**IDENTIFIERS** Elementary Secondary Education Act Title III; ESEA Title III; Florida; \*Pretechnical Education

**ABSTRACT**

The document is one of five summary reports, all part of a Pre-Technical Curriculum Planning Project for secondary students who aspire to technical employment or post secondary technical education. This report represents the results of an assessment of the northeast Florida areas technical occupations in business. A three-phase approach was utilized: (1) the identification of three broad career clusters in records system and control, secretarial science, and marketing; (2) development of a survey instrument; and (3) a review of data collecting. The following occupations are analyzed according to tasks and corresponding skills/knowledges: computer librarian; control clerk; computer programmer, operator, and scheduler; accountant; bookkeeper; legal, medical, and executive secretaries; stenographers; sales manager; buyer; displayman; credit manager; stock manager; salesperson; service deskperson; copywrite; layout artist; hotel manager; and store manager. Employment statistics and projections, conclusions and recommendations complete the document. (NW)

ACKNOWLEDGMENTS

The project staff wish to express their appreciation to the following individuals and organizations for their contributions.

SPECIAL CONSULTANT

Dr. Harmon R. Fowler, Assistant Professor, College of Education, Division of Vocational and Technical Education, University of Georgia, Athens, Georgia

CHAIRMAN, SPECIAL ADVISORY COMMITTEE

Charles S. Merriam, Director Business and Office Occupations, Florida Junior College, Jacksonville, Florida.

ADVISORY COMMITTEES

I. Record Systems and Control

Mr. John F. Cohoon, Data Processing Department, Operations Division Supervisor, Naval Air Station, Jacksonville, Florida.

Mr. William Guilfoyle, Production Control Manager, Department of Central Services, Data Processing Division, City Hall, Jacksonville, Florida.

Mr. Choo Hua J. Eng, Instructor, Data Processing, Florida Junior College, Jacksonville, Florida.

Mr. Raymond Myers, Data Processing Manager, Prudential Building, Jacksonville, Florida.

Mr. Gerald Schemer, Certified Public Accountant, 1201 San Marco Boulevard, Jacksonville, Florida.

Mr. Howard Griffin, Membership Chairman, Data Processing Management Association, Jacksonville, Florida.

II. Secretarial Science

Miss Mary E. Mills, Employment Representative, Prudential Insurance Company, Prudential Building, Jacksonville, Florida.

Mr. Everette Groover, Supervisor of Program Planning and Evaluation, Business, Distributive, and Diversified Education, Duval County School Board, Jacksonville, Florida.

Mrs. Yvonne Moore, Coordinator, Business Education, Duval County School Board, Jacksonville, Florida.

Mrs. Connie Basford, Secretary, Jacksonville National Bank, President, Local Chapter The National Secretaries Association (International), Jacksonville, Florida.

Mrs. Jeane Weaver, Channel 7, Educational TV, President, Florida Division, The National Secretaries Association (International), Jacksonville, Florida.

III. Marketing

Mr. Bernard Kessler, Fashion Merchandise Manager, Sears Roebuck and Company, 200 West Bay Street, Jacksonville, Florida.

Mrs. Mary Ann Limbos, Director of Sales Promotion, Furchgott's Department Stores, 130 West Adams Street, Jacksonville, Florida.

Miss Helen Lloyd, Supervisor, Distributive Education, Duval County School Board, Jacksonville, Florida.

Mr. Chester Howarth, Director, Distributive Education and Mid-Management, Florida Junior College, Jacksonville, Florida.

Mr. Greg Payette, Coordinator, Distributive Education, Duval County School Board, Jacksonville, Florida.

COOPERATING INDIVIDUALS

William Curry, Manager, Publix Market, 3600 West University Boulevard, Jacksonville, Florida.

Carol Lassiter, Coordinator, Business Education, Orange Park, Florida.

Flora Horne, Legal Secretary, Jacksonville, Florida.

Milford S. Kahler, Vice President, Computer Power  
Company, Jacksonville, Florida.

COOPERATING ASSOCIATIONS

Data Processing Management Association, Jacksonville,  
Florida.

The National Secretaries Association, (International),  
Jacksonville, Florida.

Health Planning Council of Jacksonville, Jacksonville,  
Florida.

## INTRODUCTION

In 1961, the Duval County School Board took a major step forward in providing relevant curriculum for students when they adopted the concept of a three-program curriculum for senior high schools. The three programs decided upon by the Board were:

1. Vocational
2. College Preparatory
3. Pre-Technical.

The differences between this high school curriculum and most others were that:

The pre-technical program filled the gap between the vocational and the professional level preparation.

Each of the three programs was directly related to the student's post high school plans.

The traditional programs and curriculum had made available programs that would provide the skills and knowledge for pupils desiring to enter a vocation or college, but only a few technical and no pre-technical courses were offered.

This lack of a pre-technical curriculum was not a problem unique to Duval County Schools. Investigations by staff members of the Duval County School Board of existing programs at the local and state levels, followed by consultations with state and national experts in technological education revealed that no planned program of pre-technical education at the secondary level existed in the state or in the nation. Only fragments of a pre-technical curriculum,

... a few ... could be found. The failure of education on a national scale to respond to the needs of certain students, industries, and businesses emphasized the requirement for a carefully prepared pre-technical curriculum at the secondary level.

Education's failure to meet the need for technical and pre-technical education provided the impetus for this project. The project's ultimate goal is to develop a pre-technical curriculum which would provide secondary students, who aspire to technical employment or post secondary technical education, with the requisite skills, knowledges, and attributes to respond successfully to current and anticipated demands of local, state, and national job markets.

Before any curriculum could be developed, an assessment had to be made of the kinds of technical occupations that presently exist in the Northeast Florida area, plus the associated skills, knowledges, and attributes needed for these occupations. This summary report presents the results of that assessment.

The study was limited to the Northeast Florida area and to selected agencies because of time and personnel constraints. However, there is no reason why the procedures used in this study would not be applicable for a wider geographic region.

## DESIGN OF THE STUDY

This study was designed to meet the following objectives with respect to technical occupations in the business field in Northeast Florida:

1. To identify the existing technical occupations and the number of present and anticipated employees in each.
2. To determine the requisite skills, knowledges, and attributes associated with successful participation in each occupation identified in (1).
3. To cluster the technical occupations.

The scope of the study required a three-phase approach.

Phase I was the identification of three broad career clusters in business. These were determined to be:

1. Record Systems and Control
2. Secretarial Science
3. Marketing

Special Area Advisory and Review Committees were established in each of the clusters. Each committee was composed of:

1. Area specialists from Florida Junior College and the Duval County School Board
2. Working technicians
3. Key representatives from the business field in Duval County.

The first function of each committee was to prepare a rough draft survey form of tasks performed in each cluster area. A tentative list of skills, knowledges, and attributes was also identified at this time. The project staff was responsible for researching the literature and making

... were available to assist the committee members in this endeavor. After preparing the survey instrument for each area, the committee members identified agencies in the North-east Florida area which employed personnel in technical positions and then identified key individuals within those agencies. These key individuals were contacted by staff personnel and a job task survey instrument was completed for the technical occupations existing within the employing agency. At least one of the following methods was used to complete the survey instrument for each occupation.

1. Completed by technicians supervisor.
2. Completed by technician.
3. Completed by project staff member from available job description information.

Phase II consisted of developing a written survey instrument which was mailed to businesses not contacted in Phase I. This survey was used to supplement the information obtained in Phase I, and to identify the number of present and anticipated employees in each occupation. Businesses identified in Phase II were determined from the following sources:

1. Health Planning Council of Jacksonville
2. Data Processing Management Association
3. The National Secretaries Association (National)
4. Yellow pages of the telephone directory
5. Windale-Hubbell Law Directory, Volume I
6. Consolidated City of Jacksonville Records

7. Number of Commerce listings

An attempt was made to contact each identified business where one or more workers were required to have job performance competencies in the business field.

The primary method of collecting the number of present and anticipated employees was a mailed questionnaire. This method was selected for the following reasons:

1. It allowed wider coverage and a larger number of contacts than a personal interview.
2. It was less expensive than a personal interview.
3. A mailed questionnaire allowed the agency representative to complete it at his leisure.

Follow-ups (personal visit or telephone) to the questionnaire were made to agencies that did not return the survey by a project staff member.

In Phase III, members of the Special Area Advisory Committees reviewed the data collected to date. Task forces composed of consultants and members of each area advisory committee met individually and in some cases jointly to expand and compile the lists of tasks and skills in each of the three areas. Based on these lists, a final review and modification was made by selected committee members. The results of that review are shown in Chapters 1-5 of this report.

Chapter I

Identification of Technical Occupations

Business

This chapter presents a summary of the number of entry level and specialized technical occupations presently existing in Northeast Florida. The gathering of data from which the lists were derived was a continuing activity of the staff and members of the various advisory committees throughout Phases I and II.

No attempt was made by the staff or committees to interpret what was meant by various job titles or occupations in the marketing cluster. The common titles currently in use by the various businesses and industries were used, as were the job titles listed in the Dictionary of Occupational Titles.

<u>Area</u>	<u>Number of Occupations Identified</u>
I. Record Systems and Control	
A. Data Processing	6
B. Accounting	2
II. Secretarial Science	5
III. Marketing	13

CHAPTER II

TASK ANALYSIS OF SELECTED OCCUPATIONS IN  
BUSINESS RELATED FIELDS

In this chapter, a task analysis for each technical occupation is given. Section I is a task analysis for occupations in Record Systems and Control; Section II is a task analysis for occupations in Secretarial Science; and Section III is a task analysis for occupations in Marketing. Each section lists the occupation and its identifying code title. An (X) appearing in the column opposite the task row for a particular occupation indicates that that task is performed in the occupation.

These task lists were compiled from information and surveys conducted in Phases I and II. The original task lists were developed by task forces composed of members of the various advisory committees from job descriptions and publications available on competencies found in business careers. From the original task lists, a written survey instrument was developed which could easily be completed by anyone familiar with the occupations. As businesses were identified who employed individuals in technical positions, they were contacted by a staff member, and at least one of the following methods was used to complete the survey instrument:

1. Completed by technicians supervisor.
2. Completed by technician.
3. Completed by personnel office staff.

**BEST COPY AVAILABLE**

4. Completed by project staff member from available job description information.

Where several people were employed with the same job title, an attempt was made to obtain at least three completed surveys on that occupation. In those cases, a consensus of the individuals who completed the survey was necessary before listing that task as being performed in that occupation.

### CHAPTER III

#### TASK - SKILLS/KNOWLEDGES ANALYSIS IN THE BUSINESS FIELD

This chapter presents the skills and/or knowledges for each task listed in Chapter II. The identification of these skills and knowledges was made utilizing the following resources:

1. Consultants with expertise in the appropriate area.
2. Area specialists from Florida Junior College and the Duval County School Board.
3. Job description information from business and industry.
4. Publications on business careers.

A review of the skills and knowledges was made by members of the advisory committee before final approval. However, the skills and knowledges listed should not be considered as final. Each listing will be updated and revised as curriculum is developed in the second year of the project.

**I. RECORD SYSTEMS AND CONTROL**  
**A. DATA PROCESSING**

**TASKS**

1. Reads information punched into cards.
2. Code information to be punched into cards.
3. Handles cards properly.

**SKILLS/KNOWLEDGES**

- 1.1 Skill in recognizing types of punched cards and capacities.
- 1.2 Skill in understanding fields and field sizes.
- 1.3 Skill in recognizing types of printing on cards.
- 1.4 Skill in recognizing the various card uses.
- 2.1 (1.1) Skill in recognizing types of punched cards and capacities.
- 2.2 (1.2) Skill in understanding fields and field sizes.
- 2.3 (1.3) Skill in recognizing types of printing on cards.
- 2.4 Knowledge of simple card designs and layout.
- 2.5 Knowledge of proper coding conventions.
- 3.1 Knowledge of understanding functions of corner cuts and color schemes.
- 3.2 Knowledge of machine tolerance for cards.
- 3.3 Knowledge of card description.
- 3.4 Skill in aligning cards by riffling and joggling.
- 3.5 Skill in loading and unloading cards to and from containers with help stoppers and stubs.

**BEST COPY AVAILABLE**

I. RECORD SYSTEMS AND CONTROL  
A. DATA PROCESSING

TASKS

4. Setting up machine for punching cards.

SKILLS/KNOWLEDGES

- 4.1 Knowledge of parts of key-punch.
- 4.2 Skill in loading card hopper.
- 4.3 Knowledge of the function of the program control unit.
- 4.4 Skill in manual or key feeding and registering cards for punching.
- 4.5 Skill in using control switches.
- 4.6 Knowledge of difference between A, B and C character codes.
- 4.7 Knowledge of keypunching on a keypunch-varifier combination.

5. Plan card layout.

- 5.1 (1.1) Skill in recognizing types of punched cards and capacities.
- 5.2 (1.2) Skill in understanding fields and field sizes.
- 5.3 (1.3) Skill in recognizing types of printing on cards.
- 5.4 (3.3) Knowledge of card description.
- 5.5 Ability to specify types of data fields and sizes.
- 5.6 Ability to properly locate data.

BEST COPY AVAILABLE

## 6. Keypunches from source document.

- 6.1 (1.1) Skill in recognizing types of punched cards and capacities.
- 6.2 (1.2) Skill in understanding fields and field sizes.
- 6.3 (1.3) Skill in recognizing types of printers on cards.
- 6.4 (2.5) Knowledge of proper coding conventions.
- 6.5 (3.1) Knowledge of understanding functions of corner cuts and color schemes.
- 6.6 (3.2) Knowledge of machine tolerance for cards.
- 6.7 (3.3) Knowledge of card description.
- 6.8 (3.4) Skill in aligning cards by riffling and joggling.
- 6.9 (4.1) Knowledge of parts of keypunch.
- 6.10 (4.2) Skill in loading card hopper.
- 6.11 (4.3) Knowledge of the function of the program control unit.
- 6.12 (4.4) Skill in manual or key feeding and registering cards for punching.
- 6.13 (4.5) Skill in using control switches.
- 6.14 (4.6) Knowledge of difference between 12 and 64 character codes.

**BEST COPY AVAILABLE**

I. RECORD SYSTEMS AND CONTROL

SKILLS/KNOWLEDGES

- 7.13 Knowledge of program control card codes.
- 7.14 Knowledge of the parts of the program control unit.
- 7.15 (6.16) Skill in punching key or keytape as job entry.
- 8.1 (1.1) Skill in recognizing types of punched cards and capacities.
- 8.2 (1.2) Skill in understanding fields and field sizes.
- 8.3 (1.3) Skill in recognizing types of printing on cards.
- 8.4 (3.1) Knowledge of understanding functions of corner cuts and color schemes.
- 8.5 (3.2) Knowledge of machine tolerance for cards.
- 8.6 (3.3) Knowledge of card description.
- 8.7 (4.1) Knowledge of parts of key punch.
- 8.8 (4.2) Skill in loading card hopper.
- 8.9 (4.3) Knowledge of the functions of the program control unit.
- 8.10 (4.4) Skill in manual or key feeding and registering cards for punching.
- 8.11 (4.5) Skill in using control switches.

8. Duplicate card to verifier notch and corrects cards.

**BEST COPY AVAILABLE**

SKILLS/KNOWLEDGES

- 8.12 (4.6) Knowledge of difference between 48 and 64 character codes.
- 8.13 (4.7) Knowledge of keypunching on a keypunch verifier combination.
- 9.1 (1.1) Skill in recognizing types of punched cards and capacities.
- 9.2 (1.2) Skill in understanding fields and field sizes.
- 9.3 (1.3) Skill in recognizing types of printing on cards.
- 9.4 (3.1) Knowledge of understanding functions of corner cuts and color schemes.
- 9.5 (3.2) Knowledge of machine tolerance for cards.
- 9.6 (3.3) Knowledge of card description.
- 9.7 (3.4) Skill in aligning cards by riffling and joggling.
- 9.8 (3.5) Skill in loading and unloading cards to and from containers with help stoppers and stubs.
- 9.9 Knowledge of parts of sorter effecting alphabetic sorting.
- 9.10 Skill in reverse digit sorting.
- 9.11 Knowledge of various checking methods.
- 9.12 Knowledge of job time estimation procedure.

BEST COPY AVAILABLE

9. Open top sorter for alphabetic sorting.

10. Operates sorter for numeric sorting.

- 10.1 (1.1) Skill in recognizing types of punched cards and capacities.
- 10.2 (1.2) Skill in understanding fields and field sizes.
- 10.3 (1.3) Skill in recognizing types of printing on cards.
- 10.4 (3.1) Knowledge of understanding functions of corner cuts and color schemes.
- 10.5 (3.2) Knowledge of machine tolerance for cards.
- 10.6 (3.3) Knowledge of card description.
- 10.7 (3.4) Skill in aligning cards by riffling and joggling.
- 10.8 (3.5) Skill in loading and unloading cards to and from containers with help stoppers and stubs.
- 10.9 Knowledge of parts of sorter affecting numeric sorting.
- 10.10 (9.10) Skill in reverse digit sorting.
- 10.11 (9.11) Knowledge of various checking methods.
- 10.12 (9.12) Knowledge of job time estimation procedure.

11. Operates sorter to group cards.

- 11.1 (1.1) Skill in recognizing types of punched cards and capacities.

## CHAPTER IV

### NUMBER OF PRESENT AND ANTICIPATED EMPLOYEES IN BUSINESS OCCUPATIONS

This chapter presents a breakdown of the number of present and anticipated employees for the identified technical occupations. The data from which these tables were developed was a continuing process of the staff throughout Phases I and II. It was compiled through the use of one written survey by the Project Staff and the results of two independent surveys run previously by other organizations. The project survey form was forwarded to (766) seven hundred sixty six agencies, businesses and industrial firms in Duval County. The results of this survey plus the previously compiled results in surveys completed by the Health Planning Council of Jacksonville (completed 1972) and the Florida Department of Commerce (completed Oct., 1971), identified the number of individuals employed in the technical business occupations.

A confidential supplementary report consolidating the information compiled in the project survey, not to be released publicly, will give the names of the business firms and industries and their responses. This report will also be part of the final project report.

## CHAPTER V

### CONCLUSIONS AND RECOMMENDATIONS

This chapter presents the conclusions and recommendations of the Project Staff as they relate to the Business Area of technical education.

This chapter did not appear in the original summary report due to the fact that sufficient time was not available to review the findings with each of the Special Area Advisory Committee members. The staff also felt that feedback and recommendations from the Joint Planning Committee and the General Advisory Committee would be beneficial information to have before any summaries were written.

Therefore, the comments included in this section represent the opinions of individuals with expertise in the Business Area who have reviewed all available data. Such opinions should not be considered final or mutually exclusive of other judgments in that they are only presented here as a summary of the Project Staff's findings.

## CHAPTER V

CONCLUSIONS AND RECOMMENDATIONS

Partially because public education has failed to provide quality technical training or true career education for business and commercial occupations, there is projected long-term shortage of people prepared for sales, record keeping and data processing, office and secretarial work and related areas. Since the beginning of the 20th century, "business" has steadily lost status and appeal except for executive and top managerial positions. The result has been an oversupply of overeducated and over qualified "management scientists" and a shortage of technical level personnel.<sup>1</sup>

Furthermore, rather than staff with over qualified people, as was once the practice, business is increasingly searching for the appropriately trained individual. Clearly, it is the responsibility of the educational community to respond to these needs.

The northeastern Florida area, in particular, Duval County, is a business and commercial hub for much of the state. Thus, even if the responsibility did not exist for providing a broad base in occupational training because of the highly mobile nature of contemporary society, local requirements would dictate a high priority for developing relevant curricula in this area.

---

<sup>1</sup> Journal, July 14, 1972

Additional developments which suggest the growing need for pre-technical training in the business area are briefly cited below:

1. Record Systems and Control

There was once wide spread fear that automatic data processing would replace people. Not only did this not happen, but the reverse proved the case . . . more jobs rather than fewer. Moreover, the structure of jobs which is emerging includes increasing members of technical occupations.

For example, the trend towards installation and use of generalized "data management systems" (e.g., GIS, MARK IV) is creating a demand for technician level programming, rather than the professional level "analyst programmer" once required. At the same time, increasing use of source data automation techniques (e.g., optical scanning) is reducing the number of dead end "menial" jobs (e.g., key punch operators). Thus the pressure for mid-level technicians is being applied from both above and below.

2. Office and Secretarial Positions

The skills required for competence as a secretary are changing rapidly. Sophisticated office equipment (e.g., MAG-card typewriters, electrostatic copiers) has reduced the load of repetitive, routine work, and is making increasing demands on technical skills.

Trends toward group practice, pre-paid insurance plans, plus federal and local programs (e.g., medicaid), are leading to a more complex office work and greater needs for skilled medical secretaries. In the case of legal and executive secretaries, use of computerized office management services, the "MTST" and other similar developments are making the job different and leading to the need for new, relevant curricula.

### 3. Marketing and Sales

"Consumerism" is bound to lead to more careful buying practices on the part of more people. This does not, however, mean less buying (and selling); merely that the criteria for selecting purchases are changing. This, in turn, will mean that sales and merchandising personnel will have to become better informed about their products, more knowledgeable about their use, and in general, more creative in their selling or marketing.

In addition, advanced technology in the graphic arts is leading to wider use of multi-media approaches and exotic material in displays, advertising, and promoting. This means a need for more technically trained people familiar with the latest developments in plastics, printing, lighting and so forth.

Finally, the range of "acceptable" taste is widening rapidly and Americans are becoming far more cosmopolitan aesthetically. This is leading to "specialty" merchandising and the trend toward the self-contained "boutique".

**BEST COPY AVAILABLE**

This, in turn, creates a need for technically equipped staff who make buying and marketing decisions, as well as handle sales, keep records, and "manage" in the conventional sense. The growing interest of young people in "doing their own thing" is making this a viable economic concept.
