ABSTRACT

This courseware evaluation rates the "Personal Consumerism" program developed by Aquarius People Materials. (The eight-program series--not contained in this document--includes understanding labels, consumer help, consumer fraud, consumer law, comparative shopping, consumerism and you, reading an advertisement, and tips on buying a used car.) Part A describes the program in terms of subject area (consumer education), and hardware requirements (Apple II, IBM PC, JR, TRS 80 III); indicates its suitability for use with handicapped and disadvantaged students, grades 7-adult, with a reading level of grades 3-5; lists accompanying materials (teacher's guide); and estimates time for use (one hour). Availability information includes cost (\$29.95 each), policies, and contact address. Part B contains the evaluation criteria in eight categories; reviewer ratings appear as yes, somewhat, no, and not applicable, with explanatory comments. Part C summarizes the evaluation. Strengths of this program are ease of reading, good remediation, and positive reinforcement. Weaknesses include inconsistency in presentation, some unclear directions, and no student evaluation. Summary ratings in the eight categories include the following: subject matter, technical presentation, student interaction, and program interaction--yes; student evaluation and documentation--somewhat; work behaviors and application programs--not applicable. The courseware is recommended for use in a life skills curriculum. (SK)

COURSEWARE EVALUATION

FOR

VOCATIONAL AND TECHNICAL EDUCATION

The evaluation of this courseware program was conducted by a team participating in the Courseware Evaluation Network. The Network, established in 1985, is coordinated by the National Center for Research in Vocational Education under the sponsorship of the U.S. Department of Education, Office of Vocational and Adult Education. The purpose of the Network is to identify and evaluate microcomputer courseware, and to disseminate courseware reviews for vocational and technical education.

Each Network team includes three members, at least one of which is, or recently has been, a vocational or technical teacher in the subject matter area of the courseware being evaluated. The evaluation represents a synthesis of the opinions of the team members. It is suggested that the evaluation be used as a first screening device for courseware and that the teacher also evaluate the courseware program on the basis of specific student needs.

The Courseware Evaluation: Form and Guide used for all of the Network evaluations was developed by the National Center and is available through its cost-recovery system.
