## The University

Founded in 1875, Indiana University of Pennsylvania is the commonwealth's fifth largest university with more than thirteen thousand students from nearly every state and over sixty foreign countries. Located fifty miles northeast of Pittsburgh in the foothills of the Allegheny Mountains, IUP is one of fourteen universities in the State System of Higher Education.

IUP is big enough to offer a diversity of highquality academic programs and has an outstanding faculty committed to teaching. The university includes six colleges and two schools and offers graduate programs in proiessional and applied areas as well as five programs at the doctoral level. More than a hundred major fields of study are available within the forty-five academic departments. IUP's internship program, the largest in Pennsylvania, provides students with on-the-job experience to supplement their classroom learning.

IUP is small enough to encourage individual growth and excellence. Acciaimed among the academic best in the nation, the university has been listed in Barron's Guide to the Most Prestigious Colleges as one of the 283 most academically competitive colleges and universities in the nation. Changing Times recognized IUP as one of fifiy U.S. colleges with high academic standards and tuition and fees below the national average. The Best Buys in College Education by Edward Fiske, education editor of the New York Times, cited IUP as one of the 221 "best buy" colleges and universities in the nation. Only :welve Pennsylvania schools were chosen for the best buy list.

IUP is an equal opportunity/affirmative action institution. Please direct inquiries concerning equal opportunity to Director of Affirmative Action, IUP, G-30 Sutton Hall, Indiana. PA 15705.

## INTRODUCTION

Using grants obtained from the Lilly Foundation and from the Fund for the Improvement of Post-Secondary Education (FIPSE), the American Sociological Association created three task forces to study factors relating to excellence in college teaching. The third of these task forces was commissioned to study institutional factors in teaching excellence. As part of their work, they carried out three surveys: of deans of colleges in which sociology departments existed, of sociology department chairs, and of sociology faculty members. These surveys examined reports of teaching conditions from the viewpoints of these three pivotal role players on American college campuses. These surveys revealed rather different views of most teaching-related activities by the deans, chairs, and faculty. For example, 65 percent of the deans reported that reviewing and improving the curriculum would be recognized as a contribution toward a positive personnel action such as achieving tenure, promotion or a merit salary raise. In contrast, only 39 percent of both the chairs and faculty respondents believed this to be the case. When higher education institutions were broken down by type of institution, the disparity in opinions on this topic was found to be greatest in universities within which, for example, 74 percent of the deans indicated that reviewing and improving the curriculum would be taken as a positive factor in personnel actions, as compared with 58 percent of the department chairs in sociology but only 23 percent of the sociology faculty. Some readers might assume that this miscommunication about the personnel process in a university was due to the social distance between deans and chairs and faculty members, respectively, but this clearly was not the case. There was considerable evidence in the surveys of excellent communication in areas other than teaching. For example, exactly the same percentage of deans and sociology faculty in four-year colleges ( 59 percent) agreed that publishing an article in a refereed journal would be rewarded in personnel actions. Comparable percentages for deans and sociology faculty in universities were 87 percent and 84 percent. Bowker (1981) interpreted these data as indicating a gradient of ignorance, a decrease in the awareness of internal rewards and resources from deans to chairs to faculty members. He hypothesized that this gradient of ignorance was sometimes a deliberate self-control policy of the dean and at other times a result of lack of attention to communication between the dean and faculty members on matters considered by the dean to be relatively unimportant, that is to say, teaching. No matter what the intent, the effect of this gradient of ignorance was to maximize the dean's discretionary power and control over funding and access to other teaching support functions.

Further analysis with these data was limited because of a methodological weakness in the design of the research. All three samples--o! deans, sociology chairs and sociology faculty--were drawn from the same institutional universe, but the returned questionnaires did not necessarily come from the same insututions. Questionnaires were simultaneously sent to the three groups of respondents at a national random sample of institutions, but return rates were not high enough to create a substantial overlap in the samples. Most colleges and universities contributed respondents to only two of the samples (such as a faculty member and a dean, but no department chair). so it was not possible to compare
perceptions of parallel sets of deans, chairs and faculty from exactly the same institutions.

This monograph summarizes data from a study specifically designed to correct the methodological problem which limited the analysis of the American Sociological Association's data. Our solution was to mount a larger, more complex study in which deans, chairs and faculty would report on the same variables within the same period of time. The scope of the study was extended to investigate a total of nine disciplines within a national sample of colleges and universities. By progressively sampling constituents from the same institution, it was possible to guarantee that faculty were matched with the appropriate chair and dean, thus making it possible to draw stronger inferences about the operation of the continuum of ignorance and other teaching-related processes which may be occurring in America's colleges and universities.

This monograph consists of a series of basic tables illustrating the conditions of teaching in American higher education. Many of the tables permit direct comparisons among the nine disciplines included in the study. Each scholarly discipline represents an independent study in which we have data from exactly matched samples of deans, department chairs and faculty members. These nine disciplines enable us to gain a much fuller view of the conditions in American higher education than would be possible with data from a single discipline. Comparisons among disciplines are also possible, as are tests of theories about the differences among the disciplines, such as the Biglan hypothesis. To facilitate such theory testing, three disciplines were selected from each of the three major areas of American classical higher education: the physical sciences (biology, chemistry, mathematics), the social sciences (political science, psychology, sociology), and the humanities (English, history, music). Interpretations of the tables are not provided in this monograph. Instead, the monograph will serve as a source document for journal articles and papers targeted for scholars in each of the nine disciplines and for students of higher education in general. Our general goal is to enhance the participation of faculty in institutional governance by increasing their understanding of the continuum of ignorance, institutional role conflict, and normative confusion.

## METHODOLOGY

The population under consideration is all the U.S. colleges and universities designated by the editors of the 1984 Barron's Guide (Barron's Profiles of American Collerges, 1984. 14th edition, Woodbury, NY: Barron's Education Services, Inc.). Institutions dominated by narrow specialties such as art, music or design were explicitly exc uded from the population. Institutions with reported total student populations. of less than 1,000 students were also eliminated from the sample.

Barron's Guide is organized by state with institutions being alphabetized within each state listing. A 50 percent sample of the 1,485 entries in the 1984 Burron's Guide was chosen by starting at the first entry and sequentially numbering the entries. Only the odd numbered entries were considered for the sample. After one pass through the guide, 743 numbered entries were available for sampling. Of these entries, a small portion were too small (less than 1,000 students) or too specialized (e.g. San Francisco

Art Institute, Ringley School of Art and Design, Savannah College of Art and Design, Westminster Choir College, Shenandoah College and Conservatory of Music) to be included in the sample. After eliminating 255 schools that did not meet the size criteria and 35 schools that did net meet the generality criteria, 453 institutions remained in the sample.
A stratified random sample of the remaining institutions was formulated to acquire an adequate number of responses from the larger institutions. One-third of the stratum containing the smallest institutions, half of the institutions in the intermediate stratum, and three-fourths of the large universities comprised the final sampling frame.

It was necessary to telephone each institution to acquire the name of the appropriate dean or deans. Depending on the organization of the institution, one or more deans should be appropriately canvassed. For instance, a smaller, more centralized academic administration lypically has one academic dean, while larger, more specialized and diverse universities may have many deans heading separate colleges or schools. In liberal arts colleges, a single dean generally is responsible for all nine disciplines, while as many as three or four deans might have responsibility for these nine departments in large research universities. There were 265 deans in these institutions who had administrative responsibility for the nine disciplines of biology, chemistry, mathematics, English, history, music, political science, psychology, and sociology.

Fifty-four percent of the 265 deans returned usable questionnaires in which they identified the chairs of the relevant departments under their jurisdiction. A parallel instrument was sent to these chairs and a similar return rate of 54 percent was realized. In both cases, follow-up procedures were applied, which consisted of an additional mailing to each dean or chair who did not respond. The chairs, in turn, identified faculty members in their departments. Usable surveys were returned by 38 percent of the faculty members surveyed. The final samples consisted of 142 deans, 392 department chairs, and 1,172 faculty members. Oi the 142 deans, 74 represented schools with two or more deans; and 68 are from single dean schools. Of the 113 unique institutions represented, 45 are institutions with more than one dean. Figure 1 details the sample sizes and return rates for the nine disciplines separately, as well as the aggregate figures for the total study.

Most of the questions in each survey instrument are duplicated in the other two questionnaires, which allows us to make direct comparisons of the reports received from deans, department chairs and faculty members on a wide variety of conditions related to teaching and research support. These comparisons can be made within each discipline, within institutional types, or for the nine disciplines as a whole.

The complexities of the initial mailings and the follow-up letters to deans, department chairs and faculty members were handled using a unique SPSSX program created by one of the researchers (McFerron, 1990). Although random sampling procedures were used throughout the study, sampling biases at each stage were magnified by the snowball sampling design that was utilized to obtain exactly matched samples.

Figure 1. Sample Sizes by Disciplines and Positions

| Discipline | Chairs |  |  |  |  | Faculty |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Deans* | Sampled | Relumed | Rate | Sampled | Retumed | Rate |
| Biology | 32 | 94 | 48 | 51\% | 411 | 183 | 45\% |
| Chemistry | 39 | 86 | 59 | 69\% | 426 | 172 | 40\% |
| English | 26 | 92 | 44 | 48\% | 407 | 155 | 38\% |
| History | 27 | 91 | 43 | 47\% | 327 | 109 | 33\% |
| Mathematics | 33 | 87 | 47 | 54\% | 509 | 175 | 34\% |
| Music | 29 | 67 | 41 | $61 \%$ | 312 | 98 | 31\% |
| Political Science | 19 | 63 | 26 | 41\% | 171 | 60 | $35 \%$ |
| Psychology | 25 | 77 | 47 | 61\% | 286 | 116 | $41 \%$ |
| Sociology | 25 | 67 | 37 | 55\% | 244 | 104 | 43\% |
| Total 142 | 255* | 724 | 392 |  | 3093 | 1172 |  |

Return rates:
Deans $=54 \% \quad$ Chairs $=54 \% \quad$ Faculty $=38 \%$
*Matched with chairs.

This multi-stage sampling design, the modest return rates, and the disproportionate stratified composition of the final samples make it necessary to be cautious in claiming that the data presented in this monograph are representative of the universe of American colleges and universities. However, we believe that these data provide a realistic view of teaching conditions in American higher education because of the consistency among the nine disciplinary sets in this study plas a similarly high degree of consistency between our results in this study, the original American Sociological Association's study, and three other studies of graduate deans, continuing education deans and chief liberal arts academic officers that we have completed in the past (Lynch and Bowker, 1984; Lynch and Bowker, 1985; Bowker, Lynch and McFerron, 1985).

Choosing the unit of analysis in a study depends on the goals of the study. In the current research, we had to choose among institutions, deans, deparments (represented by department chairs), and faculty members. Faculty members were chosen as a mit of analysis because our greatest concern is the effect of certain administrative practices and arrangements upon the quality of teaching delivered in and outside of classrooms by these faculty members. Because we chose faculty members as the unit of analysis in the study, some chairs and deans are not unique individuals in the tables presented in this monograph. They are the deans and chairs who have been matched individually with faculty members, which means that a chair or a dean who is represented by two faculty members in the tinal sample will be counted as two chairs or two deans in a table that is based on faculty respondents. Put differently, respondents in the samples of deans and chairs are weighted differently from respondents in the faculty sample. When presented for comparative purposes, their weight is equal to the number of faculty members who are matched with them in the final sample.

## VERIFICATION OF SAMPLE

Verification of the sampling methodology involved repeating the identification of the 1,485 institutions in the 1984 Barron's Guide. For each of the 453 schools in the 50 percent random sample, variables expressing highest degree offered (bachelor's, master's, doctorate), affiliation (private, public, church-related), number of undergraduate students, and number of graduate students, were gathered from the individual articles in Barron's Guide. These data were recorded on data sheets and subsequently entered into a data file. A chi-square analysis was run to determine the similarity between the population and the sample.

The chi-square goodness-of-fit analysis for highest degree, affiliation, and number of graduate students results in differences between the observed proportions and the hypothesized proportions that are not statistically significant at the .05 level. For total students the difference is not significant at the .005 level. The representativeness of the sample is confirmed. The demographic profile of the 113 institutions in the final sample is shown in Figure 2 through Figure 5. Figure 6 shows the departmental proportions in the final sample.

Figure 2. Institutions by Total Student Enrollment

104. Merit Salary Awards for Research by Deans' Department Assessment Standards-Research, Chairs' Sample
105. Merit Salary Awards for Research by Deans' Department Assessment Standards-Research, Faculty Sample

## E. ASSESSMENT OF DEPARTMENT QUALITY

## General

30. Perceptions of the Importance of Selected Factors in the Deans' Program Assessments
31. Relationships Among Deans' Department Assessment Factors, Deans' Sample
32. Relationships Among Deans' Department Assessment Factors, Chairs' Sample
33. Relationships Among Deans' Department Assessment Factors
34. Factor Analysis of Deans' Department Assessment Standards, Deans' Sample
35. Factor Analysis of Deans' Deparment Assessment Standards, Chairs' Sample
36. Factor Analysis of Deans' Department Assessment Standards, Faculty Sample
37. Relationship Among Deans' Performance Variables, Deans' Sample
38. Relationships Among Deans' Performance Variables, Chairs' Sample
39. Relationships Among Deans' Performance Variables, Faculty Sample
40. Relationships Among Department Chairs' Performance Variables
41. Relationships Between Deans' Performance and Deans' Deparıment Assessment Factors
42. Deans' Department Assessment Standards--Student Attrition by Deans' Race, Deans' Sample
43. Factor Analysis of Deans' Department Assessment Standards and Adequacy of Resources, Faculty Sample
44. Relationships Between Teaching Variables and Deans' Department Assessment Factors

## Teaching

10. Faculty Views of the Deans' Value Placed on Teaching in the Assessment of Department Quality, by Discipline
11. Quality of Departmental Teaching, as Rated by Departmental Faculty, by Discipline
12. Deans' Ratings of the Quality of Teaching and Research in Nine Departments
13. Deans' Department Assessment Standards--Teaching by Deans' Department Assessment Standards--Research, Faculty Sample
14. Deans' Department Assessment Standards--Research by Deans' Departmeint Assessment Standards--Publishing, Faculty Sample
15. Deans' Department Assessment Standards--Teaching by Deans' Department Assessment Standards--Publishing, Faculty Sample
16. Department Teaching Quality by Deans' Department Assessment Standards-Teaching, Faculty Sample
17. Department Teaching Quality by Merit Salary Awards for Teaching, Faculty Sample
18. Department Teaching Quality by Tenure Weight for Teaching, Faculty Sample
19. Regression of Deans' Departmental Assessment--Teaching Quality on Sclected Institutional Characteristics, Deans' Sample
20. Regression of Quality of Department Teaching on Selected Ccmmunications, Impact, Influence, and Management Style Variables, Faculty Sample

## Research

12. Quality of Departmental Research, as Rated by Departmental Faculty, by Discipline
13. Deans' Department Assessmert Standards--Publishing by Deans' Department Assessment Standards--Teach.i.g, Chairs' Sample
14. Department Research Quality by Deans' Department Assessment Standards-Research, Faculty Sample
15. Department Research Quality by Merit Salary Awards for Research. Faculty Sample
16. Department Research Quality by Tenure Weight for Research, Faculty Sample
17. Regression of Deans' Departmental Assessment--Extramural Grants on Selected Institutional Characteristics, Deans' Sample
18. Regression of Deans' Departmental Assessment-Publication Rate on Selected Institutional Characteristics, Deans' Sample
19. Regression of Quality of Department Research on Selected Commumicaltons, Impact, Influence, and Management Style Variables, Faculty Sample

## E. IMPACT ON THE QUALITY OF EDUCATION

## Faculty Impact on Quality

13. Influence of Faculty Committees on the Direction of Policy, by Discipline
14. Faculty Members' Ratings of Their Own Impact on the Quality of Departmental Education, by Discipline
15. Influence of Faculty Committees by Deans' Department Assessment Standards-Teaching, Faculty Sample
16. Committee Influence by Institution's Highest Degree, Deans' Sample
17. Rigression of Committee Influence on Selected Institutional Characteristics, Deans' Sample
18. Regression of Committee Influence on Selected Assessment Variables, Faculty Sample

## Chnirs' Impact on Ouality

73. Chairs' Impact on Educational Quality by Chairs' Management Style, Faculty Sample
74. Chairs' Impact on Educationa! Quality by Chairs' Communication with Faculty, Faculty Sample
75. Chairs' Impact on Educational Quality by Deans' Impact on Educational Quality, Chairs' Sample
76. Chairs' Impact on Educational Quality by Deans` Impact on Educational Quality, Faculty Sample

## Deans' Impact on Quality

66. Deans' Impact on Educational Quality by Deans' Management Style, Faculty Sample
67. Deans' Impact on Educational Quality by Dcans' Communication with Faculty, Faculty Sample
68. Deans' Impact on Educational Quality by Deans' Department Assessment Standards--Teaching, Faculty Sample
69. Deans' Impact on Educational Quality by Institution's Highest Degree. Deans' Sample
70. Regression of Deans' Impact on Selected Institutional Characteristics. Deans' Sample
71. Regression of Deans' Impact on Selected Assessment Variables, Chairs'Sample

## G. MANAGEMENT STYLE

## Deans

15. Faculty Members' Rating of the Dean's Management Style, By Discipline
16. Perceptions of the Deans' Management Style, by Position
17. Deans' Management Style by Deans' Department Assessment Standards--Teaching, Faculty Sample
18. Regression of Deans' Management Style on Selected Institutional Characteristics, Deans' Sample
19. Regression of Deans' Management Style on Selected Assessment Variables, Faculty Sample

## Chairs

16. Faculty Members' Ratings of the Chairs' Management Style, by Discipline
17. Chairs' Management Style by Dean's Management Style, Chairs' Sample
18. Chairs' Management Style by Deans' Management Style, Faculty Sample

## H. COMMUNICATION STYLE

## Deans

17. Faculty Members' Ratings of the Deans' Communications, by Discipline
18. Perceptions of the Deans' Communication with Chairs, by Position
19. Perceptions of the Deans' Communication with Faculty, by Position
20. Deans' Communication with Faculty by Deans' Department Assessment standards--Teaching, Faculty Sample
21. Regression of Deans' Communication with Chairs on Selected Institutional Characteristics, Deans' Sample
22. Regression of Deans' Communication with Faculty on Selected Assessment Variables, Faculty Sample
23. Regression of Deans' Communication with Faculty on Selected Institutional Characteristics, Deans' Sample

## Chairs

18. Faculty Members' Ratings of the Chairs' Communications, by Discipline
19. Perceptions of the Chairs' Communication with Faculty, by Position
20. Chairs' Communication with Faculty by Deans' Communication with Faculty, Chairs' Sample
21. Chairs' Communswation with Faculty by Deans' Communication with Faculty, Faculty Sample

## 1. SUPPORT FOR FACULTYDEVELOPMENT

21. Number of Out-of-State Professional Meetings Attended by Faculty in 1984-85, by Discipline
22. Proportion of Total Costs for Out-of-State Meeting Attendance Reimbursed by the Institution, by Discipline
23. Professional Development Funds Per Faculty Member, by Discipline
24. Ratings of the Adequacy of Salaries of Full Professors, by Position
25. Estimates of the Availability of Funds for Various Categories of Faculty Support, by Position
26. Relationships Between Professional Development Variables, Selected Formal Rewards and Selected Deans' Departmental Assessment Factors
27. Number of Out-of-State Professional Meetings Attendea by Faculty, by Deans' Department Assessment Standards--Papers Given at Professional Meetings, Faculty Sample
28. Proportion of Meeting Attendance Costs Reimbursed by Deans' Department Assessment Standards--Papers Given at Professional Meetings, Faculty Sample
29. 'i. al Professional Development Support by Deans' Department Assessment Standards--Research, Faculty Sample
30. Total Professional Development Support by Tenure Weight for Teaching, Faculty Sample
31. Total Professional Development Support by Tenure Weight tor Rescarch, Faculty Sample
32. Number of Out-of-State Professional Meetings Altended by Faculty, by Tenure Weight for Service to Professional Organizations, Faculty Sample
33. Proportion of Meeting Attendance Costs Reimbursed by Tenure Weight for Service to Professional Organizations, Faculty Sample

## L. RESOURCE ALLOCATION POLICY

28. Perceptions of the Deans' Resource Allocation Policy for Outstanding Programs, by Position
29. Perceptions of the Deans' Resource Allocation Policy for Inferior Programs, by Position
30. Deans' Priorities--Upgrading Inferior Departments by Institution's Highest Degree, Deans' Sample
31. Deans' Priorities--Maintaining Outstanding Departments by Institution's Highest Degree, Deans' Sample

## K. CHARACTERISTICSOF RESPONDENTS

19. Gender of Faculty Respondents, by Discipline
20. Race of Faculty Respondents, by Discipline
21. Relationships Between Institutional Characteristics and Deans' Characteristics, Teaching Variables and Resource Adequacy
22. Relationships Between Department Characteristics and Deans' Department Assessment Factors
23. Relationships Between Department Characteristics and Deans' Priorities, Formal Rewards, Deans' Performance and Chairs' Performance
24. Relationships Between Department Characteristics and Chairs' Characteristics, Teaching Variables and Resource Adequac:
25. Relationships Between Selected Deans' Characteristics and Deans' Performance Variables
26. Relationships Between Selected Chairs' Characteristics and Chairs' Performance Variables
27. Relationships Between Institutional Characteristics and Deans' Priorities, Formal Rewards and Deans' Performance
28. Relationship Between Institutional Characteristics and Deans' Department Assessment Factors

## NUMERICAL LIST OF TABLES

## Table Title

1. Teaching Load by Discipline, Faculty Sample
2. Time Spent Teaching by Discipline, Faculty Sample
3. Funds for Travel to Conferences by Discipline, Faculty Sample
4. Funds for Research by Untenured Professors by Discipline, Faculty Sample
5. Funds for the Purchase of Library Journals by Discipline, Faculty Sample
6. Funds for Offering Courses Often Enough by Discipline, Faculty Sample
7. Funds for Sabbaticals to Improve Teaching by Discipline, Faculty Sample
8. Tenure Weight for Teaching by Discipline, Faculty Sample
9. Merit Increases for Teaching by Discipline, Faculty Sample
10. Faculty Views of the Deans' Value Placed on Teaching in the Assessment of Department Quality, by Discipline
11. Quality of Departmental Teaching as Rated by Deparmental Faculty, by Discipline
12. Quality of Departmental Research as Rated by Departmental Faculty, by Discipline
13. Influence of Faculty Committees on the Direction of Policy, by Discipline
14. Faculty Members' Ratings of Their Own Impact on the Quality of Deparmental Education, by Discipline
15. Faculty Members' Ratings of the Deans' Management Style, by Discipline
16. Faculty Members' Ratings of the Chairs' Management Style, by Discipline
17. Faculty Members' Ratings of the Deans' Communications, by Discipline
18. Faculty Members' Ratings of the Chairs' Communications, by Discipline
19. Gender of Faculty Respondents, by Discipline
20. Race of Faculty Respondents, by Discipline
21. Number of Out-of-State Professional Meetings Attended by Faculty in 1984-85, by Discipline
22. Propotion of Total Costs for Out-of-State Meeting Attendance Reimbursed by the Institution, by Discipline
23. Professional Development Funds per Faculty Member, by Discipline
24. Ratings of the Adequacy of Salaries of Full Professors, by Position
25. Estimates of the Availability of Funds for Various Categories of Faculty Support, by Position
26. Reports of Tenure Weights, by Position
27. Reports of Merit Salary Awards, by Position
28. Perceptions of the Deans' Resource Allocation Policy for Outstanding Programs, by Position
29. Perceptions of the Deans' Resource Allocation Policy for Inferior Programs, by Position
30. Perceptions of the Importance of Selected Factors in the Deans' Progran Assessments
31. Deans' Ratings of the Quality of Teacl. 1.5 and Research in Nine Departments
32. Perceptions of the Deans' Communication with Chairs, by Position
33. Perceptions of the Deans' Management Style, by Position
34. n eptions of the Deans' Communication with Faculty, by Position
35. Perceptions of the Chairs' Communication with Faculty, by Position
36. Relationships Among Deans' Department Assessment Factors, Deans' Sample
37. Relationships Among Deans' Department Assessment Factors, Chairs' Sample
38. Deans' Department Assessment Standards--Publishing by Deans' Department Assessment Standards--Teaching, Chairs' Sample
39. Relationships A.song Deans' Department Assessment Factors
40. Deans' Department Assessment Standards--Teaching by Deans' Department Assessment Standards--Research, Faculty Sample
41. Deans' Department Assessment Standards--Research by Deans' Department Assessment Standards--Publishing, Faculty Sample
42. Deans' Department Assessment Standards--Teaching by Deans' Department Assessment Standards--Publishing, Faculty Sample
43. Factor Analysis of Deans' Department Assessment Standards, Deans' Sample
44. Factor Analysis of Deans' Department Assessment Standards, Chairs' Sample
45. Factor Analysis of Deans' Department Assessment Standards, Faculty Sample
46. Relationships Among Tenure Weights and Merit Salary Awards, Deans' Sample
47. Relationships Among Tenure Weights and Merit Salary Awards, Chairs' Sample
48. Relationships Among Tenure Weights and Merit Salary Awards, Faculty Sample

4!. Tenure Weight for Teaching by Tenure Weight for Research, Faculty Sample
50. Tenure Weight for Publishing by Tenure Weight for Teaching, Faculty Sample
51. Tenure Weight for Institutional Service by Tenure Weight for Teaching, Faculty Sample
52. Tenure Weight for Community Service by Tenure Weight for Teaching, Faculty Sample
53. Tenure Weight for Teaching by Merit Salary Awards for Teaching, Faculty Sample
54. Tenure Weight for Teaching by Merit Salary Awards for Research, Faculty Sample
55. Merit Salary Awards for Teaching by Merit Salary Awards for Research. Faculty Sample
56. Factor Analysis of Variables in Tenure and Merit Pay Decisions, Deans' Sample
57. Factor Analysis of Variables in Tenure and Merit Pay Decisions, Chairs' Sample
58. Factor Analysis of Variables in Tenure and Merit Pay Decisions, Faculty Sample
59. Relationships Among Resource Adequacy Variables, Chairs' Sample
60. Relationships Among Resource Adequacy Variables, Faculty Sample
61. Factor Analysis of Adequacy of Resources, Chairs' Sample
62. Factor Analysis of Adequacy of Resources, Faculty Sample
63. Relationships Among Deans' Performance Variables, Deans' Sample
64. Relationships Among Deans' Performance Variables, Chairs' Sample
65. Relationships Among Deans' Performance Variables, Faculty Sample
66. Deans' Impact on Educational Quality by Deans' Management Style, Faculty Sample
67. Deans' Impact on Educational Quality by Deans' Communications with Faculty, Faculty Sample
68. Influence of Faculty Committees by Deans' Department Assessment Standards-Teaching, Faculty Sample
69. Deans' Impact on Educational Quality by Deans' Department Assessment Standards--Teaching, Faculty Sample
70. Deans' Management Style by Deans' Department Assessment Standards-Teaching, Faculty Sample
71. Deans' Communication with Faculty by Deans' Department Assessment Standards-Teaching, Faculty Sample
72. Relationships Among Deparment Chairs' Performance Variables
73. Chairs' Impact on Educational Quality by Chairs' Management Style, Faculty Sample
74. Chairs' Impact on Educational Quslity by Chairs' Communication with Faculty, Faculty Sample
75. Chairs' Impact on Educational Quality by Deans' Impact on Educational Quality, Chairs' Sample
76. Chairs' Impact on Educational Quality by Deans' Impact on Educational Quality, Faculty Sample
77. Chairs' Management Style by Deans' Management Style, Chairs' Sample
78. Chairs' Management Style by Deans' Management Style, Faculty Sample
79. Chairs' Communication with Faculty by Dean's Communication with Faculty, Chairs' Sample
80. Chairs' Communication with Faculty by Deans' Communication with Faculty, Faculty Sample
81. Relationships Between Institutional Characteristics and Deans' Characteristics, Teaching Variables and Resource Adequacy
82. Relationships Between Department Characteristics and Deans' Department Assessment Factors
83. Relationships, Between Department Characteristics and Deans' Priorities, Formal Rewards, Deans' Performance and Chairs' Performance
84. Relationships Between Department Characteristics and Chairs' Characteristics, Teaching Variables and Resource Adequacy
85. Relationships Between Selected Deans' Characteristics and Deans' Performance Variables
86. Relationships Between Selected Chairs' Chara'teristics and Chairs' Performance Variables
87. Relationships Between Deans' Performance and Deans' Department Assessment Factors
88. Relationships Between Selected Resource Adequacy Variables and Deans' Ratings of Departmental Teaching Quality
89. Department Teaching Quality by Deans' Department Assessment Standards-Teaching, Faculty Sample
90. Department Teaching Quality by Merit Salary Awards for Teaching, Faculty Sample
91. Relationships Between Selected Resource Adequacy Variables and Deans' Ratings of Departmental Research Quality
92. Department Research Quality by Deans' Department Assessment Standards-Research, Faculty Sample
93. Department Research Quality by Merit Salary Awards for Research, Faculty Sample
94. Department Teaching Quality by Tenure Weight for Teaching, Faculty Sample
95. Department Research Quality by Tenure Weight for Research, Faculty Sample
96. Relationships Between Institutional Characteristics and Deans' Priorities, Formal Rewards and Deans' Performance
97. Deans' Priorities--Upgrading Inferior Departments by Institution's Highest Degree, Deans' Sample
98. Deans' Priorities--Maintaining Outstanding Departments by Institution's Highest Degree, Deans' Sample
99. Tenure Weight for Teaching by Institution's Highest Degree, Deans' Sample
100. Tenure Weight for Publishing by Institution's Highest Degree, Deans' Sample
101. Merit Salary Awards for Teaching by Institution's Highest Degree, Deans' Sample
102. Merit Salary Awards for Research by Institution's Highest Degree, Deans' Sample
103. Committee Influence by Institution's Highest Degree, Deans' Sample
104. Deans' Impact on Educational Quality by Institution's Highest Degree, Deans' Sample
105. Deans' Department Assessment Standards--Student Attrition by Deans' Race, Deans' Sample
106. Relationships Between Institutional Characteristics and Deans' Department Assessment Factors
107. Relationships Between Teaching Variables and Formal Rewards
108. Faculty Teaching Load by Tenure Weight for Teaching, Deans' Sample
109. Faculty Teaching Load by Tenure Weight for Teaching, Chairs' Sample
110. Faculty Teaching Load by Tenure Weight for Teaching, Faculty Sample
111. Faculty Teaching Load by Tenure Weight for Publishing, Deans' Sample
112. Faculty Teaching Load by Tenure Weight for Publishing, Chairs’ Sample
113. Faculty Teaching Load by Tenure Weight for Publishing, Faculty Sample
114. Faculty Teaching Load by Tenure Weight for Research, Faculty Sample
115. Faculty Teaching Load by Merit Salary Awards for Teaching, Deans' Sample
116. Faculty Teaching Load by Merit Salary Awards for Teaching, Chairs' Sample
117. Faculty Teaching Load by Merit Salary Awards for Teaching, Faculty Sample
118. Faculty Teaching I oad by Merit Salary Awards for Research, Faculty Sample
119. Resource Adequacy by Deans' Department Assessment Standards, Faculty Sample
120. Adequacy of Resources for Grants Travel by Deans' Department Assessment Standards--Grants, Faculty Sample
121. Adequacy of Resources for Grant Development Personnel by Deans' Department Assessment Standards--Grants, Faculty Sample
122. Adequacy of Resources for Travel to Develop Grants by Deans' Department Assessiment Standards--Extramural Grants, Deans' Sample
123. Adequacy of Resources for Travel to Develop Grants by Deans' Department Assessment Standards--Extramural Grants, Chairs' Sample
124. Adequacy of Resources for Grant Developinent Personnel by Deans' Department Assessment Standards--Extramural Grants, Deans' Sample
125. Adequacy of Resources for Grant Development Personnel by Deans' Department Assessment Standards--Extramural Grants, Chairs' Sample
126. Adequacy of Resources for Research by Senior Professors by Deans' Department Assessment Standards--Research, Deans' Sample
127. Adequacy of Resources for Research by Senior Professors by Deans' Depjarument Assessment Standards--Research, Chairs' Sample
128. Adequacy of Resources for Research by Senior Professors by Dea:Is' Department Assessment Standards--Research. Faculty Sample
129. Adequacy of Resources for Research by Untenured Proiessors by Deans' Department Assessment Standards--Research, Deans' Sample
130. Adequacy of Resources for Research by Untenured Professors, by Deans' Department Assessment Standards--Research, Chairs' Sample
131. Adequacy of Resourc. for Research by Untenured Professors, by Deans’ Department Assessment Standards-Research, Faculty Sample
132. Adequacy of Resources for Research Equipment by Deans' Department Assessment Standards--Research, Deans' Sample
133. Adequacy of Resources for Research Equipment by Deans' Department Assessment Standards--Research, Chairs' Sample
134. Adequacy of Resources for Research Equipment by Deans' Department Assessment Standards--Research, Faculty Sample
135. Adequacy of Resources for Offering Courses by Deans' Department Assessment Standards--Teaching, Deans' Sample
136. Adeq'دacy of Resources for Offering Courses by Deans' Department Assessment Standards--Teaching, Chairs' Sample
137. Adequacy of Resources for Offering Courses, by Deans' Department Assessment Standards--Teaching, Faculty Sample
138. Adequacy of Resources for Teaching Sabbaticals by Deans' Department Assessment Standards--Teaching, Deans' Sample
139. Adequacy of Resources for Teaching Sabbaticals by Deans' Department Assessment Standards--Teaching, Chairs' Sample
140. Adequacy of Resources for Teaching Sabbaticals by Deans' Department Assessment Standards--Teaching, Faculty Sample
141. Factor Analysis of Deans' Department Assessment Standards and Adequacy of Resources, Faculty Sample
142. Relationships Between Teaching Variables and Deans' Department Assessment Factors
143. Faculty Teaching Load by Deans' Department Assessment Standard--Teaching, Chairs' Sample
144. Faculty Teaching L’ad by Deans' Department Assessment Standards--Teaching. Faculty sample
145. Relationships Between Selected Tenure Weights and Deans' Department fissessment Factors
146. T nure Weight for Tearhing by Deans' Department Assessment standards--Teaching, Peans' Sample
147. Tenure Weight for Teaching by Deans' Department Assessment Standards--Teaching, Shairs' Sample
148. Tenure Weight for Teaching by Deans' Department Assessment Standards--Teaching, Faculty Sample
149. Tenure Weight for Teaching by Deans' Department Assessment Standards--Course Quality, Deans' Sample
150. Tenure Weight for Teaching by Deans' Department Assessment Standards--Course Quality, Chairs' Sample
151. Tenure Weight for Teaching by Deans' Department Assessment Standards--Course Quality, Faculty Sample
152. Tenure Weight for Publishing by Deans' Department Assessment Standards--Publishing, Deans' Sample
153. Tenure Weight for Publishing by Deans' Department Assessment Standards--Publishing, Chairs' Sample
154. Tenure Weight for Publishing by Deans' Department Assessment Standards--Publishing, Faculty Sample
155. Tenure Weight for Research by Deans' Department Assessment Standards--Research, Deans' Sample
156. Tenure Weight for Research by Deans' Deparment Assessment Standards--Research, Chairs' Sample
157. Tenure Weight for Research by Deans' Department Assessment Standards--Research, Faculty Sample
158. Tenure Weight fo, Service to Professional Organizations by Deans' Department Assessment Standards--National Reputation, Deans' Sample
159. Tenure Weight for Service to Professional Organizations by Deans' Deparment Assessment Standards--National Reputation, Chairs' Sample
160. Tenure Weight for Professional Organizational Service by Deans` Department Assessment Standards--National Presentation, Faculty Sample
161. Tenure Weight for Service to the Institution by Deans' Department Assessment Standards--Internal Reputation, Deans' Sample
162. Tenure Weight for Service to the Institution by Deans' Department Assessment Standards--Internal Reputation, Chairs' Sample
163. Tenure Weight for Service to the Institution by Deans' Department Assessment Standards--Internal Reputation, Faculty Sample
164. Relationships Between Selected Merit Salary Variables and Deans' Department Assessment Factors
165. Merit Salary Awards for Teaching by Deans' Department Assessment Standards-Teaching, Deans' Sample
166. Merit Salary Awards for Teaching by Deans' Department Assessment Standards-Teaching, Chairs' Sample
167. Merit Salary Awards for Teaching by Deans' Department Assessment Standards-Teaching, Faculty Sample
168. Merit Salary Awards for Teaching by Deans' Department Assessment Standards-Course Quality, Deans' Sample
169. Merit Salary Awards for Teaching by Deans' Department Assessment Standards-Course Quality, Chairs' Sample
170. Merit Salary Awards for Teaching by Deans' Department Assessment Standards-Course Quality, Faculty Sample
171. Merit Salary Awards for Teaching by Deans' Department Assessment Standards-Student Attrition, Chairs' Sample
172. Merit Salary Awards for Research by Deans' Department Assessment Standards-Research, Deans' Sample
173. Merit Salary Awards for Research by Deans' Department Assessment Standards.Research, Chairs' Sample
174. Merit Salary Awards for Research by Deans' Department Assessment Standards--Research, Faculty Sample
175. Relationships Between Formal Rewards for Teactiilig and Resource Adequacy
176. Adequacy of Resources for Offering Courses by Tenure Weight for Teaching, Deans' Sample
17\%. Adequacy of Resources for Offering Courses by Tenure Weight for Teaching, Chairs' Sample
178. Adequacy of Resources for Offering Courses by Tchure Weight for Teaching, Faculty Sample
179. Adequacy of Resources for Teaching Sabbaticals by Tenure Weight for Teaching, Deans' Sample
180. Adequacy of Resources for Teaching Sabbaticals by Tenure Weight for Teaching, Chairs' Sample
181. Adequacy of Resources for Teaching Sabbaticals by Tenure Weight for Teaching, Faculty Samp!e
182. Adequacy of Resources for Research by Untenured Professors by Tenure Weight for Publishing, Deans' Sample
183. Adequacy of Resources for Research by Untenured Professors, by Tenure Weight for Publishing, Chairs' Sample
184. Adequacy of Rescurces for Research by Untenured Professors, by Tenitic Weight for Research, Faculty Sample
185. Adequacy of Resources for Research by Senior Professors by Merit Salary Awards for Research, Deans' Sample
186. Adequacy of Resources for Research by Senior Professors by Merit Salary Awards for Research, Chairs' Sample
187. Adequacy of Resources for Research by Senior Professors by Merit Salary Awards for Research, Faculty Sample
188. Adequacy of Full Professors' Salaries by Tenure Weight for Publishing, Deans' Sample
189. Relationships Between Professional Development Variables, Selected Formal Rewards and Selected Deans' Department Assessment Factors
190. Number of Out-of-State Professional Meetings Attended by Faculty, by Deans' Department Assessment Standards--Papers Given at Protessional Mcetings, Faculty Sample
:21. Proportion of Meeting Attendance Costs Reimbursed by Deans' Department Assessment Staindards--Papers Given at Professional Meetings, Faculty Sample
192. Total Professional Development Support by Deans Department Assessment Standards--Research, Faculty Sample
193. Total Professional Development Support by Tenure Weight for Teaching, Faculty Sample
194. Total Professional Development Support by Tenure Weight for Research, Faculty Sample
195. Number of Out-of-State Professional Meetings Attended by Faculty, by Tenure Weight for Service to Professional Organizations, Faculty Sample
196. Proportion of Meeting Attendance Costs Reimbursed by Tenure Weight for Service to Professional Organizations, Faculty Sample
197. Regression of Professors' Salary on Selected Institutional Characteristics, Deans' Sample
198. Regression of Teaching Load on Selected Institutional Characteristics, Deans' Sample
199. Regression of Percentage of Time Teaching on Selected Assessinent Variables, Deans' Sample
200. Regression of Percentage of Time Teaching on Professors' Salary and Selected Resource Adequacy Variables, Chairs' Sample
201. Regression of Percentage of Time Spent Teaching on Professors' Salary and Selected Resource Adequacy Variables, Faculty Sample
202. Regression of : arcentage of Time Spent Teaching on Selected Deans' Assessment Variables, Chairs' Sample
203. Regression of Percentage of Time Spent Teaching on Selected Assessment Variables, Faculty Sample
204. Regression of Tenure Weight for Teaching on Selected Institutional Characteristics, Deans' Sample
205. Regression of Tenure We ht for Teaching on Professors' Salary and Selected Assessinent Variables, Deans' Sample
206. Regression of Tenure Weight for Teaching on Selected Assessment Variables, Faculty Sample
207. Regression of Tenure Weight for Teaching on Professors' Salary and Selected Resource Adequacy Variables, Chairs' Sample
208. Regression of Tenure Weight for Teaching on Selected Resource Adequacy Variables, Faculty Sample
209. Regression of Tenure Weight for Research on Selected Institutioral Characteristics, Deans' Sample
210. Regression of Tenure Weight for Research on Professors' Salary and Selected Assessment Variables, Deans' Sample
211. Regression of Tenure Weight for Research on Selected Assessment Variables, Faculty Sample
212. Regression of Tenure Weight for Research on Professors' Salary and Selected Resource Adequacy Variables, Chairs' Sample
213. Regression of Tenure Weight for Research on Professors' Salary and Selected Resource Adequacy Variables, Faculty Sample
214. Regression of Tenure Weight for Publishing on Selected Institutional Characteristics, Deans' Sample
215. Regression of Tenure Weight for Publishing on Professors' Salary and Selected Assessment Variables, Deans' Sample
216. Regression of Tenure Weight for Publishing on Selected Assessment Variables, Faculty Sample
217. Regression of Tenure Weight for Publishing on Professors' Salary and Selected Resource Adequacy Variables, Chairs' Sample
218. Regression of Tenure Weight for Publishing on Selected Resource Adequacy Variables, Faculty Sample
219. Regression of Deans' Department Assessment--Extramural Grants on Selected Institutional Characteristics, Deans' Sample
220. Regression of Deans' Departmental Assessment--Publication Rate o" Selected Institutional Characteristics, Deans' Sample
221. Regression of Deans' Departmental Assessment--Teaching Quality on Selected Institutional Characteristics, Deans' Sample
222. Regression of Committee Influence on Selected Institutional Characteristics, Deans' Sample
223. Regression of Committee Intluence on Selected Assessment Variables. Faculty Sainfle
224. Regression of Deans' Impact on Selected Institutional Characteristics, Deans' Sample
225. Regression of Deans' Impact on Selected Assessment Variables, Chairs' Sample
226. Regression of Deans' Management Style on Selected Institutional Characteristics, Deans' Sariple
227. Regression of Deans' Management Style on Selected Assessment Variables, Faculty Sample
228. Regression of Deans' Communication with Chairs on Selected Institutional Characteristics, Deans' Sample
229. Regression of Deans' Communication with Faculty on Selected Assessment Variables, Faculty Sample
230. Regression of Deans' Communication with Faculty on Selected Institutional Characteristics, Deans' Sample
231. Regression of Quality of Department Teaching on Selected Communications, Impact, Influence, and Management Style Variables, Faculty Sample
232. Regression of Quality of Department Research on Selected Communications, Impact, Influence, and Management Style Variables, Faculty Sample

[^7]Table 231. Regression of quality of Department Teaching on Selected Communications, Impact, Influence, and Management Style Variables, Faculty Sample

| Variables | Beta | $T$ | Statistical Sianificance |
| :---: | :---: | :---: | :---: |
| Chairs' Communications with Faculty | . 123 | 2.721 | $<.01$ |
| Deans' Impact. | . 058 | 1.704 | <. 10 |
| Influence of Committees | . 161 | 5.145 | <. 001 |
| Deans' Management Style | -. 009 | -. 212 | NS |
| Chairs' Impact | .127 | 3.723 | $<.001$ |
| Deans' Communications with Faculty | . 018 | . 408 | NS |
| Chairs' Management Style | . 059 | 1.7 .96 | NS |
| (Constant) |  | 28.432 | <. 001 |

$r_{m}=.36$

Table 232. Reyression of quality of Department Research on Selected Communications, Impact, Influence, and Management Style Variables, Faculty sample

| Variables | Beta | T | Statistical <br> Significance |
| :--- | :---: | :---: | :---: |
| Chairs' Communications with Faculty | .062 | 1.317 | NS |
| Deans' Impact | .036 | 1.026 | NS |
| Committee Influence | .135 | 4.161 | <.001 |
| Chairs' Impact | .063 | 1.776 | <.10 |
| Deans' Communications with Faculty | .025 | .716 | Ns |
| Chairs' Management Style | .031 | .670 | NS |
| (Constant) |  | 14.872 | $<.001$ |

$i_{m}=.24$

[^0]:    *Where percentages do not sum 100, it is due to statistical rounding procedures.

[^1]:    *Percentages represent the proportion of the respondents in each position who rated each factor as important or very important in the deans' program assessments.

[^2]:    *Where percentages do not sum 100, it is due to statistical rounding procedures.

[^3]:    *** Significant at less than . 001.

    *     * Significant at less than 01 .
    * Significant at less than .05 .
    ${ }^{\text {a }}$ Correlations are tau $b . N=1,172$ faculty.

[^4]:    Tau $b=.29$, significant at less than .001 .
    

[^5]:    ${ }^{\text {a }}$ Correlations are tau b. All are significant at less than .001 . $N=1,172$ faculty.
    bow faculty participation $=1$, high faculty participation $=10$.

[^6]:    ***Significant at less than . 001
    **Significant at less than . 01 .
    *Significar. at less than . 05.

[^7]:    $r_{m}=.15$
