DESCRIPTORS Curriculum; Diagnostic Teaching; \*Educational Practices; Educational Trends; Elementary Secondary Education; Graduation Requirements; \*History Instruction; Inservice Teacher Education; \*Social Studies; State Surveys; Teacher Certification; Teacher Education; Testing

ABSTRACT

A state by state profile of requirements and course offerings compiled by the Council of State Social Studies Specialists and the Social Science Education Consortium, listing curriculum changes and requirements for teachers and students, shows that there are very different practices and situations among the 50 states and the District and Columbia, making generalizing difficult. An analysis is included: "The Status of Social Studies in the United States in the mid-1980s," by Irving Morrisset. Generalizable findings are that: (1) the "flavor" of social studies throughout the country is highly prescriptive; (2) major changes in requirements and recommendations for teachers in training, teacher certification, and inservice assessment have taken place since 1976; (3) most states have increased graduation requirements, many in the context of statewide testing and specification of competencies for specific courses; (4) in most states various courses are required, in addition to several history courses, either at state or local levels, and requirements for such courses have been increased; (5) the duties and influence of state social studies specialists vary greatly from state to state; and (6) recent trends in social studies with respect to requirements for teachers, students, and curricula predominantly are toward tighter requirements or recommendations and are seen overwhelmingly by state social studies specialists as being favorable to social studies in their own state and in the nation as a whole. Tables and an abbreviated survey instrument are provided. (AEM)

## COUNCIL OF STATE SOCIAL STUDIES SPECIALISTS (CS4)

The Council of State Social Studies Specialists is an organization founded in 1965, with the primary goal of providing a vehicle for the exchange of ideas among the various states. Its members include the specialists, consultants, and supervisors who have responsibilities for social studies education in the various state departments of education/public instruction. The membership officially meets once a year just prior to the annual convention of the National Council for the Social Studies. Other meetings are planned and held as is feasible and desirable. In these meetings, a program is planned which attempts to familiarize the members with new developments and provides an opportunity for cooperative endeavors and coordination of efforts.

The members have many common roles, responsibilities, and problems; yet each has a position that is somewhat unique. State social studies specialists occupy positions that require a variety of roles to strengthen instruction for school students. At times activities involve the specialists with local schools within the state; with the various bureaus, offices, and divisions of the state education department; with institutions of higher education within the state; with programs established by state and federal legislation; with professional organizations; and with public and private agencies outside of the state department of education.

## ACKNOWLEDGEMENTS

The Council of State Social Studies Specialists (CS4) wishes to acknowledge with sincere appreciation those who have influenced the development and production of this publication. In particular, we appreciate the work of Drs. Jerri M. Sutton, formerly with the Virginia Department of Education, and Norma Jean Peters, Roanoke County Schools, who authored and coordinated the original social studies survey of the 50 states. It was their leadership that led to the May, 1976, publication. Also, the Council is indebted to the CS4 Committee charged with this revision of the publication. Our special thanks go to Dr. Thomas A. Elliott, Virginia Department of Education, Chairman; Mrs. Gwen Hutcheson, Georgia Department of Education; and Mr. Paul G. Johnson, formerly with the Nebraska Department of Education.

## INTRODUCTION

This publication, National Survey-Social Studies Education, Kindergarten - Grade 12, is a revision of a May, 1976, survey conducted by Dr. Jerri M. Sutton and staff of the Social Studies Service, Virginia Department of Education. It was Jerri's hope that other Departments of Education would see the need for updating and printing this publication on at least a bi-annual basis. Failing to adopt this practice, the Council of State Social Studies Specialists (CS<sup>4</sup>) decided to commission an update of the survey. The council's purpose was to develop a profile - a one-page glance at social studies course offerings and requirements in grades K-12 for the 50 states and the District of Columbia.

The pages that follow consist of a state-by-state profile of requirements and course offerings and an analysis of the survey data entitled, "The Status of Social Studies in the United States in the Mid-1980's." The analysis and summary, drafted by Dr. Irving Morrissett, Social Science Education Consortium, was done following a thorough review of each survey form and, when necessary, telephone contacts with the state specialist.

It is the hope of CS<sup>4</sup> that the information contained in this publication will be of assistance to the many audiences interested in social studies education. If additional information is needed on state social studies programs, please call the state social studies contact directly.

Thomas A. Elliott, President  
Council of State Social Studies  
Specialists

## ALABAMA

### COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

Grade Level	Title or Description of Course Offering	Semester(s) (If Applicable)
Kindergarten through Grade 3	Home, School, and Community (Local, National and International)	
Grade 4	State History Geography	2
Grade 5	United States History	2
Grade 6	World Cultures (Emphasis on Western Hemisphere)	2
Grade 7	World Cultures (Emphasis on Eastern Hemisphere)	2
Grade 8	Civics and Law	1 each
Grade 9	State History Contemporary World Studies	1 2
Grade 10		
Grade 11	United States History	2
Grade 12	United States Government and Economics (Menace of Communism- usually six weeks)	1 each

#### Comments

The teaching of State History and United States History at the level is a statutory requirement. The grade placement is by State Board of Education. Other course offerings are mandated by the State Board of Education.

#### Elective Courses (9-12) Most Frequently Offered

World History, Contemporary World Problems, Psychology, Sociology, Minority Studies

#### Current Curriculum Projects

Law-Related Education, Economics, Environmental Studies

#### State Social Studies Contact

Bob Summerville  
Alabama Department of Education  
111 Coliseum Boulevard  
Montgomery, AL 36193  
(205) 261-2746

## ALASKA

### Social Studies Program

- K-8 Program requirements are left to the localities. American history is suggested for grade 3.
- 9-12 Three units of Social Studies are recommended. One and a half units are required by the Board of Education. They are 1 unit of American history and 1 semester of government or civics.

### Comments

Alaska has adopted three Social Studies "Guides" since statehood in 1959. The scope and sequence adopted in 1966-67 followed the organizational pattern presented in the survey. The 1971 Guide suggested the same "expanding horizons" approach as one of three suggested sequences. The 1986 Guide also "models" this approach.

### Elective Courses (9-12) Most Frequently Offered

Economics, Free Enterprise and Consumer, Environmental Studies, Career Education (throughout guides), Law-Related Education, Citizenship (strand throughout guides), World/Global Studies, Geography

### State Social Studies Contact

## ARIZONA

### COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

#### KINDERGARTEN - GRADE 12

The Arizona State Board of Education, in order to comply with State Law ARS 15-102.16 and 17, prescribes the following social studies requirements:

<u>Subjects to be Taught</u>	<u>Years Taught</u>
*Geography	1-8
*World History	1-8
*/**Arizona History and Constitution	7-8
*/**American History	7-8
*/**Civics (U. S. Constitution)	7-8

\*These subjects may be combined into Social Studies

\*\*These subjects are required by statute to be taught at least one year in grammar school.

The Arizona State Board of Education, in order to comply with State Law ARS 15-1021, requires that the following be included in the minimum credits for graduation:

"One unit of American and Arizona history, including instruction in American and Arizona institutions and ideals.

One unit in American and Arizona Constitutions and Government including instruction in the essentials, sources, and history of the Constitution of the United States and Arizona.

One-half unit of 'Essentials and Benefits of the Free Enterprise System.' (This can be offered in the department that the local board deems appropriate.)"

#### Electives (9-12) Most Frequently Offered

Each school district arranges electives to meet the needs of their students.

#### Current Curriculum Project

Developing a minimum skills list for each social studies course  
Revising the current requirements for graduation/promotion

## ARKANSAS

### COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

Grade Level	Title or Description of Course Offering	Semester(s) (If Applicable)
Kindergarten	Home and School	2
Grade 1	Home, School, and Neighborhood	2
Grade 2	Community Life	2
Grade 3	Community Life in Other Lands	2
Grade 4	A Look at Our World	2
Grade 5	Our United States/Arkansas History	2
Grade 6	Selected World Cultures	2
Grade 7	World Geography	2
Grade 8	American History	2
<b>Grades 9-12</b>		

The only course required by the State of all students is American History (2 semesters). All schools must provide:

- 1 unit American History (gr. 9-11)
- 1 unit World Cultures or World History (9-10 or 10-12)
- 1 unit American Government/Civics (9-12)
- 1 unit Global Studies (11-12)
- ½ unit Geography (9-10)
- ½ unit Economics (11-12)
- ½ unit Contemporary American History (11-12)

#### Comments

The Department of Education must provide course content guides for all mandated courses.

#### Elective Courses (9-12) Most Frequently Offered

World Geography, American Government

#### Current Curriculum Projects

Course content guides, particular emphasis on Global Studies and Arkansas Studies

**COLORADO**  
**COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION**

**Kindergarten - Grade 12**

<b>Grade Level</b>	<b>Title or Description of Course Offering</b>	<b>Semester(s) (If Applicable)</b>
<b>Kindergarten</b>		
<b>Grade 1</b>		
<b>Grade 2</b>		
<b>Grade 3</b>		
<b>Grade 4</b>	Colorado History and American History	
<b>Grade 5 and 6</b>	Man, A Course of Study (about 30% of localities)	
<b>Grade 7</b>	Geography	
<b>Grade 8</b>	American History	
<b>Grade 9</b>	Civics, American Government (Communism included)	
<b>Grade 10</b>	World History	
<b>Grade 11</b>	American History	
<b>Grade 12</b>	Electives	

**Comments**

Colorado has strong local emphasis. The above listed courses are offered in some of the school divisions. The localities are encouraged to develop their own programs within the framework of the state law.

**The State Law requires:**

Teaching of history, culture, and civil government of the state of Colorado and the United States, including contributions of minorities

Teaching of the Constitution of the United States not later than the opening of the junior high schools or seventh grade.

The above scope and sequence may have changed as a result of a Social Studies Task Force Report prepared in 1984.

# GEORGIA

## COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

### Kindergarten - Grade 12

Standards established by the Georgia Department of Education require that social studies be taught for 11 out of the 12 grades in Georgia Public Schools. A new "Basic Curriculum Content" has been adopted by the Georgia Board of Education which specifies social studies content at grades K-8. A new high school policy specifies certain courses at the high school level. Most high schools offer an elective program at the 12th grade level.

Georgia law states that Georgia history and government be required of all students. The "Basic Curriculum Content" now places this course at the 8th grade level.

Grade	Content/Major Topics	
Kindergarten	Self, families, group relations, holidays, social studies skills* (map and globe skills, information processing, problem solving, social participation, time and chronology)	1 year
First	Uniqueness of individual, families, wants and needs, (rules, community helpers, transportation and communication), holidays, citizenship responsibilities, social studies skills*	1 year
Second	Communities (neighborhoods, communities around the world, communities change), interdependence, cultural values as reflected through art, music and literature, citizenship responsibilities, social studies skills*	1 year
Third	Cities (change, comparative studies of communities, needs and services of cities), cultural expressions, communities govern themselves, environmental adaptation, social studies skills*	1 year
Fourth	Regions - geographic, cultural, political, economic, how people adapt to and modify their environments, values of society, social studies skills*	1 year
Fifth, Sixth, and Seventh	Grades five, six and seven should be treated as a block for cultural area studies. The content should cover the following cultural areas: Anglo-America, Africa, Europe, Middle East, Latin America, Asia, and Australia. Geographic patterns, historical, political, economic, social, cultural, and religious development, ethnic and linguistic patterns, cultural expressions through art, music, and literature, interdependence of nations, social studies skills*	1 year

\*Social Studies Skills - Map and globe skills, information processing, problem solving, social participation, and time and chronology are listed the same way under each grade level. Expansion and clarification are found in the social studies guides published by The Georgia Department of Education.

## GEORGIA Continued

Grade	Content/Major Topics									
<b>Eighth</b>	<u>Georgia Studies</u> - Geographic and environmental patterns, historical, political, economic, social, cultural development, ethnic and linguistic patterns, state and local government, interdependence of Georgia and U. S., social studies skills*	1 year								
<b>Grades Nine Through Twelve</b>	<p>The Georgia Board of Education requires that three Carnegie units be completed in social studies in grades 9-12. They are as follows:</p> <table><tbody><tr><td>U. S. History</td><td>1 unit</td></tr><tr><td>Citizenship</td><td>½ unit</td></tr><tr><td>Principles of Economics/ Business/Free Enterprise</td><td>½ unit</td></tr><tr><td>World Studies</td><td>1 unit</td></tr></tbody></table> <p>(This may be taken from the World Geography or World History; however, the Georgia Board of Regents has a World History requirement to enter a public college in Georgia. A large percentage of students will take World History.)</p>	U. S. History	1 unit	Citizenship	½ unit	Principles of Economics/ Business/Free Enterprise	½ unit	World Studies	1 unit	
U. S. History	1 unit									
Citizenship	½ unit									
Principles of Economics/ Business/Free Enterprise	½ unit									
World Studies	1 unit									
<b>Electives</b>	Most Georgia high schools offer a strong elective program for high school seniors who have met graduation requirements. Courses offered may be from any of the disciplines; however, the Behavioral Sciences are strongly encouraged.

**IOWA**  
**COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION**

**Kindergarten - Grade 12**

The following are excerpts from Section 257.25, Code of Iowa:

- Grades 1-6** "The following areas shall be taught in grades one through six:...social studies, including geography, history of the United States and Iowa with attention given to the role in history played by all persons, and a positive effort shall be made to reflect the achievements of women, minorities, and others who, in the past, may have been ignored or overlooked by reason of race, sex, religion, physical disability, or ethnic background, cultures of other peoples and nations, and American citizenship, including the study of national, state, and local government in the United States..."
- Grades 7-8** "The following shall be taught in grades seven and eight as a minimum program:...social studies with attention given to the role in history played by all persons, and a positive effort shall be made to reflect the achievements of women, minorities, and others who, in the past may have been ignored or overlooked..."
- Grades 9-12** "In grades nine through twelve, a unit of credit shall consist of a course or equivalent related components or partial units taught throughout the academic year. The minimum program for grades nine through twelve shall be...four units of the social studies. American government, government and cultures of other peoples and nations, and general consumer education, family law, and economics, including comparative and consumer economics, shall be taught in the units but need not be required as full units. All students shall be required to take one unit of American history which shall give attention to the role in history played by all persons...and one-half unit of the governments of Iowa and the United States, including instruction in voting statutes and procedures, voter registration requirements, the use of paper ballots and voting machines in the election process, and the method of acquiring and casting an absentee ballot...."

## COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

### Kindergarten - Grade 12

Grade Level	Title or Description of Course Offering	Semester(s) (If Applicable)
Kindergarten through Grade 3	Studies Related to the Child's Home, School, Neighborhood, and Community (All grade levels include a study of people and communities in other lands)	
Grade 4	Studies Related to Regions of the World (This grade level often includes a study of Kansas as a region)	
Grade 5 Grade 6	Studies Related to the United States and the Western Hemisphere	
Grade 7	Geography and History of the Eastern Hemisphere (This grade level often includes a study of Kansas history and geography)	2
Grade 8	United States History	2
Grade 9	Civics	2
Grade 10	World History	2
Grade 11	United States History	2
Grade 12	United States Government	2

#### Comments

The Kansas State Department of Education does not specify the sequence of courses for local schools. However, in order to graduate from high school in Kansas, a student must successfully complete three units of credit in social studies, including one unit of U. S. History and at least ½ unit of U. S. Government. These courses of study must be taken at grade levels 9-12. The sequence listed above is commonly found in Kansas schools.

#### Elective Courses (9-12) Most Frequently Offered

Sociology, Psychology, Economics, Current Events, Ethnic Studies, Law Education, Global Education, Kansas History

#### Current Curriculum Projects

A project with the Kansas Bar Association and Kansas Supreme Court involving the development of law related education materials for grades kindergarten through 12.

## NEBRASKA

### COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

#### Kindergarten - Grade 12

##### Nebraska School Laws

79-213 "An informed, loyal, and patriotic citizenry is necessary to a strong, stable and prosperous America. Such a citizenry necessitates that every member thereof be fully acquainted with the nation's history, that he be in full accord with our form of government, and fully aware of the liberties, opportunities, and advantages of which we are possessed and the sacrifices and struggles of those through whose efforts these benefits were gained. Since youth is the time most susceptible to the acceptance of principles and doctrines that will influence men throughout their lives, it is one of the first duties of our educational system to so conduct its activities, choose its textbooks, and arrange its curriculum in such a way that the love of liberty, democracy, and America will be instilled in the heart and mind of the youth of the state."

(1) "Every school board shall at the beginning of each school year, appoint from its members a committee of three, to be known as the committee on Americanism, whose duties shall be: (a) To carefully examine, inspect, and approve all textbooks used in the teaching of American history and civil government in the school. Such textbooks shall adequately stress the services of the men who achieved our national independence, establish our constitutional government, and preserve our union and shall be so written as to develop a pride and respect for our institutions and not be a mere recital of events and dates. (b) Assure themselves as to the character of all teachers employed, and their knowledge and acceptance of the American form of government. (c) Take all such other steps as will assure the carrying out of the provisions of this section."

(2) Beginning with the school term in 1971, all American history courses approved for grade levels as provided in this section, shall include and adequately stress contributions of all ethnic groups to the development and growth of America into a great nation, contribution to art, music, education, medicine, literature, science, politics, and government, and the war services in all wars of this nation."

Other provisions of the statute include:

All grades below the sixth grade shall devote at least one hour a week to the recital of stories having to do with American history, singing of patriotic songs and development of reverence for the flag.

In at least two of three grades from the fifth to the eighth, three periods per week are required to be set aside to be devoted to the teaching of American history.

In at least two grades in every high school, at least three periods per week are required to be devoted to the teaching of civics, during which specific attention is given to: (a) The Constitution of the United States and the State of Nebraska (b) The benefits and advantages of our form of government and the dangers and fallacies of Nazism, Communism, and similar ideologies and (c) The duties of citizenship.

##### Elective Courses (9-12) Most Frequently Offered

We see economics becoming increasingly popular. Modern problem courses with an International/Global Education orientation are becoming more important. Psychology, sociology, and anthropology are the least often chosen electives.

## **NEBRASKA Continued**

### **Current Curriculum Projects**

#### **Nebraska Bicentennial Curriculum Project**

The Nebraska Junior High Economics Project has been used across the state fairly successfully.

<b>Grade 11</b>	United States History and Nevada Government
<b>Grade 12</b>	United States Government and Nevada Government

#### **Comments**

In grade K-3, the content is suggested, not required. Content for grades, 8, 10, 11, and 12 is required by statute and grade levels are suggested by Nevada Department of Education.

Social studies content which must be included in the elementary and secondary curriculum is that which is stated in Nevada Revised Statutes (American History, Nevada History, American Government, and the United States and Nevada Constitutions). Requirements in content such as Latin America, Africa, Australia, and the Pacific Islands to be taught in a certain grade level are no longer specified.

Content must be utilized from any areas considered appropriate in order to meet the requirements in the statutes and Course of Study required by the State Department of Education. The Course of Study requirements are concepts, generalizations, and activities in the social sciences, not specified by grade level. It is suggested, however, that the school district insure a balance in the selection of content (textbook series and audio-visual media, etc.) so that the student is exposed to many of the political areas, regions, and cultures of the world.

## NEW HAMPSHIRE

### COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

**Social Studies.** Social studies education is the study of related knowledge and modes of inquiry selected from history, humanities, and the field of social science, including economics, political science, sociology, anthropology, psychology, geography, and philosophy. It helps students acquire the knowledge, skills, and attitudes necessary for effective participation in the life of the community, the nation, and the world.

a. **Unit Requirement.** The approved high school shall provide FIVE (5) UNITS of credit of which one (1) unit shall be instruction in National and State History and Government as defined in RSA 189:11. Three (3) units shall include the areas of economics, geography, and world history or global studies. (Economics shall mean at least ½ unit in basic business and economic education as required for graduation and defined as follows: The study of the development, goals, and essentials of the American free enterprise system, including the role of the entrepreneur, labor, government, and those forces that influence the production, distribution, and consumption of goods and services. The decision-making process in business and the importance of human relations skills shall be included.) One (1) unit shall consist of credit offerings from one or more of the following areas: sociology, psychology, anthropology, political science, and philosophy.

b. **General Program Objectives.** Instructional content and learning activities shall be planned to enable students to:

- acquire through study and practice the skills of critical thinking, effective decision making, and human relations of benefit to one's self and society;
- read or examine historical narratives, documents, and other evidences of the past;
- examine cause and effect, review chronologies, consider ideas, and analyze trends in order to better understand the past and the present and to anticipate the future;
- increase awareness and concern for the ways that the world's people, resources, and environments are interrelated and interdependent;
- know the geography of the United States and the world and its impact on political, economic, and social development;
- understand and evaluate through study, observation or participation, the goals, structure, and operation of our government and other governments;
- understand basic economic principles in order to examine by comparison and contrast our system of enterprise and its contributions to the economic, political, and social development of our nation and the world;

## **NEW HAMPSHIRE Continued**

-understand and accept the responsibilities of citizenship and share in the rights and benefits granted to citizens;

-apply the concepts and skills of history and the field of social science to real societal issues.

**COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION**

**Kindergarten - Grade 12**

<b>Grade Level</b>	<b>Title or Description of Course Offering</b>
<b>Kindergarten - Grade 6</b>	Content and length of study are local option. Conceptual framework usually includes a comparison and analysis of the immediate environment with the world communities as well as an interdisciplinary approach. State history is included with a focus at grade four.
<b>Grades 7-8</b>	<p>Courses, length of courses, and placement are local options. Usual offerings are United States History, two semesters at grade eight, New Mexico History and Culture, one semester at grade seven, and Geography (W. Hemisphere), one semester at grade 7.</p> <p>Programs should emphasize the value of cultural diversity and recognize intrinsic worth of each culture.</p>
<b>Grades 9-12</b>	<p>United States History, 2 semesters, Grade 11            Civics/Government, 1 semester, Grade 9            Elective, 1 semester, Grades 9-12</p> <p>Placement of courses is local option. Students required to pass a law and government test at grade ten (3 opportunities to pass the test 10, 11, 12). Failure does not deny diploma. Successful students' diploma endorsed with gold seal.</p> <p>A number of schools offer World History as an elective. Some schools require a third unit in social studies and the trend is toward World History. Other electives include Sociology, Anthropology, Psychology, Economics, and World Cultures.</p>

**Comments**

Currently (beginning school year 1985-86, the State Board of Education requires school districts to develop student competencies in social studies. These will be based on seven broad competencies developed by a statewide task force. Each competency includes a number of subcompetencies. While schools are not required to use these, they must develop their own (and establish checkpoints at grades 3, 5, and 8) to support the following SDE mandated exit competencies:

## **NEW MEXICO Continued**

Students, upon graduating from New Mexico high schools, shall

- demonstrate knowledge of AMERICAN HISTORY and the ability to analyze that history relative to economic, political, social, and cultural developments.
- demonstrate knowledge and understanding of the AMERICAN POLITICAL SYSTEM and the individual rights and responsibilities within that system.
- demonstrate knowledge of GLOBAL HISTORY and the ability to analyze that history relative to economic, political, social and cultural developments.
- demonstrate knowledge of the AMERICAN ECONOMIC SYSTEM, the individual's role in that system, and the interaction of the American system with other economic systems.
- demonstrate knowledge of and recognize the influence of GEOGRAPHY (physical, economic, political and cultural) in the development of societies.
- demonstrate knowledge of NEW MEXICO HISTORY and the ability to analyze that history relative to cultural, economic, political and social development.
- develop and APPLY critical thinking, decision-making, research, and communication skills.

## TENNESSEE

### COURSE OFFERINGS IN SOCIAL STUDIES EDUCATION

#### Kindergarten - Grade 12

According to RULES, REGULATIONS, AND MINIMUM STANDARDS set by the Tennessee State Board of Education, the social studies program shall "center on man and his ways of living, both past and present. Emphasis shall be given to man's heritage, environment, culture, institutions, groups and ideas in the organization best suited to local needs."

#### Grades 1-8

"Living--at home, at school, and in the community--shall be the emphasis of the social studies program in grades 1-3. Students shall have experiences that enable them to learn about themselves and others as people living together in our nation and the modern world. In further exploring man's ways of living, in grades 4-8, content including the study of our state, our national and state constitutions, the local community, our country as a developing democracy, and various cultures throughout the world shall be offered. Emphasis shall continue on concepts, skills, and the clarification of values."

#### Grades 9-12

"The social studies program in grades 9-12 must include one unit in American history, including a study of the Tennessee Constitution and the U.S. Constitution, offered preferably in the fourth year, and shall be required of every student."

"One-half unit of instruction in economics is required for graduation and shall include but not be limited to a study of the fundamental principles of the free enterprise system and the factors that influence its function as well as rudiments of consumer economics preparing the student to be a more intelligent and responsible purchaser and user."

#### Elective Courses (9-12) Most Frequently Offered

World Geography, World History

#### Current Curriculum Projects

Consumer Education, Career Education, Reading in the Content Areas, Law-Related Education

The scope and sequence model selected or developed by the local school districts development should provide a variety of social studies offerings. In a quality social studies program students should be given the opportunity to take at least one course from each category; and local programs should offer at least two courses in each category--synoptic studies, behavioral studies, and analytical studies. Interdepartmental and interdisciplinary study should be encouraged throughout the K-12 program.

Students should be provided with community and civic participation opportunities: e.g., school or community clean up campaigns, visits to nursing homes, cross age tutoring, volunteer service or internships in government offices, human service agencies, or businesses.

## **WISCONSIN Continued**

Various school activities such as serving as class, club, or student council leaders; participating in debate and forensics, Close-Up, Wisconsin Student Caucus, Model United Nations, Positive Youth Action Team activities, or becoming involved with national or foreign exchange programs should be encouraged as important and integral parts of the social studies curriculum.

**Comments**

The State of Wyoming is non-prescriptive as to actual program content and grade-level placement. Local districts determine all scope and sequence. The arrangement listed above reported to you in 1970 was likely reported as typical. With the move away from electives in many of our schools, the changes marked may be "typical" but no two schools are exactly alike.

**Elective Courses (9-12) Most Frequently Offered**

American Government, Economics, Psychology, Sociology

**THE STATUS OF SOCIAL STUDIES IN THE UNITED STATES  
IN THE MID-1980's\***

**by Irving Morrisett**

**SUMMARY**

1. This study was a joint effort of the Council of State Social Studies Specialists and the Social Science Education Consortium. It was in part a follow-up to a 1976 study which focuses primarily on the social studies curriculum in the various states. This study analyzes curriculum changes and also deals with requirements for teachers and students and with the roles of CS4 personnel. Responses to most of the questions posed in a questionnaire were made by 46 out of 51 "states"--counting the District of Columbia as a "state." Twenty-seven states responded to a second, supplementary questionnaire.

2. The first generalization from the study, not very surprising, is that there are very different practices and situations among the 51 states. Since questions were answered from many different perspectives, often in quite brief and general terms, it has been difficult to draw precise generalizations. The writer has therefore taken considerable liberties in interpreting and generalizing from the responses.

3. Despite these great differences among the states, a very strong generalization emerges from the study, namely, that the current "flavor" of social studies throughout most of the country is highly prescriptive. Many prescripts have been applied in recent years to students, teachers, and curricula.

---

\*This publication was prepared with funding from the National Institute of Education, U. S. Department of Education, under contract no. 400-83-0012. The opinions expressed in this report do not necessarily reflect the positions or policies of NIE or ED.

Elements in the responses to the first survey that were interpreted as prescriptive number 113, made by 42 states, each of which indicates from one to five such prescriptive elements. Of seven elements related to teachers and students in the second survey--such as certification and graduation requirements--all 27 reporting states said that two or more of the items had become more prescriptive and 18 stated that more than half of these elements had become more prescriptive.

4. Major changes have taken place since 1976 in requirements or recommendations for teachers in training, teacher certification, and inservice assessment in many states--in two thirds of the states, if the 27 states responding to the second survey can be taken as representative.

5. Most states have increased graduation requirements, many in the context of statewide testing and specification of competencies for specific courses.

6. In most states, various courses are required in addition to several history courses, either at state or local levels, and requirements for such courses have been increased in many states. Courses most frequently prescribed include geography, global studies, citizenship, law-related education, and economics.

7. The duties and influence of state social studies specialists vary greatly from state to state. A few states have no social studies specialist. In many states the specialist is burdened with many other duties. In many other states, however, the social studies are holding their own or flourishing, in some cases aided by more than one specialist.

8. Recent trends in social studies with respect to requirements on teachers, students, and curricula, predominantly trends toward tighter requirements or recommendations, are seen overwhelmingly by state social studies specialists as being favorable to social studies in their own states and, to a lesser extent, good for social studies in the nation as a whole.

9. All in all, quotations from three states may give the best summary of the state of social studies in the nation:

Arkansas: "We have a long way to go, but we're headed in the right direction."

Oregon: "Much enthusiasm for change much resistance to change, much indifference."

Pennsylvania: "Current conditions are 'confused' as a result of new...requirements....It will probably take a few years for the dust to settle."

## INTRODUCTION

This study was planned and conducted jointly by the Council of State Social Studies Specialists (CS4) and the Social Science Education Consortium (SSEC). It is intended in part as a follow-up to the National Survey of Social Studies Education conducted and published by the History, Government, and Geography Service, Division of Secondary Education, Virginia Department of Education, in 1976. In that study, the required or typical course offerings for K-12 social studies for each of the responding states was shown, when appropriate to the state, together with the agency (state or local) requiring specified courses, elective courses most frequently offered, and "Current Curriculum Projects" of the state agency. (In this and the following discussion, the term "state" will be used to include the fifty states and the District of Columbia. In the 1976 study, 49 of the 51 "states" responded, no reports being received from Alaska or Rhode Island.) The full 1976 study is available in ERIC, ED 128 275.

The first survey form for this study was designed primarily by a committee of CS4, consisting of Thomas Elliott (Virginia), chairman, Gwen Hutcheson (Georgia), and Paul Johnson (Nebraska). This committee also took responsibility for distributing the questionnaire and doing extensive follow-up to get responses

from as many states as possible. An abbreviated copy of the survey instrument is presented in the Appendix.

Responses were received from all states but Alaska, Rhode Island, and West Virginia. Colorado and Utah submitted minimal responses. Most of the analysis is therefore based on 46, 47, or 48 states at the most. For some questions, no responses were given by some states, so that some of the analyses of specific items are based on fewer than 46 states.

Preliminary results of the survey were presented for comment at the meeting of CS4 consultants during the annual meeting of NCSS in Chicago in November 1985. At that meeting, a supplementary questionnaire was also distributed, to confirm and elaborate the trends indicated in the original survey, as well as to gather some attitudinal data about the recorded changes. Twenty-seven states responded to this questionnaire.

The first survey instrument focused on changes that had occurred, since the 1976 report, in curricula or courses, in teacher certification requirements, and in emphasis by state departments of education on "eight fundamental statements pertaining to the future of the social studies curriculum" described in a 1979 article by Richard Gross and Thomas Dynneson (See Social Education, May 1980, pp. 370-74). Questions were also asked about the functions of state social studies specialists, current "hot topics" in each state, and the status and direction of social studies in local districts in each state.

The second questionnaire asked the states to compare their typical social studies curricula with a dominant social studies model that has long existed, sought information about old and new requirements in nine topic or subject areas, and requested judgments about the extent of change in requirements for teacher training, certification, and assessment.

Despite certain commonalities, there is a great diversity of practices and requirements in social studies among the 51 states and, within the states, among school districts. There is great variation in the degree of power and influence exercised by state governments over local district practices and requirements in social studies. This is due in part to, or reflected in, the resources made available to social studies specialists in state offices. A few states have no social studies specialists, others have a social studies specialist with a few or many other responsibilities, and a few states have as many as four, five, or six specialists. It is also due to differing philosophies at the state level with respect to control by the state over local districts. The states vary from rather complete mandates on district curricula to little or nothing in the way of requirements. Mississippi, going against the tide, has recently abandoned all course mandates except career education.

Other difficulties arose with respect to the survey responses. Some responses were fairly complete and informative, others rather vague. Responses to particular questions which said "see attached," referring to statements about current policy or practices, often made it difficult to ascertain what changes had taken place since 1976, which was a chief objective of this study. This was particularly true of Question 1, concerning changes in curricula or courses, where it was difficult to make judgments about changes when a current curriculum was described without comments from the respondent about changes that had occurred.

In the effort to obtain useful and interesting results from the survey, liberties have been taken in interpreting the data. Some errors or misinterpretations were corrected with the help of CS4 members who read a draft report; others no doubt remain.

## THE PRINCIPAL "FLAVOR" OF SOCIAL STUDIES TODAY: PRESCRIPTIVE

The dominant characteristics of social studies in the U. S. today--as is probably true of other areas of pre-college education--is that it is prescriptive. State agencies have prescribed standards, are in the process of prescribing standards, or are talking about prescribing standards. There are prescripts about what teachers must do and what students must do, and, to a lesser extent, what courses must do or be.

The analysis of prescriptive elements is taken from Questions 1, 2, 3, and 6 of the survey instrument. Of 47 states responding to one or more of these questions, 42 gave responses that are classified here as prescriptive. Each of these 42 states indicated from one to five such prescripts, for a total of 113 such items.

Question 2 asked "Have major changes occurred in your state since 1976 in the area of teacher certification regulations?" Twenty-nine states (1)\* out of 46 answered "yes" to this question. Nineteen states (2) out of 46 answered "yes" to Question 3, which asked "Are teachers required to take the National Teacher's Examination or other such instruments prior to entering the teaching profession?" These answers do not indicate whether such requirements are new or of long standing. However, many of the responses to other questions indicated recent or current concerns and discussion about teacher certification. Indeed, 26 states (3) indicated concerns or requirements about teacher certification, mostly in the context of increased requirements.

Twelve states (4) indicated that new requirements had been put in place governing courses required for teachers in training.

---

\*This number and similar numbers refer to the tabulation of individual state responses in Table 2, at the end of the article.

Not surprisingly, fewer requirements were put on experienced teachers than on teachers in training or beginning teachers. Nine states indicated some form of requirements for experienced teachers. Arizona has imposed minimum skill requirements; Hawaii, Kentucky, and the District of Columbia require some form of competency testing. Mississippi and Pennsylvania have instituted renewal or recertification requirements. New Mexico, Oklahoma, and Texas require some other types of accountability or appraisal of experienced teachers.

The most common kinds of increased in student prescripts are n graduation requirements. Twenty-four states (5) have strengthened graduation requirements.

Almost as popular as increased graduation obligations are statewide testing plans. Nineteen states (6) reported some form of statewide testing, new in recent years.

Some of the statewide testing programs state or imply related requirements for promotion between grades. Arizona is in the process of revising standards for promotion based on skills in required courses.

### THE SOCIAL STUDIES CURRICULUM

Question 4 asked "To what degree have the eight fundamental statements pertaining to the future of the social studies curriculum posed in 1979 by Gross and Dynneson been addressed by your Department of Education? Please indicate your response by circling the number representing the degree of implementation as follows." A five-point response scale was keyed as "fully," "strongly," "average," "weakly," and "not at all."

About forty states responded to each of the eight questions. In the following summary, the percentage of responses to the first two options have been combined and contrasted with the percentage of responses to the last two

options, the remaining percentage representing, of course, the percentage responding "average."

Percentage of Responses

<u>"fully" or "strongly"</u>	<u>"weakly" or "not at all"</u>	<u>Item</u>
32	38	a. Determination of Criteria for the selection of content in the social studies.
49	29	b. Identification of a scope and sequence for the social studies curriculum.
56	24	c. Identification of a "common core" of student outcomes/expectations in social studies from kindergarten to grade twelve.
28	31	d. The positions to be taken in social studies relative to achievement tests.
38	42	e. Teacher change and how improvements can be achieved in social studies.
34	41	f. Determination of means to insure improved implementation of new courses, approaches, and materials in social studies.
36	33	g. Extending the teaching of social studies.
38	32	h. Identification of strategies to improve the status of social studies as a curriculum offering.

As one of the respondents pointed out, it is not clear what a department of education might have done when it "addressed" one of these concerns. In "strongly" addressing the matter of achievement tests, for example, did the department strengthen or weaken its recommendations or requirements about achievement tests? The wide scatter of responses to these questions is probably attributable both to great variations in trends in the 51 states and to various ways in which respondents interpreted the questions.

Nevertheless, some inferences can be drawn from the responses. The areas that received the greatest attention are item (b), concerning scope and sequence, and item (c), concerning a common core of expectations. These emphases accord with other indications in the study of a movement toward a tightening of course recommendations or requirements and of expectations about student outcomes.

The two concerns that received the least attention are items (e) and (f). Item (e) refers to efforts to improve the performance of teachers. This result might appear to contradict other results of the study which indicate a strong movement of tightening requirements for teachers with respect to prescripts for teachers in training, teacher certification, and inservice assessments. However, it could be interpreted as an indication that, while legislatures and state departments are laying down stricter requirements for teachers in terms of courses and tests, they are at the same time failing to provide the means by which improvements in teacher education and performance can be made.

The response to item (f), indicating little concern for improved implementation of new courses, approaches, and materials, may accord with the observation that many states and districts have been moving back to the old "tried and true" courses, approaches, and materials, after many of the innovations of the 60's and 70's appear to have been tried and found wanting.

Item 6 brought forth a great variety of responses. The question reads "What issues or 'hot topics' are currently being addressed in your state by teachers, administrators, legislators, and the public that would have significant implications for social studies education?" The most frequent responses were about courses or topics. Some states showed concern about global or international education (Florida, Minnesota, Missouri, New Mexico, and Wisconsin). Others indicated their concerns about state, U. S., or world history

requirements (Indiana, New Mexico, Pennsylvania, and South Carolina), with Arizona giving consideration to decreasing its history requirements. Others are discussing economic education (Indiana, Minnesota, Missouri, and Wisconsin), with Louisiana reporting a reaction against an emphasis on free enterprise. Other concerns about courses or topics related to religion, creationism, or humanism (Florida, North Carolina, and Wisconsin); increasing geography requirements (Arizona, Indiana, and South Dakota); nuclear questions (California and South Dakota); nuclear questions (California and South Dakota); environmental education (Wisconsin); peace education (Wisconsin); values and ethics (California); and law-related education (Maryland).

Another group of responses relates to curriculum matters more general than specific courses and topics. These include curriculum planning (New York and Wisconsin); scope and sequence (Georgia); implementing new curricula (Alabama and New York); and various concerns about skills (Connecticut, Minnesota, New York, and Oregon).

Responses to this open-ended question that are even more general relate to school improvement (Kansas, Minnesota, North Carolina, and North Dakota); school reorganization (Arkansas and Nebraska); gifted and talented (Indiana); remediation (Maryland and Virginia); legislation (Massachusetts); and computers (Minnesota). More than half a dozen states mentioned funding and salaries, a matter that no doubt concerns many more states than these.

### CHANGES IN COURSE OFFERINGS AND REQUIREMENTS

Thirty-six states (7) out of 47 responded "yes" to Question 1, "Have curriculum or course changes occurred in your state requirements since 1976?" Elaboration of the changes pointed to broad standards or guides in force, coming

into force, or being considered. In addition, many references were made to changes in recommendations or requirements concerning specific courses.

Nine states (8) indicated that new standards or guidelines for social studies have been put into force or were in the process of being put into effect. In addition, Alabama, Connecticut, and New York (with respect to grades 7-12) responded that a review of guides or recommendations is under way and may result in changes.

Many states are instituting some kind of competency testing. Arizona is developing a minimum skills list for each course. Similar recommendations or requirements have been made, or are being made, by Arkansas, Indiana, Louisiana, Minnesota, Missouri, and Oklahoma. Idaho is calling for "more structured content." Hawaii is changing from thematic to historical focus in its courses. California has established Model Curriculum Standards for its History-Social Science Framework, requiring that districts compare their local offerings with the Model at least every three years.

The course change mentioned most frequently (eleven states (9) was economics. Among these, Georgia and New Hampshire indicated a free-enterprise emphasis in the requirement, and others probably included such an emphasis. Louisiana noted the frequency of offerings of a free-enterprise course in the districts. Oklahoma went against the crowd, removing an economics course mandate.

The course change mentioned next most frequently was in the area of global education, including a broader view of non-Western countries and cultures (ten states (10).

Arkansas, Connecticut, Georgia, Kentucky, and Maryland indicated new requirements or recommendations, or renewed emphasis, on citizenship. Arkansas, Connecticut, and South Dakota noted new emphasis or requirements in

geography. Moving against the mainstream of increased requirements, in addition to Oklahoma's removal of economics, was Wyoming's removal of a U. S. history graduation requirement and Mississippi's abolition of all mandates.

### RESPONSIBILITIES OF STATE SOCIAL STUDIES SPECIALISTS

Question 5 asked "Which of the following functions best describe your primary responsibilities as a state social studies specialist?" Forty-five states responded to this question, with indicated responsibilities varying from one to six of the possible six responses. Total responses to each of the six categories were as follows.

<u>Number of states</u>	<u>Responsibility</u>
35	Curriculum development functions
25	Administrative functions
18	Regulatory functions
39	Leadership functions
37	Assistance (serving as consultant to local districts at their request)
18	Others

Specialists indicating that they served only one of these functions were Massachusetts (assistance), South Dakota (assistance), and Washington (leadership). The five states of California, Delaware, Louisiana, Montana, and Wisconsin checked all six items. In between, four checked two items, seven checked three items, fourteen checked four items, and eleven checked five items. The average number of items checked was a little less than four.

The eighteen states that checked "other" responsibilities described a very wide range of additional functions. About half of these had "other" responsibilities related to social studies, including relations with the legislature

(California), relations with colleges and universities (Georgia and Wisconsin), and relations with various other social studies-related interest groups (Arkansas, Indiana, New Hampshire, and New Mexico).

The other half of those with "other" responsibilities had a great variety of duties, mostly or entirely unrelated to social studies. Perhaps this group is best characterized by the listing on the business card of the Maine specialist: Social Studies, Self-Evaluation, High School Accreditation, Dropouts Chapter 106, Habitual Truants and Dropouts, School Approval, etc., etc., etc.

### STATUS OF SOCIAL STUDIES IN LOCAL SCHOOL DISTRICTS

Forty-four states gave some response to Question #7, "What impressions do you have about the status and direction of social studies in the local school districts in your state?" The responses can be characterized roughly as "upbeat," "downbeat," and "neutral," with some states commenting in more than one of these categories.

On the "downbeat" side, the most common comment concerned the low status of social studies, or de-emphasis on social studies, or competition with other subjects, mainly science and math, usually to the detriment of social studies. Sixteen states (11) made comments under this general category. Most but not all attributed the low status or the problems to competition with other subjects. Two (Arkansas and Oklahoma) are concerned about low standards for social studies teachers. Montana and South Carolina are concerned about the lack of energy and leadership at the local level, while New Hampshire feels the need for stronger inspiration and leadership at the national level.

Many states mentioned elements making for stronger social studies. Four states feel that increasing strength or influence of state personnel are improving matters; Kentucky has gone from one to four consultants at the state level, and Arkansas has its first full-time social studies consultant. Three states (New

Jersey, North Dakota, and South Dakota) mentioned the influence of strong state social studies councils. Five states--Alabama, Michigan, Missouri, New York and North Carolina--feel that social studies is being strengthened by inclusion, or possible inclusion, in statewide testing.

The factor mentioned most frequently (by 13 states (12) as causing change at the local level is action to meet new requirements about courses or standards--mostly state standards (often but not always required) but also standards set locally. These required or suggested changes are seen as leading to improvement in social studies in some cases; in other cases they were noted without an implication as to whether the changes represent improvement.

Thirteen states mentioned other local developments that are seen as positive elements: for example, staff development (Minnesota); forthcoming actions of state commissions which may have a positive effect on social studies (Alabama and Texas); restoration of emphasis on social studies in the primary grades (Iowa); and greater interest in particular subject areas (California, geography and history; Hawaii, citizenship education; Kansas, law-related education; and Iowa, global education). Other comments were less specific, pointing to general improvements in interest in or the climate for social studies; for example, from Arkansas: "We have a long way to go, but we're headed in the right direction."

Among the half dozen or so states whose comments might be considered neutral--neither upbeat or downbeat--are these comments about the local level: "holding their own" (Delaware); "a traditional approach...likely to remain so" (District of Columbia); "quality varies considerably from outstanding to very, very weak" (Missouri); "becoming more traditional" (Ohio); "much enthusiasm for change, much resistance to change, much indifference" (Oregon) and "current conditions are 'confused' as result of new...requirements....It will probably take a few years for the dust to settle" (Pennsylvania).

## THE SECOND SURVEY

Twenty-seven states responded to the second survey. The format of the questionnaire used for this survey is shown in Table 1, along with summary results.

The first question relates to the general pattern of social studies, referring to a typical pattern that has existed for 60 years or so. Responses to item 14 under the first question indicate that there have been moderate departures from the dominant pattern in the 25 responding states in recent years, but that, as indicated by responses to Item 13, most patterns are still fairly close to the long-familiar pattern. Note that the responses of individual states to each of these items are given in columns 13 and 14 of Table 2, and similarly for other items in this section.

Table 1

1. A May 1980 article in Social Education by Superka, Hawke, and Morrissett, based on Project SPAN, stated that the dominant social studies curriculum organization pattern in the U. S. has been, for a long time, as follows:

K-Self, School, Community, Home 1-Families 2-Neighborhoods 3-Communities 4-State History, Geographic Regions 5-U. S. History 6-World Cultures, Western Hemisphere 7-World Geography or History 8-American History 9-Civics or World Cultures 10-World History 11-American History 12-American Government	(13) To what extent does your dominant state social studies curriculum pattern <u>now</u> resemble this pattern?					<u>Number of Responses</u>
	<u>Very Similar</u>		<u>Very Different</u>			
	1	2	3	4	5	
	5	14	5	1	0	25
	(14) To what extent has it departed, or departed further, from this pattern in the last 5 to 8 years?					<u>Number of Responses</u>
	<u>Very Similar</u>		<u>Very Different</u>			
	1	2	3	4	5	
	5	9	8	3	0	25

2. The 1976 study asked about specific courses required or recommended by states or districts. Some of these are included here, plus others. Please check as appropriate.

	Long-standing (over 4-5 years) Requirement or Recommendation by		New (last 4-5 years) Requirement or Recommendation by		Not Required or Recommended (5)	Number of Responses
	State (1)	LEAs (2)	State (3)	LEAs (4)		
(15) Economics	12	3	6	1	5	27
(16) Economics with free- enterprise emphasis	7	0	4	3	10	24
(17) Consumer education	10	1	3	3	9	26
(18) Environmental studies	6	0	4	1	15	26
(19) Career education	10	0	4	0	11	25
(20) Law-related education	9	3	8	2	4	26
(21) Citizenship	13	3	7	0	5	26
(22) World or global studies (a broad view of world)	13	0	10	0	3	26
(23) Geography	9	1	10	0	3	23

3. In your state, in the last 4-5 years, have requirements or recommendations with respect to various parts of the educational milieu been made more or less prescriptive?

	Much less (1)	Somewhat less (2)	About the same (3)	Somewhat more (4)	Much more (5)	Number of Responses
(24) Teachers in training?	-	-	8	13	5	26
(25) Teacher certification?	-	-	7	9	9	25
(26) Inservice assessment or requirements?	-	-	7	8	9	24
(27) Graduation requirements?	-	-	4	13	9	26
(28) Specified competencies in courses?	-	-	8	5	13	26
(29) Courses required or recommended by your state?	-	1	9	11	5	26
(30) Courses required or recommended by LEAs?	1	-	9	11	2	23

4. Whatever trends (if any) you have indicated in the preceding question, do you consider the present direction of education to be:

	<u>Very Poor (1)</u>	<u>Poor (2)</u>	<u>So-so (3)</u>	<u>Good (4)</u>	<u>Very Good (5)</u>	<u>Number of Responses</u>
(31) For social studies in your state?	-	1	3	21	1	26
(32) For social studies in the nation?	-	1	13	13	-	26

The second question deals with changes in requirements or recommendations for specific courses. States were asked to distinguish between prescripts of long standing--over four or five years--and those imposed in more recent years. In some cases, respondents indicated that a course requirement was both long-standing and new, presumably indicating that a long-standing requirement had been strengthened. In such cases, the response was tabulated only as long-standing, so that the total number of responses for the question adds to the total number of states responding. (As a result, the recency of requirements is somewhat understated.) Similarly, if a state indicated that a requirement or recommendation was made by both a state agency and a local agency, the response was tabulated only as a state requirement.

Nineteen of the 27 reporting states indicated an increase in requirements or recommendations for one or more of the nine subjects. Sixteen of the states formerly had requirements or recommendations for fewer than half of the nine subjects; now only six have requirements of less than half. Nine of the states formerly had requirements or recommendations of more than half of these subjects; now 18 of the 27 have more than half.

As the tabulation shows, citizenship, world studies, and geography are the courses most frequently prescribed among the nine subjects listed, with world studies and geography having moved into this category most prominently in recent years. Close behind these three in extent of requirements or recommendations are law-related education and economics, with law-related education receiving much of its emphasis only in recent years. Well behind the five listed subjects are the other four--economics with free-enterprise emphasis, consumer education, environmental studies, and career education--although these have also been prescribed more frequently in recent years than in the past.

As with other items in this report, details of state responses are shown in Table 2. In the case of item 15 (requirement of economics), for example, a "1" in column 1? opposite a state's name means that this subject has been required or recommended for more than four or five years at the state level; a "4" means that it is a new requirement, at the local level.

The responses to question 3, about training and course requirements, reinforced the responses to the first questionnaire, indicating a strong movement toward more requirements or recommendations. All reporting states said that two or more of the seven items had become more prescriptive; 18 out of 27 states have become more prescriptive in recent years for more than half of the seven listed subjects.

Tightening of graduation requirements led the list, with 22 of 26 states responding that requirements or recommendations are stricter than in the past. Close behind graduation requirements in the movement toward more prescripts was teacher certification (19 of 26), teacher training (18 of 26), and specification of course competencies (18 of 26). Not far behind were state course requirements (16 of 26), inservice assessment (15 of 20), and local course requirements (13 of 23).

Among the most significant results of both questionnaires is the attitude of state specialists toward the recent, mostly prescriptive, trends. They overwhelmingly (22 of 26) view the recent trends as "good" or "very good" for social studies in their own states. It is rather puzzling, however, that fewer specialists (13 of 26) see the recent trends as good for the social studies in the nation as a whole.
