ABSTRACT

This report describes a project to adapt and/or develop instruments, techniques, and procedures for establishing an individual educational planning system for adult students at Salt Lake Community High School. Chapter 1 describes procedures to identify and assess existing approaches for developing individual educational plans (IEPs). It critiques and provides IEP forms of the Tooele, Cache, and Weber School Districts and Skills Center North and one developed by the State Office of Education. Chapter 2 discusses the forms and procedures developed. Nine functions the IEP should include are outlined: (1) correlations with the State Adult Education Model, (2) infcrmal beginning counseling session, (3) initial testing, (4) evaluation of existing school credits, (5) resume of previous education and experiences, (6) aptitude and career testing, (7) ongoing counseling procedure, (8) teacher advisory system, and (9) clustering classes in area of interest. These forms are provided: Educational Plan sheet; a preliminary IEP worksheet including personal information, credits, and information about work experience and student objectives; Resume of Adult Experience; and IEP form. Chapter 3 outlines the workshcp to train adult educators in use of IEP instruments, procedures, and techniques and participant evaluation of the workshop. Chapters 4 and 5 briefly address IEP system implementation and conclusions and implications derived from the project. (YLB)

ABSTRACT

It is the purpose of the Project to adapt and develop instruments, techniques, and procedures for establishing a viable individual educational planning system for adult students in accordance with the requirements stated in the Adult Education Utah Program Plan, 1980-82. The Project will develop an Individual Education Plan Guidebook and train adult educators in the philosophy, purposes, and processes of the Individual Educational Plan system.

The above was the abstract statement from the project proposal. In developing this project a ten-week workshop for participants was presented to cover all procedures involved in the TOTAL concept of the Individual Education Plan for Adult Students.

The IEP is a realistic approach for all personnel working with the adult student to actually plan with the student not only academic endeavors but to make a workable plan for the student, incorporating educational pursuits with his/her plans for the future particularly in relation to job endeavors.

INTRODUCTION

Until 1979 most adult education had not established a total and inclusive Individual Education Plan (IEP) for the adult student. Those which had been developed were designed for a particular purpose and were not appropriate for other adult education programs. Development of an IEP for adult education was necessary in order to bring continuity to the student's educational program, provides an assessment of past experiences, show their relationship to the present plan and to outline educational experiences appropriate to the student's future plans. With this in mind, Salt Lake Community High School formed an IEP development team to function during the 1979-80 school year.

Members of the team were J. Dale Manning, Coordinator, Salt Lake Community High School day program, 15 years experience in adult education, EDS Brigham Young University; James P. Andersen, Coordinator, Salt Lake Community High School evening program, six years experience in adult education, MED University of Utah; Rosemary Baron, Counselor, Salt Lake Community High School, 13 years experience in public education, MED in guidance and counseling from University of Guam; Faye Maxwell, Registrar, Salt Lake Community High School, 14 years in adult education.

The project objectives were as follows:

1. Identify and assess existing approaches for developing Individual Adult Educational Plan.
2. Identify, adapt and/or develop the instruments and procedures for an Adult Individual Educational Plan system at Salt Lake Community High School.
3. Train adult educators in the use of the Individual Educational Plan instruments, techniques, and procedures.
4. Implement the Individual Educational Plan System at Salt Lake Community High School.
5. Compile an Individual Educational Plan Operations Manual of standards, policies, instruments, and report forms for use by adult educators at Salt Lake Community High School and other Adult Education Programs.

Identify and Assess Existing Approaches for Developing Individual Adult Educational Plans

In an effort to avoid reinventing the wheel, the IEP Development Team elected to look at several working IEP's to get a feeling of what was already being done. Based on recommendations of Mr. Kay Haws, Utah State Office of Education, the team decided to visit Tooele, Cache, and Weber School Districts and the Skills Center North and to study the plan developed by the State Office of Education used in several districts.

Tooele County School District: Dr. C. Brent McBride, Director of Adult Education in Tooele District, walked the team through a workable IEP for Adults (see ill. 1). The plan includes room for the student's goals and reasons for attending Adult High School and a place to record credits as they are earned. Required classes are noted and letters for evaluation of service, work experience, and foreign language knowledge are included (see ill. 2). A particular strength of the Tooele plan was the allowance for "testing out" of required classes by passing prepared competency exams based on the concepts taught in the course. The team felt the IEP would be strengthened by the inclusion of some entry test data (i.e. incoming reading and mathematics scores) and by the addition on the IEP of long range career planning information.

Cache and Weber County School Districts: Both Cache and Weber Districts have functional IEP's developed for the K-12 program. Each had strengths which could be adapted to an IEP for adults. The Career Planning Card (see ill. 3) used in Cache was of particular interest for its inclusion of work experience and functional competency requirements along with the general career courses and goal information.

Weber County has done extensive work with career clusters and has published a career registration booklet which is of particular value to students as they plan areas of concentrated study.

The Skills Center North: The Skills Center North maintains a "Student Employability Information Record" which is similar to but much more comprehensive than is needed for the usual adult education IEP. The data included provides measurements of achievement, interest, aptitude, personality and individual awareness and self-appraisal. In addition there are various occupational evaluations and a Career Awareness Laboratory Report. Adult Students who express interest or have a need for such detailed measurements should probably be referred to one of the Skill Centers or to the Career Guidance Center.

State Computer Forms:

The most complete IEP reviewed was the one developed by the Utah State Office of Education (see ill. #4). These forms were designed to serve not only as an IEP but also (in fact, primarily) as a state collection tool for adult education statistics. The team's initial reaction to the forms was a positive acceptance of the idea that eventually adult education will come to computerized reporting. They did see some problems with immediate acceptance of the forms.

1. The three forms presented contained many duplications-- not only among themselves, but in relation to the students' accumulative records. Such duplications seem uneconomical and perhaps unnecessary. Many incoming students would be unable to fill out the computer type forms without help -- which would put the burden of the initial paperwork on the counselor or secretary -- and the forms would be inhibiting to the new and often frightened student.

2. The forms would be difficult for the counselor to use in a relaxed initial interview.

3. Therefore, if counselors were to use a less structured form to obtain information in the first interview, it would have to be copied onto the computer forms -- presumably by secretaries, who would be hardpressed to carry the burden.

An IEP should be an on-going record, allowing for changes as the student progresses from month to month and year to year. The computer forms allow for end-of-year statistical information, but do not provide for on-going student growth. If a new form is to be prepared each year for accounting purposes, continuity of progress would be difficult to maintain in a simple form the student would understand.

The committee kept these considerations in mind as they developed the material to follow.

- H** Because of child care problems
- I** Because of family problems
- J** Because of time class/program is scheduled
- K** For other known reasons
- L** For unknown reasons

II

Identify, Adapt and/or Develop the Instruments and Procedures for an Adult Individual Educational Plan System at Salt Lake Community High School

Based on the research and assessment done with the existing IEP's, the team determined that the IEP should include at least the following:

1. correlation with the State Adult Education Model,
2. an informal beginning counseling session,
3. provisions for testing of functional and academic competencies,
4. evaluation of existing school credits,
5. a resume of previous education and experiences,
6. provisions for aptitude and career testing,
7. an ongoing counseling procedure,
8. implementation of a Teacher Advisory System and
9. provision for clustering classes in an area of interest.

State Model:

The Utah Adult Education Program Plan for FY 1980-82, Utah State Office of Education, presents a "Basic and Functional Public Adult Education Model" (see ill. #5) which the development team felt should provide the base for individual educational planning for adult students. The concepts on which the model is based parallel the concepts that the team felt were important. It emphasized the following:

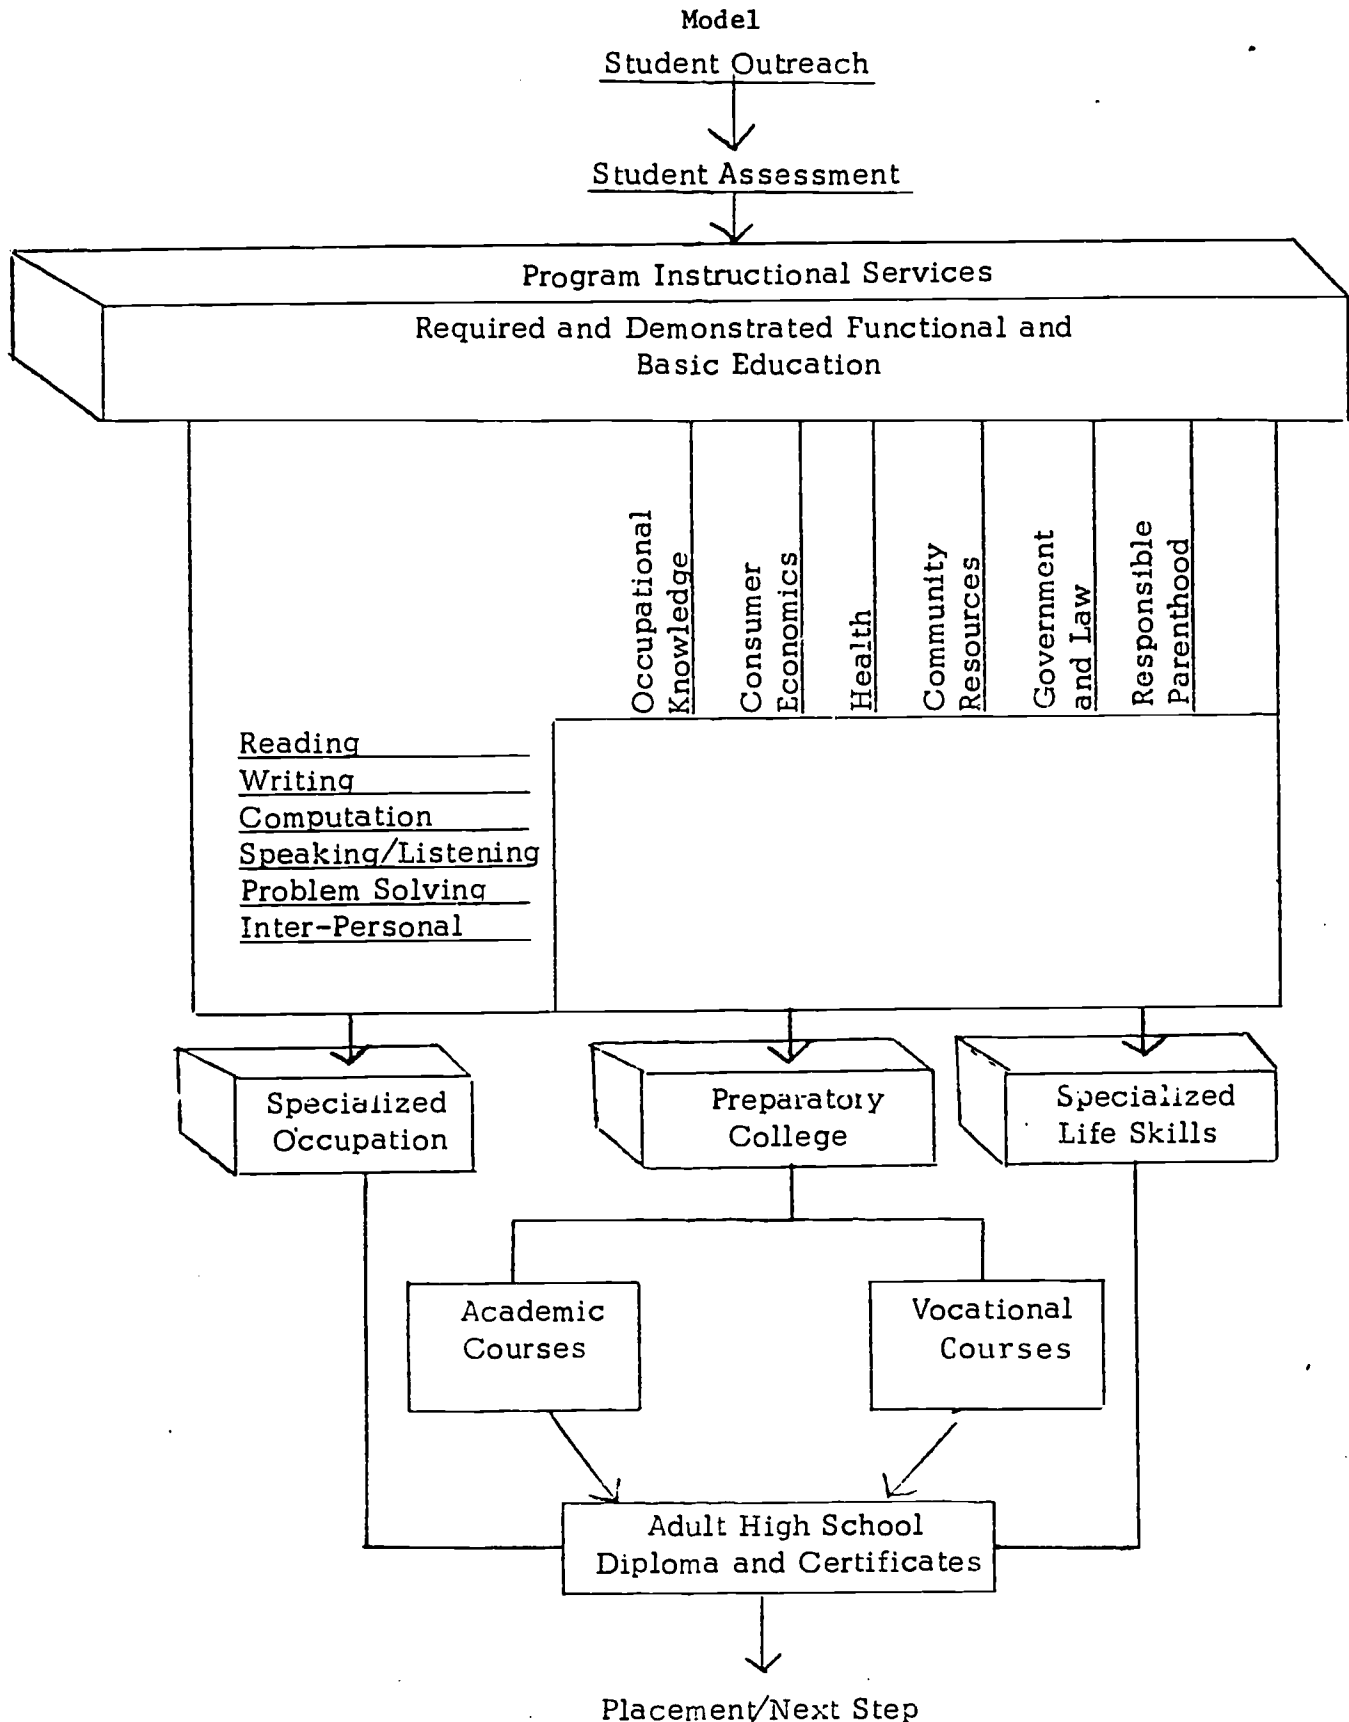

1. Development of a set of adult needs or requirements for adult living, the satisfaction of which is necessary for success in adult life.
2. Engage in an analysis of the skills and knowledge needed to satisfy the requirements and/or needs identified in Item "1" above.
3. Establish the criteria for success in society.
4. Develop the relationship between the behavior and success criteria. (The Utah Adult Education Plan, May, 1979, pp. 132-133).

The model provides a four step IEP for each student:

1. assessment,
2. placement in or waiver of "Demonstrated Functional and Basic Education,"
3. tracking in high school credit classes (leading to a diploma) based on student career goals and
4. placement.

The IEP for Salt Lake Community High School follows the model, adapting and expanding it as needed.

Basic and Functional Public Adult Education

IIIUSTRATION #5

Informal Counseling Session: Since the adult student often comes back to school with preset fears and failure experiences, it is important that the initial interview be relaxed and informative. Its primary purpose is to start the student believing he can succeed at the school. It includes an orientation to the processes of adult education, an explanation of the options available to the student, and general questions about the student's interests and background. As much time is taken as necessary to enable the student to relax and feel comfortable.

Initial Testing: At a point when the student seems ready, the counselor/ registrar asks the student if he would like to take a couple of surveys to get an idea of his current skill levels. If the student doesn't object, the Wide Range Achievement Test (WRAT), which is a graded word list, is administered. Test results provide an approximate reading level of the student so that one who has reading difficulty can be counseled into proper classes. In addition, it provides content area teachers with some idea of the student's reading abilities for the purpose of individualizing instruction.

The second test administered is the forty-point Adult Performance Level Survey which provides a measurement of the student's functional competency levels. Those scoring on competency level 1 (below average) in any area are considered "functionally incompetent" for that area only and are placed in appropriate functional or basic education classes. All others are placed in high school credit or GED classes.

Both the WRAT score and the APL scores are entered in the student IEP.

In some cases, particularly adults who have years of successful work experience behind them and appear to be competent and confident of their own abilities, a pre-graduation competency test is given, rather than the "initial" testing explained above. Often these individuals need little or no brush-up and are ready for graduation if they pass the competency test. These persons usually know exactly what they want career-wise, and the IEP program would not be needed or wanted.

Evaluation of Credits and Adult Experience: The student works with the counselor to complete the Educational Plan Sheet (see ill. #6), a preliminary IEP worksheet, which includes personal information, credits required for graduation (both those already earned and those needed) and information about work experience and student objectives. If records are not immediately available, the sheet is completed to the best of the student's memory and updated later. The next step in the IEP is to determine where the student is in relation to high school graduation. If the student has had vocational training, work experience, or other adult experience for which he might be given credit, he will be asked to complete the form, "Resume of Adult Experience" (see ill. #7). If the possibility for credit exists, he is assisted in obtaining verification of those experiences (i.e. letters from employers, military records, trade school records, GED information. etc.). EDUCATIONAL PLAN SHEET INSTRUCTIONS

Preparation

1. a. The student should complete the information at the top of the Plan Sheet as part of the registration procedures.
b. Student should fill out Resume of Adult Experience Form.
2. Counselor should check to be sure all information has been completed.
3. Explain to the student the use of the Plan Sheet, and ask him/her to write "Objectives" in the box provided.
4. Ask the student to sign the "Commitment."
5. Counselor who evaluates the credit should write name and date in empty box at the bottom.

The Evaluation (which may take place at a later date after the transcript has been received.)

1. Explain graduation requirements to the student and circle appropriate figures on the green Plan Sheet.
2. Check the year the student was enrolled in the 9th grade. If the student was enrolled in the 9th grade before 1975-76, 16 credits are required from 10th to 12th grades. Students in the 9th grade after 1975-76, need 22 credits from 9th to 12th grades. After determining which category the student is in, circle the required number on the Plan Sheet.
3. Be sure to list Source of Credits:
(a) Credit from regular high school, list grade level.
(b) Credit from other sources, name the source.
4. Work experience: List employer's name and approximate dates of employment (to be verified by letter).
5. Be alert for possible training experiences. One good way is to make use of the Resume of Adult Experience form.
6. If you grant credit for adult experience not verified by documentation, initial the credit allowed.
7. Keep the Unit column clear of extraneous figures -- list totals lightly at the side, etc.
8. Make 2 copies of the sheet. Give the student 1 copy and put the other in the student's 2nd period teacher's box.
9. Put the original in the folder with the IEP.
10. Determine schedule for student and assign classes.

SALT LAKE COMMUNITY HIGH SCHOOL

GRADUATION REQUIREMENTS

Revised October 3, 1978

I. Students who were in the 9th grade in 1974-75 or before:

(12th grade in 1977-78 or before)
(birthdate generally previous to Sept. 15, 1960)

16 units required (10th grade through 12th)

Language Arts	3 units (2 must be English)
Math	1 unit
Social Studies	2 units (1 must be U.S. History)
Science	1 unit
Electives	9 units

OR 22 units (if 9th grade is used)

Language Arts	4 units
Math	2 units
Social Studies	3 units
Science	2 units
Electives	11 units

II. Students who were in 9th grade in 1975-76 or after:

(12th grade in 1978-79 or after)
(birthdate generally after Sept. 15, 1960)

22 units required (9th grade through 12th)

Language Arts	4 units
Math	2 units
Social Studies	3 units (to include U.S. Hist. & Geog.)
Science	2 units
Electives	11 units

If the student didn't have 9th grade, the counselor may use professional judgment in finding options for the individual.

Possible options:

Testing for 9th grade competency (APL Survey)
Waiving of certain subject matter requirements,
but staying within State requirements--
and 22 units total

Others, at discretion of counselor

RESUME of ADULT EXPERIENCES

To be evaluated for possible high school credit

Name _____

Date _____

→ Schools, colleges, or training programs attended since leaving high school:

Dates Beginning Ending	School or Program	City/State

→ Military Service:

Dates Beginning Ending	Branch of Service:
	Courses taken in Military (other than Basic Training): _____ _____

→ Work Experience: (List only those jobs you held for 6 months or more)
(Begin with most recent job)

Dates Beginning Ending	Name of Employer or Company	City/State

→ Homemaking or Home Maintenance skills for which you have at least one year of experience

Explain:

How long has it been since you were last in school? _____

How did you happen to come to us? _____

You may have credit on file at our school if you have been enrolled in any of the following programs during the past 12 years. Please check the list.

	<u>Year</u>
___ SER Program	___
___ Skills Center (U. Tech):	___
Project Cooperation	___
CETA	___
EBCE	___
___ Utah Tech. College (Redwood)	___
___ Matheson Head Start or G.E.D.	___
___ SOCIO (Jackson)	___
___ G.E.D. Prep. in any Community School	___
___ Adult Basic Ed. or Citizenship (South High)	___
___ Northwest Multiprp.Center	___
___ Veterans Upward Bound (U of U)	___
___ Apprentice Outreach	___
___ Odyssey House	___
___ Utah O.I.C.	___
___ WIN Manpower (Oquirrh, McKinley, or Irving)	___
___ Neighborhood Youth Corps	___
___ Jefferson Free School	___
___ Project New Pride, or Youth Pride	___
___ Phoenix Institute	___

ADULT EXPERIENCE CREDIT which may be given upon evaluation by a counselor:

- Military Service --(3 units allowed for basic training)
 --(some persons will have had extensive vocational training)

- G.E.D. Tests --Must have passed all five tests with average of 45 or above, no score less than 40 (Utah requirement)

- Employment --continous employment for 6 months or more (to be verified) .5 unit for 6 months

- College, university,
 technical, business,
 vocational school --one unit for each 5 quarter hours

- Driver's license --one/half unit if no Driver Training in school

- On-the-job training which developed a special skill

- Teacher aide or volunteer worker

- Training for a vocation, apprenticeship, etc.

- Verifiable music lessons, dance, drama activities, etc.

- Foreign language

- Extensive world travel

ILLUSTRATION 7a

provides the base for determining which adult high school classes the student takes. The procedures for completing the sheet and graduation requirements are listed following illustration #7.

Aptitude and Career Testing: After the student has been attending two weeks or after official transcripts and experience verification have been received, the counselor and student meet again to update the plan sheet and to discuss career goals. The student is introduced to the career education materials available at the Community Education Library, to the opportunities at the Career Guidance Center, and to tests available at the University of Utah Testing Center. The student indicates what he would be interested in, and the counselor makes all necessary arrangements. The information is recorded on the IEP.

Ongoing Counseling Procedure: The counselors will visit classes on a scheduled basis to work with students on aspects of the IEP and Career Education and to make appointments for follow-up conferences, scheduling, testing, etc. When the student is near graduation, the counselor will work with him/her for placement in further education or on a job.

Teacher Advisory System: Since it is difficult for the counselor to maintain contact with all of the adult students, teachers in the day school serve as advisors to their second period students. The teachers receive a copy of the educational plan sheet of each student and are given access to the IEP of each advisee. Teachers are expected to be aware of the students' progress towards a diploma and of student counseling needs. They update the plan sheet at least once per quarter, make students aware of school services, arrange for group counseling sessions, and work closely with the counselor on individual needs.

Clustering Classes: When the career education process identifies specific areas of interest for a student, the student and counselor work together to develop class or experience clusters to meet those interests. In the event the school cannot provide the courses or experiences desired, the counselor works with other agencies to develop a program. High school credit is awarded for the programs and may be substituted either for required credits or used as electives depending upon competencies developed.

Many adults come back to school having been self-taught in such required subjects as English, social studies, and mathematics. Rather than requiring such students to take those classes, they are given an opportunity to take the final examinations for the courses. The classes are waived if the examination is passed. That student may then elect to cluster classes for the remainder of credits needed.

Summary: The forms and procedures developed come together as a relatively simple yet complete IEP process for the adult student. The counselor, registrar, and teacher advisor must work closely to assist the student in overcoming barriers and achieving goals.

The nine functions discussed come together on the IEP form (111. #8) which becomes the student's permanent record. This is printed in folder form. The Educational Plan Sheet and the Resume of Adult Experience are inserted into the record so that all data pertinent to that student's education is in a single location.

Train Adult Educators in the use of the IEP

Since the teacher is the primary contact most adult students have with the school, the development team felt that teachers should be trained in all aspects of the Individual Educational Plan. Twenty teachers participated in a ten-week, thirty hour workshop in use of IEP instruments, procedures, and techniques. The workshop included the following:

1. Introduction:
 - a. Community Education and how it relates to Adult Education
 - b. Reasons for the IEP for the adult student
 - c. Background and information about the proposal for developing an adult IEP
2. Awarding of Credits for Adult Students:
 - a. History & Background
 - b. Overview of the high school requirements for Salt Lake City School District
 - c. Written assignment
3. Models:
 - a. State adult high school model
 - b. Teacher Advisory System
 - c. Overview of an IEP as developed by the staff team
4. Intake Testing, Review, and Evaluation (teachers took the tests):
 - a. WRAT
 - b. APL (40 and 100 point)
 - c. ABLE
5. Evaluation:
 - a. Teacher feedback regarding tests
 - b. Practice in completing Educational Plan Sheets from student records
6. An added perspective to the IEP: Career Education
7. Aptitude and Career Testing (Participants took 5 of the following tests)
 - a. Temperament and Values Inventory
 - b. Self Description Inventory
 - c. Career Maturity Inventory
 - d. General Aptitude Test Battery
 - e. Mooney Problem Checklist
 - f. Kuder Preference Inventory
8. Observation and Participation in the Career Guidance Center
9. Articulation of Adult Education curriculum and IEP process

10. Final Evaluation

Final Evaluation of IEP Workshop by participants

1. The following were identified as strength of the workshop sessions:
 - presentation of the total concept of the Individual Education Plan
 - information about testing available to adult students
 - incorporation of outside resources for the implementation of the IEP with the adult student
 - development of awareness so that teachers can help coordinate all efforts of the student, not only academic
2. The following were weaknesses of the workshop sessions:
 - lack of a clear, concise idea of how the IEP may be utilized with non-English-speaking students
 - disappointment with two guest speakers
 - too much information to digest well
 - not enough information for precise understanding of how IEP will work in our school
3. The following were considered to be the most important roles played by the teacher in implementing the IEP:
 - teacher as advisor
 - resource person to the student
 - helper in devising a meaningful curriculum for the student and relating the curriculum to their goals
 - willingness of a teacher to give extra time and effort to make the IEP process meaningful for the student
4. Participants stated the following as being the most informative workshop sessions:
 - visit to the Career Guidance Center
 - career test taking and interpretation
 - presentation by state board members on career counseling
5. In response to the question of how the total concept of career education can best be implemented in our adult education program, participants generally felt that our adult education program should offer a career counseling center that provides general classes or presentations and screens and selects students for referral to other agencies. The career counseling must be closely coordinated with the total IEP of each student.

IV

Implement IEP System at Salt Lake Community High School

During Spring quarter, 1980, the IEP was implemented at Salt Lake Community High School with all new students. Approximately 100 students participated in the process. Reactions were generally favorable. Students felt that they were given a good understanding of the way adult high school functioned and that the initial testing helped them recognize their own strengths and weaknesses. They had a particularly favorable response to the "caring attitude" of the counselor, registrar, and teachers.

Perhaps the most significant result was not with the students but with the teachers. They expressed greatly increased awareness of the needs of the adult students not only in the academics but also in the area of personal development needs.

V

Conclusions and Implications

The Individual Education Plan is the essential part of the adult student's process whether returning to school for a high school diploma or simply taking classes. With all the components of the IEP incorporated, the student can combine the past life events, plan for the present and realistically face the future knowing the direction he desires and is capable of pursuing.

In order for the IEP to become reality, the concept must be understood and embraced by all school personnel working with the student, administrators, teachers, counselors and registrars. An overview of the IEP must be given to the student in the intake process and more thoroughly explained during the first few weeks of enrollment. Too, it would be the responsibility of the counselor to inform new teachers of the IEP concept.

In making the IEP feasible and meaningful for the student, the counselor must be involved in a scheduled time in which the student may work on the present and future aspects of this plan. Because the time element is so often a barrier to the adult student's participation in anything other than academic work, credit would be granted for the completion of different aspects of the IEP, particularly in career education process.

The financial factor of incorporating the IEP into the already existing adult education program does not seem insurmountable. The most costly aspect of the plan as described in the workshop sessions in addition to the salary of a full-time counselor which many programs

presently have, would be the career education and testing materials. Often, resources in the community could be utilized, thus complementing and enhancing the adult education program already in existence.
