ABSTRACT

The extent and type of services currently offered to older adults are identified, and an overview is provided of institutional plans for increasing such services in the immediate future. In this survey respondents were asked to describe any educational programs or community services available through their institutions designed especially for older adults, and to indicate any requirements such as age or income for participation. Among the 556 colleges and universities responding to the survey, over half offered no instructional programs or community services designed specifically for older adults. Nearly 25 percent provided both instructional and community services, while 5 percent had only instructional services available and 20 percent had only community services available. This report tabulates the types of instructional services, community services, forms of organization, primary sources of funding, and plans for programs and services. It concludes that in general most colleges and universities are still focused on their traditional objective of preparing the young for "life," but that others, particularly the public-supported institutions, are alerted to the academic and service needs of older adults. More attention to older adults is promised for the future. (LBH)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). ERIC is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

HIGHER EDUCATION PANEL REPORTS, NUMBER 33
AMERICAN COUNCIL ON EDUCATION

FEBRUARY
1977

A Survey Funded by the National Science Foundation, the U.S. Office of Education,
and the National Institutes of Health.

AMERICAN COUNCIL ON EDUCATION

Roger W. Heyns, *President*

The American Council on Education, founded in 1918, is a council of educational organizations and institutions. Its purpose is to advance education and educational methods through comprehensive voluntary and cooperative action on the part of American educational associations, organizations, and institutions.

The Higher Education Panel is a survey research program established by the Council for the purpose of securing policy-related information quickly from representative samples of colleges and universities. *Higher Education Panel Reports* are designed to expedite communication of the Panel's survey findings to policy-makers in government, in the associations, and in educational institutions across the nation.

The Higher Education Panel's surveys on behalf of the Federal Government are conducted under grant support provided jointly by the National Science Foundation, the National Institutes of Health, and the U. S. Office of Education (NSF Grant SRS-7517251).

Acknowledgments

We wish to acknowledge the assistance of Richard Sonnergren, our sponsor's representative, and Eugene Welden of the Office of Education, and Martin Sicker and Marvin Taves of the Administration on Aging, in the design of the survey. The usual helpful guidance and counsel were provided by the Federal Advisory Board and its Technical Advisory Committee.

Special thanks, above all, are due our Panel representatives and other officials at the participating institutions who make these surveys possible.

Background

It is known that older Americans require a broad range of educational services to assist them in life-change situations and in finding new outlets for skills and interests. Until recently, few colleges and universities have made any special effort to serve older adults in meeting such objectives. However colleges and universities across the country now are being asked to develop a wider range of such programs. Recent legislation (The Education Amendments of 1976) amends Title I of the Higher Education Act to include a new federal initiative in "Lifelong Learning". This legislation establishes a basis for increased federal attention to and participation in the accelerating needs for continuing educational opportunities throughout life. In meeting the growing needs for lifelong educational opportunities, the institutions are strengthening their instructional, research, and public service roles, while at the same time offsetting enrollment declines and budget deficits.

This survey is designed to (1) identify the extent and type of services currently being offered to older adults, and (2) to provide an overview of institutional plans for increasing such services in the immediate future. Specifically, respondents were asked to describe any educational programs or community services available through their institutions designed specially for older adults, and to indicate any requirements (e.g., age, income) for participation. Further, information was sought relative to the organizational units responsible for administering special programs for older adults, the sources of funds used to support these programs, and plans for change in the near future.

Methods Summary

The Higher Education Panel is a continuing research program established in 1971 by the American Council on Education for the purpose of conducting quick-response surveys on issues of current policy interest to government agencies and the higher education community. The Panel is based upon a network of representatives at 642 colleges and universities broadly representative of the more than 3,000 institutions listed in the Office of Education's Education Directory.

The survey instrument was mailed to the Panel representatives at all member institutions in June 1976. To facilitate follow-up, the representatives were asked to complete a return postcard identifying the person at each institution designated to respond to the survey. By the end of August, following mail and telephone follow-up efforts, usable questionnaires had

been received from 556 institutions, for a response rate of 87 percent. Appendix A is a copy of the survey instrument, and Appendix B compares respondent institutions with nonrespondents.

The data, which are presented by control (public, private) and by type (university, four-year college, two-year college) of institution, pertain only to the survey respondents and may not accurately reflect the activities, programs, and services for older adults offered by other higher education institutions.

Findings

Among the 556 colleges and universities responding to the survey, over half offered no instructional programs or community services designed specifically for older adults. Nearly one-fourth provided both instructional and community services, while 5 percent had only instructional services available and 20 percent had only community services available (Table 1).

Instructional Services

Fewer than 30 percent of all respondents offered any instructional programs specifically designed for older adults: courses geared toward a second career, preretirement courses, self-improvement or leisure-time courses, short-term residential courses. (Table 2)

The extent of such offerings varied widely by type of institution. Overall, public institutions were much more involved in instruction for older adults than were private institutions; in particular, 52 percent of public universities and 58 percent of the public two-year colleges reported having instructional programs for older adults, whereas only 23 percent of the private universities and 11 percent of the private two-year colleges reported such offerings.

Of the 160 institutions offering specialized instructional programs for older adults, more than one-third reported having three or more such programs. Public institutions were much more likely than private institutions to offer this many programs (18 percent and 6 percent, respectively).

These instructional programs were usually oriented toward self-improvement/leisure-time courses and preretirement courses (offered by 22 percent and 15 percent, respectively, of all responding institutions [Table 3], and three-fourths and one-half, respectively, of the participating institutions only [Table 4]). About one-third of the participating colleges and universities offered courses geared to a second career, and 30 percent offered special short-term residential courses.

Fewer than 30 percent of the instructional programs available were subject to any specific requirements for participation, and those were primarily minimum age requirements.

Community Services

Respondents were asked also to identify other kinds of services which they provided to older adults: vocational or social counseling, legal services, medical or psychiatric services, institutional services (e.g., special tuition plans, library privileges), reduced fees, recreational programs. Overall, 243 institutions (44 percent) reported offering one or more service-oriented programs.

Not only were public institutions more likely than private institutions to offer community service programs, but they also offered a wider variety of services (Table 5). For example, 70 percent of the public two-year colleges offered some service programs; and of these, 80 percent offered three or more distinct programs. Similarly, over three-fifths of the public universities provided such service programs; and three-fifths of this group reported three or more program offerings.

Most of the community service programs designed for older adults were academic in nature, serving to facilitate reentry into and participation in higher education (Table 6). Two-thirds of the institutions with community service programs, for example, cited special tuition plans; two-fifths extended library privileges; well over one-third cited special admissions policies; one-fourth reported special recruiting efforts, and more than one-fifth offered academic counseling (Table 7). Other frequently mentioned services include: reduced fees for services or events on campus (reported by 37 percent), recreational or cultural programs (35 percent), and the use of meeting, recreational, or vocational facilities (30 percent).

Again, the only significant requirement for participation in most community services programs was minimum age. As many as 72 percent of respondent institutions providing special tuition plans had age requirements, while only 12 percent offering vocational counseling had age requirements.

Unique Programs

Of the more than 1300 reported special programs operated for older adults, 183 programs were considered by respondents to be particularly unique. The most frequently mentioned were of an educational nature (38 percent), for example, a series of special educational television programs, a "mini-college" operated by emeritus faculty for elderly students, a rural life-time learning institute. Seventeen percent of the programs considered unique were recreational or cultural (e.g., bus tours, art classes), and 14 percent involved the provision of health services (e.g., a self-help program in health care, a nutrition program including meal services

and nutrition education).

Forms of Organization

As a measure of the extent to which the responding colleges and universities have "institutionalized" their efforts to serve older adults, one questionnaire item asked: Is there a formal unit on your campus that has responsibility for coordinating or directing your institution's efforts to serve older adults? Overall, one-fourth reported having a formal unit for this purpose (Table 8). At these institutions, the organizational unit directing the effort was most likely to be part of the institution's continuing education program (35 percent), though one-fifth specified that the unit was a senior citizens program. The units responsible for services to older adults most often reported directly to the executive level within the institution (42 percent).

Primary Sources of Funding

The 272 institutions which indicated making special efforts to serve older adults were asked about the sources of funding for their programs. Table 9 shows the distribution of primary sources of funding (*primary source* being defined as that source which provided the greatest share of the program funds at each institution). Most frequently, the primary funds came from internal institutional sources (31 percent). Other primary sources were, in order of frequency: fees charged to participants (18 percent), local or state government (17 percent), and federal government (15 percent). Proportionately, private institutions drew primary support from internal institutional sources much more frequently than did public institutions (47 percent and 19 percent, respectively).

Plans for Programs/Services

Overall, about one-third of the responding institutions acknowledged having plans for additions or changes in their programs and services for older adults. About two in five of the public institutions and 27 percent of the private institutions reported that they planned additions or changes during the next two years (Table 10). Most often, these plans involved initiating programs and services for older adults (mentioned by 36 percent). Also frequently mentioned were intentions to expand existing classes and services (32 percent) and to add new programs (24 percent). Some of the initiatives include an associate degree program, for and about senior citizens; career-change studies; and special training programs for recreational services for older adults.

Apparently, current program status has much to do with an institution's plans for the immediate future (Table 11). Of the institutions which reported programs and services for older adults, 46 percent were planning to increase the scope of their efforts. Only 19 percent of those without such programs were planning to do so.

Conclusion

In a general sense, most colleges and universities are still focused on their traditional objective: preparing the young for "life". But on the periphery, new goals of community service are already in place. Older adults are beginning to benefit from the broadened attention to the concept of lifetime learning. The results of the present survey indicate that institutions of higher education, particularly the publicly supported institutions, are alerted to the academic and service needs of older adults, and that their offerings to this segment of the population will increase in the immediate years ahead. While the survey data do not show a ground-swell of participation in such programs and services, the remarks of the institutional respondents and the literature they have provided about their program plans do suggest that lifetime learning has attracted their interest and has a solid start in many institutions. Their commitment to self-help programs and service programs which draw on the facilities and expertise available at institutions of higher education promises more attention to older adults in the near future.

HIGHER EDUCATION PANEL

June 11, 1976

Dear Higher Education Panel Representative:

Enclosed is Higher Education Panel Survey No. 33, "College and University Services for Older Adults". This survey is designed to identify the extent of current services and those planned for the immediate future which are aimed specifically at the educational and other service needs of older adults. We believe this effort will provide the first overall inventory of the range of services being provided to older adults at colleges and universities.

In this context, the term "older adults" refers to those persons 55 years of age and older. However, your institution may use different criteria, and in some instances the age criteria may vary from program to program. Please answer the questionnaire as completely as possible, providing all the information available, particularly with respect to age and other restrictions and requirements.

We would appreciate it if you would return the survey form by *June 30, 1976*. A self-addressed envelope is enclosed for your convenience. As usual, individual responses will be held in strictest confidence, and results will be reported only by institutional groupings.

Thank you for your continued support and cooperation.

Sincerely yours,

Frank Atelsek
Director

P.S. To help us keep better track of the survey, we ask that you complete and return the enclosed postcard identifying the person you designate to respond to the survey. This will also allow us to direct our future inquiries about the survey to the appropriate office and person. Please return the postcard as soon as possible.

College and University Services for Older Adults

I. INSTRUCTIONAL SERVICES: Does your institution operate any educational programs specially designed and organized to serve older adults (approximately 55 years of age or as defined by your institution)?

Yes No Please go to Section II

If "yes" please check all of the following instructional programs/courses which are available and whether there are specific requirements for participation:

<i>Limit response to programs specifically meant for older adults</i>	<u>Programs Available</u>	<u>Is There a Requirement for:</u>		
		Age	Income Level	Other
1. Courses geared toward a second career	___	()	()	()
2. Preretirement courses	___	()	()	()
3. Self-improvement or leisure-time courses	___	()	()	()
4. Short-term residential courses	___	()	()	()
5. Other: specify _____	___	()	()	()

II. COMMUNITY SERVICES: Does your institution operate any organized community services specially designed to benefit older adults?

Yes No Please go to Section III

If "yes" please check all of the following which are available at your institution (or operated by your institution elsewhere) and whether there are specific requirements for participation:

<i>Limit response to programs specifically meant for older adults</i>	<u>Programs Available</u>	<u>Is There a Requirement for:</u>		
		Age	Income Level	Other
1. Vocational counseling program	___	()	()	()
2. Social counseling program	___	()	()	()
3. Legal services program	___	()	()	()
4. Medical or psychiatric services program	___	()	()	()
5. Institutional services				
a. Food service privileges	___	()	()	()
b. Special transportation services	___	()	()	()
c. Living accommodations	___	()	()	()
d. Use of meeting, recreational or vocational facilities	___	()	()	()
e. Other: specify _____	___	()	()	()
6. Educational services				
a. Special recruiting efforts	___	()	()	()
b. Special admissions policies	___	()	()	()
c. Special tuition plan	___	()	()	()
d. Academic counseling	___	()	()	()
e. Library privileges	___	()	()	()
f. Other: specify _____	___	()	()	()
7. Reduced fees for services/events on campus	___	()	()	()
8. Recreational/cultural programs	___	()	()	()
9. Special programs/benefits for elderly alumni/alumnae	___	()	()	()
10. Other: specify _____	___	()	()	()

III. Please describe any instructional or community service programs at your institution which you consider particularly unique.

IV. ORGANIZATION: Is there a formal organizational unit on your campus that has responsibility for coordinating or directing your institution's efforts to serve older adults?

Yes _____ No _____ Please go to Section V

If "yes": What is the name of the unit? _____

To whom does it report? _____

V. FINANCING: If special efforts for older adults have been made at your institution, please indicate below the approximate percentage of funds obtained from each source:

	<u>Approximate %</u>
Local/state government	_____
Federal government	_____
Institutional funds	_____
Private donors	_____
Fees charged to participants	_____
TOTAL	100%

VI. PLANS: Given your institution's current involvement in providing services to older adults, what specific additions or changes are planned for the next two years?

Please provide us with copies of brochures or other literature you may have about any of the programs referred to in this survey.

THANK YOU FOR YOUR ASSISTANCE. Please return this form by June 30, 1976.

PLEASE RETAIN A COPY OF THIS SURVEY FOR YOUR RECORDS

Appendix B:

Comparison of Respondents
and Nonrespondents

Overall, the response rate among the 642 Panel institutions surveyed was 87 percent. Column (4) of Table B-1 shows the response rates separately for public and private institutions; for universities, four-year and two-year institutions; by regional distribution; by size of enrollments; and by a measure of current fund expenditures. With few exceptions, the level of response was similar among the Panel members having different institutional characteristics.

Table B-1

Response to HEP Survey No. 33
College and University Services for Older Adults

Institutional Characteristic	Population (N=3036) (1)	Respondents (N=556) (2)	Nonrespondents (N=86) (3)	Panel Response Rate (4)
<u>Total</u>	100.0	100.0	100.0	86.6
<u>Control</u>				
Public	47.7	40.6	38.4	87.3
Private	52.3	59.4	61.6	86.2
<u>Full Type</u>				
Public Two-Year	29.8	10.3	7.0	90.5
Private Two-Year	8.2	5.0	9.3	77.8
Public Four-Year	15.2	16.0	20.9	83.2
Private Four-Year	41.4	45.0	46.5	86.2
Public University	3.2	14.4	10.5	89.9
Private University	2.2	9.4	5.8	91.2
<u>Census Region</u>				
Northeast	25.8	26.9	30.6	85.1
North Central	27.1	28.5	28.2	86.8
South	31.0	29.4	30.6	86.2
West	16.0	15.2	10.6	90.3
<u>FTE Enrollment (1974)</u>				
≤600	32.6	12.4	11.6	87.3
601 - 1,500	29.5	29.1	31.4	85.7
1,501 - 5,000	24.2	25.9	31.4	84.2
5,001 - 10,000	8.7	15.3	12.8	88.5
>10,000	5.0	17.3	12.8	89.7
<u>Current Fund Expenditures (1974)</u>				
≤\$5 million	63.7	36.9	38.4	86.1
>\$5 ≤ 10 million	16.8	20.5	23.3	85.1
>\$10 ≤ 25 million	11.1	14.6	14.0	87.1
>\$25 ≤ 50 million	3.6	9.2	9.3	86.4
>\$50 million	4.8	18.9	15.1	89.0

A note of caution is in order, however, to those readers who would use the results of this survey as representative of the entire population of institutions from which the Higher Education Panel is drawn. The Panel is a stratified sample which, by itself, cannot be taken as a direct sample representation of the institutional population. National estimates for the population of institutions can be achieved only through a weighting procedure which adjusts for the different Panel-to-population ratios within each cell of the stratification design. The present report only provides unweighted data for those Panel institutions responding to the survey. A comparison of the percentage distributions shown in columns (1) and (2) in Table B-1 describes how the respondents to the present survey differ in selected characteristics from the institutional population as a whole. The Panel respondents include greater proportions of private institutions, of universities, of institutions with large enrollments, and institutions with relatively high levels of expenditure.

More specifically, the Panel respondents, as compared with the entire population of institutions, include:

- a greater proportion of private institutions (59 percent of the Panel respondents vs. 52 percent of the population)
- a smaller proportion of two-year institutions (15 percent vs. 38 percent)
- a greater proportion of institutions with enrollments of 5000 or more students (33 percent vs. 14 percent)
- a smaller proportion of institutions whose current fund expenditures are \$5 million or less (37 percent vs. 64 percent)

It should be noted again that these differences are primarily an outgrowth of the disproportionate stratification design used in selecting the sample institutions for the Panel. Actual survey biases arising from nonrespondents within the Panel are relatively small for the institutional characteristics shown in Table B-1. These differences are shown in columns (1) and (2).
