## ABSTRACT

This abstract bibliography of approximately 200 references looks at various aspects of inclusive schools. References are a result of computer searches of three databases: the Educational Resources Information Center (ERIC), Exceptional Child Education Resources, and the Western Regional Resources Center. Preliminary information includes directions for using the bibliography; a sample document resume; and information on obtaining full texts of journal articles, documents, theses and dissertations. Citations are grouped into the following topic areas: (1) collaboration between regular and special education; (2) assessment (including prereferral intervention); (3) staff development; (4) changing roles and responsibilities; (5) administrative concerns/planning and accountability; (6) instructional and curriculum strategies; (7) interagency coordination; (8) principles of good practice; (9) philosophy, history, and viewpoints; and (10) media. # UNDERSTANDING YOUR TOPICAL BIBLIOGRAPHY

This Topical Bibliography was developed by running a computer search of three databases: The Educational Resources Information Center (ERIC), Exceptional Child Education Resources (ECER), and the Western Regional Resources Center (WRRC). References generated by the computer search were then reviewed and selected by professionals in the field.

The ERIC database contains more than 400,000 journal annotations and 300,000 education related document abstracts. The ECER database supplements the abstracts of journal articles and educational documents in the ERIC database with citations from doctoral dissertations and commercially published materials. The ECER database contains more than 70,000 abstracts of published literature in special education.

## How to Read the Citations

Most of the references contain three sections: (1) bibliographic information, (2) indexing information, and (3) an abstract of the document (see Form 1: Sample Document Resume).

- (1) The bibliographic section provides:
  - a. Accession number or clearinghouse accession number (for ERIC and ECER, this will be ED,EJ, or EC followed by 6 digits)
  - b. Author
  - c. Title
  - d. Organization
  - e. Publication date
  - f. Availability from document reprint service such as UMI or EDRS.

**Note:** Most documents are NOT available from the ERIC Clearinghouse or CEC.

- (2) The descriptors and identifiers are the index terms for the subject matter in the document. Index terms are selected according to a controlled vocabulary set by the database producers.
- (3) The abstract provides an overview of the document contents. However, not all citations provide abstracts.

## How do you obtain actual copies of the documents listed in your search?

Three basic types of references will appear in your search:

- (1) Journal articles (in ERIC or ECER, this will be an EJ followed by 6 digits). Copies of journal articles can usually be obtained from one or more of these sources:

- a. *The periodical collection of a library.* Call or visit your local university, professional, or public library to determine whether they carry the journal you are seeking.
- b. *University Microfilms International (UMI) or other article reprint service.* A reprint service is available from UMI for many of the journals cited in your search. A note appears in the citation that a reprint is available from UMI.

UMI articles are reproduced to approximately original size, to a maximum of 8-1/2 x 11 inches. All material on a page is copied, including advertising. Line drawings such as maps, tables, or illustrations are reproduced with close approximation to the originals. Photographs do not reproduce well, but arrangements can be made for special high-quality reproduction on photographic paper. The scheduled turnaround time from UMI is three days, and the price includes postage via first class mail.

A mail or facsimile order form and a price list for obtaining reprints from UMI is included with this Topical Bibliography (see Form 2).

- c. *The journal publisher.* The ECER Source Journal Index (Form 3) lists the publishers' addresses for journals abstracted in ECER. You may find the larger ERIC Source Journal Index in the Current Index of Journals in Education found in many libraries. Source journal indices for other databases may be found by calling the appropriate database producer. These numbers can be obtained from major databases vendors, e.g., DIALOG Information Services (800-3-DIALOG) or BRS (800-289-4277).
- (2) Documents available from the ERIC system (in ERIC or ECER, this will be an ED followed by 6 digits).

ERIC documents will have an ED number (ED followed by 6 digits) in the first line of the citation. Many of these documents are part of the ERIC Microfiche Collection. Over 700 libraries in the U.S. subscribe to the ERIC Microfiche Collection. In these libraries you can see and often make photocopies of documents (for a minimal fee).

To locate the ERIC Microfiche Collection nearest you, call ACCESS-ERIC at 1-800-LET-ERIC.

Copies of most ERIC documents are also available from the ERIC Document Reproduction Service (EDRS) at 1-800-443-ERIC. Use Form 4 to order these documents.

To find out if a document is available from EDRS, check the first line of the citation for an ERIC Document number (an ED followed by 6 digits). Occasionally, you will see ED followed by an abbreviation for a month and the letters RIE (e.g., EDJUNRIE). This means the ED number was not available when the abstract was produced, but the document will be available from EDRS. Next to "EDRS" you may also find one of these notations:

Not Available - This document is not available from EDRS. Check the citation for another source of availability.

MF; PC - The document is available from EDRS in either microfiche (MF) or paper copy (PC) format.

MF - The document is only available on microfiche.

- (3) Commercially published materials (in ECER, this will be an EC followed by 6 digits).

Citations of commercially published materials (books, films, cassettes, training packages, and other materials) will include the publisher's name and address and a price (whenever possible). These materials can be purchased from the publisher. Keep in mind that prices change and some products go out of print.

**Note: Neither the Council for Exceptional Children, the CEC/ERIC Clearinghouse on Disabilities and Gifted Education, or the Western Regional Resources Center provides photocopies of the documents or articles listed in this search. CEC/Sales, however, will sell back issues of journals published by CEC, depending on availability.**

If you have any further questions about this Topical Bibliography, please call CEC/ERIC at 1-800-328-0272.

# Sample Document Resume

(for Resources in Education)

ERIC Accession Number—identification number sequentially assigned to documents as they are processed.

Institution. (Organization where document originated.)

Language of Document—documents written entirely in English are not designated, although "English" is carried in their computerized records.

Publication Type—broad categories indicating the form or organization of the document, as contrasted to its subject matter. The category name is followed by the category code.

ERIC Document Reproduction Service (EDRS) Availability—"MF" means microfiche; "PC" means reproduced paper copy. When described as "Document Not Available from EDRS," alternate sources are cited above. Prices are subject to change; for latest price code schedule see section on "How to Order ERIC Documents," in the most recent issue of RIE.

 Descriptors — Career Guidance, \*Career Planning, \*Demand Occupations, \*Employed Women, \*Employment Opportunities, Females, Labor Force, Labor Market, Postsecondary Education  
 Identifiers — Consortium of States, \*National Occupational Competency Testing Institute  
 Women's opportunities for employment will be directly related to their level of skill and experience and also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1990 and 1999, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information (in English and in Spanish) concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance that are available to them. (Contains 45 references.)

## FORM 2

# UMI Article Clearinghouse Price Schedule 1992

## STANDARD SERVICE

### Coverage

There are more than 12,500 titles in the Clearinghouse program--scholarly and technical journals, popular magazines, conference proceedings and transactions, newspapers, and government documents.

### Copyright compliance

The 12,500+ titles represent contracts with more than 4,000 publishers. UMI pays a royalty or copyright fee on every copy sold directly through the Clearinghouse.

### Turnaround

Standard Service	2 working days (does not apply to pre-1988 material, which is shipped within 4 days)
Rush 1st Class	Same day processing and shipment of orders placed before 1:30 pm EST*
Rush Overnight	Same day processing and shipment of orders placed before 1:30 pm EST*
Fax Delivery	Same day processing and transmission of orders placed before 1:30 pm EST*

\*(orders placed later are shipped/transmitted the next day)

### Base Prices (per article)

Account Purchases	\$ 8.50 (1000+ articles/year)
	\$10.50 (1-999 articles/year)
Non-Account Purchases	\$12.50

### Delivery Surcharges

Artifax	\$10.00 per article plus 35¢/page over 20 pages
Rush 1st Class	\$5.25 handling fee per article
Rush Overnight	\$5.25 handling fee per article and \$10.50 per courier package
Artifax International (outside US and Canada)	--\$26.50 per article plus \$2.25 per page over 20 pages
Airmail International (outside US, Canada, and Mexico)	--\$2.50 per article

### Special Service Charges

American Society for Testing and Materials (ASTM) Standards--\$14.75.  
Full Issues--\$48.00 (including UPS shipping and handling)  
Multiple copies--\$2.50 for each additional copy of an article (2-49 copies)  
Please inquire for quantity discounts available on orders for 50 or more copies.

### Call UMI Article Clearinghouse:

800-521-0600, ext. 2533 or 2534

Or fax 313-665-7075

Or call UMI/Data Courier toll-free 800-626-2823,  
ext. 205, 253, 254, or 256

Or fax 502-584-1416

**Now Available--Articles from  
the ABI/INFORM® Collection  
800 key business and management journals**

- same low Clearinghouse per-article price
- "Rush Overnight" orders taken up to 4pm for next-day delivery
- ABI Standard Service orders received before 1:30 pm EST sent next working day

## ECER Source Journal Index

CEC regularly receives more than 200 journals that are scanned for material concerning exceptional children. Articles selected on the basis of established criteria are abstracted and indexed for *EXCEPTIONAL CHILD EDUCATION RESOURCES* (ECER). Some of these articles are indexed and submitted for announcement in *CURRENT INDEX TO JOURNALS IN EDUCATION* (CIJE), an Educational Resources Information Center (ERIC) publication. The following list is of journals from which articles were abstracted (current February 1994).

- \*Academic Therapy, see Intervention in School and Clinic**
- \*ACEHI Journal** (Journal of the Association of Canadian Educators of the Hearing Impaired), University of Alberta, Dept. of Educ. Psychology, 6-102 Education North, Edmonton, Alberta, T6G 2G5 Canada
- The Adapted Physical Activity Quarterly**, Human Kinetics Publishers, Inc., 1607 N. Market St., Champaign, IL 61825-5076
- Advanced Development**, Snowpeak Publishing Co., Inc., PO Box 3489, Littleton, CO 80122
- \*\*American Annals of the Deaf**, Gallaudet, KDES, PAS-6, 800 Florida Ave., N.E., Washington, DC 20002
- †American Journal of Art Therapy**, Vermont College of Norwich University, Montpelier, VT 05602
- \*American Journal of Occupational Therapy**, 6000 Executive Blvd., Suite 200, Rockville, MD 20852
- \*American Journal of Speech-Language Pathology**, American Speech-Language-Hearing Association, Membership Operations Branch, 10801 Rockville Pike, Rockville, MD 20852-3279
- \*\*American Journal on Mental Retardation**, 1719 Kalorama Rd., N.W., Washington, DC 20009
- American Rehabilitation**, Superintendent of Documents, U.S.G.P.O., Washington, DC 20402

### INTERNATIONAL:

- Based on International Postage Rates in effect
- Allow 160 Microfiche or 75 Paper Copy pages per pound
- Specify exact mail classification desired

## DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC Documents may open a Deposit Account by depositing a minimum of \$300.00 (Domestic Customers); \$ 500.00 (International Customers). Once an account is opened, ERIC Documents will be sent upon request, and the account charged for the actual cost and postage. A statement of the account will be furnished with each order.

## STANDING ORDER SUBSCRIPTION ACCOUNTS

Subscription Orders for documents in the monthly issues of Resources in Education (RIE) are available on microfiche from EDRS. The microfiche are furnished on diazo film and without protective envelopes at \$0.120 per microfiche. If you prefer silver halide film, the cost is \$0.249 per microfiche, and each microfiche is inserted into an acid-free protective envelope. Prices are effective January 1, 1994 and are subject to change without notice. Shipping charges not included. A Standing Order Account may be opened by depositing \$2,400.00 or submitting an executed purchase order. All orders placed from outside the domestic U.S. must be prepaid. The cost of each issue and shipping will be charged against the account. A monthly statement of the account will be furnished.

## BACK COLLECTIONS

Back collections of documents in all issues of RIE since 1966 are available on microfiche at a unit price of \$0.146 per microfiche. The collections are furnished on diazo film without envelopes. Prices are valid through December 31, 1994, and do not include shipping charges and applicable taxes. For pricing information, write or call toll-free 1-800-443-ERIC.

## GENERAL INFORMATION

### 1. PAPER COPY (PC)

A Paper Copy is a xerographic reproduction, on paper, from microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

### 2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.

Payment terms are NET THIRTY (30) DAYS by check or money order payable to CBIS in U.S. Dollars drawn on a U.S. Bank.

### 3. REPRODUCTION

Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.

### 4. CLAIMS POLICY

CBIS Federal will replace products returned within 6 months of delivery due to reproduction defects or incompleteness caused by EDRS.

EC302236 ED358672

**Title:** Action for Inclusion: How To Improve Schools by Welcoming Children with Special Needs into Regular Classrooms

**Author:** O'Brien, John and others

**Article Info:** 1989, 54+p, LEVL 1

**Sponsoring Agency:** Imperial Oil Co. Ltd., Toronto (Ontario)

**Available From:** Inclusion Press, 24 Thome Crescent, Toronto, Ontario, Canada M6H2S5 (\$12, plus \$3 shipping; quantity: \$10, plus \$3 shipping)

**Document Type:** 055

**Geographic Source:** Canada; Ontario

**Journal Announcement:** RIE

**Target Audience:** Community

**Abstract:** This manual outlines a process for building good working relationships to develop inclusive school environments. It outlines five steps involved in achieving inclusion of children with special needs in ordinary classrooms: (1) clarify the family's intention to include their child in the neighborhood school and get to know the child's dreams and gifts; (2) enlist the principal's help in including the student; (3) enroll the classroom teacher in including the student; (4) involve the student's classmates in welcoming the student to the class; and (5) gather the people involved (students, family members, teachers, and administrators) to develop a process for adaptation of curriculum and class routine, through the MAPS (making action plans) technique. The approach involves designating someone to act as a consultant to facilitate integration; this consultant can work for the school or can begin as an ally of the family and build a relationship with school personnel as the process continues. (JDD)

**Language:** English

**Document Type:** NONCLASSROOM MATERIAL (055)

**Geographic Source:** US; Texas

**Journal Announcement:** RIENOV92

**Government:** State

**Target Audience:** Administrators; Practitioners

**Abstract:** This guide offers specific recommendations to Texas school districts concerning the implementation of least restrictive environment (LRE) requirements for students with disabilities. Suggestions are grouped according to six issues recommended for consideration in the decision making process: These are: (1) the primacy of the individual student's education needs; (2) provision of special education services in as integrated a manner as possible; (3) identification of those services which need to be provided in a more restrictive setting; (4) provision for integration with nonhandicapped students in nonacademic and extracurricular activities; (5) consideration of possible harmful effects of a projected placement; and (6) placement, if possible, in the school which the student would attend if not disabled. Suggestions for dealing with four additional concerns are addressed to administrators. These cover organizational support (administrative assistance, instructional leadership, sufficient resources); the service delivery system and management responsibility; a strategy for systems change; and acceptance of the LRE concept by parents and the community. (DB)

**EC301898 ED No. Not Yet Available**

**Title:** California Research Institute on the Integration of Students with Severe Disabilities; Final Report, Years 1987-1992

**Author:** Sailor, Wayne and others

**Article Info:** Feb 93, 75-p, LEVL 1

**Sponsoring Agency:** Department of Education, Washington, DC

**Contract Number:** G0087C3056

**Available From:** California Research Institute on the Integration of Students with Severe Disabilities, San Francisco State University, 14 Tapia Dr., San Francisco, CA 94132 (for copies of appendices, call 415-338-7847)

**Document Type:** 141

**Geographic Source:** US; California

**Journal Announcement:** RIE

**Abstract:** A 5-year research program, the Research Institute on the Placement and Integration of Children with Severe Disabilities, was conducted to survey current definitions and placement patterns involving large representative samples of children 3 to 21 years old with severe disabilities. Twenty variables, including characteristics of students, families, teachers, administrators, and communities, were identified and analyzed to measure the extent to which each variable affects the probability that students are placed in an integrated or segregated facility. Research, development, and evaluation activities were then performed to increase the effectiveness of special education for children with severe disabilities in integrated settings. Technical assistance was provided to statewide systems change projects on the interventions most likely to promote integration. This report includes descriptions of project activities, including technical assistance, descriptive research, and developmental research, and provides abstracts of 12 research studies conducted. A substantial portion of the report is composed of tables documenting project accomplishments. (JDD)

**Descriptors:** 2Severe Disabilities; 1Mainstreaming; Preschool Education; Elementary Secondary Education; Educational Change; Educational Innovation; 1Educational Practices; 1Student Placement; Influences; Research and Development; 1Research and Development Centers; Change Agents; 1Technical Assistance; Program Evaluation

**Language:** English  
**Document Type:** COLLECTION (020)  
**Geographic Source:** Canada; Ontario  
**Journal Announcement:** RIEJUN92

**Abstract:** The 15 papers in this collection present a Canadian perspective on providing services to children with disabilities in regular classes and schools. The papers are grouped into three sections: Philosophical, Legal and Historical Overview; Parent and Self-Advocacy; and Innovations and Practical Applications. Chapters have the following titles and authors: "Changing Special Education Practice: Law, Advocacy and Innovation" (Gordon L. Porter and Diane Richler); "Inclusive Education as Social Policy" (Diane Richler); "Education: A System of Social Disempowerment" (Marcia H. Rioux); "Access to Equality in Education: The Power of Parents" (S. Dulcie McCallum); "Principles of Change: A Parent's Perspective on the Education System" (David Jory); "The Road to Inclusion: One Family's Story" (Alene Steinbach); "A Will To Learn: The Experiences of a Self-Advocate in the Education System" (Marcia Marcaccio); "The Methods and Resource Teacher: A Collaborative Consultant Model" (Gordon L. Porter); "Leading the Way: The Role of School Administrators in Integration" (Darlene E. Perner); "The Role of the Classroom Teacher" (Margaret Murray); "Implementing Multi-Level Instruction: Strategies for Classroom Teachers" (Jean Collicott); "Problem Solving Teams: A Thirty-Minute Peer-Helping Model" (Gordon L. Porter et al.); "Student to Student: Curriculum and the Development of Peer Relationships" (Julie Stone and Charlotte Campbell); "Beyond Behaviour: A Case of Social Intervention Strategies for a Student with Challenging Behaviours" (Brian Kelly and Jeff den Otter); "On Campus: Integrated Post-Secondary Education" (Melanie Panitch). **Title:** Cooperative Learning and Strategies for Inclusion: Celebrating Diversity in the Classroom. Children, Youth & Change: Sociocultural Perspectives  
**Author:** Putnam, JoAnne W., Ed.  
**Article Info:** 1993, 188p  
**Rep:** ISBN-1-55766-134-0  
**Available From:** Paul H. Brookes Publishing Co., PO Box 10624, Baltimore, MD 21285-0624 (\$20)  
**Document Type:** 010; 020; 055  
**Geographic Source:** US; Alaska  
**Target Audience:** Practitioners; Teachers

**Abstract:** This book is intended to assist educators to meet the needs of diverse children with varying cognitive abilities; developmental and learning disabilities; sensory impairments; and different cultural, linguistic, and socioeconomic backgrounds. It is based on the premise that children of differing abilities and backgrounds will benefit both academically and socially from cooperative learning. The eight chapters have the following titles and authors: "The Movement Toward Teaching and Learning in Inclusive Classrooms" (JoAnne W. Putnam); "The Process of Cooperative Learning" (JoAnne W. Putnam); "Curricular and Instructional Adaptations for Including Students with Disabilities in Cooperative Groups" (Ann Nevin); "Redefining the Role of the Special Educator and Other Support Personnel" (Richard A. Villa and Jacqueline S. Thousand); "Cooperative Classroom Management: Student Needs and Fairness in the Regular Classroom" (Luanna H. Meyer and Leah A. Henry); "Supporting Young Children's Development Through Cooperative Activities" (JoAnne W. Putnam and Loraine J. Spenciner); "Cooperative Learning and Cultural Diversity: Building Caring Communities in the Cooperative Classroom" (Dilafuz R. Williams); and "Innovative Classroom Programs for Full Inclusion" (Jo Jakupcak). Each chapter includes references. (DB)

**Descriptors:** 2Cultural Differences; 2Disabilities; Elementary Secondary Education; Special Needs Students; Social Integration; Mainstreaming; Limited English Speaking; Minority Groups; Socioeconomic Influences; 1Cooperative Learning; 1Teaching Methods; 1Classroom Techniques; Special Education Teachers; Teacher Role; Humanistic Education

**Author:** Jakupcak, Jo; Rushton, Richard  
**Article Info:** Aug 92, 7+p, LEVL 1  
**Document Type:** 141  
**Geographic Source:** US; Montana  
**Journal Announcement:** RIE

**Abstract:** The "Teach Me To. . . Teach Me, Too!" program is designed to meet the needs of secondary students with disabilities within the regular educational setting and with the regular educational curriculum. It utilizes a team teaching approach, allowing the regular educator and the special educator to work as a true team in an efficient and effective manner. The model involves pre-teaching key concepts to those students identified as having special learning needs; then teaching the entire class, often using cooperative learning groups; and subsequently giving special needs students an opportunity to review key concepts before testing occurs. The regular educator teaches course content, and one day a week the special educator presents a lesson on learning per se, focusing on learning styles, time management, notetaking, test-taking strategies, and other topics. Of 10 students with special needs who took part in this supported educational effort, all passed the course with a grade of "C" or better. (JDD)

**Title:** The Education of Students with Mental Retardation: Preparation for Life in the Community. ARC Facts Education Series

**Author:** Wehmeyer, Michael

**Article Info:** The Association for Retarded Citizens. Arlington, TX arcfacts, Mar 1991 Mar 1991 3p.

**Available From:** The Association for Retarded Citizens, 2501 Avenue J, Arlington, TX 76006

**EDRS Price:** MF01 plus postage; PC not available from EDRS

**Language:** English

**Document Type:** REVIEW LITERATURE (070); SERIAL (022)

**Geographic Source:** US; Texas

**Journal Announcement:** RIEMAY93

**Abstract:** This fact sheet discusses the preparation of students with mental retardation for life in the community. It presents the position of the Association for Retarded Citizens (ARC) on the education of students with mental retardation, lists the school experiences that best prepare students for life in the community, examines how views of the role of education for students with mental retardation are changing, discusses whether all students should spend all of their time in regular classrooms, compares integration and inclusion with mainstreaming, points out why placement in an age-appropriate integrated setting is important, addresses the family's role in determining appropriate education programming and placement, notes how preparation for employment is accomplished, and presents ARC's role in facilitating quality education. (JDD)

**Title:** Facilitating and Measuring the Team Process within More Inclusive Educational Settings

**Author:** Utley, Bonnie L.

**Article Info:** May 93, 24p, LEVL 1; in Kupper, Lisa, Ed. National Symposium on Effective Communication for Children and Youth with Severe Disabilities (2nd, McLean, Virginia, July 10-12, 1992): Topic Papers, Reader's Guide and Videotape; see EC302252

**Document Type:** 150; 120; 055

**Geographic Source:** US; Pennsylvania

**Journal Announcement:** RIE

**Target Audience:** Practitioners; Administrators

**Abstract:** This paper describes how the movement of students with severe disabilities to more inclusive settings impacts on the team process, particularly with regard to the development, implementation, and evaluation of communication intervention. First, the characteristics of transdisciplinary teams as they operate in more inclusive settings are described, followed by a categorization of team processes as either team "functions" or team "structures." Team functions include assessment, goal-setting, and service provision. Team structures refer to how teams are organized (e.g., who should be part of the team) and roles within teams (e.g., facilitator, observer, recorder) as well as the mechanisms team members use to arrive at a consensus in decision-making. The importance of the team in identifying both the vision that its members hope to realize and the goals of inclusion for each student is stressed. The paper concludes with recommendations for future efforts to enhance collaboration among team members working with this population. (41 references) (Author/DB)

**Journal Announcement:** RIE

**Abstract:** The Federal Resource Center for Special Education (FRC) was established to provide consultation, training, and technical assistance to Regional Resources Centers (RRCs) in order to enhance the quality and consistency of technical assistance content provided to State Education Agencies. FRC efforts focused on the Office of Special Education Programs' (OSEP's) designated national priorities, which include improving state policies that ensure access and inclusion and issues related to improving outcomes for children with disabilities. This report outlines project tasks, presents the conceptual framework for the project, describes technical assistance activities initiated, evaluates the project, and examines project impact. Specifically, the FRC identified, documented, and reported significant issues and trends in special education, including those involved with the Comprehensive System of Personnel Development (CSPD) and enhancing services for children from minority backgrounds; facilitated information exchange among the RRC network and other federally funded technical assistance providers; strengthened RRC services through information exchange, consultation, and training; organized, synthesized, and disseminated knowledge concerning attention deficit disorder; and facilitated the evaluation of technical assistance by RRCs and OSEP. **Language:** English

**Document Type:** NONCLASSROOM MATERIAL (055); POSITION PAPER (120)

**Geographic Source:** US; Massachusetts

**Journal Announcement:** RIEAUG92

**Target Audience:** Practitioners; Policymakers; Administrators

**Abstract:** These recommendations concerning the integration of students with and without disabilities in public schools begin with an operational definition of integration and a list of general parameters guiding successful integration. Recommendations are then offered in several areas, including: (1) training, which should be systematic, comprehensive, inclusive, multimodal, and professional; (2) staff, who should have critical collaborative planning skills and skills in utilizing various service delivery models based on students' individual needs; (3) class size, which should be flexible based on students' needs and with consideration given to optimal proportions of students with and without disabilities; (4) curriculum, with modifications designed to meet individual needs and to facilitate integration of all students; and (5) a phase-in plan for systematically increased inclusion of students into general educational programs at all levels and in all schools. The paper concludes that successful integration requires multilevel restructuring, a commitment to share responsibility between general and special educators, and viewing the child as a part of a community. **Title:** Implementation of P.L. 94-142 and Its Accomplishments, Problems and Future Challenges: A State Education Agency Perspective

**Author:** Schrag, Judy A.

**Article Info:** In The Futures of Special Education: Proceedings of the CEC Symposium (Lake Geneva, WI, May 1986); see EC191717. ERIC 279140, 1987, 34+p, LEVL 1 120; 150

**Document Type:** 120; 150

**Geographic Source:** US; Virginia

**Abstract:** Written from the perspective of a state director of special education, the paper identifies and discusses accomplishments in special education during the 10 years since p.L. 94-142 was enacted, current problems and issues, and future challenges within the following key areas of change: (1) access to education for all handicapped children; (2) continuum of services from birth to adulthood -- early childhood intervention; (3) continuum of services from birth to adulthood -- transition programs for older students with handicaps; (4) least restrictive environment (5) special education manpower; (6) monitoring of special education programs/related services; (7) programs for gifted students. The author notes the increasing financial challenges facing special education but predicts solidified regular and special education partnerships, programming for unserved and underserved groups of handicapped students, improved implementation of the continuum of services delivery approach, increased effective integration of severely handicapped into the public schools, maintenance of procedural safeguards while reducing the legalistic burdens on special education, increased emphasis on technical assistance in state monitoring of special education programs, and continuation and enhancement of gifted programming. **Geographic Source:** US; Vermont

**Journal Announcement:** RIE

**Target Audience:** Administrators; Practitioners

**Abstract:** This manual presents guidelines to assist Vermont schools in the systems change involved in implementing full inclusion for students with disabilities in general education classrooms and community settings. The first chapter addresses general issues concerned with full inclusion, including Vermont's vision for education, the role of collaborative teaming, and students with intensive needs. Chapter 2 focuses on student, family, and community involvement in planning, noting possible participants in both the school planning team and the individual student planning team. Chapter 3 looks at schoolwide planning for best practice improvement, with guidelines on: facilitating productive meetings of the planning team, tailoring the process to meet the unique needs of each local school, gathering information about best practices, selecting and prioritizing best practices, and coordinating plans of schools within a district. The individual student team planning process is the subject of the Chapter 4, with guidelines addressing such issues as: initiation of the Individual Student Planning Team Process, Student Planning Team members, and coordinating student needs with general education class activities. Chapter 5 offers guidelines for collaborative teaming, including decision making, problem solving, and meetings. Appendices provide sample forms for both the schoolwide planning process and the individual student planning process. (DB)

**Abstract:** This information sheet summarizes requirements of the Individuals with Disabilities Education Act (IDEA) regarding inclusion of students with disabilities in general education classrooms and lists activities and support systems that have been found successful in fostering such inclusion. Suggestions are given in the areas of attitudes and beliefs, services and physical accommodations, school support, collaboration, and instructional methods. A sample scenario illustrates collaborative teaching by a regular and a special education teacher in a third-grade classroom. Nine resources are listed. (DB)

**Format:** Journal article

**Abstract:** The authors approach social change, such as inclusion, as a developmental process that occurs in carefully planned phases. They present five systematic phases intended for educational leaders to guide the change from segregated to inclusive settings for students with severe disabilities. Those phases are: (1) develop networks within the community, (2) assess school and community resources, (3) review strategies for integration, (4) install strategies that lead to integration, and (5) develop a system of feedback and renewal.

**Abstract:** Definitions of least restrictive environment (LRE), inclusive education, and mainstreaming are offered, supported by position statements and policies of the Michigan Board of Education, Michigan Department of Education, and the Council for Exceptional Children. Thirty-six terms related to inclusive education, such as integrated education and community inclusion advocacy, are listed. Federal and Michigan statutes and regulations regarding LRE are cited. A bibliography of monographs, periodical articles, and reports listed approximately 500 citations on LRE, divided into a section of contemporary literature and a section of historical (pre-Public Law 94-142) literature. A directory of organizational and individual resources concludes the document. (JDD)

**Geographic Source:** US; District of Columbia

**Journal Announcement:** RIEJUN93

**Target Audience:** Policymakers

**Abstract:** This monograph resulted from a meeting of regular and special education leaders which addressed what works for the successful inclusion of students with special needs in regular education classrooms. The monograph focuses specifically on inclusion of students with learning disabilities. After an executive summary, the paper includes a review of the current situation, an analysis of options, recommendations, and a glossary. Recommendations are framed in the form of questions to guide development of state and local strategies toward effective implementation of the least restrictive environment principles. Questions are derived from National Education Association (NEA) policy and position statements and address: (1) educational environment, (2) policies and practices, (3) staff preparation/professional growth, (4) roles and responsibilities, (5) decision making, and (6) rights and responsibilities. A glossary presents definitions of 13 relevant terms including "at-risk students," "inclusive education," and "weighted formulas." (31 references) (DB)

**Document Type:** EVALUATIVE REPORT (142); PROJECT DESCRIPTION (141)

**Geographic Source:** US; Vermont

**Journal Announcement:** RIEJUN92

**Target Audience:** Practitioners; Administrators

**Abstract:** This final report describes: (1) a model designed to help the transition of young children with special needs from early childhood programs into regular kindergarten and other regular education environments; and (2) the impact of TEEM (Transition into the Elementary Education Mainstream) Outreach in disseminating and replicating the model throughout Vermont. The TEEM model stresses the implementation of best practices in transition planning and identifies 5 such practices and 18 associated critical activities. The model also provides a 5-step process for a systemwide transition program. The TEEM Outreach effort provided training institutes to 23 school districts on the development of school/district transition procedures, examined the impact of the TEEM institutes on school/district planning teams, evaluated impact on individual planning team members, and surveyed impact on families (N=28) and on children (including placements, types of transition activities, and critical factors associated with transition planning). Appendices present: a list of the best practices and critical activities; a sample format for TEEM institutes; a worksheet to develop written transition procedures; and sample transition planning forms. **Language:** English

**Document Type:** PROJECT DESCRIPTION (141); EVALUATIVE REPORT (142)

**Geographic Source:** US; Texas

**Journal Announcement:** RIEMAY93

**Target Audience:** Policymakers; Administrators; Practitioners

**Abstract:** This paper presents a summary of the current status of efforts to include students with mental retardation in mainstream educational programs. It begins with a summary of a New Jersey federal court's ruling requiring more inclusive education and a discussion of the commitment of The ARC (formerly The Association for Retarded Citizens of the United States) to greater inclusion. The benefits of inclusive education for students with and without disabilities are briefly reviewed. Summary data (for 1989-90) are then given on placements nationally in eight different instructional arrangements. The next sections provide national and individual state data on the extent to which children with mental retardation are being educated in the following instructional settings: regular classes, resource rooms, separate classrooms, and separate schools. A summary points out that only 6.7 percent of children with mental retardation are being educated in regular classrooms and that children with mental retardation are much more likely than children with other disabilities to be in segregated settings. Ranking of states by a weighted formula finds most states place fewer than 10 percent of children with mental retardation in regular classes. The paper ends with a call to action for policymakers and administrators in the federal, state, and local governments as well as Arc chapter members. An appendix provides a table of state data. (DB)

**Journal Announcement:** RIE

**Abstract:** This report describes the Comprehensive Local School approach to school restructuring, which envisions the school as the coordinating vehicle for all children's services, including health and social services, and which reconfigures and coordinates all categorical programs at the school site under a site-based management system characterized by a participatory decision-making process. The report presents a reprint of an article from the journal "Remedial and Special Education" by Wayne Sailor, titled "Special Education in the Restructured School." The article identifies trends in special education reform, including the movement to integrate students with severe disabilities into general educational schools and classrooms and the effort to retain students with mild and moderate disabilities in the general classroom. The article proposes that reform efforts in general education present an opportunity for amalgamation of related viewpoints through broad-based, school restructuring policy reform. This amalgamation is reflected in regulatory waivers, site-based management and budgetary control, shared decision making, and full infusion of federal categorical program resources into the general education program. A list of 12 organizations that support innovative restructuring efforts by schools is presented, and a list of the schools that these organizations work with in restructuring and reforming educational programs is also provided. In addition, a list is presented of 21 schools that indicated in a survey that they were implementing general and special education reform. (JDD)

**Document Type:** 010; 020; 055

**Target Audience:** Practitioners

**Abstract:** This book discusses inclusive education as a means to help prepare students socially as well as educationally in an integrated classroom setting. Practical strategies are suggested for achieving full inclusion of all students in a mainstream that is challenging to each student but is also adaptive and sensitive to each student's needs. The 16 chapters are divided into three sections. Section I, "Support Networking for Inclusive Schooling" includes: "Inclusive Schooling" (Susan and William Stainback); "Facilitating Support Networks" (Susan and William Stainback); and "The Support Facilitator at Work" (Stainback and Stainback). Section II, "Classroom-Focused Support Options," includes "Facilitating Peer Supports and Friendships" (Stainback and Stainback); "Student Support through Cooperative Learning" (Mara Sapon-Shevin); "Students as Instructional Agents" (Alan Gartner and Dorothy Kerzner Lipsky); "A Team Approach to Program Development and Support" (Terri Vandercook and Jennifer York); "Meeting Diverse Needs through Professional Collaboration" (Marleen C. Pugach and Lawrence J. Johnson); "Meeting Diverse Needs through Collaborative Consultation" (Kathleen C. Harris); "Sharing Expertise and Responsibilities through Teaching Teams" (Jacqueline S. Thousand and Richard A. Villa); "Technology to Support Diverse Needs in Regular Classes" (Donna H. and Dale L. Dutton); and "Supports for Addressing Severe Maladaptive Behaviors" (Marsha Forest and Jack Pearpoint). Section III is titled "Developing Caring and Supportive Schools and Communities," and includes "Administrative Supports to Promote Inclusive Schooling" (Richard A. Villa and Jacqueline S. Thousand), "Families Supporting Inclusive Schooling" (Barbara E. Buswell and C. Beth Schaffner), "Developing a Caring Community to Support Volunteer Programs" (Mary A. Falvey, Jennifer J. Coots, and Kathryn D. Bishop), and "Initial Steps for Developing a Caring School" (Mara Sapon-Shevin). (351 references) PB)

**Category:** Strategies/Implementation  
**Format:** Document

**Abstract:** This document presents outcomes drafted during a two-day meeting of a variety of education experts convened in July 1992 to identify and discuss the complex ramifications of inclusive school proposals on the management, administration, delivery, and effectiveness of education programs and services for students with disabilities and to help initiate the development of a national action plan to address the issues. Four challenges identified by forum participants as critical to the realization of reform to improve educational outcomes for all students were: (1) realignment of special education and regular education orientations and philosophies to embrace the diversity of student abilities, backgrounds, and needs; (2) funding structures that allow for the flexible utilization of resources to meet individual student needs; (3) examination of regulatory impediments to innovation without losing sight of the need to protect the educational rights of vulnerable individuals; and (4) implementation of effective instructional strategies and new approaches to pre- and in-service personnel preparation and deployment.

**Title:** Using a Collaborative Problem Solving Strategy To Facilitate the Mainstreaming of Students with Severe Handicaps: (The Collaborative Education Project); Final Report

**Author:** Salisbury, Christine Evans, Ian M.

**Article Info:** Mar 93, 265+p, LEVL 1

**Rep:** New York State Univ. System, Albany

**Sponsoring Agency:** Office of Special Education and Rehabilitative Services (ED), Washington, DC

**Document Type:** 141

**Geographic Source:** US; New York

**Journal Announcement:** RIE

**Abstract:** The Collaborative Education Project's goal was to assess the effectiveness of collaborative problem solving (CPS) by peer advocates for enhancing the integration of students with severe disabilities in regular early education contexts. The CPS strategy gives some responsibility to nondisabled students for the planning and design of activities and procedures that will ensure greater participation by the students with severe disabilities. Data from the project indicate that: (1) parent attitudes toward mainstreaming are unaffected by the presence of students with severe disabilities; (2) CPS is a useful and valued process for promoting equity and the inclusion of students with diverse needs in general education classrooms; (3) achievement test performance among classmates of students with severe disabilities was equivalent or better than a comparison group; and (4) level of engaged time among typical students was unaffected by the presence of students with severe disabilities. Attached to the report are an instructor's manual for the CPS approach; a CPS manual written by elementary students for other students; and papers with the following titles and authors: "The Effects of Full Inclusion on Regular Education Teachers" (Beverly Rainforth); "Parents as Team Members: Inclusive Teams, Collaborative Outcomes" (Christine Salisbury); "Mainstreaming During the Early Childhood Years" (Christine L. Salisbury); "Peer Interactions and Social Acceptance of Elementary-Age Children with Severe Disabilities in an Inclusive School" (Ian M. Evans and others); "Use of Instructional Time in Classrooms Serving Students With and Without Severe Disabilities" (Tia M. Hollowood and others); and "On the Nature and Change of an Inclusive Elementary School" (Christine L. Salisbury and others). (40 references) (JDD)

**Format:** Document

**Abstract:** This document offers an overview of the Inclusive Elementary and Special Education Teacher Preparation Program which incorporates a general education and special education curriculum. The program incorporates required components of basic skills; liberal arts clusters in the humanities, social sciences, and natural sciences; a professional education core leading to dual certification in elementary (K-6) and special (K-12) education; and a specialization concentration in a chosen field of study in the liberal arts. The program includes extensive field experiences beginning with lower division coursework in school and community settings during the sophomore year, and meets all state and professional accreditation requirements.

**Document Type:** 070; 010  
**Target Audience:** Policymakers; Administrators

**Abstract:** This book outlines current educational options available in the United Kingdom for children with disabilities, outlining and documenting recent trends in special education reform and their practical implications. Major legislation since 1981 is reviewed and legal definitions of special education needs and resources are explained. The differences between students with special needs currently placed in ordinary schools and those in special placements are explored, and it is concluded that educational mainstreaming is first and foremost a moral and social issue, rather than an educational one. Key elements of the ordinary school in need of reform are analyzed, including curriculum, academic organization, and staffing. The range of student grouping systems currently in use is then described, including many intermediate stages between full segregation and full inclusion. An overview is provided of support services available to primary and secondary schools in meeting special education needs, as well as likely support service patterns for the future. A variety of options for cooperation between special schools and regular schools are then outlined, followed by a review and exploration of training and staff development practices. After examining the many possible relationships that can exist between the student's home and school, an accounting framework for examining costs and benefits of different special needs student service systems is provided. **Journal Announcement:** RIE

**Abstract:** The Regular Class Participation System (RCPS) project attempted to develop, implement, and validate a system for placing and maintaining students with severe disabilities in general education classrooms, with a particular emphasis on achieving both social and learning outcomes for students. A teacher-based planning strategy was developed and shared with teacher participants in the project. RCPS sought to relocate preferred educational practices from self-contained to general education settings. Teachers and students from nine elementary, five middle, and three high schools participated in a quantitative study, a qualitative study, or both. Analysis of the quantitative data on both social and learning components showed no results of the intervention, but did show a strong school effect. Analysis of the qualitative data helped explain this strong school effect as themes emerged related to differences in teachers' purposes for "doing integration." The study concluded that integration doesn't work, but it can be a "step on the way" to inclusion. Inclusion does work, but only in the context of reinvented schools. Attachments to the report include observation procedures, definitions of terms, and statistical data from the study. (31 references) (JDD)

**Target Audience:** Practitioners

**Abstract:** This report discusses a project to develop, test, and disseminate the SNAP (Smart Needs Assessment Program) system for needs assessment and inservice training of regular educators to work with students with disabilities. The SNAP system is an expert system that defines the training needs of individual teachers and links these needs with training experiences. The system's three modules provide: (1) background information on professional roles, special education students, and general approaches for mainstreaming; (2) information on approaches to improving reading, mathematics, and general learning; (3) information on behavioral and emotional management. The system helps the teacher to define his or her training needs and interests and recommends appropriate training materials from the approximately 175 items included in the system. This report describes activities during the third year of the project and includes a paper by V. H. Pilato and others titled "SNAP System End of Second Year Evaluation." One-page summaries of 125 learning strategies in the expert system knowledge base are provided. These learning strategies focus on such topics as encouraging students to speak up, improving reading comprehension with semantic mapping, graphic organizers, and teaching time using the whole clock method. One-page summaries of 54 behavior strategies (such as contingency contracting, learning stations, and attending to student feelings) are also provided. Also included are text versions of the learning strategy selector knowledge base, the behavior strategy selector knowledge base, and the batch files. (17 references) (JDD)

**Abstract:** A study examined the inservice needs of vocational educators related to the inclusion of special needs students in vocational classes. Purposes were to determine the statewide enrollments of special needs students in vocational programs; to examine the instructional needs of vocational educators for working with these students at three schools; to describe the history, program characteristics, and instructional strategies of working with these students; and to compile a list of inservice needs for instructors. The population included 5 administrators, 3 special needs support persons, and 42 instructors. Data were collected from descriptive information about secondary vocational programs in Pennsylvania obtained through publications from the Department of Education; questionnaires sent to the three schools; and interviews with administrators and special needs persons at the schools. Topics identified as being priorities for teachers dealing with special needs students were teacher attitudes, the mainstreaming process, involvement in the Individualized Education Plan, identification of special students, and teachers' rights. Instructors, administrators, and support persons had needs unique to their professional positions and school settings. Recommendations include inservice program development with instructor involvement in the planning. (YLB)

**Target Audience:** Practitioners

**Abstract:** This resource manual focuses on the development and enhancement of student program planning teams in schools oriented to inclusive education of students with disabilities. First, the terms inclusion, integration, and mainstreaming are clarified. Then, the challenge of developing instructional and behavioral plans that allow students to learn together is emphasized, outlining the need for administrative support, shared ownership of all children, collaborative teams, year-round transition and program planning, access to consultation and technical support, staff development, and school and home collaboration. The manual defines a "team" as a set of interpersonal relationships structured to achieve established goals. Members of the student planning team are listed. Essential elements of effective teams are discussed, including positive interdependence, face-to-face interaction, individual accountability, development of collaborative skills, and group processing. Appendixes provide team activities, various team forms, a team member checklist, and a team self-evaluation checklist. (18 references) (JDD)

**Document Type:** 043; 143

**Geographic Source:** Canada; British Columbia

**Journal Announcement:** RIE

**Abstract:** The goal of this practicum was to have building-based special education personnel support classroom teachers so that elementary students with mild disabilities in an inner city school could be included in the classroom successfully. Through inservice education sessions, the staff were provided with current information on facilitating the inclusion of mildly disabled students, and then staff collaborated to develop solution strategies appropriate to their setting. A collaborative schoolwide restructuring of support services was implemented, altering special education support from three separate, vertical programs to three horizontal support teams responsive to the needs of the classroom teachers in each team. Special and general educators worked together to address students' academic needs. At the completion of implementation, all target students were receiving individual or small group instruction for a minimum of 90 minutes daily. Nine of ten teachers were "very satisfied" or "satisfied" with the new service delivery model and wished to continue with the model. Appendices provide copies of questionnaires and administrative materials. (70 references) (JDD)

**Author:** Bunch, Gary  
**Article Info:** Developmental Disabilities Bulletin; v19 n1 p80-101 1991; special issue on integration  
**Document Type:** 080; 143; 070  
**Target Audience:** Practitioners

**Abstract:** This study examined aspects of inclusive education, focusing on objectives of parents and educators, service delivery models designed to support full inclusion, and daily classroom activities carried out in the implementation of full inclusion. Parents, teachers, and principals of 32 elementary students in inclusionary programs were interviewed with a common interview instrument to assess their goals for students. Findings indicated that social and academic development were more feasibly tracked than had been expected, and significant progress in both areas was documented for each student. (9 references) (PB)

**Journal Announcement:** RIESEP88

**Abstract:** By the mid-1970s, several pieces of federal legislation were passed requiring that handicapped or exceptional children be educated "in the least restrictive environment." The resulting "mainstreaming" of special children in regular classrooms has caused certain expectancies and special inclusion needs. To find out more about the perceptions of mainstreamed children, a study examined interpersonal needs and expectations among students in grades 6 to 8. The method used was to apply Q Methodology to the study of the patterned perceptions of special children who have been mainstreamed into a required middle school class. Approximately 500 students (including those labeled "handicapped") in required computer literacy classes from a midwestern county school, were tested to determine their communication self-concept. Only 340 of the tests were completed correctly and usable for data analysis. Five significant types of students emerged: (1) The Capable; (2) The Ego; (3) The Outcast; (4) The Reticent; and (5) The Okay Kid. Results suggest that Q is a useful technique for examining the interrelationships among interpersonal needs of adolescents; that a majority of the special students appeared to function successfully in a regular classroom; and that reticence is the major problem of one-third of the special students. (Three tables are included, and 30 references and lists for item descriptions and descending array of z-scores for types 1-5 are appended.) (MS)

**Abstract:** The goal of the Kentucky Deaf-Blind Intervention Program was to provide training and technical assistance to improve the quality of special education and related services in integrated environments. The program worked with families and service providers for individuals ages birth through 21 who have dual sensory impairments, with special emphasis on individuals above and below mandatory school age. Specific objectives and activities involved: (1) identifying needs and representing the interests of individuals with dual sensory impairments in Kentucky; (2) providing local consultation to families and providers; (3) developing preservice and inservice training regarding dual sensory impairments as part of Kentucky's Comprehensive System of Personnel Development; (4) implementing training and services for young children under age 5, based on Kentucky's state plans under Public Law 99-457 (Parts B and H); and (5) institutionalizing coordination of transition through the Individual Transition Plan process and personal futures planning. This final report, focusing on Project Year 1991-92, describes project accomplishments; project outcomes; problems, solutions, and additional needs; and products developed. Samples of several products are included, such as a project brochure, newsletters, directories, and a draft of a paper titled "Developing Programs for Students with Severe Handicaps Using Basic Skills in the Context of Age-Appropriate Priority Activities" by Melissa E. Hudson and Jennifer L. Leatherby. Appendixes contain project summaries and impact data for the two prior years of the project. (JDD)

**Abstract:** This information packet is intended for use by teachers, parents, administrators, therapists, advocates, and others interested in achieving inclusive educational opportunities for students with disabilities. Part I provides reprints of selected readings, including: "Sample Case Studies of Inclusive Education" (Janet Duncan); "Public Schools Welcome Students with Disabilities as Full Members" (Linda Davern and Roberta Schnorr); "All Students Belong in the Classroom: Johnson City Central Schools, Johnson City, New York" (Carol Berrigan); "Full Inclusion at Helen Hansen Elementary School: It Happened Because We Value All Children" (H. James Jackson); "Helping Teachers Manage the Inclusive Classroom: Staff Development and Teaming Strategies" (Barbara Ayres and Luanna H. Meyer); "The McGill Action Planning System (MAPS): A Strategy for Building the Vision" (Terri Vandercook et al.); and "Including Students with Disabilities: Some Factors to Consider" (Janet Duncan). Part II consists of a bibliography of approximately 310 items grouped into the following categories: administrative leadership, team approach/effective schools, accommodating curriculum, friendships and peer supports, families, program development, philosophy, inclusion strategies, teachers, cooperative learning, legal aspects, videos, general texts and periodicals, and annotations of selected books. **Abstract:** The lives and experiences of six families of children with disabilities who have achieved full integration in family life for their children are described in this book. The principles of inclusion used within these families are examined and applied to the broader question of inclusion of people with disabilities into education, community life, and other social institutions. The uses and definitions of such labels as "handicapped" and "normal" are seen as key factors in the segregation of disabled and nondisabled children, and it is argued that such labels unnecessarily prevent many basically capable children from full participation in mainstream society. **Abstract:** This training manual for a 2-day workshop was developed from the perspective that a fully inclusive society will evolve only if there are schools which embrace all children, including those with disabilities. Each participating team first considers their school's current goals and progress made towards full inclusion, and then establishes goals and identifies strategies and resources to support continued movement towards full inclusion. Objectives in Section I involve identifying and describing key components of integration, a rationale for school restructuring, the role of the school site integration task force, and the role of the integration facilitator, and team teaching and peer coaching strategies. Section II focuses on group skills, leadership and participatory management, decision making, conflict management, effective meetings, student placement, and systems change. Section III covers educational goals for students with severe disabilities, curriculum adaptation, student grouping strategies, cooperative learning strategies, and factors which facilitate integration. Section IV addresses the Individualized Education Program, functional assessment, team action plans, a common vision for integration, and establishment of an individual school site integration plan. The manual provides background information, self-evaluation questionnaires, group and individual learning activities, and note-taking guides. (18 references) (JDD)

**Target Audience:** Teachers

**Abstract:** This trainer's packet, designed to be used in conjunction with the participant's manual, was prepared for a 2-day workshop to restructure schools to embrace all children, including those with disabilities. The trainer's materials include: program objectives; masters for overhead transparencies; and descriptions of learning activities, including the purpose, time needed to complete, materials needed, and directions. Objectives for the workshops four sections include: (1) identifying and describing key components of integration, a rationale for school restructuring, the role of the school site integration task force and the role of the integration facilitator, team teaching strategies, and peer coaching strategies; (2) group skills, leadership and participatory management, decision making, conflict management, effective meetings, student placement, and systems change; (3) educational goals for students with severe disabilities, curriculum adaptation, student grouping strategies, cooperative learning strategies, and factors which facilitate integration; and (4) the Individualized Education Program, functional assessment, team action plans, a common vision for integration, and establishment of an individual school site integration plan. (JDD)

**Abstract:** This participant's manual provides local educational agency/district teams of instructional leaders a way of examining their personal beliefs and values, developing a more inclusionary perspective, and gaining skills for creating schools that work for all students including those with severe disabilities. Team participation is emphasized as administrators, staff, and parents collaboratively develop a vision of all children learning together and a plan for including all students in their neighborhood schools with the instructional adaptations and supports needed to enable each to flourish. The first section of the participant's manual establishes a vision of what integrated programs can be, examines the concept of multiple intelligences, and considers how some schools have successfully integrated their programs. Section II presents the characteristics and needs of three individual learners and calls for participants to plan reasonable classroom participation for each. The third section simulates the planning of a restructured school with a fully integrated program, and emphasizes the implications for leadership strategies. The final section discusses how change occurs in schools and how to address the differing levels of concern of school team members as they plan for further integration. The manual contains group and individual learning activities, discussion questions, and case studies. (A bibliography accompanies each section.) (JDD)

**Author:** Burke, D.A. and Bang, M.  
**Article Info:** 1993, 20 pages  
**Available From:** Disability Research Systems, Inc., 2500 Kerry St., Suite 208, Lansing MI 48912; (517) 485-5599  
**Category:** Research  
**Format:** Paper

**Abstract:** The authors report on an evaluation study commissioned by five Intermediate School Districts (ISD) in Michigan to follow up 89 students placed in inclusive education options during the school year 1991-92. All of these students had previously attended school in segregated facilities operated by their respective intermediate school districts. Findings indicate that, in general, parents reported mostly positive changes in family life since including their children in general education settings. Transportation time was reduced for all 52 of the students whose parents responded. Both parents and teachers perceived that opportunities for student interaction with nondisabled students were enhanced in an inclusive education option, but interactions out of school were not enhanced. Quality of the interactions in school were judged by teachers and parents as quite positive.

**Title:** A Review of the Eligibility Criteria for Children with Special Needs. Section 78 of Chapter 138 of the Acts of 1991

**Author:** Donahue, Alice; Gross, Shelley

**Article Info:** Aug 91, 30+p, LEVL 1

**Rep:** Massachusetts State Dept. of Education, Boston

**Document Type:** 142; 120

**Geographic Source:** US; Massachusetts

**Government:** State

**Target Audience:** Policymakers

**Abstract:** This review of eligibility criteria for students with special needs was the result of a 2-month analysis of the Massachusetts special education law and the current state of education within Massachusetts. The review was intended to examine the original intent of the special education statute, possible reasons for the high number of special education students, costs to the state of the current special education mandates, and the cost savings to be achieved by recommended changes. The following recommendations were made: (1) the statutory definition of a child with special needs should be rewritten; (2) statewide eligibility guidelines must be developed to ensure clarity and consistency across school districts; (3) a comprehensive training program for professionals and parents should be developed to ensure understanding of the new definition and its implementation; (4) a 5-year initiative should be instituted to establish Teacher Support Teams to implement a prereferral system and instructional accommodations within regular classrooms; (5) all professional staff should participate in a professional development program that emphasizes key areas of effective instruction; and (6) a discretionary grant program supporting the mainstreaming of students with special needs should be funded. A bibliography of 49 items and seven appendixes presenting more detailed data on which the report is based conclude the document. (DB)

**Title:** Characteristics of Effective Inclusive Schools: A Utah Study  
**Author:** Florina, L.  
**Article Info:** 1993, 23 pages  
**Available From:** Mountain Plains Regional Resource Center, Utah State Univ., 1780 N. Research Pkwy., Suite 112, Logan, Utah 84321-9620; (801) 752-0238  
**Category:** Research  
**Format:** Paper

**Abstract:** This study was conducted in Utah during the fall of 1992. Interviews were conducted with key stakeholders at both the district and state level. Interviews and observations were conducted in 10 of the state's 40 school districts. The study is grounded in the effective schools research, with results discussed in the context of three broad categories of effective schools: a common mission; an emphasis on learning; and a climate conducive to learning. A section on barriers to change is included, as are recommendations that arose from an analysis of comments made in the interviews and from the results of the observations. Some of the recommendations: The state should provide financial support for start-up costs; training is needed for collaboration, team building, and teaching methods; program evaluation should be conducted to provide information on how inclusion is working.

**Title:** How Four Communities Tackle Mainstreaming  
**Author:** Blackman, H.P., Cloud, D., Conn, M., Corbin, N.,

**Available From:** *The School Administrator*, (49)2, 22-29  
**Category:** Strategies/Implementation  
**Format:** Journal article

**Abstract:** School leaders in four communities describe their efforts to include students with disabilities of all types into regular classes. The communities and leaders are: Saline, Michigan (Maurice Conn); Ontario, Oregon (David Cloud); Rum River, Minnesota (Mark Wolak, Jennifer York and Nancy Corbin); West Cook/East duPage Counties, Illinois (Howard P. Blackman). These leaders discuss the process of change in their communities, the practices they employed, the cost of inclusion, concerns that linger, the need for collaborative teamwork, benefits of inclusion, and lessons learned.

**Language:** English

**Document Type:** POSITION PAPER (120)

**Geographic Source:** US; Minnesota

**Journal Announcement:** RIEJAN93

**Abstract:** This brief report highlights the issues, evidence, and first steps toward including students with disabilities in educational data systems. The report notes that if students with disabilities are excluded from educational data collection systems, policy makers do not have an adequate set of information from which to make policy decisions. The report lists points at which exclusion occurs, and states that an estimated 40% to 50% of school-age students with disabilities are excluded from such national data collection programs as National Assessment of Educational Progress and the National Education Longitudinal Study. The report points out that estimates of exclusion in state assessment programs are largely unavailable. Steps toward including students are listed, such as developing assessment modifications, accommodations, or alternatives; increasing inclusion of students with disabilities during instrument development; and developing more inclusive definitions of sample eligibility. (JDD)

**Geographic Source:** US; Minnesota

**Journal Announcement:** RIE

**Target Audience:** Policymakers; Researchers; Administrators

**Abstract:** This report examines the extent to which individuals with disabilities are involved in national and state data collection programs that play a pivotal role in reform efforts focusing on measurement of educational indicators. Thirty national data collection programs were identified and nine of the 30 are reviewed. The extent to which students with disabilities are included in state outcomes assessment activities was evaluated through a survey of state directors of special education. The study found that most existing national and state data collection programs exclude large portions of the student population with disabilities. Exclusion appears most prevalent in data collection programs that require students to complete surveys or tests independently. Data collection programs that use third party informants typically exclude few individuals. The use of different exclusion guidelines across data sets can cause problems in comparing results obtained from different data collection programs. The study concludes that the ability to extract useful national and state policy-relevant information on the outcomes of students with disabilities from national and state data collection programs is seriously hampered by the extensive exclusion of portions of this population. Recommendations for improvement are offered. (30 references) (JDD)

**Author:** Martin, R.  
**Article Info:** 1993, 47 pages  
**Available From:** Reed Martin Conferences, Baxley Media Group, 110 W. Main Street, Urbana, IL 61801; (217) 384-4838  
**Category:** Legal Interpretations  
**Format:** Book chapter

**Abstract:** In this analysis of court decisions and educational trends, the author draws a parallel between Civil Rights issues and the rights of students with disabilities to be educated in inclusive classroom settings. "We have to realize," he writes, "there is an overwhelming constitutional Civil Right of students with disabilities and that administrative convenience, the feelings of other students, and even cost are subordinate." Although judicial decisions have been inconsistent on the subject of inclusion, schools must recognize that "the future of students with disabilities, as for all citizens with disabilities, is inclusion." From a legal as well as an educational standpoint, he writes, "the inclusion imperative is here." Sections of the document address such topics as the least restrictive environment, the neighborhood school, scarce resources, architectural barriers, and related services, including assistive technology and recreation therapy.

**Title:** I.N.S.T.E.P.P. Project Student Inclusion Checklist

**Target Audience:** Administrators; Policymakers

**Abstract:** This document examines the restructuring of local schools and how restructuring can involve students with disabilities and the special education programs that serve them. The document is designed to create awareness of the issues related to restructuring and programs for students with disabilities and puts forth options for reconsidering and restructuring special education programs. The issues and the options are summarized within five critical areas: (1) develop a clear vision and mission for education that includes all students; (2) establish a system of accountability for all educational programs; (3) create an organization that supports the mission of restructuring; (4) change what schools teach and how they teach it; and (5) create supports for staff development and staff renewal. The options for developing a clear vision include establishment of a unified system, inclusive or heterogeneous schools, or a separate program identity with a continuum of placements. Establishing a system of accountability involves the option of developing unified outcomes or differentiated outcomes. Two options for creating an organization that supports the restructuring mission include centralized administration of programs and services or school-based management of programs. Schools could change what they teach and how they teach it by offering a unified curriculum or by offering separate or alternative curricula. Staff development in a restructured workplace is recommended to support staff renewal. Each policy option is accompanied by specific policy strategies, examples, and implications for adoption. (JDD)

**Abstract:** This paper provides an analysis of inclusion as it relates to national goals, national standards, and national tests for students with disabilities. Concerning the six national education goals specified in GOALS 2000, the paper finds that the primary data collection programs used to document progress toward the goals exclude 40 to 50 percent of students with disabilities. Concerning national standards, the paper points out that experts in math believe that established standards are somewhat appropriate for students with disabilities but not feasible for implementation with most students with disabilities. Concerning state and national testing, the paper reports that most states use large scale assessments and do not include students with disabilities, and when students with disabilities are included, their data often are not reported. In each area, the paper describes efforts being made to address concerns and additional actions that can be taken to improve services.

**Price:** \$10  
**Available From:** PEAK Parent Center, Inc., 6055 Lehman, Colorado Springs, CO 80918; (719) 531-9400  
**Category:** Strategies/Implementation  
**Format:** Document

**Abstract:** This book describes strategies that educators, therapists, principals, families, and students have used to include students with disabilities in regular education classrooms. "No easy answers or quick fixes are possible," the authors warn. "Providing supports to enable students with challenges to receive a quality education is a creative, challenging process that evolves, changes and grows," they write. Topics covered in the book include team collaboration; building relationships and friendships; curriculum adaptation; focusing on student strengths; alternative teaching strategies; support systems; challenging behaviors, including serious emotional disturbance; and planning.

**Title:** Policy Implications of Emergent Full Inclusion Models for the Education of Students with Severe Disabilities

**Author:** Sailor, Wayne and others

**Article Info:** 1990, 65 pp, LEVL 1; for the Final Report, Years 1987-1992, see EC301898

**Rep:** San Francisco State Univ., CA; California Research Inst. on the Integration of Students with Severe Disabilities

**Sponsoring Agency:** Office of Special Education and Rehabilitative Services (ED/OSERS), Washington, DC

**Contract Number:** G0087C3037

**Document Type:** 120

**Geographic Source:** US; California

**Journal Announcement:** RIE

**Target Audience:** Policymakers

**Abstract:** This monograph examines the term "full inclusion" as it pertains to students with severe disabilities; reviews the historical, legal, and policy bases for various models and systems; and considers the implications for policy change of various aspects of full inclusion models. An introductory section identifies key principles of most full inclusion models, including: (1) "home school" placement, (2) natural proportion of disability at the school site, (3) zero-rejection/heterogeneous grouping, (4) age-appropriate and grade-appropriate classroom placements, (5) strong site-based coordination and management, and (6) use of cooperative learning and peer instructional models in the regular education system. The second section looks at the legal and policy basis for full inclusion models and considers such issues as educational goals for students with severe disabilities, extension of the inclusion principle to placement, the consequences of educational isolation, and the meaning of adult status. The third section discusses policy implications of each of the key principles of full inclusion models. The paper concludes that the leading edge of special education policy and programmatic reform for students with severe disabilities involves "full inclusion" models of school organization and the return of categorical programs to the regular school and classroom. A convergence of trends in both special and general education reform movements is seen. (80 references) (DB)

**Author:** Boundy, K.  
**Article Info:** 1992, 17 pages  
**Available From:** Center for Law and Education, 955 Massachusetts Ave., Cambridge, MA 02139; (617) 876-6611  
**Category:** Legal Interpretations  
**Format:** Document

**Abstract:** Drawing upon federal statutory provisions and court decisions, the author discusses barriers to full inclusion experienced by students with disabilities during the past 15 years. She then lists some key questions for challenging exclusion and the denial of full inclusion to students with disabilities and presents strategies or remedies to address the key problems of less than full inclusion. The legal bases for maximum appropriate integration/least restrictive environment/full inclusion are explained and recent court decisions that indicate a movement toward full inclusion are reviewed.

**Target Audience:** Parents; Practitioners; Administrators

**Abstract:** This manual is intended to facilitate the integration of children with mental handicaps into child care centers in Canada and elsewhere. The first chapter looks at the background of integration in early childhood child care programs in Canada and identifies concerns of parents. The second chapter explores the practice of labeling children with disabilities including both positive and negative consequences. Stressed in the third chapter is the need for careful planning and collaboration to ensure the inclusion of all children. The specific roles of administrators, staff, and parents as well as the importance of teamwork are examined next. The fifth chapter, on program development and implementation, discusses the individualized planning process, use of resources, and transitional periods. The last chapter offers eight hypothetical situations presenting dilemmas for problem solving and role playing. Appendices include: a glossary, guidelines for parents choosing a group setting, an inventory of children's needs, and a checklist of program mainstreaming characteristics. Also included are listings of national day care organizations, federal government child care offices, provincial and territorial government day care offices, and a bibliography of 130 items. (DB)

**Document Type:** 080; 120

**Abstract:** This paper reviews educational and Medicaid policy regarding school health care services and recent litigation over payment for these services, in order to highlight the current conflict and debate over who should pay for these services for children who are technology-assisted. It is concluded that the full integration and inclusion of technology-assisted children in schools will necessitate increased cooperation between education and health-care systems in terms of payment, service delivery, and public policy. **Abstract:** This paper focuses on the instructional leadership role behavior of school principals in relation to the management of special education programs. A framework is presented of the principal's role in seven broad areas of instructional management: community, beliefs and experience, institutional context, principal's routine behaviors, instructional climate, instructional organization, and student outcomes. Results of case studies of five principals are examined, to build "conceptual maps" of their leadership behavior. The case studies result in conclusions concerning influences on principals' behavior toward students with disabilities, the principal's role in inclusion of special education students, principals as reactive rather than proactive in service delivery, principals' reliance on central office special education staff, and the impact of contextual factors surrounding the school. **Format:** Document

**Abstract:** This document provides a working plan for examining different features of a school's structure—staff organization, schedule of staff and students, and instructional practices—and determining how students with special needs, and their teachers, can be fully included in that structure. Each section includes a vision statement which reflects how certain aspects of the school might eventually reflect fully inclusive practices as well as a list of steps of varying sizes needed for implementation. An action plan form is included in the appendix.

**Target Audience:** Teachers

**Abstract:** This guidebook to developing programs which include children with disabilities in general education classrooms offers a step-by-step process, specific instructions, scheduling helps, and master forms. An introduction (Section I) describes the COACH (Choosing Options and Accommodations for Children) approach identifying such assumptions as the family as the cornerstone of relevant and longitudinal educational planning and the importance of collaborative teamwork. The COACH process is described in Section II including its relationship to Individualized Education Program development, appropriate students, time factors, the COACH facilitator role, and program evaluation. Section III provides detailed directions for using COACH including directions for completing the family prioritization interview, for defining the educational program components, and addressing the educational program components in inclusive settings. Five extensive appendices include the following: the scoring key and Valued Life Outcomes form, blank COACH forms, a self-monitoring and peer coaching guide, and complete examples of COACH forms for a kindergarten student with dual sensory impairments and a secondary student with a cognitive impairment. **Target Audience:** Researchers

**Abstract:** The Cayuga-Onondaga Assessment for Children with Handicaps (C.O.A.C.H.) is an assessment and planning tool designed to assist in the development of relevant educational programs delivered in integrated settings. The tool provides methods to determine a student's top learning priorities from a family-focused perspective, translate priorities into goals, determine the breadth of curriculum beyond the top priorities, identify management needs related to instruction, develop short-term objectives, and develop a plan for meeting learning and management needs within general education schedules and routines. The tool is predicated upon family members and professionals working together as a team. The tool includes functional curricular content designed to extend or supplement general education curriculum. The model conceptualizes functional activities and skills as belonging to one of three general categories: cross-environmental activities, environment-specific activities, and sensory learning skills. This manual for the sixth version of C.O.A.C.H. describes assumptions upon which the tool is based, provides background information and general directions for administering the assessment, offers samples of completed forms, and provides a blank form. The manual discusses steps for developing objectives, creating integrated lesson plans, and scheduling to provide mainstream opportunities for students. (45 references) (JDD)

**Target Audience:** Practitioners

**Abstract:** A practical guide to the inclusion of children and adults with disabilities in community leisure activities focuses on the integration of existing services. The first chapter establishes the rationale for provision of community leisure services and the inclusion of individuals with disabilities in them. Chapter 2 presents a program planning process that systematically produces guidelines for planning integrated community leisure services. Chapter 3 presents a planning and implementation model that defines the roles and responsibilities of professionals, care providers, and other key individuals and emphasizes the need for collaboration among them. A systematic approach to studying environments and overcoming participation obstacles is outlined in chapter 4. Teaching procedures, instructional arrangements, and special considerations proven effective in the provision of integrated community leisure services are addressed in chapter 5. Chapter 6 contains information on and forms for program evaluation. Chapter 7 contains the results of two surveys concerning obstacles to physically and socially integrated programs. The final chapter describes six exemplary programs. Appended materials include related charts, forms, and extensive references. (MSE)

**Document Type:** 120; 055  
**Geographic Source:** US; California  
**Target Audience:** Practitioners; Administrators

**Abstract:** This monograph examines the need for appropriate curriculum materials to meet the needs of special education students within the structure of both regular education and special education classes and within the context of current education reform efforts. After an introduction and a section identifying curriculum needs, a section presents general considerations concerning: regular class instruction, core curriculum, special curriculum, the learning disability profile, attitudes and expectations, remediation, and teacher tasks. Curriculum considerations are discussed next. These include access to information, increasing comprehension, complexity of information, teaching and learning strategies, assessment and evaluation strategies, and framework/adoption decisions. Recommendations for material development include the following: all written curriculum materials should be recorded on audio tape; materials should provide for different levels of complexity and for altered representations; materials should provide for concrete student experiences; appropriate teaching strategies should be discussed in teacher manuals and specific learning strategies in student manuals; student assessment should be curriculum-based, frequent, content and process focused, varied, and interactive; and state framework and adoption committees should include representation from special education. A model curriculum continuum for special education students and sample assessment procedures are appended. (85 references) (DB)

**Document Type:** 160

**Geographic Source:** US; California

**Journal Announcement:** RIE

**Target Audience:** Administrators

**Abstract:** This needs assessment instrument was developed as part of the PEERS (Providing Education for Everyone in Regular Schools) Project, a California project to integrate students with severe disabilities who were previously at special centers into services at regular school sites and students who were in special classes in regular schools into general education. Part 1 of the needs assessment is for use with local education agencies (LEAs) that have developed a written plan for integration/inclusion transitions. It is intended to help evaluate plan components in the following areas: least restrictive environment policy, student placement, physical plant availability and selection, accessibility criteria, staff assignments, administrative roles/responsibilities, interagency agreements, site and staff preparation, definitions of integration and/or inclusion, and facilitation of peer interactions. Part 2 is designed to assist in identifying: the history and goals of the LEA in regard to attitudes toward integration and inclusion; existing resources to support transitions; space concerns within accessible schools; personnel role changes; site preparation needs; and parent reactions to the integration/inclusion plan. Part 3 is intended for on-site review and covers environmental considerations, school climate, special education teacher integration, general education classroom environment, student integration, and the curricular and instructional model. **Document Type:** 120  
**Geographic Source:** US; New York  
**Journal Announcement:** RIE  
**Target Audience:** Policymakers

**Abstract:** This report claims that the special education system in the New York City public schools is by nature segregated and second rate. It offers recommendations for achieving a more inclusive, effective education for all children. Data are presented to support the charge that special education students are educated in restrictive and racially segregated environments. Administrative barriers to the inclusion of disabled children in general education classes are also identified. A section on the benefits of inclusion reviews the research and literature supporting this stand. A variety of models of inclusive education are described, including the Adaptive Learning Environments Model, the Integrated Classroom Model, consultant teaching, team teaching, cooperative learning, peer tutoring, and parent involvement. Twenty-four major recommendations are offered which would require a radical change in the current special education system. Recommendations include broadening the definition of children capable of being educated in general classrooms, improving the quality of classroom teaching, increasing the availability and quality of related services and instructional materials, and expanding the continuum of special education services. Appendices include: a discussion of federal and state law requirements addressing the least restrictive environment, evaluation and assessment, and research and program improvement; excerpts from relevant federal laws and regulations; and excerpts from relevant state law and regulations. **Language:** English

**Document Type:** REVIEW LITERATURE (070)

**Geographic Source:** US; New York

**Journal Announcement:** RiEAPR91

**Abstract:** This literature review considers research dealing with social skills instruction for handicapped preschool children in a mainstreamed or integrated setting. It offers a literature-based rationale for preschool mainstreaming, notes the fundamental objectives of preschool mainstreaming that relate to the process of socialization, and addresses the need for organization and structure in program design. Specific components necessary to enhance the social behavior and social skills development of handicapped preschool children are outlined, calling for a daily schedule which emphasizes direct social skills instruction and careful organization of environmental variables. The review also considers: (1) types of activities most conducive to positive social interactions between handicapped and nonhandicapped youngsters; (2) efficacy of activities with nonhandicapped children in preparation for the arrival of a handicapped child; (3) physical arrangement of the classroom; (4) grouping of children; (5) teacher influence; (6) use of teacher-mediated intervention; (7) peer-mediated intervention; and (8) research needs in this area. **Format:** Document

**Abstract:** Based upon the efforts and experiences of educators working in inclusive school environments in Minnesota, this document is a compilation of seven papers which present practical strategies for designing and implementing inclusive education programs for middle and secondary high school students. Issues covered by these papers include general principles for change related to inclusion and specific building-based change strategies; teamwork strategies for inclusive classrooms; use of the McGill Action Planning System (MAPS) to develop a vision of inclusive education, including the role classmates can play during the planning process; using the IEP process to build an inclusive educational program; assessment, selection of objectives, and development of instructional programs for students with severe disabilities included in regular classrooms; potential value of inclusionary education beyond socialization benefits; and a discussion of the advantages and disadvantages of the use of integration facilitators in regular classrooms.

**Document Type:** 010; 055; 070  
**Target Audience:** Practitioners

**Abstract:** The text presents theory, research, and state-of-the art practices concerned with the education of students with severe handicaps. A variety of perspectives--normalization, integration, personal, familial, and educational--are stressed throughout. The first chapter reviews the historical treatment of persons with disabilities, analyzes definitions of such persons, and proposes a new working definition. Part One examines the categories of severe disability with chapters on: students with severe and profound mental retardation, with severe and profound physical disabilities, and with multiple disabilities especially those with both visual and hearing impairments. Each chapter concludes with a case study. Part Two analyzes behavioral concerns of students with severe disabilities including school and community integration, communication skills, social-personal traits, generalization and maintenance problems, and vocational and employment concerns. Part Three considers persons with severe disabilities from a life cycle perspective. Chapters are concerned with: effect of the child on the family unit and effects of the family on the child; nontraditional preschool programs, curricular and instructional modifications of regular school programs, and adult and community programs. Part Four looks at future developments in a chapter describing the present and future impact of advocates in providing services for this population and another chapter examining changing perspectives and possible future trends in service delivery. **Title:** A Mother's Thoughts on Inclusion  
**Author:** Carr, Margaret N.  
**Article Info:** Journal of Learning Disabilities; v26 n9 p590-92 Nov 1993  
**Available From:** UMI  
**Document Type:** 080; 120  
**Journal Announcement:** CIJE  
**Target Audience:** Policymakers

**Abstract:** An elementary school principal and mother of a son with learning disabilities (LD) offers a personal perspective on educational trends such as resource rooms, content mastery, and inclusion. The paper argues that regular classroom teachers are not trained to teach LD students and that adequate support for mainstreamed LD students would be prohibitive in cost. (JDD)

**Title:** Cooperative Learning as an Inclusion Strategy: The Experience of Children with Disabilities  
**Author:** O'Connor, Rollanda E.; Jenkins, Joseph R.  
**Article Info:** 1992, 15p, LEVL 1; paper presented at the Annual Meeting of the American Educational Research Association (74th, Atlanta, GA, April 12-16, 1993)  
**Available From:** University of Washington, Rollanda E. O'Connor, EEU, WJ-10, University of Washington, Seattle, WA 98195  
**Document Type:** 150; 143  
**Geographic Source:** US; Washington  
**Journal Announcement:** RIE

**Abstract:** This study examined what occurs in cooperative learning groups that include students with mild disabilities in grades 3-6. Teacher interviews were combined with observations of 10 special and 10 regular education students' behavior in cooperative learning groups which used the Cooperative Integrated Reading and Composition model. Results are discussed in terms of who is providing help to the student with disabilities and how often, what contributions the student makes to group tasks, the assignment length, the teacher's role in successful participation of students with disabilities, teacher expectations for student competence, and setting up expectations. The paper concludes that successful use of cooperative learning as an inclusion strategy will require: (1) rethinking and reorganizing of the ways special education provides resources, services, and modifications for students with disabilities; and (2) sustained effort of regular class educators to raise the status of contributions by children with disabilities and to establish and maintain norms of participation and helping. (14 references) (JDD)

**Title:** Curriculum Adaptation for Inclusive Classrooms  
**Author:** Neary, Tom and others  
**Article Info:** Dec 92, 155p, LEVL 1; in Campbell, Patrick; and others. Statewide Systems Change Project for the Integration of Severely Disabled Students in California: The PEERS Project (Providing Education for Everyone in Regular Schools); Final Report; see EC302196  
**Contract Number:** G0087C3058; G0087C3059; G00873056  
**Document Type:** 055  
**Geographic Source:** US; California  
**Journal Announcement:** RIE  
**Target Audience:** Administrators

**Abstract:** This manual on curriculum adaptation for inclusive classrooms was developed as part of the PEERS (Providing Education for Everyone in Regular Schools) Project, a 5-year collaborative systems change project in California to facilitate the integration of students with severe disabilities previously at special centers into services at regular school sites and the integration of students in special classes in regular schools into general education. After an introduction, which provides an historical perspective on the concept of inclusive education and notes activities of the National Full Inclusion Site Network, the manual is divided into four sections with content on: (1) service delivery models (including itinerant categorical and noncategorical specialized support, considerations in service delivery model development, and policies and procedures that support inclusion); (2) building level support and strategies (e.g., administrative leadership, a positive and accepting school climate and culture, and collaborative team structures); (3) classroom-based strategies (e.g., an array of instructional supports, measuring outcomes, and meeting a variety of needs in a typical classroom); and (4) student-specific strategies (designing an individual program, curriculum adaptation strategies, data gathering procedures, and supportive planning strategies). Appendices list network members, offer PEERS guidelines, and include sample individualized program development forms. (100 references) (DB)

General Education Settings: A Resource Manual  
**Author:** Wheeler, John J.  
**Article Info:** 1991 32p  
**EDRS Price:** MF01/PC02 plus postage  
**Language:** English  
**Document Type:** REVIEW LITERATURE (070)  
**Geographic Source:** US; South Dakota  
**Journal Announcement:** RIEFEB92

**Abstract:** This paper reviews literature relating to the educational needs of children with severe disabilities and describes methods to facilitate inclusion of these children into integrated educational settings. The paper defines use of the term "learners with severe disabilities" and outlines trends in placement of these learners. Components of a quality education are identified, including its age appropriateness, specific objectives, functional activities, consistent cue hierarchy, systematic data-based instruction, periodic program review, community-based instruction, integrated delivery of related services, interactions with nondisabled peers, transition planning, and home-school partnership. A synthesis of the literature on assessment of learners with severe disabilities emphasizes the use of ecological inventories and transdisciplinary models. Modifications designed to facilitate inclusion of learners with severe disabilities in integrated educational settings are then discussed, including improved accessibility, increased teacher familiarity with specialized needs of students with severe disabilities, and others. **Document Type:** NONCLASSROOM MATERIAL (055)

**Geographic Source:** US; Washington

**Journal Announcement:** RIESEP86

**Target Audience:** Practitioners

**Abstract:** The paper draws on the experiences of a mainstreamed early education program to consider ways that preschool programs can make themselves accessible to families with handicapped children. The importance of clearly stated program intent is stressed along with accurate staff perceptions of handicapping conditions. Ten steps are then offered: (1) describing what the program offers; (2) determining what the parents need; (3) restating program services; (4) matching family needs and available services; (5) negotiating; (6) deciding on services; (7) confirming and following through on agreements; (8) preparing staff and children; (9) examining the classroom environment for needed modifications; and (10) providing ongoing support. **Format:** Document

**Abstract:** This is a guide to self-evaluation for inclusion team members to use who wish to periodically review and improve their working relationships. It provides a rationale for the review process and guidelines to follow during the review process. A review form is also included which is divided into six sections: (1) holding a shared philosophy, (2) establishing effective communication patterns, (3) maintaining positive attitudes toward teamwork and team members, (4) clarifying roles and responsibilities, (5) maximizing effectiveness, and (6) using a collaborative problem-solving approach.

**Format:** Brochure

**Abstract:** This brochure describes the Inclusive Education Resource Support Teams (IERST) project in Connecticut created with the goals of increasing the number of students with disabilities in regular education classrooms in their local schools and expanding the number, knowledge and use of resources in the state that assist in inclusion efforts. Team members active in 7 regions of the state support school systems and families interested in the inclusion of students with disabilities in regular education classrooms. Teams comprise parents, principals, special educators, general educators, support service personnel, a student, and other individuals experienced in and committed to inclusive education. These team members provide peer to peer support, technical assistance, and resource information.

**Journal Announcement:** RIE  
**Target Audience:** Teachers

**Abstract:** The goal of this curriculum is to assist educators to develop a classroom community in which all children, including those with significant disabilities, feel good about themselves and work together to support the active learning and valued membership of all class members. The specific goal of the lessons is to promote positive self-concept and effective interpersonal skills. The lessons are intended to help children in grades K-4 recognize their own strengths and the strengths of other children regardless of (and in many cases because of) their differences. The lessons teach children that everyone needs to feel accepted and included. The four lessons are: "Including Everyone: We All Need To Belong," "Liking Myself: Self-Esteem Is Important," "Making and Keeping Friends: Everybody Needs a Friend," and "Cooperating with Others: Together We Can Do It." Each of the lessons includes an introduction of the topic using children's literature, discussion questions, and activities. Appendices contain materials for use in implementing the learning activities. (JDD)

**Geographic Source:** US; Kansas  
**Journal Announcement:** RIEAUG93  
**Government:** State  
**Target Audience:** Practitioners; Parents

**Abstract:** This manual describes a Kansas program which is working toward full inclusion of students with deaf blindness through the MAPS approach (which stands for Making Action Plans or the McGill Action Planning System). An introduction stresses the value of integration and the focus of MAPS on the student's abilities and not his/her weaknesses. The MAPS process involves gathering key people in the student's life who cooperatively answer such questions as: "What is the student's history?" "What is your dream for the child?" "What is your nightmare?" "What are the student's gifts?" and "What would an ideal day at school be like for the student?" Use of the MAPS approach to help develop the student's Individualized Education Program is described with examples. Plans for structured friendship or peer programs are suggested as part of the MAPS meeting. Specific suggestions for parents wishing to encourage their schools to implement a MAPS approach and to develop a more inclusive climate are offered. (10 references) (DB)

**Target Audience:** Administrators

**Abstract:** This paper describes a pilot project at a Janesville (Wisconsin) elementary school, which uses a cooperative teaching approach to integrate all special education and at-risk students, including students with behavioral problems, into general education settings. Key program components include teaming, collaboration, cooperative learning, joint ownership for student integration, effective teaching practices, and development of teacher skills in adapting and modifying the curriculum to meet student needs. Program development is summarized, including development of a mission statement by a steering committee and development of a 4-year time task calendar to accomplish staff development needs and action plans identified by the steering committee. These included building needs assessment during the first year and extensive staff training on team member roles and responsibilities during the second year. Evaluation by staff after the second year of program implementation rated the program very positively. The third year saw continued inservice training and establishment of a core team to oversee team teaching efforts. The fourth year focused on expansion of the "Power of Positive Students" program, ongoing monitoring of the integrated program, and inservice training of new participants. The program has resulted in a stronger sense of community and a total school commitment to a philosophy of inclusion. (9 references) (DB)

**Format:** Strategies/Implementation  
**Category:** Document

**Abstract:** "Our classrooms reflect what we want our society to look like," this document begins. "Increasingly, children are teaching us that they learn best in settings that appreciate them as individuals, while celebrating the diversity among them. Classrooms that incorporate these values give children the message that everyone belongs." Following this introduction of stated commitment to inclusion, the document offers an overview of district initiatives that have been undertaken to create more inclusive school environments. These initiatives include peer tutoring, peer buddy systems, increased integration in early childhood, increased attendance at neighborhood schools, expansion of prereferral systems, teacher education, team teaching, and cooperative learning strategies.

**Journal Announcement:** RIE

**Abstract:** This directory offers a sampling of approximately 80 programs that offer alternatives to traditional special education models for children with disabilities and at-risk children. The programs are classified into nine broad categories of program designs and emphases: (1) alternative curriculum/ instructional strategies; (2) instructional management systems; (3) cooperative learning/peer support programs; (4) cooperative teaching programs; (5) alternative referral/consultation models; (6) alternative mental health support services; (7) alternative early intervention programs; (8) integration/ transition programs; and (9) comprehensive restructuring of education. The chapter for each category begins with a brief description of the common features of the programs in that section. Programs reporting formal evaluation data supporting effectiveness and/or representing a large-scale approach with implications well beyond the local implementation are described in detail. These listings include information on funding, personnel, evaluation, and replication, as well as extensive program descriptions. Other programs which provided less formal outcome data are presented as brief summaries. Two alphabetical listings are included, one of programs by states in which they are located and one by program title. (200 references) (JDD)

**Abstract:** A survey of 312 teachers and families of students with severe disabilities in California, Colorado, Kentucky, Utah, and Virginia was designed to measure the extent of implementation of 12 educational "best practices" and the level of demonstration of seven student outcome variables. The educational practices included: integration into school and family activities, integration into community recreational activities, functional educational program, data-based instructional programs, community-based instruction, transdisciplinary model, teacher integration, program reflecting respect for students, teacher inservice training, teacher education, teacher experience, and principal involvement. Additionally, three demographic variables--the type of community, family socioeconomic status, and the age of the student--were included as factors which may be strongly associated with student performance. Student outcome variables included social skills development, communication skills development, positive affective demeanor, percent of Individualized Education Program objectives achieved, level of independence, positive nondisabled peer attitude, and positive parental expectations for their child's future. Results of a series of multiple regression analyses indicated that a single program variable, the degree to which students were integrated into school and family activities, was significantly associated with each one of the high priority student outcome variables. **Geographic Source:** US; California

**Journal Announcement:** RIE

**Target Audience:** Administrators

**Abstract:** This technical assistance planning guide was developed as part of the PEERS (Providing Education for Everyone in Regular Schools) Project, a California project to facilitate the integration of students with severe disabilities previously at special centers into services at regular school sites and to facilitate the integration of students in special classes in regular schools into general education. The guide emphasizes building the capacity of states, school districts, and school sites to provide quality educational programs to students with disabilities in integrated and inclusive environments by providing a framework of technical assistance activities. The guide stresses local ownership and provides self-assessment checklists to evaluate practices at the state, district, and school building levels. After an introduction and suggestions for using the guide, the guide lists (with references) practices shown to be effective at each level. The next three sections address state level planning, district level planning, and building level planning respectively. Provided for each level is an "Effective Practice Checklist," specification of effective practices and supportive strategies, and a "Resource Planning Guide." Checklists and planning forms are appended. (406 references) (DB)

**Geographic Source:** US; California  
**Journal Announcement:** RIE

**Abstract:** A survey was conducted of the families and teachers of 1009 students with severe disabilities from five states, to identify factors associated with their integrated educational placement. The questionnaires were designed to measure 19 variables which integration literature suggests are predictive of integrated placement. Logistic regression procedures were utilized to determine the probability of integrated placement as a function of the identified variables, which included characteristics of the student, family, school program, administration, and logistics. Three theoretical models of variables associated with integrated placement were examined, representing integration advocacy, socioeconomic status, and program/ facilities characteristics. Additionally, a combined model was estimated using the strongest predictors from the three theoretical models. Within the program/facilities model, predictor variables were the integration characteristics of the Individualized Education Program, the adequacy of ancillary services, transportation adequacy, and physical accessibility. Within the socioeconomic model, parents' rating of residence in an urban community and teachers' rating of higher general community income were associated with integrated placement. Within the advocacy model, the variable most strongly associated with integrated placement was teacher advocacy for integration, followed by administrator advocacy. When all the variables from the three conceptual models were combined, six strongly correlated variables were identified. (41 references) (JDD)

**Title:** IFSPs and IEPs [and] DEC Recommended Practices  
**Author:** Turbiville, Vicki and others  
**Article Info:** 1993, 10p, LEVL 1; in DEC Recommended Practices: Indicators of Quality in Programs for Infants and Young Children with Special Needs and Their Families; DEC Task Force on Recommended Practices  
**Document Type:** 070; 120  
**Geographic Source:** US; Kansas  
**Journal Announcement:** RIE

**Abstract:** This paper lists practices recommended by the Council for Exceptional Children's Division for Early Childhood concerning Individualized Family Service Plans (IFSPs) and Individualized Education Programs (IEPs) in early intervention and early childhood special education programs for infants and young children with special needs and their families. An introduction notes that the guiding principles for the development of the recommended practices involved having families choose their extent of decision making involvement, and giving the IFSP or IEP document secondary importance to the development process. Other principles guiding the development of the recommended practices include: belief in collaboration among families and service providers; desire to eliminate the bureaucracy in the process; expectation of positive, growth-enhancing opportunities for team members; strong preference for quality, inclusive services; and a vision of family choice in the sources and delivery of services. Six components for IFSP and IEP indicators are also discussed: (1) IFSP and IEP teams should be broadly constituted and team members should be prepared for their roles; (2) IFSP and IEP development and selection of the service coordinator should be individualized; (3) documents should be individualized; (4) documents must be dynamic and responsive to changes in the child and family; (5) documents belong to the family; and (6) evaluation and monitoring of IFSP/IEP implementation should be a vehicle for the constant improvement of services. Forty-one recommended practices are then listed, focusing on the IFSP/IEP process and state and local monitoring. (JDD)

**Geographic Source:** US; New York

**Journal Announcement:** RIEJUL93

**Abstract:** The Inclusive Education Project was a collaborative demonstration project between the Division of Special Education and Rehabilitation at Syracuse University and the Syracuse City School District, in New York. It was designed to meet special problems of children with severe handicaps in regular education settings. Project goals included: (1) develop eight demonstration sites that exemplify inclusive education models, from elementary to high school levels; (2) develop a building-level process to create or further develop a model that includes students with severe handicaps; (3) develop criteria for establishing an inclusive education model for students with severe handicaps; (4) develop a tool that can be used by districts to evaluate their integrated classroom programs; and (5) engage in a district-wide planning process that protects the integrity of the model programs and assures their continued expansion. The eight schools engaged in a building-level process that helped to clarify, further develop, and gain consensus on approaches to education that promote the inclusion of students with severe disabilities. Leadership institutes were held to strengthen the commitment of administrators to inclusive education and to develop a local network of people with expertise, and implementation materials based on the project experience were produced and disseminated. This final report provides details and project objectives, findings underlying the project approach, a description of the model and participants, a list of methodological and logistical problems, evaluation findings, and project impact. Appendices provide background materials relating to the project. (JDD)

**Title:** Inclusive School Guidelines: A Template for Including all Students in the Neighborhood School  
**Author:** Wilcox, B. and Sprague, J.  
**Article Info:** 1992, 12 pages  
**Price:** Free  
**Available From:** Center for School and Community Integration, Indiana University, Institute for the Study of Developmental Disabilities, Bloomington, IN 47405  
**Category:** Strategies/Implementation  
**Format:** Document

**Abstract:** This document provides a template which may be used by school staff, students, and parents for planning and monitoring the implementation of an inclusive school program. The guidelines include building outcomes, teacher of record outcomes, and student outcomes. The guidelines are structured around seven areas: policies and procedures, collaboration of special education personnel with the community, inclusion of students with disabilities in the community, IEP development, design and delivery of effective instruction, choice and dignity of students, and family participation. For each area, questions are asked to address "what will it take," "what will it mean," "what should we look for." Space is provided for listing the actions needed to achieve a particular result.

**Title:** Integration Checklist: A Guide to Full Inclusion of Students with Disabilities  
**Author:** Minnesota Inclusive Education Technical Assistance Project  
**Article Info:** 1992, 2 pages  
**Price:** Free  
**Available From:** Institute on Community Integration, University of Minnesota, 109 Pattee Hall, 150 Pillsbury Drive SE, Minneapolis, MN 55455; (612) 624-4512  
**Category:** Checklists  
**Format:** Brochure

**Abstract:** The Integration Checklist was designed to be a tool to help educational team members identify potential indicators of inclusion in their schools. It can also be used to help teams facilitate the membership, participation, and learning of students with disabilities in regular education classes and other integrated school settings. The checklist is divided into four sections, each related to a different aspect of inclusion: "Go With the Flow," "Act Cool," "Talk Straight," and "Look Good." Education team members can ask the 33 questions included in the checklist for each individual student in a specific class. The brochure warns that team members should not view the checklist as an absolute measure of inclusion because every indicator may not be appropriate for each student and each class. Instead, it should be used to guide team planning and discussion.

**Category:** Strategies/Implementation  
**Format:** Document

**Abstract:** This paper offers an overview of the inclusive education program that has been implemented in the Coloma Community Schools during the last five years. The Creative Useful Experiential (Project CUE) instructional model is used to integrate special education and Chapter 1 students into regular classroom settings by: (1) utilizing the thematic approach to make the curriculum more interesting to students, (2) use of teacher collaboration to assure the needs of all children are being addressed, and (3) the use of a variety of experience-based classroom activities. The author discusses the structure of the program, staff development, outcomes, evaluation, and elements required to make it work.

**Document Type:** 055

**Geographic Source:** US; Ohio

**Journal Announcement:** RIE

**Target Audience:** Practitioners

**Abstract:** This guide was developed to help people meet the challenge of developing early childhood programs that are inclusive of all children, regardless of disability. The manual was written in the spirit of a quilting book, in its recognition of the importance of the quiltmaker's (and the program developer's) own adaptations, creativity, and inspiration. Quotations from quilting books and illustrations of popular quilting patterns are included in the margin notes. The manual was assembled from conversations with people in Ohio who have created inclusive environments, and the text is primarily excerpts from those conversations. Concepts covered include the meaning of integration, strategies related to integration, characteristics of children with disabilities, developmentally appropriate practices, management of the classroom environment, the philosophy of a family-centered approach, collaboration, changes in approaches to serving young children with disabilities and their families, leadership, conflict resolution techniques, and problem solving strategies. Chapters include: "Designing the Pattern: The Idea of Integration," "Preparing the Fabric: Children," "Piecing the Quilt Tops: Families," "Assembling the Layers: Collaboration," "Stitching along New Lines: Change," "Binding the Edges: Leadership," "Smoothing Out the Wrinkles: Conflict Resolution," and "Tying Up Loose Threads: Solutions." (Chapter references) (JDD)

**Document Type:** NONCLASSROOM MATERIAL (055); BIBLIOGRAPHY (131)

**Geographic Source:** US; Kentucky

**Journal Announcement:** RIEJUN93

**Target Audience:** Practitioners

**Abstract:** These guidelines are intended to help educators and other school personnel in Kentucky better manage the inclusion of students who require health services in either special or regular educational settings. The brief manual has sections which address: definitions; related Kentucky regulations; results of a statewide survey on personnel, qualifications, and policies regarding delivery of health services in classrooms; belief statements; placement and Individualized Education Program development; provision of related services; training of unlicensed school personnel to perform special health care procedures; emergency procedures; and transportation issues. Much of the document is comprised of 12 appendices which include: recommendations for dealing with specific health care procedures; guidelines for developing appropriate individual education programs for students with special health care needs; sample letters and forms; information on preventing transmission of communicable diseases; and listings of local health departments and home health coordinators, national resources and information centers, and related statewide training projects and materials. There are 14 references and an annotated bibliography of 88 related documents and readings. (DB)

**Author:** Karasoff, Patricia and others  
**Article Info:** Dec 92, 180p, LEVL 1; in Campbell, Patrick and others. Statewide Systems Change Project for the Integration of Severely Disabled Students in California: The PEERS Project (Providing Education for Everyone in Regular Schools); Final Report; see EC302196  
**Contract Number:** G00873056-91; G0087C3058-91  
**Document Type:** 070  
**Geographic Source:** US; California  
**Journal Announcement:** RIE  
**Target Audience:** Policymakers; Administrators

**Abstract:** This review of effective practices in statewide systems change was conducted as part of the PEERS (Providing Education for Everyone in Regular Schools) Project, a 5-year collaborative systems change project in California to facilitate the integration of students with severe disabilities previously at special centers into services at regular school sites and to facilitate the integration of students in special classes in regular schools into general education. A "Systems Change Review Tool" was developed in cooperation with major systems change efforts in 16 states. Critical activity areas identified and verified by this measure constitute the main sections of the manual, addressing: (1) facilitating locally owned change; (2) increasing awareness and knowledge of best practices; (3) supporting the implementation effort; (4) promoting collaboration; (5) dissemination activities; and (6) evaluating change. Within each section, information is provided on: a rationale for the activity's inclusion in a comprehensive approach to systems change; a narrative describing relevant strategies with examples and case studies; and an annotated listing of selected strategies utilized across the states within each critical activity area. Appendices provide a directory of systems change projects, a list of products from system change projects, and sample systems change discrepancy analysis worksheets. (59 references) (DB)

**Title:** The MESH Manual for Inclusive Schools  
**Author:** Gallucci, C., Emily Dickinson School Staff, and Silver Ridge School Staff  
**Article Info:** 1993, 131 pages  
**Price:** Free  
**Available From:** Washington State Office of Superintendent of Public Instruction, Special Education Services, PO Box 47200, Olympia, WA 98504-7200; (206) 753-0317  
**Category:** Strategies/Implementation  
**Format:** Document

**Abstract:** The MESH manual provides guidelines for the development of inclusive schools, based upon the experiences of two elementary schools chosen to pilot Project MESH from 1989-1992. The manual is organized around the key concepts of an inclusive school: The Schools (current program offerings); The Change Process (a description of the building-based change process and how it evolved); Teamwork (effective teaming practices and role descriptions); A Community of Learners (strategies for building a sense of community in schools); Individual Student Planning (appropriate program planning and curriculum adaptations). Core Team meeting notes from the first year of planning Project MESH are included.

Major lessons learned from the experience of Project MESH included in the introduction to the manual are that:

- Inclusion is a process.
- The key to inclusion is COLLABORATION.
- People involved with inclusion need to be creative, flexible, and willing to work together.
- Special education in inclusive schools must be viewed as a support service to the general education process.
- Each school will have unique plans for inclusion.
- Inclusion is not finished.

## ***I. Philosophy, History, and Viewpoints***

**Title:** Achieving Full Inclusion: Placing the Student at the Center of Educational Reform. In Stainback, W. & Stainback, S. (Eds.), *Controversial Issues Confronting Special Education: Divergent Perspectives* (pp. 3-11)

**Author:** Lipsky, D., and Gartner, A.

**Article Info:** 1992, 9 pages

**Available From:** Allyn and Bacon, 160 Gould St., Needham Heights, MA 02194

**Category:** Philosophy

**Format:** Book chapter

**Abstract:** The authors maintain that inclusion is enhanced by current reform efforts that place the student at the center of educational reform. The shift away from national, state, and local authorities to teacher empowerment, school-based management, and parental choice places students at the center, recognizing that they are the producers of their own learning. This new attitude is not a panacea for the problems that schools face. But the recognition of students as producers of learning "can be the necessary change that powers a third wave of school reform," the authors maintain.

**Abstract:** This descriptive study formulates a comprehensive picture of the structure, educational practices, and associated positive student outcomes of integrated programs for students with severe disabilities across a variety of California communities. Three of the seven participating programs represented the full inclusion model of integration implemented at the elementary level. Four of the programs represented special class models of integration; two were located at elementary schools and two at high schools. The study presents descriptive information on each of the models of integration, with quantitative measures of positive student outcomes. Outcome measures in this preliminary study were restricted to the quality of the students' individualized education programs (IEP), the extent of integrated activities for each child across the school day, and the extent and type of interactions occurring between the students with disabilities and their nondisabled schoolmates. Findings included the following: (1) the high school special class model received the highest rating for quality of IEPs; (2) students in the full inclusion programs spent an average of 94 percent of school hours in integrated settings; and (3) the amount of reciprocal interaction was almost identical across the three models. **Abstract:** A review of the history of special education delivery systems reveals a continuous trend toward progressive inclusion. Because it is now possible to serve all disabled students in neighborhood schools, remote specialized places such as the residential and day school are likely to be eliminated. (Author/DB)

**Title:** Are Researchers Missing the Boat on Inclusion?  
**Author:** Roper, Paul A.  
**Article Info:** Palaestra; v8 n1 p Fall 1991  
**Document Type:** 080; 070; 120  
**Target Audience:** Practitioners; Researchers

**Abstract:** This article is an overview of the theoretical orientation of research on mainstreaming of students with disabilities. An attempt is made to demonstrate that the current approach is unproductive in bringing about progressive inclusion of students currently excluded. This model and its inherent assumptions entail paradigms which reinforce continuation of a two tier model of education, instead of a more effective paradigm viewing inclusion as a value-driven issue. **Journal Announcement:** RIE

**Abstract:** This keynote address discusses the importance of having a dream, or shared vision, of the future of individuals with severe disabilities within society. A dream of a social environment that encourages and enables communication with individuals with severe disabilities is proposed. A plan for turning that dream into reality focuses on effective communication partnering, where all members of society have the desire and skills needed to communicate effectively with individuals with severe disabilities. The presentation concludes with a journey on a flying machine, which provides an overview perspective of how the field has evolved through various emphases, including communication units (pre-1957 period), rules (1960s), communicative intent (early 1970s), communicative function (mid 1970s), dyadic interaction (late 1970s), and the ecological interrelationship of individual and environmental variables (1980s). The speech then urges the melding or merging of all previous phases if the dream of full inclusion and the scheme of effective partnering are to be attained. (Author/DB)

**Abstract:** This compilation of papers resulted from a forum which included professionals from higher education, special education, personnel training, medicine, and related services. The forum attempted to identify current trends in education of children and youth with disabilities and to link these trends to the training of personnel. Topics, originally identified from federal grant applications, fell into two categories: first, school-based practices and second, needs of children and youth affected by drugs and alcohol. Outcomes of discussion on these topics resulted in the following papers: "Focus on Special Education: Yesterday, Today, and Tomorrow" (James Tucker); "A Look at School-Based Practices from the Local Perspective: Decisions Among Friends vs. The Weenie Factor" (Ned S. Levine); "In-Service Training: School-Based Practice" (M. R. Bryan); "The School as the Center of Educational Reform: Implications of School-Based Practice for Research" (Linda A. Patriarca and Patricia Thomas Cegelka); "Developing Teacher Researchers: Preservice and Inservice Considerations" (Mark A. Koorland); "Philosophy, Differences, and Education" (Diane Baumgart); "A Consultant's Use of Qualitative Methods in Implementing Systems Change: A Snapshot of a Ridgeview High School Program in Special Education" (Diane Baumgart); "Issues in Certification Needs" (Philip R. Jones et al.); "Interventions for Infants Born Affected by Drugs and Alcohol" (Marilyn Krajicek); "Examination of Issues Related to Inservice Programming for Personnel Working with Children Who Are Prenatally Exposed to Drugs and Alcohol" (Lyndal M. Bullock et al.); and "Perspectives on Research in Alcohol and Drug Abuse as It Relates to Special Education and Personnel Preparation" (Robert E. Crow). (DB)

**Abstract:** This theme journal issue focuses on current activities of the Office of Special Education and Rehabilitative Services which stress inclusion of students with disabilities in the mainstream. It begins with a message from the Assistant Secretary, Robert R. Davila which examines the full meaning of an "inclusive" education. Next, Barbara Buswell and Beth Schaffner, in "Building Friendships--An Important Part of Schooling", focus on how development of integrated friendships can be supported with examples from the PEAK Integration Project. "The Career Ladder Program Multi-district Outreach: The Road to Success" (by Shepherd Siegel and Deborah Brians) stresses principles of integration underlying this San Francisco (California) program. The following article, by Shirin D. Antia and Kathryn Kreimeyer, titled "Project Interact: Interventions for Social Integration of Young Hearing-Impaired Children," reports on two studies comparing the effectiveness of a social skills intervention and an integrated activities intervention. The following article, "Why Are These People Working?", by Frank Simpson, reports on employment activities and outcomes fostered by the Helen Keller Services for the Blind. Next, Judith A. Cook, in "Thresholds Theater Arts Program," describes vocational opportunities developed by the Thresholds National Research and Training Center on Rehabilitation and Mental Illness in Chicago (Illinois). "Closing the Sheltered Workshop: A Case Study of Agency Change" (Stephen Murphy and Pat Rogan) examines the change process at the Pioneer Activities Center (Syracuse, New York). Finally, Kenneth D. Gadow, summarizes the literature on "Medication and School Behavior." (Most articles include references.) (DB)

**Title:** Inclusion Practice Priorities Instrument  
**Author:** Montie, Jo and others  
**Article Info:** Jan 92, 12p, LEVL 1  
**Rep:** U of Minnesota, Minneapolis; Inst. on Community Integration  
**Sponsoring Agency:** Department of Education, Washington, DC  
**Contract Number:** H086D00014  
**Document Type:** 160  
**Geographic Source:** US; Minnesota  
**Journal Announcement:** RIE  
**Target Audience:** Practitioners

**Abstract:** This instrument was developed to assist individuals or teams to review best practice indicators regarding the development of inclusive school communities and to establish priority targets for improvement. The instrument covers three areas: (1) school community issues, (2) team issues, and (3) classroom issues. For each area, there is a review sheet which gives examples of what "best practice" looks like and what it does not look like. Sample best practices include: the student uses the same restroom as same age peers, with the same level of privacy made available; the core team has implemented a workable method of ongoing communication to keep all team members communicating and aware of updates; and the student is assigned school jobs/responsibilities at the same frequency as classmates. Accompanying each review sheet is a worksheet which is used to structure a discussion of the best practice indicators. For each indicator, individuals are asked to consider whether they agree or disagree with the identification of that item as a best practice, determine the degree to which that practice is currently happening in the school community, and decide the level of priority to be given to improving upon that practice. For best practices identified as top priorities for improvement, action plan sheets are provided. (JDD)

**Document Type:** 120  
**Geographic Source:** US; Tennessee  
**Journal Announcement:** RIE

**Abstract:** This critical discussion of current trends in special education examines the current inclusive schools movement and compares it to the regular education initiative (REI). After contrasting the two movements' respective advocates, goals, tactics, and understanding of and links to general education, the paper argues that the field's rhetoric has become increasingly strident and its perspective has become increasingly insular and disassociated from general education's concerns. Especially noted is the disproportional influence in the inclusive schools movement of those concerned with individuals with severe intellectual disabilities (especially The Association for the Severely Handicapped) and their rejection of the concept of a continuum of placement options. Goals of the inclusionists are seen as focusing on abolishing special education and promoting social competence (in contrast to REI's emphasis on preventing academic failure and emphasizing academic standards and accountability). Special education is blamed by many in the inclusive schools movement as being responsible for general education's failure to accommodate diverse student needs. Believers in full inclusion are urged to put the specific needs of individual children first and to compromise with general education. However, a pessimistic prediction is proffered concerning the current movement's ability to forge a productive alliance with general education. (120 references) (Author/DB)

**Target Audience:** Practitioners

**Abstract:** This book chronicles the experiences of practitioners pursuing the complete integration of students with disabilities in regular school settings in Canada, Australia, The United Kingdom and the United States. Selections provide policy analysis as well as a focus upon the implications of policy for teachers, parents and students at the school level. Part I examine the history of the movement in "Integration in Victorian Schools: Radical Social Policy or Old Wine?" (Lewis) and "Divide and Rule: A Study of Two Dividing Practices in Queensland Schools" (Meadmore). Part II examines international perspectives on integration in the following papers: "The Politics of Integration: Observations on the Warnock Report" (Barton and Landman); "Special Educational Needs in a New Context: Micropolitics, Money and 'Education for All'" (Gold et al); "Hanging on by a Thread: Integration into Further Education in Britain" (Corbett); "From Integration to Inclusion: The Canadian Experience" (Uditsky); and "What Is This 'Least Restrictive Environment' in the United States?" (Henderson). Part III, "Politics and Pedagogy: Inclusive or Exclusive Schools?" includes: "Implementing Policy: Some Struggles and Triumphs" (Semmens); "Schools and Contests: A Reframing of the Effective Schools Debate?" (Fulcher); "Integrating the Secondary School Curriculum: Balancing Central and Local Policies" (Knight); "Contests in Decision Making at the School Level" (Marks); "Inclusive Learning Initiatives: Educational Policy Lessons from the Field" (Slee); "Teacher Education as a Strategy for Developing Inclusive Schools" (Ainscow); and "Developing Effective Whole School Approaches to Special Educational Needs: From School Effectiveness Theory to School Development Practice" (Ramasut and Reynolds). A final section on parents, students and integration includes: "How Disabling Any Handicap Is Depends on the Attitudes and Actions of Others: A Student's Perspective" (Walsh); "A Parent's Perspective on Integration" (Lyons); and "Integration: Another Form of Specialism" (Rice).(PB)

**Abstract:** This monograph presents a collection of experiences and insights about building inclusive school communities in which all members, adults and children, learn and grow together. The monograph addresses the challenging and hopeful venture of welcoming all children into their neighborhood schools, regardless of their abilities and interests. The more than 60 brief anecdotes reflect how children of today are being afforded opportunities to accept, value, and appreciate diversity and to see similarities in all people. The experiences describe successful instances in the inclusion process and provide examples of effective educational practices. (JDD)

**Title:** Options and Choices - Necessary Steps to Success  
**Author:** National Association of Private Schools for  
Exceptional Children (NAPSEC)  
**Article Info:** 1993, 1 page  
**Price:** Free  
**Available From:** National Association of Private Schools for  
Exceptional Children (NAPSEC), 1522 K Street, NW,  
Suite 1032, Washington, DC 20005; (202) 408-3338  
**Category:** Policies/Position Papers  
**Format:** Policy statement

**Abstract:** The National Association of Private Schools for Exceptional Children (NAPSEC) is a nonprofit association whose mission is to promote excellence in educational opportunities for special needs children. NAPSEC schools provide special education for preschool, elementary, and secondary aged children and young adults with mild to severe disabilities who are in need to individualized education programs.

The NAPSEC policy on inclusion defends separate classrooms and schools as appropriate for some students with disabilities. The organization expresses the concern that the "all or nothing" approach to placing children with disabilities in regular education classrooms emphasizes a "program ideal instead of a child's individual and unique educational needs," which may result in the child not achieving his/her maximum potential. Students who are served in separate classrooms and schools, the NAPSEC maintains, "are receiving the type of additional assistance necessary to help them succeed, not to keep them from succeeding."

**Document Type:** CONFERENCE PAPER (150)  
**Geographic Source:** US; Idaho  
**Journal Announcement:** RIEJUN93

**Abstract:** This paper argues that the philosophic assumptions underlying full inclusion efforts for students with severe disabilities and other restructuring movements are actually barriers to "best practice" implementation, and an alternative perspective based on social relations is offered. First two different perspectives on disability, the "different person" perspective (which sees differences as inherent and immutable) and the rights perspective (which views all individuals as entitled to the same rights, services, and outcomes) are compared. Both perspectives are seen to result in a dilemma and be inappropriate to guide current restructuring. In contrast, the social relations perspective views differences in the context of relationships which are expected to change with time or as the comparison basis changes. This perspective is applied to a case in which an emphasis on gender differences in provision of maternity leave is replaced with relation-based provision of parental or family leave. Other examples apply the social relations perspective to inclusion of students with severe disabilities and the provision of bilingual/bicultural education to all students and not just to the Spanish-speaking minority. **Abstract:** This compilation of position statements of the Association for Retarded Citizens (ARC) describes what the Association believes on critical issues related to rights, treatment, services, and programs for children and adults with mental retardation and their families. This publication contains positions that the Board of Directors of ARC of the United States agreed, in 1988, should remain in force as written and those new and/or revised that were approved by the ARC's Delegate Body in 1989 and 1990. Specific position statements address the following topics: the rights of people with mental retardation, quality assurance, family support, individual service coordination (case management), integration, self-advocacy, sexuality, education, employment, residential living arrangements, behavior intervention, guardianship, and prevention of mental retardation. **Abstract:** This document presents a "Quality Program Indicators Checklist" developed with the goal of program improvement in classrooms for students in Kentucky with moderate and severe handicaps. The checklist evaluates program effectiveness in six component areas: (1) integration (interaction opportunities and teacher behaviors supportive of integration and individual integrated student outcomes); (2) functional curriculum (local catalog of age-appropriate activities, parent participation, assessment, and IEP goals); (3) systematic instructional procedures (individualized instruction, program data analysis, social behavior change programs, program management and environmental design); (4) community-based instructional programs (goal selection, frequency, implementation, emergency procedures); (5) transdisciplinary services and integrated therapy (block scheduling, assessment, embedded related services objectives, integrated service delivery, integration of adaptations, consultation and role release, information exchange and team meetings, implementation issues); and (6) vocational instruction and Individual Transition Plans. Each component has a brief introduction, rationale, and set of best practice indicators. Each measure has a data source and criteria for exemplary implementation. The quality indicators are correlated with established Kentucky curriculum goals and with findings of the school effectiveness movement for all students. (References for each component area.) (JDD)

**Abstract:** Fears concerning possible results of including students with severe disabilities in regular programs are raised, including: (1) the insinuation of constructivism into a system emphasizing inclusion (rather than instruction); (2) a lack of policies to preserve educational integrity; and (3) elimination of special education as a full partner with regular education. (DB)

**Abstract:** This monograph addresses the issue of full inclusion of children and youth with severe intellectual disabilities and whether this form of social and academic integration is consistent with the direction of present school reform policies. The first section examines the implications of current efforts in educational reform. A case study illustrates differences between integration and inclusion. Key elements of full inclusion are identified: (1) full general education class membership; (2) full perception of "ownership" by the general education program (including special education); (3) individual outcomes-based decision making; (4) student-based services with team curriculum design; and (5) site team coordination of services and educational support. Next, issues in education policy are discussed such as recent trends in general education policy and reform. The following critical variables in school restructuring are identified: curriculum revision, performance-based assessment, decentralized instruction, school autonomy, site-based management and budgeting, shared decision making, infusion and coordination of educational resources, and community involvement. Finally, the comprehensive local school is described as a framework for inclusion through delivery of a variety of special education services and through systematic team design of the individual's curriculum within the general curriculum. **Abstract:** The movement toward inclusion of students with disabilities in regular education classes reduces the variety of options for such youngsters and narrows the continuum of services offered to them. It would be unwise to eliminate separate programs at a juncture which does not provide for all children and with knowledge that fails to indicate that every need can be accommodated in a public school, integrated setting. **Abstract:** This final report describes the PEERS (Providing Education for Everyone in Regular Schools) Project, a 5-year collaborative systems change project in California to facilitate the integration of students with severe disabilities who were previously served at special centers into services at regular schools and the integration of students in special classes in regular schools into general education. The project resulted in more than 3000 students with severe disabilities making the transition from special centers to age-appropriate regular school sites or general education classrooms. Other project outcomes included: (1) development and dissemination of 17 products; (2) training and technical assistance to a total of 450 local education agencies (LEAs); and (3) revision of pupil count and compliance review procedures to obtain better integration data. Sixteen appendices include the following: the PEERS Integration/Inclusion Needs Assessment; a sample LEA plan; PEERS implementation site criteria for inclusive programs; the PEERS consultant bank; and a preservice course syllabus. Appendices also include the following documents: "Effective Practices for Inclusive Programs: A Technical Assistance Planning Guide" (Simon et al.); "Systems Change: A Review of Effective Practices" (Karasoff et al.); "Curriculum Adaptation for Inclusive Classrooms" (Neary et al.); "PEERS Guidelines for Full Inclusion" (Neary et al.); "Parent Perceptions of Integration Transitions" (Hanline and Halvorsen); "Integration of Students with Severe and Profound Disabilities: A Review of Research" (Halvorsen and Sailor); and "The Elementary School Principal's Role in the Education of Students with Severe Disabilities" (Smith). **Abstract:** This final report describes activities of the Early Integration Training Project (EITP), which provided multidisciplinary inservice training to child-care personnel in Ohio to facilitate the inclusion of young children (birth through age 5) with disabilities in typical community early childhood programs. The 3-year project has provided a 15-hour training program to 1,046 individuals from 35 Ohio counties. The training approach was developed to be suitable for mixed audiences, to promote the development of relationships among providers, and to utilize collaborative interagency features. The resulting training program consists of four modules entitled: (1) "What is Integration?"; (2) "Who Are the Children?"; (3) "Who Are the Adults?"; and (4) "Problem Solving and Preparation for Integration." Participant evaluation was found to be uniformly high, and follow-up evaluation found significant changes in participant awareness of the issues and changes in practice. A total of 102 children were reported to be integrated as a direct result of the training program. This report includes sections on: the project's goals and objectives, the theoretical and conceptual framework of the project, description of the model and participants, methodological and logistical problems and solutions, evaluation approach, project impact, and sources of further information. **Abstract:** This collection of over 30 papers presents the view that all persons should be equally valued, provided equal opportunities, viewed as unique individuals, and be exposed to and learn from and about people with diverse characteristics. The papers offer insight into the process of moving forward to achieve both equity and excellence for all people, labeled "disabled" or not, in educational and other community settings. The articles call for advocacy, attitude change, and expanded availability of appropriate supports and services within schools and communities to allow everyone to participate and contribute in a meaningful way. Titles of sample papers include: "Two Roads: Inclusion or Exclusion"; "The 'Butwhatabout' Kids"; "Annie's Gift"; "Common Sense Tools: MAPS and CIRCLES"; "MAPS: Action Planning"; "Dreaming, Speaking and Creating"; "Kick 'em Out or Keep 'em In"; "Vive la Difference"; and "Natural Support Systems." **Author:** CASE Research Committee, Indiana University  
**Article Info:** 1993  
**Price:** \$142 (\$255 if purchased as a set with Facing Inclusion Together)  
**Available From:** Council for Exceptional Children, 1920 Association Dr., Reston, VA 22091-1589; Publication Sales  
**Category:** Video  
**Format:** Videotape

**Abstract:** This video is the first of a set including Facing Inclusion Together Through Collaboration and Co-Teaching in which students, teachers, parents, administrators, and university professors discuss how they define and interpret the concept of inclusion. Teachers and scholars describe how inclusion benefits all students, and students and parents describe how inclusion has made a difference in their views of themselves and their school programs. The video addresses eight main points:

- The definition and meaning of inclusion
- The characteristics of an inclusive school culture
- Contrasting inclusion with mainstreaming, least restrictive environment and the continuum of services
- Environment and the continuum of services
- The heart of the inclusion debate
- Fears and barriers to starting an inclusion program
- Making inclusion work
- Community integration and outcomes
- Benefits and costs

**Title:** What Do Regular Class Teachers Think about Emotional/Behavior Disordered Students?  
**Author:** Center, David B.  
**Article Info:** Apr 93, 7+p, LEVL 1; paper presented at the Annual Conference of the Council for Exceptional Children (71st, San Antonio, TX, April 5-9, 1993)  
**Document Type:** 143; 150  
**Geographic Source:** US; Georgia  
**Journal Announcement:** RIE

**Abstract:** This study surveyed a random sample of 150 regular educators divided equally among elementary, middle, and secondary teachers, concerning their perception of the need for special education services for students with emotional or behavior disorders. It also examined teacher attitudes about the degree of placement restrictiveness needed by such students. The 102 respondents perceived aggressive students as having the greatest need for special services and the most restrictive settings. Anxious/withdrawn students were seen as having the least need for services and the least restrictive placements. Analysis of the responses considers grade level taught, extent of teaching experience, and sex of the respondents. Implications of these results for inclusion of students with emotional or behavior disorders are discussed. (Author/DB)

**Price:** \$25 plus \$5 shipping and handling  
**Category:** Video  
**Format:** Videotape

**Abstract:** This is a documentary of one student's experience as she moved from a segregated educational environment to her home school during first and second grade. Although Sarah has cerebral palsy and mental retardation considered severe, she is able to make progress and actually begins to walk for the first time in a regular education environment. A circle of friends program assures that she has a support system of friends. A team of general educators, Sarah's parents, a consultant, and the principal provide insight into the inclusion process and Sarah's experiences as a first and second grader in an inclusive setting.

**Language:** English

**Document Type:** RESEARCH REPORT (143); CONFERENCE PAPER (150)

**Geographic Source:** US; Pennsylvania

**Journal Announcement:** RIEJUL89

**Abstract:** A study examined the inservice needs of vocational educators related to the inclusion of special needs students in vocational classes. Purposes were to determine the statewide enrollments of special needs students in vocational programs; to examine the instructional needs of vocational educators for working with these students at three schools; to describe the history, program characteristics, and instructional strategies of working with these students; and to compile a list of inservice needs for instructors. The population included 5 administrators, 3 special needs support persons, and 42 instructors. Data were collected from descriptive information about secondary vocational programs in Pennsylvania obtained through publications from the Department of Education; questionnaires sent to the three schools; and interviews with administrators and special needs persons at the schools. Topics identified as being priorities for teachers dealing with special needs students were teacher attitudes, the mainstreaming process, involvement in the Individualized Education Plan, identification of special students, and teachers' rights. Instructors, administrators, and support persons had needs unique to their professional positions and school settings. Recommendations include inservice program development with instructor involvement in the planning.(YLB)

**Title:** Regular Lives [Video and Discussion Guide]  
**Article Info:** 1988  
**Available From:** The Council for Exceptional Children, 1920  
Association Dr., Reston, VA 22091-1589 (\$60, 30  
minutes)  
**Document Type:** 100; 070; 055  
**Target Audience:** Practitioners

**Abstract:** This package centers around a half-hour videotape documentary designed to stimulate awareness of the current state of normalization efforts for people with disabilities. The videotape includes interviews with people with disabilities from elementary school through adulthood, including discussions of group homes, employment, and educational mainstreaming. Interviews with coworkers, friends and family of mainstreamed individuals are also included. A brief accompanying guide includes several fact sheets on themes and key vocabulary, tips for preparing and managing group discussion of the documentary, and a summary of the state of mainstreaming today. Checklists provide guidelines for evaluating accessibility in schools, work sites, and community settings in general. Potential strategies for advancing mainstreaming in the community are also put forth. (PB)

**Target Audience:** Practitioners; Parents

**Abstract:** These three videotape recordings focus on provision of inclusive, family-centered programs for children with disabilities, birth through age 8. The first video is 14 minutes long and is titled "ICC Parents Share Their Stories." In it, four parents who serve on state interagency coordinating councils (ICCs) for early intervention share their families' experiences and expectations regarding the creation of family-centered service systems. The second video, "Together We're Better," is 9 minutes in length and demonstrates key issues related to early integration by focusing on the experiences of one Ohio parent and her preschool son who has Down syndrome. Examples from other programs are used to highlight positive practices. The third video, "Changing the Way We Think about Change: New Ways of Delivering Services to Families and Children," is 30 minutes in length. This video captures a September 1992 presentation by Larry Edelman discussing some of his ideas on the topic of family-centered care and changing approaches to serving families. (JDD)
