holistic pedagogy for freshman composition, (8) teaching teachers to teach revision, (9) psycholinguistic perspectives on revision, (10) the cloze test as a diagnostic tool for revision, (11) paraphrases ("Freudian slips" on paper) and revision, (12) revision and improvement, (13) the Delphi technique, (14) revision and risk, (15) understanding conflict with students about the expression of opinion, and (16) empathy and revision. An annotated bibliography on revision concludes the book. (HTH)

Descriptors—*Class Activities, Educational Theories, Elementary Secondary Education, Inservice Teacher Education, *Language Arts, Learning Processes, *Listening Skills, Program Development, *Teaching Methods

Designed for workshop, teacher inservice, and classroom use, this monograph pulls together theory, research findings, and descriptions of successful classroom practices to improve instruction in listening skills. Chapter 1 discusses the importance of listening instruction, providing general background information on the nature of listening. The next three chapters provide suggestions for teaching (1) accurate listening (using personal involvement to improve attention to detail and summary); (2) purposeful listening (following directions, recognizing the organization of spoken discourse); and (3) critical listening (distinguishing fact from opinion). The final chapter outlines steps for developing a schoolwide program of listening instruction, including information on how teachers may test most effectively for listening success using both standardized and teacher-made instruments. Appendixes contain reproducible exercise pages for class sets and annotated references both for further reading and for additional teaching materials. (HTH)

Recent research on the historical and political influences affecting the relationship between local school boards and superintendents is summarized and discussed in this paper. Following a brief summary of the historical development of the superintendency in the nineteenth and twentieth centuries, the author contrasts the opposing viewpoints of Callahan and Tucker and Zeigler regarding the actual balance of power between boards and superintendents. Callahan believes the evolution of superintendencies has provided boards and superintendents with a system of checks and balances while still giving citizens a voice in the schools. Tucker and Zeigler see instead a lack of balance, rising superintendent dominance, and a loss of citizens' power. The paper next examines the status of superintendents today. It cites Zeigler and Jennings book, "Governing American Schools," which concludes that the superintendent is clearly dominant over the school board, and contrasts this view with the positions of Cuban and Boyd, who assert that a variety of political and social factors influence the relative power of superintendents. The author concludes that the local boards themselves are in the best position to decide what role they want to play. (Author/JEH)

Identifiers—*Leadership Effectiveness, Participative Decision Making, School Based Management, Stress Management, Time Management

Based on the assumption that the survival of the nation's schools and their leaders depends on these leaders having real influence over the quality of schooling, this volume draws from the work of many authorities to look at leadership from three perspectives: the person, the structure, and the skills. Chapters focusing on the person who holds the leadership position look at characteristics of today's educational leaders, at what makes an effective leader, at the scarcity of female and black school leaders, and at leadership style. The part of the volume focusing on structure looks at the organizational supports that underlie school leadership. It examines school-based management, management support teams, participative decision-making systems, and determinants of school climate. Chapters on leadership skills highlight several abilities administrators must master to be effective leaders in education today. This part of the volume looks at such skills as communicating, leading meetings, managing time and stress, managing conflicts, and solving problems. Practical suggestions for using this information in schools are offered throughout. (Author/JM)

Chapter 1 of a volume on school leadership, this chapter looks at research findings concerning the characteristics of leaders. The author begins by looking at those characteristics resulting from accidents of birth or early environmental influences and concludes that leaders are usually more intelligent than nonleaders, not firstborn, used to making decisions from an early age, and from a higher socioeconomic group than followers. The next section focuses on leaders' traits and skills in the area of human relations. The research cited concludes that leaders are better than average at interacting with others, enjoy socializing, and are good talkers and listeners. The final section concerns character qualities of the effective school leader. This section suggests that successful principals and other educational administrators have some traits that distinguish them from those who are less successful. These characteristics are clear goals, enough security not to resist change, and ability to be "proactive"—to initiate or lead rather than passively react. Practical implications of these findings for the selection, evaluation, and training of educational leaders are included. The chapter is intended to be especially helpful to those who hire school administrators or plan their training programs. (Author/JM)

Chapter 2 of a volume on school leadership, this chapter examines the ethnic background and sex of educational leaders, concluding that, even after decades of civil rights and feminist activities, nearly all educational administrators are white males. The authors make a case for the value of diversity in educational leadership, then present their findings, concluding that there are today fewer women or minorities in educational administration than there were thirty years ago. The attitudes and practices that foster this situation are explored. Finally, the authors make specific suggestions for remedying the situation. The chapter is especially intended for those in charge of hiring administrators, those who work with women and blacks, and for women and blacks who are educational leaders or aspire to educational leadership. Chapter 3 of a volume on school leadership, this chapter reviews theories of leadership style. After defining leadership style simply as "how the leader leads," the author presents and explains significant ideas about the important components and environmental determinants of leadership style. The author looks at leadership style theories that stress decision-making, theories that stress ways of looking at

subordinates, and those that stress the leader's emphasis on people or the job. After asking what the best style is and whether leaders can change their styles, the author examines many of the conflicting answers to these questions offered by researchers and writers. The final section presents specific ways in which important aspects of each leadership style theory can be translated into action in schools. The chapter is especially intended for leaders who want to examine and evaluate how they function, for those who want to explore how they might function as leaders, and for those who are interested in the theoretical reasons behind and implications of leaders' behaviors. Chapter 4 of a volume on school leadership, this chapter is a revised version of the issue of "School Management Digest" entitled "School Based Management." It draws from the work of many authorities to define, explain, and make a case for school-based management, a system of educational administration in which the school is the primary unit of decision-making. The author begins by examining in detail the school-based management concept. He relates the rationale underlying decentralized management to the criticisms of centralization on which it is based. Examples of successful school-based management are described in Florida and California and in the school districts of Lansing (Michigan), Edmonton (Alberta), and Cherry Creek (Colorado). The key role of the principal as the true leader of the school is discussed, along with the complementary role of the central office in supporting and evaluating the schools. It is noted that the school board still sets goals and policies and makes final decisions. The school site's control over curriculum, personnel, and budget matters is examined, followed by a review of the increased roles of the staff and community in the decision-making process. The author concludes that the rewards of autonomy and feelings of ownership are well worth the extra time and efforts spent on school-based management. (Author/JM)

Chapter 5 of a volume on school leadership, this chapter reviews the literature to define and explain management teams and to describe several successful management team arrangements. The author begins by noting that team management has recently enjoyed a resurgence as a response to collective negotiations, but beyond this function can have value in its own right as a way of improving school administration. The author emphasizes that for a team arrangement to be successful, trust among all parties—administrators, superintendent, and board—is important and that the superintendent's commitment to power sharing is essential. Additionally, he maintains that the design of the team management system is crucial, especially its communication channels. He notes that the team agreement need not be in writing and describes different types of team arrangements for different sized districts. The author emphasizes that the primary purpose of the management team is to bring middle-echelon administrators into the district's decision-making processes. Using information from interviews and articles, three examples of successful teams are described, in Yakima, Washington, Rio Linda, California, and in Attleboro, Massachusetts. (Author/JM)

Identifiers—Connecticut (Mansfield), *Participative Decision Making, Teacher Involvement Project

Chapter 6 in a volume on school leadership, this chapter makes a case for the use of participative decision-making (PDM) at the school-site level, outlines guidelines for its implementation, and describes the experiences of some schools with PDM systems. It begins by citing research indicating the advantages of PDM, including better decisions, higher employee satisfaction, and better relationships between management and staff. The authors then discuss guidelines offered by a number of authorities to help administrators implementing PDM. They advocate that administrators vary their decision-making styles. In addition they make suggestions about who should be involved in which decisions and touch on the extent, areas, and forms of involvement. The advantages of going slowly when moving to a more participative form of decision-making and of providing necessary training are noted. The authors describe two successful experiences with PDM, the San Jose (California) Teacher Involvement Project and the Mansfield (Connecticut) public schools. They conclude that when utilized correctly, PDM can be one of the most effective techniques a leader can use to motivate others to strive willingly for group goals. (Author/JM)

Identifiers—Organizational Climate Description Questionnaire

Chapter 7 of a volume on school leadership, this chapter defines, describes, and suggests ways to improve climate at the school building level. After citing a number of definitions of school climate, the authors conclude that school climate is the feel an individual gets from experiences within a school system, or the global summation of the individual's perceptions of how personnel and students behave and interact. Beginning with the "Organizational Climate Description Questionnaire," the authors discuss several climate assessment instruments to be used as a first step in a climate improvement program: Research linking school climate to student achievement, behavior, and attitudes is cited, leading to the conclusion that improving school climate is worthwhile. How to improve school climate is the focus of the next section, with an emphasis on the role of the principal and on the necessity of changing the norms in the school through techniques such as organizational development. Many practical suggestions are cited, together with the deduction that almost any approach to improve school climate undertaken with energy and optimism can be successful in improving morale, communication, and relationships with staff, students, and community. Chapter 8 in a volume on school leadership, this chapter is a revised version of "Communications in the Open Organization." It offers suggestions from a number of authorities for administrators who want to learn how to communicate more effectively with a variety of groups within and outside the school. It begins by explaining the human communications process within the school and how it can be facilitated and improved. Such techniques as paraphrasing, behavior description, perception checking, and feedback are explained and illustrated, and exercises for improving communication are suggested. How and why a principal should communicate effectively are emphasized. The second half of the chapter deals with communications between the school and the outside world. An effective public relations program, the author emphasizes, does not just happen but is carefully planned. It is recommended that school administrators assess public opinions about the school, specify the objectives

They want their public relations program to meet, and then carefully plan what and how to communicate to the public. More specific public relations suggestions to use with particular groups—parents, citizen groups, the media, and "key communicators"—are also given. (Author/JM)

ment

Chapter 10 in a volume on school leadership, this chapter lists practical suggestions from many diverse sources for managing time and reducing stress. The author begins by noting attitudes and concepts that block or facilitate time or stress management. A number of time management strategies are suggested, including goal-setting, using a daily time log, and reducing time-wasters. External time-wasters discussed include visitors, telephone calls, meetings, paperwork, and coworkers' needs. Internal time-wasters are inability to say "no," inability to schedule and prioritize, inability to delegate, and tendency to procrastinate. Suggestions are made for dealing with both these kinds of time-wasters. The section on stress management begins by noting the overlap between time management and stress management problems and strategies. Stress is defined and the Social Readjustment Scale which ranks the stress of life events is reproduced. The author suggests keeping a daily stress log to increase awareness of specific problem areas. She then recommends ways to handle two kinds of stressors—those that can be controlled and those that cannot. The author concludes that managing time and stress develops the dedication, determination, and serious purpose necessary for lasting leadership. (Author/JM)

mentary Secondary Education, Problem Solving,
School Administration

Chapter 11 in a volume on school leadership, this chapter draws from the work of many authorities to define and classify conflict and present techniques for its management in schools. Emphasizing that conflict can have positive or creative as well as negative or destructive results, the author notes that all conflict need not be resolved. He offers several typologies of conflict based on such things as the kinds of issues involved and the severity of conflict. Three primary sources of conflict are identified: communications problems, organizational structure, and human factors. Stages of conflict are iden-

tified, ranging from anticipation to discussion to open conflict. With a warning that there is no one best method for managing conflict, the author explains several ways of dealing with it. Merely avoiding conflict is mentioned as sometimes valuable but often only a temporary answer. The author cites writers who recommend the creation of superordinate goals or the institution of mutual problem-solving. The use of compromise or arbitration is touched on as is the use of authority to settle disputes. The author lists several ways to manage conflict by altering organizational structure. The chapter ends with a caution: more important than knowledge of conflict management is actual experience in dealing with conflict. (Author/JM)

Chapter 12 in a volume on school leadership, this chapter cites the work of several authorities concerning problem-solving or decision-making techniques based on the belief that group problem-solving effort is preferable to individual effort. The first technique, force-field analysis, is described as a means of dissecting complex problems into their major parts or forces. According to the authors, once a problem is broken down into its components, an administrator can more easily plot a course toward its solution. The second problem-solving technique, the nominal group technique, is characterized as a means of generating alternative solutions to problems by asking group members to first formulate solutions independently, then share and discuss them. Applications of the technique and its advantages over conventional brainstorming techniques are described. The third problem-solving technique presented here, the Delphi technique, is described as a way to develop consensus on complex issues. According to the authors, several experts are asked to respond to a series of questionnaires that usually funnel the group toward consensus on the issue being discussed. Variations of the technique and several applications in schools are described. (Author/JM)

ment, Competence, *Developmental Stages, Edu-
cational Philosophy, Junior High Schools,
Literature Reviews, *Middle Schools, *Teacher
Characteristics

Identifiers—*Early Adolescents

Describing the middle school as extending from the fifth or sixth through the eighth grades, this review describes current middle school philosophies

and characteristics and cites middle school research and implications. Ideally, the report maintains, the middle school is designed to serve the needs of early adolescents through such techniques as interdisciplinary courses, exploratory classes, individualized instruction, team teaching, and flexible scheduling and student grouping. Research comparing the middle school and junior high is cited, concluding that at this time, no clear results are available. The report also reviews research on teacher competencies needed for middle school teaching, among them the abilities to structure teaching, use concrete materials and focus learning strategies, incorporate indirectness in teaching, and ask varied questions. Evidence of cognitive growth patterns of adolescents is explored, concluding that from age twelve to fourteen, adolescents experience a period of very slow intellectual growth. The research suggests that middle school teacher training needs to stress competencies identified as useful in working with adolescents and that curriculum should consider the seventh and eighth grade intellectual level. It is noted that the inconclusive research on middle schools may merely indicate that the middle school philosophy has not yet been fully applied. (Author/JM)

Identifiers—Economics of Scale

The 11 items in this annotated bibliography are entries in the ERIC system concerning the effects of school size. Research studies cited center on existing and recommended sizes for schools; relationships between the size of schools and districts and the costs of education; economics of scale; and the effects of school size on achievement, student participation, student alienation, maintenance costs, and overall educational quality. More theoretical analyses look at the importance of administrative structure and at myths purportedly surrounding rural school and district consolidation. (JM)

Identifiers—Coleman Report, Public and Private
Schools (Coleman et al), *School Effectiveness

The 11 items in this annotated bibliography are entries in the ERIC system concerning studies of school effectiveness and the debate surrounding how much influence schools have over student learning. Several articles included reexamine the 1966 Coleman report, and one compares a more

recent Coleman report with the earlier report. A number of studies cited explore what makes exemplary schools outstanding. Influences on school effectiveness identified by these studies include school climate of norms, strong school leadership, high expectations for students, smaller classes, more experienced teachers, student motivation, quality of the home environment, academic emphasis, and teacher skills. Some articles also explore the validity of research techniques used to determine school effectiveness. (JM)

Teacher absenteeism is the topic of the 12 ERIC abstracts contained in this leaflet. Research on the topic discusses the causes of the problem, including, among others, job dissatisfaction, the organizational structure of the school, school size, weather conditions, and relaxed teacher responsibility. Strategies for improving teacher attendance are also discussed in the materials abstracted. These include setting up a system that rewards good attendance, requiring teachers to speak to the principal when they call in sick, and special counseling for teachers with high absence rates. Identifiers—*School Effectiveness

After first glancing at previous research suggesting that schools (and principals) had little effect on students, this research review focuses on six research studies that suggest the opposite: schools (and their principals) can make an important difference in student achievement. The review highlights Michael Rutter's three-year study of British ten-year olds, which concluded that the "ethos" or norms of a school exert more influence on students than any other factor. Also discussed is Wilbut Brookover's study of Michigan elementary schools that reached a similar conclusion: a successful school has a climate that furthers success. These findings are seen to support those of Gilbert Austin, who found in addition that unusually successful schools all had a principal or other leader who was exceptional. Ronald Edmonds, who reviewed studies of effective schools, is also cited as finding that strong administrative leadership is the most important factor in school effectiveness. Finally, two other studies are briefly mentioned that emphasize the importance of leadership to school effectiveness. The review concludes that schools do positively affect the achievement of students by creating norms that support achievement and that the person who has the most influence on these is the principal. Identifiers—*Administrator Effectiveness

Eleven annotations of studies or summaries of studies that are entered in the ERIC system are presented in this leaflet. All the annotations concern principals' behavior characteristics and institutional programs that are related to school success as measured by student achievement. The studies reviewed agree that exemplary principals share a number of characteristics such as being effective problem solvers, taking an active role in school administration, and possessing a human relations orientation. Information for ordering copies of the items reviewed is supplied in the leaflet. (MLF)

Descriptors—Academic Achievement, Comprehensive Programs, Consolidated Schools, Cost Effectiveness, Educational Quality, Educational Research, Efficiency, Elementary Secondary Education, Expenditure Per Student, Input Output Analysis, Public Opinion, *School Size, School Support, *Small Schools

The movement toward school consolidation was triggered by James Bryant Conant's contention that larger schools are more efficient and offer more comprehensive programs. Many studies seem to support the claim that larger schools are cheaper to operate. Yet problems with these studies include wide variation in the minimum, optimum, and maximum sizes favored by writers and difficulties in comparing cost figures. Furthermore, there is great disagreement in the research about whether larger schools in fact offer higher quality education. Some studies suggest that schools can be both too small and too large to be effective, with 1,600 to 1,700 suggested as the optimum size for high schools. The most reliable studies show that size makes no difference in academic achievement. Regardless of research findings, parents favor smaller schools. Research suggests that this predilection may result from the presence of innovative and involved teachers, supportive atmosphere, and closer connections between principal and staff in small schools. Perhaps educators should look for ways to overcome shortcomings of small schools and accentuate their advantages. (Author/JM)

Descriptors—*Academic Achievement, Educational Research, Elementary Secondary Education, Mastery Learning, *Time Factors (Learning), *Time on Task

The twelve papers, articles, and reports presented in this annotated bibliography review theories and evidence on the relationship between learning time and academic achievement in elementary and secondary schools. The papers concentrate on three types of learning time: "time on task," which is the amount of time students are actually engaged in learning; "allocated time," the time a teacher schedules for a learning activity; and "academic learning time," the time a student spends successfully learning. Several papers relate time on task to contextual, instructional, and pupil variables and to the match between a particular student and the difficulty of a task. Other papers suggest a model of the relationship of time to learning and note the significance of time in the mastery learning and direct instruction techniques of teaching. A workshop on how to increase academic learning time in the classroom is described in one article, while the final paper examines the relationship of another kind of time, teachers' lesson preparation time, to academic achievement and students' prior achievement levels. Descriptors—Administrator Characteristics, Administrator Qualifications, *Administrator Selection, Elementary Secondary Education, Employment Interviews, Job Applicant Networks, *Principals, Simulation
Identifiers—Assessment Centers

Annotations of 12 articles and a research report discuss procedures for selecting principals and other school administrators and examine the hiring process from the viewpoints of both the candidates and those doing the hiring. Three articles describe model selection processes and note the problems involved in job interviews, letters of recommendation, and impulsive hiring decisions. Two articles and a special journal issue report on assessment centers, including that of the National Association of Secondary School Principals, and look at the simulation techniques used in the centers. Principal selection from the candidate's viewpoint is presented in three further articles, one narrating a day of interviewing for a fictitious applicant and the others raising questions about "hidden agendas" and "old boy networks" in the hiring process. One article describes how a British Columbia (Canada) school system develops administrators from within the district, and an article and the research report review the factors and characteristics of candidates emphasized by administrators in selecting principals.  Identifiers— School District Size

Drawing on data about unionism in education as well as in other public and private sectors, this literature review focuses on three areas: the causes of collective bargaining in public education, the reasons for strikes by school employees, and the impact of unions on educational expenses and salaries. The author first discusses the factors leading to educational unionism, including changes in teachers' and administrators' attitudes and desires, increases in the number of educators, concentration in larger work units, decisions by teacher and administrator organizations to bargain collectively, and legal support from state laws. Economic, political, and moral arguments for and against educator strikes are considered in the second section, which examines the rational and irrational reasons for strikes and recommends strike prevention rather than strike prohibition. In the last section the author surveys research on collective bargaining's effect on educational costs. He finds that researchers agree that unionism increases teacher salaries but disagree about its effects on salary structures, program cuts, taxes, and educational quality. The author recommends further research on unionism's causes and consequences, especially on the effects of the current educational retrenchment on unions. (Author/RW)

Identifiers— Hidden Curriculum, Learner Control

Twenty-two speakers attending the University of Oregon College of Education's Third Annual Summer Conference, entitled "The Computer: Extension of the Human Mind," in July, 1982, submitted their papers for publication in this volume of conference proceedings. Papers of a wide-ranging speculative or theoretical nature were presented in general interest sessions. Authors of these papers and their topics were Moursund on computer literacy, Bork on educational change related to computers, Zamora on off-campus computer education, Billings on learner control, Kling on the relationships between educational or social philosophy and approaches to computer instruction, Olds on the hidden curriculum of computer-assisted instruction, and Kinne on the development of the microcomputer and its market. Special interest sessions were addressed by speakers discussing specific applications of computers in the following areas: special education, educational program evaluation, elementary and secondary mathematics and science instruction, literature searches, computer programming instruction, career information systems, and home computer-based learning systems. Other special interest sessions dealt with professional associations for computer educators, resource materials regarding development of small college computer science programs, and applications of computer-assisted instruction. Descriptors—Elementary Secondary Education, *Emotional Disturbances, Nontraditional Education, *Program Evaluation

The book addresses issues in meeting the educational needs of disruptive students. In the introduction, R. Sarri examines the rise of alternative schools and discusses common elements in their design and operation. D. Sabatino follows with "Issues and Concerns: Problems with Alternative Schools," in which he examines the particular difficulties involved in evaluating alternative programs. Four alternative programs are described in depth: Learning Center II, a program administered jointly by the local education agency and the Washington State Juvenile Rehabilitation Division; Bellefaire School (Cleveland, Ohio), an integrated program of group living, education, and psychotherapy; Longfellow Education Center (Minneapolis, Minnesota), designed for multiply handicapped students with severe emotional disturbances; and Special People Realizing Individual New Goals (Atlanta, Georgia), an approach to teaching survival skills to senior high-disturbed students. Brief overview descriptions of 12 additional alternative programs are presented: SAIL Project (Student Advocates Inspire Learning) in Minnetonka, MN; the Starr Commonwealth Schools Alternative Education Program (Van Wert, OH); Delta County Education Center (Gladstone,

MI); Chama High School (Auburn, CA); Wallbridge Academy (Grand Rapids, MI); Horizons High School (Wyoming, MI); Kansas City Youth Diversion Project (Kansas City, MO); LIFE Center (Albuquerque, NM); Alternative Program (State College, PA); William Smith High School (Annona, CO); Partners School (Denver, CO); and Project CITE (Crisis Intervention Techniques for Education) in Terrell, TX. Descriptors—*Disabilities, Elementary Secondary Education, *Interdisciplinary Approach, Problem Solving, *Program Administration, Program Development, Schools, *Staff Development, *Teamwork

Identifiers—Staff Support Teams

The manual considers practical issues involved in building and maintaining the effectiveness of school based support teams, interdisciplinary problem solving groups designed to respond to staff needs through crisis intervention, short or long term consultation, and continuous support. Separate sections address the following topics (sample subtopics in parentheses): rationale; establishment (models, levels of implementation, team planning and preparation); evolution (five stages of team development); requirements for successful operation (mutuality and interdependence, documentation, administrative support); and assurance of the team's continuation (maintenance, leader tasks, and guidelines). More than half of the document is composed of five appendices including five models of various teams, papers on critical variables in staff support teams, initiation in local school buildings of instructional support teams, parents on school based staff support teams, and inservice training. Descriptors—Course Content, French, German, Postsecondary Education, *Second Language Instruction, Spanish, Teaching Methods, *Writing (Composition), *Writing Instruction

A text-editing approach to composition in the foreign language classroom is set forth. In a 15-week composition course meeting three times each week, students prepare a weekly composition that they will revise after an in-class text-editing session involving several student papers. The third day is devoted to grammar work. Criteria for evaluating student compositions are set forth. Progress in writing skill is enhanced by careful attention to prose

style, and students are encouraged to write pastiches. Finally, students are required to keep a journal. Testing and grading are discussed, and situations commonly encountered by teachers are dealt with. Appendices include suggestions for samples of personal assessment statement, course introduction for a basic French composition course, grammar mid-term, student evaluation of course, prose style analysis checklist, grammar review sheet, sentence-embedding exercises, and tests. Samples of student work (composition outlines, prose style analyses, and pastiches) are presented, most with the actual text-editing corrections of the teacher. The paper concludes with suggested texts for pastiche exercises. (JB)

Descriptors—*Applied Linguistics, *Careers, Computers, Educational Administration, Language Planning, Language Research, Lexicography, Public Policy, Publishing Industry, Social Problems, Speech Pathology, Translation

Proceedings are presented of a conference on non-academic careers for linguists, which was sponsored by the Linguistic Society of America and the CUNY Ph.D. Program in Linguistics. The presentations are under two headings: (1) "What Linguists Can Do," and (2) "What Linguists Are Doing." The first section includes contributions by Frederick G. Mish, W. O. Baker, Frank J. Macchiarola, Tracy C. Gray, Lothar Simon and Alan Westaway. Their presentations deal with the contributions linguists may be able to make in the fields of lexicography, computers, education (non-teaching), language planning and government policy, publishing and translation. The second section includes contributions by Norma Rees, Stuart Flexner, Mark Liberman, Robbin Battison, William Labov and Marcia Farr. Their presentations focus on the fields of language disorders, lexicography, computers, business, language policy and social problems, and language research. The volume concludes with a transcript of the question and answer period. (AMH)

Descriptors—*Communicative Competence (Languages), Higher Education, Language Research, Language Skills, Learning Activities, Modern Language Curriculum, *Notional Functional Syllabi, Secondary Education, *Second Language Instruction, *Textbook Content

Textbooks currently available for foreign language instruction are generally oriented toward instruction in grammar for its own sake. Until materials are developed that are specifically geared to a systematic development of communicative competence, textbooks must be adapted. This handbook is directed toward that need. It emphasizes the following points: (1) the central features of communicative proficiency and the process of communicative interaction as these relate to the specification of learning outcomes for foreign lan-

language courses; (2) the feasibility of designing academic foreign language courses to parallel this process through the application of concepts of communicative and functional-notional syllabus design; (3) a systematic approach for adapting textbooks; and (4) illustration of the application to guide teachers in their own materials adaptation. The systematic approach to textbook-adaptation provides a step-by-step analysis of the process and includes tables linking points of grammar, meanings, and ordering for functional practice; tables on the common purposes of language use related to language skills; and a hierarchy of communicative activities. The process is illustrated by numerous examples of purposeful language activities that may be derived by attaching meanings and functions to points of grammar in basic text series. A list of references completes the volume. (AMH)

Many teachers not trained in English as a second language (ESL) often feel at a disadvantage when they are working with children whose first language is not English. This book addresses this disadvantage by giving practical information and teaching aids. The first area investigated is registration. Questions are suggested and the use to which answers can be put is outlined. A second issue is helping children adjust to a new culture. It is suggested that teachers talk to members of the ethnic group under consideration. Questions leading to examination of the similarities and differences between cultures are suggested. Next, oral fluency, reading, and writing acquisition are discussed and activities are proposed for the basic skills of listening, speaking, reading, and writing. Ways of fostering concept development are described and an outline of facts relating language learning to concept development, along with suggested applications is provided. Finally, a number of lesson plans are given as models and six steps are suggested for bridging the gap from ESL to the regular curriculum. An annotated list of resources completes the booklet. (AMH)

This book deals with several aspects of teaching everyday survival skills to adult English as a second language (ESL) students. The basic orientation of the book is based on a determination of skills students need to cope in a community. This determination involves consideration of the skills the community requires, the skills the students lack, and the skills the person may reasonably learn in a given period of time. A list of basic skills for beginning students is provided. The other sections of the book give practical suggestions for: (1) placing and evaluating students, (2) developing teaching strategies for the pre-book class, (3) examining the literacy factor in coping skills, (4) considering cultural factors, and (5) using community resources to gather material. Concrete examples are provided throughout the book; the final section provides a sample lesson plan and a bibliography of resources. (Author/AMH)

This monograph discusses the state of the art in child second language acquisition research. It is of particular interest to teachers, administrators, and others concerned with educating children whose first language is not English. The first chapter deals with preschool second language acquisition. It examines processes of acquiring the sound system, the meaning system, the rules for language use, the developmental stages in acquisition, and the differences between first and second language learning in preschool children. Chapter 2 treats second language acquisition in the classroom. It examines the nature of the school experience and how the language of the school differs from language used outside the classroom. Bilingual education programs in Canada and in the United States are compared and various types of U.S. bilingual programs are discussed in order to specify the various instructional and interactional features that differentiate bilingual classrooms. The third chapter describes ways in which researchers have investigated second language acquisition. The major research areas are studies of the second language-learning process, the question of language assessment, and research on the effectiveness of bilingual education. Each chapter contains suggestions for further reading. (Author/AMH)

Descriptors—*Classroom Techniques, *Communicative Competence (Languages), Convergent Thinking, *Creative Development,

Creativity, *Divergent Thinking, *Learning Activities, *Second Language Instruction, Teaching Methods

Factors that are closely related to creative behavior are also intimately connected with language learning and the ability to communicate in languages other than one's own. These factors are fluency; flexibility; elaboration; originality; sensitivity to problems; and the ability to synthesize and analyze, to reorganize an idea, to handle complexity, and to evaluate. Creative thinking, or "divergent production," is contrasted with convergent thinking, an orientation that concentrates on finding a definite or correct approach to problems. Divergent production is explored with regard to its educational implications, foreign language outcomes, communicative ability, classroom climate, and structuring teaching methods in such a way as to foster creative behaviors. This discussion includes an informal teacher checklist on classroom climate and an interpretation of the checklist. Over 50 activities are described. These activities are grouped according to the creative thinking categories of fluency, flexibility, elaboration, and originality. For each activity a description is provided as well as examples and interpretation of the activity. (AMH)

This guide takes an eclectic approach to literacy training, that is, it allows the instructor to select those materials and methods that best fit the needs of individual learners. It includes a definition of the target population which will include adults who are nonliterate, preliterate, semiliterate, and those who are literate in a non-Roman alphabet. A section of the book describes the goals and content of literacy training, a summary of pre-reading skills and minimal competencies, a checklist for the teacher, and 10 pre-reading activities. The next section deals with teaching functional language skills and the basic vocabulary and structure which will have immediate application to the daily living situations in which immigrants find themselves. The third section of the guide presents a rationale for teaching writing and an initial lesson plan for introducing numbers. The final section on teaching reading discusses teaching the association of the oral and written form and provides lesson plans for teaching sight words, sound/symbol relationships, and the experience story technique. Three appendices on teaching the alphabet, number exercises, a list of Oregon Minimal Competencies, and an annotated bibliography complete the volume. (AMH)

 Identifiers—*Error Correction (Language)

A review of literature on error correction shows a lack of agreement on the benefits of error correction in second language learning and confusion on which errors to correct and the approach to take to correction of both oral and written language. This monograph deals with these problems and provides examples of techniques in English, French, German, and Spanish. The chapter on selection of errors to correct presents 15 areas research has suggested and proposes a system for choosing errors for correction based on the criteria of comprehensibility, frequency, pedagogical focus, and individual student concerns. With regard to techniques for correcting oral work, there is general agreement that the approach should be positive. Within this perspective, a number of techniques are suggested for oral correction under the headings of self-correction, peer-correction and teacher-correction. The same categories are used to discuss techniques for correcting compositions and other written work. Appendices include a checklist of frequent errors made by ESL students, a list of points to aid essay-writers, and two composition check-lists. A list of references completes the volume. (AMH)

Information on possible sources of funds and skills that are needed for obtaining grants from private foundations and corporations is presented to aid college administrators and faculty members. Attention is directed to private sector grants to higher education, grantsmanship within the institutions, grantsmanship as faculty development, initiating the grants process, and grantsmanship resources. It is shown that private sector support is diverse and has been targeted to almost every conceivable aspect of higher education. However, the funding sources often are interested in innovation and new programs, while colleges and universities are increasingly concerned with obtaining funding that will avoid significant cuts in existing programs. It is suggested that the skillful combination of both the art and knowledge base aspects of grantsmanship will increase the likelihood that grant proposals will be successful. While the responsibility for such activities usually resides with an institutions' grants office and its relationship with both faculty and administrators, the college president may seek to build an incentive system to encourage staff participation in the grants process and to explain institutional priorities. Workshops for faculty and staff can help improve their grantsmanship as well as assist them in locating information about funding sources and opportunities. It is important to find funding sources that fit a proposal in terms of activity, geographic

orientation, types of support, grant range, and target population. Resources representing both bibliographic and referral sources that may be useful in developing or improving grantsmanship skills are listed under the following categories: general references, higher education references, periodicals, practical guides, organizations, and computerized databases. A bibliography is also presented. (SW)

The prevalence of underprepared students attending colleges, the need to define literacy requirements of courses, the implications of research on literacy in the design of remedial programs, and the need for systematic evaluation of such programs are considered. Literacy is broadly defined as a language competence that is used to achieve both individual and societal goals. Literacy has a functional dimension, involving the specific competencies required to perform in the occupational field for which an academic program prepared students, and a symbolic dimension, which is associated with having knowledge, cognitive competence, and values established in society. It is proposed that policies involving issues of literacy and its development are adequate only when all components of its definition are considered: (1) the nature of the language involved; (2) the way the language is processed; (3) the context in which the language is processed for use; and (4) the functions of this use in relation to specified goals. Despite the use of a variety of terms and the lack of clearly defined purposes, the emphasis of most efforts described in the literature seems to include preparing the students for regular college work. Some are comprehensive programs incorporating specific literacy skills like reading and writing and objectives like improved self-concept, while others focus on one specific skill such as the development of basic arithmetic skills. Attention is directed to teaching methods, institutions' support for organization of developmental programs, and common practices and problems in the evaluation of developmental programs. A bibliography is appended. (SW)

Descriptors—Accountability, Administrator Attitudes, *Change Strategies, Collective Bargaining, *College Administration, College Environment,

College Planning, Decision Making, Declining Enrollment, Educational Change, Educational Objectives, Evaluation Criteria, Financial Problems, Governance, *Higher Education, *Leadership, *Needs Assessment, Outcomes of Education

Changes that higher education is experiencing and forecasting and approaches to improve higher education management are considered. In addition to declining enrollment, rising costs, and diminishing financial resources, colleges are faced with the task of managing these changes under the pressures of new constraints and new constituencies. Collective bargaining is affecting faculty participation on governance, and the influence of faculty is also being affected by its changing composition and distribution: the tenured professoriate is projected to continue to age. Additionally, students now serve on academic advisory bodies at most institutions, and most colleges have defined due process for students with regard to their rights. It is suggested that with trends toward centralization of authority and demands for increased accountability, governing boards have increased the scope of their activities and will become an increasingly important constraint on higher education's decision-making process. Among the external constituencies are state government, accrediting agencies, local communities, benefactors, and business interests. Each has a vehicle for exerting influence on an institution. It is suggested that the inability to measure its effectiveness is important to higher education's adaptation to the changes it is experiencing, and that criteria for evaluation must be established. Decisions must be based on specificity of goals, comprehensiveness in developing plans to achieve those goals, and innovation in measuring outcomes. Executives need an aggressive and open-minded approach in searching for and testing new methods and need to recognize constraints that affect a decision. (SW)

Indices and manifestations of quality in undergraduate education are considered and a four-part framework is developed. Context indices represent institutional characteristics that remain relatively stable over time (e.g., expenditures per student and size of student body), while input indices reflect characteristics of entering students (e.g., ability and aspirations). Manifestations of quality are evidenced by involvement and outcome indices; the former characterize interactions between and among students and faculty, such as satisfaction and frequency of contact, and the latter reflect intended products or unintended effects associated with college attendance such as persistence, academic achievement, and alumni attainments. Commonly used context indicators of quality include size (number of undergraduate students), clarity and consistency of institutional purpose, student living environments, salaries, and decision-making strategies. The following input indices have been used to indicate quality: student ability, biographical characteristics of students, and nonintellective characteristics. Commonly used involvement indices have been instructional activities and informal student teacher interaction. The most often used outcome indices as manifestations of quality have included

persistence, student achievement, intellectual and social/emotional development of students, and alumni achievements. Both quantitative and qualitative methodological approaches to quality assessment and societal trends influencing the need for quality indicators are briefly reviewed. These trends include declining enrollments and financial constraints. A bibliography is appended. (SW)

Identifiers—Market Segmentation

Approaches to developing a successful marketing program for universities that is fair to both students and the academic integrity of the institution are considered. A comprehensive marketing plan includes market research, positioning, strategy formulation; recruitment/admission, communications, curriculum evaluation, retention, and evaluation. Good marketing begins with determining a market position; that is, differentiating what an institution offers in relation to other institutions. To arrive at a market position an institution must define its mission, philosophy, and goals. Differentiated marketing, or market segmentation, calls for identifying various markets or submarkets and targeting communication to each one. Although enrollment forecasts and projects are difficult, an institution must have a reasonably accurate estimate of how many students will enroll in order to accurately plan budgets, faculty, programs, and facilities. Marketing, as a communications process, goes beyond promotion and advertising. It involves assessing the needs and interests of potential students and promoting the programs. Parents have a significant influence on the choice of a college. Contacts, such as current students, alumni, college staff, high school counselors and teachers, are not equally effective in their recruitment efforts. Financial aid information and the way financial aid is packaged need to be assessed. In addition, student retention is a vital part of marketing, and an institution needs to research the reasons its students withdraw. A market audit or evaluation will help an institution review its policies, practices, and procedures in marketing. A bibliography is appended. (SW)

Computer literacy in higher education and its relationship to computer science and other areas of the institution, such as general and continuing education, are considered, along with issues related to academic and administrative aspects of computer literacy. The impact of microcomputers is assessed, as is the extent to which computer science and literacy are increasing in other countries. It is suggested that given the continuing success of computer literacy at the elementary and secondary levels, computer literacy in higher education could, in time, acquire the status of a basic skill. Curricular concerns include the advantages and disadvantages of computer assisted instruction (CAI), the relationship of microcomputers to CAI, and who should be computer literate. According to the literature, computer literacy is intended for everyone, and the literacy level that is effective at one institution may be inappropriate at another, although common characteristics are indicated. Important administrative considerations are the issues of facilities planning, the acquisition of computer literate faculty and staff, and the cost of providing literacy to students, faculty, and administrators. In brief, the relationships among goals of students, faculty, and staff members and the relationship of these goals to resource support are determining factors in the planning, development, and implementation of computer literacy programs. Issues and problems of national scope that require national strategies for their resolution include: networks, national databases, federal support of computer education, national cooperation and coordination, and international competition. The state-of-the-art in computer literacy practices and research is reviewed, and a bibliography is appended. (SW)

Descriptors—*Cost Effectiveness, Cost Estimates, *Cost Indexes, *Educational Finance, Expenditure Per Student, *Expenditures, Faculty Workload, Graduate Study, Higher Education, *Income, Program Effectiveness, Resource Allocation, School Accounting, Undergraduate Study, *Unit Costs

The state-of-the-art of financial analysis for academic units within institutions of higher education is evaluated with attention directed to: how the cost of an academic unit is determined, how revenue is identified with academic units, how costs are analyzed, how revenues and expenditures are projected, and how the financial efficiency of an academic unit is evaluated. Based on the literature, it is suggested that: indirect as well as direct costs need to be measured; cost has both fixed and variable elements in relation to the number of students or faculty in an academic unit; in some analytical models, the revenue attributable to an academic unit is measured; costs per student, per full-time equivalent faculty, and per class are measures of unit cost; level of study, method of instruction, and other factors are used to weight data about cost per student; the expected cost of an academic unit may be measured by determining its level of average faculty support and workload; and financial measures may yield important information, but the use of the information

still requires discretion. Accounting for revenues of academic units is not as well developed as accounting for costs. Where actual revenue attributable to a unit is not available in the accounts, some form of allocation system is used. Mathematical models, such as trend line analysis and the cohort-survival technique offer means for projecting future enrollment and consequently revenue and expenditures that vary according to enrollment. Relating cost to quality, or fiscal efficiency to program effectiveness may result in misuses of quantitative data. A bibliography is appended. (SW)

Identifiers—*Corporate Education

Corporate-based education programs, the response of higher education, and the cooperation between business and higher education are considered. It is suggested that the fact that private industry has moved into the degree-granting arena, even to a small extent, may indicate that higher education needs to be more responsive to the business sector. Corporate education differs from higher education in that it tends to serve primarily institutional needs rather than personal needs, is characterized by unusually high motivation of participants, the workplace is the setting for learning and doing, and it has a pragmatic orientation. However, despite some fundamental differences in purpose and orientation, corporate education centers sometimes bear a striking resemblance to traditional colleges and universities. A corporation may be better able to accommodate rapidly changing knowledge requirements by conducting its own education program rather than attempting to work through a college or university. Corporations and institutions of higher education are involved in numerous partnership activities ranging from national projects to individual collegiate/corporate efforts. However, higher education may have to institute significant changes in its structure and develop additional nontraditional delivery systems if it is to serve the educational needs of the business sector. Colleges and universities must become more sensitive to the manpower needs of industry and must carefully evaluate their ability to respond to these needs in a way that is consistent with their institutional mission. Higher education needs more flexibility and adaptability in course and program approval, missions procedures, residency requirements, and course and program duration. (SW)

Journal Cit—Administrator's Update; v3 n2 Fall 1981

Pub Type - Collected Works - Research (143) - Information Analyses - ERIC Information Analysis Products (071)

EDRS Price - MF01/PC03 Plus Postage.
 Descriptors - *Academic Deans; *Administrators - Attitudes; *Administrator Role; *Conflict Resolution; *Employment Experiences - Higher Education; *Job Satisfaction; *Problem Solving; *Role Conflict; *Teacher-Administrator Relationship.

The role of the academic dean, role conflicts, and the occupational experience and performance of deans are considered. Role conflict for academic deans is related to clashing constituent role ambiguity, lack of correspondence between organizational requirements and the personalities of incumbent deans, changing organizational needs over time, and historical trends in the definition of the deanship. Less than half the deans are evaluated annually, usually by presidents, chairpersons, vice-presidents or provosts. While satisfactions of deans have been reported with respect to the raising of academic standards at an institution, contributing to curriculum development, and hiring qualified faculty, dissatisfactions pertain to situations in which the dean is the initiator of conflict, the dean is the defendant in an attack on the administration, or the dean is the combatant. It is suggested that the role of the dean needs to be clarified with respect to planning, evaluation, resource allocation, and other administrative functions. Knowing what attracts individuals to the deanship and how the balance of satisfactions and dissatisfactions leads to the resignation of deans after a time would also be valuable. Mechanisms that would enable deans to maintain their scholarly interests so that they may return to teaching later in their careers may be important, along with research on the wisdom of retaining deans in their administrative positions. Since teaching is the primary activity overseen by deans, it is necessary to know more about how they might manage resources of all kinds (including symbolic resources) to stimulate and maintain teaching excellence in their academic units (SW).

 Identifiers - National Labor Relations Board v Yeshiva Univ.

The impact of the unionization of college and university faculty is examined, based on a 1979 survey of 240 nonunionized colleges and all other unionized institutions, and on a review of recent literature on collective bargaining. The survey is a followup of a 1974 survey pertaining to collective bargaining and a 1971 survey concerned with general governance issues at the 240 representative schools. Attention is directed to: the impact of collective bargaining on governance and especially academic senates and administration at both the local campus and system levels; the likely beneficiaries of academic collective bargaining and the overall consequences for faculty, students, and higher education in general; the formalization of personnel relations, and tenure processes and retrenchment at unionized and nonunionized institutions. Perspectives on the impact of the Yeshiva Court decision and the future of faculty collective bargaining are also presented. Of the 1,400 questionnaires mailed to college presidents, local faculty union chairpersons, systemwide

administrators, and union leaders, 72 percent responded. More than 95 percent of the respondents are faculty union chairpersons. Faculty union chairpersons' experiences specifically of collective bargaining are reported. To be fully understood, however, the collective bargaining of these chairpersons has been collectively effective, and their response to strengthening existing faculty governance through senates and faculty professional standing. Administrators said that union force initially hurt in these areas. Overall conclusions of the three surveys include: some union chairpersons are dualistic; with the union, faculty bargaining, and faculty personnel issues are at the heart of it; faculty bargaining - a dialogue, not a power play (SW).

Institutional Vitality in Higher Education, AAHE-ERIC Higher Education Research Report, American Association for Higher Education, Washington, DC, ERIC Clearinghouse on Higher Education, Washington, DC.

Spons Agency - National Inst of Education (ED), Washington, DC.

Pub Date - Jan 82
 Note - 6p.
 Available from - American Association for Higher Education, One Dupont Circle, Suite 600, Washington, DC 20036 (\$5.50).

Journal Cit - AAHE Bulletin, June 1982.

Pub Type - Opinion Papers (120) - Information Analyses - ERIC Information Analysis Products (071)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors - Administrator Attitudes; Career Leaders; *College Environment; *College Role; *Evaluation - Criteria; *Evaluation - Methods; *Faculty - College Relationship; *Higher Education; *Institutional Characteristics; *Institutional Evaluation; *Organizational Climate; *Retrenchment; *Self Evaluation (Groups); *Teacher Attitudes; *Teacher Morale; *Institutional Vitality.

Institutional vitality in higher education and measures of vitality are considered. Vitality may be viewed as the capacity of a college or university to incorporate organizational strategies that support the continuing investment of energy by faculty and staff both in their own careers and in the realization of the institution's mission. Institutional vitality in the 1980s must be understood in relation to the organizational consequences of both steady state and decline. Organizational theories, institutional histories, and biographies of important academicians are cited that may illuminate the issue of vitality. An important idea pertaining to institutional vitality is Kanter's (1979) view of opportunity structure. Kanter argues that when times are not prosperous, the institution must pay attention to its quality as an organization. Kanter addresses ways in which opportunity and power related to jobs and organizations are critical to motivation and leadership effectiveness. Peterson's (1980) emphasis on faculty response to decline and the ability of individuals in the organizations to lead effective professional lives leads to an emerging literature on faculty careers, including Rice's (1980) investigation of the professional careers of former Danforth fellows, and Furniss's (1981) challenge to the "one life-one career" model. Indicators and scales for measuring vitality include: the Institutional Functioning Inventory (Peterson et al., 1970), Likert's Organizational Survey Profile (1976), the International Communication Association's Communication Audit, and Scott's (1980) institutional indicators (SW).

Strategic Planning, Management and Decision Making, AAHE-ERIC/Higher Education Research Report No. 9, 1981.

American Association for Higher Education, Washington, DC, ERIC Clearinghouse on Higher Education, Washington, DC
 Spons Agency - National Inst. of Education (ED), Washington, DC.

Pub Date - 81
 Contract - 400-77-0073
 Note - 75p.

Available from - Publications Department, American Association for Higher Education, One Dupont Circle, Suite 600, Washington, DC 20036 (\$4.00 members, \$5.50 nonmembers).

Pub Type - Historical Materials (060) - Information Analyses - ERIC Information Analysis Products (071)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors - *College Faculty; *College Governing Councils; *College Presidents; *Faculty - College Relationship; *Governance, Higher Education; *Higher Education; *Information Systems; *Leadership Styles; *Management Information Systems; *Organizational Climate; *Organizational Communication; *Role Perception; *Systems Approach; *Teacher-Administrator Relationship; *Teacher Role.

Major themes in the literature related to organizational communication and higher education are examined, with emphasis on the internal aspects of organizational communication in higher education. Attention is directed to the systems model and the structure, function, process, and communication patterns of higher education systems. The literature about three information problems is examined: uncertainty, timeliness and distortion, and overload. From this review, an information agenda is developed to help higher education administrators plan communication more effectively. Selected elements of organizational climate that have a particular impact on organizational communication and that have been the subject of previous investigations on educational settings are also addressed: administrative support, aggressive and innovative faculty formal networks involving consultants or resources,

Identifiers - *Strategic Planning.

Recent applications of the strategic planning concept to higher education and to the various levels of organization are discussed. The application of strategic planning to the institutional context of strategic planning is examined, and strategic planning is defined. Institutional strategic planning is defined. It is suggested that strategic planning addresses the institutional level attempts to address the internal environment. The areas of the strategic planning process are identified: establishing the mission, role, and scope of the institution; analyzing data on the internal operations; analyzing data on the external environment; matching institutional mission and strengths to external opportunities for alternative formulations of policy; and choosing the strategies that are consistent with the institutional values and economically justifiable, are politically attainable, and demonstrate a balance of costs. A list of the most substantial studies in some of the concepts of strategic planning, in chronologic order of development, are the following: geopolitical theory, field theory, general system theory, transdisciplinary management school policy studies, the concept and technique of marketing, and the concepts of organizational effectiveness. Approaches to scanning environmental information include: tracking new ideas that appear in the higher education literature using a cross impact paradigm that integrates national trends, local trends, values and institutional sectors; developing a probability diffusion matrix for events and trends; force field analysis; and using value profiles. A bibliography is appended (SW).

Rules and guidelines are provided for the process of acquiring documents to be considered for inclusion in the ERIC database. The differing responsibilities of the Government, the ERIC Clearinghouses, and the ERIC Facility are delineated. The various methods by which documentary material can be obtained are described and preferences outlined. Sample solicitations are provided covering different situations. The need for proper recordkeeping and forms is emphasized and examples are given of form letters, reply cards, thank you notes, in-process records, scope overlap notices, reproduction release forms, etc. The system-wide list entitled "ERIC Acquisitions Arrangements" is described. Acquisitions as it applies to the "Current Index to Journals in Education" is covered under the headings: comprehensively covered journals; selectively covered journals; "oneshop" journals. (TB)

Rules and guidelines are provided governing the selection of documents and journal articles to be included in the ERIC database. Selection criteria are described under the five headings: (1) Appropriateness of content/subject matter; (2) Suitability of format, medium, document type; (3) Quality of content; (4) Legibility and reproducibility; (5) Availability. It is emphasized that quality of content is ERIC's single most important selection criterion. Various types of documents are listed and grouped, for selection purposes, under the headings "Most Suitable," "Acceptable," "Unsuitable." Possible actions to remedy physical problems with otherwise acceptable documents are described. Factors to be considered when selecting documents of the following special types are covered in detail: dissertations and theses; brief materials; corporation-produced materials; bibliographies; documents that cannot be reproduced; documents of local/parochial interest; instructional materials (for student or teacher); research reports. A special section deals with the selection of journals for coverage and the selection of journal articles from journals not covered comprehensively. (TB)

Rules and guidelines are provided for subject indexing in the ERIC system. The principle of "subject access" is discussed with particular reference to "coordinate indexing," which involves designating subject content by unit terms (or tags) that may be put together or "coordinated" for subsequent retrieval. The nature of educational literature and the characteristics of educational community user groups are delineated in order to place ERIC indexing in proper perspective. Indexing tools necessary for the ERIC indexing process are also described. Detailed guidelines are presented on the indexing process itself, involving: (1) examination of the document; (2) identification of indexable information, e.g., population characteristics (including educational level), document form/type, curriculum or educational subject/field, activity, methodology, and materials; (3) translation and negotiation of indexable concepts into approved terminology, i.e., ERIC Descriptors and Identifiers. Additional guid-

ance is offered on several special indexing issues, including specificity of indexing, weighting (major/minor terms), over- and under-indexing, and the indexing review process. (JH)

Descriptors—Databases, Documentation, Information Retrieval, Information Storage, *Lexicography, Library Technical Processes, *Subject Index Terms, *Thesauri, *Vocabulary Development Identifiers—*ERIC, *Thesaurus of ERIC Descriptors

Comprehensive rules, guidelines, and examples are provided for use by ERIC indexers and lexicographers in developing and maintaining the "Thesaurus of ERIC Descriptors." Instructions are included for adding new Descriptors and modifying existing terminology; procedures for justifying these actions are provided, as well. Definitions and functional descriptions are given for the general concepts of "thesaurus" and "descriptors" and for the individual elements included in a standard, structured thesaurus unit, i.e., Main Terms, Descriptor Groups, Scope Notes, UF/USE References, Narrower Terms, Broader Terms, and Related Terms. The purpose and use are described for each of the four sections of the ERIC Thesaurus: Alphabetical Display, Rotated Display, Hierarchical Display, and Descriptor Group Display. Discussions are provided on the use and control of educational terminology, both generally and within the context of the decentralized ERIC Clearinghouse network. Other details are included on the historical development of the ERIC Thesaurus, as well as the present-day Vocabulary Development Program that is involving all ERIC components and users in the ongoing activities of the Thesaurus development. Descriptors—Databases, Documentation, Information Retrieval, Information Storage, *Lexicography, Library Technical Processes, *Subject Index Terms, *Vocabulary Development Identifiers—*ERIC, *Identifier Authority List

Comprehensive rules, guidelines, and examples are provided for use by ERIC indexers and lexicographers in creating and using Identifiers, and in developing and maintaining the ERIC Identifier file via the "Identifier Authority List (IAL)." Identifiers and the IAL are defined/described: Identifiers are highly specific entities, including most proper nouns/noun phrases, for which Thesaurus control is

unnecessary—they may also be new concepts, under consideration, or awaiting approval, for admission to the ERIC Thesaurus; the IAL lists all current Identifiers and serves as a companion volume or supplement to the Thesaurus. An initial discussion presents general guidelines/rules applying to all Identifiers (e.g., capitalization, punctuation, length, word form). This is followed by detailed instructions relating to each of twenty specific Identifier categories: Conferences/Meetings; Curriculum Areas; Equipment; Facilities; Geographic Locations; Groups (Ethnic); Groups (Occupations); Groups (Other); Health-Related; Historical/Special Events; Languages/Linguistics; Laws/Legislation; Methods/Theories; Miscellaneous; Organizations/Institutions; Personal Names; Projects/Programs; Science and Technology; Tests/Testing; Titles (Literature and the Arts). Advisory Committees to the Humanities: A Handbook. Topical Paper, Number 74.

ERIC Clearinghouse for Junior Colleges, Los Angeles, Calif.

Spons Agency—National Inst. of Education (ED), Washington, D.C.

Pub Date—81

Note—29p.

Pub Type—Guides - Non-Classroom (055) — Information Analyses - ERIC Information Analysis Products (071)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Advisory Committees, Community Colleges, *Group Activities, *Group Dynamics, Group Membership, Group Structure, *Humanities, *Lay People, *School Community Relationship, Two Year Colleges

This handbook offers guidelines to community colleges interested in the formation of advisory committees to the humanities. It begins by outlining the purposes and functions of such groups. It then emphasizes the importance of faculty and administrative support for advisory committees and suggests evidence that can be presented to promote this support. After several examples are cited of ways in which lay advisory committees have been initiated at community colleges, the paper identifies several components of effective planning efforts and discusses the functions of a planning group made up of concerned faculty and administrators. Next, the selection, characteristics, membership rotation, and size of the advisory committee are discussed, and the roles and functions of key committee members are examined, including the chairperson, secretary, and community college representative. The next sections of the guide suggest questions that should be addressed as the committee establishes its annual program of work and recommend possible committee activities in the areas of student recruitment, follow-up, and continuation; instruction; instructor quality; and community outreach. Next, guidelines are presented for conducting effective committee meetings and criteria are recommended for evaluating the meetings. In conclusion, the paper recommends additional bases for judging the effectiveness of advisory committees. Sample agendas and a list of additional resources are appended. (AYC)

Descriptors—*Community Colleges, Mass Media, Needs Assessment, Program Effectiveness, *Publicity, *School Holding Power, Student Attrition, *Student Recruitment, Two Year Colleges Identifiers—*Educational Marketing

This collection of essays examines the role of marketing in the recruitment and retention of community college students. First, Philip Kotler and Leslie A. Goldgehn define the marketing process and assess its potential benefits. Richard C. Richardson, Jr., and Donald S. Doucette question the effectiveness of marketing in the community college. Callie Foster Struggs considers the importance of community impact studies. Anne Mulder-Edmondson proposes the inclusion of the entire college community in the development of a marketing plan. The promotion of a marketing plan via the printed media is described by Barbara A. W. Smith, while Robert H. Gaffner examines uses of the electronic media in marketing. The process of identifying target populations through segmentation is discussed by William A. Keim. Wallace F. Cohen and Jeanne Atherton describe the successful marketing of an afternoon program. Edwin R. Bailey explores the potential for coordination with universities in the development of a marketing plan. Don G. Creamer and E. G. Akins examine the effects of marketing on student development activities. Marybelle C. Keim reviews strategies for student retention. James F. Gollatschek poses some potentially negative effects of marketing and means to avoid them. Gunder Myran and Mark Ralph evaluate marketing practices in community colleges. Finally, Donna Dzierlenga reviews the ERIC literature dealing with community college marketing. (HB)

This monograph provides a comprehensive overview of community college education in the United States. Chapter I reviews the social forces that contributed to the development and expansion of community colleges and the continuing changes in institutional purposes. The changing patterns of community college student characteristics are the focus of Chapter II. Chapter III examines the faculty-related issues of full- and part-time staff, tenure, salary, workload, modes of faculty evaluation, professional associations, and teacher preparation. After Chapter IV explores changes in college administration with respect to institutional size, collective bargaining, available funds, and locus of control, Chapter V describes the various funding patterns used to finance community colleges. Instruction is considered in Chapter VI with focus on learning resource centers and the stability of instructional methods which has been maintained in spite of the introduction of new technologies. Chapter VII explores student services and personnel functions. Chapters VIII, IX, and X consider the positions of career, compensatory, and adult education in the community college curriculum. Chapter XI looks at the rise and fall of liberal arts education in the curriculum. Chapter XII traces the development of general education curricula, and Chapter XIII examines the social role of the community college. An annotated bibliography of major publications in the field is appended. (HB)

Identifiers—*Los Angeles Community Colleges CA

In an effort to promote greater student participation (especially among women and minorities) in science courses and programs, a study of science education in the Los Angeles Community College District was conducted. The primary objectives of the study were, first, to describe students' course-taking patterns, science background, and attitudes toward science; second, to identify institutional patterns that enhance science enrollments and course completion; and third, to describe intervention strategies that will increase student participation in science. Information for the study was gathered through an analysis of 8,873 student transcripts; a survey of 6,425 students in 268 courses; a survey of 268 instructors; a curriculum analysis; and interviews with 65 administrators, science faculty, and counselors. Selected findings from these activities include: (1) just over 40% of the students completed one or more science courses; (2) withdrawals accounted for 32% of student grades in their first science course; (3) the majority of student respondents had not been encouraged to enroll in science classes in high school or college; and (4) there were large discrepancies between students' career objectives and the courses in which they enrolled. Based on the study, expanded recruitment efforts, redesign of curricula to reflect student objectives and abilities, increased retention efforts, and improved faculty development programs were recommended: (Survey instruments are appended.) Identifiers—Higher Education Management Institute

The essays in this collection focus on various aspects of organization development (OD) and its application in educational institutions. First, Jim Hammons provides an overview of OD and its value to the community college. Then, Richard Woodman

and William Muse describe techniques and methodologies that have been successful in improving work group or organizational effectiveness and examine private sector experiences with OD as they relate to the community college. Glenn Vatney then reviews the history of OD and identifies professional issues. Next, David Kest describes a project of the Higher Education Management Institute (HEMI) which designed a management development and training program for colleges and universities. Characteristics of a successful OD intervention are considered by George Baker, who details the results of a National Institute for Staff and Organizational Development project, which sought to improve teaching and learning in the community college through an OD approach. The advantages and limitations of survey feedback, a widely used OD strategy, are explored by Gordon Watts, who outlines the survey feedback process and provides an annotated list of available instruments. Byron McClenny stresses the role of the college president in a successful OD program. Finally, an annotated bibliography of ERIC documents and journal articles about OD is provided. (KL)

Descriptors—Accountability, College Administration, *Community Colleges, *Educational Benefits, Educational Economics, Educational Finance, *Government School Relationship, Institutional Research, *Outcomes of Education, School Business Relationship, Two Year Colleges

Identifiers—*Impact Studies

The essays in this collection examine the outcomes or benefits of community colleges with respect to specific constituencies; discuss the impact of the policies, programs, and needs of external agencies on the colleges; and consider methods by which educational outcomes can be improved and measured within the institutional setting. After introductory material, Dorothy Linthicum describes the social and economic gains experienced by community college students. Next, Timothy Fidler examines the impact of community college programs on business and industry through the preparation of a trained labor force. James Gollattscheck then assesses the social and economic benefits of 2-year college education to the community and presents three case studies exemplifying ways in which impact studies can be conducted. After Paul Wing's description of emerging relationships between community colleges and state agencies and strategies for improving college impacts on these agencies, Joseph Cosand and Mary Jane Calais discuss the same issue focusing on impacts at the federal level. Alfons Van Wijk then considers the relationship of sound management and faculty and staff job satisfaction with institutional outcomes. Next, Richard Alfred presents a model for assessment that can be used to improve college programs and enhance funding prospects. Finally, Jack Friedlander reviews ERIC documents concerned with measuring the economic and educational benefits of community colleges. (HB)

This series of Junior College Resource Reviews focuses on the community college's role in literacy development. After Roger Yarrington's overview of the topic, Robert McCabe and Susan Skidmore consider "The Literacy Crisis and American Education." In light of the changing nature of work and the severe decline in the communication skills of youth, the authors urge a careful examination of the current social environment and a realistic redesign of the educational system. "Literacy and Allied Health Programs," by Robert Parilla, identifies the knowledge and skills necessary for the delivery or support of health care by technicians. Next, Florence Braver, in "Literacy, Transfer, and Effectiveness: The Community Colleges' Accelerating Mission," reviews research and other literature dealing with issues and approaches to developmental/remedial education, special compensatory programs, attrition and achievement, counseling, evaluation, common problems, and available options. Arthur Cohen then recounts "Ten Criticisms of Developmental Education" and responds to each. Jack Friedlander, in "Coordinating Academic Support Programs with Subject Area Courses," describes successful programs integrating basic skills instruction into the regular curriculum. Finally, Richard Richardson and Elizabeth Fisk, in "Literacy in the Community College," review a study of the use of written language in the classroom and in student services and of administrative priorities and strategies influencing literacy. Descriptors—*College Planning, *College Role, *Community Colleges, *Community Services, Curriculum Development, Educational History, *Educational Objectives, Financial Support, Leadership, *Program Development, Two Year Colleges

In an effort to reinforce the central role of community services in the comprehensive community college, this monograph examines the history, mission, role, and funding of community services and provides recommendations for continuing and increasing the integration of such services within the community college. Chapter I provides a historical overview of the public service mission of higher education in the United States. Then, Chapter II examines community services in relation to other college missions and argues for a clear definition of community services, a reexamination of its mission, and the development of a consensus and commitment to its continuation by the college community and policy makers. After Chapter III discusses the development of community service programs, ways of bringing them into the mainstream of the college, and the advantages of developing a central theme for community services and the college, Chapter IV outlines the funding practices of various states and suggests alternative sources of funding for community service programs. Chapter V identifies the role of institutional, local, and state leaders in gaining widespread commitment to the community service function. Finally, Chapter VI offers recommendations for the establishment of priorities, an operational definition of community services, and a uniform system of data collection; for the development of a curriculum-based program of services and activities; and for the adoption of a more active stance on the question of community

services. (HB)

Descriptors—Classroom Environment, Classroom Techniques, *Environmental Influences, Literature Reviews, *Outcomes of Education, *Preschool Children, Preschool Curriculum, Preschool Education, *Student Behavior, *Teacher Behavior, *Teacher Influence, Teacher Role, Verbal Communication

Through a selective review of the research literature this paper explores the relationship between teacher behaviors and children's behaviors. Both direct and indirect teacher effects on children's

behaviors are reviewed. First, studies of verbal behavior, instructional role, management techniques, classroom structure and teacher behavior, participatory teacher role, and adult effects on finisocial behavior as well as comprehensive studies of teacher behavior are reviewed in the section focusing on direct teacher effects. Studies of indirect teacher effects related to classroom organization and space, initiation of contacts with children, activity settings and scheduling, access to materials and toys, and closed versus open structure settings are reviewed in the second section. The concluding section of the paper indicates in summary form the types of teacher behaviors which appear to be associated with specific child outcomes. (Author/RH)

Identifiers—Parenting, *Toddlers

This annotated bibliography provides references of practical use to those concerned with infant/toddler caregiving. While many of the works cited concern quality group care for infants and toddlers, some works cited deal specifically with parenting, the parent/child relationship, and activities parents may share with their very young children. In general, extensive references giving broad advice on the topic of child rearing have not been included. References concerning the entire preschool age span have been cited only when they are especially relevant for infant/toddler educators. Contents are organized in four topical sections: (1) background references to infant/toddler care and development; (2) testing and evaluation of infant/toddler development and education projects; (3) caregiver training and curriculum materials; and (4) concerns for those involved in infant/toddler caregiving programs. Citations preceded by an asterisk indicate documents available through the Educational Resources Information Center (ERIC) collection. Appended material describes how to obtain ERIC documents and lists the addresses of each of the 16 ERIC Clearinghouses. (Author/RH)

Descriptors—*Child Development, Dramatic Play, Early Childhood Education, Guidelines, *Individual Differences, *Kindergarten Children, Literature Reviews, *Play, *Preschool Children, Preschool Curriculum, Pretend Play, *Teacher Role, Theories

This paper provides an extensive discussion of children's play, including examination of theoretical,

cal, developmental, measurement, and classroom or playgroup perspectives for teachers of children between the ages of 2 and 6 years. The first section offers a brief overview of theories of play and describes several distinguishing features of play, such as intrinsic motivation and attention to means rather than ends. The development of play behavior is discussed in the second section. Specific attention is given to sensorimotor play and, more extensively, to aspects of symbolic play such as self/other relationships, object substitution, and dramatic and constructive play. The third section discusses factors contributing to individual differences in play behavior: handicaps, gender, and childrearing influences. Suggestions as to how teachers can facilitate children's play are given in the fourth section; in addition, the problem of justifying the inclusion of play in the preschool curriculum is discussed. Descriptors—*Aesthetic Education, Age Differences, *Child Development, *Children, Cross Cultural Studies, Early Childhood Education, *Individual Differences, Interviews, Literature Appreciation, Literature Reviews, Music Appreciation, *Research Methodology, Testing, Theories, Visual Arts

Identifiers—Aesthetic Judgement, *Aesthetic Response

Current knowledge and practice relating to young children's aesthetic development and education are reviewed in this state-of-the-art report. Beginning with a brief section highlighting theoretical problems and approaches to the psychological study of aesthetic response, the review subsequently describes three common strategies used in aesthetic research: the general methodology for experimental aesthetics, tests of aesthetic sensitivity, and the structured interview method. The third and largest section of the paper reviews a selection of arts studies concerning aesthetic development and education. The studies reviewed are organized into three clusters of research activity: (1) developmental studies emphasizing age-related trends in aesthetic response, (2) studies concerned primarily with individual and group differences in aesthetic response (excepting age), and (3) deliberate attempts to influence the course of aesthetic growth and development. Developmental studies reviewed include investigations of children's aesthetic response to stimulus complexity as well as their aesthetic discrimination and judgement. The discussion of intervention research focuses on aesthetic response training studies in addition to broader programmatic interventions. It is noted that all three streams of research activity are predominately oriented toward the visual arts. However, research focusing on music, literature, and related art forms is also discussed. Descriptors—Advocacy, *Current Events, *Early Childhood Education, *Federal Regulation, Foreign Countries, Government Role, History, *Political Issues, *Public Policy, *Social Change Identifiers—Australia, *Ideology, Interest Groups

People working in the area of early childhood, either as practitioners or as advocates, are often faced with the task of trying to make sense of federal and state policies. Adopting the approach that an historical perspective is necessary in order to understand the social context in which change or attempted change occurs, this paper presents a history of Australian events to illustrate variations in policies for young children and to sort out some of the factors that lie behind these variations. It is proposed that two factors contribute to such variations: one such factor has been termed "ideologies," describing the values people adopt, the categories within which they think, and the kinds of evidence or argument they find convincing. The second factor has been termed "the resources of interested parties," referring to the facilities available to the people seeking change or to the people who need to be persuaded. Four specific historical events which occurred in Australia during the 1970s illustrate these two factors; further conditions affecting the making and unmaking of policy are discussed. (MP)

Descriptors—*Behavior Change, *Educational Trends, *Parent Education, *Program Design, *Program Effectiveness, Program Improvement, Standards, *Teacher Role Identifiers—*Parenting

Questions about the effectiveness of parent programs are addressed in this paper, which is based on the premise that an important step toward improvement is the identification and clarification of assumptions which prompt and sustain specific program structure and operations. Selected major assumptions about the ways in which programs attempt to influence parents are discussed, and three dimensions of parent programs are examined in order to identify the relationship between prevailing assumptions and program practices: the expertise and role of the professional in working with parents, the development of program standards of good parenting, and conceptions of how parents change. As a preface to the analysis of these areas, current trends and developments in the parent education field are considered. (MP)

Identifiers—Culturally Different Students

The over-representation of minority group children, particularly Mexican Americans, in special education has been well documented. The use of standardized, norm-referenced, psychological assessment measures has created obstacles to the advancement of minority group individuals in American society. This is especially true since results from such measures are used as indicators of future accomplishments. The need for integration of cultural and linguistic characteristics into psychological assessment instruments is the challenge facing special education today. Although recent theoretical developments appear promising in terms of educational practice, they can only be as effective as those practitioners who apply the knowledge at the individual level. Therefore, the aspect of training becomes increasingly important, especially with the rapid development of theoretical and empirical knowledge concerning the educational achievement of minority group students, particularly Mexican Americans. Descriptors—*Administrator Responsibility, Career Guidance, Curriculum Development, Declining Enrollment, Inservice Education, Minority Groups, Office Management, *Personnel Management, Population Growth, *Principals, Professional Associations, *Professional Development, Program Evaluation, *Rural Education, Rural Schools, Scholarly Journals, *School Community Relationship, Special Education, Special Programs, Student Evaluation, Teacher Persistence

A review of relevant available literature divides the functions of rural principals into six categories (instruction/curriculum leadership, personnel guidance, school/community relations, administrative responsibilities, evaluation, professional improvement) and provides suggestions on helpful material for each. Recent research on principals and efforts concentrating on rural schools are briefly described. The section on instructional/curriculum leadership cites four perspectives on the topic, discusses the status quo and solutions, lists helpful books, and describes material for rural programs for students with special needs (gifted/talented, bilingual/non-English speaking, migrant/racial minority students; early childhood education; special education). Under personnel guidance, staff consideration (development, inservice training) and student consideration (career materials, discipline) are covered. The school/community relations chapter considers political skills, problems and dilemmas, community ownership of schools, and rapid growth. An evaluation section describes literature on evaluating student progress and effectiveness of programs. Under administrative responsibilities (primarily coordination) general handbooks for principals and some works on topics of importance to rural principals (rapid growth, declining enrollments, time/resource management, service agencies) are evaluated. The professional improvement section covers organizations, journals, inservice education, and other materials of interest. A major conclusion is that material specifically intended for rural principals is very scarce. (MH)

Descriptors—*Adjustment (to Environment), American Indian Education, *American Indians, *College Transfer Students, Higher Education, *Student College Relationship, *Student Needs, Student Placement, *Student Responsibility, Transfer Policy, Transfer Students

The first in a 3-part series developed to assist the American Indian student in transferring successfully from a 2-year community college to a 4-year college or university, this handbook consists of 4 sections which answer the following questions: How do I prepare to transfer to a 4-year college or university? What must I do after the college/university has officially accepted me? How do I choose my courses and instructors? What can I do to insure success? Section I identifies sources of information (college advisors, professionals in the chosen field of study, school directories, tribal education offices), factors affecting the choice of institution (success of other Indians at the school, acceptance of transfer credits, presence of Indian faculty and courses, distance from home), and steps necessary prior to transferring. Section II provides suggestions for budgeting, housing, transportation, food, clothing and household necessities, and additional income after the college/university has accepted the transfer student. Section III recommends working closely with an advisor to plan a course of study to meet all graduation requirements. Section IV outlines elements important to college success: study habits, use of libraries, planning social life, and taking care of mind and body. (NEC)

Descriptors—Adjustment (to Environment), *American Indian Education, *American Indians, *College Transfer Students, Culture Conflict, *Family Involvement, Higher Education, Parent Attitudes, *Parent Participation, Parent Role, Parent School Relationship, *Parent Student Relationship

The second of a 3-part series to assist American Indian students to transfer successfully from 2-year community colleges to 4-year colleges or universities, this handbook is designed to help parents understand what their son or daughter is experiencing at college and to provide specific suggestions for parents and family to help the student be successful. Section I, understanding the college/university student, discusses homesickness, participation in school activities, demands on students' time and money, and conflicts over leaving family responsibilities. Section II, understanding college/university requirements, emphasizes the importance of complying with school deadlines (attending classes, writing papers, taking tests); maintaining grades; establishing healthful eating, exercise, and social habits; and becoming financially responsible. Section III suggests that parents can help students be successful by recognizing that the decision to attend college is honorable; having special family and/or

tribal celebrations to show pride in the student's accomplishments; maintaining regular contact through letters, telephone calls, and visits; and encouraging and supporting the student's own decisions. Section IV explores dimensions of the future for successful students, including employment both in and outside the Indian community, the honor brought to the family through the successful graduate, and the challenge to provide an example to Indian youth. Descriptors—Adjustment (to Environment), American Indian Education, *American Indians, *College Transfer Students, *Counseling Services, Counselor Attitudes, Counselor Client Relationship, *Counselor Role, *Educational Counseling, Helping Relationship, Higher Education, Student Characteristics, *Student Needs

The last of a 3-part series, this handbook is designed to assist counselors in helping the American Indian student transfer successfully from a 2-year community college to a 4-year college or university. Section I characterizes the American Indian transfer student as being older than the average transfer student, likely to have a spouse and family, likely to be leaving a home community or reservation for the first time, and having conflicts about his relationship as an Indian in the majority culture. Section II describes assistance the counselor can provide in the areas of admissions, financial aid, budgeting, housing, and career counseling. Section III emphasizes the importance of the attitudes of the counselor toward the transfer student, the powerful influence for success the counselor can have on the student, and the need to be straightforward and honest in communicating with the student. Section IV suggests ways the counselor can help the student handle discrimination. Section V recommends that counselors of Indian students be involved with the school's Indian Club or other organizations for Indian students on campus. The handbook also contains an annotated list of 8 documents, all available in microfiche and/or paper copy through the ERIC system, which counselors may find useful. (NEC)

Descriptors—*Advisory Committees, *Confidentiality, Educational History, Educational Legislation, Federal Regulation, Glossaries, *Migrant Education, Parent Grievances, *Parent Responsibility, Parent Role, *Parent School Relationship, Student Records

Identifiers—Elementary Secondary Education Act Title I, Family Educational Rights and Privacy Act 1974, Migrant Student Record Transfer System, *Parent Advisory Councils, *Parent Rights
Written in English and Spanish, the handbook is intended to (1) provide useful information from numerous sources to school administrators, education

program staff, and home-school liaison personnel; and (2) assist school staff in informing migrant parents about their rights and responsibilities, both as members of parent advisory councils (PACs) and as individuals, in their children's education. Topics include: the history of the Elementary and Secondary Education Act Title I, the Migrant Amendment, and the PACs; migrant education regulations pertaining to client identification and the Migrant Student Record Transfer System; the role of parents and the PACs in migrant education; how parents can demand their rights; parents' responsibility as members of the PAC; complaint procedures if the migrant education program is not providing adequate services; the parents' right to inspect their child's school records; the right of other individuals to migrant children's records; records maintained by the school on migrant children; and parents' rights if the privacy of their children's records is violated. The handbook includes a question-and-answer section, three examples of written complaints, a glossary of terms commonly used in migrant education, a list of references used in the handbook, and a 6-item bibliography of other useful publications. Written in Spanish, this booklet explains how to start an ERIC collection in a library or information center. Three levels of collections are described: minimal, intermediate, and complete. A minimal collection is discussed in terms of the necessary materials (Resources in Education—RIE, Current Index to Journals in Education—CIJE, Thesaurus of ERIC Descriptors), physical requirements, equipment, foreign and domestic estimated costs, and access to actual copies of RIE documents and journal articles. The ERIC microfiche collection, physical requirements, equipment, and domestic and foreign estimated costs involved in starting an intermediate collection are described. A complete collection is discussed in terms of the costs and one of its components (computer search services). Three ways an agency can offer computer access to ERIC are described: another agency runs the search, the agency contracts with a commercial vendor and runs the searches itself, or the agency purchases the ERIC-TAPES and runs the searches on its own computer. Directories, indexes, and other tools which can enhance any collection, and ERIC training and orientation materials are briefly described. A listing of the ERIC clearinghouses and their locations conclude the booklet. (NQA)

Written in Spanish, this booklet describes the ERIC (Educational Resources Information Center) system, who uses ERIC and why, and how to use ERIC. Brief descriptions of the 16 clearinghouses and the services of the ERIC Processing and Reference Facility, ERIC Document Reproduction Service, Oryx Press, and the U. S. Government Printing Office are provided, along with their full addresses and telephone numbers. Following a discussion of the three basic reference tools which are used to locate information in the ERIC data base—Resources in Education (RIE), Current Index to Journals in Education (CIJE), and the Thesaurus of ERIC Descriptors—are step-by-step examples of a manual search and a computer search. How to obtain copies of documents and articles cited in RIE and CIJE, and how to submit materials to the ERIC data base are discussed. A copy of the Reproduction Release form, which grants ERIC permission to reproduce and disseminate the document, is included. Other print and micrographic products to facilitate user awareness of and access to information in the ERIC data base are grouped according to the organization from which they are available and briefly described. Order forms for each organization conclude the booklet. (NQA)

Presented are materials related to the work of the Number and Measure and Rational Numbers working group of the Georgia Center for the Study of the Learning and Teaching of Mathematics. Much of the content reports on attempts to bring constructs from developmental psychology and mathematics to bear in understanding children's ideas of number and measure. The reports included are thought to reflect a stage in a sequence of work, and are presented as a bridge between some of the ideas developed at a 1975 conference and on-going work. Seven individual research reports in mathematics education are included: (1) An Explication of Three Theoretical Constructs from Vygotsky; (2) Quantitative Comparisons as a Readiness Variable for Arithmetical Content Involving Rational Counting; (3) Language and Observation of Movement as Problem Solving Transformation Facilitators Among Kindergarten and First-Grade Children; (4) Aspects of Children's Measurement Thinking; (5) The Rational Number Construct, Its Elements and Mechanisms; (6) Seventh-Grade Students' Ability to Associate Proper Fractions with Points on the Number Line; and (7) The Relationship of Area Measurement and Learning Initial Fraction Concepts by Children in Grades Three and Four. ematics Instruction, *Models, Problem Solving, Psychological Characteristics

The papers contained in this document were originally presented at the May 1978 conference on Modeling Mathematical Cognitive Development sponsored by the Models of Learning Mathematics Working Group of the Georgia Center for the Study of Learning and Teaching Mathematics. Most have been revised to reflect comments and suggestions made at the meeting. The view of models presented includes the thinking of representatives of psychology, science, educational psychology, and philosophy, as well as mathematics educators. The efforts of those/outside of mathematics education towards modeling as represented in this work are seen to be of great assistance in moving towards better models. Individual papers are titled: (1) What is a Model? Modeling and the Professions; (2) The Conception and Perception of Number; (3) Cognitive Microanalysis: An Approach to Analyzing Intuitive Mathematical Reasoning Processes; (4) An Information Processing Approach to Research on Mathematics Learning and Problem Solving; and (5) Reflections of Interdisciplinary Research Teams. Reactions to the first four titles are included. (MP)

The 1982 Yearbook of the Association for the Education of Teachers in Science (AETS) is the second in a series of three AETS yearbooks in which Ralph Tyler's 1949 curriculum rationale is used to analyze science curriculum. This publication is focused on the secondary school science curriculum (the 1981 yearbook was concerned with teaching science to middle school students). The 1982 Yearbook is divided into three major sections. Section I contains an examination of Tyler's model as it relates to the current status of science education, which is also discussed in this section. Section II contains six chapters whose authors have used Tyler's model to examine specific aspects of the science curriculum: scientific literacy, problem solving, student motivation, social and political factors affecting the science curriculum, and changing instructional practice, as well as implications for continuing education for science educators. Identifiers—*Environmental Education Research

This publication contains summaries of items on the literature related to environmental education research found in professional journals, doctoral dissertations, and the fugitive literature. The fugitive literature was obtained primarily through a search of ERIC materials. The publication was prepared by the National Commission on Environmental Education Research of the National Association for Environmental Education in cooperation with ERIC/SMEAC. Summaries are listed by type of literature (journal and yearbook papers, dissertations, and fugitive literature). Descriptor and author indexes are included. While the documentation efforts of these groups are continuing, this is the most complete single reference to literature on environmental education research available at this time for the years 1971-1980. This document consists of eleven bulletins which present answers to questions about research on the teaching and content of elementary school mathematics, K-8. The bulletins are revisions of a set originally published in 1970 and revised in 1975. Specific research findings on eleven topics are cited with selected references. Titles are: (1) Attitudes and Anxiety; (2) Organizing the School Program for Instruction; (3) Promoting Effective Learning; (4) Differentiating Instruction; (5) Instructional Materials and Media; (6) Addition and Subtraction with Whole Numbers; (7) Multiplication and Division with Whole Numbers; (8) Rational Numbers: Fractions and Decimals; (9) Measurement, Geometry and Other Topics; (10) Verbal Problem Solving; and (11) Planning for Research in Schools. The material is indexed by the questions answered in the bulletins as an aid to reference. (MP)

Suggestions for using four-function calculators, programmable calculators, and microcomputers are considered in this collection of 36 articles. The first section contains articles considering general implications for mathematics curricula implied by the freedom calculators offer students from routine computation, enabling them to focus on results and relationships, and is balanced by Section Two, exploring inappropriate ways calculators can be used. Freedom from thinking about routine calculations provides freedom for thinking about problem solving is the theme of Section Three. Articles in Section Four include some specific lesson ideas for using calculators in the classroom. Section Five focuses on programmable calculators. Section Six contains articles which consider ways in which microcomputers can be introduced into schools, addressing physical, economic, and political issues. Section Seven explores implications of the computer on mathematics curricula, considering both new topics and new approaches to old topics (such as computer assisted instruction). Computer literacy is the theme of Section Eight, suggesting that although all students need to know about computers, "what" they need to know is debatable. The ability to simulate real-world events (computer simulations) is considered in the final section, suggesting that this ability opens new areas for mathematical exploration. (Author/JN)

This issue of Investigations in Science Education contains articles about attitude research in science education. It contains the critiques of nine articles about attitude research as well as three responses to critiques. One response relates to a critique published in an earlier issue while the other two responses are paired with the critiques that provoked the response. One critique-response pair relates to attitude research; the other pair, to research related to cognitive development. Topics related to attitude research vary and include attitude assessment as well as studies of the effects of attitudes of students on instruction in science. (PEB)

This is the 12th annual listing of research on mathematics education. The research noted is alphabetically organized by author(s) within the following three categories: (1) research summaries; (2) journal-published reports; and (3) dissertation abstracts. Grade or age level is indicated for each reference. Included in the listing are studies in which mathematics education was not the sole or primary focus of research. While most of these peripheral studies are not annotated, those specific to mathematics are. Most annotations indicate one principle finding of the study. A list of the journals searched is provided, and the number of references from each cited journal is noted. An index of general topics is appended to help readers locate studies of particular interest. (MP)

Identifiers—Cognitive Preference, *Science Education Research

Abstractor's analyses of science education research studies are presented in this issue of Investigations in Science Education. The first group of studies relates to research on teacher education (priority of perceived needs common to science teachers and how these might be used to develop inservice programs, determining the level of awareness and use of population education materials by teachers, and behaviors of preservice elementary teachers attempting to acquire science process skills). The second group focuses on achievement (teaching-learning model used with culturally deprived students and predicting success of college biology students using the Cloze test). The third grouping focuses on cognitive variables (mathematical model of concept learning applied to science instruction, cognitive preferences of talented science students, relationship between academic performance and school-related affective characteristics of 12-year-olds, and modification of cognitive style of graduate students). Studies addressing the effect of women students in engineering on their institution's resources (Do women engineering students present different problems for their colleges/universities than do male students?), science interests of junior high school students, and science needs assessment for use with elementary school teachers are analyzed in the final section. Descriptors—*Content Analysis, Elementary Secondary Education, *Instructional Materials, Media Selection, Nonprint Media, Resource Materials, *Social Studies, Supplementary Reading Materials, Textbook Content, Textbook Evaluation, Textbooks, Textbook Selection

This publication contains analyses of elementary and secondary social studies textbooks, supplementary classroom materials, and teacher resource materials. The purpose of the publication is to provide analyses of curriculum materials which will allow K-12 school teachers, administrators, curriculum coordinators, and college methods teachers to select materials which are appropriate to their students, schools, and community. The kind of information provided in each analysis includes purpose, intended users and uses, content, and teaching methods. Some evaluative information is also included. The analyses of curriculum materials are divided into sections by grade level. The first major section of the book describes elementary textbooks and multimedia or supplementary materials. The second major section of the book is devoted to the secondary (7-12) curriculum. Textbooks are analyzed along with filmstrips and other supplementary materials. The third section includes short analyses of teacher resource materials, most of which provide practical suggestions and ideas for classroom teachers. The fourth section contains abstracts of ERIC documents. There are several indexes to the publication—author/editor/developer, grade level, publisher, and subject area. The publication concludes with a list of publishers' addresses. (Author/RM)

This book is designed to provide elementary school teachers with information, suggestions, and models for using writing in the social studies, from early primary to middle grades. There are four major chapters to the book. Chapter I is titled "Research on the Teaching of Writing." The articles in this first section move from a survey of research in writing to a survey of classroom practice in the use of writing in elementary school social studies and finally to a specific classroom study that integrates the two areas and presents specific implications for the study and teaching of writing. Chapter II is titled "Developing Readiness in Writing." The first two articles stress two important aspects of a classroom environment that nurtures and supports student writing. The remaining five articles describe techniques such as interviewing, exploring the past, and brainstorming that teachers can use to initiate writing. The title of Chapter III which contains seven articles is "Using Writing to Learn Social Studies Content." The articles describe ways in which writing can be used to help students learn social studies information or develop social studies generalizations. Another describes how writing can be used to conduct simulated field trips in the social studies classroom. The title of Chapter IV is "Combining Writing with Social Studies." Discussed are three essential supports for a successful program: a detailed curriculum guide, inservice teacher training, and cooperative teacher/administrator assessment procedures. The book also cites related resources in the ERIC system. (Author/RM)

The purposes of this teaching handbook are to provide building blocks necessary for developing a course of study for secondary students in economics and to present resources and references. It is arranged in seven sections. An introductory section describes some economic organizers—the models structure and methods of analysis—that are useful for high school teaching. Section two gives short summaries of the major approaches and rationales for teaching economics, and of different schools of economic thought. Section three describes different approaches to teaching and highlights the importance of motivating students. A series of teaching strategies involving students in active learning is the focus of section four. Section five offers some guidelines for examining economics curriculum materials and reviews a number of resources that form the basis of an economics teacher's personal library. Organizations that offer resources and services for economic educators are identified in section six. The final section provides a selective list of up-to-date resources in the Educational Resources Information Center (ERIC) data base. (Author/NE)

Identifiers—Chicanos, *Ethnic Heritage Studies Program

Selected materials produced by Title IX Ethnic Heritage Studies Program projects, funded from 1974 through 1978, are evaluated in this catalog. The materials were selected by three panels of evaluators using three areas of criteria: (1) appropriateness for use in learning situations; (2) ethnic authenticity of content, and (3) technical quality for potential dissemination. An introduction describes the purpose of the evaluation project, development

of evaluation instruments, selection of panelists who evaluated materials, and process and results of the evaluation. One hundred and two projects (comprised of 438 pieces of materials) are evaluated. These evaluations are organized by state or territory and, within each state or territory, by the institution that received the grant. Headings for each entry include information on the project title and address, name of project director, ethnic group or groups on which the project focused, audience and grade level for the project, the project's subject (curricular) area, the format of the materials developed (i.e., print or nonprint), the amount of funding, the titles of materials accepted, and availability information for each piece of material. The heading information is followed by a description of the project materials. The final and major portion of the entry for each project presents evaluative comments and suggestions made by members of the three panels. Four indexes facilitate use of the analyses—ethnic group, geographic area, subject area, and materials titles. Appendices include evaluation instruments and a list of Ethnic Studies projects. A general evaluation model and workshop activities to help law-related education (LRE) project personnel develop and implement evaluation plans for their projects are provided. The model and activities, however, are applicable to other areas of the social studies as well. The first section of the handbook presents a model for evaluating LRE projects, giving an overview of the evaluation process and suggestions for planning and conducting an effective program evaluation. The second, and major, section includes specific activities that can be used to teach the concepts and skills necessary for effective evaluation of LRE programs. Detailed lesson plans are provided on a variety of topics, including how to determine priorities, how to state objectives, how to use Likert scales to evaluate student attitudes, how to use interviews to collect teacher and student data, and how to analyze and report data. An annotated bibliography of general evaluation resources concludes the handbook. Appendices contain sample agendas for evaluation workshops and a list of LRE projects that have developed instrumentation for use in their own evaluations. This list is keyed to the grade level/purposes for which the instrumentation was developed. (RM)

Selected and condensed portions of five reports prepared by Project SPAN (Social Studies Priorities, Practices, and Needs) are presented. The purpose of Project SPAN was to describe and assess the current and recent state of social studies/social science education, designate desired states to which social studies might or should aspire, and shape recommendations as to how those desired states might be approached. There are four sections. The first section, drawn mostly from the conclusion of an extensive report written by Hazel Whitman Hertzberg as historical background for the project, describes efforts to reform social studies during the period 1880-1980. The second section focuses on the current state of five critical elements in social studies programming and instruction: rationales, goals, and objectives; curriculum patterns; curriculum materials; teachers; and instructional practices. The third section, "The Future of Social Studies," describes in some detail the six major problems that SPAN staff and consultants believe need to be faced in the 1980s, the "desired states" toward which social studies educators might strive, and recommendations flowing from a comparison of current states and the problems associated with the desired states. The fourth section describes one of the several major alternatives to the current pattern of social studies considered by the SPAN staff and consultants. The alternative is a social roles approach to social studies. (Author/RM)

Descriptors—Beginning Teachers, Black Achievement, Black Colleges, *Black Education, *Black Teachers, Change Strategies, Educational Quality, *Educational Research, Elementary Secondary Education, Equal Education, Equal Opportunities (Jobs), Higher Education, Minimum Competency Testing, Schools of Education, *Teacher Certification, *Teacher Education, *Teacher Employment, Teacher Integration, Teacher Persistence, Teacher Qualifications

A survey of the literature on the issues and problems related to the preparation and survival of black public school teachers in the United States resulted in findings and recommendations in five areas. The first area considers literature on the underrepresentation of black teachers in public schools, studies on pupil/teacher ratios, expanded employment activities, declining enrollment and seniority systems, the declining quality of education, and minimum competency testing. Research literature in the second area is on the selection and preparation of black prospective teachers, the role of historically black colleges and universities, standardized testing for admission to schools of education, and special curriculum needs of black teachers. The third area of literature addressed the problems imposed on black beginning teachers, including initial certification and the National Teacher Examination, employment inequities, and special demands of schools and communities on black teachers. The effects of re-

search on black teachers and the need for a black perspective in educational research are the topics of the fourth area of literature. In a final section, 46 recommendations aimed at traditionally black colleges and universities, based on the readings cited in the literature survey, are presented. A list of 114 references on the topic of black teacher preparation, certification, and employment is appended. (1-C)

This document presents a qualitative research study and an annotated bibliography on the characteristics of superlative teachers. For "A Qualitative Study of Excellence in Teaching," Herbert Van Schaack selected and observed nine elementary and secondary school teachers and three college and university professors. The elementary and secondary school teachers were finalists or winners of National Teacher of the Year competitions, while the college professors were recipients of distinguished teaching awards at their respective institutions. The impressions gained from class observations and interviews with the teachers, their supervisors, colleagues, and students are recorded for each teacher in the form of a brief descriptive portrait. The teachers' attitudes were surveyed for perceptions of self, others, and teaching. In addition, analysis of the results of two behavioral tests are discussed, and the teachers' responses to questions about their careers, influential teachers, and major career obstacles are presented. Ten dimensions or characteristics held in common by the teachers are described, and the teachers' attitudes toward and suggestions for teacher education programs are listed. A synthesis of the study is offered, and nine references and the test instruments are appended. "The Search for Excellence in Teaching: An Annotated Bibliography" was compiled by I. David Glick from an initial collection of 1,300 articles. The 29 selected documents include journal articles, books, and papers written since 1971. The subjects range from first person accounts of memorable teachers to research studies and opinion pieces. A discussion of issues in effective teaching concludes the bibliography. (FG)

tics, *Teacher Education Programs, Teacher Qualifications

Identifiers—*University of South Carolina

A collaborative program between the University of South Carolina College of Education and Lexington County (South Carolina) School District Five provided gifted and talented students with a summer school session featuring acceleration and enrichment. Accompanying the program were graduate-level courses and practica for prospective teachers of gifted children and coordinators of programs for the gifted. The 1981 summer program consisted of six dimensions: (1) thinking skills and creative arts for kindergarten through second grade students; (2) study in graphics, dramatics, computers, photography, and the performing arts for fourth through eighth grade students; (3) field experiences for fourth through seventh grade students; (4) seventh grade seminars; (5) drama workshops for eighth through twelfth grade students; and (6) gifted education courses for teachers. A discussion of the fourth dimension of the summer program, the seventh grade seminars, describes criteria for identifying gifted students, and the general format of the program. The teacher practicum (sixth dimension) consisted of a series of formal and informal experiences that allowed the teachers to design and execute specific learning activities for gifted students. A profile of a gifted teacher is outlined and offers considerations of the personal and professional attributes that are necessary for a teacher of gifted children. A comparison is made of this program and similar programs at Purdue University, the University of South Florida, and three universities in England. Lesson plans for four curricular areas covered in the fourth dimension of the summer program are appended. (JD)

Descriptors—Contracts, *Court Litigation, Declining Enrollment, Economic Factors, Financial Policy, Financial Problems, *Fiscal Capacity, Institutional Autonomy, Personnel Policy, *Reduction in Force, *Retrenchment, *Teacher Dismissal, *Tenure

Tenured faculty can be dismissed for reasons of financial exigency. If the employment contract provides a specific definition of fiscal exigency and the processes to be used in effecting retrenchment, then those terms govern in lieu of constitutional due process. In the absence of such guidance, courts are willing to allow dismissal for reasons of financial exigency within certain limits. The institution as a whole need not be in an exigent condition to justify dismissal of some faculty, nor must the exigency extend to the endowment or real property of the institution. The institution has the burdens of proving not only financial exigency, but also that dismissal was motivated by the exigent condition. The institution must also show that its selection process was not arbitrary, capricious, or discriminatory. Tenured faculty who are to be dismissed for reasons of financial exigency must be notified and have an opportunity for a hearing before dismissal. Beyond these requirements, faculty have no constitutional right to participate in the retrenchment process. Dismissed faculty, if they are qualified, have the right to available positions in the institution, but in the absence of contract language they have no right to positions held by others and no right to retraining for available positions if they are not qualified at the time of dismissal. Thirty-six court cases are described and discussed in this monograph, and recommendations are made for adoption of legally acceptable policies and procedures for teacher dismissal at educational institutions. This document seeks to help deans and faculties of colleges and schools of education in the United States develop a global perspective for teacher education. The report explains the urgent need for a global approach to both the general and professional components of teacher education teaching and learning methods as well as clinical and practical training. The first section, "Global Realities," describes a frame of reference for global education, suggesting that rapidly changing relationships between countries, institutions, and people have created new global realities. In the second section, "The Rationale for Global Education," the case for introducing global education into programs for preparing teachers is presented. This rests upon the certainty of change and the need to redress deficiencies. Recommendations on global education are cited from statements by the National Council for Accreditation of Teacher Education and the American Association of Colleges for Teacher Education. The third section, "A Global Dimension for Teacher Education," describes the incorporation of a global perspective into teacher education from the standpoint of institutions, curricula, faculty, facilities, and resources. The final section presents suggested resources for help in developing a globally oriented program of teacher education. (JD)

 Identifiers—*Physical Education Teachers

This monograph relates the evolution, current status, issues, trends, and future perspective of undergraduate physical education teacher education (P.E.T.E.). The first section offers an historical overview of the profession. Preparation programs and curricula are described as they have progressed from the middle of the nineteenth century to the present, with a discussion of the increasing complexity of P.E.T.E. programs in response to changing educational philosophies. Societal influences on the development of curriculum for P.E.T.E. programs are considered in the second section, including government legislation, professional organizations, teacher preparation institutions, and employers and consumers. The third section deals with professional preparation curriculum in

P.E.T.E. programs as it has been expanded and altered to meet not only a more stringent certification requirements, but also the increasing trend toward specialization. The impact of the competency-based teacher education movement on P.E.T.E. is also discussed. Contemporary views on the role and the responsibilities of the physical education teacher are considered in the fourth section. In the fifth section a discussion is presented on the needs for further research in developing sound physical education curricula and the value of new teaching techniques in the field. The sixth section offers an overview of certification and accreditation of P.E.T.E. programs. In the final section a discussion is presented on strategies for changing P.E.T.E. and recommendations are made for improving certification requirements, curriculum content, and process and methodology. Further recommendations are made for clarifying the role of professional physical education organizations and improving the administration of P.E.T.E. programs. (JD)

 Identifiers—*Manuscripts

Because of the increase in the number of manuscripts submitted to journals, editors and publishers must either publish more manuscripts or increase the proportion of manuscripts rejected. Rejection decisions are usually informed by informal peer evaluation, editorial processes, and/or citation analysis. Unfortunately, no standard criteria for evaluation have been developed, and inter-referee agreement on the attributes of journal articles is generally low. The research on these issues is reviewed.  Identifiers—*Rasch Model

Some basic concepts of the one-parameter logistic latent-trait model, or the Rasch model, are presented. This model assumes that the probability of a correct answer to an item is a function of two parameters, one representing the difficulty of the item and one representing the ability of the subject. The purpose of this paper is to explain a mathematical-statistical solution to the problem of separating

the factor of item difficulty from person ability. Basic theory of specific objectivity, or basically a theory of unidimensionality, is stated that a city score should be measured at a time and all items should be brought in use to measure the same ability. Use of stochastic independence is assumed. The Rasch model is compared to other test theory models including classical test theory and other item response models. In relation to a concrete example, it is demonstrated how the parameters in the model can be estimated and how the assumptions of the model can be tested. Possible areas of application of the Rasch model are discussed. (Author) (JWD)

The original impetus for this monograph was a grant from the New Jersey Basic Skills Council of the New Jersey Department of Higher Education to evaluate two college basic skills remedial programs (one in a four-year state college, one in a two-year community college) and to produce a handbook for conducting such evaluations. This monograph is directed at a general audience. This is not a text on conducting program evaluation, it is a hat of evaluative activities. If combined with a text on evaluation which covered basic philosophical, theoretical, and design issues, this monograph would provide the "specifics" for translating generalities into the tasks which face the college basic skills program administrator who must actually conduct an evaluation. Examples used in the manuscript come from experiences in New Jersey and therefore do not provide a broad spectrum of studies geographically. At the end of this monograph is an annotated list of 32 studies conducted in colleges around the country. (Author/GK)

Doubts and misgivings have resulted from the rapid growth and diversity of experiential programs and the use of experiential learning assessment as a recruiting and marketing device. The Council for the Advancement of Experiential Learning (CAEL) is the body examining what is being done about setting standards for the assessment of experiential learning; this document represents CAEL's study approach to ascertain present practices, review the literature, filter the findings through author's experience with assessment, and develop principles that colleges and universities can use in establishing standards for assessing experiential learning. Ex-

personal learning, is divided into two main papers. (E) Provides information on the development of language and literacy and is divided into papers on language and public service, interactivity, cross-cultural experiences, and issues in curriculum development and effective approaches to curriculum development. (F) The section includes a bibliography on work in progress programming, life skills, phonics to help, and a list of community-based learning. (G) For more information, contact ERIC.

This collection of papers examines contemporary issues and problems in bilingual special education. The first paper, by Lizette A. Cantres, discusses Federal and State laws and regulations related to bilingual special education, with respect to litigation in the case of "Jose P." The problems of assessment of bilingual children under a monolingual testing system are examined in the second paper, by Rafaela E. Waffer; the author presents a study of twenty Hispanic children and explores issues raised by a

review of the literature. A third paper, by Frank J. Carr, Jr., discusses the importance of appropriate and learning Hispanic children who are tested to be accurately established. The fourth paper, by Robert M. Garcia, discusses the relationship between urban bilingual education and the use of mental health services among groups of Puerto Rican mothers and their elementary school children. The final paper, by the author, discusses the relationship between the current degree program in special education at Bank Street College of Education as a model for a similar teacher training program for a variety of special education professionals and the future of the field in a changing society. This paper explores factors which may account for the translation of research into educational policy through a case study. The case study was conducted jointly by the School District and Federal Reserve Bank of Philadelphia, Pennsylvania to determine what variables contribute to reading achievement. Students from grades one through four in twenty-five schools were selected to participate in the

study. The case study was conducted with parents and teachers and involved the use of a variety of data including teacher observations, student work, and the use of a teacher's classroom journal and the student's record of school activities. The process of planning and measuring the results of the study and the data analysis process are discussed. The findings of the study were associated with the process of policy formation involving the study of the topic. (E) Provides information on the use of a variety of reporting formats (6) for gathering data, the use of a process of preparation of papers and abstracts, the timing relationship of the study of the evaluation, and the role of the consequences of the study.

This collection of essays examines the issues which affect the educational, social, and economic status of Asian American and Pacific Americans. The first paper by Florence Yoshitani discusses the historical experiences and demographic characteristics of Japanese Americans, economic and educational stereotypes, and various multicultural and sea studies programs. A concluding section suggests the need for bilingual, bicultural programs and discusses Asian American studies programs at the secondary and university levels. The second paper by Kenyon Chan presents an overview of the educational program of Chinese Americans, focusing on demographic, cultural and learning characteristics. In the third paper by Bok Lim Kim, the future of Korean American children and youth is discussed in terms of marginality, biculturalism and the role of the American public school. Educational needs and attitude assessment of parents and teachers are examined. Federico Marcarana's paper examines the socioeconomic issues affecting Filipino Americans. Appendices include information on number of persons of Filipino origin in the United States by place of birth and language characteristics, social indicators of equity in education for Asian Americans, and an outline of educational needs and recommendations. The remaining papers by Vuong G. Thuy and Bella Zi Bell discuss the current status and educational needs of Indochinese and Hawaiians respectively. Each paper includes a bibliography. (JCD)

In this paper, the educational progress of Korean Americans is attributed largely to the effects of conflict between biculturalism and marginality. This report examines the educational needs and problems of Korean American children and youth with respect to demographic and historical characteristics

Descriptors: *Cultural Differences, Demography, *Educational Attitudes, Elementary Secondary Education, Hispanic Americans, Higher Education, *Immigrants, Needs Assessment, Social Characteristics, *Social Indicators, *Socioeconomic Status

This paper examines the socioeconomic issues pertaining to the education of Hispanic Americans. The first section reviews the development of this ethnic group through the 1970s and the experience of the first wave of immigrants. Secondly, the socioeconomic status of the second wave and the characteristics of professionals involved in the post-1965 influx are discussed. Highlights of this section include the debate on the cultural deficit theory that purportedly explains Filipino American attitudes toward education, the social indicators of educational equity for 1960, 1975, and 1978, and the differences in native born versus foreign born students. Finally, the future educational needs of the community are presented with suggestions for a better understanding of Hispanic American students (Author JGD).

This review of research on recent refugees to the United States focuses on the Indochinese, Haitians and Cubans. An introduction stresses the need for more information to enhance a better understanding of the newcomers. Succeeding sections review published literature on: (1) the development of Federal policy concerning refugees, emphasizing the difference in policy requirements for the earlier Soviet-/East European refugees and those for the new group of refugees; (2) the new refugees' cultural backgrounds, especially as these affect resettlement; (3) aspects of the refugee experience, particularly the circumstances surrounding their flight from their countries; (4) transition experiences and refugee camp conditions, (5) experience in the new culture, culture shock, and orientation programs; (6) educational policy and programs; (7) employment and sociocultural adjustment, and finally, (8) problems in emotional adjustment and solutions to adjustment problems. This second volume of Compact Guides to Information on Urban and Minority Education includes three reports: a review of alternative schools, a report on teaching writing to dialectally different youths, and a bibliography on race and sex stereotyping in children's books. The first report discusses the characteristics, types and outcomes of alternative schools in a question and answer format. The nature of writing errors by nonstandard English speakers, problems of translation into standard English, and strategies for improvement of writing instruction are addressed in the second report. The bibliographic citations in the third report represent a wide range of topics on the problem of stereotyping as well as resources promoting balanced sex/race fairness in the treatment of images of minority groups and women. Descriptors—*Administrator Role, Computer Assisted Instruction, Computer Programs, *Computers, Computer Science, Databases, Data Processing, *Decision Making, *Educational Administration, Elementary Secondary Education, Information Needs, *Information Systems, *Management Systems, Urban Schools

This monograph introduces educational administrators at a variety of levels to the basic concepts and procedures in the successful implementation of educational computer systems. In the first section, the units and functions of the computer are defined, and the administrative, research, and instructional applications of educational computing are examined. The concepts and processes of management information systems are discussed in the second section, which includes a comparative analysis of data file and data base systems. Also examined are the definition, design, development, and operation phases of systems implementation. The final section examines the nature and role of data control, data confidentiality, and data administration; the responsibilities of the data base administrator are looked at in the light of existing laws which deal with both privacy and access to information. It is suggested that the effectiveness of an information system cannot be determined in isolation from the functional activities that it was designed to serve, and a process-oriented system with a high degree of flexibility will, in the long run, be more cost-efficient and effective than a static, product-oriented system. This monograph reviews research and educational reports to examine the state of the art in preservice and inservice teacher education in the urban community in the United States. A review of urban areas in the last thirty years reveals major social and envi-

ronmental changes, such as population increases, shifts in racial composition, the introduction of desegregation, and declining resources which have required unique responses to urban educational needs. Examination of how teachers have responded to the changes indicates factors that make for effective teachers and effective schools in urban areas. An exploration of preservice education programs for urban communities emphasizes the importance of urban-based field training and provides descriptions of selected innovations developed by American higher education institutions to improve their preservice education programs. An investigation of inservice programs for urban education identifies inservice education needs and goals, reviews the history of inservice urban education programs, identifies models and types of inservice programs being carried out by various urban school districts, and identifies problems and needs of inservice educational research and evaluation. Finally, prospects for further improving urban schools through teacher training based on what is known about urban change and effective urban education are considered. (Author/MJL)

Identifiers—United States

Presented in this report are brief descriptions of preservice teacher education programs offered by American institutions of higher education and inservice teacher education programs and structures in U.S. urban school districts, designed for the education, preparation, and continuing training of professionals for urban schools. The programs were chosen for inclusion in the report because of their basic and/or unique features related to urban education; they were either typical or atypical urban programs. Information provided on each program include the institution or school district offering the program; its geographical location; type of service provided; program overview; and a description of the program curriculum, broadly defined to include not only specific courses but also various activities and experiences. lic Schools, School Desegregation, *School Effectiveness, Social Change, *Student Alienation, Student Attitudes, Student Behavior, Student Characteristics, Teacher Role, *Urban Schools, *Values Education

This paper summarizes several research findings in order to determine the urban high school characteristics that are most likely to decrease alienation among inner city, minority students, and to make their attitudes toward education, themselves, and their futures more positive. First, the paper discusses the phenomenon of alienation in society and in the schools, and considers how attitudinal and behavioral signs of alienation are related to student achievement. The author then examines specific studies done in comprehensive high schools, desegregated schools, alternative schools, and private/Catholic schools to identify school characteristics and other factors that bring about student alienation, disruptive behavior, stress, and poor achievement, and the factors that make for positive student achievement and behavior in particular settings. A concluding summary of the points made throughout the literature review includes: (1) the suggestion that alienation is a broad category and must be used as a means of understanding otherwise isolated variables like student violence, dropout rates, and low achievement which point to the same underlying condition; (2) identification of organizational elements that foster alienation and those that decrease alienation; (3) identification of administrator, teacher, and student characteristics that contribute to improved schooling; and (4) emphasis on the importance of values in helping to decrease student alienation. Descriptors—Academic Achievement, *Bilingual Education, Bilingual Education Programs, *Counseling, Counselor Characteristics, Court Litigation, Desegregation Effects, Elementary Secondary Education, *Equal Education, Ethnic Discrimination, Federal Legislation, *High Risk Students, *Hispanic Americans, Limited English Speaking, Mainstreaming, Minority Groups, Multicultural Education, Program Effectiveness, *School Desegregation, Special Education, Student Characteristics, Student Placement, Teaching Methods

Identifiers—*Bilingual Education Act 1968, Education for All Handicapped Children Act

Summaries of current research on aspects of urban and minority education are compiled in these fact sheets. The first report provides guidelines for counseling in a multicultural educational setting, and outlines what counselors should know about and what they can do for students of culturally different backgrounds. The second report, which examines desegregation as an equal educational opportunity strategy for Hispanics, presents a picture of poor Hispanic achievement under present schooling conditions, enumerates the disadvantages of segregated schooling for Hispanics, and presents some favorable outcomes of desegregation for Hispanic students. A third report explores issues related to the provision of bilingual education under Title VII of the Elementary and Secondary Education Act, discusses characteristics of bilingual education programs, and describes the effects of these programs on students. The fourth report focuses on the characteristics of high risk secondary school students, discusses skill areas that they need to develop, and examines instructional methods that have proven effective with such students. The final report examines the problems of displacing minority students in special education classes and explores alternatives in testing and assessment to eliminate biases that

have sent disproportionate numbers of minorities into such classes. (Author/MJL)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors*, are in alphabetical order.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Descriptor — Perception
Title — Iconic Signs and Symbols in Audiovisual Communication.
 An Analytical Survey of Selected Writings and Research Findings. Final Report.
 ED 013 371 — **Accession Number**

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author	Norberg, Kenneth D.	
	Iconic Signs and Symbols in Audiovisual Communication. An Analytical Survey of Selected Writing and Research Findings. Final Report.	
Title		ED 013 371 — Accession Number

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution	Sacramento State College, Calif.	
Title	Iconic Signs and Symbols in Audiovisual Communication. An Analytical Survey of Selected Writings and Research Findings. Final Report.	ED 013 371 — Accession Number

American Association for Higher Education, Washington, D.C.

Assessing the Impact of Faculty Collective Bargaining. AAHE-ERIC/Higher Education Research Report No. 8, 1981.

ERIC CLEARINGHOUSES *(and Other Network Components)*

The ERIC Clearinghouses have responsibility within the network for acquiring the significant educational literature within their particular areas, selecting the highest quality and most relevant material, processing (i.e., cataloging, indexing, abstracting) the selected items for input to the data base, and also for providing information analysis products and various user services based on the data base.

The exact number of Clearinghouses has fluctuated over time in response to the shifting needs of the educational community. There are currently 16 Clearinghouses. These are listed below, together with full addresses, telephone numbers, and brief scope notes describing the areas they cover.

ERIC Clearinghouse on Adult, Career, and Vocational Education

Ohio State University
National Center for Research in Vocational Education
1960 Kenny Road
Columbus, Ohio 43210
Telephone: (614) 486-3655

All levels of adult, career, and vocational and technical education. *Adult education*, including basic literacy training through professional skill upgrading; *career education*, including career awareness, instructional materials, teacher training, parent/community/business/industry involvement, experience-based education; and *vocational and technical education*, including new subprofessional fields, industrial arts, and vocational rehabilitation for the handicapped.

ERIC Clearinghouse on Counseling and Personnel Services

University of Michigan
School of Education Building, Room 2108
Ann Arbor, Michigan 48109
Telephone: (313) 764-9492

Preparation, practice, and supervision of counselors at all educational levels and in all settings; theoretical development of counseling and guidance; use and results of personnel procedures such as testing, interviewing, disseminating, and analyzing such information; group work and case work; nature of pupil, student, and adult characteristics; personnel workers and their relation to career planning, family consultations, and student orientation activities.

ERIC Clearinghouse on Educational Management

University of Oregon
Eugene, Oregon 97403
Telephone: (503) 686-5043

Leadership, management, and structure of public and private educational organizations; practice and theory of administration; preservice and inservice preparation of administrators, tasks and processes of administration; methods and varieties of organization, organizational change, and social context of the organization.

Sites, buildings, and equipment for education; planning, financing, constructing, renovating, equipping, maintaining, operating, insuring, utilizing, and evaluating educational facilities.

ERIC Clearinghouse on Elementary and Early Childhood Education

University of Illinois
College of Education
805 W. Pennsylvania Ave.
Urbana, Illinois 61801
Telephone: (217) 333-1386

Prenatal factors, parental behavior; the physical, psychological, social, educational, and cultural development of children from birth through the primary grades; education and learning theory, research and practice related to the development of young children. Includes teacher preparation, educational programs, and curriculum-related community services, as well as administration instruction, and physical settings. Includes both the early years and childhood (ages 0-7), the "middle years" (ages 8-12), and early adolescence (ages 10-14).

ERIC Clearinghouse on Handicapped and Gifted Children

Council for Exceptional Children
1920 Association Drive
Reston, Virginia 22091
Telephone: (703) 620-3660

Hearing impaired, visually impaired, mentally retarded, developmentally disabled, abused/neglected, autistic, multiply handicapped, severely handicapped, physically disabled, emotionally disturbed, speech handicapped, learning disabled, other health impaired, and the gifted and the talented; behavioral, psychomotor, and communication disorders; administration of special education services; preparation and continuing education of professional and paraprofessional personnel; preschool learning and development of the exceptional children; general studies on creativity.

ERIC Clearinghouse on Higher Education

George Washington University
One Dupont Circle, N.W., Suite 630
Washington, D.C. 20036
Telephone: (202) 296-2597

Various subjects relating to college and university students, college and university conditions and problems, college and university programs. Curricular and instructional problems and programs, faculty, institutional research. Federal programs, professional education (medicine, law, etc.), graduate education, university extension programs, teaching-learning, legal issues and legislation, planning, governance, finance, evaluation, interinstitutional arrangements, and management of institutions of higher education.

ERIC Clearinghouse on Information Resources

Syracuse University
School of Education
130 Huntington Hall
Syracuse, New York 13210
Telephone: (315) 423-3640

Management, operation, and use of libraries; the technology to improve their operation and the education, training, and professional activities of librarians and information specialists. Education techniques involved in microteaching, systems analysis; and programmed instruction employing audiovisual teaching aids and technology, such as television, radio, computers, and cable television, communication satellites, microforms, and public television.

ERIC Clearinghouse for Junior Colleges

University of California
Powell Library, Room 96
405 Hilgard Avenue
Los Angeles, California 90024
Telephone: (213) 825-3931

Development, administration, and evaluation of two-year public and private community and junior colleges. Junior college students, staff, curricula, programs, libraries, and community services.

ERIC Clearinghouse on Languages and Linguistics
Center for Applied Linguistics
3520 Prospect Street, N.W.
Washington, D.C. 20007
Telephone: (202) 298-9292

Languages and language sciences; theoretical and applied linguistics; all areas of foreign language and linguistics instruction, pedagogy and methodology; psycholinguistics and the psychology of language learning; cultural and intercultural context of languages; application of linguistics in language teaching; bilingualism and bilingual education; sociolinguistics; study abroad and international exchanges, teacher training and qualifications specific to the teaching of foreign languages; commonly and uncommonly taught languages including English as a second language; related curriculum developments and problems.

ERIC Clearinghouse on Reading and Communication Skills
National Council of Teachers of English
1111 Kenyon Road
Urbana, Illinois 61801
Telephone: (217) 328-3870

Reading, English, and communication skills (verbal and non-verbal), preschool through college. Educational research and development in reading, writing, speaking, and listening. Identification, diagnosis and remediation of reading problems. Speech communication — forensics, mass communication, interpersonal and small group interaction, interpretation, rhetorical and communication theory, instruction development, speech sciences, and theater. Preparation of instructional staff and related personnel in these areas.

All aspects of reading behavior with emphasis on physiology, psychology, sociology, and teaching. Instructional materials, curricula, tests and measurement, preparation of reading teachers and specialists, and methodology at all levels. Role of libraries and other agencies in fostering and guiding reading. Diagnostic and remedial services in school and clinical settings.

ERIC Clearinghouse on Rural Education and Small Schools
New Mexico State University
Box 3AP
Las Cruces, New Mexico 88003
Telephone: (505) 646-2623

Economic, cultural, social, or other factors related to educational programs for American Indians, Mexican Americans, migrants, and rural residents. outdoor education; educational programs in all small schools.

ERIC Clearinghouse for Science, Mathematics, and Environmental Education
Ohio State University
1200 Chambers Road, Third Floor
Columbus, Ohio 43212
Telephone: (614) 422-6717

All levels of science, mathematics, and environmental education. Within these fields, development of curriculum and instructional materials; media applications; impact of interest, intelligence, values, and concept development upon learning; preservice and inservice teacher education and supervision.

ERIC Clearinghouse for Social Studies/Social Science Education
855 Broadway
Boulder, Colorado 80302
Telephone: (303) 492-8434

All levels of social studies and social science; content of disciplines; applications of learning theory, curriculum theory, child development theory, and instructional theory; research and development programs; special needs of student groups; education as a social science; history of education; comparative education; social studies/social science and the community, humanities education.

ERIC Clearinghouse on Teacher Education
American Association of Colleges for Teacher Education
One Dupont Circle, N.W., Suite 610
Washington, D.C. 20036
Telephone: (202) 293-2450

School personnel at all levels; all issues from selection through preservice and inservice preparation and training to retirement; curricula; educational theory and philosophy; educational personnel development not specifically covered by other clearinghouses. Selected aspects of physical education.

ERIC Clearinghouse on Tests, Measurement, and Evaluation
Educational Testing Service
Rosedale Road
Princeton, New Jersey 08541
Telephone: (609) 734-5180

Tests and other measurement devices; methodology of measurement and evaluation; application of tests; measurement; or evaluation in educational projects or programs; research design and methodology; human development; and learning theory in general.

ERIC Clearinghouse on Urban Education
Teachers College, Columbia University
Box 40
525 W. 120th Street
New York, New York 10027
Telephone: (212) 678-3437

Programs and practices in public, parochial, and private schools in urban areas and the education of particular racial/ethnic minority children and youth in various settings; the theory and practice of educational equity; urban and minority experiences; and urban and minority social institutions and services.

Educational Resources Information Center
(Central ERIC)
National Institute of Education
Washington, D.C. 20208
Telephone: (202) 254-5500

ERIC Processing & Reference Facility
4833 Rugby Avenue, Suite 301
Bethesda, Maryland 20814
Telephone: (301) 656-9723

Start Your Own Personal Library on Microfiche

A small investment can provide you with your own personal library of over 1400 documents addressing the hottest topics in education over the past eight years. Each year you can add to this personal library (at minimal cost) an additional hundred plus documents to keep you current with developments in the field of education.

Each year the 16 clearinghouses comprising the ERIC (Educational Resources Information Center) network publish information analysis products (IAP's) which analyze and synthesize for practitioners the current thinking on high-interest topics of the day, as reflected

in the education literature. These IAP's have been reproduced on microfiche, packaged in Mini-Files for easy retrieval and storage, and made available to educators at an economical price. Included with each Mini-File is a publication that provides abstracts of all the IAP's in that year's Mini-File and a series of indexes for locating the IAP's by subject, author, and institution.

You can order all the IAP's produced during a single year, (with the exception of those for 1975-1977, which have been combined in one Mini-File) or the complete set of six Mini-Files spanning the past eight years (1975-1982).

From the 1982 Mini-File Collection, for example, read what the literature is saying about:

- **Collective Bargaining, Strikes, and Financial Costs in Public Education**
- **Counseling for Stress Management**
- **Recommended English Language Arts Curriculum Guides, K-12**
- **Computer Literacy in Higher Education**
- **Effects of Teacher Behavior on Preschool Children: A Review of Research**
- **Career Education: Collaboration with the Private Sector**
- **Calculators, Computers, and Classrooms**
- **Error Correction Techniques for the Foreign Language Classroom**
- **Student Alienation, Student Behavior, and the Urban Schools**
- **Computer Systems for the Urban School Administrator: A Guide for Decision Making**
- **Strategic Planning, Management, and Decision Making**
- **Alternative Programs for Disruptive Youth**
- **Lifelong Learning: Formal, Nonformal, Informal, and Self-Directed**

Can You Read 780 Journals Every Year?

CIJE Is the Key to Educational Literature

CIJE is the leading publication that provides indexes and monthly summaries of current periodical literature in education. It covers approximately 780 journals, indexing an average of 1,800 articles in each monthly issue. Published for ERIC in conjunction with NIE, CIJE is compiled from information collected by specialists in 16 ERIC Clearinghouses throughout the United States. Each Clearinghouse specializes in a different educational area, and searches out pertinent documents of journal articles, which are abstracted and indexed. Complete information about each article is provided in CIJE entries, which include "descriptors" indicating the subject areas of the article and "identifiers" which give a more specific description of the subject. Each entry also contains an annotation summarizing the article. CIJE contains a subject index, an author index, and a journal contents index for easy access to this extensive collection of educational literature.

Teachers, school administrators, librarians, information specialists, students, and others interested in education can use CIJE to keep abreast of research in specified areas of education, and identify new and significant educational developments.
